The long wavelength correlation of the gravity and topography and the large apparent depths of compensation (approximately 150-300 km) for large highland regions on Venus require significant differences between the interior structure of Earth and Venus. The morphology, geologic history, and large apparent depths of compensation for many highlands have been interpreted to indicate areas of mantle upwelling. A large apparent depth of compensation at a mantle upwelling is generally interpreted to indicate the base of the thermal boundary layer of convection. A boundary layer thickness of 150-300 km implies that the interior of Venus is presently much colder than Earth and thus tectonically less active. The recent Magellan mission has provided contradictory evidence regarding the present level of tectonic activity on Venus, prompting considerable debate. In this study, we investigate the possibility that a chemical boundary layer acts together with a thermal boundary layer to produce large apparent depths of compensation, or equivalently, large geoid-to-topography-ratios (GTR's). The crust of a planet forms through partial melting of mantle materials. Both the melt and the residuum are lower in density than unmelted (or undepleted) mantle. In the absence of vigorous plate tectonics, a thick layer of buoyant residuum, or depleted mantle, may collect beneath the lithosphere. In this scenario, the thermal lithosphere does not need to be thick and cold to match the GTR's. Cooling of the depleted layer may lead to overturn of the upper mantle and episodic resurfacing with time scales on the order of 300-500 MY, consistent with the resurfacing age of Venus.

Ancient, stable, continental cratons possess thick, subcontinental-lithospheric mantle 'keels' which favor particularly the emplacement of diamondiferous kimberlites and included peridotites and eclogites. These refractory mantle samples of the roots provide hard constraints on the theories of formation, growth, and evolution of these cratons. Xenoliths containing only primary garnet and clinopyroxene (eclogites), although rare in most kimberlites, can retain the geochemical signatures of their parent protoliths (e.g., subducted oceanic crust, ancient mantle) thus offering the opportunity to address mantle processes which may have taken place at earlier times in the Earth's history. In fact, it has been postulated that some eclogites are residues from the accretion of the early Earth. Nd and Sr isotopic data are presented which may be interpreted as evidence of an early (greater than 4 Ga) mantle differentiation event. The kimberlites of Yakutia are located both marginal and central to the Siberian craton, and a wide variety of xenoliths are present within them. The Siberian mantle samples have received little attention in the western world, largely because suitable suites of Yakutian samples have not been readily available. Importantly, there is evidence that metasomatism of the Siberian lithosphere has been considerably less intense or extensive than for the Kaapvaal craton. Therefore, it should be considerably easier to elicit the igneous/metamorphic histories of Siberian kimberlitic xenoliths. One of the notable features of the Siberian eclogites is the common appearance of diamonds, especially in the Mir and Udachnaya pipes. In all, eight eclogite samples (eight garnet separates and eight clinopyroxene separates) have been analyzed to date on the Udachnaya pipe, seven from our group. Author (revised)

CHRONOLOGY AND GENESIS OF HIGH-TI MARE VOLCANISM: MELTING OF COGENETIC DEPLETED AND ENRICHED RESERVOIRS Abstract Only
Gregory A. Snyder, Lawrence A. Taylor, and Alex N. Halliday (Michigan Univ., Ann Arbor.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1323-1324 (For primary document see N94-20636 05-91)

An understanding of the chronology and petrogenesis of volcanic rocks is paramount to unravelling the complexities of the composition and structure of the mantle of the Moon. High-Ti mare basalts represent the best-sampled suite of lunar volcanic rocks and likely represent melts of the uppermost mantle of the Moon. Compiled Nd and Sr isotopic data for high-Ti basalts, combined with weighted average ages determiend by various techniques, yield a complex melting history for the high-Ti mantle source. Melting occurred during three distinct episodes (3.84 Ga, 3.75-3.69 Ga, and 3.56 Ga) separated by hiatuses of 100 Ma or more. The first episode included the melting of a relatively trapped liquid (KREEPy)-rich source beneath the A-11 landing site. Later melting of this source produced magmas which were relatively trapped liquid-free at the A-11 site. Synchronous melting at the A-17 landing site produced magmas with variable proportions of this evolved trapped liquid component. The final phase of volcanism occurred at the A-11 site and involved the assimilation of an evolved 'neuKREEP' component. Continued melting of a similar source, which was nearly exhausted of its ilmenite component, beneath the A-12 landing site may have lead to production of magmas parental to the A-12 ilmenite basalts. GEOCHRONOLOGY AND PETROGENESIS OF THE WESTERN HIGHLANDS ALKALI SUITE: RADIOGENIC ISOTOPIC EVIDENCE FROM APOLLO 14 Abstract Only
Gregory A. Snyder, Lawrence A. Taylor, and Alex N. Halliday (Michigan Univ., Ann Arbor.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1325-1326 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Several rocks of alkalic affinity, from the western highlands of the Moon, have been analyzed for their Nd and Sr isotopic compositions. One sample yields a Sm-Nd mineral isochron of 4110 = 41 Ma. This age, in conjunction with U-Pb zircon ages on two other alkalic rocks from the Apollo 14 landing site suggests a distinct western highlands 'event' which was approximately 100 Ma in duration. Since the last dregs of the lunar magma ocean likely crystallized prior to 4.3 Ga, this alkalic 'event' may have included the re-melting of evolved plutons or the remobilization of urKREEP trapped liquid from upper mantle cumulates. Alkalic lithologies such as granites and felsites have been known from the Moon since the earliest days of the Apollo lunar sample returns. However, not until 1977 were alkali-rich rocks recognized from typical highlands suites such as ferroan anorthosites (FAN) and norites and Mg-suite rocks. In the intervening years, several other alkali suite samples have been discovered and characterized, mostly through labor-intesive breccia pull-apart studies of clasts and analyses of coarse-fine fractions of soils. We will speculate on the origins of this suite of lunar highlands rocks. Author (revised)

MAGNESIAN ANORTHOSITES FROM THE WESTERN HIGHLANDS OF THE MOON: ISOTOPE GEOCHEMISTRY AND PETROGENESIS Abstract Only
Gregory A. Snyder, Lawrence A. Taylor, and Alex N. Halliday (Michigan Univ., Ann Arbor.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1327-1328 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Breccias from the Apollo 14 landing site have provided a wealth of information on the genesis of the lunar highlands. Various pristine rock-types have been discovered in relative abundance including rare ferroan anorthosites and alkali-suite and magnesian-suite rocks. Mineral-chemical and radiogenic isotopic data are reported here for a newly discovered Mg-suite anorthosite from Apollo 14, sample 14303,347. Meyer et al. reported U-Pb zircon analyses of Mg-suite highlands rocks from the western limb of the Moon. We have compiled these ages and generated a weighted average age of 4211 = 6 Ma; some 200 Ma younger than ferroan anorthosites. Utilizing this age for Mg-anorthosite 14303,347, our data results in an initial epsilon(sub Nd) value of -1.0 and initial Sr-87/Sr-86 of 0.69915. Based on trace-element, isotopic, and mineral-chemical data, the western highlands Mg-suite is interpreted to be crustal precipitates of a picritic magma, which assimilated KREEPy trapped liquid from upper-mantle cumulates during its transport to the crust. DIFFERENTIATION OF MAGMA OCEANS AND THE THICKNESS OF THE DEPLETED LAYER ON VENUS Abstract Only
V. S. Solomatov and D. J. Stevenson *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1329-1330 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Various arguments suggest that Venus probably has no asthenosphere, and it is likely that beneath the crust there is a highly depleted and highly viscous mantle layer which was probably formed in the early history of the planet when it was partially or completely molten. Models of crystallization of magma oceans suggest that just after crystallization of a hypothetical magma ocean, the internal structure of Venus consists of a crust up to about 70 km thickness, a depleted layer up to about 500 km, and an enriched lower layer which probably consists of an undepleted 'lower mantle' and heavy enriched accumulates near the core-mantle boundary. Partial or even complete melting of Venus due to large impacts during the formation period eventually results in differentiation. However, the final result of such a differentiation can vary from a completely differentiated mantle to an almost completely preserved homogeneous mantle depending on competition between convection and differentiation: between low viscosity ('liquid') convection and crystal settling at small crystal fractions, or between high viscosity ('solid') convection and percolation at large crystal fractions. A TECTONIC RESURFACING MODEL FOR VENUS Abstract Only
Sean C. Solomon *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1331-1332 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Two remarkable aspects of the population of impact craters on Venus

are as follows: that craters at all sizes are indistinguishable from a random population; and that the vast majority of craters have not been significantly modified by tectonic strain or by volcanic flows external to the crater rim, despite evidence from Magellan images that volcanic and tectonic features are widespread on Venus. One interpretation of these observations is that most of the surface dates from the end of a catastrophic global resurfacing event that ceased about 500 My ago, and that the small fraction of craters volcanically embayed or modified by deformation indicates that volcanic and tectonic activity subsequent to that time has been at much lower levels. An alternative model, in which resurfacing occurs episodically in patches a few hundred kilometers in extent and there is a wider spectrum of surface ages, also appears to be consistent with the characteristics of impact craters on Venus. A number of potential mechanisms for catastrophic resurfacing of Venus have been proposed ranging from geologically sudden convective destabilization of the global lithosphere to strongly time-dependent heat flux and melt generation in the underlying mantle. In most of these geophysical models, resurfacing occurs implicitly or explicitly by volcanism. We explore here the hypothesis that, at least in the geologically recent history of Venus, the primary resurfacing mechanism has been tectonic deformation rather than volcanism. We show how such a hypothesis provides at least as good an explanation of a wide range of observations as do volcanic resurfacing models. Finally, we explore the implications of the tectonic resurfacing hypothesis for the controversy over the recent resurfacing history of the planet. Author (revised)

THE MISSING IMPACT CRATERS ON VENUS Abstract Only
D. H. Speidel *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1333-1334 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The size-frequency pattern of the 842 impact craters on Venus measured to date can be well described (across four standard deviation units) as a single log normal distribution with a mean crater diameter of 14.5 km. This result was predicted in 1991 on examination of the initial Magellan analysis. If this observed distribution is close to the real distribution, the 'missing' 90 percent of the small craters and the 'anomalous' lack of surface splotches may thus be neither missing nor anomalous. I think that the missing craters and missing splotches can be satisfactorily explained by accepting that the observed distribution approximates the real one, that it is not craters that are missing but the impactors. What you see is what you got. The implication that Venus crossing impactors would have the same type of log normal distribution is consistent with recently described distribution for terrestrial craters and Earth crossing asteroids. DELIMITATION OF TERRESTRIAL IMPACT CRATERS BY WAY OF PSEUDOTACHYLYTIC ROCK DISTRIBUTION Abstract Only **c46**
John G. Spray *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1335-1336 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The determination of the shape and size of terrestrial impact craters is problematic, yet is critical to understanding cratering mechanics and for scaling bolide mass, volume, and impact velocity with crater size and target response. The problem is particularly difficult in older geological terrains (e.g. Precambrian) which are more likely to have suffered post-impact deformation and hence distortion of the original structure and/or where weathering may have partly removed or obscured its original shape. Traditionally, a number of features are used to assist us in determining the shape and size of an impact structure. These include the following: (1) the occurrence of faults, especially those disposed concentrically relative to the crater--the outermost ring faults being interpreted as indicating a viable minimum diameter; and (2) the development of so-called breccias, some of which are also associated with faults (e.g. the Sudbury Breccia developed within the target rocks of the Sudbury Structure of Onta rio, Canada). 'Breccia' is not a satisfactory term because a number of breccia-types exist at impact sites (e.g. fall-back breccias and in-situ brecciated target material). Of relevance to crater diameter determination is the recognition of discrete zones and fault- and shock-related pseudotachylyte. Pseudotachylyte is a rock type comprising a fine-grained, usually dark matrix containing clasts of minerals and/or rock derived from the country rock target material. It origin is normally attributed to high-speed slip (including vibration) along a slip surface (i.e. fault) or to the passage of a shock wave through the host material. The clasts can occur as angular fragments (i.e. like a breccia), but are more commonly developed as rounded to sub-rounded fragments. Significantly, the scale of these pseudotachylytes can range from sub-millimeter thick veinlets to dyke-like bodies up to 1 km or more thick. It is the latter, larger occurrence which has been referred to as 'breccia.' The smaller-sized occurrence is generally not recognized in the field, nor is it traditionally associated with its larger counterpart. Author (revised)

The Clementine mission will provide us with an abundance of information about lunar surface morphology, topography, and composition, and it will permit us to infer the history of the Moon and the processes that have shaped that history. This information can be used to address fundamental questions in lunar science and allow us to make significant advances towards deciphering the complex story of the Moon. The Clementine mission will also permit a first-order global assessment of the resources of the Moon and provide a strategic base of knowledge upon which future robotic and human missions to the Moon can build. IMPACT BASINS ON VENUS AND SOME INTERPLANETARY COMPARISONS Abstract Only
Paul D. Spudis and Virgil L. Sharpton *In its* Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1339-1340 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Impact is one of the many processes that have shaped the surface of Venus. The largest impact craters, basins, are important features affecting the evolution of the terrestrial planets. Because Venus has an atmosphere, a gravity similar to Earth's, and a surface target with a high geothermal gradient, venusian basins provide an important comparative set of data to test our ideas about basin-forming impacts and their geological effects on the evolution of the crusts of the terrestrial planets. GEOLOGY AND DEPOSITS OF THE SERENITATIS BASIN Abstract Only
Paul D. Spudis, B. Ray Hawke (Hawaii Univ., Honolulu.), and Paul G. Lucey (Hawaii Univ., Honolulu.) *In its* Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1341-1342 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The Serenitatis basin is prominent on the near side of the Moon, just east of Mare Imbrium. Originally thought to be one of the oldest lunar basins, re-interpretation of both geological relations and Apollo 17 isotopic data suggest instead that Serenitatis is one of the youngest basins, having formed in the Nectarian Period about 3.87 Ga ago. As part of our continuing effort to understand the geology of multi-ring basins on the Moon and to use basins as probes of the deep lunar crust, we here report results for the Serenitatis basin. Our examination of Serenitatis was stimulated in part by a new effort to re-examine the geology of the Apollo 17 landing site. Author (revised)

EARTH-BASED MEASUREMENT OF LUNAR TOPOGRAPHY USING DELAYED RADAR INTERFEROMETRY Abstract Only
N. J. S. Stacy and D. B. Campbell *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1343-1344 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Radar interferometry has been applied to radar mapping of the surface of Venus to resolve the ambiguity in the backscatter from the areas with

the same delay-Doppler coordinates. For observations of the Moon these points are usually isolated by the small extent of the area illuminated by the radar beam so that interferometric techniques can be used to determine a third dimension to the location of the radar backscatter. Recent observations of Sinus Iridum (41.5 deg N, 31.0 deg W) using the Arecibo Observatory S-Band radar system (12.6 cm wavelength) in Apr. and Aug. 1992 have yielded a pair of images viewed with a very small 0.0420 deg difference in incidence angle. These images can be used as a delay interferometric pair and have been correlated to generate phase fringes that are related to topography. The spatial resolution of the images are 18 m in delay and 33 m in cross range (Doppler). The anticipated topographic resolution once the phase fringes have been unwrapped is approximately +/- 10 m. Fe/Mn IN OLIVINE OF CARBONACEOUS METEORITES Abstract Only **c90**

Ian M. Steele *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1345-1346 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Olivines in primitive meteorites show a range of Fe/Mn both within one grain and among grains suggesting that they have recorded changing conditions during or after growth. Because olivine should be an early forming phase, Fe/Mn is used here to infer these earliest conditions. Initial Fe/Mn in cores of isolated, euhedral forsterite in both C2 and C3 meteorites ranges from 25 to 35 but differs at grain edge. Murchison (C2) forsterites show Fe/Mn approaching 1.0 at the grain edge while Ornans Fe/Mn is near 60 at grain edge. These values are lower than the matrix Fe/Mn for both meteorites and the distinct difference in zoning profile indicates different processes operating during and after grain growth. The Fe/Mn of bulk samples from a particular source such as the Moon is nearly constant. Individual samples show variation suggesting that there is some fractionation of Mn from Fe. Minerals have their individual ranges of Fe/Mn which has been used to recognize different types of olivine within one meteorite. Extreme values of Fe/Mn below 1.0 occur in forsterite from some IDP's, UOC matrix, and C1 meteorites. There are apparently no detailed studies of Fe/Mn variation within single olivine grains. Forsterite grains in C2 and C3 carbonaceous chondrites show complex zoning, and the nearly pure forsterites (Fo greater than approximately 99.5) have high levels of some minor elements including Ti, Al, V, and Sc. There is disagreement on the original source of these grains and both chondrule and vapor growth have been proposed. In addition, there is clear evidence that diffusion has affected the outer margins but in some cases the whole grain. Within the cores, the FeO range is limited, and if growing under constant conditions, the Fe/Mn should be near constant as there is little fractionation of Mn from Fe by forsterite. Additionally, there are apparently no co-crystallizing phases as evidenced by a lack of common inclusions in the forsterites. These observations are now followed by analyses of isolated olivine grains in C2 and C3 meteorites. Author (revised)

TWO-POLARITY MAGNETIZATION IN THE MANSON IMPACT BRECCIA Abstract Only **c46**

M. B. Steiner and E. M. Shoemaker (Geological Survey, Flagstaff, AZ.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1347-1348 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

A preliminary paleomagnetic study of the impact breccia matrix and clasts has produced surprising results--nearly antipodal normal and reversed polarity magnetic vectors are observed in different portions of the core. Near-antipodal magnetizations within a segment of matrix and within individual samples rule out core inversion as the explanation of the dual polarity. In both the dense and the sandy matrix breccias, the magnetizations of clasts and matrix within the same core segment are identical; this negative 'conglomerate test' indicates that magnetization originated after impact. Paleomagnetic study of the Manson Impact Structure is an attempt to refine the Ar-40/Ar-39 age (65.7 +/- 1 m.y.) that suggests Manson to be a Cretaceous-Tertiary boundary impact. Refinement is possible because the boundary occurs within a reversed polarity interval (29R) of only 0.5 m.y. duration. The two breccia types in the Manson structure were both examined: one of a very dense matrix and apparently partially melted, and the breccia stratigraphically below it of granular or 'sandy' chloritic matrix. Samples were taken from the matrixes and a wide variety of clast compositions, including granite, diabase, gneiss, amphibolite, and melted granite. Currently, measurements have been made on 22 samples, using 30-35 steps of either alternating field (AF) or thermal demagnetization. Author (revised)

MAGNETICALLY CONTROLLED SOLAR NEBULA Abstract Only **c92**

T. F. Stepinski and M. Reyes-Ruiz (Rice Univ., Houston, TX.) *In its* Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1351-1352 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

It is widely believed that a primordial solar nebula, the precursor of the Sun and its planetary system, could be best described in terms of an accretion disk. Such an accretion disk is though to be turbulent, and it is usually imagined that turbulent viscosity alone provides the torque responsible for the structure and the evolution of the nebula. However, it was found that an MHD dynamo operating in a turbulent nebula can contemporaneously produce magnetic fields capable of significantly altering or even dominating the total torque. Thus, it seems that no model of a viscous solar nebula is complete without taking magnetic fields into consideration. It was demonstrated that there are usually two distinct regions of nebular disk where a dynamo can operate: the inner region, where the magnetic field coupled to gas due to relatively high thermal ionization; and the outer region, where this coupling is achieved due to nonthermal ionization. Most models also show the existence of an intermediate region, 'the magnetic gap,' where neither thermal nor nonthermal sources can produce enough ionization to provide the necessary coupling between the magnetic field and the gas. The location and width of the gap change substantially from one model to another. At present, we can only estimate the strength of a generated magnetic field. It seems that a large-scale magnetic field is likely to be in the equipartition with the turbulent kinetic energy; however, the intense magnetic fluctuations may greatly exceed this equipartition strength on short time and length scales. To show how a dynamo-generated magnetic field changes the structure of a viscous nebula, we consider four nebula models extensively. Author (revised)

EXPECTATIONS FOR THE MARTIAN CORE MAGNETIC FIELD Abstract Only

D. J. Stevenson *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1353-1354 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

In the traditional view of planetary magnetism, a planet either has a core dynamo (Earth, Jupiter, Saturn, Uranus, Neptune, maybe Mercury) or does not (Mars, Venus, Moon...) I argue that this view is simplistic in two respects. First, mantle convection in terrestrial planets is invariably ata high enough Rayleigh number that it is time variable; this leads to the

intermittent arrival of mantle 'cold fingers' at the core-mantle boundary promoting at least local core convection and dynamo action even when the planetary core is stably stratified on average. Thus, I predict an intermittent dynamo regime in addition to the simple dynamo-on (Earth) and dynamo-off regimes. Second, the mantle convection-driven horizontal temperature gradients just below the core-mantle boundary can lead to unstable flows that will convert thermoelectric or electrochemical toroidal fields into externally detectable poloidal fields, even when a dynamo is not possible. It is likely that Mars possesses an interesting core magnetic field of the latter kind, complex but with a dipole that might be approximately aligned with the rotation axis and a surface field of a few to tens of gammas. VOLATILE LOSS FROM ACCRETING ICY PROTOPLANETS Abstract Only **c90**
D. J. Stevenson *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1355-1356 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

A large self-gravitating body does not easily lose significant mass because the escape velocity is much larger than the sound speed of atmosphere-forming species under ambient thermal conditions. The most significant exceptions to this are giant impacts or impact jetting by fast-moving projectiles. A very small object (e.g. a comet) also does not easily lose significant volatile mass upon formation because the energy release associated with its accretion is so small. (It can however lose a great deal of mass if it is subsequently moved closer to the Sun.) I argue that there is an intermediate mass range (corresponding to bodies with radii of approximately 300-800 km) for which the ambient steady-state mass loss is a maximum. By ambient, I mean those conditions pertaining to the formation region of the body. By steady state, I mean to exclude infrequent traumas (giant impacts). The existence of a preferred intermediate mass arises through the competition of growing gravitational containment and growing energy release by accretion; it corresponds typically to GM/(Rc(sub s)(exp 2)) approximately equals 2 to 4, where M is the protoplanet mass of radius R, and c(sub s) is the sound speed. Several factors determine the amount of volatile loss is this vulnerable zone during accretion but in general the loss is a substantial fraction of the volatiles, sometimes approaching 100 percent. The principal implication is that bodies larger than a few hundred kilometers in radius will not have a 'primitive' (i.e. cometary) composition. This is relevant for understanding Triton, Pluto, Charon, and perhaps Chiron. Author (revised)

FINE RESOLUTION CHRONOLOGY BASED ON INITIAL Sr-87/Sr-86 Abstract Only **c25**
B. W. Stewart, D. A. Papanastassiou, R. C. Capo, and G. J. Wasserburg *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1357-1358 (For primary document see N94-20636 05-91)
(Grant NAG9-43)
(Contrib-5230(794)) Avail: CASI HC A01/MF A06

It has been recognized that small variations in initial Sr-87/Sr-86 (Sr(sub I)), can provide a fine scale relative chronology for the chemical fractionation of materials with low Rb/Sr from parent reservoirs with high Rb/Sr. Similarly, Sr(sub I), as determined for low Rb/Sr phases in meteorites, may permit a fine resolution chronology of the recrystallization or metamorphism of planetary materials. For the establishment of a primitive Sr-87/Sr-86 chronology, it is important to search for samples with extremely low Rb/Sr for which the measured Sr-87/Sr-86 is below BABI, in which case the primitive nature of the Sr can be directly established. Using the measured Rb/Sr to calculate an initial Sr-87/Sr-86 can introduce substantial uncertainty if the Rb-Sr are disturbed. We report Sr-87/Sr-86 in plagioclase from silicate pebbles from the Vaca Muerta mesosiderite on which we have reported Sm-147-Nd-143 and Ne-142 correlations. For the purpose of cross-calibration with our previous work we have performed extensive new measurements on Angra dos Reis and on anorthite from Moore County, which have very low Rb/Sr and primitive Sr-87/Sr-86. THE Sm-Nd SYSTEMATICS OF SILICATE INCLUSIONS IN IRON METEORITES: RESULTS FROM CADDO (IAB) Abstract Only **c90**
Brian W. Stewart, D. A. Papanastassiou, and G. J. Wasserburg *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1359-1360 (For primary document see N94-20636 05-91)
(Grant NAG9-43)
(Contrib-5241(804)) Avail: CASI HC A01/MF A06

The timing of events leading to the formation of silicate-rich and metal-rich regions in planetesimals remains an important problem in the study of planetary formation and differentiation in the early solar system. The IAB irons are especially important as they are considered to represent a magmatic differentiation series. Iron meteorites present a particular challenge for chronological studies, due to the relative paucity of phases serving as hosts for radioactive parent-daughter nuclides. Recent work using the Re-Os system, following on the pioneering work by Herr et al. and Luck and Allegre, appears promising, but investigators up to now have concentrated on whole rock isochrons. Silicate clasts enclosed within iron meteorites can provide information about the chronology and thermal history of irons. Extensive work on Rb-Sr, K-Ar, and I-Xe has been reported on silicate inclusions in iron meteorites. We report the initial results from our Sm-Nd study of an inclusion with the Caddo IAB iron, the first Sm-Nd isotopic study of a silicate clast embedded within an iron meteorite. Our results include measurements of the standard long-lived Sm-147/Nd-143 (tau = 152 AE) system, as well as the shorter-lived SM-146/Nd-142 (tau = 0.149 AE) system, which has been shown to be very useful in deciphering the history of the early solar system. The Caddo silicate clast was described by Palme et al., who kindly provided us with a major part of the inclusion. The inclusion is coarse-grained consisting predominantly of olivine, clinopyroxene, and plagioclase, with lesser amounts of orthopyroxene, Fe-Ni metal, sulfide, and phosphate. The relatively large grain size (up to 3 mm) and 120 degree grain boundaries suggest extensive metamorphism at high temperatures. Based on study of a thin section, there is evidence for metal invading along grain boundaries in some regions of the inclusion, suggesting that the Fe-Ni metal was molten when the silicate clast was incorporated. Metamorphic recrystallization may have occurred during this event. Author (revised)

PARGA AND HECATE CHASMATA, VENUS: STRUCTURE, VOLCANISM AND MODELS OF FORMATION Abstract Only
Ellen R. Stofan, Victoria E. Hamilton (Occidental Coll., Los Angeles, CA.), and Kristen Cotugno (Massachusetts Univ., Amherst.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1361-1362 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Linear zones of deformation in the equatorial zone of Venus characterized by extension and volcanism have previously been identified in Pioneer Venus and Arecibo data. Two of these zones, Parga and Hecate Chasmata, are seen in Magellan data to be characterized by systems of fractures along which lie numerous coronae and corona-like features. The relationship between tectonic deformation, corona formation, and volcanism in Parga and Hecate Chasmata is examined using Magellan image and altimetry data. We examine several hypotheses for the origin of these zones, including extension and upwelling and delamination or subduction. In a companion abstract, we examine a section of Hecate Chasma in detail.

LINEAR STRUCTURES ON THE SMALL INNER SATELLITES OF SATURN Abstract Only
Philip J. Stooke *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1363-1364 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Shape modelling methods developed for non-spherical worlds were applied to four satellites of Saturn: Prometheus, Pandora, Janus, and Epimetheus. This results in the first detailed shaded relief maps of their

surfaces. Ridges and valleys are described with their implications for satellite history and asteroid 951 Gaspra. They probably result from fracturing during break-up of parent bodies and/or later large impacts. Prometheus and perhaps Gaspra may be coated with debris from parent body fragmentation as well as more recent regolith. These four satellites are covered by relatively few useful images, so the shapes are imperfectly known and positions of features on maps may be wrong by up to a few tens of degrees in some areas (worst where a feature is seen only near a limb). Nevertheless, these shape models are more useful than the previous triaxial ellipsoid models. Author (revised)

THE AGE OF THE PRETORIA SALTPAN IMPACT CRATER, SOUTH AFRICA Abstract Only **c46**
Dieter Storzer, Christian Koeberl (Wien Univ., Austria.), and Wolf Uwe Reimold (Witwatersrand Univ., Johannesburg, South Africa.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1365-1366 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The Pretoria Saltpan impact crater, situated about 40 km NNW of Pretoria, South Africa, has a diameter of about 1.13 km. The structure was formed in 2.05 Ga Nebo granite of the Bushveld Complex. The impact origin of the crater was recently established by the discovery of characteristic shock-metamorphic features in breccias found in drill cores at depths greater than 90 m. Impact glass fragments were recovered by standard magnetic separation techniques and handpicking from the melt breccias. As no reliable crater age was known so far, several hundred sub-millimeter-sized glass fragments were studied for fission tracks. The results show that the Saltpan impact crater has an age of 220 +/- 52 ka. This is in agreement with field geological observations. Author (revised)

THE ROLE OF CO2 IN WEATHERING REACTIONS AND THE PRESENCE OF S2 ON VENUS: IMPLICATIONS FOR THE PYRITE STABILITY FIELD Abstract Only
DArcy W. Straub *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1369-1370 (For primary document see N94-20636 05-91)
(Grant NAGw-2220)
Avail: CASI HC A01/MF A06

The stability of pyrite has become the focal point of study, since regions of low radio thermal emissivity were detected during the Pioneer Venus and Magellan radar mapping missions of Venus. Thermodynamic calculations and experimental studies have been performed assuming CO2 is a major contributor to the weathering of sulfides, as CO2 is the major gas species in the Venusian atmosphere. The purpose of the present study, however, is to demonstrate that CO2 is a non-reactive gas and that a minor species, S2, is the most important gas in determining whether pyrite is stable in the high radar reflectivity regions. THE STABILITY OF OXYAMPHIBOLES: EXISTENCE OF FERRIC-BEARING MINERALS UNDER THE REDUCING CONDITIONS ON THE SURFACE OF VENUS Abstract Only
DArcy W. Straub and Roger G. Burns *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1369-1370 (For primary document see N94-20636 05-91)
(Grant NAGw-2220)
Avail: CASI HC A01/MF A06

An enigma of Venusian mineralogy is the suggestion that Fe(3+)-bearing minerals exist under the reducing conditions of the Venusian atmosphere. Analysis of the spectrophotometric data from the Venera 13 and 14 missions, combined with the laboratory reflectance spectral measurements of oxidized basalts at elevated temperatures, led to the suggestion that metastable hematite might exist on Venus. Heating experiments at 475 C when f(sub O2) approximately 10(exp -24) demonstrated that the hematite to magnetite conversion is rapid indicating metastable hematite is not present on Venus. In addition to hematite, several other ferric oxide and silicate minerals have been proposed to occur on Venus, including laihunite or ferrifayalite, Fe(3+)-bearing tephroite, oxyamphiboles, and oxybiotites. Heating experiments performed on these Fe(3+)-bearing minerals under temperature-f(sub O2) conditions existing on Venus suggest that only oxyamphiboles and oxybiotites may be stable on the surface of Venus. PARABOLIC FEATURES AND THE EROSION RATE ON VENUS Abstract Only
Robert G. Strom *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1371-1372 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The impact cratering record on Venus consists of 919 craters covering 98 percent of the surface. These craters are remarkably well preserved, and most show pristine structures including fresh ejecta blankets. Only 35 craters (3.8 percent) have had their ejecta blankets embayed by lava and most of these occur in the Atla-Beta Regio region; an area thought to be recently active. parabolic features are associated with 66 of the 919 craters. These craters range in size from 6 to 105 km diameter. The parabolic features are thought to be the result of the deposition of fine-grained ejecta by winds in the dense venusian atmosphere. The deposits cover about 9 percent of the surface and none appear to be embayed by younger volcanic materials. However, there appears to be a paucity of these deposits in the Atla-Beta Regio region, and this may be due to the more recent volcanism in this area of Venus. Since parabolic features are probably fine-grain, wind-deposited ejecta, then all impact craters on Venus probably had these deposits at some time in the past. The older deposits have probably been either eroded or buried by eolian processes. Therefore, the present population of these features is probably associated with the most recent impact craters on the planet. Furthermore, the size/frequency distribution of craters with parabolic features is virtually identical to that of the total crater population. This suggests that there has been little loss of small parabolic features compared to large ones, otherwise there should be a significant and systematic paucity of craters with parabolic features with decreasing size compared to the total crater population. Whatever is erasing the parabolic features apparently does so uniformly regardless of the areal extent of the deposit. The lifetime of parabolic features and the eolian erosion rate on Venus can be estimated from the average age of the surface and the present population of parabolic features. Author (revised)

TRITON'S CRATERING RECORD AND ITS TIME OF CAPTURE Abstract Only
R. G. Strom and S. K. Croft *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1373-1374 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Recent impact crater counts on the Voyager 2 high resolution images of Triton have resulted in a more accurate crater size/frequency distribution down to about 3 km diameter. These counts reveal a size/frequency distribution characterized by a differential -4 slope. This is consistent with the observation that there are no craters larger than 27 km diameter on the 20 percent of Triton viewed at resolutions capable of detecting them. A -4 slope is deficient in large craters and at the very low crater density on Triton no craters larger than about 30 km are expected on just 20 percent of the satellite. The Triton size distribution is significantly different from the differential -3 slope of the fresh crater population on Miranda, but both show leading/trailing asymmetries. Since Miranda is in prograde orbit this crater population is probably due to objects in heliocentric orbit, i.e., comets. If this crater population is due to comets, then the significantly different crater population on Triton is probably due to some other population of impacting objects. The most likely origin of these objects is planetesimals in planetocentric orbits. Because Triton is in retrograde orbit, objects in prograde planetocentric orbits will also produce a leading/trailing asymmetry. If the Triton craters are largely the result of objects in planetocentric orbit, then where are the comet craters that should be there if they have a differential -3 distribution function as inferred from the Miranda fresh crater population? The most likely answer is that they are there, but at such a low density that they can not be distinguished from the planetocentric population. An upper bound on this density can be estimated by determining

the density of a crater population with a differential -3 slope where no craters larger than 27 km would be expected on the 20 percent of Triton viewed by Voyager at resolutions sufficient to detect them. This density is at the density of the largest crater. At this density the number of craters in size bins greater than 27 km is less than 1 for a -3 distribution function. The observed size distribution, the upper limit of the hypothetical comet crater size distribution, and the difference between the observed and the hypothetical comet crater populations is shown. ARE PLINIAN TYPE ERUPTIONS POSSIBLE ON VENUS? Abstract Only
Seiji Sugita and Takafumi Matsui (Tokyo Univ., Japan.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1375-1376 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Calculations of dynamics of eruption plumes in the Venusian atmosphere reveal the following results: (1) conditions for a convective eruption column are very limited on Venus with required magma temperatures higher than 1100 K; otherwise pyroclastic flows form; (2) once a convective eruption column is established, it may extend as high as about the tropopause (approximately 60 km); and (3) critical eruption velocities for a convective eruption column as a function of temperature and gas content of magma may provide a useful tool for estimating interior condition of Venus, including its volatile inventory. Volcanism is a major process to transport volatile from mantle of a planet to its surface (degassing) as well as heat and mass, all of which affect planetary evolution. For example, after completion of planetary accretion, volcanism is the dominant continuous degassing process for all the terrestrial planets. Explosive volcanism is a very important process for mantle degassing due to its high magma gas content. Consequently, eruption styles and the controlling physical processes need to be understood. Recent satellite and terrestrial ground-based observations suggest existence of explosive volcanism on Venus even though explosive volcanism is very difficult to occur on Venus due to its high atmospheric pressure. The purpose is to investigate dynamics of explosive eruption on Venus and the relation between eruption conditions such as gas content and temperature of magma and eruption velocity, and eruption styles such as Plinian type and pyroclastic flow type. IMPLANTATION OF NITROGEN: EFFECTS OF HYDROGEN AND IMPLANTATION ENERGY Abstract Only **c25**
Naoji Sugiura, Tsuneji Futagami (Japan Atomic Energy Research Inst., Tokyo.), and Siro Nagai (Japan Atomic Energy Research Inst., Tokyo.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1377-1378 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

To solve the question on solar nitrogen in lunar soils, i.e. variation in isotopic composition and apparently high retentivity compared with rare gases, nitrogen implantation experiments were conducted. At the Meteoritical Society Meeting in Copenhagen, the results of stepped combustion of implanted nitrogen in ilmenite and olivine were presented. The degassing behavior of nitrogen (and also Ar) was quite different from that observed in the case of lunar soils. Extraction temperatures are higher (greater than 1100 C for ilmenite and 1500 C for olivine) than that for lunar soils. Both nitrogen and Ar seem to be retained at the same efficiency. Therefore, additional experiments were conducted to make degassing behavior of nitrogen more close to that observed in the case of lunar soils.

DETERMINING THE COMPOSITION OF OLIVINE ON ASTEROIDAL SURFACES Abstract Only **c25**
Jessica M. Sunshine and Carle M. Pieters *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1379-1380 (For primary document see N94-20636 05-91)
(Grant NAGw-28)
Avail: CASI HC A01/MF A06

Olivine was remotely identified as a major component on many S- and A-type asteroids based on qualitative analyses of broad absorption features near 1.0 micron in their telescopic reflectance spectra. Laboratory studies showed that this diagnostic olivine absorption feature is composed of three individual absorption bands resulting from electronic transitions of Fe(+2) in distorted M1 and M2 sites. Both the overall absorption feature and each of the individual absorption bands are also known to vary systematically as a function of olivine composition. Thus, it should be possible to remotely determine the composition of olivine present on the surfaces of the various olivine-rich asteroids. However, extrapolation of laboratory studies to compositional interpretation of asteroid spectra is complicated by several factors: observational noise; lower spectral resolution; compositional heterogeneities (including the presence of other phases such as pyroxenes and/or metal); and the effects of alteration processes. In order to address such complex problems, a quantitative approach to spectral analysis, the modified Gaussian model (MGM) was developed by Sunshine et al., which deconvolves spectra into their constituent absorption bands. The MGM, a refinement of the Gaussian model, more accurately adheres to the physical processes involved in electronic transition absorptions. Under the MGM, each spectrum is modeled in log reflectance and energy as a sum of absorption bands superimposed onto a baseline or continuum. Each absorption band is described by three model parameters (center, width, and strength) which can be interpreted and used to infer composition. One of the strengths of the MGM is that it allows compositional information to be extracted directly from measured spectra and is therefore complementary to other approaches to modeling asteroid spectra which require the use of meteorites and/or terrestrial samples as spectral analogs. A quantitative understanding of the properties of olivine absorptions was established by using the MGM to analyze a laboratory suite of spectra spanning a full range of olivine compositions. DISCOVERY VENERA SURFACE: ATMOSPHERE GEOCHEMISTRY EXPERIMENTS MISSION CONCEPT Abstract Only
Yuri A. Surkov (Academy of Sciences, USSR, Moscow.), James W. Head (Brown Univ., Providence, RI.), Roald Kremnev (Babakin Engineering and Research Center, Moscow, Russia.), and K. T. Nock *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1381-1382 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The phenomenal increase in our understanding of Venus provided by the Magellan Mission has raised a series of focused, fundamental scientific questions about the geochemistry of the surface of Venus, the nature of the lower atmosphere, and the relationship of the lower atmosphere and surface. First, surface geochemical measurements from the Venera/Vega spacecraft showed that widely spaced regions of the venusian plains are made of basalts; thus basalts are significant and may be the only component of the venusian crust. But we lack information on the composition of several key elements of Venus geology: (1) Tessera terrain (which may be outcrops of continental-like non-basaltic crustal material) and steep-sided domes/festoons are promising candidates for non-basaltic geochemically evolved material. The composition of the lower part of the Venusian crust is unknown: however, ejecta from large venusian craters provides us with the possibility of sampling this material on the surface; (2) bulk chemistry (structure and dynamics) of the venusian atmosphere are known. The altitude profiles of water vapor content and minor admixtures relevant to redox conditions in the lower atmosphere (less than 20 km altitude) remain uncertain. Lack of that knowledge means that we do not understand the fine chemical structure of the main mass of the Venusian atmosphere; and (3) thermodynamic models predict that igneous materials on the surface of Venus should react with gases of the venusian atmosphere. But because the water vapor content and redox conditions in the lower atmosphere are not well known, we do not understand the nature of venusian weathering: oxidation, sulfatization, carbonatization, and hydration. The answers to these questions are critical to the understanding of Venus, the most Earth-like of the terrestrial planets. Author (revised)

THE X RAY MICROPROBE DETERMINATION OF CHROMIUM OXIDATION STATE IN OLIVINE FROM LUNAR BASALT AND KIMBERLITIC DIAMONDS Abstract Only **c25**

S. R. Sutton, S. Bajt, M. L. Rivers, and J. V. Smith *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1383-1384 (For primary document see N94-20636 05-91)
(Contract NAG9-106; DE-AC02-76CH-00016; NSF EAR-89-15699)
Avail: CASI HC A01/MF A06

The synchrotron x-ray microprobe is being used to obtain oxidation state information on planetary materials with high spatial resolution. Initial results on chromium in olivine from various sources including laboratory experiments, lunar basalt, and kimberlitic diamonds are reported. The lunar olivine was dominated by Cr(2+) whereas the diamond inclusions had Cr(2+/Cr(3+) ratios up to about 0.3. The simpliest interpretation is that the terrestrial olivine crystallized in a more oxidizing environment than the lunar olivine. Author (revised)

SPH MODELLING OF ENERGY PARTITIONING DURING IMPACTS ON VENUS Abstract Only
T. Takata and T. J. Ahrens *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1387-1388 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Impact cratering of the Venusian planetary surface by meteorites was investigated numerically using the Smoothed Particle Hydrodynamics (SPH) method. Venus presently has a dense atmosphere. Vigorous transfer of energy between impacting meteorites, the planetary surface, and the atmosphere is expected during impact events. The investigation concentrated on the effects of the atmosphere on energy partitioning and the flow of ejecta and gas. The SPH method is particularly suitable for studying complex motion, especially because of its ability to be extended to three dimensions. In our simulations, particles representing impactors and targets are initially set to a uniform density, and those of atmosphere are set to be in hydrostatic equilibrium. Target, impactor, and atmosphere are represented by 9800, 80, and 4200 particles, respectively. A Tillotson equation of state for granite is assumed for the target and impactor, and an ideal gas with constant specific heat ratio is used for the atmosphere. Two dimensional axisymmetric geometry was assumed and normal impacts of 10km diameter projectiles with velocities of 5, 10, 20, and 40 km/s, both with and without an atmosphere present were modeled. Avail: CASI HC A01/MF A06

Hydrothermal alteration experiments of olivine powder with several Fe/Mg ratios were carried out under acidic and neutral conditions, and transition electron microscopy (TEM) observations were made on the run products. Well-developed tubular crystals of serpentine (chrysotile) were synthesized from Fo100 under both acidic and neutral conditions, and from Fo92 and Fo80 under acidic condition. Abundance and size of chrysotile apparenlty dependent on the Fe contents of olivine, i.e. with increasing Fe contents, less and smaller chrysotile was formed. Acidity of the solution plays an important role for the formation of chrysotile. Platy and fibrous crystals of phyllosilicate, probably serpentine, were obtained from Fo50 and Fo20 treated under acidic condition, which are most similar to the phyllosilicates in the CI and CM chondrites. Framboidal aggregates of Fe-rich grains (presumably Fe-hydroxide) were formed from Fa100 and Fo20, but no phyllosilicate was formed from Fa100. Author

TI-BEARING OXIDE MINERALS IN LUNAR METEORITE Y793169 WITH THE VLT AFFINITY Abstract Only **c90**
Hiroshi Takeda, Tomoko Arai, and Kazuto Saiki *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1393-1394 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Lunar meteorite, Yamato 793169 previously classified as a VLT mare basalt contains considerable amounts of Ti-bearing oxides in the mesostasis area (2 vol. percent). Mineralogical study of these oxides revealed that they are isolated grains of ilmenite, ulvospinel and chromite, which are formed at the last stage of crystallization. Ti/(Ti+Al+Cr) and Cr/(Cr+Al) versus Fe/(Mg+Fe) variations of these phases are not in the same trends as in the low Ti pigeonite basalts of Apollo 12 and 15 in spite of its higher TiO2 contents. Among four lunar meteorites proposed to be samples of mare regions of the Moon, EET87521 and Y793274 are breccias rich in lunar mare components, but Y793169 and A881757 are crystalline rocks composed of Fe-rich pigeonite and plagioclase with affinity to the VLT basalts, despite their higher bulk TiO2 contents than the limit for VLT. Polished think sections (PTS) Y793169,51-3 and A881757,51-4 (Asuka-31) supplied by the National Institute of Polar Research (NIPR) were investigated. Both samples were allocated as parts of two consortium studies. Mineral chemistries and textures were examined by an electron probe micro-analyzer (EPMA) and scanning electron microscope (SEM), JEOL 840A with X-ray chemical map analysis (CMA) utilities. Modal abundances of minerals in Y793169 were obtained from colored backscattered electron (BSE) image of SEM for a particular mineral by a computer and by point analysis for minerals with a similar BSE intensity. A NEW ANTARCTIC METEORITE WITH CHROMITE, ORTHOPYROXENE AND METAL WITH REFERENCE TO A FORMATION MODEL OF S ASTEROIDS Abstract Only **c90**
Hiroshi Takeda (Tokyo Univ., Japan.), Kazuto Saiki (Tokyo Univ., Japan.), Mayumi Otsuki (Tokyo Univ., Japan.), and Takahiro Hiroi *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1395-1396 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Mineralogy of a unique meteorite from Antarctica, EET84302 and the related primitive achondrites, was studied to gain better understanding on relationship between S asteroids and this meteorite group. EET84302

consists of metal-rich (M) region with metal filling interstices of silicate grains of orthopyroxene (Opx), olivine Fa8, plagioclase An24, and augite (Aug), chromite-rich (C) region with major chromite and Opx, and silicate-rich (S) region with mainly Opx. This is the first example of chromite-rich achondrite. Distribution of three areas (C, M, S) are in line with a proposed model of primitive achondrites and S asteroids. Since reflectance spectra of some members of primitive achondrites combined with those of iron meteorites, resemble those of the S asteroids, there is an expectation that S asteroids are modified products of chondrites. The trends of the variations in their mineral assemblages are in line with those of the S asteroids. Hiroi proposed a stony-iron model of S asteroids, which assumes that a few domains of various primitive achondrites are embedded in iron matrix. Polished thin sections (PTS) of EET84302,19 and ALH81187,16 were supplied from Meteorite Working Group (MWG). A previously studied PTS of EET84302 was similar in both texture and mineralogy to silicate inclusions in some iron meteorites. PTS EET84302,19 was studied by electron probe microanalyzer (EPMA) and scanning electron microscope (SEM). The reflectance spectra of EET84302 showed a weathering problem and was not used to match with those of S asteroids. Author (revised)

EXTENSIONAL HISTORY OF MARS' THARSIS REGION Abstract Only
Kenneth L. Tanaka and D. John Chadwick *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1397-1398 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Graben structures in the outer part of Mars' Tharsis region follow calculated stress patterns that are based on Tharsis topographic and gravity anomalies and flexural response of the lithosphere. However, Tharsis extension is not evenly distributed - most extension is concentrated in the Alba, Tempe, Valles Marineris, and Syria-Thaumasia volcanotectonic provinces. Preliminary results suggest that the overall extension of Tharsis produced by loading is about 8 km (based on the assumption that the Sirenum province exemplifies the overall extension of Tharsis), whereas the total circumferential extension of the Tharsis region estimated thus far is about 33 km (an estimate was not made for the Syria-Thaumasia province, and evidence in some other areas may be buried). It is concluded that local tectonism, possibly caused by intrusion and passive and active rifting, produced most of the extension in the Tharsis region. Author (revised)

COMPLEX STRUCTURE OF THE THAUMASIA REGION OF MARS Abstract Only
Kenneth L. Tanaka and James M. Dohm *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1399-1400 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The Thaumasia region was the first center of Tharsis tectonism, and it is the most complex and poorly understood. Therefore, a geologic map of the entire Thaumasia region (lat 15 deg to 50 deg S, long 50 deg to 115 deg), at 1:5,000,000 scale is being compiled. This region is mostly made up of the Thaumasia plateau, the highlands are fractured by Thaumasia, southern Claritas, Coracis, Melas, and Nectaris Fossae. Preliminary structural analysis of the most complexly faulted area in the region (the central part, at lat 30 deg to 45 deg S, long 80 deg to 100 deg) indicates that, unlike other regions of Mars, Thaumasia has undergone extensive deformation by both small- and large-scale extensional and compressional structures. These results indicate that the early (Noachian) style of tectonism commonly involved lithospheric-scale deformation, in contrast to most younger tectonism (which mainly affected the upper parts of the crust above mechanical discontinuities); this difference may be due to a weaker (and thus more readily deformable) early lithosphere in this region.

LARGE, ANCIENT, COMPRESSIONAL STRUCTURES ON MARS Abstract Only
Kenneth L. Tanaka and Richard A. Schultz (Nevada Univ., Reno.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1401-1402 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Our search for large compressional structures similar to the Coprates rise reveals that the rise is part of a group of about three dozen structures (the 'Thaumasia fold belt') that encircles the southern part of the Tharsis region. Similar structures are scattered over Mars. All appear to be Noachian or Early Hesperian in age, suggesting that lithospheric-scale buckling was a common form of early Martian compressional deformation.

DETERMINATION OF PARAMETERS FOR HYPERVELOCITY DUST GRAINS ENCOUNTERED IN NEAR-EARTH SPACE Abstract Only **c90**
William G. Tanner, Carl R. Maag (Science Applications International Corp., Glendora, CA.), W. Merle Alexander, and Patricia Sappenfield *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1403-1404 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Primarily interest was in the determination of the population of micrometeoroids and space debris and interpretation of the hole size in a thin film or in a micropore foam returned from space with theoretical calculations describing the event. In order to augment the significance of the theoretical calculations of the impact event, an experiment designed to analyze the charge production due to hypervelocity impacts on thin films also produced data which described the penetration properties of micron and sub-micron sized projectiles. The thin film penetration sites in the 500 A and 1000 A aluminum films were counted and a size distribution function was derived. In the case of the very smallest dust grains, there were no independent measurements of velocities like that which existed for the larger dust grains (d(sub p) is less than or equal to 1 micron). The primary task then became to assess the relationship between the penetration hole and the particle diameter of the projectile which made the hole. The most promising means to assess the measure of the diameters of impacting grains came in the form of comparing cratering mechanics to penetration mechanics. Future experimentation will produce measurements of the cratering as opposed to the penetrating event. Particles encountered by surfaces while being flown in space will degrade that surface in a systematic manner even when the impact is with small hypervelocity particles, d(sub p) is less than or equal to 10 microns. Though not to a degree which would precipitate a catastrophic failure of a system, the degradation of the materials comprising the interconnected system will occur. It is the degradation of the optical system and the subsequent embrittlement of other materials that can lead to degradation if not to failure. It is to this end that research was conducted to compare the primary consequences for experiments which will be flown to those which have been returned.

Planetary and space science is the best way to teach basic chemistry, physics, and math. Einstein once said that 'man is drawn to the mysterious and it is from that that we achieve true art and science.' Planets and the processes that shape them are especially mysterious and fascinating to students, young and old, and because of this planetary geology kindles interest that draws them further into the world of science. At the very least, they are engaged enough to learn how science works, a key ingredient in scientific literacy. A project involving field measurements on Kilauea volcano, Hawaii, by a Geology 101 honors class is described. Hawaii is blessed with spectacular, active, accessible, and relatively safe basaltic eruptions. The study of volcanoes, the landforms they produce, and the processes that operate on and in volcanoes, combined with the study of volcanoes on the other planets, is an excellent way to link aspects of Hawaiian geology to the planets. During the past year we have taken advantage of our setting to organize a NASA field workshop for junior investigators and senior graduate students, made field trips and planetary

volcanism the centerpieces of our annual Summer Workshop for Teachers, and led a field trip around Kilauea Volcano during the Challenger Center Faculty Development conference, held on the island of Hawaii last summer. An activity for the honors Geology 101 class (all undergraduates) at the University of Hawaii is presently being planned. Our goal is to give them some hands on experience working on a field project and applying what they have learned to planetary volcanoes. The work will include qualitative observations and quantitative measurements on volcanic lava flows. Follow-up activities will involve data analysis. The trip requires planning (at least 3 months before hand) everything from accommodations and insurance to the actual activities we will be doing. Our goal is to stimulate interest and awareness in the students' surroundings, in this case, volcanoes, and to include planetary applications and how studies of terrestrial geology greatly aids studies of the other planets. Two studies are planned both of which are active research projects being conducted by the authors. These projects, tumuli in pahoehoe flow fileds and lava tube cross-secational areas, are described. SPARKING YOUNG MINDS WITH MOON ROCKS AND METEORITES Abstract Only **c80**

G. Jeffrey Taylor (Hawaii Univ., Honolulu.) and Marilyn M. Lindstrom *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1407 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

What could be more exciting than seeing pieces of other worlds? The Apollo program left a legacy of astounding accomplishments and precious samples. Part of the thrill of those lunar missions is brought to schools by the lunar sample educational disks, which contain artifacts of six piloted trips to the Moon. Johnson Space Center (JSC) is preparing 100 new educational disks containing pieces of meteorites collected in Antarctica. These represent chunks of several different asteroids, that were collected in one of the most remote, forbidding environments on Earth. These pieces of the Moon and asteroids represent the products of basic planetary processes (solar nebular processes, initial differentiation, volcanism, and impact), and, in turn, these processes are controlled by basic physical and chemical processes (energy, energy transfer, melting, buoyancy, etc.). Thus, the lunar and meteorite sample disks have enormous educational potential. New educational materials are being developed to accompany the disks. Present materials are not as effective as they could be, especially in relating samples to processes and to other types of data such as spectral studies and photogeology. Furthermore, the materials are out of date. New background materials will be produced for teachers, assembling slide sets with extensive captions, and devising numerous hands-on classroom activities to do while the disks are at a school and before and after they arrive. The classroom activities will be developed by teams of experienced teachers working with lunar and meteorite experts. Author (revised)

EVALUATION OF LUNAR ROCKS AND SOILS FOR RESOURCE UTILIZATION: DETAILED IMAGE ANALYSIS OF RAW MATERIALS AND BENEFICIATED PRODUCTS Abstract Only

Lawrence A. Taylor (Tennessee Univ., Knoxville.), John G. Chambers (Tennessee Univ., Knoxville.), Allan Patchen (Tennessee Univ., Knoxville.), Eric A. Jerde (Tennessee Univ., Knoxville.), David S. McKay, John Graf, and Robin R. Oder (Exportech Co., Inc., New Kensington, PA.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1409-1410 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

The rocks and soils of the Moon will be the raw materials for fuels and construction needs at a lunar base. This includes sources of materials for the generation of hydrogen, oxygen, metals, and other potential construction materials. For most of the bulk material needs, the regolith, and its less than 1 cm fraction, the soil, will suffice. But for specific mineral resources, it may be necessary to concentrate minerals from rocks or soils, and it is not always obvious which is the more appropriate feedstock. Besides an appreciation of site geology, the mineralogy and petrography of local rocks and soils is important for consideration of the resources which can provide feedstocks of ilmenite, glass, agglutinates, anorthite, etc. In such studies, it is very time-consuming and practically impossible to correlate particle counts (the traditional method of characterizing lunar soil petrography) with accurate modal analyses and with mineral associations in multi-mineralic grains. But x ray digital imaging, using x rays characteristic of each element, makes all this possible and much more (e.g., size and shape analysis). An application of beneficiation image analysis, in use in our lab (Oxford Instr. EDS and Cameca SX-50 EMP), was demonstrated to study mineral liberation from lunar rocks and soils. Results of x ray image analysis are presented. Author (revised)

PRODUCTION OF O2 ON THE MOON: A LAB-TOP DEMONSTRATION OF ILMENITE REDUCTION WITH HYDROGEN Abstract Only

Lawrence A. Taylor, Eric A. Jerde, David S. McKay, Michael A. Gibson (Carbotek, Inc., Houston, TX.), Christian W. Knudsen (Carbotek, Inc., Houston, TX.), and Hiroshi Kanamori (Shimizu Corp., Japan.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1411-1412 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Estimates of the costs of transporting materials from Earth to the Moon are around $25,000 per pound. Therefore, it is imperative that we learn to utilize the resources on the Moon to partially offset these 'astronomical' expenses. The production of oxygen on the Moon utilizing indigenous materials is crucial to the establishment and development of an autonomous lunar colony. Besides obvious biologic needs, this lunar liquid oxygen (LLOX) could result in tremendous cost savings on fuel for effective transportation systems, particularly with its export to low-Earth orbit. Over 20 different process concepts were proposed and evaluated for the production of oxygen from lunar materials. Simplicity, low energy, easily attainable feedstock, and low resupply mass are the keywords for the process(es) which will ultimately be selected for the initial production of oxygen on the Moon. One of these schemes, which has received considerable study to date, is the hydrogen reduction of ilmenite. In fact, Carbotek, Inc. (Houston, TX) patented an ilmenite, hydrogen-reduction technique involving a three-stage, fluidized-bed process for the production of LLOX. A lab-top demonstration unit of the basic concepts of this oxygen generation process that was constructed by our group at the University of Tennessee is explained. It utilizes many of the principles which must be addressed in designing an effective production plant for operation on the Moon. Author (revised)

THE Mg-SUITE AND THE HIGHLAND CRUST: AN UNSOLVED ENIGMA Abstract Only

Stuart Ross Taylor, Marc D. Norman (Hawaii Univ., Honolulu.), and Tezer M. Esat *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1413-1414 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Most of the rocks returned from the highlands are polymict breccias, pulverized by the massive bombardment. However, some monomict breccias with low siderophile element contents are considered to be 'pristine' rocks that represent the original igneous components making up the highland crust. Three principal pristine constituents make up the lunar highland crust: ferroan anorthosites, the Mg-suite, and KREEP. A discussion of these three constituents is presented. Author (revised)

THE SAND BAG MODEL OF THE DISPERSION OF THE COSMIC BODY IN THE ATMOSPHERE Abstract Only **c90**

A. V. Teterev and I. V. Nemchinov (Academy of Sciences, USSR, Moscow.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1415-1416 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

The strength of the extraterrestrial bodies depends on their structure, composition, dimensions, and the history of this body. The fragmentation of the body due to aerodynamic stresses begins at sufficiently large heights above the surface of the Earth. The process of fragmentation and dispersion

of the fragments usually is studied by the hydrodynamic or even gasdynamic models. If the fragmentation process begins due to the initial cracks and faults of the body, or this body consists of large boulders glued by ice, the strength of these boulders after fragmentation remains higher than the aerodynamic stresses exerted at the remaining part of the body. It is supposed that fragmentation occurs at initial moment t = 0 at some height z(sub o) above the surface of the air, these fragments remain solid. The possibility of further fragmentation during the remaining part of the trajectory is not taken into account. If the number of these parts is large enough and their size is small in comparison to the initial radius of the body than we can use the sand bag model proposed in qualitative form.

ATMOSPHERIC BREAKUP OF A SMALL COMET IN THE EARTH'S ATMOSPHERE Abstract Only **c90**

A. V. Teterev, N. I. Misychenko, L. V. Rudak, G. S. Romanov (Institute of Heat and Mass Transfer, Minsk, Belarus.), A. S. Smetannikov (Institute of Heat and Mass Transfer, Minsk, Belarus.), and I. V. Nemchinov (Academy of Sciences, USSR, Moscow.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1417-1418 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

The aerodynamic stresses can lead to the deformation and even to destruction of the meteoroids during their flight through the atmosphere. The pressure at the blunt nose of the cosmic body moving at very high speed through the dense layers of the atmosphere may be much larger than the tensile or the compressive strength of the body. So the usage of the hydrodynamics theory is validated. The estimates show that the transverse velocity of the substance of the body U is of the order of (rho(sub a)/rho(sub o))(sup 1/2)V where V is the velocity of the body and rho(sub o) is its density, rho(sub a) is the density of the atmosphere. The separation of the fragments is larger than the diameter of the body D if D is less than D(sub c) = 2H(square root of rho(sub a)/rho(sub o)), where H is the characteristic scale of the atmosphere. For an icy body one obtains U = 1/30(V) and critical diameter D(sub C) = 500 m. The process of the disintegration of the body is still not fully understood and so one can use the numerical simulation to investigate it. Such simulations where conducted for the Venusian atmosphere and the gaseous equation of state of the body was used. For the Earth atmosphere for the velocity V = 50 km/s the pressure at the blunt nose of the body is 25 kbar, and is of the order of bulk modulus of compressibility of the water or ice. The realistic EOS of water in tabular form was used. It was assumed that the initial shape of the body was spherical and the initial diameter D(sub o) of the body is 200 m and so it is smaller than the critical diameter D(sub C). The initial kinetic energy of the icy body is equivalent to the energy of the explosion 1200 Mt of TNT. The results of the simulation of the deformation of the body during its vertical flight through the atmosphere and during its impact into the ocean are presented.

ORIGINAL SIZE OF THE VREDEFORT STRUCTURE, SOUTH AFRICA Abstract Only **c46**

A. M. Therriault, A. M. Reid, and W. U. Reimold (Witwatersrand Univ., Johannesburg, South Africa.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1419-1420 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

The Vredefort structure is located approximately 120 km southwest of Johannesburg, South Africa, and is deeply eroded. Controversies remain on the origin of this structure with the most popular hypotheses being: (1) by impact cratering about 2.0 Ga; (2) as a cryptoexplosion structure about 2.0 Ga; and (3) by purely tectonic processes starting at about 3.0 Ga and ending with the Vredefort event at 2.0 Ga. In view of recent work in which the granophyre dikes are interpreted as the erosional remants of a more extensive impact melt sheet, injected downward into the underlying country rocks, the impact origin hypothesis for Vredefort is adopted. In order to estimate the original dimensions of the Vredefort impact structure, it is assumed that the structure was initially circular, that its predeformation center corresponds to the center of the granitic core, and that the pre-Vredefort geology of the area prior to approximately 2.0 Ga ago is as suggested by Fletcher and Reimold. The spatial relationship between shock metamorphic effects, the shock pressures they record, and the morphological features of the crater were established for a number of large terrestrial craters. The principles of crater formation at large complex impact structures comparable in size to Vredefort were also established, although many details remain unresolved. An important conclusion is that the transient crater, which is formed directly by excavation and displacement by the shock-induced cratering flow-field (i.e., the particle velocity flow field existing in the region of the transient crater but behind the initial outgoing shock front), is highly modified during the late stage processes. The original transient crater diameter lies well within the final rim of the crater, which is established by structural movements during late-stage cavity modification.

ORIGIN OF THE VREDEFORT STRUCTURE, SOUTH AFRICA: IMPACT MODEL Abstract Only **c46**

A. M. Therriault, A. M. Reid (McMaster Univ., Hamilton, Ontario.), and W. U. Reimold (Witwatersrand Univ., Johannesburg, South Africa.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1421-1422 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

A model is presented for the evolution of the Vredefort structure, based on reasoned constraints on the original size of the Vredefort structure from observational data and comparison with other terrestrial impact craters. The models for complex craters (ring and multi-ring basins) of Croft, Grieve, and co-workers, and Schultz and co-workers, were used to reconstruct the Vredefort impact event, using a final crater diameter of 300 km, as estimated by Therriault. The sequence of events (stages 2-5) is illustrated diagramatically. The stages are: initial penetration, excavation and compression, dynamic rebound and uplift, maximum radial growth and collapse, and final crater form.

Part 3: N-Z 1993 p 1423-1424 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

The recent experiments of the Comet Simulation Project, KOSI 9 and KOSI 10, for the first time yielded synoptic results of physically correlated phenomena near the surface of insolated porous ice dust mixtures (90% H2O, 10% olivine, 0.1% fine dispersed carbon, sample mean density 0.40 +/- 0.001 g/cm(sup 3)) under space conditions. Correlations were observed e.g. between (1) grain size of emitted dust and dust mantle formation; (2) surface avalanches and local surface temperature; and (3) lateral variations of the surface temperature and the thickness of the dust mantle at the end of the experiment. The dynamic surface processes and the observed structural parameters of the dust mantle and the emitted mineral residues are discussed in view of real comets.

COMETARY INTERPLANETARY DUST PARTICLES? AN UPDATE ON CARBON IN ANHYDROUS IDPS Abstract Only **c90**

K. L. Thomas (Lockheed Engineering and Sciences Co., Houston, TX.), L. P. Keller, G. E. Blanford (Houston Univ., TX.), and D. S. McKay *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1425-1426 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Chondritic anhydrous interplanetary dust particles (IDP's) are widely considered to be the most pristine samples available for the study of the early solar system because of their primitive mineralogy, chemistry, and isotopic characteristics. Previously, anhydrous IDP's were analyzed quantitatively for light elements and found that these particles have

significantly higher bulk carbon abundances than known chondritic meteorites. A relationship between carbon abundance and silicate mineralogy was also identified which, in general, shows that particles dominated by pyroxenes have a higher carbon abundance than those dominated by olivines. Particles containing equal amounts of olivine and pyroxene show a range of carbon contents and can be grouped with either the pyroxene- or olivine-dominated particles based on their carbon abundance. It was suggested that high carbon pyroxene-rich IDP's are derived from cometary sources. Bulk compositions and mineralogy of our additional IDP's were determined; one particle has the highest carbon abundance reported in IDP's or any other chondritic material, with the possible exception of the carbon-rich Halley particles. MAGELLAN MISSION Abstract Only Progress Report c12
Thomas W. Thompson *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1427-1428 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The Magellan spacecraft was launched from Cape Kennedy on 4 May 1989 and was inserted into orbit around Venus on 10 Aug. 1990. The Magellan spacecraft carries a radar instrument that makes synthetic aperture radar (SAR) images of the surface, measures the altitude of the Venusian surface directly below the spacecraft, and obtains radiometric observations of the surface. Radar and radiometric observations of the Venusian surface commenced on 15 Sep. 1990 and continued until 15 Sep. 1992. Gravity observations began on 24 Sep. 1992 and will continue until late May 1993. The radar observations produced SAR images and surface topography for 99 percent of the surface. These radar observations support the objective of improving the knowledge of the geological history of Venus by analysis of surface morphology and the processes that control them. The gravity observations that are being conducted now support the Magellan objective of improving the knowledge of the geophysics of Venus, principally its density distribution and dynamics. Also, Magellan generated more digital planetary image data than all previous planetary missions.

DISCHARGE RATES IN MA'ADIM VALLIS, MARS Abstract Only
G. D. Thornhill, D. A. Rothery, J. B. Murray, T. Day (University Coll., London, England.), A. C. Cook (University Coll., London, England.), J-P. Muller (University Coll., London, England.), and J. C. Iliffe (University Coll., London, England.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1429-1430 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

A digital elevation model (DEM) of a small part of the Martian channel Ma'adim Vallis was produced using the Frankot and Chellappa shape-from-shading algorithm. Software developed by the Dept. of Photogrammetry and Surveying at University College London uses this technique to extract slope information from the grey levels of image pixels. This technique was applied to a Viking Orbiter image of part of Ma'adim Vallis, and measurements of the channel depth and bed-slope of a channel incised into the floor of Ma'adim Vallis were made. These results were used to calculate order of magnitude estimates for discharge rates through the channel. The maximum values calculated are three orders of magnitude less than those for N. Kasei Vallis and are similar to values cited for the Missoula floods. However, when more realistic values of the water depth are used, discharge rates comparable with those for the Mississippi River result. Author (revised)

OBJECTIVE DETERMINATION OF IMAGE END-MEMBERS IN SPECTRAL MIXTURE ANALYSIS Abstract Only c25
Stefanie Tompkins, John F. Mustard, Carle M. Pieters, and Donald W. Forsyth *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1431-1432 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Spectral mixture analysis was shown to be a powerful, multifaceted tool for analysis of multi- and hyper-spectral data. The essence of the first phase of the approach is to determine a set of image end-members that best account for the spectral variance in an image cube within a constrained, linear least squares mixing model. The selection of the image end-member is usually achieved using a priori knowledge and successive trial and error solutions to refine the total number and physical location of the end-members. However, in many situations a more objective method of determining these essential components is desired. The problem of image end-member determination was approached objectively by using the inherent variance of the data. Unlike purely statistical methods such as factor analysis, this approach derives solutions that conform to a physically realistic model. Author (revised)

DISTRIBUTION AND GEOLOGIC HISTORY OF MATERIALS EXCAVATED BY THE LUNAR CRATER BULLIALDUS Abstract Only
Stefanie Tompkins, Carle M. Pieters, and John F. Mustard *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1433-1434 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The crater Bullialdus is a 61 km, Eratosthenian-age impact crater located on the western edge of Mare Nubium. Previous analysis of the spatial distribution of materials in the area using nine telescopic near-infrared spectra suggested a possible three-layer structure prior to the impact event: two shallow gabbroic layers and one deeper noritic layer (from a potential depth of 5.5 km). The initial interpretation of this stratigraphy was that Bullialdus may have tapped a layered mafic pluton, such as have been invoked to explain the existence of Mg-suite rocks. High-spatial resolution CCD images of Bullialdus were analyzed to better map the spatial distribution of the observed lithologies, and to assess the plausibility of the pluton interpretation. CORE FORMATION BY GIANT IMPACTS: CONDITIONS FOR INTACT MELT REGION FORMATION Abstract Only c46
W. B. Tonks and H. J. Melosh *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1435-1436 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Among the many effects of high-speed, giant impacts is widescale melting that can potentially trigger catastrophic core formation. If the projectile is sufficiently large, the melt pools to form an intact melt region. The dense phase then segregates from the melt, forming a density anomoly at the melt region's base. If the anomoly produces a differential stress larger than a certain minimum, it overcomes the mantle's long-term elastic strength and rapidly forms a core. It was previously shown that giant impacts effectively trigger core formation in silicate bodies by the time they grow to the mass of Mercury and in icy bodies by the time they grow larger than Triton. In order for this process to be viable, an intact melt region must be formed. Conditions under which this occurs is examined in more detail than previously published. Author (revised)

THE U-Th-Pb, Sm-Nd, AND Ar-Ar ISOTOPIC SYSTEMATICS OF LUNAR METEORITE YAMATO-793169 Abstract Only c90
Noriko Torigoye, Keji Misawa, G. Brent Dalrymple (Geological Survey, Menlo Park, CA.), and Mitsunobu Tatsumoto *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1437-1438 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

U-Th-Pb, Sm-Nd, and (Ar-40)-(Ar-39) isotopic studies were performed on Yamato (Y)-793169, an unbrecciated diabasic lunar meteorite whose chemical composition is close to low Ti(LT) and very low-Ti (VLT) mare basalts. The isotopic data indicate that the meteorite was formed earlier than 3.9 Ga from a source with low U/Pb and high Sm/Nd and was distributed by a thermal event at 751 Ma. due to the small sample size (104 mg), a plagioclase crystal and glass grains were handpicked for Ar analysis, leaving four fractions for the U-Th-Pb and Sm-Nd studies; a fine-grained fraction (less than 63 microns; Fine) and three medium-grained fractions (63-150 microns). Medium-grained fractions were divided by density; a heavy fraction (rho greater than 3.3) consisting mainly of pyroxene (PX1),

a lighter fraction (rho less than 2.8) consisting of plagioclase (PL), and a middle density fraction (predominantly pyroxene; PX2). The fractions were washed with acetone and alcohol, and then leached in 0.01 HBr and 0.1N HBr in order to remove any terrestrial Pb contamination. Analysis of the HBr leaches revealed that this meteorite was heavily contaminated with terrestrial Pb during its residence in Antarctic ice. Author (revised)

COMPLEX RIDGED TERRAIN-RELATED RIDGE BELTS ON VENUS: GLOBAL DISTRIBUTION AND CLASSIFICATION Abstract Only
T. Toermaenen *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1439-1440 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Fifty-six features were identified in a global survey of complex ridged terrain (CRT)-related ridge belts. Nonrandom aerial distribution was observed with all of the CRT-related ridge belts located to the north of 20 deg S and increasing in number towards the north. In the equatorial highlands the only concentration of CRT-related ridge belts occurs along N and NE Ovda Regio and western Thetis Regio. Major areas of CRT devoid of related ridge belts (Beta, Phoebe, Alpha Regiones, and northern Lada Terra) are regions dominated by rifting, fractures, coronae, and volcanic features. A noticeable concentration of ridge belts is located within a region 20 deg S - 80 deg N, 0 deg - 150 deg E. Three classes of CRT-related ridge belts were defined: (1) ridge belts directly in contact with CRT margins, (2) ridge belts located apart from the CRT boundary, but whose shape and strike are affected by CRT, and (3) ridge belts terminating against a margin of CRT. There does not appear to be any relation between ridge belt class and type of CRT margin. Some of the class 2 and 3 belts of the 20 deg S - 80 deg N, 0 deg - 150 deg E region seem to be continuations of adjacent elongated blocks of CRT and could reflect the hypothesized basement of tessera-like material. Majority of class 1 and 2 ridge belts within this region parallel N of NE boundaries of large CRT plateaus of arc-like arrangements of tesserae. These relationships show that this region was dominated by compressional stresses oriented perpendicular to the CRT boundaries, in N-S/NE-SW direction. Author (revised)

THE PARENT MAGMA OF THE NAKHLA (SNC) METEORITE: RECONCILIATION OF COMPOSITION ESTIMATES FROM MAGMATIC INCLUSIONS AND ELEMENT PARTITIONING Abstract Only **c90**
A. H. Treiman *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1441-1442 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The composition of the parent magma of the Nakhla meteorite was difficult to determine, because it is accumulate rock, enriched in olivine and augite relative to a basalt magma. A parent magma composition is estimated from electron microprobe area analyses of magmatic inclusions in olivine. This composition is consistent with an independent estimate based on the same inclusions, and with chemical equilibria with the cores of Nakhla's augites. This composition reconciles most of the previous estimates of Nakhla's magma composition, and obviates the need for complex magmatic processes. Inconsistency between this composition and those calculated previously suggests that magma flowed through and crystallized into Nakhla as it cooled. Author (revised)

INTACT CAPTURE OF HYPERVELOCITY PARTICLES ON SHUTTLE Abstract Only **c90**
P. Tsou, D. E. Brownlee (Washington Univ., Seattle.), and A. L. Albee (California Inst. of Tech., Pasadena.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1443-1444 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The capability for capturing micrometeoroid analogs intact through laboratory simulations in passive underdense media offers a valuable tool for cosmic dust research. However, no amount of laboratory simulations can replace actual space experiments due to the technical inability to launch high fidelity analogs of micrometeoroids in ground laboratories and then reliably simulating high hypervelocities (greater than 7 km/s). Fluffy composite micrometeoroid analogs tend to break up and have not survived laboratory launches at beyond 4 km/s, however, a new technique of launching cluster analogs was developed for the two-stage light-gas gun at NASA Ames Vertical Gun Range. Plasma drag or electrostatic accelerators may be able to achieve higher speeds than two-stage light-gas guns but only with very limited projectile compositions and may result in severe projectile deformation. Consequently, a space demonstration of intact capture was sought since 1983. Initial results from our STS-47 flight, which carried the first Shuttle Sample Return Experiment (SRE) with silica aerogel capture media, are reported. Author (revised)

PHOTOGEOLOGICAL ANALYSIS OF EUROPAN TECTONIC FEATURES Abstract Only
B. R. Tufts *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1445-1446 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Preliminary photogeological analyses of the Pelorus Linea and Sidon Flexus regions of Europa were conducted to explore the proposal by Schenk that lateral motion of crustal blocks has occurred in a 'rift zone' including possible strike-slip, tension fracturing, and geometric plate rotation about an Euler pole. These analyses revealed features interpreted as tensional structures and block rotation in a strike-slip regime consistent with the Schenk hypotheses and implied the presence of at least two stages of crustal deformation consistent with a chronology developed by Lucchitta. Confirmation of regional scale Euler pole rotation was ambiguous, however. Up to 80 kilometers of possible extension was identified in the rift zone; to accommodate this, 'cryosubduction' is speculatively proposed as a mechanism for recycling Europan 'ice lithosphere'. The cumulative width of wedge-shaped bands included in the rift zone was measured and plotted versus distance from the inferred rotation pole. Three sharp decreases in the total width were noted. These occur roughly where certain triple bands cross the rift zone suggesting that the bands are structural features that predate and influence the zone. While the curve hints at one or more sinusoidal relationships consistent with rotation geometry, given the low photographic resolution and the preliminary nature of this examination the question of whether the observations represent coherent regional rotation modified by crosscutting structures or instead imply independent local rotations separated by these structures is unanswered by this analysis. IS THERE UNIFORMITARIAN OR CATASTROPHIC TECTONICS ON VENUS? Abstract Only
Donald L. Turcotte *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1447-1448 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The distribution and modification of craters on Venus favors a near global, volcanic resurfacing event about 500 Myrs ago. Such an event indicates that the tectonic evolution of Venus was catastrophic rather than uniformitarian. The creation of a global, single-plate lithosphere on Venus about 500 Myrs ago can explain a variety of tectonic features on Venus that are not consistent with the thin lithosphere required by a uniformitarian hypothesis. A lithosphere on Venus that has thickened for 500 Myrs has a present thickness of about 300 km whereas steady-state heat loss from Venus requires a mean lithospheric thickness near 40 km. A thick lithosphere on Venus can support the high plateaus (elevations of 3-4 km) and mountain belts (up to 9 km) using the same isostatic compensation concepts applicable to the earth. If a thick lithosphere is thinned by a mantle plume, elevation is caused by thermal isostasy. The elevation due to the thinning of a 300 km thick lithosphere is about 3 km. Thus the domal elevation of Beta Regio can be explained by the same mechanism responsible for the elevation of the Hawaiian Swell. While the broad highland plateaus on Venus may be associated with thermal isostasy, the mountain belts in Ishtar Terra clearly cannot be. The high topography of Freyja Montes is almost certainly associated with underthrusting and the likely compensation mechanism is Airy isostasy associated with a thickened crust. With a density contrast delta, of 500 kg m(exp -3) an elevation of 9 km requires a crustal thickening of about 70 km. With a thick lithosphere there is no difficulty in supporting such a thick crust. IMPACT-INDUCED DEVOLATILIZATION OF CaSO4 ANHYDRITE AND IMPLICATIONS FOR K-T EXTINCTIONS: PRELIMINARY RESULTS Abstract Only **c90**

James A. Tyburczy and Thomas J. Ahrens (California Inst. of Tech., Pasadena.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1449-1450 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The recent suggestions that the target area for the K-T bolide may have been a sulfate-rich evaporite and that the resulting sulfuric acid-rich aerosol was responsible for the subsequent cooling of the Earth and the resulting biological extinctions has prompted us to experimentally examine the impact-induced devolatization of the sulfate minerals anhydrite (CaSO4) and gypsum (CaSO4(2H2O)). Preliminary results for anhydrite are reported. Up to 42 GPa peak shock pressure, little or no devolatilization occurs, consistent with chemical thermodynamic calculations. Calculation of the influence of the partial pressure of the gas species on impact-induced devolatilization suggests that an even greater amount of sulfur than that proposed by Brett could have been released to the atmosphere by an impact into a sulfate-rich layer. Solid recovery, impact-induced devolatilization experiments were performed on the Caltech 20mm gun using vented, stainless steel sample assemblies. Author (revised)

MEASUREMENTS OF THE DIELECTRIC PROPERTIES OF SIMULATED COMET MATERIAL AS PART OF THE KOSI 10 EXPERIMENT Abstract Only **c90**

S. Ulamec, H. Svedhem, and H. Kochan (Deutsche Forschungsanstalt fuer Luft- und Raumfahrt, Cologne, Germany.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1451-1452 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The dielectric constant epsilon of the snow-mineral used for the comet simulation in the German KOSI 10 experiment was measured in the radio frequency range from 2 to 4 GHz. The traditional microwave bridge method was used, but instead of using a waveguide that contains the sample material small lambda/4 antennas were used as sensors. A change in the dielectric properties indicates a change in density and/or composition, respectively. The method is presented as an analytical tool for measuring such density or composition changes during alteration snow-dust materials. The KOSI (determined from the German: Kometen Simulation) experiments, performed in the Space simulator of the DLR/Institut for Raumsimulation, during the last years revealed many processes that presumably take place on comets. So far, modifications of the internal structure could be identified only during the post-experiment inspection via hardness tests. It was the aim of the KOSI 10 and KOSI 10a experiments to emphasize on a synoptic detection of events like particle emission or crust formation. The composition of the KOSI 10 sample material was an ice-mineral mixture with about 10 percent mineral (olivine) content. An excellent method to investigate the change of the density of the probe material during its exposure to the artificial sun in situ is to do it via the measurement of the dielectric constant. The traditional method to determine epsilon, by using a microwave-bridge to measure the transmission and the reflection factor of the sample material for electromagnetic waves in the radio frequency range, was modified, since the commonly used practice to fill the sample material into a waveguide was not compatible with the need for in situ measurements during the simulation experiment. Avail: CASI HC A01/MF A06

Galileo Regio quadrangle, including most of Galileo Regio, contains two basic geologic units: older dark, furrowed, and heavily cratered material and younger light, grooved, relatively less-cratered material. Dark material dominates, the light material occurring to the W and SW in about five percent of the quadrangle. Dominant structural features, of uncertain origin, are the NW-trending arcuate furrows and associated orthogonal and oblique furrows in the dark material; grooves in the light material are not as well-ordered nor as intensely developed as elsewhere on Ganymede. Fifteen palimpsests, located partly or totally in the quadrangle and representing the period when the crust became sufficiently strong to record impact events, are subdivided into three relative-age classes, as are the numerous impact craters, some of which are dome, moat, and rampart-like. Galileo Regio is believed to have formed when, because of cooling, differentiation, and expansion, the thin, weak, icy lithosphere broke into blocks and light material filled the space between, or overspread those blocks that subsided, or both. Grooves formed in most of the light material and both light and dark material were cratered by impact, the most recent of which created bright-ray craters, the youngest features visible in the quadrangle. REVERSE POLARITY MAGNETIZED MELT ROCKS FROM THE CHICXULUB IMPACT STRUCTURE, YUCATAN PENINSULA, MEXICO Abstract Only **c46**

Jaime Urrutia-Fucugauchi, Luis E. Marin, Virgil L. Sharpton (Lunar and Planetary Inst., Houston, TX.), and Juan Manuel Quezada (Gerencia de Exploracion, Petroleos Mexicanos, Mexico City.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1455-1456 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Further paleomagnetic data for core samples of melt rock recovered in the Petroleos Mexicanos (PEMEX) exploratory wells within the Chicxulub structure, northern Yucatan peninsula, Mexico are reported. A previous report by Sharpton showed that the rocks studied contain high iridium levels and shocked breccia clasts, and an Ar-40/Ar-39 age of 65.2 plus or minus 0.4 Ma. The geomagnetic polarity determined for two samples is reverse (R) and was correlated with chron 29R that includes the K/T boundary. Our present analysis is based on two samples from each of three clasts of the melt rock from PEMEX well Y6-N17 (1295 to 1299 m b.s.l.). This study concentrates on the vectorial nature and stability of the remanence (NRM), the magnetic mineralogy and remanence carriers (i.e., the reliability and origin of the record), and on the implications (correlation with expected paleolatitude and polarity). The relative orientation of the drill core samples with respect to the horizontal is known. Samples were stable under alternating field (AF) and thermal treatments, and after removal of a small component they exhibited single-vectorial behavior. The characteristic remanence inclinations show small dispersion and a mean value (-43 deg) in close agreement with the expected inclination and paleolatitude (derived from the North American apparent polar wander path). Isothermal remenence (IRM) acquisition experiments, Lowrie-Fuller tests, coercivity and unblocking temperature spectra of NRM and saturation IRM, susceptibility and Q-coefficient analyses, and the single-component nature indicate a dominant mineralogy of iron-rich titanomagnetites with single or pseduo-single domain states. The stable characteristic magnetization may be interpreted as a result of shock heating of the rock at the time of formation of the inpact structure and its polarity, age, and paleolatitude are consistent with a time about the K/T boundary. IMPS ALBEDO AND DIAMETER FOR ASTEROID 243 IDA Abstract Only **c90**

G. J. Veeder and E. F. Tedesco (Mission Research Corp., Santa Barbara, CA.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1459-1460 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

243 Ida is the second asteroid target of the Galileo mission. The Infrared Astronomical Satellite (IRAS) detected Ida several times during its 1983 sky survey. The IRAS Minor Planet Survey (IMPS) yields a total of 13 usable observations during 6 sightings of Ida. These data result in a geometric visual albedo of 0.24 and a mean diameter of 28 km for Ida. The IMPS catalog updates and extends the IRAS Asteroid and Comet Survey through asteroid number 4679. File versions of IMPS final products will be available from the National Space Science Data Center (NSSDC). The input for IMPS processing includes updated visual absolute magnitudes and orbital elements for each asteroid. H and G are 9.94 and 0.15 for Ida. IMPS also includes a correction for low flux densities (less than approximately 1 Jansky). In the case of Ida, 3 observations at 12 microns, 6 at 25 microns, and 4 at 60 microns were considered acceptable for analysis. Most of these do have flux densities less than 1 Jansky with a value of approximately 5 for their estimated SNR. The 25 microns observations as plotted in the figure are consistent with the variation expected for the cross section of Ida with rotation. Ida is a main belt asteroid with an S taxonomic classification. The spectra of S asteroids tend to be dominated by pyroxene with visual albedos from 0.1 to 0.3. The IMPS average albedo of 0.24 (plus or minus 0.07) for 243 Ida is in the upper range observed for S asteroids. Author (revised)

ARE THE C DELTA LIGHT NITROGEN AND NOBLE GASES LOCATED IN THE SAME CARRIER? Abstract Only **c90**
A. B. Verchovsky, S. S. Russell, C. T. Pillinger, A. V. Fisenko (Academy of Sciences, USSR, Moscow.), and Yuri A. Shukolyukov (Academy of Sciences, USSR, Moscow.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1461-1462 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Light nitrogen and the HL family noble gas components of C(sub delta) appear to be separable by high resolution pyrolysis experiments. Thus C(sub delta) is not a homogeneous material and probably consists of debris of many stars. The question of whether the N and Xe(HL) actually reside in different carriers continues to be addressed. It is well known that C(sub delta) which was identified as nanometer sized diamonds contains isotopically anamalous elements, in particular noble gases including Xe(HL) and its family and light nitrogen (delta(N-15) down to -350 percent). Before the true nature of C(sub delta) was recognized, it was easy to suppose that the Xe(HL) and light nitrogen were located in the same carrier. However, recognition that light nitrogen in diamond from different samples varies by greater than a factor of six compared to Xe(HL) fluctuations of ca. 20 percent makes such an assumption questionable. On the basis of simple arithmetic logic, the Xe and nitrogen cannot be absolutely co-located. The average diamond grain consists of only about 1000-2000 atoms of carbon; one grain among a few x 10(exp 6) contains an atom of Xe(HL) while 5-30 atoms of light nitrogen are the typical number which need to be in every diamond grain to account for observed concentrations. If some grains are devoid of N, the others have to have a higher N concentration. Even if we were able to analyze an individual grain of the diamond for noble gases and nitrogen, we would be faced with the monumental task of locating the one amongst 10(exp 6) identical grains containing the Xe atom to examine its nitrogen content. The problem can be simplified to some extent if instead of Xe, He which is 10(exp 4) times more abundant is assumed to be a member of the HL family. Attempts to fractionate the separate carriers might be attempted using He and N as guiding indicators but even experiments of this nature are for the future. Faced with apparently insoluble problems, we have returned to an investigation we last used in our original efforts to find isotopically light nitrogen, that is to compare release patterns of the different components during stepped pyrolysis and combustion. NUMERICAL MODELING OF IMPACT EROSION OF ATMOSPHERES: PRELIMINARY RESULTS Abstract Only
A. M. Vickery *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1463-1464 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

It is clear from the great diversity of atmospheres among the terrestrial planets that their formation and evolution must have depended on a balance among a number of different processes. One of these processes is atmospheric erosion by impacts, which may have been particularly effective on Mars. The reason is that geomorphic evidence on Mars suggests that this planet had, early in its history, dense enough atmosphere to sustain active precipitation over geologically significant periods of time. Analytic calculations indicate that neither the projectile entering the atmosphere nor the main crater ejecta can cause the lose of significant amounts of atmosphere. The vapor plume that is formed, however, expands rapidly as its internal energy is converted into kinetic energy, and may blow off the overlying atmosphere. A model of this part of the impact/atmosphere interaction predicts Mars could have lost a substantial early atmosphere by impact erosion alone. Although our more detailed calculations, which took into account the anisotropy of the atmosphere with respect to zenith angle, show that the process isn't quite as effective, they still indicate the probability of substantial atmospheric loss from Mars. The first results from 2-D hydrocode runs are discussed. These include two runs which make most of the same simplifying approximations as the analytic models, in order to compare the analytic and numerical results directly, and one run (as yet incomplete) that models the full impact. COMPARISON OF VISIBLE AND NEAR-INFRARED REFLECTANCE SPECTRA OF CM2 CARBONACEOUS CHONDRITES AND PRIMITIVE ASTEROIDS Abstract Only **c90**
F. Vilas, T. Hiroi, and M. E. Zolensky *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1465-1466 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Spectra of primitive asteroids (defined as C, P, and D classes and associated subclasses) were compared to the limited number of spectra of CM2 carbonaceous chondrites. An absorption feature located at 0.7 microns attributed to an Fe(+2) - Fe(+3) charge transfer absorption in iron oxides in phyllosilicates is apparent in some of the CM2 carbonaceous chondrite spectra and many of the asteroid spectra. Sawyer found a correlation between the area of the 0.7 micron feature and the mean semimajor axis of the asteroids. Spectra of a larger sample of carbonaceous chondrites, including 7 CM2 chondrites, covering a spectral interval of 0.30-2.5 microns were recently obtained using the Relab instrument at Brown University. These spectra were compared with spectrophotometric asteroid observations in a separate abstract. Those spectra of CM2 chondrites were isolated into the UV, visible and near-infrared spectral regions in order to compare them with high-quality narrowband reflectance spectra. Author (revised)

RECONDENSATION IN THE EARLY SOLAR SYSTEM: PHYSICAL CONDITIONS AND SOURCE MATERIAL Abstract Only **c90**
A. V. Vityazev, V. A. Dorofeyeva, and A. B. Makalkin *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1467-1468 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Many physical processes in the solar nebula led to fractionation of the gaseous phase of the preplanetary material. Some of these processes are listed with corresponding type of fractionation in terms of Rock/Ice/Gas. Recondensation from fractionated gas phase yields different compositions of condensates. In some detail, one type of fractionation is considered: impact heating with evaporation and subsequent recondensation of material during intercollisions of planetesimals. For thermodynamical simulation of recondensation in such a process one needs (1) P-T parameters and (2) some initial source material to be heated, evaporated, and recondensed. These two problems are addressed. Author (revised)

The Clementine Mission is being built and flown by the Naval Research Laboratory under the sponsorship of the Strategic Defense Initiative Organization of the United States Department of Defense in joint-cooperation with NASA, and will explore the Moon and the near-Earth asteroid (NEA) 1620 Geographos with lightweight sensors developed by the Lawrence Livermore National Laboratory. A NASA Science Team for this mission will be selected by way of a NRA in April 1993. The instrument suite includes imaging cameras that cover a spectral range from the near-ultraviolet to the mid-infrared, a laser ranger, and, potentially, a charged particle telescope. To be launched in early 1994, Clementine will be in lunar orbit from February through May 1994, at which time it will depart the Moon for a flyby of 1620 Geographos in August 1994. This mission represents an outstanding opportunity for scientists interested in the Moon and asteroids. It is anticipated that the data returned from this mission will permit: an assessment of global lunar crustal heterogeneity and a resolution of less than 1 km; an assessment of the lithologic heterogeneity of Geographos at a scale of 100 m or better; and an assessment of surface processes on Geographos on the order of 10 m. The basic mission of Clementine and some of the key scientific questions that will be addressed are described. Additional material on the Clementine mission, its data handling and processing, and its instrument suite is presented elsewhere.

ALUMINUM-26 ACTIVITIES IN METEORITES Abstract Only **c25**

J. F. Wacker *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1471-1472 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Al-26 activities for 686 Antarctic meteorites and 46 non-Antarctic meteorites are reported. The data set includes new results for 253 Antarctic and 5 non-Antarctic meteorites. Most of the Antarctic specimens were collected from the Allan Hills region, but specimens from other regions were measured as well. The non-Antarctic specimens include freshly fallen meteorites, in which short-lived radionuclides (e.g., Na-22, Mn-54, Co-57, etc.) were also measured. The data were analyzed for terrestrial age distributions, identification of samples with unusual activities, pairing of specimens, and comparisons of Antarctic and non-Antarctic activity distributions.

RARE EARTH ELEMENTS IN INDIVIDUAL MINERALS IN SHERGOTTITES Abstract Only **c25**

Meenakshi Wadhwa and Ghislaine Crozaz *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1473-1474 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Shergottites (i.e., Shergotty, Zagami, EETA79001, ALHA77005, and LEW88516) are an important set of achondrites because they comprise the majority of the SNC group of meteorites (nine, in total, known to us), which are likely to be samples of the planet Mars. Study of these meteorites may therefore provide valuable information about petrogenetic processes on a large planetary body other than Earth. Rare earth element (REE) distributions between various mineral phases were found to be useful in geochemically modeling the petrogenesis of various rock types (terrestrial and meteoritic). However, with the exception of a few ion microprobe studies and analyses of mineral separates, there has previously not been any comprehensive effort to characterize and directly compare REE in individual minerals in each of the five known shergottites. Ion microprobe analyses were made on thin sections of each of the shergottites. Minerals analyzed were pyroxenes (pigeonite and augite), maskelynite, and whitlockite. The REE concentrations in each mineral type in each shergottite is given.

ORIGIN OF HIGH-Ti LUNAR ULTRAMAFIC GLASSES Abstract Only **c25**

T. P. Wagner and T. L. Grove *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1475-1476 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

A series of high pressure melting experiments were performed on a synthetic analog of the Apollo 14 Black Glass. At 15 kb and 1400 C, olivine is the liquidus phase. At 25 kb and 1450 C, orthopyroxene and Cr-spinel crystallize. A multiple saturation point with olivine + orthopyroxene + spinel on the liquidus occurs at 20 kb and 1440 C. It was proposed that the high-Ti ultramafic glass evolved from a low-Ti Green Glass generated deep in the lunar interior that assimilated shallow-level, late stage cumulates of magma ocean differentiation. Heat for assimilation is provided by superheat of the low-Ti magma and melts high-Ca pyroxene and ilmenite cumulates at a depth of 100 km. This model is a variant of that proposed by Hubbard and Minear and rejected by Ringwood and Kesson.

DIFFUSION-CONTROLLED MAGNESIUM ISOTOPIC FRACTIONATION OF A SINGLE CRYSTAL FORSTERITE EVAPORATED FROM THE SOLID STATE Abstract Only **c25**

Jianhua Wang, Andrew M. Davis, Akihiko Hashimoto (Harvard-Smithsonian Center for Astrophysics, Cambridge, MA.), and Robert N. Clayton *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1479-1480 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Though the origin of calcium- and aluminum-rich inclusions (CAI's) in carbonaceous chondrites is till a disputed issue, evaporation is no doubt one of the most important processes for the formation of CAI's in the early solar nebula. The mechanism for production of large isotopic mass fractionation effects in magnesium, silicon, oxygen, and chromium in CAI's can be better understood by examining isotopic fractionation during the evaporation of minerals. New evaporation experiments were performed on single-crystal forsterite. The magnesium isotopic distribution near the evaporating surfaces of the residues using a modified AEI IM-20 ion microprobe to obtain rastered beam depth profiles was measured. A theoretical model was used to explain the profiles and allowed determination of the diffusion coefficient of Mg(++) in forsterite at higher temperatures than previous measurements. The gas/solid isotopic fractionation factor for magnesium for evaporation from solid forsterite was also determined and found to be nearly the same as that for evaporation of liquid Mg2SiO4.

LIMITS ON DIFFERENTIATION OF MELT SHEETS FROM BASIN-SCALE LUNAR IMPACTS Abstract Only

Paul H. Warren *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1481-1482 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

In the literature on cratering, one frequently finds allusions to the 'sheet' of impact melt that supposedly forms in the aftermath of any large impact. The presumption seems to be that either (1) most of the impact melt is formed virtually at the surface, or else (2) most of the melt inevitably collects into a near-surface, roughly sill-shaped 'sheet,' soon after the impact. However, in basin-scale impacts on the mature Moon, neither of these scenarios appears likely. Differentiation of impact melts on the Moon is hampered by similarity in density vs. the porous lunar crust, and by the adverse melt/'displaced' matter ratio that results from the lunar g.

CONSORTIUM STUDY OF LUNAR METEORITES YAMATO-793169 AND ASUKA-881757: GEOCHEMICAL EVIDENCE OF MUTUAL SIMILARITY, AND DISSIMILARITY VERSUS OTHER MARE BASALTS Abstract Only c90

Paul H. Warren (California Univ., Los Angeles.) and Marilyn M. Lindstrom *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1483-1484 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Compositions of bulk powders and separated minerals from two meteorites derived from the mare lava plains of the Earth's Moon, Yamato-793169 and Asuka-881757, indicate a remarkable degree of similarity to one another, and clearly favor lunar origin. However, these meteorites are unlike any previously studied lunar rock. In both cases, the bulk-rock TiO2 content is slightly greater than the level separating VLT from low-Ti mare basalt, yet the Sc content is much higher than previously observed except among high-Ti mare basalts. Conceivably, the Sc enrichment in A881757 reflects origin of this rock as a cumulate from a mare magma of 'normal' Sc content, but this seems unlikely. Mineral-separate data suggest that most of the Sc is in pyroxene, and a variety of evidence weighs against the cumulus hypothesis as a major cause for the high Sc. The remarkable similarity between Y793169 and A881757 suggests the possibility that they were derived from a single source crater on the Moon.

MAGNETIC RECORD IN CHONDRITE METEORITES Abstract Only c90

P. J. Wasilewski, J. L. Faris, and M. V. OBryan *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1485-1486 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

What we know about the magnetic record in chondrite meteorites based on new data and previously published results is summarized. Strips from thin slabs of chondrite meteorites were cut into near cubical subsamples (several mm on edge) numbering approximately 60 to approximately 120 per meteorite. A common orientation was assigned to each subsample from a given meteorite in order to ensure that we could discover the vector makeup of the bulk meteorite. The new data set includes: Shaw (L7), Roy (L5/6), Claytonville (L5), Plainview (H5), Etter (H5), Leoville (C3V), and Allende (C3V). In addition to these new results, literature data of sufficient detail, e.g. Bjurbole (L4), ALH769 (L6), Abee (E4), Allende (C3V), and Olivenza (L5), is considered.

AGB STARS AS A SOURCE OF SHORT-LIVED RADIOACTIVE NUCLEI IN THE SOLAR NEBULA Abstract Only c92

G. J. Wasserburg, R. Gallino (Turin Univ., Italy.), M. Busso (Turin Univ., Italy.), and C. M. Raiteri (Turin Univ., Italy.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1487-1488 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

The purpose is to estimate the possible contribution of some short-lived nuclei to the early solar nebula from asymptotic giant branch (AGB) sources. Low mass (1 to 3 solar mass) AGB stars appear to provide a site for synthesis of the main s process component for solar system material with an exponential distribution of neutron irradiations varies as exp(-tau/tau(sub 0)) (where tau is the time integrated neutron flux with a mean neutron exposure tau(sub 0)) for solar abundances with tau(sub 0) = 0.28 mb(sup -1). Previous workers estimated the synthesis of key short-lived nuclei which might be produced in AGB stars. While these calculations exhibit the basic characteristics of nuclei production by neutron exposure, there is need for a self-consistent calculation that follows AGB evolution and takes into account the net production from a star and dilution with the cloud medium. Many of the general approaches and the conclusions arrived at were presented earlier by Cameron. The production of nuclei for a star of 1.5 solar mass during the thermal pulsing of the AGB phase was evaluated. Calculations were done for a series of thermal pulses with tau(sub 0) = 0.12 and 0.28 mb(sup -1). These pulses involve s nucleosynthesis in the burning shell at the base of the He zone followed by the ignition of the H burning shell at the top of the He zone. After about 10-15 cycles the abundances of the various nuclei in the He zone become constant. Computations of the abundances of all nuclei in the He zone were made following Gallino. The mass of the solar nebula was considered to consist of some initial material of approximately solar composition plus some contributions from AGB stars. The ratios of the masses required from the AGB He burning zone to the ISM necessary to produce the observed value of Pd-107/Pd-108 in the early solar system were calculated and this dilution factor was applied to all other relevant nuclei. MULTIPLICITY OF CHONDRULE HEATING EVENTS AND THE COARSENING OF CHONDRULE TEXTURES Abstract Only c90

John T. Wasson *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1489-1490 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Our studies of compound chondrules show that most chondrules experienced at least two thermal events that produced appreciable amounts of melt. I suggest that chondrules were subjected to a hierarchy of brief heating events, the number increasing exponentially with decreasing intensity, and that some of intermediate intensity deposited enough heat to partially melt mesostasis glass and promote the growth of mafic mineral grains. This scenario can account for textures that require improbably low monotonic cooling rates in laboratory simulations, and also for the rarity of glassy chondrule textures despite the ease with which these are produced in the laboratory.

EQUILIBRIUM AND FRACTIONAL CRYSTALLIZATION OF A PRIMITIVE SHERGOTTITE COMPOSITION Abstract Only c90

L. E. Wasylenki (California Inst. of Tech., Pasadena.), J. H. Jones, L. Le (Lockheed Engineering and Sciences Co., Houston, TX.), and A. J. G. Jurewicz (Lockheed Engineering and Sciences Co., Houston, TX.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1491-1492 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

The shergottites are a subset of the Shergottites Nakhlites Chassignites (SNC) meteorites, which are believed to have come from Mars. Petrologic studies of these basaltic meteorites suggest that the most primitive shergottite composition is the groundmass of EETA79001 (a lithology). This inference is based on (1) its high Mg relative to the other shergottites; (2) it normative olivine; and (3) its lack of the cumulate crystals found in most other SNC meteorites. However, the relationship between this primitive composition and the compositions of the other, more evolved shergottites cannot be discovered through petrologic investigations alone. Therefore, liquidus phase relations were experimentally determined for a synthetic EETA79001A groundmass composition at 1 bar and QFM in order to find

whether the bulk compositions of other shergottites could be derived by simple equilibrium or fractional crystallization of the EETA79001A groundmass composition. Author (revised)

HIGH D/H RATIOS OF WATER IN MAGMATIC AMPHIBOLES IN CHASSIGNY: POSSIBLE CONSTRAINTS ON THE ISOTOPIC COMPOSITION OF MAGMATIC WATER ON MARS Abstract Only

L. L. Watson, I. D. Hutcheon, S. Epstein, and E. M. Stolper *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1493-1494 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

The D/H ratios of kaersutitic amphiboles contained in magmatic inclusions in the Shergottites Nakhlites Chassignites (SNC) meteorite Chassigny using the ion microprobe were measured. A lower limit on the delta(D(sub SMOW)) of the amphiboles is +1420 +/- 47 percent. Assuming Chassigny comes from Mars and the amphiboles have not been subject to alteration after their crystallization, this result implies either that recycling of D-enriched Martian atmosphere-derived waters into the planetary interior has taken place, or that the primordial hydrogen isotopic composition of the interior of Mars differs significantly from that of the Earth (delta(D(sub SMOW)) approximately 0 percent). In addition, the measurements indicate that the amphiboles contain less than 0.3 wt. percent water. This is much lower than published estimates, and indicates a less-hydrous Chassigny parent magma than previously suggested. Author (revised)

ARCUATE AND CIRCULAR STRUCTURES IN THE THARSIS REGION: EVIDENCE OF CORONAE ON MARS Abstract Only

T. R. Watters, J. R. Zimbelman, and D. H. Scott (Geological Survey, Flagstaff, AZ.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1495-1496 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Arcuate and circular structures are evident in the Tharsis region of Mars. They involve concentric graben and fracture systems and are often associated with volcanic centers. The most prominent example is Alba Patera, a low relief volcanotectonic center. It is surrounded by a graben system comprised of the Alba and Tantalus Fossae and part of the Ceranius Fossae system that are thought to have formed during the Early Amazonian. The graben concentric to Alba Patera form an annulus that is 600 km in diameter. The similarity between Alba Patera and coronae on Venus was observed prior to the Magellan mission. Magellan imagery of Venusian coronae has revealed a number of striking similarities between these structures, Alba Patera, and the other circular structures on Mars. Coronae on Venus are circular to ovoidal volcanotectonic features that range in diameter from 60 to over 1000 km. Concentric graben form partial to complete tectonic annuli. More regionally extensive graben systems are deflected toward, and in many cases merge with, the concentric graben. Volcanic flows and domes dominate the surface enclosed within the concentric graben. However, distinctive differences exist between coronae on Venus and the structures on Mars. Circular structures on Mars lack radial graben crosscut by concentric graben. There is also no evidence of the complex topography associated with coronae on Venus. The differences between coronae on Venus and the suspected coronae on Mars may be largely due to the difference in the thickness of the elastic lithosphere on the two planets. The topographic expression of the interaction between the diapir and the lithosphere would be expected to be greatly subdued on Mars because of the large difference in lithospheric thickness. The lack of circular structures with diameters below 200 km suggests a lower limit to the size that coronae could form on Mars. Derived from text

A FRESH LOOK AT CRATER SCALING LAWS FOR NORMAL AND OBLIQUE HYPERVELOCITY IMPACTS Abstract Only **c18**

A. J. Watts, D. R. Atkinson, S. R. Rieco, J. B. Brandvold, S. L. Lapin, and C. R. Coombs *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1497-1498 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

With the concomitant increase in the amount of man-made debris and an ever increasing use of space satellites, the issue of accidental collisions with particles becomes more severe. While the natural micrometeoroid population is unavoidable and assumed constant, continued launches increase the debris population at a steady rate. Debris currently includes items ranging in size from microns to meters which originated from spent satellites and rocket cases. To understand and model these environments, impact damage in the form of craters and perforations must be analyzed. Returned spacecraft materials such as those from LDEF and Solar Max have provided such a testbed. From these space-aged samples various impact parameters (i.e., particle size, particle and target material, particle shape, relative impact speed, etc.) may be determined. These types of analyses require the use of generic analytic scaling laws which can adequately describe the impact effects. Currently, most existing analytic scaling laws are little more than curve-fits to limited data and are not based on physics, and thus are not generically applicable over a wide range of impact parameters. During this study, a series of physics-based scaling laws for normal and oblique crater and perforation formation has been generated into two types of materials: aluminum and Teflon. Avail: CASI HC A01/MF A06

The wavelength dependence of extinction in the diffuse interstellar medium implies that it is produced by particles of dominant size of approximately 10(exp -5) cm. There is some indication that in the cores of dense molecular clouds, sub-micron grains can coagulate to form larger particles; this process is probably driven by turbulence. The most primitive meteorites (carbonaceous chondrites) are composed of particles with a bimodal size distribution with peaks near 1 micron (matrix) and 1 mm (chondrules). Models for chondrule formation that involve processing of presolar material by chemical reactions or through an accretion shock during infall assume that aggregates of the requisite mass could form before or during collapse. The effectiveness of coagulation during collapse has been disputed; it appears to depend on specific assumptions. The first results of detailed numerical modeling of spatial and temporal variations of particle sizes in presolar clouds, both static and collapsing, is reported in this article. Derived from text

THE FORMATION OF FeO-RICH PYROXENE AND ENSTATITE IN UNEQUILIBRATED ENSTATITE CHONDRITES: A PETROLOGIC-TRACE ELEMENT (SIMS) STUDY Abstract Only **c90**

M. K. Weisberg, M. Prinz, R. A. Fogel, and N. Shimizu (Woods Hole Oceanographic Inst., MA.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1501-1502 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Enstatite (En) chondrites record the most reducing conditions known in the early solar system. Their oxidation state may be the result of condensation in a nebular region having an enhanced C/O ratio, reduction of more oxidized materials in a reducing nebula, reduction during metamorphic reheating in a parent body, or a combination of these events. The presence of more oxidized Fe-rich silicates, two types of En (distinguished by red and blue CL), and the juxtaposition of FeO-rich pyroxenes (Fe-pyx) surrounded by blue En (enstatite) in the UEC's (unequilibrated enstatite chondrites) is intriguing and led to the examination of the question of enstatite chondrite formation. Previously, data was presented on the petrologic-geochemical characteristics of the Fe-pyx and coexisting red and blue En. Here minor and trace element abundances (determined by ion probe-SIMS) on these three types of pyroxenes are

reported on in the following meteorites: Kota Kota and LEW87223 (EH3), MAC88136 (EL3), St. Marks (EH4), and Hvittis (EL6). More data are currently being collected. Derived from text

GEOLOGY AND RADIOPHYSICAL PROPERTIES OF THE VENERA AND VEGA LANDING SITES Abstract Only
C. M. Weitz and A. T. Basilevsky (Brown Univ., Providence, RI.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1503-1504 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Geologic maps for all seven Venera and Vega landing sites have been produced. Because the radius of error for each landing site is 150 km, the entire landing circle has been mapped centered about the estimated landing point. Correlations were found between the Magellan imagery and the lander TV panoramas and geochemical measurements made at the landing site. Radiophysical properties, including backscatter cross-sections, altimetry, emissivity, and rms slopes, were determined for each landing circle. After mapping the geology of the landing circles, the regional geology of the seven sites was mapped and the geologic history of theses large regions was determined. Derived from text

A STUDY OF CARBONATES, SULFATES, AND PHOSPHATES USING THERMAL EMISSION SPECTROSCOPY Abstract Only c25
M. L. Wenrich and P. R. Christensen *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1505-1506 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Thermal emission spectroscopy is useful for identifying mineralogies including carbonates, sulfates, and phosphates. Each of these groups of minerals has a distinct emissivity profile that allows for general identification (e.g., carbonate). Laboratory data are being collected that suggest the potential for determining specific composition of these minerals (e.g., calcite, magnesite). Previous studies of Mars suggest that the above groups of minerals should be present. On Mars fine-grained mineralogies are likely to be intimately mixed due to aeolian activity. Mixtures of calcite with palagonite will be studied to determine the volume percent requirement for salt identification and to understand the complexities of fine-grained mixtures observed by thermal emission. Further work with mixtures will include sulfate and phosphate mineralogies. Derived from text

WEATHERING FEATURES AND SECONDARY MINERALS IN ANTARCTIC SHERGOTTITES ALHA77005 AND LEW88516 Abstract Only c90
Susan J. Wentworth (Lockheed Engineering and Sciences Co., Houston, TX.) and James L. Gooding *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1507-1508 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Previous work has shown that all three sub-groups of the shergottite, nakhlite, and chassignite (SNC) clan of meteorites contain aqueous precipitates of probable pre-terrestrial origin. In the context of secondary minerals, the most thoroughly studied shergottite has been Elephant Moraine, Antarctica A79001 (EETA79001). The recognition of LEW88516 as the latest SNC specimen, and its close similarity with ALHA77005, invite a comparative study of the latter two meteorites, and with EETA79001, from the perspective of aqueous alteration. The fusion crusts of the two meteorites are quite similar except that ALHA77005 is more vesicular (possibly indicating a higher indigenous volatile content). Secondary aluminosilicates (and salts on LEW88516) of definite Antarctic origin partially fill vesicles and fractures on both fusion crusts. Interior samples of the two meteorites are grossly similar in that traces of secondary minerals are present in both. Derived from text

PETROLOGY AND GEOCHEMISTRY OF VLT GLASSES FROM DOUBLE DRIVE TUBE 79001/2 Abstract Only c25
Susan J. Wentworth (Lockheed Engineering and Sciences Co., Houston, TX.), D. J. Lindstrom, R. R. Martinez (Lockheed Engineering and Sciences Co., Houston, TX.), and D. S. McKay *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1509-1510 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

As a part of more general studies of soils from Apollo 17 double drive tube 79001/2, glasses from the 79001/2 core are being analyzed by a multidisciplinary approach including SEM/EDS and INAA. Efforts are currently focused on VLT (very low-Ti; TiO_2 less than 1 wt%) mare glasses, which are common in 79001/2 and have also been found in other Apollo 17 soils. One of the primary objectives is to determine whether any or all of the Apollo 17 VLT glasses represent pristine volcanic compositions. In addition, the range of VLT glass compositions and possible relationships between the glasses and VLT lithic samples, for which some geochemical data have been obtained previously, is being defined. VARIETY IN PLANETARY SYSTEMS Abstract Only c90
George W. Wetherill *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1511-1512 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Observation of circumstellar disks, regular satellite systems of outer planets, and planet-size objects orbiting pulsars support the supposition that formation of planetary systems is a robust, rather than a fragile, byproduct of the formation and evolution of stars. The extent to which these systems may be expected to resemble one another and our Solar System, either in overall structure or in detail remains uncertain. When the full range of possible stellar masses, disk masses, and initial specific angular momenta are considered, the possible variety of planetary configurations is very large. Numerical modeling indicates a difference between the formation of small, inner, terrestrial planets and the outer planets. Derived from text

ELEVATION AND IGNEOUS CRATER MODIFICATION ON VENUS: IMPLICATIONS FOR MAGMATIC VOLATILE CONTENT Abstract Only
R. W. Wichman *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1513-1514 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Although most impact craters on Venus preserve nearly pristine crater rim and ejecta features, a small number of craters have been identified showing clear evidence of either igneous intrusion emplacement (floor-fracturing) beneath the crater floor or of volcanically embayed exterior ejecta deposits. Since the volcanically embayed craters consistently occur at higher elevations than the identified floor-fractured craters, this report proposes that igneous crater modification on Venus is elevation dependent. This report describes how regional variations in magmatic neutral buoyancy could produce such elevation dependent crater modification and considers the implications for typical magmatic volatile contents on Venus. LARGE FLOOR-FRACTURED CRATERS AND ISOSTATIC CRATER MODIFICATION: IMPLICATIONS FOR LITHOSPHERIC THICKNESS ON VENUS Abstract Only
R. W. Wichman and P. H. Schultz (Brown Univ., Providence, RI.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1515-1516 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Several of the largest craters on Venus, including Mead, Meitner and Isabella, exhibit well-developed floor fracture patterns combining a central set of radial features with a peripheral set of concentric fractures. This pattern strongly resembles the fracture patterns observed in the largest floor-fractured craters on the Moon (e.g. Humboldt, Gauss, Petavius). Although most lunar floor-fractured craters apparently reflect crater modification by igneous intrusions and volcanism, we propose that the

fractures in these larger craters represent domical flexure events in response to post-impact isostatic uplift. Since the extent of uplift and surface failure in this model depends on both the size of the basin cavity and the local lithospheric thickness, this interpretation also provides a means for constraining lithospheric thicknesses on Venus. Based on the apparent onset diameter of isostatic crater modification, we derive lithospheric thickness estimates for the Moon of approximately 80 - 100 km, and for Venus of approximately 50 - 70 km. DEGRADATION SEQUENCE OF YOUNG LUNAR CRATERS FROM ORBITAL INFRARED SURVEY Abstract Only

M. A. Wieczorek (State Univ. of New York, Buffalo.) and W. W. Mendell *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1517-1518 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Using new software, nighttime thermal maps of the lunar surface have been generated from data obtained by the Apollo 17 Infrared Scanning Radiometer (ISR) in lunar orbit. Most of the thermal anomalies observed in the maps correspond to fresh lunar craters because blocks on the lunar surface maintain a thermal contrast relative to surrounding soil during the lunar night. Craters of Erastosthenian age and older - relatively young by lunar standards - have developed soil covers that make them almost indistinguishable from their surroundings in the thermal data. Thermal images of Copernican age craters show various stages of a degradation process, allowing the craters to be ranked by age. The ISR data should yield insights into lunar surface evolution as well as a more detailed understanding of the bombardment history after formation of the great mare basins.

A LONG-TERM CHANGE OF THE AR/KR/XE FRACTIONATION IN THE SOLAR CORPUSCULAR RADIATION Abstract Only c92

R. Wieler, H. Baur, and P. Signer *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1519-1520 Sponsored in part by the Swiss NSF (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Solar noble gases in an ilmenite separate from breccia 79035 (antiquity greater than 1 Ga) were analyzed by closed system stepped etching (CSSE). All five gases show the familiar two-component structure: first solar-wind (SW) gases are released, followed by gases from solar energetic particles (SEP). Element patterns in 79035 are similar to those of 71501 ilmenite. SW-He-Ne were partly lost, but SEP-He-Ne-Ar are retained (nearly) unfractionated. Constant Ar/Kr/Xe ratios indicate that ilmenites contain an unfractionated sample of the heavy SW-SEP noble gases. Ar/Kr/Xe ratios in the solar corpuscular radiation are, however, different from 'solar system' values, whereby the Kr/Xe difference in 79035 is about twice as large as in 71501. We propose that Xe is less fractionated than Kr and Ar, though its first ionization potential (FIP) is higher than the 'cutoff' at approximately 11.5 eV, above which all elements in SEP are usually assumed to be depleted by a roughly constant factor. SW-Ne may be isotopically slightly heavier in the ancient SW trapped by 79035, as proposed earlier. In this work we extend our previous CSSE studies of solar noble gases including Kr and Xe to a lunar sample irradiated at least 1 Ga ago (breccia 79035, ilmenite separate, 42-64 microns). This sample was particularly gently etched in the first steps. Surprisingly, the first three steps, each releasing less than or equal to 0.5% of the total 36-Ar, showed an SEP-like trapped component plus relatively large concentrations of cosmogenic gases. Steps 4ff contain much less cosmogenic and more solar gas with a SW-like isotope pattern. Thus, a very minor easily etchable phase that has completely lost its SW-gases must be responsible for steps 1-3. We will not discuss these steps here and refer to the actual step 4 as the 'initial' etching step. Derived from text

MULTISPECTRAL STUDIES OF SELECTED CRATER- AND BASIN-FILLING LUNAR MARIA FROM GALILEO EARTH-MOON ENCOUNTER 1 Abstract Only

D. A. Williams, R. Greeley, G. Neukum (Deutsche Forschungs- und Versuchsanstalt fuer Luft- und Raumfahrt, Berlin, Germany.), and R. Wagner (Deutsche Forschungs- und Versuchsanstalt fuer Luft- und Raumfahrt, Berlin, Germany.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1521-1522 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

New visible and near-infrared multispectral data of the Moon were obtained by the Galileo spacecraft in December, 1990. These data were calibrated with Earth-based spectral observations of the nearside to compare compositional information to previously uncharacterized mare basalts filling craters and basins on the western near side and eastern far side. A Galileo-based spectral classification scheme, modified from the Earth-based scheme developed by Pieters, designates the different spectral classifications of mare basalt observed using the 0.41/0.56 micron reflectance ratio (titanium content), 0.56 micron reflectance values (albedo), and 0.76/0.99 micron reflectance ratio (absorption due to Fe(2+) in mafic minerals and glass). In addition, age determinations from crater counts and results of a linear spectral mixing model were used to assess the volcanic histories of specific regions of interest. These interpreted histories were related to models of mare basalt petrogenesis in an attempt to better understand the evolution of lunar volcanism. Derived from text

EQUILIBRIUM MODELS OF MASS DISTRIBUTION AND COLLISIONAL LIFETIMES OF ASTEROIDS Abstract Only c90

David R. Williams and George Wetherill *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1523-1524 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

An understanding of the steady state distribution expected in the present day asteroid belt is important to our understanding of the collisional evolution of the asteroids and their physical properties. We have extended earlier work to show that, in the absence of gravity, a simple power law distribution as a function of mass with constant exponent will give an equilibrium distribution of asteroids for all bodies much smaller than the largest asteroids. This result holds for realistic fragmentation mechanisms and is independent of the physical properties of the asteroids. Inclusion of the effects of gravity on disruption and fragmentation of asteroids precludes an analytic solution to this problem, and rules out a simple power law distribution. We are currently calculating numerical solutions in order to determine the expected steady state mass distribution in the asteroid belt.

FORMATION OF PERCHED LAVA PONDS ON BASALTIC VOLCANOES: INTERACTION BETWEEN COOLING RATE AND FLOW GEOMETRY ALLOWS ESTIMATION OF LAVA EFFUSION RATES Abstract Only c46

L. Wilson and E. A. Parfitt *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1525-1526 (For primary document see N94-20636 05-91)

Avail: CASI HC A01/MF A06

Perched lava ponds are infrequent but distinctive topographic features formed during some basaltic eruptions. Two such ponds, each approximately 150 m in diameter, formed during the 1968 eruption at Napau Crater and the 1974 eruption of Mauna Ulu, both on Kilauea Volcano, Hawaii. Each one formed where a channelized, high volume flux lava flow encountered a sharp reduction of slope: the flow spread out radially and stalled, forming a well-defined terminal levee enclosing a nearly circular lava pond. We describe a model of how cooling limits the motion of lava spreading radially into a pond and compare this with the case of a channelized flow. The difference in geometry has a major effect, such that the size of a pond is a good indicator of the volume flux of the lava forming it. Lateral spreading on distal shallow slopes is a major factor limiting the lengths of lava flows.

A CLASSIFICATION SCHEME FOR THE MORPHOLOGY OF LAVA FLOW FIELDS Abstract Only c46

L. Wilson, H. Pinkerton, James W. Head (Brown Univ., Providence, RI.),

and K. Magee Roberts (Brown Univ., Providence, RI.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1527-1528 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Analysis of the processes controlling the advance of lava flows shows that, if no other factors intervene, thermal constraints will act to limit the maximum length of a flow being fed at a given volume or mass effusion rate from a vent. These constraints can be characterized through the Gratz number, which takes on a large value at the vent and decreases down flow. Early application of this principle showed that, despite the many subtleties of modes of heat loss from flows, motion apparently ceases when the Gratz number has decreased to a value close to 300. Recent analyses of flow units from the 1983-86 Pu'u 'O'o eruption of Kilauea and of other, more silicic lava flow units confirm this finding.

CERN-DERIVED ANALYSIS OF LUNAR RADIATION BACKGROUNDS Abstract Only **c89**
Thomas L. Wilson and Robert Svoboda (Louisiana State Univ., Baton Rouge.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1529-1530 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The Moon produces radiation which background-limits scientific experiments there. Early analyses of these backgrounds have either failed to take into consideration the effect of charm in particle physics (because they pre-dated its discovery), or have used branching ratios which are no longer strictly valid (due to new accelerator data). We are presently investigating an analytical program for deriving muon and neutrino spectra generated by the Moon, converting an existing CERN computer program known as GEANT which does the same for the Earth. In so doing, this will (1) determine an accurate prompt neutrino spectrum produced by the lunar surface; (2) determine the lunar subsurface particle flux; (3) determine the consequence of charm production physics upon the lunar background radiation environment; and (4) provide an analytical tool for the NASA astrophysics community with which to begin an assessment of the Moon as a scientific laboratory versus its particle radiation environment. This will be done on a recurring basis with the latest experimental results of the particle data groups at Earth-based high-energy accelerators, in particular with the latest branching ratios for charmed meson decay. This will be accomplished for the first time as a full 3-dimensional simulation.

MULTIVARIATE STATISTICAL ANALYSIS: PRINCIPLES AND APPLICATIONS TO COORBITAL STREAMS OF METEORITE FALLS Abstract Only **c65**
S. F. Wolf and M. E. Lipschutz *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1531-1532 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Multivariate statistical analysis techniques (linear discriminant analysis and logistic regression) can provide powerful discrimination tools which are generally unfamiliar to the planetary science community. Fall parameters were used to identify a group of 17 H chondrites (Cluster 1) that were part of a coorbital stream which intersected Earth's orbit in May, from 1855 - 1895, and can be distinguished from all other H chondrite falls. Using multivariate statistical techniques, it was demonstrated that a totally different criterion, labile trace element contents - hence thermal histories - or 13 Cluster 1 meteorites are distinguishable from those of 45 non-Cluster 1 H chondrites. Here, we focus upon the principles of multivariate statistical techniques and illustrate their application using non-meteoritic and meteoritic examples.

CHARACTERIZATION OF THE MARQUEZ DOME BURIED IMPACT CRATER USING GRAVITY AND MAGNETIC DATA Abstract Only **c46**
A. M. Wong, A. M. Reid, S. A. Hall, and V. L. Sharpton (Lunar and Planetary Inst., Houston, TX.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1533-1534 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The buried impact crater, Marquez Dome, located in Leon County in east central Texas, is an approximately 15 km diameter structure whose central uplift is now partially exposed due to headward erosion of the post-impact cover. The central uplift is approximately 3 km in diameter and the rocks within it have been uplifted more than 1200 m above their regional level. The crater rim remains buried and previous attempts to determine its location have had to rely on seismic reflection data and geologic well logs. These attempts have been somewhat successful in mapping the extent of the disturbed zone around Marquez Dome, but more limited in their ability to image the shallow buried rim. In an attempt to define accurately the whole Marquez Dome structure and assist in the selection of drilling sites, a geophysical investigation involving gravity and magnetic data over the central uplift and the surrounding area has been undertaken.

LREE VARIABILITY IN CM MATRICES: ANOTHER LOOK AT METEORITE COMPACTION AGES Abstract Only **c90**
Dorothy S. Woolum, Karen Poelstra, C. Alexander (Washington Univ., Saint Louis, MO.), and T. Ireland (Australian National Univ., Canberra.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1537-1538 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Recent Neon-21 analyses indicate that individual grains in some CM meteorites show the effects of enhanced exposures to energetic particles beyond that which can be attributed to conventional cosmic ray exposure. The exposures clearly occurred prior to the final compaction of the CM meteorites. These exposures were of such a magnitude that they require that we either have to revise our understanding of regolith dynamics and the time scales involved in the regolith activity of meteorite parent bodies, or must invoke an exposure of the irradiated grains to an enhanced energetic particle environment, an environment which would most likely be produced by an early active sun. Constraints on the compaction ages of the meteorites which exhibit the large precompaction exposures could play a critical role in resolving this issue.

THE CARBON COMPONENTS IN SNC METEORITES OF FELDSPATHIC HARZBURGITE COMPOSITION Abstract Only **c90**
I. P. Wright, C. Douglas, and C. T. Pillinger *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1539-1540 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Two meteorites collected in Antarctica, ALH A77005 and LEW 88516, have characteristics which link them to the shergottite group of SNC meteorites. Essentially, ALH A77005 and LEW 88516 are feldspathic harzburgites, being comprised of roughly equal quantities of olivine and pyroxene, with an additional few percent of feldspar which has subsequently been converted to maskelynite by shock. The meteorites represent samples of a cumulate rock which is itself composed of two different lithologies: in one, large pyroxenes poikilitically enclose olivine crystals, while the other consists of interstitial areas made up of pyroxene, olivine, maskelynite, whitlockite, troilite, ilmenite and chlorapatite. It has been proposed that

meteorites such as ALH A77005 (and LEW 88516) are relict samples of the source peridotite from which the other shergottites formed. As such it should be informative to study in detail the carbon components present within these samples, in order to make comparisons with data from other shergottites. Although not plutonic in origin, and therefore not sampling a truly deep source, analyses of ALH A77005 and LEW 88516 should assist with attempts to define the bulk carbon isotopic composition of Mars. This has been assessed previously through analyses of carbon of presumed magmatic origin in other SNC meteorites, but the carbon isotopic compositions obtained seem to be at variance with what might be expected. It is important to constrain the carbon isotopic composition of Mars as well as possible so that models of atmospheric evolution, based on carbon isotopic data, can yield the most reliable results. FURTHER CARBON ISOTOPE MEASUREMENTS OF LEW 88516 Abstract Only **c90**
I. P. Wright, C. Douglas, and C. T. Pillinger *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1541-1542 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Douglas et al. have previously analyzed the carbon content and isotopic composition of a crushed sample (sub-sample 13) of the shergottite, LEW 88516. The powder, which was from a relatively large portion of the meteorite in order to obtain a representative sample, was distributed amongst the scientific community. However, it is probable that the preparation procedure was not optimized for the purposes of carbon measurements. Indeed, it was found that LEW 88516,13 contained over 1200 ppm carbon, a concentration which is greater than that present in any other SNC meteorite. That a close relative, ALH A77005, contains only 141 ppm carbon seems to implicate the preparation procedure as being responsible for the apparently high carbon content of LEW 88516. However, it may also be the nature of the fine powder which has resulted in contamination. The observation of high carbon content in LEW 88516,13 highlights the extreme difficulty of trying to obtain representative samples of whole meteorites for this kind of investigation. Presented herein are some further measurements of LEW 88516 which should serve to clarify some of the issues raised by the previous investigation. Author

SHOCK ATTENUATION AT THE SLATE ISLANDS REVISITED Abstract Only **c46**
S. Wu, P. B. Robertson (Geological Survey of Canada, Ottawa, Ontario.), and R. A. F. Grieve (Geological Survey of Canada, Ottawa, Ontario.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1543-1544 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

This study of a more extensive suite of Slate Islands samples confirms previous interpretations. It indicates clearly that recorded shock pressures, as determined by planar deformation feature orientations, increased towards the center. The 'shock center' is very close (considering the structural movements during cavity modification) to that from an independent determination from shatter cone orientations. Shock metamorphism at a higher level in breccia clasts than in the adjacent country rocks is evidence that the shock event preceded the formation of the breccia dikes. These observations, which are consistent with those at other impact structures, are all contrary to the interpretation by Sage that breccia dike formation by diatreme action was the source of the shock event. There is no plausible reason to consider the Slate Islands as anything but the emergent portion of the central uplift of a complex impact crater. It cannot be cited as an example of endogenic shock in arguments regarding evidence of impact in the terrestrial stratigraphic record. Author

CONVEX SET AND LINEAR MIXING MODEL Abstract Only **c43**
P. Xu and R. Greeley *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1545-1546 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

A major goal of optical remote sensing is to determine surface compositions of the earth and other planetary objects. For assessment of composition, single pixels in multi-spectral images usually record a mixture of the signals from various materials within the corresponding surface area. In this report, we introduce a closed and bounded convex set as a mathematical model for linear mixing. This model has a clear geometric implication because the closed and bounded convex set is a natural generalization of a triangle in n-space. The endmembers are extreme points of the convex set. Every point in the convex closure of the endmembers is a linear mixture of those endmembers, which is exactly how linear mixing is defined. With this model, some general criteria for selecting endmembers could be described. This model can lead to a better understanding of linear mixing models. Author

Avail: CASI HC A01/MF A06

The Canyon Diablo spheroids, which are found around Meteor Crater, Arizona, are nickel-enriched objects with diameters from less than 0.1 to several mm. Previous studies have suggested that the enrichment of nickel resulted either from shock-melting of S-rich areas followed by solidification of the liquids under strongly non-equilibrium conditions at rapid cooling rates during flight outward from the crater or from the selective oxidation of iron. Isotopic studies are an effective tool for constraining the degree of open-system evaporation experienced by a system. The purpose of this study was to see whether Ni isotopes had been fractionated by volatilization during spheroid formation. In addition, the cosmogenic nuclides Be-10 and Al-26 were measured to try to estimate the depths in the parent meteorite from which the spheroids came. Author

ANTIPODAL FRAGMENT VELOCITIES FOR POROUS AND WEAK TARGETS AT CATASTROPHIC IMPACTS Abstract Only **c39**
M. Yanagisawa and T. Itoi *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1551-1552 Sponsored in part by ISAS (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Mortar, porous alumina, and sand targets, which were spherical in shape and from 11 to 15 cm in diameter, were impacted normally by plastic (polycarbonate) projectiles of nearly 1 g in mass at velocities about 6 km/s. Fragment velocity at the antipole of impact site (antipodal velocity, V(sub a)), for each experiment, was obtained from two Flash X-ray images recorded prior to and at predetermined delayed time after impact event. It has been revealed that the velocities for the same E/M(sub t) (impact energy divided by target mass) depend strongly on target material, and differ about an order of magnitude between the sand and basalt.

Part 3: N-Z 1993 p 1555-1556 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Consortium studies on lunar meteorites Yamato 793169 and Asuka 881757 (formerly Asuka-31) were performed to characterize these new samples from unknown locations in the lunar mare. Both meteorites are coarse-grained mare rocks having low Mg/Fe ratios (bulk mg'=30-35) and low TiO2 (1.5-2.5 percent in homogenized bulk samples). They are intermediate between VLT and low-Ti mare basalts. Although these meteorites are not identical to each other, their mineral and bulk compositions, isotopic systematics, and crystallization ages are remarkably similar and distinct from those of all other mare basalts. They appear to represent a new type of low-Ti mare basalt that crystallized at about 3.9Ga. These meteorites are inconsistent with the canonical correlation between the TiO2 contents and ages of mare basalts and suggest that our knowledge of lunar volcanism is far from complete. Author

PRELIMINARY AEM STUDY OF THE MICROSTRUCTURE AND COMPOSITION OF METAL PARTICLES IN ORDINARY CHONDRITES Abstract Only **c90**

C. W. Yang, D. B. Williams, and J. I. Goldstein *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1557-1558 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The purpose of this study is to examine the microstructure and composition of the metal particles in ordinary chondrites using analytical electron microscopy (AEM) techniques. Since the phases produced within the metal particles are very fine, the application of various AEM techniques for structural and chemical characterization is critical. However, thin specimen preparation for AEM study has proven very difficult because of the matrix silicate which is present. This is the first AEM study of the metal particles in chondrites. A type 6 chondrite, Saint Severin (LL6), was selected for examination because the metal phases have been reheated into the single phase taenite region (greater than 700 C), and cooled slowly to lower temperatures. A combination of electron optical instruments was employed including a field emission gun (FEG) JEOL 840F high resolution scanning electron microscope (HRSEM), a JEOL 6300F FEG-HRSEM, a Philips 400T AEM, and a JEOL 733 electron probe microanalyzer (EPMA). MICROMETEORITE PRE-SOLAR DIAMONDS FROM GREENLAND CRYOCONITE? Abstract Only **c90**

P. D. Yates *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1559-1560 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

An acid-resistant residue prepared from Greenland cryoconite has been investigated to determine whether the micrometeorite component within the cryoconite contains pre-solar material analogous to that found in primitive chondritic meteorites. The residue has been analyzed for carbon content and stable isotopic comparison, by electron probe micro-analysis (EPMA) for major element chemistry and then by a combination of X-ray diffraction (XRD) and transmission electron microscopy (TEM) to elucidate the structure of any constituent mineral phases. The cryoconite sample, which was collected ca. 25 km inland of the ice margin at the latitude of Sondre Stromfjord on the west coast of Greenland, was processed following procedures used on bulk meteorite samples for the isolation of pre-solar dust components. THE CONNECTION BETWEEN VENUS' FREE OBLIQUITY AND ITS CMB OBLATENESS Abstract Only

C. F. Yoder *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1561-1562 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The most striking feature of Venus rotational state is its slow retrograde rotation which is apparently maintained by a balance between solid tidal friction and thermal tidal torques. Solid tides tend to drive the spin toward synchronous rotation while thermal tides drive it away. A balance is achieved at a specific rate because of the inverse frequency dependence of the thermal tide to the semi-diurnal heating. Atmospheric models have been constructed to estimate the thermal tidal torque based on ground heating. The solid friction dissipation factor Q approximately equal to 50 can be deduced assuming rotation has achieved steady state. The most perplexing feature of Venus orientation is its non-zero free obliquity epsilon approximately equal to 1.5 deg relative to its orbit. Although solid tides and perhaps atmospheric tides tend to increase the free obliquity on a time 1/K(sub t) approximately equal to 1 x 10(exp 8) yr, viscous friction (CMF) at a core-mantle boundary (CMB) resulting from the differential angular orientation Delta-epsilon of the core and mantle spin axes should have damped the free obliquity on a time scale as short as 10(exp 6) yr. One means of achieving a balance similar to that controlling rotation is to introduce a comparatively large CMB ellipticity e(sub c) to reduce Delta-epsilon such that there is a balance between solid-thermal tides and CMF. The balance depends not so much on the potential frequency dependence on the tides as on the quadratic dependence of CMF on Delta-epsilon if the layer is turbulent. Author

TRACE ELEMENT COMPOSITIONS OF SPINEL-RICH REFRACTORY INCLUSIONS FROM THE MURCHISON METEORITE Abstract Only **c90**

S. Yoneda, P. J. Sylvester, S. B. Simon, L. Grossman, and A. Hsu (Illinois Mathematics and Science Academy, Aurora.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1563-1564 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Three spinel-rich, perovskite-bearing, pyroxene-rimmed, hibonite-free inclusions from the Murchison C2 chondrite have volatility controlled, modified group II REE patterns. Two have high Eu/Yb ratios, two have small positive Ce anomalies and one has high refractory siderophiles for a group II inclusion. Two additional spinel-rich inclusions have subchondritic Ce/La ratios and negative Eu and Yb anomalies, the Eu anomalies being larger than the Yb ones. One of these inclusions is enriched in La relative to all HREE and the other is enriched in HREE relative to all LREE except La, possibly suggesting the presence of an ultrarefractory component in the latter. One hibonite-rich inclusion has a group III REE pattern with a negative Ce anomaly. A calcium dialuminate-bearing inclusion known to have crystallized from a melt at 2100-1800K has a modified group II REE pattern, rather than a pattern which would be predicted from the evaporation expected from such a droplet, e.g., a group III or ultrarefractory pattern. Volatile element contents of these inclusions are among the lowest found in any refractory inclusions. Author

INTER- AND INTRA-CRYSTALLINE OXYGEN ISOTOPE DISTRIBUTION OF FASSAITES IN ALLENDE CAI Abstract Only **c90**

Hisayoshi Yurimoto, Hiroshi Nagasawa (Gakushuin Univ., Tokyo, Japan.), and Yoshiharu Mori (National Lab. for High Energy Physics, Ibaraki, Japan.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1565-1566 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Calcium, aluminum-rich inclusions (CAI's) from carbonaceous chondrite are believed to be among the first solids to have formed in the early solar system and thus to preserve a record of conditions and processes that prevailed early in the solar nebula. We have measured inter- and intra-crystalline oxygen isotope distribution of fassaite in Type B1 CAI of Allende

meteorite. Secondary ion mass spectrometry (SIMS) using negative Au primary ion was applied to in situ oxygen isotope ratio analysis on a polished thin section of the CAI. Present data indicate that O isotope composition is homogeneous inside of fassaite grains as well as among grains in the HN3-1 CAI, and that the delta(exp 18) O value (-24.14 percent relative to SMOW) determined previously could be applied to most fassaite grains. The results suggest that most fassaite grains are preexisting solids like spinel grains. Author

AGE AND THERMOCHRONOLOGY OF K-FELDSPARS FROM THE MANSON IMPACT STRUCTURE Abstract Only **c46**
P. K. Zeitler and M. J. Kunk (Geological Survey, Reston, VA.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1567-1568 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

As a contribution to the effort to obtain a precise age for the Manson Impact Structure, we are approaching the problem from a thermo chronological perspective, with the goal of extracting an age from Ar-40/Ar-39 age-spectrum analysis of partially overprinted K-feldspars taken from granitoid clasts. We find that shocked feldspars from Manson generally show a strong overprint in their age spectra, with more than 50 percent of each spectrum being reset. The reset portions of the age spectra correspond to gas lost from very small diffusion domains, and a characteristic of the Manson samples is the very large range in apparent diffusion dimensions that they display, with the smallest domains being some 400 times smaller than the largest domains. It is also noteworthy that the small domains comprise a substantial portion of the volume of the feldspars (50 percent or more). These observations are consistent with the extreme shock experienced by these samples. In detail, the spectra we have measured to date are saddle-shaped and show minimum ages of between 67 and 72 Ma, which we interpret to be maximum estimates for the age of the impact. In the case of one sample (M1-678.3; K-feldspar from a large syenite block located well below the apparent melt-matrix breccia in the M1 borehole), isotope correlation analysis suggests the presence of a non-atmospheric trapped Ar component (Ar-40/Ar-36 of 660 plus or minus 40), and an age of about 65.3 plus or minus 0.5 Ma (2 sigma). Our interpretation of our results is that the shock of impact greatly reduced the diffusion-domain sizes of our samples, making them susceptible to significant Ar loss during heating associated with impact. It appears that while our feldspars were partially open to Ar loss, they equilibrated with a non-atmospheric Ar component, probably related to impact-related degassing of old basement around the impact site. SPECTRAL ANALYSIS OF CHEMISORBED CO2 ON MARS ANALOG MATERIALS Abstract Only
A. P. Zent and T. L. Roush *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1569-1570 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The goal of this work is to estimate the mass of CO2 that may have been removed to a quasi-stable reservoir on the Martian surface by chemisorption and to estimate the spectral effects of chemisorbed CO2 in remotely-sensed Martian spectra. Our approach is to characterize the conditions most favorable for the formation of carbonate on common terrestrial oxide minerals and to search for infrared spectral bands that result from chemisorption of CO2 molecules onto oxide and other Mars analog materials. LEWIS CLIFF 87057: A NEW METAL-RICH E3 CHONDRITE WITH SIMILARITIES TO MT. EGERTON, SHALLOWATER AND HAPPY CANYON Abstract Only **c90**
Y. Zhang, P. H. Benoit, and D. W. G. Sears *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1571-1572 (For primary document see N94-20636 05-91)
(Grant NAG9-81)
Avail: CASI HC A01/MF A06

The Antarctic meteorites LEW87057, LEW87220, LEW87223, LEW87234, LEW87237, and LEW87285 were described as paired E3 chondrites by Brian Mason (Antarctic Meteorite Newsletters, 12(1) and 15(1,2)). LEW87223 is texturally unusual, containing abundant chondrules and jagged troilite grains which are enclosed in metal. Our INAA data show that the siderophile element abundance in two splits of LEW87223 are higher than the EH range, while chalcophile elements (Cr excepted) are highly depleted. Mineral compositions are unlike those normally found in EH or EL chondrites or aubites, and in some respects resemble those of several anomalous enstatite meteorites such as Shallowater, Mt. Egerton, and Happy Canyon. The bulk and mineral compositions are consistent with the addition of EL chondrite metal to an EL3 chondrite with the removal of sulfides other than troilite which is now Cr-rich. We suggest that this meteorite is an EL3 chondrite into which metal was introduced and sulfides redistributed during an event involving impact melting and brecciation. Author

CHEMICAL ZONING AND DIFFUSION OF Ca, Al, Mn, AND Cr IN OLIVINE OF SPRINGWATER PALLASITE Abstract Only **c90**
Y. Zhou and Ian M. Steele *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1573-1574 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The pallasites, consisting mainly of Fe-Ni metal and olivine, are thought to represent the interior of a planetary body which slowly cooled from high temperature. Although the olivines are nearly homogeneous, ion microprobe studies revealed variations of Ca, Ti, Co, Cr, and Ni near grain edges. These variations were thought to represent diffusion in response to falling temperature of the parent body. Pallasite cooling rates have been estimated based on kamacite taenite textures but results differ by x100. In principle elemental profiles in olivine can allow estimates of cooling rate if diffusion coefficients are known; in addition, given a cooling rate, diffusion coefficients could be derived. Data are presented which show that apparent diffusion profiles can be measured for Al, Ca, Cr, and Mn which qualitatively agree with expected diffusion rates and have the potential of providing independent estimates of pallasite cooling rates. Geologic mapping of the Tharsis Montes on Mars is in progress as part of the Mars Geologic Mapping Program of NASA. Mapping of the southern flanks of Ascraeus Mons at 1:500,000 scale was undertaken first followed by detailed mapping of Arsia Mons; mapping of Pavonis Mons will begin later this year. Results indicate that each of the Tharsis volcanoes displays unique variations on the general 'theme' of a martian shield volcano. Here we concentrate on the flank characteristics on Ascraeus Mons and Arsia Mons, the northernmost and southernmost of the Tharsis Montes, as illustrative of the most prominent trends. NUMERICAL SIMULATION OF LAVA FLOWS: APPLICATIONS TO THE TERRESTRIAL PLANETS Abstract Only **c46**
James R. Zimbelman, Bruce A. Campbell, Juliana Kousoum (Thomas Jefferson High School, Falls Church, VA.), and Derrick J. Lampkin (Ohio State Univ., Columbus.) *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1577-1578 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Lava flows are the visible expression of the extrusion of volcanic materials on a variety of planetary surfaces. A computer program described by Ishihara et al. appears to be well suited for application to different environments, and we have undertaken tests to evaluate their approach. Our results are somewhat mixed; the program does reproduce reasonable lava flow behavior in many situations, but we have encountered some conditions common to planetary environments for which the current program is inadequate. Here we present our initial efforts to identify the 'parameter space' for reasonable numerical simulations of lava flows. Author

CHEMICAL COMPOSITION OF NEW ACAPULCOITES AND LODRANITES Abstract Only **c90**
J. Zipfel and H. Palme *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1579-1580 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The bulk compositions of two Antarctic Lodranites, MAC 88177 and FRO 90011, and two Acapulcoites, ALH 81261 and Monument Draw, were determined with instrumental neutron activation analysis. Acapulcoites have essentially chondritic major and trace element abundances but achondritic texture. They consist of entirely recrystallized, fine grained mineral assemblages. Chondrules are extremely rare; one relict radiating pyroxene chondrule was described in Monument Draw (MD). The coarse grained Lodranites also have achondritic textures, but they are different compositionally with depletions in Al, Na, and incompatible elements probably a result of separation of partial, feldspar-rich melt. MAC 88177 is significantly more depleted in incompatible elements than FRO 90011 suggesting a higher degree of partial melting for the MAC-Lodranite. The chemical data support a genetic relationship between Lodranites and Acapulcoites inferred earlier from oxygen isotopes, petrology, and mineral composition. Author

Avail: CASI HC A01/MF A06

Although many similarities exist between meteorite spectra and 'primitive' asteroids, there are unexplained discrepancies. These discrepancies do not appear to arise from grain size effects. Assuming that primitive meteorites did in fact originate from the 'primitive' asteroids, we believe that there are two testable explanations for the observed spectral discrepancies: compositional or structural differences. We have begun to synthesize and collect reflectance and Mossbauer spectra of pertinent materials, beginning with olivine, pyroxene, and plagioclase (all found in primitive meteorites), and to assess the possible effects composition may have on spectral features. Our study focuses on the combination of composition and structural effects. Author

Avail: CASI HC A01/MF A06

The presence of dark lithic clasts within meteorites can provide information concerning asteroidal regolith processes, the extent of interactions between asteroids, and the relationship between meteorite types, micrometeorites, and interplanetary dust particles. Accordingly, we have been seeking and characterizing dark clasts found within carbonaceous chondrites, unequilibrated ordinary chondrites, howardites, and eucrites. We find that unequilibrated chondrites in this study contain fine-grained, anhydrous unequilibrated inclusions, while the howardites often contain inclusions from geochemically processed, hydrous asteroids (type 1 and 2 carbonaceous chondrites). Eucrites and howardities contain unusual clasts, not easily classified. Author

K, U, AND Th BEHAVIOR IN MARTIAN ENVIRONMENTAL CONDITIONS Abstract Only
M. Yu. Zolotov, T. V. Krot, and L. V. Moroz *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1585-1586 Sponsored in part by Max-Planck-Inst. fuer Chemie (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The possibility of K, U, and Th content determination from orbit and in situ allows consideration of those elements as geochemical indicators in the planetary studies. In the case of Mars the unambiguous interpretations of such data in terms of igneous rocks are remarkably constrained by the widespread rock alteration and the existence of exogenic deposits. Besides, the terrestrial experience indicates that K, U, and Th contents could be used as indicators of environmental geochemical processes. Thus the determination of K, U, and Th contents in the Martian surface materials could provide the indirect data on the conditions of some exogenic geological processes. The speculations on the K, U, and Th behavior in the Martian environments show that aeolian and aqueous processes leads to the preferential accumulation of K, U, and Th in fine dust material. The separation of K, U, and Th on Mars is smaller in scale to that on Earth. Author

Kissel (Max-Planck-Inst. fuer Kernphysik, Heidelberg, Germany.) et al *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1587-1588 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

As described by Gruen et al., the dust impact detector on the Ulysses spacecraft detected a totally unexpected series of dust streams in the outer solar system near the orbit of Jupiter. Five considerations lead us to believe that the dust streams emanate from the jovian system itself: the dust streams only occur within about 1 AU of the jovian system, with the strongest stream being the one closest to Jupiter (about 550 R(sub J) away); the direction from which they arrive is never far from the line-of-sight direction to Jupiter; the time period between streams is about 28 (+/- 3) days; the impact velocities are very high--mostly around 40 km/s; and we can think of no cometary, asteroidal, or interstellar source that could give rise to the above four phenomena (such streams have never before been detected). WRINKLE RIDGES, REVERSE FAULTING, AND THE DEPTH PENETRATION OF LITHOSPHERIC STRESS IN LUNAE PLANUM, MARS Abstract Only
M. T. Zuber *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1589-1590 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

Tectonic features on a planetary surface are commonly used as constraints on models to determine the state of stress at the time the features formed. Quantitative global stress models applied to understand the formation of the Tharsis province on Mars constrained by observed tectonics have calculated stresses at the surface of a thin elastic shell and have neglected the role of vertical structure in influencing the predicted pattern of surface deformation. Wrinkle ridges in the Lunae Planum region of Mars form a conentric pattern of regularly spaced features in the eastern and southeastern part of Tharsis; they are formed due to compressional stresses related to the response of the Martian lithosphere to the Tharsis bulge. As observed in the exposures of valley walls in areas such as the Kasei Valles, the surface plains unit is underlain by an unconsolidated

impact-generated megaregolith that grades with depth into structurally competent lithospheric basement. The ridges have alternatively been hypothesized to reflect deformation restricted to the surface plains unit ('thin skinned deformation') and deformation that includes the surface unit, megaregolith and basement lithosphere ('thick skinned deformation'). We have adopted a finite element approach to quantify the nature of deformation associated with the development of wrinkle ridges in a vertically stratified elastic lithosphere. We used the program TECTON, which contains a slippery node capability that allowed us to explicitly take into account the presence of reverse faults believed to be associated with the ridges. In this study we focused on the strain field in the vicinity of a single ridge when slip occurs along the fault. We considered two initial model geometries. In the first, the reverse fault was assumed to be in the surface plains unit, and in the second the initial fault was located in lithospheric basement, immediately beneath the weak megaregolith. We are interested in the conditions underwhich strain in the surface layer and basement either penetrates or fails to penetrate through the megaregolith. We thus address the conditions required for an initial basement fault to propagate through the megaregolith to the surface, as well as the effect of the megareolith on the strain tensor in the vicinity of a fault that nucleates in the surface plains unit. Author (revised)

POSSIBLE FLEXURAL SIGNATURES AROUND OLYMPUS AND ASCRAEUS MONTES, MARS Abstract Only

M. T. Zuber (Johns Hopkins Univ., Baltimore, MD.), B. G. Bills, H. V. Frey, W. S. Kiefer, R. S. Nerem, and J. H. Roark *In* Lunar and Planetary Inst., Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z 1993 p 1591-1592 (For primary document see N94-20636 05-91)
Avail: CASI HC A01/MF A06

The effective elastic thickness (h) of the lithosphere provides a measure of the thermal and mechanical state of a planet's shallow interior. An estimate of h in the vicinity of a feature that constitutes a load on a planetary surface can be determined from the flexural response of the lithosphere to the load. This approach has been applied to Mars by calculating radial stresses associated with lithospheric flexure associated with surface loads, and comparing the results to the positions of circumferential graben surrounding the major Martian shield volcanoes and mascon basins. However, many prominent surface loads on Mars, most notably the Olympus Mons volcano, do not exhibit flexural graben. In these instances application of the above method can provide only a lower limit of effective elastic thickness. An alternative method of determining h is to calculate the vertical displacements associated with the flexural loading and to compare the amplitude and shape of the flexural profile to observed topography. This method has not been applied to flexural problems on Mars because of the poor resolution of Martian topographic data. However, previous analyses have shown that the lithosphere around major volcanic shields should exhibit vertical deflections of order 1 km over horizontal baselines of order 100 km. We were thus motivated to search for the presence of flexural troughs in the existing Mars topography data. Author

EVOLUTION OF THE GLOBAL WATER CYCLE ON MARS: THE GEOLOGICAL EVIDENCE Abstract Only

V. R. Baker and V. C. Gulick *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 1-2 (For primary document see N94-21659 05-91)
Avail: CASI HC A01/MF A01

The geological evidence for active water cycling early in the history of Mars (Noachian geological system or heavy bombardment) consists almost exclusively of fluvial valley networks in the heavily cratered uplands of the planet. It is commonly assumed that these landforms required explanation by atmospheric processes operating above the freezing point of water and at high pressure to allow rainfall and liquid surface runoff. However, it has also been documented that nearly all valley networks probably formed by subsurface outflow and sapping erosion involving groundwater outflow prior to surface-water flow. The prolonged ground-water flow also requires extensive water cycling to maintain hydraulic gradients, but is this done via rainfall recharge, as in terrestrial environments? Author (revised)

ANCIENT MARTIAN VALLEY GENESIS AND PALEOCLIMATIC INFERENCE: THE PRESENT AS A KEY TO THE PAST Abstract Only

G. R. Brakenridge *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 2-3 (For primary document see N94-21659 05-91)
Avail: CASI HC A01/MF A01

I offer here the speculative genetic hypothesis that the flat-floored landforms represent episodically active, sediment-laden valley glaciers formed by localized geothermal melting of abundant interstitial ice (permafrost) in a fine-grained sedimentary terrain. Geothermal melting may also localize spring heads for the narrow deep, high-gradient valleys, or the collapse process itself may result in the generation of decanted, relatively sediment-poor overland water flows (some local evidence of fluid overtopping of the localized depressions exists). Whatever the generic mechanisms for the suite of valley landforms, perhaps the most interesting observation is simply their youth. In aggregate, the morphologies are similar to the ancient valley systems cited as evidence for a previously much denser atmosphere on Mars. Author

A CARBON DIOXIDE/METHANE GREENHOUSE ATMOSPHERE ON EARLY MARS Abstract Only

L. L. Brown and J. F. Kasting *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 3 (For primary document see N94-21659 05-91)
Avail: CASI HC A01/MF A01

One explanation for the formation of fluvial surface features on early Mars is that the global average surface temperature was maintained at or above the freezing point of water by the greenhouse warming of a dense CO2 atmosphere; however, Kasting has shown that CO2 alone is insufficient because the formation of CO2 clouds reduces the magnitude of the greenhouse effect. It is possible that other gases, such as NH3 and CH4, were present in the early atmosphere of Mars and contributed to the greenhouse effect. Kasting et al. investigated the effect of NH3 in a CO2 atmosphere and calculated that an NH3 mixing ratio of approximately 5 x 10 (exp -4) by volume, combined with a CO2 partial pressure of 4-5 bar, could generate a global average surface temperature of 273 K near 3.8 b.y. ago when the fluvial features are believed to have formed. Atmospheric NH3 is photochemically converted to N2 by ultraviolet radiation at wavelengths shortward of 230 nm; maintenance of sufficient NH3 concentrations would therefore require a source of NH3 to balance the photolytic destruction. We have used a one-dimensional photochemical model to estimate the magnitude of the NH3 source required to maintain a given NH3 concentration in a dense CO2 atmosphere. We calculate that an NH3 mixing ratio of 10(exp -4) requires a flux of NH3 on the order of 10(exp 12) molecules /cm-s. This figure is several orders of magnitude greater than estimates of the NH3 flux on early Mars; thus it appears that NH3 with CO2 is not enough to keep early Mars warm. Author (revised)

OXIDATION OF DISSOLVED IRON UNDER WARMER, WETTER CONDITIONS ON MARS: TRANSITIONS TO PRESENT-DAY ARID ENVIRONMENTS Abstract Only

R. G. Burns *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 3-4 (For primary document see N94-21659 05-91)

(Grant NAGw-2220)

Avail: CASI HC A01/MF A01

The copious deposits of ferric-iron assemblages littering the surface of bright regions of Mars indicate that efficient oxidative weathering reactions have taken place during the evolution of the planet. Because the kinetics of atmosphere-surface (gas-solid) reactions are considerably slower than chemical weathering reactions involving an aqueous medium, most of the oxidation products now present in the martian regolith probably formed when groundwater flowed near the surface. This paper examines how chemical weathering reactions were effected by climatic variations when warm, wet environments became arid on Mars. Analogies are drawn with hydrogeochemical and weathering environments on the Australian continent where present-day oxidation of iron is occurring in acidic ground water under arid conditions. MARS: NOACHIAN HYDROLOGY BY ITS STATISTICS AND TOPOLOGY Abstract Only

N. A. Cabrol and E. A. Grin *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 4-6 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Discrimination between fluvial features generated by surface drainage and subsurface aquifer discharges will provide clues to the understanding of early Mars' climatic history. Our approach is to define the process of formation of the oldest fluvial valleys by statistical and topological analyses. Formation of fluvial valley systems reached its highest statistical concentration during the Noachian Period. Nevertheless, they are a scarce phenomenom in Martian history, localized on the craterized upland, and subject to latitudinal distribution. They occur sparsely on Noachian geological units with a weak distribution density, and appear in reduced isolated surface (around 5 x 10(exp 3)(sq km)), filled by short streams (100-300 km length). Topological analysis of the internal organization of 71 surveyed Noachian fluvial valley networks also provides information on the mechanisms of formation. Author

THE EVOLUTION OF THE EARLY MARTIAN CLIMATE AND THE INITIAL EMPLACEMENT OF CRUSTAL H2O Abstract Only

S. M. Clifford *In its* Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 6-7 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Given the geomorphic evidence for the widespread occurrence of water and ice in the early Martian crust, and the difficulty involved in accounting for this distribution given the present climate, it has been suggested that the planet's early climate was originally more Earth-like, permitting the global emplacement of crustal H2O by direct precipitation as snow or rain. The resemblance of the Martian valley networks to terrestrial runoff channels and their almost exclusive occurrence in the planet's ancient (approximately 4-b.y.-old) heavily cratered terrain are often cited as evidence of just such a period. An alternative school of thought suggests that the early climate did not differ substantially from that of today. Advocates of this view find no compelling reason to invoke a warmer, wetter period to explain the origin of the valley networks. Rather, they cite evidence that the primary mechanism of valley formation was groundwater sapping, a process that does not require that surface water exists in equilibrium with the atmosphere. However, while sapping may successfully explain the origin of the small valleys, it fails to address how the crust was initially charged with ice as the climate evolved towards its present state. Therefore, given the uncertainty regarding the environmental conditions that prevailed on early Mars, the initial emplacement of ground ice is considered here from two perspectives: (1) the early climate started warm and wet, but gradually cooled with time, and (2) the early climate never differed substantially from that of today. THE HYDROLOGIC RESPONSE OF MARS TO THE ONSET OF A COLDER CLIMATE AND TO THE THERMAL EVOLUTION OF ITS EARLY CRUST Abstract Only

S. M. Clifford *In its* Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 7-9 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Morphologic similarities between the Martian valley networks and terrestrial runoff channel have been cited as evidence that the early Martian climate was originally more Earth-like, with temperatures and pressures high enough to permit the precipitation of H2O as snow or rain. Although unambiguous evidence that Mars once possessed a warmer, wetter climate is lacking, a study of the transition from such conditions to the present climate can benefit our understanding of both the early development of the cryosphere and the various ways in which the current subsurface hydrology of Mars is likely to differ from that of the Earth. Viewed from this perspective, the early hydrologic evolution of Mars is essentially identical to considering the hydrologic response of the Earth to the onset of a global subfreezing climate. Author

THE EARLY MARTIAN ENVIRONMENT: CLUES FROM THE CRATERED HIGHLANDS AND THE PRECAMBRIAN EARTH Abstract Only

R. A. Craddock and T. A. Maxwell *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 9-10 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

There is abundant geomorphic evidence to suggest that Mars once had a much denser and warmer atmosphere than present today. Outflow channel, ancient valley networks, and degraded impact craters in the highlands all suggest that ancient Martian atmospheric conditions supported liquid water on the surface. The pressure, composition, and duration of this atmosphere is largely unknown. However, we have attempted to place some constraints on the nature of the early Martian atmosphere by analyzing morphologic variations of highland impact crater populations, synthesizing results of other investigators, and incorporating what is know about the geologic history of the early Earth. This is important for understanding the climatic evolution of Mars, the relative abundance of martian volatiles, and the nature of highland surface materials. Author

Johnson Space Center, Houston, TX.), D. C. Golden (National Aeronautics and Space Administration. Lyndon B. Johnson Space Center, Houston, TX.), and C. T. Pillinger *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 10-11 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Spectroscopic observations of the Martian surface in the invisible to near infrared (0.4-1.0 micron), coupled with measurements made by Viking, have shown that the surface is composed of a mixture of fine-grained weathered and nonweathered minerals. The majority of the weathered components are thought to be materials like smectite clays, scapolite, or palagonite. Until materials are returned for analysis there are two possible ways of proceeding with an investigation of Martian surface processes: (1) the study of weathering products in meteorites that have a Martian origin (SNC's), and (2) the analysis of certain terrestrial weathering products as analogs to the material found in SNC's, or predicted to be present on the Martian surface. We describe some preliminary measurements of the carbon chemistry of terrestrial palagonite samples that exhibit spectroscopic

similarities with the Martian surface. The data should aid the understanding of weathering in SNC's and comparisons between terrestrial palagonites and the Martian surface. Author

REQUIREMENTS FOR THE EARLY ATMOSPHERE OF MARS FROM NITROGEN ISOTOPE RATIOS Abstract Only

J. L. Fox *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 11-12 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

The N escape models of Fox and Dalgarno and Fox required the presence of a dense, early CO2 atmosphere to inhibit fractionation of the N isotopes N-15 and N-14. The computed photochemical escape fluxes are so large at the present that the isotope ratio measured by Viking (about 1.62x terrestrial) can be produced in about 1.5 b.y. This model was refined in several ways. It was updated to incorporate the variation of the escape fluxes with increases in the solar fluxes at earlier times according to the model of Zahnle and Walker. As expected, this exacerbates the problem with overfractionation, but not greatly. Most of the escape and fractionation of the N occurs in the last 1.5 b.y., when the solar flux was only slightly different from the present. The dense early atmosphere must persist only a bit longer in order to reproduce the measured isotope ratio. The model was also modified to take into account changes in the O mixing ratio with time in the past, assuming that the O abundance is proportional to the square root of the solar flux. Although the production rate of O from photodissociation of CO2 scales as the solar flux, the strength of the winds and other mixing processes also increases with the solar flux, resulting in possibly more effective transport of O to the lower atmosphere where it is destroyed by catalytic and three-body recombination mechanisms. FLUVIAL VALLEYS IN THE HEAVILY CRATERED TERRAINS OF MARS: EVIDENCE FOR PALEOCLIMATIC CHANGE? Abstract Only

V. C. Gulick and V. R. Baker *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 12-13 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Whether the formation of the Martian valley networks provides unequivocal evidence for drastically different climatic conditions remains debatable. Recent theoretical climate modeling precludes the existence of a temperate climate early in Mars' geological history. An alternative hypothesis suggests that Mars had a globally higher heat flow early in its geological history, bringing water tables to within 350 m of the surface. While a globally higher heat flow would initiate ground water circulation at depth, the valley networks probably required water tables to be even closer to the surface. Additionally, it was previously reported that the clustered distribution of the valley networks within terrain types, particularly in the heavily cratered highlands, suggests regional hydrological processes were important. The case for localized hydrothermal systems is summarized and estimates of both erosion volumes and of the implied water volumes for several Martian valley systems are presented. Author (revised)

A MODEL FOR THE EVOLUTION OF CO2 ON MARS Abstract Only

R. M. Haberle, D. Tyler (San Jose State Univ., CA.), C. P. McKay, and W. L. Davis *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 13-14 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

There are several lines of evidence that suggest early Mars was warmer and wetter than it is at present. Perhaps the most convincing of these are the valley networks and degraded craters that characterize much of the ancient terrains. In both cases, fluvial activity associated with liquid water is believed to be involved. Thus, Mars appears to have had a warmer climate early in its history than it does today. How much warmer is not clear, but a common perception has been that global mean surface temperatures must have been near freezing - almost 55 K warmer than at present. The most plausible way to increase surface temperatures is through the greenhouse effect, and the most plausible greenhouse gas is CO2. Pollack et al. estimate that in the presence of the faint young Sun, the early Martian atmosphere would have to contain almost 5 bar of CO2 to raise the mean surface temperature up to the freezing level; only 1 bar would be required if the fluvial features were formed near the calculations now appear to be wrong since Kasting showed that CO2 will condense in the atmosphere at these pressures and that this greatly reduces the greenhouse effect of a pure CO2 atmosphere. He suggested that alternative greenhouse gases such as CH4 or NH3, are required. The early Mars dilemma is approached from a slightly different point of view. In particular, a model for the evolution of CO2 on Mars that draws upon published processes that affect such evolution was constructed. Thus, the model accounts for the variation of solar luminosity with time, the greenhouse effect, regolith uptake, polar cap formation, escape, and weathering. Author (revised)

MARS ATMOSPHERE LOSS AND ISOTOPIC FRACTIONATION BY SOLAR-WIND-INDUCED SPUTTERING AND PHOTOCHEMICAL ESCAPE Abstract Only

B. M. Jakosky, R. O. Pepin (Minnesota Univ., Minneapolis.), R. E. Johnson (Virginia Univ., Charlottesville.), and J. L. Fox (State Univ. of New York, Stony Brook.) *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 14-15 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

The effects of loss of Mars atmospheric constituents by solar-wind-induced sputtering and by photochemical escape during the last 3.8 b.y. were examined. Sputtering is capable of efficiently removing all species from the upper atmosphere, including the light noble gases; N also is removed by photochemical processes. Due to the diffusive separation by mass above the homopause, removal from the top of the atmosphere will fractionate the isotopes of each species, with the lighter mass being preferentially lost. For C and O, this allows us to determine the size of nonatmospheric reservoirs that mix with the atmosphere; these reserviors can be accounted for by exchange with CO2 adsorbed in the regolith and with H2O in the polar ice deposits. Both simple analytical models and time-dependent models of the loss of volatiles from and supply to the Martian atmosphere were constructed. Both Ar and Ne require continued replenishment from outgassing over geologic time. Author (revised)

POSSIBLE SOLUTIONS TO THE PROBLEM OF CHANNEL FORMATION ON EARLY MARS Abstract Only

J. F. Kasting *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 15 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

A warm climate on early Mars would provide a natural, although not unique, explanation for the presence of fluvial networks on the ancient, heavily cratered terrains. Explaining how the climate could have been kept warm, however, is not easy. The idea that the global average surface temperature, T(sub s), could have been kept warm by a dense, CO2 atmosphere supplied by volcanism or impacts is no longer viable. It was shown that CO2 cloud formation should have kept T(sub s) well below freezing until approximately 2 b.y. ago, when the Sun had brightened to at least 86 percent of its present value. Warm equatorial regions on an otherwise cold planet seem unlikely because atmospheric CO2 would probably condense out at the poles. Warming by impact-produced dust in the atmosphere seems unlikely because the amount of warming expected for silicate dust particles is relatively small. Greenhouse warming by high altitude CO2 ice clouds seems unlikely because such are poor absorbers of infrared radiation at most wavelengths. Warming by atmospheric NH3 seems unlikely because NH3 is readily photodissociated and because N may have been in short supply as consequence of impact erosion and the high solubility of NH3. A brighter, mass-losing young Sun seems unlikely because stellar winds of the required strength were not observed on other solar-type stars. In short, most of the explanations for a warm Martian paleoclimate that were proposed in the past seem unlikely. One possibility that seems feasible from radiative/photochemical standpoint is that CH4

and associated hydrocarbon gases and particles contributed substantially to the greenhouse effect on early Mars. Methane is photochemically more stable than NH3 and the gases and particles that can be formed from it are all good absorbers of infrared radiation. The idea of a CH4-rich Martian paleoatmosphere was suggested a long time ago but has fallen out of favor because of perceived difficulties in maintaining a CH4-rich atmosphere. In particular, it is not obvious where the CH4 might come from, since volcanic gases (on Earth, at least) contain very little CH4. This difficulty could be largely overcome if early Mars was inhabited by microorganisms. Then, methanogenic bacteria living in sediments could presumably have supplied CH4 to the atmosphere in copious quantities. Author (revised)

CORE FORMATION, WET EARLY MANTLE, AND H2O DEGASSING ON EARLY MARS Abstract Only

K. Kuramoto and T. Matsui *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 15-17 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Geophysical and geochemical observations strongly suggest a 'hot origin of Mars,' i.e., the early formation of both the core and the crust-mantle system either during or just after planetary accretion. To consider the behavior of H2O in the planetary interior it is specifically important to determine by what mechanism the planet is heated enough to cause melting. For Mars, the main heat source is probably accretional heating. Because Mars is small, the accretion energy needs to be effectively retained in its interior. Therefore, the three candidates of heat retention mechanism are discussed first: (1) the blanketing effect of the primordial H2-He atmosphere; (2) the blanketing effect of the impact-induced H2O-CO2 atmosphere; and (3) the higher deposition efficiency of impact energy due to larger impacts. It was concluded that (3) the is the most plausible mechanism for Mars. Then, its possible consequence on how wet the early martian mantle was is discussed. Author (revised)

BRINY LAKES ON EARLY MARS? TERRESTRIAL INTRACRATER PLAYAS AND MARTIAN CANDIDATES Abstract Only

P. Lee *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 17 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Recently, salt-rich aqueous solutions have been invoked in the preterrestrial alteration of the Nakhla and Lafayette SNC meteorites. The findings substantiate the long-standing suspicion that salts are abundant on Mars and, more importantly, that brines have played a significant role in Martian hydrogeological history. Adding to the growing body of evidence, I report here on the identification of several unusual intracrater high-albedo features in the ancient cratered highlands of Mars, which I interpret as possible saline playas, or salt pans. EARLY MARS: A REGIONAL ASSESSMENT OF DENUDATION CHRONOLOGY Abstract Only

T. A. Maxwell and R. A. Craddock *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 18 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Within the oldest highland units on Mars, the record of crater degradation indicates that fluvial resurfacing was responsible for modifying the Noachian through middle-Hesperian crater population. Based on crater frequency in the Noachian cratered terrain, age/elevation relations suggest that the highest exposures of Noachian dissected and plateau units became stabilized first, followed by successively lower units. In addition, studies of drainage networks indicate that the frequency of Noachian channels is greatest at high elevations. Together, these observations provide strong evidence of atmospheric involvement in volatile recycling. The long time period of crater modification also suggests that dendritic highland drainage was not simply the result of sapping by release of juvenile water, because the varied geologic units as well as the elevation dependence of stability ages makes it unlikely that subsurface recycling could provide a continuous supply of water for channel formation by sapping. While such geomorphic constraints on volatile history have been established by crater counts and stratigraphic relations using the 1:2M photomosaic series, photogeologic age relationships at the detailed level are needed to establish a specific chronology of erosion and sedimentation. Age relations for discrete erosional slopes and depositional basins will help refine ages of fluvial degradation, assess effectiveness of aeolian processes, and provide a regional chronology of fluvial events. EARLY MARS WAS WET BUT NOT WARM: EROSION, FLUVIAL FEATURES, LIQUID WATER HABITATS, AND LIFE BELOW FREEZING Abstract Only

C. P. McKay and W. L. Davis *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 18 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

There is considerable evidence that Mars had liquid water early in its history and possibly at recurrent interval. It has generally been assumed that this implied that the climate was warmer as a result of a thicker CO2 atmosphere than at the present. However, recent models suggest that Mars may have had a thick atmosphere but may not have experienced mean annual temperatures above freezing. In this paper we report on models of liquid water formation and maintenance under temperatures well below freezing. Our studies are based on work in the north and south polar regions of Earth. Our results suggest that early Mars did have a thick atmosphere but precipitation and hence erosion was rare. Transient liquid water, formed under temperature extremes and maintained under thick ice covers, could account for the observed fluvial features. The main difference between the present climate and the early climate was that the total surface pressure was well above the triple point of water. Author

WET INSIDE AND OUT? CONSTRAINTS ON WATER IN THE MARTIAN MANTLE AND ON OUTGASSED WATER, BASED ON MELT INCLUSIONS IN SNC METEORITES Abstract Only

H. Y. McSween, Jr. and R. P. Harvey *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 18-19 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

Constraints on the volatile inventory and outgassing history of Mars are critical to understanding the origin of ancient valley systems and paleoclimates. Planetary accretion models for Mars allow either a volatile-rich or volatile-poor mantle, depending on whether the accreted materials were fully oxidized or whether accretion was homogeneous so that water was lost through reaction with metallic iron. The amount of water that has been outgassed from the interior is likewise a contentious subject, and estimates of globally distributed water based on various geochemical and geological measurements vary from a few meters to more than a thousand meters. New data on SNC meteorites, which are thought to be Martian igneous rocks, provide constraints on both mantle and outgassed water. Author

THE YOUNG SUN AND PHOTOCHEMISTRY OF THE PRIMITIVE MARTIAN ATMOSPHERE Abstract Only

H. Nair, M. F. Gerstell, and Y. L. Yung *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 19 (For primary document see N94-21659 05-91)

Avail: CASI HC A01/MF A01

We will investigate the climatology of an atmosphere where CO2 is a minor constituent but still the key radiative species. The thermal structure of the dust-free atmosphere is estimated by employing a simple radiative-convective model similar to that used by Gierasch and Goody. Radiative heating rates are computed using the Caltech/JPL one-dimensional photochemical model. Thermal cooling rates for a Martian atmosphere containing O2, O3, H2O, N2O, CO, and CO2 are calculated using FASCODE and k-distribution methods. The effects due to pressure broadening of the infrared absorption lines of CO2 by CO and O2, as well as the radiative

effects of increased ozone densities in the atmosphere, will be examined.

EVOLUTION OF THE MARTIAN ATMOSPHERE Abstract Only
R. O. Pepin *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 20 (For primary document see N94-21659 05-91)
Avail: CASI HC A01/MF A01

Evolution of Mars' noble gases through two stages of hydrodynamic escape early in planetary history has been proposed previously by the author. In the first evolutionary stage of this earlier model, beginning at a solar age of approximately 50 m.y., fractionating escape of a H2-rich primordial atmosphere containing CO2, N2, and the noble gases in roughly the proportions found in primitive carbonaceous (CI) chondrites is driven by intense extreme-ultraviolet (EUV) leads to a long (approximately 80 m.y.) period of quiescence, followed by an abrupt degassing of remnant H2, CO2, and N2 from the mantle and of solar-composition noble gases lighter than Xe from the planet's volatile-rich accretional core. Degassed H refuels hydrodynamic loss in a waning but still potent solar EUV flux. Atmospheric Xe, Kr, and Ar remaining at the end of this second escape stage, approximately 4.2 G.y. ago, have evolved to their present-day abundances and compositions. Residual Ne continues to be modified by accretion of solar wind gases throughout the later history of the planet. This model does not address a number of processes that now appear germane to Martian atmospheric history. One, gas loss and fractionation by sputtering, has recently been shown to be relevant. Another, atmospheric erosion, appears increasingly important. In the absence then of a plausible mechanism, the model did not consider the possibility of isotopic evolution of noble gases heavier than Ne after the termination of hydrodynamic escape. Subsequent non-thermal loss of N was assumed, in an unspecified way, to account for the elevation of N from the model value of approximately 250 percent at the end of the second escape stage to approximately 620 percent today. Only qualitative attention was paid to the eroding effects of impact on abundances of all atmophilic species prior to the end of heavy bombardment approximately 3.8 G.y. ago. No attempt was made to include precipitation and recycling of carbonates in tracking the pressure and isotopic history of CO2. Derived from text

EARLY MARS: THE INEXTRICABLE LINK BETWEEN INTERNAL AND EXTERNAL INFLUENCES ON VALLEY NETWORK FORMATION Abstract Only
S. E. Postawko and F. P. Fanale (Hawaii Univ., Honolulu.) *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 20-22 (For primary document see N94-21659 05-91)
Avail: CASI HC A01/MF A01

The conditions under which the valley networks on the ancient cratered terrain on Mars formed are still highly debated within the scientific community. While liquid water was almost certainly involved, the exact mechanism of formation is uncertain. The networks most resemble terrestrial sapping channels, although some systems exhibit a runoff-dominated morphology. The major question in the formation of these networks is what, if anything, do they imply about early Martian climate? There are typically two major theories advanced to explain the presence of these networks. The first is that higher internal regolith temperatures, associated with a much higher heat flow 3.8 b.y. ago, would cause ground water to be closer to the surface than at present. Just how close to the surface ground water would have to exist in order to form these valley networks has recently been questioned. The second major theory is that early Mars had a much thicker atmosphere than at present, and an enhanced atmospheric greenhouse may have increased surface temperatures to near the freezing point of water. While recent calculations indicate that CO2 alone could not have produced the needed warming, the presence of other greenhouse gases may have contributed to surface warming. Derived from text

THE MARTIAN VALLEY NETWORKS: ORIGIN BY NIVEO-FLUVIAL PROCESSES Abstract Only
J. W. Rice, Jr. *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 22-23 (For primary document see N94-21659 05-91)
Avail: CASI HC A01/MF A01

The valley networks may hold the key to unlocking the paleoclimatic history of Mars. These enigmatic landforms may be regarded as the Martian equivalent of the Rosetta Stone. Therefore, a more thorough understanding of their origin and evolution is required. However, there is still no consensus among investigators regarding the formation (runoff vs. sapping) of these features. Recent climatic modeling precludes warm (0 degrees C) globally averaged surface temperatures prior to 2 b.y. when solar luminosity was 25-30 percent less than present levels. This paper advocates snowmelt as the dominant process responsible for the formation of the dendritic valley networks. Evidence for Martian snowfall and subsequent melt has been discussed in previous studies. Derived from text

MARS AND THE EARLY SUN Abstract Only
D. P. Whitmire (University of Southwestern Louisiana, Lafayette.), L. R. Doyle, R. T. Reynolds, and P. G. Whitman (University of Southwestern Louisiana, Lafayette.) *In* Lunar and Planetary Inst., Workshop on Early Mars: How Warm and How Wet?, Part 1 1993 p 23 Sponsored in part by Louisiana Educational Quality Support Fund (For primary document see N94-21659 05-91)
Avail: CASI HC A01/MF A01

Global mean temperatures near 273 K on early Mars are difficult to explain in the context of standards solar evolution models. Even assuming maximum CO2 greenhouse warming, the required flux is approximately 15 percent too low. Here we consider two astrophysical models that could increase the flux by this amount. The first model is a nonstandard solar model in which the early Sun had a mass somewhat greater than today's mass (1.02-1.06 solar mass). The second model is based on a standard evolutionary solar model, but the ecliptic flux is increased due to focusing by an (expected) heavily spotted early Sun. Derived from text

MARS EXPLORATION STUDY WORKSHOP 2
Michael B. Duke and Nancy Ann Budden Nov. 1993 98 p Workshop held at Moffett Field, CA, 24-25 May 1993
(NASA-CP-3243; S-750; NAS 1.55:3243) Avail: CASI HC A05/MF A02

A year-long NASA-wide study effort has led to the development of an innovative strategy for the human exploration of Mars. The latest Mars Exploration Study Workshop 2 advanced a design reference mission (DRM) that significantly reduces the perceived high costs, complex infrastructure, and long schedules associated with previous Mars scenarios. This surface-oriented philosophy emphasizes the development of high-leveraging surface technologies in lieu of concentrating exclusively on space transportation technologies and development strategies. As a result of the DRM's balanced approach to mission and crew risk, element commonality, and technology development, human missions to Mars can be accomplished without the need for complex assembly operations in low-Earth orbit. This report, which summarizes the Mars Exploration Study Workshop held at the Ames Research Center on May 24-25, 1993, provides an overview of the status of the Mars Exploration Study, material presented at the workshop, and discussions of open items being addressed by the study team. The workshop assembled three teams of experts to discuss cost, dual-use technology, and international involvement, and to generate a working group white paper addressing these issues. The three position papers which were generated are included in section three of this publication.

Operations have been concentrated on the micro-resolution analysis of the 120 meter ice core that was collected in Greenland in June, 1992. Thus far, 64 meters of the ice core have been sampled and a total of over 4000 individual samples have been analyzed for both nitrate and electrical conductivity. It has been possible to identify a number of specific anomalies in both the nitrate and the electrical conductivity records. Strong nitrate anomalies related to known solar flares have been identified, and it will become possible to delineate a signal of solar activity well beyond the known geophysical records. It has also been observed that periods of known low solar activity also correlate with lower than normal nitrate concentration and yearly nitrate flux. A new automatic ice core melting apparatus has been designed and built that will permit sampling the remaining ice cores at a higher resolution than was previously possible. This is a significant advantage because deeper ice cores are more compacted and the higher sampling frequency will maintain nearly the same time resolution as that obtained nearer the surface. DTIC

During this second year we pursued the analysis, image enhancement, and processing of an extensive set of the EUV/Skylab data for the search of empirical characteristics of coronal heating in different scale magnetic regions on the Sun. Student involvement in our research projects included Martina Arndt, Gretchen McPhee and Jennifer Yeh. During this funding period we published three papers in refereed journals, one in a conference proceedings, submitted three papers to refereed journals, and have several manuscripts under preparation. We have also made two conference presentations and given three invited talks. Our future projects are continuations of our ongoing long term projects and include the following: (1) The comparison of the temperature in coronal holes and the quiet sun--the implication for solar wind models; (2) The energy spectrum of the variability of the emission in active regions, the quiet sun, and coronal holes; (3) Studies of the fine scale structure in the quiet sun and active regions; and (4) Modeling the radio emission in the presence of structure in the quiet sun and active regions. Progress toward performance of the tasks and accomplishing the goals set forth in the two year Research Grant included primarily analysis of digital data sets and determination of methodology associated with the analysis of the very large, unique, and complex collection of digital solar magnetic field data. The treatment of each magnetogram as a unique set of data requiring special treatment was found to be necessary. It is determined that a person familiar with the data, the analysis system, and logical, coherent outcome of the analysis must conduct each analysis, and interact with the analysis program(s) significantly sometimes many iterations for successful calibration and analysis of the data set. With this interaction, the data sets yield valuable, coherent analyses. During this period, it was also decided that only data sets taken inside heliographic longitudes (Central Meridian Distance) East and West 30 degrees (within 30 degrees of the Central Meridian of the Sun). If the total data set is then found to be numerically inadequate for the final analysis, 30 - 45 degrees Central Meridian Distance data will then be analyzed. The Optical Data storage system (MSFC observatory) was found appropriate for use both in intermediate storage of the data (preliminary to analysis), and for storage of the analyzed data sets for later parametric extraction. DEVELOPMENT, REFINEMENT, AND TESTING OF A SHORT TERM SOLAR FLARE PREDICTION ALGORITHM Semiannual Progress Report, 1 Feb. - 1 Aug. 1993
Jesse B. Smith, Jr. 1993 8 p
(Grant NAG8-888)
(NASA-CR-194727; NAS 1.26:194727) Avail: CASI HC A02/MF A01

During the period included in this report, the expenditure of time and effort, and progress toward performance of the tasks and accomplishing the goals set forth in the two year research grant proposal, consisted primarily of calibration and analysis of selected data sets. The heliographic limits of 30 degrees from central meridian were continued. As previously reported, all analyses are interactive and are performed by the Principal Investigator. It should also be noted that the analysis time involved by the Principal Investigator during this reporting period was limited, partially due to illness and partially resulting from other uncontrollable factors. The calibration technique (as developed by MSFC solar scientists), incorporates sets of constants which vary according to the wave length of the observation data set. One input constant is then varied interactively to correct for observing conditions, etc., to result in a maximum magnetic field strength (in the calibrated data), based on a separate analysis. There is some insecurity in the methodology and the selection of variables to yield the most self-consistent results for variable maximum field strengths and for variable observing/atmospheric conditions. Several data sets were analyzed using differing constant sets, and separate analyses to differing maximum field strength - toward standardizing methodology and technique for the most self-consistent results for the large number of cases. It may be necessary to recalibrate some of the analyses, but the sc analyses are retained on the optical disks and can still be used with recalibration where necessary. Only the extracted parameters will be changed.

DETERMINATION OF CORONAL MAGNETIC FIELDS FROM VECTOR MAGNETOGRAMS Progress Report No. 2, 1 Jan. - 31 Dec. 1993
Zoran Mikic 16 Dec. 1993 103 p Original contains color illustrations
(Contract NASw-4728; NAG5-1492; NSF ATM-92-96165)
(NASA-CR-194744; NAS 1.26:194744; SAIC-93/1224:APPAT-158) Avail: CASI HC A06/MF A02; 2 functional color pages

This report covers technical progress during the second year of the contract entitled 'Determination of Coronal Magnetic Fields from Vector Magnetograms,' NASW-4728, between NASA and Science Applications International Corporation, and covers the period January 1, 1993 to December 31, 1993. Under this contract SAIC has conducted research into the determination of coronal magnetic fields from vector magnetograms, including the development and application of algorithms to determine force-free coronal fields above selected observations of active regions. The contract began on June 30, 1992 and has a completion date of December 31, 1994. This contract is a continuation of work started in a previous contract, NASW-4571, which covered the period November 15, 1990 to December 14, 1991. During this second year we have concentrated

on studying additional active regions and in using the estimated coronal magnetic fields to compare to coronal features inferred from observations.

Results of the first year of data acquired from several Earth observatories concerning the optical counterparts gamma ray bursts (GRB) are presented. From the present statistics, it seems to be obvious that typical GRB's have optical emission at the time of the burst at a level at least below 1/(F(sub gamma)/F(sub opt)) approximately equal to 1/0.5 and optical emission a few hours after the burst is lower by a factor of 10 to 200 than the simultaneous emission. Given the fact that GRB spectra are rather broad over the observed energy range of say 20 keV up to 100 MeV, the observations indicate that the broad spectral shape may not continue into the optical range. After the confirmation of the isotropic distribution of GRB's by the BATSE experiment the interpretation now tends to put the sources at cosmological distances. For individual titles, see N94-20603 through N94-20604.

The photographic sky patrols of the Observatories Sonneberg (FRG), Ondrejov (CSFR), Odessa (Ukraine) are used to look for patrol plates which were exposed simultaneously with a gamma-ray burst (GRB) detected by gamma ray observations. The results for the first year of data are presented. For several GRB plates which contain the GRB location, and the exposure time of which contains the time of the GRB are presented. The results of the research for optical flashes on these simultaneous plates are discussed. ESA

Recent results of BATSE (a collaborative project on independent sky surveys of gamm ray bursts and optical sky patrols) reinforce the isotropic distribution of gamm-ray bursts. Alternatively to cosmological models, collisions between small mas primordial black holes and comets in the Oort cloud are proposed. Assuming typical Oort cloud densities and velocities for comets and primordial black holes, many of the observed properties of gamma-ray bursts can be explained. ESA

(ETN-93-93682) Avail: CASI HC A07

The electromagnetic components of a hadronic shower are investigated with focus on pions and iron kernels. A Monte Carlo simulation program was developed: CORSIKA (German acronym for cosmic ray simulations for cascade) is based on the simulation of strong interaction by high energies with an algorithm written from the dual parton model; the strong interaction by least energies was described by the isobar model and the electromagnetic part can be simulated with Nishimura-Kamata-Greisen formula. Simulation calculations allow lateral distribution and energy and number spectra of electrons, photons, hadrons and muons to be obtained. The dependence of shower parameters on primary energy was established. Results are found to agree with experimental data from magnetic spectrometry and scintillation counting measurements. Methods for primary particle identificiation, such as the covariance method and principal components analysis are proposed. ESA

Relativistic blast wave models of Gamma Ray Bursts (GRB) predict the spectrum of the emitted synchrotron radiation. The electrons in the shocked region are heated to a Wien distribution whose 'temperature' is 1/3 of the mean electron energy. This energy determines a characteristic (break) frequency of synchrotron radiation. At much lower frequencies, a spectrum F(sub nu) varies as nu(sup 1/3) is predicted independently of the details of the emitting region. This is consistent with the observed soft x ray emission of GRB. It implies low visible and radio intensities, unless there are collective emission processes. Author (revised)

RELATIVISTIC SHOCK SPECTRA: A PREDICTION
J. I. Katz 1994 9 p
(Grant NAGw-2918)
(NASA-CR-194764; NAS 1.26:194764) Avail: CASI HC A02/MF A01

I argue that particles heated by relativistic shocks should assume an equilibrium energy distribution. This leads to a synchrotron spectrum F(sub nu) varies as nu(sup 1/3) up to approximately the critical frequency nu(sub 0) of an electron with the mean electron energy. Application to gamma ray bursts (GRB's) implies that a burst with 10(exp -5) erg/(sq cm s) of soft gamma-rays and h(nu(sub 0)) = 300 KeV should be about 18th magnitude in visible light and a few micro-Jy at 1 GHz (less if self-absorbed).

RADIO GALAXIES AND THEIR ENVIRONMENT
W. vanBreugel 24 Feb. 1993 12 p Presented at the Jets in Extragalactic Radio Sources, Germany, 22-28 Sep. 1991
(Contract W-7405-eng-48)
(DE93-040851; UCRL-JC-114095; CONF-9109510-1) Avail: CASI HC A03/MF A01

The relationships between radio galaxies and their environment are varied, complex, and evolve with cosmic epoch. Basic questions are what role the environment plays in triggering and fuelling (radio) galaxy activity, what the effects of this activity are on its environment, and how radio galaxies and environment evolve. Clearly, this could be the topic of a workshop all in itself and the scope of this review will necessarily be limited. A review of the connections between environment and galaxy activity in general has been given by Heckman. First, I will briefly summarize the relationships between parent galaxy and cluster environments, and radio galaxies. A more detailed discussion of various aspects of this will be given elsewhere by F. Owen, J.0. Burns and R. Perley. I will then discuss the current status of investigations of extended emission-line regions in radio galaxies, again referring elsewhere in this volume for more detailed discussions of some particular aspects (kinematics and ionization mechanisms by K. Meisenheimer; polarization and spectral index lobe asymmetries by G. Pooley). I will conclude with a brief discussion of the current status of observations of high redshift radio galaxies. DOE

N94-20150# Wichita State Univ., KS. National Inst. for Aviation Research.
[ACTIVITIES OF NATIONAL INST. FOR AVIATION RESEARCH]
1993 72 p Sponsored by Kansas Technology Enterprise Corp.
(NIAR-93-16) Avail: CASI HC A04/MF A01

In response to a letter from Dr. Bill Brundage, KTEC president, dated August 2, 1993, the NIAR prepared information regarding the economic benefits the state has received for its six year investment of $3,402,500 through fiscal year 1993 in the National Institute for Aviation Research. Following is the summary of measurable outcomes: Established a research, technical assistance and education center operating as the primary channel for state research and development support to the aviation industry which accounts for 11.3 percent of the state's total employee earnings; Generated $23,529,000 from non-state sources producing a return on the KTEC investment of 7.9 : 1; Constructed a research facility of 74,000 gross sq ft with laboratories and equipment valued at $17,000,000. This is a return on the KTEC $475,000 equipment investment of 42.5 : 1; Established a Manufacturing Technology Center (MAMTC) Regional Office in Wichita with KTEC and NIST funding, which has provided assistance to 168 aviation support and non-aviation manufacturing firms with a combined employment of more than 18,400 Kansas; Received industry contracts valued at $2,902,000; Received federal grants/contracts valued at $13,727,000; Provided assistantships for 257 students in engineering and science. Alumni data suggest that 50 percent of engineering graduates remain in Kansas; Conducted 320 technology transfer workshops with a total of 9,450 attendees; Published 348 technical papers; Created and saved a total of 649 jobs (84 new jobs within the NIAR - 124 new jobs reported by NIAR/MAMTC clients - 251 jobs saved reported by NIAR/MAMTC clients - 190 indirect jobs created according to CEBDR estimate); and Provided substantial technical assistance to Boeing, Beech, Cessna and Learjet, which have combined employment of 31,000 Kansans, on seven new airplane models. The total sales potential of these projects manufactured by the Kansas Aviation Industry exceeds $10 billion. Derived from text

NHK SCIENCE AND TECHNICAL RESEARCH LABORATORIES Annual Report, 1992
18 Jun. 1993 40 p Original contains color illustrations
Avail: CASI HC A03/MF A01

NHK (Japan Broadcasting Corporation), founded under the Broadcast Law of Japan, is a public broadcasting enterprise whose operations are supported by reception fees paid by viewers throughout Japan. In 1992, the World Administrative Radio Conference (WARC) made an international allocation of frequency bands for broadband HDTV satellite broadcasts in the 21 GHz band and digital audio satellite broadcasts in the 2.5 GHz band for mobile receivers. In Japan, government-level studies have begun to decide how the eight satellite broadcasting channels assigned to this country should be utilized in the future. These moves will help to establish the framework for the development of future broadcasting systems including digital broadcasting and have close connection to the R&D activities of the laboratories. During 1992, the laboratories conducted active R&D on digital broadcasts which provide diverse and flexible services, and 3D TV broadcasts, as well as infrastructural technologies which will contribute to the realization of next-generation broadcasting. The laboratories also conducted R&D to promote further penetration of DBS services which have been available in Japan since 1984, to expand Hi-Vision (HDTV) broadcasting which NHK started in 1989, and to enhance existing broadcast activities. The major thrust areas of the weapons-supporting research are growth, structure, and reactivity of surfaces and thin films; uranium research; physics and processing of metals; and energetic materials. The laboratory-directed R and D includes the director's initiatives and individual projects and the transactinium institute studies. DOE

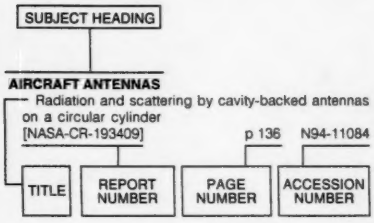
SUBJECT INDEX

Typical Subject Index Listing



The subject heading is a key to the subject content of the document. Titles, report numbers, and accession numbers of pertinent documents are provided under each subject heading. When the title is insufficiently descriptive of the document content, a title extension is added, separated from the title by three hyphens. The report number helps to indicate the type of document cited (e.g., NASA report, NASA translation, NASA contractor report). The accession number is the number by which the document abstracts are arranged in this journal and by which the document is sold or requested. The page number helps you locate the citation in the abstract section. The titles, with title extensions if present, are arranged under each subject heading in ascending accession number order. The subject headings have been selected from the latest revision of the *NASA Thesaurus*.

Surface acoustic wave sensing of VOC's in harsh chemical environments
[DE93-040721] p 1968 N94-21751
The relative noise levels of parallel axis gear sets with various contact ratios and gear tooth forms
[NASA-TM-106431] p 1826 N94-21756
Acoustic, fiber optic, and silicon microelectronic microsensors research and development activities at Sandia National Laboratories
[DE93-019075] p 1770 N94-22040

ACOUSTO-OPTICS
Optical signal processing
[AD-A271036] p 1983 N94-20013

ACRYLATES
The 13C-NMR spectra of poly (4-((2-(acryloyloxy) ethyl) ethyl amino)- 4-nitroazobenzene-co-methyl methacrylate)
[AD-A273016] p 1705 N94-21238
Optically induced birefringence in copolymers and blends containing azobenzene groups
[AD-A273065] p 1706 N94-21523
Swelling equilibria for cationic 2-hydroxyethyl methacrylate (HEMA)-based hydrogels
[DE94-000728] p 1707 N94-21856

ACTINIDE SERIES
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827
Static ultra-high pressure study of lanthanide and actinide metals using a diamond-anvil cell
[DE94-000369] p 1693 N94-21656
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388

ACTIVATION ENERGY
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions
[AD-A272665] p 1681 N94-21216

ACTIVE CONTROL
Improvement of helicopter attitude stability by active control of the conventional swash plate
[NASA-CR-194786] p 1650 N94-20524
Actively controlled shaft seals for aerospace applications
[NASA-CR-194759] p 1823 N94-20538
Prediction and control of vortex-dominated and vortex-wake flows
[NASA-CR-194722] p 1637 N94-21054
Distributed intelligent control and status networking p 1932 N94-21335
Active control of wake/blade-row interaction noise through the use of blade surface actuators
[NASA-CR-4556] p 1968 N94-21608
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851
Active damping of oscillations in a long compliant manipulator link
[DE93-018878] p 1826 N94-22038

ACTIVE GALACTIC NUCLEI
Jets associated with active galactic nuclei p 2000 N94-22631
Pair plasmas in the central engine of active galactic nuclei p 2002 N94-22641
Vertical structure of accretion disks p 2002 N94-22645
Time variation of MHD accretion onto a black hole p 2009 N94-22692

ACTIVE SATELLITES
FITS data conversion efforts at the Compton Observatory Science Support Center p 1926 N94-22488

ACTIVITY (BIOLOGY)
Cosmos 2229
[NASA-CR-194734] p 1895 N94-20338

ACTS
Mobile antenna development at JPL p 1731 N94-20457

ACTUATION
Quantification of uncertainties in the performance of smart composite structures
[NASA-TM-106335] p 1830 N94-20171

ACTUATORS
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
Feedback controlled optics with wavefront compensation
[NASA-CASE-NPO-18194-1-CU] p 1985 N94-20305
Climbing robot --- caterpillar design
[NASA-CASE-GSC-13442-1] p 1823 N94-20494
Actively controlled shaft seals for aerospace applications
[NASA-CR-194759] p 1823 N94-20538
Torsion spring powered missile wing deployment system
[CA-PATENT-1,306,384] p 1645 N94-21051
Long range fast tool servo
[AD-A271614] p 1761 N94-21257
Active control of wake/blade-row interaction noise through the use of blade surface actuators
[NASA-CR-4556] p 1968 N94-21608
Micromachined actuator and sensor capabilities at the Microelectronics Development Laboratory
[DE93-019417] p 1769 N94-21918
Shape memory metals
[DE94-001373] p 1695 N94-21976

ADA (PROGRAMMING LANGUAGE)
A comprehensive software engineering educational experience
[AD-A270583] p 1905 N94-20109
The why, what, and how of Ada software development p 1779 N94-22157

ADAPTATION
Local uniform grid refinement and brine transport in porous media with inhomogeneities
[CWI-NM-R9224] p 1803 N94-21609

ADAPTERS
Disengagable adapter for an optical fiber connector
[AD-D015959] p 1822 N94-20356

ADAPTIVE CONTROL
Telerobotic control of a mobile coordinated robotic server, executive summary
[NASA-CR-194685] p 1821 N94-20044
Self-organization via active exploration in robotic applications. Phase 2: Hybrid hardware prototype
[NASA-CR-194723] p 1939 N94-20212
Optimization and control of a small angle ion source using an adaptive neural network controller
[DE93-040063] p 1946 N94-21845
On the estimation algorithm used in adaptive performance optimization of turbofan engines
[NASA-TM-4551] p 1649 N94-21879
An adaptive control to enable a robot to follow Cartesian trajectories p 1790 N94-22229
A robust adaptive control design for flexible joint manipulators p 1790 N94-22230

ADAPTIVE FILTERS
Sub-band adaptive noise cancelling p 1774 N94-22125
Timing recovery in the channel processor of a digital group demodulator p 1780 N94-22169
Applications of a two-dimensional nonlinear filters to image restoration p 1789 N94-22225
Adaptive filtering of Echelle spectra of distant Quasars p 2072 N94-22520

ADAPTIVE OPTICS
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
Laser guide star adaptive optics: Present and future
[DE93-018642] p 1989 N94-21619
HST image restoration: A comparison of pre- and post-servicing mission results p 1925 N94-22478

ADDING CIRCUITS
Low-latency digital frequency synthesizer using the residue number system p 1759 N94-21121
Evaluation of floating-point sum or difference of products in carry-save domain p 1764 N94-21705
On fast carry select adders p 1767 N94-21728
Formal verification of an ALU p 1772 N94-22114

ADDITIVES
Thrust expansion engine
[AD-D015896] p 1669 N94-20121
The use of screening tests in spacecraft lubricant evaluation
[AD-A272943] p 1705 N94-21225
Optical properties of chromium and neodymium in zirconium - barium - lanthanum - aluminum fluoride glass
[AD-A271609] p 1987 N94-21236
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
Heat transfer additives for absorption cooling system fluids
[PB93-202521] p 1714 N94-21426
Refractive index behaviour of phosphorus-doped planar silica waveguides, appendix 7 p 1989 N94-21601
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells
[DE93-019536] p 1847 N94-21650
Ni3Al aluminide alloys
[DE94-000493] p 1694 N94-21933
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948

Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176

ADDUCTS

Fullerene derivatives and fullerene superconductors [DE93-019568] p 2031 N94-21871

ADHESION

Microscopic modeling of tribological and interfacial phenomena [AD-A271864] p 1823 N94-20464

Interleaved bismaleimide composites [AD-A272233] p 1674 N94-20574

ADHESIVE BONDING

Durability predictions for adhesively bonded joints in humid environments [AD-A271177] p 1830 N94-20001

Adhesive bonded joint with improved cyclic fatigue life for alumina-ceramic cylinders and hemispheres: Fourth generation housings [AD-A273061] p 1831 N94-21310

ADHESIVES

Characterization studies of lower and non-TDI polyurethane encapsulants [DE93-041129] p 1698 N94-19857

Durability predictions for adhesively bonded joints in humid environments [AD-A271177] p 1830 N94-20001

Adhesive electroless metallization of fluoropolymeric substrates [AD-A271858] p 1703 N94-20526

Adhesive bonded joint with improved cyclic fatigue life for alumina-ceramic cylinders and hemispheres: Fourth generation housings [AD-A273061] p 1831 N94-21310

ADJOINTS

Shape optimization governed by the Euler equations using an adjoint method [NASA-CR-191555] p 1950 N94-20092

ADSORPTION

Common Themes and Mechanisms of Epitaxial Growth, volume 312 — Materials Research Society symposium proceedings [AD-A270513] p 2013 N94-19967

A Green function method for calculation of atomic and electronic properties of isolated adsorbate atoms [ETN-93-95055] p 2014 N94-20018

Collisions of molecules with clusters: A quasiclassical study [DE93-018614] p 1971 N94-20050

Photoelectron spectroscopy at model boundary surfaces of energy converter semiconductors/electrolyte contacts: Adsorption, coadsorption, and triadsorption of Br2, Na, and H2O on Van der Waals surfaces of metal chalocogenide semiconductors [ETN-93-95063] p 2015 N94-20152

The metallic bond for monolayer transition metal layers on transition metal surfaces [DE93-019060] p 1691 N94-20313

Surface electrochemistry of metals [AD-A272913] p 1691 N94-21245

Dynamics of adsorbed, swollen block copolymers [AD-A272013] p 1706 N94-21460

Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold [DE93-041126] p 1694 N94-21937

Quantitative analysis of scanning tunneling microscopy images for surface structure determination: Sulfur on Re(0001) [DE93-019235] p 2034 N94-22041

ADVANCED TEST REACTORS

Hydrogen pickup and redistribution in alpha-annealed zircaloy-4 [DE93-018050] p 1689 N94-20182

ADVANCED VERY HIGH RESOLUTION RADIOMETER

Global and regional comparative performance of linear and nonlinear satellite multichannel sea surface temperature algorithms [AD-A270475] p 1837 N94-20028

Automatic AVHRR image navigation software [NASA-CR-194602] p 1643 N94-20148

Linear mixing model applied to AVHRR LAC data p 1838 N94-20958

Using NDVI/AVHRR data for crop monitoring and forecasting in South Italy p 1841 N94-20970

Comparison of satellite-derived velocity fields in the coastal transition zone [AD-A272565] p 1883 N94-21360

Cloud properties from the analysis of AVHRR observations for FIRE 2 p 1872 N94-22300

Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303

Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312

ADVECTION

Predicting lightning events in the KSC area: A feasibility study using single station data [AD-A271440] p 1864 N94-20088

Modeling the minimum energy state of the Earth's magnetotail [AD-A267984] p 1856 N94-20485

Multigrid schemes for viscous hypersonic flows p 1641 N94-21473

AERIAL PHOTOGRAPHY

Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters p 1729 N94-20452

Experiments in knowledge refinement for a large rule-based system [AD-A272055] p 1809 N94-21445

An approach to the estimation of ground structure and aircraft motion from aerial image sequences p 1789 N94-22226

AEROACOUSTICS

Evaluation of a nonlinear method for the enhancement of tonal signal detection [NASA-CR-191562] p 1968 N94-21741

Computation of the sound generated by isotropic turbulence [NASA-CR-191543] p 1804 N94-21880

Instability modes excited by natural screech tones in a supersonic rectangular jet [NASA-TM-106409] p 1638 N94-22274

AEROASSIST

Effects of thrust vector control on the performance of the aerobang orbital plane change maneuver [AD-A272532] p 1646 N94-21418

AEROBRAKING

Entry velocities at Mars and Earth for short transit times [AD-A272591] p 1665 N94-21420

AERODYNAMIC BALANCE

Experimental study on interference aerodynamics of close-coupled canard configuration [AD-A267760] p 1636 N94-19963

AERODYNAMIC BRAKES

Tetrahedral lander [NASA-CASE-MSC-22062-1] p 1658 N94-20590

AERODYNAMIC DRAG

An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight [AD-A270201] p 1636 N94-20486

Pressure versus drag effects on crater size p 1862 N94-20742

Nonlinear aerodynamics and the design of wing tips [NASA-CR-194732] p 1638 N94-21833

AERODYNAMIC HEATING

Space Station trash removal system [NASA-CASE-MSC-21723-1] p 1657 N94-20367

Micrometeorite dynamic pyrometamorphism: Nonstoichiometric clinoenstatite (CLEN) p 2083 N94-20715

Effects of thrust vector control on the performance of the aerobang orbital plane change maneuver [AD-A272532] p 1646 N94-21418

AERODYNAMIC INTERFERENCE

Experimental study on interference aerodynamics of close-coupled canard configuration [AD-A267760] p 1636 N94-19963

AERODYNAMIC NOISE

Instability modes excited by natural screech tones in a supersonic rectangular jet [NASA-TM-106409] p 1638 N94-22274

AERODYNAMIC STABILITY

AIAA Techfest 29 proceedings [NIAR-93-1] p 1635 N94-20191

Modelling stalled airfoils [ISBN-0-315-59525-6] p 1639 N94-22382

AERODYNAMIC STALLING

A theoretical investigation of unsteady separation phenomena related to dynamic stall [AD-A271865] p 1636 N94-20465

AERODYNAMICS

Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188

AIAA Techfest 29 proceedings [NIAR-93-1] p 1635 N94-20191

Aeronautical engineering: A continuing bibliography with indexes (supplement 294) [NASA-SP-7037(294)] p 1635 N94-20267

Survey of lift-fan aerodynamic technology [NASA-CR-177615] p 1646 N94-21592

Nonlinear aerodynamics and the design of wing tips [NASA-CR-194732] p 1638 N94-21833

Instability modes excited by natural screech tones in a supersonic rectangular jet [NASA-TM-106409] p 1638 N94-22274

Measurement of the influence of deicing liquids on aircraft aerodynamics p 1640 N94-22602

AEROGELS

The aerogel mesh contamination collector [AD-A270537] p 1651 N94-20011

Intact capture of hypervelocity particles on Shuttle p 2085 N94-20837

Effects of aqueous solution compositions on Aerocapacitor energy density [DE94-000385] p 1768 N94-21753

AERONAUTICAL ENGINEERING

Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188

Aeronautical engineering: A continuing bibliography with indexes (supplement 294) [NASA-SP-7037(294)] p 1635 N94-20267

Documents on the history of aeronautical and space research in Germany, 1900 - 1970 [DLR-MITT-92-08] p 2152 N94-20543

AEROSOLS

Parameters affecting hydrogen chloride measurements [AD-A271326] p 1851 N94-20025

Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects [DE93-019525] p 1855 N94-20220

Global blackout following the K/T Chicxulub impact: Results of impact and atmospheric modeling p 1854 N94-20696

Sunphotometer network for monitoring aerosol properties in the Brazilian Amazon p 1839 N94-20961

Obtaining surface optical properties from space-based lidar systems [AD-A272831] p 1987 N94-21172

NOVAM evaluation utilizing electro-optics and meteorological data from KEY-90 [AD-A271722] p 1868 N94-21356

Documentation for PCDIST, a FORTRAN subroutine to calculate Pollack-Cuzzi scattering [AD-A273070] p 1988 N94-21491

Stratospheric Aerosol and Gas Experiment (SAGE 3) p 1869 N94-21644

Earth observing scanning polarimeter p 1844 N94-21645

Global emissions and models of photochemically active compounds [DE93-040490] p 1852 N94-21969

CO2 lidar observations of Mount Pinatubo debris: FIRE 2 and longer-term measurements p 1876 N94-22323

Examination of the observed synoptic scale cirrus cloud environment: The December 3-6 FIRE cirrus case study p 1877 N94-22325

The 5-6 December 1991 FIRE IFO 2 jet stream cirrus case study: The influence of volcanic aerosols p 1877 N94-22326

Three dimensional modeling of cirrus during the 1991 FIRE IFO 2: Detailed process study p 1877 N94-22327

Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models [DE93-041164] p 1853 N94-22384

AEROSPACE ENGINEERING

Actively controlled shaft seals for aerospace applications [NASA-CR-194759] p 1823 N94-20538

Documents on the history of aeronautical and space research in Germany, 1900 - 1970 [DLR-MITT-92-08] p 2152 N94-20543

NASA patent abstracts bibliography: A continuing bibliography. Section 1: Abstracts (supplement 44) [NASA-SP-7039(44)-SECT-1] p 2043 N94-21254

Spinoff, 1992 [NASA-NP-201] p 2054 N94-21739

The 1992 Seals Flow Code Development Workshop [NASA-CP-10124] p 1654 N94-21790

Cognitive engineering in aerospace applications [NASA-CR-194782] p 1647 N94-21819

NASA Propulsion Engineering Research Center, volume 1 [NASA-CR-194721-VOL-1] p 1671 N94-22428

AEROSPACE ENVIRONMENTS

Synoptic observations of near surface processes of an insolated ice-dust body under space conditions: The case of KOSI 9 and 10 p 2084 N94-20827

Residual atmosphere in the FRECOPA experiment and degassing of materials p 1660 N94-21374

Some results of the oxidation investigation of copper and silver samples flown on LDEF p 1660 N94-21375

Aragatz project samples experiment/MAPOL (polymer materials) experiment: Postflight expert evaluation p 1660 N94-21376

Thermal stress analysis of composites in the space environment p 1661 N94-21379

Columbus PMP Critical Technologies Program: Approach for materials life time prediction p 1664 N94-21402

Spaceflight Radiation Health program at the Lyndon B. Johnson Space Center
[NASA-TM-104782] p 1893 N94-21863

AEROSPACE INDUSTRY
Aerospace: Facts and figures, 1992-1993
[AD-A272571] p 1635 N94-21419

AEROSPACE MEDICINE
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 383)
[NASA-SP-7011(383)] p 1892 N94-21288

AEROSPACE PLANES
R and D to HOPE airframe p 1665 N94-21406
Thrust augmentation options for the Beta 2 two-stage-to-orbit vehicle
[NASA-TM-106448] p 1648 N94-21563
Spaceplane flight simulation: Project definition
[PB93-211399] p 1651 N94-22094

AEROSPACE SCIENCES
Electronic publishing and intelligent information retrieval p 2047 N94-22479

AEROSPACE SYSTEMS
Telerobotic control of a mobile coordinated robotic server, executive summary
[NASA-CR-194685] p 1821 N94-20044

AEROSPACE TECHNOLOGY TRANSFER
Index to 1992 NASA Tech Briefs, volume 16, numbers 1-12
[NASA-TM-109377] p 2053 N94-21736
Index to 1991 NASA Tech Briefs, volume 15, numbers 1-12
[NASA-TM-109376] p 2053 N94-21737
Cumulative index to NASA Tech Briefs, 1986-1990, volumes 10-14
[NASA-TM-109378] p 2054 N94-21738
Spinoff, 1992
[NASA-NP-201] p 2054 N94-21739

AEROTHERMODYNAMICS
Boost-phase discrimination research
[NASA-TM-109347] p 1666 N94-19818
Two dimensional simulation of the electric arc behavior in a cut-off device
[ECL-92-41] p 1751 N94-20595
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1
[NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2
[NASA-CR-189192-VOL-2] p 1648 N94-21583

AFFERENT NERVOUS SYSTEMS
Effect of copper sulphate on the rate of afferent discharge in the gastric branch of the vagus nerve in the rat p 1887 N94-21907

AGGLOMERATION
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows
[AD-A271160] p 1678 N94-20000
Unstructured multigrid through agglomeration p 1958 N94-21484

AGGREGATES
Strength and deformation properties of basaltic lava flows on planetary surfaces p 1862 N94-20747

AGING (MATERIALS)
A novel method for characterizing the electrical Priorities of lead Zirconate Titanate (PZT) ferroelectric films and memory devices
[AD-A270463] p 2013 N94-19966

AGING (METALLURGY)
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027
Microscopic evaluation of low-temperature embrittlement in type 308 stainless steel welds
[DE93-040266] p 1690 N94-20282

AGRICULTURE
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930
A general rough-surface inversion algorithm: Theory and application to SAR data p 1719 N94-20407
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430
Rapid estimates of crop production using remote sensing: European experience p 1840 N94-20969
Multicriteria optimisation problem in the agricultural modelling p 1844 N94-22073

AGROCLIMATOLOGY
Drought early warning system for crop production p 1840 N94-20966

AGROMETEOROLOGY
Drought early warning system for crop production p 1840 N94-20966

AIR BREATHING BOOSTERS
Thrust augmentation options for the Beta 2 two-stage-to-orbit vehicle
[NASA-TM-106448] p 1648 N94-21563

AIR BREATHING ENGINES
Navy GTE seal development activity p 1655 N94-21794

AIR CONDITIONING
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101

AIR CONDITIONING EQUIPMENT
Physiological efficacy of a lightweight ambient air cooling unit for various applications
[AD-A272952] p 1896 N94-21247

AIR COOLING
Wind chill: The temperature feeling caused by the wind velocity
[KNMI-TR-103A] p 1890 N94-20238
Physiological efficacy of a lightweight ambient air cooling unit for various applications
[AD-A272952] p 1896 N94-21247

AIR DATA SYSTEMS
Handbook. Volume 2: Digital systems validation. Chapter 18: Avionic data bus integration technology
[DOT/FAA/CT-88/10-VOL-2] p 1647 N94-20343

AIR FLOW
Principles and applications of oil film interferometry for measuring wall friction fields in air flows
[ETN-93-95062] p 1798 N94-20147
An analysis of pool surface deformation due to a plunging liquid jet
[AD-A272970] p 1802 N94-21261
Performance calculations and research direction for a water enhanced regenerative gas turbine cycle
[DE93-019866] p 1826 N94-21983

AIR LAND INTERACTIONS
Simulated retrieval of land surface parameters using multichannel satellite microwave radiometry p 1727 N94-20443
MSATT Workshop on Innovative Instrumentation for the In Situ Study of Atmosphere-Surface Interactions on Mars
[NASA-CR-194584] p 1811 N94-22430

AIR POLLUTION
Alternative refrigerants and refrigeration cycles for domestic refrigerators
[DE93-040481] p 1714 N94-20099
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
Analysis of wind observation from towers in the period 1977-1991
[KNMI-TR-148] p 1865 N94-20239
EDMS microcomputer pollution model for civilian airports and Air Forces bases: User's guide, supplement A
[AD-A271596] p 1851 N94-20948
Role of surface characteristics in urban meteorology and air quality
[DE93-040929] p 1851 N94-21740
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21969
The use of lidar for the evaluation of traffic-related urban pollution
[DE94-000704] p 1852 N94-22017
Survey on evaluation of energy technology contributing to preservation of the global environment. 2
[DE94-714884] p 1853 N94-22051
An economic analysis of transboundary air pollution between Finland and the Soviet Union
[ETLA-DISCUSSION-PAPER-335] p 1854 N94-22072
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569

AIR QUALITY
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885
EDMS microcomputer pollution model for civilian airports and Air Forces bases: User's guide, supplement A
[AD-A271596] p 1851 N94-20948
Role of surface characteristics in urban meteorology and air quality
[DE93-040929] p 1851 N94-21740
The use of lidar for the evaluation of traffic-related urban pollution
[DE94-000704] p 1852 N94-22017
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384
Passive Cryogenic Sampler
[DE94-000918] p 1811 N94-22392

AIR SAMPLING
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004
Passive Cryogenic Sampler
[DE94-000918] p 1811 N94-22392

AIR TRAFFIC CONTROL
ATC/pilot voice communications: A survey of the literature
[DOT/FAA/AM-93/20] p 1738 N94-21201
Next Generation Weather Radar (NEXRAD) Principal User Processor (PUP) Operational Test and Evaluation (OT/E)
[AD-A273075] p 1868 N94-21519
Development and evaluation of a profile negotiation process for integrating aircraft and air traffic control automation
[NASA-TM-4360] p 1643 N94-21606
Techniques used for the analysis of oculometer eye-scanning data obtained from an air traffic control display
[NASA-CR-191559] p 1643 N94-21629
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277
Parallel runway requirement analysis study. Volume 2: Simulation manual
[NASA-CR-191549-VOL-2] p 1644 N94-22278

AIR TRAFFIC CONTROLLERS (PERSONNEL)
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610

AIR TRANSPORTATION
Aerospace: Facts and figures, 1992-1993
[AD-A272571] p 1635 N94-21419
Air transport of samples containing chemical warfare agents
[FFI-93/6005] p 1851 N94-21455
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258] p 1642 N94-22055

AIR WATER INTERACTIONS
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186
ERS-1 and Seasat scatterometer measurements of ocean winds: Model functions and the directional distribution of short waves p 1720 N94-20412
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
Four-dimensional remote sensing of the marine boundary layer with a digital beamforming radar wind profiler
[AD-A270627] p 1882 N94-20564
NOVAM evaluation utilizing electro-optics and meteorological data from KEY-90
[AD-A271722] p 1868 N94-21356

AIRBORNE EQUIPMENT
Description and availability of airborne Doppler radar data p 1722 N94-20419
Advances in spaceborne radar remote sensing p 1723 N94-20424
Optical properties of cirrus derived from airborne measurements during FIRE IFO 2 p 1872 N94-22297
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2 p 1872 N94-22298

AIRBORNE RADAR
All-weather precision landing system for aircraft in remote areas
[AD-D015924] p 1643 N94-20197
Description and availability of airborne Doppler radar data p 1722 N94-20419
Two microstrip arrays for interferometric SAR applications p 1722 N94-20421
Advances in spaceborne radar remote sensing p 1723 N94-20424
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434

AIRBORNE SURVEILLANCE RADAR
Target angular motion and its effects on simulated SSAR ship images p 1745 N94-22161

AIRBORNE/SPACEBORNE COMPUTERS
Mongoose: Creation of a Rad-Hard MIPS R3000
p 1754 N94-21090
A simple modern correctness condition for a space-based high-performance multiprocessor
p 1766 N94-21718
Low energy CMOS for space applications
p 1768 N94-21735
Experiences in airborne computing at NRC for geophysical exploration applications
p 1783 N94-22185
Space Generic Open Avionics Architecture (SGOAA) standard specification
[NASA-CR-188269] p 1666 N94-22275
Towards the formal verification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191466] p 1937 N94-22414
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts
[NASA-TM-108245] p 2057 N94-22438
IRAF and STSDAS under the new ALPHA architecture
p 2049 N94-22553
AIRCRAFT ACCIDENTS
Ground proximity warning system voice warning unit requirements study
[AD-A270541] p 1641 N94-19876
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Aviation safety research. Volume 1: Literature review of sources of aviation accident and incident data and selected factors contributing to accidents
[PB93-202685] p 1641 N94-21428
Aircraft cabin water spray disbenefits study
[NASA-CR-194750] p 1642 N94-21818
AIRCRAFT ANTENNAS
Mobile terminal antennas for helicopters
p 1731 N94-20458
Improvements in antenna coupling path algorithms for aircraft EMC analysis p 1745 N94-22126
AIRCRAFT APPROACH SPACING
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277
Parallel runway requirement analysis study. Volume 2: Simulation manual
[NASA-CR-191549-VOL-2] p 1644 N94-22278
AIRCRAFT COMPARTMENTS
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Aircraft cabin water spray disbenefits study
[NASA-CR-194750] p 1642 N94-21818
AIRCRAFT CONFIGURATIONS
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
Apparatus and method for improving spin recovery on aircraft
[NASA-CASE-LAR-14747-1] p 1650 N94-20556
AIRCRAFT CONSTRUCTION MATERIALS
Strengthening and toughening in refractory metal alloys
[DE93-019942] p 1695 N94-21986
AIRCRAFT CONTROL
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
Handbook. Volume 2: Digital systems validation. Chapter 18: Avionic data bus integration technology
[DOT/FAA/CT-88/10-VOL-2] p 1647 N94-20343
Control vane guidance for a ducted-fan unmanned air vehicle
[AD-A271957] p 1645 N94-20561
A comparative robustness evaluation of feedforward neurofilters
[NASA-TM-106440] p 1650 N94-21742
AIRCRAFT DESIGN
Apparatus and method for improving spin recovery on aircraft
[NASA-CASE-LAR-14747-1] p 1650 N94-20556
Optimization and performance analysis of a supersonic conical-flow waverider for a deck-launched intercept mission
[AD-A272498] p 1648 N94-21433
Low-cost Unmanned Air Vehicle (UAV) for oceanographic research
[AD-A273103] p 1646 N94-21507
AIRCRAFT ENGINES
Navy GTE seal development activity
p 1655 N94-21794
AIRCRAFT EQUIPMENT
Windshear detection for aircraft using temperature lapse rate
[CA-PATENT-1,295,736] p 1641 N94-21030
AIRCRAFT GUIDANCE
Optimal flight guidance for aircraft in windshear
[CA-PATENT-1,307,573] p 1650 N94-21050
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258] p 1642 N94-22055
AIRCRAFT HYDRAULIC SYSTEMS
The optohydraulic servovalve: A novel device for the precise optical control of hydraulic pressure
[ISBN-0-315-83580-X] p 1827 N94-22577
AIRCRAFT ICING
Users manual for the NASA Lewis three-dimensional ice accretion code (LEWICE 3D)
[NASA-TM-105974] p 1642 N94-21590
AIRCRAFT INDUSTRY
Activities of National Inst. for Aviation Research
[NIAR-93-16] p 2151 N94-20150
AIRCRAFT LANDING
All-weather precision landing system for aircraft in remote areas
[AD-D015924] p 1643 N94-20197
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258] p 1642 N94-22055
AIRCRAFT MAINTENANCE
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
AIRCRAFT MODELS
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
Activities of National Inst. for Aviation Research
[NIAR-93-16] p 2151 N94-20150
Improved ceramic slip casting technique --- application to aircraft model fabrication
[NASA-CASE-LAR-14471-1] p 1702 N94-20377
AIRCRAFT NOISE
Rotorcraft noise: Status and recent developments
[NASA-CR-194761] p 1967 N94-20523
The relative noise levels of parallel axis gear sets with various contact ratios and gear tooth forms
[NASA-TM-106431] p 1826 N94-21756
Aircraft noise effects on cultural resources: Recommendation and rationale for further research
[PB93-205326] p 1968 N94-22053
Aircraft noise effects on cultural resources: Annotated bibliography
[PB93-205334] p 1969 N94-22054
AIRCRAFT PERFORMANCE
Apparatus and method for improving spin recovery on aircraft
[NASA-CASE-LAR-14747-1] p 1650 N94-20556
AIRCRAFT PRODUCTION
Aerospace: Facts and figures, 1992-1993
[AD-A272571] p 1635 N94-21419
AIRCRAFT SAFETY
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Army aircraft fire-detection systems operation and reliability
[AD-A271327] p 1641 N94-20912
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165
ATC/pilot voice communications: A survey of the literature
[DOT/FAA/AM-93/20] p 1738 N94-21201
Aviation safety research. Volume 1: Literature review of sources of aviation accident and incident data and selected factors contributing to accidents
[PB93-202885] p 1641 N94-21428
Aircraft cabin water spray disbenefits study
[NASA-CR-194750] p 1642 N94-21818
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258] p 1642 N94-22055
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277
AIRCRAFT SPIN
Apparatus and method for improving spin recovery on aircraft
[NASA-CASE-LAR-14747-1] p 1650 N94-20556
AIRCRAFT STRUCTURES
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
AIRCRAFT SURVIVABILITY
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
AIRFOIL OSCILLATIONS
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
AIRFOILS
A theoretical investigation of unsteady separation phenomena related to dynamic stall
[AD-A271865] p 1636 N94-20485
Robust unstructured grid generation with VGRID
p 1919 N94-22359
Development of a gridless CFD method
p 1919 N94-22361
Modelling stalled airfoils
[ISBN-0-315-59525-6] p 1639 N94-22382
Transonic flow calculations: Integral method
[ISBN-0-315-83538-9] p 1639 N94-22586
AIRFRAMES
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
AIRLINE OPERATIONS
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258] p 1642 N94-22055
Demonstrating damage tolerance of composite airframes p 1647 N94-22623
AIRPORT PLANNING
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258] p 1642 N94-22055
A study of parallel pier finger airport terminal configuration
[ISBN-0-315-83128-6] p 1652 N94-22425
AIRPORTS
EDMS microcomputer pollution model for civilian airports and Air Forces bases: User's guide, supplement A
[AD-A271596] p 1851 N94-20948
Notes on Antarctic aviation
[AD-A273018] p 1651 N94-21239
Observations of multi-layered clouds using K-band radar p 1874 N94-22311
Passenger terminal level of service measurement: A utility theoretic approach
[ISBN-0-315-59037-8] p 1651 N94-22418
An airport economic impact study procedure for Atlantic Canada
[ISBN-0-315-59445-4] p 1651 N94-22419
Passenger terminal simulation model
[ISBN-0-315-61113-8] p 1652 N94-22423
A study of parallel pier finger airport terminal configuration
[ISBN-0-315-83128-6] p 1652 N94-22425
ALANINE
Development of bioelastic material for aspects of wound repair
[AD-A267832] p 1673 N94-20208
ALBEDO
The 3-D Moons: The Voyager stereo atlas of the outer solar system p 2111 N94-20740
IMPS albedo and diameter for Asteroid 243 Ida
p 2085 N94-20845
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1
p 2136 N94-20876
Are tropical cirrus brighter than mid-latitude cirrus?
p 1881 N94-22343
ALCOHOLS
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043
ALDEHYDES
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
ALGEBRA
Representation and recognition with algebraic invariants and geometric constraint models
[AD-A271395] p 1949 N94-19838
Numerical solution of differential-algebraic equations with ill-conditioned constraints
[AD-A270934] p 1949 N94-19898
Partition algebraic design of asynchronous sequential circuits p 1759 N94-21125
On semisimple cocommutative bialgebras
[CWI-AM-R9210] p 1954 N94-21158
Classical and generalized solutions of time-dependent linear differential algebraic equations
[AD-A272834] p 1954 N94-21173
Toward a new method of decoding algebraic codes using Groebner bases
[AD-A273089] p 1959 N94-21524
A mechanized process algebra for verification of device synchronization protocols p 1766 N94-21716
The accuracy-through-order and the equivalence properties in the algebraic approximant
[DE93-040188] p 1960 N94-21946
The design of linear algebra libraries for high performance computers
[DE93-040458] p 1960 N94-21957

Vanishing theorem on arithmetic surfaces
[PB93-215481] p 1961 N94-22263
Non commutative geometry and physics
[PB93-215499] p 1961 N94-22264
Modular interval spaces
[PB93-220663] p 1961 N94-22266

ALGORITHMS
A distributed reinforcement learning scheme for network routing
[AD-A270600] p 1938 N94-19845
Method to evaluate steering and alignment algorithms for controlling emittance growth
[DE93-041004] p 1978 N94-19856
A comparison of data-parallel algorithms for connected components
[AD-A270551] p 1902 N94-19918
Set based analysis of ML programs
[AD-A270597] p 1902 N94-19948
Segmented operations for sparse matrix computation on vector multiprocessors
[AD-A270601] p 1928 N94-19950
Global combine on mesh architectures with wormhole routing
[DE93-018792] p 1903 N94-19959
Program derivation in acyclic graphs and related problems
[PB93-191765] p 1903 N94-19994
Stochastic optimization by simulation: Convergence proofs for the G1/G/1 queue in steady-state
[AD-A271141] p 1962 N94-19999
Global and regional comparative performance of linear and nonlinear satellite multichannel sea surface temperature algorithms
[AD-A270475] p 1637 N94-20028
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049
On multiflow problems
[RR-889-M] p 1950 N94-20125
Determining the distance to the perfect matching polytope of a bipartite graph
[RR-895-M] p 1950 N94-20161
Fast scalar algorithms for multivariate partial correlations and their empirical counterparts
[RR-903-M] p 1905 N94-20201
Determination of the optimal stochastic upper bound of a Markovian generator
[RR-906-I] p 1963 N94-20202
New algorithm of ground track processing in high-frequency skywave over-the-horizon-B radar
[AD-A267821] p 1717 N94-20207
Representation of spoken words in a self-organizing neural net p 1940 N94-20243
Modeling the human mental lexicon with self-organizing feature maps p 1743 N94-20244
Teleoperation with virtual force feedback
[DE93-019406] p 1942 N94-20293
Atmospheric infrared sounder
[NASA-CR-194814] p 1856 N94-20362
Neural network for processing both spatial and temporal data with time based back-propagation
[NASA-CASE-MSC-21874-1] p 1942 N94-20366
A general rough-surface inversion algorithm: Theory and application to SAR data p 1719 N94-20407
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids p 1724 N94-20431
Topographic slope from the SAR interferometric phase gradient p 1731 N94-20459
Graph minors: Structure theory and algorithms
[AD-A271851] p 1952 N94-20613
Reduction of network cost and wiring in Ranade's butterfly routing
[CWI-CS-R9243] p 1930 N94-21023
Optimal sorting in linear arrays with minimum global control
[CWI-CS-R9244] p 1908 N94-21024
Efficient comparison based string matching
[CWI-CS-R9249] p 1909 N94-21028
Tight comparison bounds for the string prefix-matching problem
[CWI-CS-R9250] p 1952 N94-21029
MGD1M: A parallel multigrid code with a fast vectorized ILU-relaxation
[CWI-NM-R9222] p 1930 N94-21077
An adaptive, lossless data compression algorithm and VLSI implementations p 1753 N94-21080
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114
A novel VLSI processor architecture for supercomputing arrays p 1758 N94-21115
Synthesis algorithm of VLSI multipliers for ASIC p 1758 N94-21116
Experiments on technology mapping using different cell libraries p 1758 N94-21118
A unified approach to VLSI layout automation and algorithm mapping on processor arrays p 1759 N94-21127
The Robinson-Schensted and Schuetzenberger algorithms. Part 1: New combinatorial proofs
[CWI-AM-R9208-PT-1] p 1911 N94-21156
The Robinson-Schensted and Schuetzenberger algorithms. Part 2: Geometric interpretations
[CWI-AM-R9209-PT-2] p 1911 N94-21157
Classification in feature-based default inheritance hierarchies
[TR-473] p 1911 N94-21180
Fault tolerant real-time systems
[AD-A272878] p 1899 N94-21195
Fast mutual exclusion, even with contention
[AD-A272947] p 1912 N94-21227
Selectivity: Reductions, nondeterminism, and function classes
[TR-469] p 1912 N94-21273
Using the USCCS for sub microsecond spacecraft clock calibration p 1813 N94-21346
An efficient numerical method for three-dimensional hypersonic flow
[AD-A272506] p 1637 N94-21411
Conversion and maintenance of Co-oP for Windows
[AD-A272513] p 1914 N94-21414
Mapping robust parallel multigrid algorithms to scalable memory architectures p 1922 N94-21483
Uniform self-stabilizing leader election. Part 1: Complete graph protocols
[CWI-CS-R9308-PT-1] p 1935 N94-21549
Comparing quasi-Newton methods for solving sparse interface problems
[CWI-NM-R9303] p 1959 N94-21576
A data distributed, parallel algorithm for ray-traced volume rendering
[DE93-040150] p 1935 N94-21622
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
Heuristic-based scheduling algorithm for high level synthesis p 1764 N94-21704
A statistical-based scheduling algorithm in automated data path synthesis p 1764 N94-21706
Reduction of blocking effects for the JPEG baseline image compression standard p 1765 N94-21714
A VLSI implementation of DCT using pass transistor technology p 1767 N94-21725
A DRAM compiler algorithm for high performance VLSI embedded memories p 1767 N94-21729
A set-associative, fault-tolerant cache design p 1768 N94-21731
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194727] p 2147 N94-21832
Imaging vector fields using line integral convolution
[DE93-019922] p 1917 N94-21841
Reentry vehicle adaptive telemetry
[DE94-001168] p 1656 N94-21852
The design of linear algebra libraries for high performance computers
[DE93-040458] p 1960 N94-21967
The combinatorial algorithms for large scale discrete optimization problems p 1923 N94-22079
Algorithms for Markov decision chains with partial information
[PB93-220085] p 1918 N94-22098
VLSI architectures for the new (T,L) algorithm p 1745 N94-22110
An in-place and in-order algorithm for the discrete cosine transform p 1771 N94-22111
A one-shot access scheme for a multicast switch p 1773 N94-22120
Improvements on the design of optimum SAW filters with the Remez Exchange Algorithm p 1773 N94-22123
Software implementation of an adaptive digital automatic level control p 1773 N94-22124
Cascaded recursive artificial neural networks p 1780 N94-22167
The Schur Berlekamp-Massey algorithm is parallelizable p 1784 N94-22191
Image convolution using the Myrias SPS-2 parallel computer p 1786 N94-22207
Asynchronous detection of SSB-SC data signals p 1747 N94-22217
An algorithm for the interference detection among polygonal surfaces p 1791 N94-22239
Extended range modified gradient technique for profile inversion (extended version of report Et/Em-1992-8)
[PB93-215242] p 1742 N94-22346
Development of a gridless CFD method p 1919 N94-22361
An advancing-front Delaunay-triangulation algorithm designed for robustness p 1920 N94-22362
Distributed input/output processing in data-driven multiprocessors
[DE94-000323] p 1937 N94-22378
How is WFPC flat field made p 1926 N94-22484
SkICAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549

ALIGNMENT
Method to evaluate steering and alignment algorithms for controlling emittance growth
[DE93-041004] p 1978 N94-19856
Evaluation of a scanning Hartmann device for single point turning applications
[DE93-019204] p 1821 N94-19891
Robust and efficient 3D recognition by alignment
[AD-A270839] p 1904 N94-20041
Multibunch beam break-up in detuned structures
[DE93-041056] p 1981 N94-21686
The preservation of low emittance flat beams
[DE93-040964] p 1981 N94-21773
Survey and alignment analysis for the ALS storage ring using computer spreadsheets
[DE93-019254] p 1917 N94-21917

ALIPHATIC HYDROCARBONS
Direct aromatization of methane
[DE93-040631] p 1678 N94-19890
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931

ALKALIES
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778

ALKALINE EARTH METALS
Self diffusion of alkaline-Earth in Ca-Mg-aluminosilicate melts: Experimental improvements on the determination of the self-diffusion coefficients p 1684 N94-20669

ALKANES
Microscopic modeling of tribological and interfacial phenomena
[AD-A271864] p 1823 N94-20464

ALKYL COMPOUNDS
Volatile CVD precursors based on copper alkoxides and mixed group 2A-copper alkoxides
[AD-D015930] p 1701 N94-20349

ALKYLIDENE
Rotational isomers of Mo(VI) alkylidene complexes and Cis/trans polymer structure: Investigations in ring-opening metathesis polymerization
[AD-A272647] p 1704 N94-21184

ALL-WEATHER LANDING SYSTEMS
All-weather precision landing system for aircraft in remote areas
[AD-D015924] p 1643 N94-20197

ALLENDE METEORITE
Inter- and intra-crystalline oxygen isotope distribution of fassaites in Allende CAI p 2086 N94-20898

ALLOYING
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926
High performance heavy alloys by alloying and process control
[AD-A271129] p 1689 N94-20019
Production of NiAl and TiAl intermetallics by mechanical alloying
[VTT-JULK-760] p 1691 N94-20530
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584

ALOHA SYSTEM
Comparison of theoretical and simulated performance results for sloppy-slotted Aloha signaling p 1746 N94-22204

ALPHA PARTICLES
Radial diffusion of toroidally trapped particles induced by lower hybrid and fast waves
[IPPCZ-327] p 1996 N94-21593

ALTERNATING CURRENT
Operational Requirements Document (ORD) for the Alternating Current/Direct Current (AC/DC) clamp-on ammeter, mE-563
[AD-A271808] p 1751 N94-20555
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092

ALTIMETERS
Comparative hypsometric analysis of both Earth and Venus topographic distributions p 2108 N94-20722

ALTIMETRY
Magellan at Venus: Summary of science findings p 2110 N94-20734

ALTITUDE
Worldwide frequency of temperatures at selected altitudes
[AD-A271111] p 1864 N94-19908
ALTITUDE CONTROL
Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20627
ALUMINIDES
Fundamentals of mechanical behavior in structural intermetallics: A synthesis of atomistic and continuum modeling
[DE93-019166] p 1690 N94-20232
Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines
[AD-A272998] p 1648 N94-21268
Evaluation of the fabricability of advanced iron aluminide-clad austenitic stainless steel tubing
[DE93-040598] p 1693 N94-21771
Ni3Al aluminide alloys
[DE94-000493] p 1694 N94-21933
Investigation of moisture-induced embrittlement of iron aluminides
[DE93-040841] p 1695 N94-21949
Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides
[DE93-040600] p 1697 N94-22559
ALUMINUM
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite p 2086 N94-20902
Experimental study of void formation during aluminum solidification in reduced gravity
[NASA-TM-106190] p 1692 N94-21604
Evaluation of non-chromium-containing deoxidizers for aluminum
[DE94-001377] p 1695 N94-21978
Gamma ray spectrometry of LDEF samples: Results of 1992 analyses
[DE94-001177] p 1684 N94-22046
ALUMINUM ALLOYS
Investigation of austenitic alloys for advanced heat recovery and hot gas cleanup systems
[DE93-017863] p 1687 N94-19802
On the experimental determination of low order structure factors in TiAl by energy filtered convergent beam electron diffraction
[DE93-019521] p 1687 N94-19806
Innovative acoustic technique for studying new materials and new developments in solid state physics
[AD-A270540] p 2013 N94-19933
The use of backscattered electron imaging mode to assess the effect of fine dispersions on development of superplastic microstructure in Al-Mg alloys
[AD-A272426] p 1691 N94-21258
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments
[NASA-TM-106439] p 1713 N94-21760
Evaluation of the fabricability of advanced iron aluminide-clad austenitic stainless steel tubing
[DE93-040598] p 1693 N94-21771
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948
First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21964
Transferable tight-binding parameters: An application to Ni and Ni-Al alloys
[DE94-001044] p 1695 N94-22023
Surface modification of Ti3Al for improved oxidation resistance
[DE93-018297] p 1696 N94-22034
ALUMINUM ARSENIDES
High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805
Temperature dependence of optical properties of AlAs, studied by in-situ spectroscopic ellipsometry
p 2023 N94-20999
Synthesis and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229
ALUMINUM COATINGS
Evaluation of non-chromium-containing deoxidizers for aluminum
[DE94-001377] p 1695 N94-21978
ALUMINUM GALLIUM ARSENIDES
Variable angle of incidence spectroscopic ellipsometric study of semiconductor multilayer structures
p 2020 N94-20982
Ellipsometric measurements of molecular-beam-epitaxy-grown semiconductor multilayer thicknesses: A comparative study p 1710 N94-20983
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis
p 1710 N94-20984
Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry
p 1796 N94-20985
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Optical measurement of built-in and applied electric fields in Al(x)Ga(1-x)As/GaAs heterostructures
p 1796 N94-20989
In-situ spectroscopic ellipsometry for real time semiconductor growth monitor p 2024 N94-21003
Real-time analysis of in-situ spectroscopic ellipsometric data during MBE growth of III-V semiconductors
p 2024 N94-21004
Dephasing processes in III-V semiconductors
[AD-A271677] p 2028 N94-21362
ALUMINUM ISOTOPES
Aluminum-26 activities in meteorites
p 1686 N94-20851
ALUMINUM OXIDES
Dynamic, multiaxial impact response of confined and unconfined ceramic rods
[DE93-040057] p 1829 N94-19824
Sol-spray preparation, particulate characteristics, and sintering of alumina powders
[DE93-018577] p 1690 N94-20183
Guanidine based vehicle/binders for use with oxides, metals, and ceramics
[NASA-CASE-LEW-15314-1] p 1700 N94-20195
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging
p 2082 N94-20659
Alumoxanes: Rationalization of black box materials
[AD-A272805] p 1704 N94-21170
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191
On one numerical approach to Stefan problem
[IPPCZ-330] p 1996 N94-21572
Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025
Surface modification of Ti3Al for improved oxidation resistance
[DE93-018297] p 1696 N94-22034
ALUMINUM SILICATES
Self diffusion of alkaline-Earth in Ca-Mg-aluminosilicate melts: Experimental improvements on the determination of the self-diffusion coefficients p 1684 N94-20669
ALUMINUM 26
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona
p 1863 N94-20889
ALUMINUM-LITHIUM ALLOYS
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions
[AD-A272658] p 1691 N94-21188
The mechanical property data base from an Air Force/industry cooperative test program on advanced aluminum alloys: 2091 sheet, plate, and 8090 extrusion
[AD-A273091] p 1692 N94-21525
AMAZON REGION (SOUTH AMERICA)
The use of satellite images in Amazonian archaeology: A case study in the Upper Rio Negro Basin
p 1838 N94-20954
The 7th Brazilian Remote Sensing Symposium, volume 2 p 1838 N94-20956
The 7th Brazilian Remote Sensing Symposium, volume 3 p 1839 N94-20960
Sunphotometer network for monitoring aerosol properties in the Brazilian Amazon p 1839 N94-20961
AMBIGUITY
Representation of idioms in connectionist models
p 1940 N94-20247
Procedural dynamic semantics, verb-phrase ellipsis, and presupposition
[CWI-CS-R9311] p 1914 N94-21495
AMIDES
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924
High resolution infrared spectroscopy of formamide and deuterated formamide in a molecular beam
[AD-A271986] p 1973 N94-20618
Theoretical studies of the structures and electronic properties of U(NH2)(sub 3) and Np(NH2)(sub 3)
[DE94-000768] p 2031 N94-21857
AMINES
Physical chemistry of energetic nitrogen compounds
[AD-A271819] p 1712 N94-20625
Stress-induced cracking of fluorocarbon rubber MTL-0002 after exposure to DS-2
[AD-A271753] p 1705 N94-21302
AMINO ACIDS
Development of bioelastic material for aspects of wound repair
[AD-A272000] p 1892 N94-21503
AMMETERS
Operational Requirements Document (ORD) for the Alternating Current/Direct Current (AC/DC) clamp-on ammeter, mE-563
[AD-A271808] p 1751 N94-20555
A new innovative instrument for space plasma instrumentation
[NASA-CR-194736] p 1666 N94-21780
AMMONIUM COMPOUNDS
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
AMMONIUM NITRATES
Monopropellant aqueous hydroxyl ammonium nitrate/fuel
[AD-D015922] p 1712 N94-20061
Growth and morphology of crystals: Theory and observations
[PB93-221166] p 2035 N94-22273
AMORPHOUS MATERIALS
Research on defects and transport in amorphous-silicon-based semiconductors
[DE93-017117] p 2013 N94-19939
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
Characterization of amorphous material in shocked quartz by NMR spectroscopy
[DE93-019069] p 1679 N94-20307
C/O atomic ratios in micrometer-size crushed grains from Antarctic micrometeorites and two carbonaceous meteorites* p 2082 N94-20678
InP MIS structures with diamondlike amorphous carbon films deposited by ion-beam sputtering and from plasma
p 1710 N94-20979
Interfacial properties of diamondlike amorphous carbon films on InP: Metal-insulator-semiconductor structures
p 1710 N94-20980
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
Alumoxanes: Rationalization of black box materials
[AD-A272805] p 1704 N94-21170
Fabrication of amorphous diamond films
[DE94-000404] p 2032 N94-21960
AMORPHOUS SILICON
Growth mechanisms and characterization of hydrogenated amorphous-silicon-alloy films
[DE93-018202] p 1699 N94-20047
Development of a numerical simulation model for a-Si:H solar cells and application to the analysis of experimentally obtained spectral characteristics
[ETN-93-95061] p 1846 N94-20151
Characterization of amorphous material in shocked quartz by NMR spectroscopy
[DE93-019069] p 1679 N94-20307
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615
Stable, high-efficiency amorphous-silicon solar cells with low hydrogen content
[DE93-018214] p 1848 N94-21826
Annual Report, Materials Science Branch, FY 1992
[DE94-000204] p 1849 N94-22015
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE93-018220] p 1850 N94-22257
AMPHIBOLES
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800
High D/H ratios of water in magmatic amphiboles in Chassigny: Possible constraints on the isotopic composition of magmatic water on Mars
p 2134 N94-20662
AMPLIFICATION
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
AMPLIFIERS
Y-Ba-Cu-O superconducting/GaAs semiconducting hybrid circuits for microwave applications
p 1735 N94-20514

AMPOULES
Growth of zinc selenide single crystals by physical vapor transport in microgravity
[NASA-CR-194679] p 2017 N94-20346
ANALOG CIRCUITS
Fault detection in digital and analog circuits using an i(DD) temporal analysis technique p 1757 N94-21106
ANALOG DATA
VLSI mixed signal processing system p 1744 N94-21100
An optically-assisted 3-D cellular array machine
[AD-A272683] p 1987 N94-21163
ANALOG TO DIGITAL CONVERTERS
A SCSI-bus data acquisition system for nuclear spectroscopy experiments
[USIP-92-03] p 2042 N94-20193
Rotary encoding device using polygonal mirror with diffraction gratings on each facet
[NASA-CASE-GSC-13543-1] p 1985 N94-20240
Control vane guidance for a ducted-fan unmanned air vehicle
[AD-A271957] p 1645 N94-20561
Proton radiation testing of an 18 bit A/D converter p 1755 N94-21096
Adaptive analog video signal conditioner p 1744 N94-21099
Analog/digital pH meter system I.C. p 1764 N94-21701
An 18 bit 50 kHz ADC for low earth orbit p 1764 N94-21702
A high speed CMOS A/D converter p 1767 N94-21726
Surface acquisition through virtual milling p 1920 N94-22372
ANALOGIES
Characterization of Minnesota lunar simulant for plant growth p 1897 N94-20665
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459
ANALYSIS OF VARIANCE
A retrieval error analysis technique for passive infrared atmospheric sounders
[AD-A272618] p 1867 N94-21212
ANGIOGRAPHY
Coronary angiography outcomes of US Army aircrew with the finding of coronary artery calcifications: Aviation epidemiology data register
[AD-A271968] p 1891 N94-20615
Center for X-Ray Optics, 1992
[DE94-000726] p 1990 N94-21868
ANGLE OF ATTACK
Effects of thrust vector control on the performance of the aerobang orbital plane change maneuver
[AD-A272532] p 1646 N94-21418
ANGLES (GEOMETRY)
Multiple-wavelength angle-of-incidence ellipsometry: Application to silicon nitride-gallium arsenide structures p 2019 N94-20974
Thin film compositional analysis using null or fixed wavelength ellipsometry p 1709 N94-20976
Variable wavelength, variable angle ellipsometry including a sensitivities correlation test p 1710 N94-20978
Variable angle of incidence spectroscopic ellipsometric study of semiconductor multilayer structures p 2020 N94-20982
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
Micro-ellipsometric measurements of strained layer structures p 2025 N94-21008
Fundamentals and applications of variable angle spectroscopic ellipsometry p 1687 N94-21011
ANGULAR DISTRIBUTION
Angular distributions of high-order ATI
[DE93-019125] p 1972 N94-20230
Direct images of thermal disorder in the Cl-Si and H-O-Si chemisorption bond on Si(100)
[AD-A272386] p 1680 N94-21145
ANGULAR MOMENTUM
Physical chemistry of energetic nitrogen compounds
[AD-A271819] p 1712 N94-20625
Formation of the low-mass solar nebula p 2109 N94-20728
Variety in planetary systems p 2086 N94-20871
ANGULAR VELOCITY
The angular velocity spread of REB induced by magnetic field discontinuity
[IPPCZ-331] p 1996 N94-21573
ANIMALS
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930
Self-Motion Perception and Motion Sickness
[NASA-CR-194276] p 1885 N94-21897
Current status: Animal models of nausea p 1889 N94-21915
ANIMATION
Visualizing the universe, part 2 p 2063 N94-22472
ANISOTROPIC FLUIDS
Liquid crystal displays p 1752 N94-20634
ANISOTROPY
Innovative acoustic technique for studying new materials and new developments in solid state physics
[AD-A270540] p 2013 N94-19933
A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454
Method for anisotropic etching in the manufacture of semiconductor devices
[NASA-CASE-MSC-21631-1] p 1993 N94-20491
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions
[AD-A272658] p 1691 N94-21188
Mapping robust parallel multigrid algorithms to scalable memory architectures p 1922 N94-21483
Using the rule of mixtures to examine the hardness of Cu/Cu-Zr multilayers
[DE94-001068] p 1697 N94-22402
ANNEALING
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4
[DE93-018050] p 1689 N94-20182
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
Refractive index behaviour of phosphorus-doped planar silica waveguides, appendix 7 p 1989 N94-21601
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo)
[DE93-041320] p 1694 N94-21943
Microtextural characterization of annealed and deformed copper
[DE93-040144] p 1695 N94-21990
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025
Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176
Melt-spin processing of high (Tc) oxide superconductors
[DE94-000896] p 2036 N94-22582
ANNIHILATION REACTIONS
IR materials producibility
[AD-A273031] p 1987 N94-21321
ANNUAL VARIATIONS
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Satellite validation of GCM-simulated annual cycle of the Earth radiation budget and cloud forcing p 1860 N94-22287
The seasonal variation of the cloud radiative forcing: Comparison of ECHAM model simulations with ERBE data p 1860 N94-22288
Use of satellite data for validation of the ECHAM models p 1861 N94-22289
ANNULAR FLOW
Measurement and prediction of the flow through an annular turbine cascade
[AD-A272530] p 1803 N94-21417
ANNULI
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
ANODES
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells
[DE93-019536] p 1847 N94-21650
ANODIC COATINGS
A comparison of sulfuric acid/boric acid anodize and chromic acid anodize processes
[AD-A271933] p 1703 N94-20614
ANODIZING
A comparison of sulfuric acid/boric acid anodize and chromic acid anodize processes
[AD-A271933] p 1703 N94-20614
Evaluation of non-chromium-containing deoxidizers for aluminum
[DE94-001377] p 1695 N94-21978
ANOMALIES
The Coulomb anomaly in strongly disordered films
[AD-A271095] p 2012 N94-19849
ANORTHOSITE
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
U-Pb isotopic ages and characteristics of ancient (greater than 4.0 Ga) lunar highland rocks p 2104 N94-20700
U-Pb isotopic systematics of ferroan anorthosite 60025 p 1685 N94-20702
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis p 2118 N94-20779
The Mg-suite and the highland crust: An unsolved enigma p 2126 N94-20822
ANTARCTIC REGIONS
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435
Aluminum-26 activities in meteorites p 1686 N94-20851
Notes on Antarctic aviation
[AD-A273018] p 1651 N94-21239
ANTENNA ARRAYS
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-194724] p 1897 N94-20336
Two microstrip arrays for interferometric SAR applications p 1722 N94-20421
Optical beam forming techniques for phased array antennas p 1727 N94-20442
Mobile antenna development at JPL p 1731 N94-20457
Mobile terminal antennas for helicopters p 1731 N94-20458
Four-channel HF receiving antenna array simulator
[AD-A271876] p 1732 N94-20471
Use of the Weiss-Weinstein bound to compare the direction-finding performance of sparse arrays
[AD-A272582] p 1738 N94-21210
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
Analysis of the TDRS multiple access system for possible use as an attitude control system sensor p 1666 N94-21338
Array Simulations Platform (ASP) predicts NASA Data Link Module (NDLM) performance p 1744 N94-21348
Linearly tapered slot antenna circular array for mobile communications
[NASA-TM-106441] p 1769 N94-21808
Radiation and scattering from printed antennas on cylindrically conformal platforms
[NASA-CR-194703] p 1741 N94-21885
Scattering by cavity-backed antennas on a circular cylinder p 1741 N94-21886
Radiation by cavity-backed antennas on a circular cylinder p 1741 N94-21887
User manual for EXCALIBUR: A FE-BI numerical laboratory for cavity-backed antennas in a circular cylinder, version 1.2 p 1741 N94-21888
Adaptive synthesis of a ray diagram for an antenna array p 1745 N94-22160
ANTENNA COMPONENTS
Recent activities in printed Antennas at LeRC p 1722 N94-20422
ANTENNA COUPLERS
Aperture coupling of circular cylindrical dielectric resonator antenna
[ISBN-0-315-60632-0] p 1743 N94-22409
ANTENNA DESIGN
Recent activities in printed Antennas at LeRC p 1722 N94-20422
Multi-band reflector antenna with double-ring element frequency selective subreflector p 1728 N94-20447
Mobile antenna development at JPL p 1731 N94-20457
Mobile terminal antennas for helicopters p 1731 N94-20458
Linearly tapered slot antenna with dielectric superstrate p 1734 N94-20505

Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264
Radiation by cavity-backed antennas on a circular cylinder p 1741 N94-21887
User manual for EXCALIBUR: A FE-BI numerical laboratory for cavity-backed antennas in a circular cylinder, version 1.2 p 1741 N94-21888
Adaptive synthesis of a ray diagram for an antenna array p 1745 N94-22160
Aperture coupling of circular cylindrical dielectric resonator antenna
[ISBN-0-315-60632-0] p 1743 N94-22409
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583

ANTENNA FEEDS
Slot-coupled patch antenna with coplanar waveguide feed p 1734 N94-20506

ANTENNA RADIATION PATTERNS
Probe compensation in cylindrical near-field scanning: A novel simulation methodology p 1718 N94-20404
Recent activities in printed Antennas at LeRC p 1722 N94-20422
Multi-band reflector antenna with double-ring element frequency selective subreflector p 1728 N94-20447
Linearly tapered slot antenna with dielectric superstrate p 1734 N94-20505
A 10 GHz Y-Ba-Cu-O/GaAs hybrid oscillator proximity coupled to a circular microstrip patch antenna p 1736 N94-20517
Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264
Array Simulations Platform (ASP) predicts NASA Data Link Module (NDLM) performance p 1744 N94-21348
Adaptive synthesis of a ray diagram for an antenna array p 1745 N94-22160
Numerical method for computing the electric field produced by a microwave beam in a stratified medium p 1746 N94-22197
Applications of planar near-field measurements to electromagnetic radiation and interference problems p 1747 N94-22252
Aperture coupling of circular cylindrical dielectric resonator antenna
[ISBN-0-315-60632-0] p 1743 N94-22409

ANTICYCLONES
The life cycles of intense cyclonic and anticyclonic circulation systems observed over oceans
[NASA-CR-194760] p 1865 N94-20353

ANTIEMETICS AND ANTINAUSEANTS
Susceptibility of the squirrel monkey to different motion conditions p 1885 N94-21899

ANTIFERROMAGNETISM
Spin-polaron theory of high-(Tc) superconductivity. 1: Spin polarons and high (Tc) pairing
[DE93-019196] p 2014 N94-20002
Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21762
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768
Photo- and thermal-induced antiferromagnetic interlayer coupling in Fe/(Fe-Si) superlattices
[DE93-040822] p 2031 N94-21930
Orientationally independent antiferromagnetic coupling in epitaxial Fe/Cr (211) and (100) superlattices
[DE94-001270] p 2035 N94-22564

ANTIGRAVITY
System test results of the Advanced Technology Anti-G Suit (ATAGS)
[AD-A271535] p 1896 N94-20914

ANTIICING ADDITIVES
Compatibility and efficacy of biocides qualified under military specification MIL-S-53021
[AD-A271496] p 1712 N94-20551

ANTIMONY COMPOUNDS
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835

ANTIPROTONS
A study of events with the highest total transverse energy in CDF
[DE93-019904] p 1978 N94-19972
The cross section for the production of b(bar-b) pairs in p(bar p) collisions at the square root of s equals 1.8 TeV
[DE93-019900] p 1972 N94-20225

ANVIL CLOUDS
Are tropical cirrus brighter than mid-latitude cirrus? p 1881 N94-22343

APERTURES
Evaluation of a single stage of the LADS filter
[AD-A271101] p 1814 N94-19851
A summary of studies of particle stability at RHIC
[DE93-040173] p 1970 N94-19868
Aperture determination of RHIC92 from randomly generated initial coordinates
[DE93-040174] p 1978 N94-19945
Study of possible energy upgrade for the ALS and modeling of the real lattice for the diagnosis of lattice problems
[DE93-040286] p 2016 N94-20323
Probe compensation in cylindrical near-field scanning: A novel simulation methodology p 1718 N94-20404
A compact, portable EHF/SHF antenna for advanced SCAMP
[AD-A272614] p 1739 N94-21211
Stability of beam in the Fermilab Main Injector
[DE94-000619] p 1982 N94-21934
Formulation for numerical solution of radiation and transmission from arbitrary apertures p 1745 N94-22140

APL (PROGRAMMING LANGUAGE)
APL-technology of computer simulation p 1923 N94-22077

APOLLO ASTEROIDS
Clementine: An inexpensive mission to the Moon and Geographos p 1652 N94-20765

APPLICATION SPECIFIC INTEGRATED CIRCUITS
Quartz/fused silica chip carriers
[NASA-CR-194154] p 2016 N94-20340
An ASIC memory buffer controller for a high speed disk system p 1754 N94-21089
Mongoose: Creation of a Rad-Hard MIPS R3000 p 1754 N94-21090
Synthesis algorithm of VLSI multipliers for ASIC p 1758 N94-21116
Automated synthesis and verification of configurable DRAM blocks for ASIC's p 1759 N94-21123
Automated radiation hard ASIC design tool p 1759 N94-21126
A DRAM compiler algorithm for high performance VLSI embedded memories p 1767 N94-21729

APPLICATIONS PROGRAMS (COMPUTERS)
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
An introduction to GUGA in the COLUMBUS Program System
[DE93-018994] p 1902 N94-19928
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
Design and implementation of a prototype PC based graphical and interactive MILSATCOM requirements database system
[AD-A272960] p 1658 N94-21251
The Test Analysis Retrieval System (TARS): Meeting the challenges of the network's test processes p 1933 N94-21337
The Automated Conflict Resolution System (ACRS) p 1744 N94-21341
Use of computers in the instruction of integral calculus
[AD-A272500] p 1913 N94-21409
Compatibility evaluation and research on the Computerized Adaptive Screening Test (CAST): User and programmer's guide
[AD-A273112] p 1894 N94-21510
Users manual for the NASA Lewis three-dimensional ice accretion code (LEWICE 3D)
[NASA-TM-105974] p 1642 N94-21590
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777
User's guide for the casting process simulator software CaPS-2D, version 1.0
[DE93-040398] p 1917 N94-21923
The Soviet software market: Current state and aspects of development p 1923 N94-22066
Application development in a PC/LAN environment p 1923 N94-22067
Three original programmes for managers p 1923 N94-22083
Reverse automatic differentiation of modular FORTRAN programs
[DE94-000336] p 1918 N94-22088
Radio wave propagation studies along an Earth-space satellite link
[ISBN-0-315-60627-4] p 1742 N94-22408
A feasibility study of a parallax-based passive missile approach warning system
[ISBN-0-315-60640-1] p 1743 N94-22410
Passenger terminal simulation model
[ISBN-0-315-61113-8] p 1652 N94-22423
An object-oriented data reduction system in Fortran p 2046 N94-22447
Database activity in the Italian Astronet: DIRA 2 p 2047 N94-22452
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461
Programmability in AIPS++ p 1926 N94-22482
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485
The HEASARC graphical user interface p 1926 N94-22487
The application of artificial intelligence to astronomical scheduling problems p 1949 N94-22492
HST PSF simulation using Tiny Tim p 1926 N94-22498
The Keck Task Library (KTL) p 2048 N94-22504
SKYMAP: Exploring the Universe in software p 1927 N94-22511
IRAF in the nineties p 2048 N94-22535
DECONV-TOOL: An IDL based deconvolution software package p 1927 N94-22542
MOSAIC: Software for creating mosaics from collections of images p 1927 N94-22543
ROSAT data analysis with EXSAS p 2080 N94-22555

APPROACH
Parallel runway requirement analysis study. Volume 2: Simulation manual
[NASA-CR-191549-VOL-2] p 1644 N94-22278

APPROACH CONTROL
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277

APPROACH INDICATORS
Techniques used for the analysis of oculometer eye-scanning data obtained from an air traffic control display
[NASA-CR-191559] p 1643 N94-21629
Application of scattering by arrays of cylinders to MLS signal propagation error estimation p 1644 N94-22135

APPROXIMATION
Stochastic optimization by simulation: Numerical experiments with M/M/1 queue in steady-state
[AD-A271143] p 1949 N94-19854
Approximate methods for N-component solute transport and ion-exchange
[CWI-NM-R9223] p 1910 N94-21078
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164
Measure fields for function approximation
[AD-A272660] p 1964 N94-21215
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
Interface reflection of spherical acoustic waves in the first- and second-order rational parabolic approximations and their artifacts
[PB93-215424] p 1969 N94-22261
Extinction efficiencies from DDA calculations solved for finite circular cylinders and disks p 1880 N94-22340

APTITUDE
Extracting information from wrong answers in computerized adaptive testing
[AD-A272832] p 1894 N94-21434

AQUEOUS SOLUTIONS
Monopropellant aqueous hydroxyl ammonium nitrate/fuel
[AD-D015922] p 1712 N94-20061
Briny lakes on early Mars? Terrestrial intracrater playas and Martian candidates p 2145 N94-21675
Swelling equilibria for cationic 2-hydroxyethyl methacrylate (HEMA)-based hydrogels
[DE94-000728] p 1707 N94-21856

AQUIFERS
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351

ARAMID FIBER COMPOSITES
Aragatz project samples experiment/MAPOL (polymer materials) experiment: Postflight expert evaluation p 1660 N94-21378

ARC DISCHARGES
Two dimensional simulation of the electric arc behavior in a cut-off device
[ECL-92-41] p 1751 N94-20595

ARC JET ENGINES
Performance potential of plasma thrusters: Arcjet and Hall thruster modeling
[AD-A271085] p 1667 N94-19847

ARC LAMPS
Miniature color display, phase 4
[AD-A272920] p 1760 N94-21221

ARCHAEOLOGY
The 7th Brazilian Remote Sensing Symposium, volume 1 p 1838 N94-20953
The use of satellite images in Amazonian archaeology: A case study in the Upper Rio Negro Basin p 1838 N94-20954

ARCHITECTURE (COMPUTERS)
Global combine on mesh architectures with wormhole routing
[DE93-018792] p 1903 N94-19959
A software architecture for the construction and management of real-time virtual worlds
[AD-A271465] p 1904 N94-20091
A modular design for connectionist parsing
p 1941 N94-20252
M-dimensional computer memory with M-1 dimensional hyperplane access
[AD-D015960] p 1898 N94-20357
Electronic neural network for solving traveling salesman and similar global optimization problems
[NASA-CASE-NPO-17807-2-CU] p 1942 N94-20360
Algorithm/architecture study for artificial neural nets
[AD-A271820] p 1943 N94-20626
Measuring the effects of thread placement on the Kendall Square KSR1
[DE93-040655] p 1908 N94-20932
Analysis and evaluation of configuring of graphical systems on multiprocessor architectures
[ETN-93-93618] p 1930 N94-21018
Reduction of network cost and wiring in Ranade's butterfly routing
[CWI-CS-R9243] p 1930 N94-21023
The Fifth NASA Symposium on VLSI Design
[NASA-CR-194644] p 1753 N94-21079
An ASIC memory buffer controller for a high speed disk system p 1754 N94-21089
High performance MPEG-audio decoder IC
p 1744 N94-21092
Multiple-fold clustered processor mesh array
p 1757 N94-21113
A novel VLSI processor architecture for supercomputing arrays p 1758 N94-21115
A fixed/variable bit-rate data compression architecture
p 1759 N94-21128
Scheduling for locality in shared-memory multiprocessors
[AD-A272948] p 1930 N94-21228
Decoupled computer architectures for very high-speed technologies
[AD-A271646] p 1900 N94-21301
Using manufacturing message specification for monitor and control at Venus p 1932 N94-21333
MAYGEN: A symbolic debugger generation system
[AD-A272512] p 1913 N94-21413
Analysis of multigrid methods on massively parallel computers: Architectural implications
p 1938 N94-21468
The 1992 4th NASA SERC Symposium on VLSI Design
[NASA-CR-194591] p 1763 N94-21694
A 20 MHz CMOS reorder buffer for a superscalar microprocessor p 1764 N94-21700
Instruction set commutivity p 1766 N94-21719
On fast carry select adders p 1767 N94-21726
A novel cache mechanism p 1767 N94-21730
A 1 GHz sample rate, 256-channel, 1-bit quantization, CMOS, digital correlator chip p 1768 N94-21732
A real time correlator architecture using distributed arithmetic principles p 1768 N94-21734
Simulated behaviour of large scale SCI rings and tori
[DE93-040149] p 1935 N94-21745
Physics Detector Simulation Facility (PDSF) architecture/utilization
[DE93-019744] p 1936 N94-21919
Robotic concepts for operation in barren terrain
[DE93-040539] p 1946 N94-21925
System architectures for banking applications
p 2046 N94-22057
VLSI architectures for the new (T,L) algorithm
p 1745 N94-22110
Addition of decimal numbers in optical computing architecture by Walsh coded digits p 1773 N94-22122
A pyramid neural network architecture for stereo fusion p 1785 N94-22201
Acceleration of backpropagation learning using a parallel DSP machine p 1786 N94-22206
Image convolution using the Myrias SPS-2 parallel computer p 1786 N94-22207
Architectures of the free space optical interconnects
p 1789 N94-22220
Space Generic Open Avionics Architecture (SGOAA) standard specification
[NASA-CR-188269] p 1666 N94-22275
A comparison of IDEF1X and NIAM ISDM
[DE93-040899] p 1921 N94-22363
A neural network prototyping package within IRAF
p 1949 N94-22451
VETA x ray data acquisition and control system
p 2047 N94-22455
Integrating a local database into the StarView distributed user interface p 2048 N94-22530
IRAF and STSDAS under the new ALPHA architecture
p 2049 N94-22553
ARGON
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870
Energy gain spectroscopic study of Ar(q+)-Ar collisions at 40 qeV
[DE93-040284] p 1970 N94-19871
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19987
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111
Low-energy ion implantation: Large mass fractionation of argon p 1685 N94-20697
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
ARGON ISOTOPES
SCR neon and argon in Kapoeta feldspar: Evidence for an active ancient Sun p 2105 N94-20712
Age and thermochronology of K-feldspars from the Manson Impact Structure p 1863 N94-20899
ARGON PLASMA
Impact of copper vapour contamination on argon arcs
p 1994 N94-21053
Opacity measurements in shock-generated argon plasmas
[DE94-001057] p 1998 N94-22399
ARIANE LAUNCH VEHICLE
Turbine design p 1668 N94-20075
The Vulcain cryogenic engine p 1668 N94-20077
ARID LANDS
The 7th Brazilian Remote Sensing Symposium, volume 1 p 1838 N94-20953
Application of SPOT to GIS/LIS in land capability evaluation for regional planning of JAICO semi-arid region of Piaui, Brazil p 1838 N94-20955
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663
ARITHMETIC
Correctness properties for iterated hardware structures p 1759 N94-21124
Arithmetic in large GF(2(exp n)) p 1760 N94-21131
A package for long integer arithmetic on the Cray Y-MP
[CWI-NM-R9227] p 1916 N94-21612
A novel cache mechanism p 1767 N94-21730
A real time correlator architecture using distributed arithmetic principles p 1768 N94-21734
On the discovery of approximate arithmetic relations by backpropegation networks p 1782 N94-22181
Vanishing theorem on arithmetic surfaces
[PB93-215481] p 1961 N94-22263
ARITHMETIC AND LOGIC UNITS
Formal verification of an ALU p 1772 N94-22114
ARMED FORCES (UNITED STATES)
Compatibility evaluation and research on the Computerized Adaptive Screening Test (CAST): User and programmer's guide
[AD-A273112] p 1894 N94-21510
ARMOR
Hypervelocity impact
[AD-A272957] p 1831 N94-21249
An assessment of the cost of microwave sintering ceramic tiles for armor applications
[DE94-000978] p 1693 N94-21350
Dynamic properties of ceramic materials
[DE94-000654] p 1708 N94-21963
AROMATIC COMPOUNDS
High melting amino aromatic nitrate esters
[AD-D015929] p 1711 N94-19801
Direct aromatization of methane
[DE93-040631] p 1678 N94-19890
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
ARRAYS
Metal-glass composite field-emitting arrays
[AD-D015942] p 1673 N94-20064
A unified approach to VLSI layout automation and algorithm mapping on processor arrays
p 1759 N94-21127
A cost-effective methodology for the design of massively-parallel VLSI functional units
p 1760 N94-21132
A software environment for the exploitation of the MAR image sensor p 1785 N94-22200
ARTERIES
Coronary angiography outcomes of US Army aircrew with the finding of coronary artery calcifications: Aviation epidemiology data register
[AD-A271968] p 1891 N94-20615
Review of using cardiac fluoroscopy in symptomatic and asymptomatic patients
[AD-A271690] p 1891 N94-20928
ARTICULATION (SPEECH)
Recognizing hesitation phenomena in continuous, spontaneous speech p 1746 N94-22210
ARTIFICIAL INTELLIGENCE
Building brains for bodies
[AD-A270531] p 1939 N94-19875
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
Self-organization via active exploration in robotic applications. Phase 2: Hybrid hardware prototype
[NASA-CR-194723] p 1939 N94-20212
Connectionism and Natural Language Processing
[MEMO-INF-92-64] p 1940 N94-20242
Speech synthesis with artificial neural networks
p 1743 N94-20245
Believing in the basis of the evidence
[TR-438] p 2039 N94-20364
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session)
[AD-A272125] p 1942 N94-20573
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610
Simulating a user's preferences: Towards automated artificial evolution for computer generated images
[AD-A272058] p 1942 N94-20621
Causal reconstruction
[AD-A271692] p 1908 N94-20929
AIDA: A graphical interactive system, adapted to the user
[ETN-93-93792] p 1908 N94-21020
Lecture notes in artificial intelligence 689: The 7th International Symposium on Methodologies for Intelligent Symposium (ISMIS 1993)
[AD-A271768] p 1944 N94-21162
Computing with Bayesian multi-networks
[AD-A273106] p 1914 N94-21501
Reentry vehicle adaptive telemetry
[DE94-001168] p 1656 N94-21852
Controlling multisupplier operations by intelligent EDI
p 1744 N94-22076
Manufacturing and information technology
p 2046 N94-22082
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101
Language as primary dimension of distributed AI systems activity p 1776 N94-22141
Cascaded recursive artificial neural networks
p 1780 N94-22167
The application of artificial intelligence to astronomical scheduling problems p 1949 N94-22492
ARTIFICIAL SATELLITES
The NRL LACE program
[AD-A270861] p 1657 N94-19896
ASBESTOS
Asbestos characterization using scanning electron microscopy/light element x ray spectrometry
[AD-A271611] p 1681 N94-21241
ASPECT RATIO
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles
p 1721 N94-20416
ASSAYING
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049
ASSESSMENTS
Manual of DRANC (release 1.1): A computer program for the Dutch risk assessment of new chemical substances
[PB93-194827] p 1851 N94-19998
ASSOCIATIVE PROCESSING (COMPUTERS)
Connectionism and Natural Language Processing
[MEMO-INF-92-64] p 1940 N94-20242
Generalization performance of backpropagation learning on a syllabification task p 1940 N94-20246
Representation of idioms in connectionist models
p 1940 N94-20247
A connectionist representation for phrase structures
p 1941 N94-20249
Hopfield models as neural-network acceptors
p 1941 N94-20250
A modular design for connectionist parsing
p 1941 N94-20252
An exploration of clause boundary effects in SRN representations p 1937 N94-20253
ASTEROID BELTS
IMPS albedo and diameter for Asteroid 243 Ida
p 2085 N94-20845

Equilibrium models of mass distribution and collisional lifetimes of asteroids p 2086 N94-20877

ASTEROIDS

Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648

Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729

Diffusive redistribution of water vapor in the solar nebula revisited p 2113 N94-20751

Research program on the Manson impact structure, Iowa p 1862 N94-20766

Linear structures on the small inner satellites of Saturn p 2121 N94-20797

Determining the composition of olivine on asteroidal surfaces p 1686 N94-20805

A new Antarctic meteorite with chromite, orthopyroxene and metal with reference to a formation model of S asteroids p 2084 N94-20813

IMPS albedo and diameter for Asteroid 243 Ida p 2085 N94-20845

Comparison of visible and near-infrared reflectance spectra of CM2 carbonaceous chondrites and primitive asteroids p 2085 N94-20848

The Clementine Mission science return at the Moon and Geographos p 1652 N94-20850

Equilibrium models of mass distribution and collisional lifetimes of asteroids p 2086 N94-20877

ASTROMETRY

Database activity in the Italian Astronet: DIRA 2 p 2047 N94-22452

ASTRONAUTS

Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01 [NASA-TM-109344] p 1653 N94-20192

ASTRONOMICAL CATALOGS

IMPS albedo and diameter for Asteroid 243 Ida p 2085 N94-20845

Development and operations of the Astrophysics Data System [NASA-CR-194691] p 2043 N94-21270

Archiving data from ground-based telescopes p 2046 N94-22442

The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446

Database activity in the Italian Astronet: DIRA 2 p 2047 N94-22452

PHOTCAL: The IRAF photometric calibration package p 1925 N94-22465

SKYMAP: Exploring the Universe in software p 1927 N94-22511

The EXOSAT database and archive p 2048 N94-22521

Guide star catalogue data retrieval software 2 p 1927 N94-22533

Recommendations for a service framework to access astronomical archives p 2049 N94-22537

StarView: The object oriented design of the ST DADS user interface p 2049 N94-22548

Miyun 232 MHz survey 1: Fields centered at: alpha:00(h)41(m), delta:41 deg 12 min and alpha: 07(h)00(m),delta:35 deg 00 min p 2080 N94-22554

ASTRONOMICAL MAPS

CCD surface photometry of galaxies p 2058 N94-22445

Data indexing techniques for the EUVE all-sky survey p 2048 N94-22503

SKYMAP: Exploring the Universe in software p 1927 N94-22511

ASTRONOMICAL MODELS

Variety in planetary systems p 2086 N94-20871

New production mechanisms for unstable nuclei in stars, supernovae, and the big bang [DE93-018627] p 2081 N94-21618

CCD surface photometry of galaxies p 2058 N94-22445

C++, objected-oriented programming, and astronomical data models p 2063 N94-22473

Helical kink instability of jets from young stellar objects p 2008 N94-22686

Fragmentation of magnetized filamentary interstellar clouds p 2008 N94-22687

Gravitational instability of magnetized filamentary clouds. 2: Rotation p 2009 N94-22689

Magnetic fields in spiral galaxies p 2010 N94-22697

ASTRONOMICAL OBSERVATORIES

Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts [NASA-TM-108245] p 2057 N94-22438

A neural network prototyping package within IRAF p 1949 N94-22451

The ADAM environment and transputers p 1926 N94-22494

CCD data acquisition systems at Lick and Keck Observatories p 2047 N94-22495

The spectral world coordinate systems in IRAF/NOAO p 2049 N94-22539

SPECFOCUS: An IRAF task: for focusing spectrographs p 1965 N94-22540

Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552

IRAF and STSDAS under the new ALPHA architecture p 2049 N94-22553

ROSAT data analysis with EXSAS p 2080 N94-22555

ASTRONOMICAL PHOTOGRAPHY

How is WFPC flat field made p 1926 N94-22484

Efficient transfer of images over networks p 1748 N94-22517

SkiCAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546

ASTRONOMICAL PHOTOMETRY

Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging p 2101 N94-20685

Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data p 2101 N94-20686

Surface photometry of the shell galaxy NGC 2865 [ISBN-0-315-60441-7] p 2056 N94-22412

How to handle 6GBytes a night and not get swamped p 2058 N94-22444

CCD surface photometry of galaxies p 2058 N94-22445

How is WFPC flat field made p 1926 N94-22484

ASTRONOMICAL POLARIMETRY

Solar imaging vector magnetograph [NASA-CR-194729] p 1810 N94-21876

ASTRONOMICAL SPECTROSCOPY

Goniospectrometric properties of a white standard p 1684 N94-20684

Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730

Deep near-infrared survey of the Southern Sky (DENIS) p 2062 N94-22467

The extreme ultraviolet explorer archive p 2047 N94-22468

ASTRONOMY

Multi Wave Link: An interactive database for co-ordination of multiwavelength programs [NASA-CR-194778] p 2043 N94-21055

Laser guide star adaptive optics: Present and future [DE93-018642] p 1989 N94-21619

Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts [NASA-TM-108245] p 2057 N94-22438

Scientific computing in the 1990ies: An astronomical perspective p 2057 N94-22440

Multifrequency data analysis software on STARLINK p 1925 N94-22443

GUIs in the MIDAS environment p 2047 N94-22449

Database activity in the Italian Astronet: DIRA 2 p 2047 N94-22452

Seeing the forest for the trees: Networked workstations as a parallel processing computer p 1938 N94-22454

Experiments with recursive estimation in astronomical image processing p 2047 N94-22457

An IDL-based analysis package for COBE and other skycube-formatted astronomical data p 1925 N94-22471

Electronic publishing and intelligent information retrieval p 2047 N94-22479

Intelligent text retrieval in the NASA astrophysics data system p 2048 N94-22499

Evaluation of RDBMS packages for use in astronomy p 2048 N94-22514

NASA's astrophysics archives at the National Space Science Data Center p 2049 N94-22541

MOSAIC: Software for creating mosaics from collections of images p 1927 N94-22543

STELAR: An experiment in the electronic distribution of astronomical literature p 2049 N94-22544

The STARLINK software collection p 1927 N94-22545

Pair plasmas in the galactic center region and in Nova Muscae p 2009 N94-22691

ASTROPHYSICS

High energy physics program at Texas A/M University [DE93-041089] p 1980 N94-20933

Development and operations of the Astrophysics Data System [NASA-CR-194691] p 2043 N94-21270

Advanced far infrared detectors [DE93-040289] p 1968 N94-21526

Symmetry-dictated trucation: Solutions of the spherical shell model for heavy nuclei [DE94-000482] p 1976 N94-21961

The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446

NASA's astrophysics archives at the National Space Science Data Center p 2049 N94-22541

Fourth International Toki Conference on Plasma Physics and Controlled Nuclear Fusion [ESA-SP-351] p 2000 N94-22624

Thermal properties and radiation processes in astrophysical plasmas p 2002 N94-22640

ASYMMETRY

The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV [DE93-019903] p 1976 N94-21847

Likelihood analysis of parity violation in the compound nucleus [DE94-000671] p 1977 N94-22572

ASYMPTOTES

Asymptotic behavior of Fourier transform of surface measures on convex and radial hypersurfaces [ETN-93-93790] p 1952 N94-21019

ASYMPTOTIC GIANT BRANCH STARS

Molecular equilibria and condensation sequences in carbon rich gases p 2083 N94-20756

AGB stars as a source of short-lived radioactive nuclei in the solar nebula p 2133 N94-20859

ASYMPTOTIC METHODS

Asymptotic analysis: Basic concepts and definitions [DE94-001000] p 1961 N94-22393

Orthogonalization method for determination of boundary layer receptivity coefficients [ISBN-0-315-83426-9] p 1805 N94-22580

ASYMPTOTIC PROPERTIES

Large deviations behavior of counting processes and their inverses [AD-A271142] p 1939 N94-19909

Asymptotics of the GLRT for the disorder problem in diffusion processes [INRIA-RR-1735] p 1951 N94-20227

On estimation and testing in Poisson regression models with over-dispersion [MEMO-1083] p 1963 N94-21076

Universality in blow-up for non linear heat equations [PB93-215465] p 2038 N94-22095

Asymptotic analysis: Basic concepts and definitions [DE94-001000] p 1961 N94-22393

ASYMPTOTIC SERIES

Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised) [PB93-215432] p 1969 N94-22262

Asymptotic analysis. Working Note No. 2, approximation of integrals [DE94-000433] p 1961 N94-22381

Asymptotic analysis: Basic concepts and definitions [DE94-001000] p 1961 N94-22393

ATLANTIC OCEAN

On the sources of North Atlantic deep water [AD-A270854] p 1881 N94-19895

The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991 [AD-A271175] p 1864 N94-20186

Processing of climatological data for model initialization [AD-A271878] p 1865 N94-20487

ATMOSPHERIC & OCEANOGRAPHIC INFORM SYS

Offshore decision support system: ERS-1 pilot project WAVEWATCH [BCRS-92-09] p 1865 N94-20532

ATMOSPHERIC ATTENUATION

Obtaining surface optical properties from space-based lidar systems [AD-A272831] p 1987 N94-21172

ATMOSPHERIC BOUNDARY LAYER

Refractive index structure in the lower atmosphere [AD-A270935] p 1854 N94-19899

Four-dimensional remote sensing of the marine boundary layer with a digital beamforming radar wind profiler [AD-A270627] p 1882 N94-20564

Models of refraction in the marine atmosphere surface layer [AD-A271724] p 1858 N94-21357

Marine boundary layer model evaluation by using a height gain measurement technique in the interference region p 1777 N94-22145

Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar p 1874 N94-22310

Cloud boundaries during FIRE 2 p 1876 N94-22318

ATMOSPHERIC CHEMISTRY

Parameters affecting hydrogen chloride measurements [AD-A271326] p 1851 N94-20025

Laboratory studies of low temperature rate coefficients: The atmospheric chemistry of the outer planets [NASA-CR-193485] p 1972 N94-20130

Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects [DE93-019525] p 1855 N94-20220

Research in progress: FY 1992
[DE94-000410] p 1836 N94-20936
Evolution of the Martian atmosphere
p 2146 N94-21680
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21969
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384
Mass spectrometer-pyrolysis experiment for atmospheric and soil sample analysis on the surface of Mars p 1812 N94-22435

ATMOSPHERIC CIRCULATION
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
Dynamics Explorer 2: Continued FPI and NACS instrument data analysis and associated scientific activity at the University of Michigan
[NASA-CR-194689] p 1857 N94-20173
Modeling of interactions between biosphere and atmosphere on the global scale
[NASA-CR-193423] p 1837 N94-20205
The life cycles of intense cyclonic and anticyclonic circulation systems observed over oceans
[NASA-CR-194760] p 1865 N94-20353
Incorporation and comparative evaluation of a non-convective cloud parameterization scheme in the Naval Research Laboratory west coast mesoscale weather prediction model
[AD-A272417] p 1867 N94-21146
Analysis of a sandstorm weather process-translation
[AD-A272959] p 1867 N94-21250
Large-scale circulation regimes and tropical cyclone characteristics over the western pacific ocean
[AD-A273004] p 1867 N94-21307
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
Vertical velocity in cirrus case obtained from wind profiler p 1878 N94-22330
Dynamical characteristics of cirrus clouds from aircraft and radar measurements p 1878 N94-22332

ATMOSPHERIC COMPOSITION
Collisional processes involving atmospheric gases
[AD-A270729] p 1854 N94-19954
Remote sounding of tropospheric minor constituents
[NASA-CR-194265] p 1855 N94-20132
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate
p 2108 N94-20723
Stratospheric Aerosol and Gas Experiment (SAGE 3)
p 1869 N94-21644
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth
p 2143 N94-21667
Mars atmosphere loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape
p 2144 N94-21672
Possible solutions to the problem of channel formation on early Mars p 2144 N94-21673
Evolution of the Martian atmosphere
p 2146 N94-21680
Studies in remotely sensed geophysical parameter retrieval and analysis
[NASA-CR-194768] p 1842 N94-22374
Determination of Martian soil mineralogy and water content using the Thermal Analyzer for Planetary Soils (TAPS) p 1812 N94-22433
Mass spectrometer-pyrolysis experiment for atmospheric and soil sample analysis on the surface of Mars p 1812 N94-22435

ATMOSPHERIC CORRECTION
Global and regional comparative performance of linear and nonlinear satellite multichannel sea surface temperature algorithms
[AD-A270475] p 1837 N94-20028
Laser guide star adaptive optics: Present and future
[DE93-018642] p 1989 N94-21619
Comparisons of downwelling radiation to model predictions based on groundbased measurements during FIRE 1991 p 1876 N94-22320

ATMOSPHERIC EFFECTS
Dynamics of large scale impacts on Venus and Earth
p 2098 N94-20666
Pressure versus drag effects on crater size
p 1862 N94-20742
Searching for ancient Venus p 2111 N94-20743
A study of carbonates, sulfates, and phosphates using thermal emission spectroscopy p 1686 N94-20868
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations
[NASA-CR-194802] p 1837 N94-20951
Standard atmospheres for engagement modeling
[AD-A272447] p 1858 N94-21207

ATMOSPHERIC ELECTRICITY
Predicting lightning events in the KSC area: A feasibility study using single station data
[AD-A271440] p 1864 N94-20088

ATMOSPHERIC ENTRY
Micrometeorite dynamic pyrometamorphism: Nonstoichiometric clinoenstatite (CLEN)
p 2083 N94-20715
Micrometeorite dynamic pyrometamorphism: Observation of a thermal gradient in iron-nickel sulfide
p 2083 N94-20716
Effects of thrust vector control on the performance of the aerobang orbital plane change maneuver
[AD-A272532] p 1646 N94-21418
Entry velocities at Mars and Earth for short transit times
[AD-A272591] p 1865 N94-21420

ATMOSPHERIC ENTRY SIMULATION
High temperature simulation chambers. Physico-chemical and thermal effect of atmospheric reentry on ceramic materials p 1653 N94-21404
A method of measuring the thermoradiative properties of ceramic materials in a space environment
p 1665 N94-21405
Material properties and behavior during simulated atmospheric reentry p 1665 N94-21408

ATMOSPHERIC GENERAL CIRCULATION MODELS
Study of regional climate change
[DE93-018926] p 1850 N94-19941
Modeling of interactions between biosphere and atmosphere on the global scale
[NASA-CR-193423] p 1837 N94-20205
The CSIRO 9-level atmospheric general circulation model
[CSIRO-TP-26] p 1855 N94-20256
Orbit and sampling requirements: TRMM experience
p 1870 N94-21647
Proceedings of the Workshop on New Generation of Radiation Budget Measurements From Space and Their Use in Climate Modelling and Diagnostic Studies
[MPIM-90] p 1860 N94-22283
Satellite validation of GCM-simulated annual cycle of the Earth radiation budget and cloud forcing
p 1860 N94-22287
The seasonal variation of the cloud radiative forcing: Comparison of ECHAM model simulations with ERBE data p 1860 N94-22288
Use of satellite data for validation of the ECHAM models p 1861 N94-22289
Simulation of clear-sky outgoing longwave radiation over the oceans using operational analysis
p 1861 N94-22290
Use of satellite data for validation of operational forecast models and operational analyses p 1861 N94-22291
Analysis of the tropospheric water distribution during FIRE 2 p 1876 N94-22324
Three dimensional modeling of cirrus during the 1991 FIRE IFO 2: Detailed process study
p 1877 N94-22327
Cirrus cloud development in a mobile upper tropospheric trough: The November 26th FIRE cirrus case study
p 1878 N94-22329

ATMOSPHERIC HEATING
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
Possible solutions to the problem of channel formation on early Mars p 2144 N94-21673

ATMOSPHERIC LASERS
The NRL LACE program
[AD-A270861] p 1657 N94-19896

ATMOSPHERIC MODELS
Clouds: Their prediction and simulation
[AD-A271161] p 1864 N94-19900
Worldwide frequency of temperatures at selected altitudes
[AD-A271111] p 1864 N94-19908
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951
Intrusion of stratospheric ozone in the troposphere through tropopause folding and cold air droplets
[REPT-87] p 1851 N94-20154
Scientific development of a massively parallel ocean climate model
[DE93-019446] p 1855 N94-20219
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
Processing of climatological data for model initialization
[AD-A271878] p 1865 N94-20487
Global blackout following the K/T Chicxulub impact: Results of impact and atmospheric modeling
p 1854 N94-20698
Incorporation and comparative evaluation of a non-convective cloud parameterization scheme in the Naval Research Laboratory west coast mesoscale weather prediction model
[AD-A272417] p 1867 N94-21146
Standard atmospheres for engagement modeling
[AD-A272447] p 1858 N94-21207
NOVAM evaluation utilizing electro-optics and meteorological data from KEY-90
[AD-A271722] p 1868 N94-21356
Models of refraction in the marine atmosphere surface layer
[AD-A271724] p 1858 N94-21357
Development and tests of a cloud physics parameterization for real-time aviation and public numerical weather forecasting
[PB93-202711] p 1868 N94-21427
Climate forcings and feedbacks p 1869 N94-21641
Fluvial valleys in the heavily cratered terrains of Mars: Evidence for paleoclimatic change?
p 2144 N94-21670
Evolution of the Martian atmosphere
p 2146 N94-21680
Empirical wind model for the middle and lower atmosphere. Part 2: Local time variations
[NASA-TM-104592] p 1870 N94-21862
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21969
Marine boundary layer model evaluation by using a height gain measurement technique in the interference region p 1777 N94-22145
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
Spectral variation of scattering and absorption by cirrus p 1876 N94-22321
Mesoscale simulations of the November 25-26 and December 5-6 cirrus cases using the RAMS model
p 1878 N94-22331
Importance of aggregation and small ice crystals in cirrus clouds, based on observations and an ice particle growth model p 1879 N94-22336
Calibration of radiation codes in climate models: Comparison of calculations with observations from the SPECtral Radiation Experiment (SPECTRE)
p 1879 N94-22337
Investigation of the effects of the macrophysical and microphysical properties of cirrus clouds on the retrieval of optical properties: Results for FIRE 2
p 1880 N94-22339
Extinction efficiencies from DDA calculations solved for finite circular cylinders and disks p 1880 N94-22340
Remote sensing estimates of cirrus particle size for tropical and midlatitude cirrus: Hexagonal crystals and ice spheres p 1880 N94-22342
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384

ATMOSPHERIC MOISTURE
Predicting lightning events in the KSC area: A feasibility study using single station data
[AD-A271440] p 1864 N94-20088
Atmospheric moisture collection device
[AD-D015935] p 1865 N94-20332
Atmospheric infrared sounder
[NASA-CR-194814] p 1856 N94-20362
Stratospheric Aerosol and Gas Experiment (SAGE 3)
p 1869 N94-21644
A documentation of icing relevant cloud physical parameters on horizontal soundings of stratiform clouds (continuation)
[DLR-MITT-92-10] p 1871 N94-22280
Microphysical properties of the November 26 cirrus cloud retrieved by Doppler radar/IR radiometer technique
p 1873 N94-22304
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
Observations of multi-layered clouds using K-band radar p 1874 N94-22311
Analysis of the GOES 6.7 micrometer channel observations during FIRE 2 p 1875 N94-22316

Analysis of the tropospheric water distribution during FIRE 2 p 1876 N94-22324
Three dimensional modeling of cirrus during the 1991 FIRE IFO 2: Detailed process study p 1877 N94-22327
Estimation of cirrus cloud particle fallspeeds from vertically pointing Doppler radar p 1879 N94-22333
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study p 1879 N94-22335

ATMOSPHERIC PHYSICS
Convergence of the hermite wavelet expansion [AD-A271435] p 1854 N94-19841
Collisional processes involving atmospheric gases [AD-A270729] p 1854 N94-19954
Remote sounding of tropospheric minor constituents [NASA-CR-194265] p 1855 N94-20132
Accuracy requirements --- for monitoring of climate changes p 1869 N94-21642
Multiorder etalon sounder (MOES) development and test for balloon experiment [NASA-CR-194730] p 1859 N94-22026
Meteorological analysis of the December 4-6 FIRE cirrus-2 case p 1875 N94-22314
CO2 lidar observations of Mount Pinatubo debris: FIRE 2 and longer-term measurements p 1876 N94-22323

ATMOSPHERIC PRESSURE
Pressure versus drag effects on crater size p 1862 N94-20742
Are Plinian type eruptions possible on Venus? p 2123 N94-20803
Alumoxanes: Rationalization of black box materials [AD-A272805] p 1704 N94-21170

ATMOSPHERIC RADIATION
The analysis of global cloud and radiation data for the study of cloud-climate interactions [NASA-CR-193388] p 1865 N94-20535
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649

ATMOSPHERIC REFRACTION
Refractive index structure in the lower atmosphere [AD-A270935] p 1854 N94-19899
Sporadic-E observations during LoVHF transionospheric direction finder measurements [AD-A270619] p 1716 N94-19951
Models of refraction in the marine atmosphere surface layer [AD-A271724] p 1858 N94-21357

ATMOSPHERIC SCATTERING
Refractive index structure in the lower atmosphere [AD-A270935] p 1854 N94-19899
Low-power millimeter-wave radar observations of the atmosphere [NASA-CR-194738] p 1858 N94-21811
Spectral variation of scattering and absorption by cirrus p 1876 N94-22321

ATMOSPHERIC SOUNDING
Atmospheric infrared sounder [NASA-CR-194814] p 1856 N94-20362
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model [AD-A267947] p 1865 N94-20482
A retrieval error analysis technique for passive infrared atmospheric sounders [AD-A272618] p 1867 N94-21212
Validation of the design of a high resolution all-reflection Michelson interferometer for atmospheric spectroscopy [AD-A272505] p 1987 N94-21410
Multiorder etalon sounder (MOES) development and test for balloon experiment [NASA-CR-194730] p 1859 N94-22026
A documentation of icing relevant cloud physical parameters on horizontal soundings of stratiform clouds (continuation) [DLR-MITT-92-10] p 1871 N94-22280
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2 p 1872 N94-22298
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Lidar and radar derived cirrus microphysical properties for the 26 November 1991 case study p 1873 N94-22305
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
CIMSS FIRE research activities p 1873 N94-22307
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308
A numerical technique for the calculation of cloud optical extinction from lidar p 1874 N94-22309
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312
SSH-2 measurements of cirrus at 18-28 micrometers from the King Air during FIRE 2 p 1880 N94-22338
An overview of the radiation component of the NASA TOGA-COARE experiment p 1881 N94-22344
Temperature/pressure and water vapor sounding with microwave spectroscopy p 1812 N94-22436

ATMOSPHERIC TEMPERATURE
Worldwide frequency of temperatures at selected altitudes [AD-A271111] p 1864 N94-19908
Atmospheric infrared sounder [NASA-CR-194814] p 1856 N94-20362
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312

ATMOSPHERIC TIDES
Interactions of free modes, tides, and gravity waves in the middle atmosphere [REPT-84] p 1855 N94-20155

ATMOSPHERIC TURBULENCE
Coherent lidar design and performance verification [NASA-CR-193813] p 1816 N94-20341
Measurement of mesospheric turbulence in the framework of the metal campaign and development of a sensor for static pressure free measurements of neutral and electron density [BONN-IR-92-45] p 1857 N94-21149
Long-range laser imaging [AD-A273020] p 1817 N94-21253
Areally averaged estimates of surface heat flux from ARM field studies [DE93-018569] p 1859 N94-22036

ATOM CONCENTRATION
Energy storage and conversion in solid hydrogen [AD-A271439] p 1845 N94-20086
Laser diagnostics of RF hydrogen plasma reactors: Application to the processing of III-V materials [AD-A272659] p 1994 N94-21214

ATOMIC COLLISIONS
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy [DE93-040283] p 1970 N94-19870
Interactions of slow H, H2, and H3 with thin foils [DE93-040263] p 1976 N94-21995

ATOMIC EXCITATIONS
Angular distributions of high-order ATI [DE93-019125] p 1972 N94-20230
Optical luminescence spectroscopy as a probe of the surface mineralogy of Mars p 1813 N94-22437

ATOMIC INTERACTIONS
Measurements of atomic interactions and frequency stability with a cryogenic hydrogen maser [AD-A271132] p 1814 N94-19853
Collisions of molecules with clusters: A quasiclassical study [DE93-018614] p 1971 N94-20050

ATOMIC PHYSICS
Uncertainty limited atomic position measurement using optical fields [AD-A271013] p 1970 N94-19822
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers [DE94-000303] p 1694 N94-21944

ATOMIC RECOMBINATION
Energy storage and conversion in solid hydrogen [AD-A271439] p 1845 N94-20086

ATOMIC STRUCTURE
A Green function method for calculation of atomic and electronic properties of isolated adsorbate atoms [ETN-93-95055] p 2014 N94-20018
The metallic bond for monolayer transition metal layers on transition metal surfaces [DE93-019060] p 1691 N94-20313
In-situ electrochemical surface science [AD-A265942] p 1680 N94-20330
Molecular and atomic arrays in nano- and mesoporous materials synthesis [AD-A271500] p 2017 N94-20544
Scanning tunneling microscopy investigations of metal dichalcogenide materials [AD-A272910] p 2027 N94-21242
IR materials producibility [AD-A273031] p 1987 N94-21321
Structure and morphology of Pd overlayers on epitaxial SnO2 films studies with the atomic force microscope [AD-A271827] p 2028 N94-21458
Local structure and superconductivity in La(2-x)Ba(x)CuO4 for x=0.125 and x=0.15 [DE93-040193] p 2029 N94-21555
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters [DE93-040184] p 1975 N94-21766
Theoretical studies of the structures and electronic properties of U(NH2)(sub 3) and Np(NH2)(sub 3) [DE94-000768] p 2031 N94-21857
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers [DE94-000303] p 1694 N94-21944
First principles calculations for analysis martensitic transformations [DE94-000666] p 1695 N94-21984
Transferable tight-binding parameters: An application to Ni and Ni-Al alloys [DE94-001044] p 1695 N94-22023
Theoretical research program to study chemical reactions in AOTV bow shock tubes [NASA-CR-194710] p 1804 N94-22027
Low temperature absorption spectra and ground state electronic structure of tetrakis(2,6-di-tert-butylphenoxide)uranium(IV) [DE94-000774] p 2035 N94-22387
Theoretical studies of structural phase transitions in actinide metals [DE94-000796] p 1696 N94-22388
Positron annihilation study of Sr Doping in La(2-x)Sr(x)CuO4 [DE94-000307] p 2036 N94-22594

ATOMIC WEIGHTS
The atomic weight and isotopic composition of boron and their variation in nature [DE93-019046] p 1682 N94-21631

ATOMIZERS
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization [PB93-206597] p 1826 N94-22093

ATOMS
C/O atomic ratios in micrometer-size crushed grains from Antarctic micrometeorites and two carbonaceous meteorites p 2082 N94-20678
Direct detection of atomic ions from molecular photofragmentation during nonresonant multiphoton ionization of sputtered species [DE93-040886] p 1976 N94-21951

ATROPINE
Physiological correlates of stress-induced decrements in human perceptual performance [DOT/FAA/AM-93/19] p 1893 N94-20081

ATTENTION
Toward a neurobiological theory of visual attention [AD-A270724] p 1890 N94-20112

ATTENUATION COEFFICIENTS
Quantitative evaluation of material composition of composites using x ray energy-dispersive NDE technique [DE93-041157] p 1672 N94-19888
Variable wavelength, variable angle ellipsometry including a sensitivities correlation test p 1710 N94-20978
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG) [DE93-040546] p 1709 N94-21970
A numerical technique for the calculation of cloud optical extinction from lidar p 1874 N94-22309

ATTENUATORS
Manual design technique for broadband passive thin-film attenuators using the Smith chart p 1782 N94-22178

ATTITUDE (INCLINATION)
Automatic AVHRR image navigation software [NASA-CR-194602] p 1643 N94-20148
Analysis of the TDRS multiple access system for possible use as an attitude control system sensor p 1666 N94-21338

ATTITUDE CONTROL
Pointing control design for autonomous space vehicle applications [DE93-019943] p 1657 N94-19863
Analysis of the TDRS multiple access system for possible use as an attitude control system sensor p 1666 N94-21338

ATTITUDE INDICATORS
Multisensor pinhole yawsonde [AD-A271715] p 1808 N94-20930

ATTITUDE STABILITY
Improvement of helicopter attitude stability by active control of the conventional swash plate [NASA-CR-194786] p 1650 N94-20524

AUDIO DATA
High performance MPEG-audio decoder IC p 1744 N94-21092
The Amsterdam hypermedia model: Extending hypertext to support real multimedia [CWI-CS-R9306] p 2045 N94-21536

AUDIO FREQUENCIES
Sub-band adaptive noise cancelling p 1774 N94-22125

AUDIO SIGNALS
Detection of emetic activity in the cat by monitoring venous pressure and audio signals
p 1886 N94-21903
AUDITORY DEFECTS
Journal of rehabilitation research and development, volume 30, number 1, 1993
[AD-A272956] p 1893 N94-21613
AUDITORY PERCEPTION
Segmentation and frequency domain ML pitch estimation of speech signals p 1747 N94-22212
AUGER EFFECT
Segregation of Si to the surface of Fe-29Ni-17Co alloy
[DE93-040053] p 1687 N94-19864
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
AUGER SPECTROSCOPY
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944
AUGMENTATION
Enhanced software for the GT1022 automated gaging system
[DE94-001374] p 1918 N94-21977
AURORAL IONIZATION
Theory of leaked auroral kilometric radiation
p 2003 N94-22649
AURORAL ZONES
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A272685] p 1857 N94-21189
Studies of electromagnetic ion cyclotron waves using AMPTE/CCE and Dynamics Explorer
[NASA-CR-194711] p 1982 N94-21878
AURORAS
Implications of Viking dayside auroral measurements
[ISBN-0-315-83273-8] p 1861 N94-22575
AUSTENITIC STAINLESS STEELS
Investigation of austenitic alloys for advanced heat recovery and hot gas cleanup systems
[DE93-017863] p 1687 N94-19802
Rapid heating tensile testing update: 304L stainless steel
[DE93-018770] p 1688 N94-19942
Evaluation of the fabricability of advanced iron aluminide-clad austenitic stainless steel tubing
[DE93-040598] p 1693 N94-21771
Proceedings of the Seventh Annual Conference on Fossil Energy Materials
[DE94-001091] p 1848 N94-21823
AUTOCORRELATION
Particle dispersion in turbulent sprays
[AD-A271314] p 1796 N94-19913
Partial empirical autocorrelation of a vectorial chronological series
[RR-896-M] p 1963 N94-20162
Fast scalar algorithms for multivariate partial correlations and their empirical counterparts
[RR-903-M] p 1905 N94-20201
Applications of correlator chips in radio science
p 1763 N94-21695
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457
SPECFOCUS: An IRAF task for focusing spectrographs p 1965 N94-22540
DECONV-TOOL: An IDL based deconvolution software package p 1927 N94-22542
AUTOMATA THEORY
Closure properties of stochastic languages
[TR-441] p 1907 N94-20521
Space-efficient deterministic simulation of probabilistic automata
[TR-463] p 1900 N94-21281
Computerized simulations with cellular automates for cloud formation
[GKSS-92/E/22] p 1867 N94-21312
Manufacturing and information technology
p 2046 N94-22082
AUTOMATIC CONTROL
Pointing control design for autonomous space vehicle applications
[DE93-019943] p 1657 N94-19863
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Massachusetts Institute of Technology Lincoln Laboratory Journal volume 6, number 1, Spring 1993
[AD-A272273] p 1737 N94-20944
Internal camera calibration using rotation and geometric shapes
[AD-A272718] p 1808 N94-21167
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416
The Milling assistant, case-based Reasoning, and machining strategy: A report on the development of automated numerical control programming systems at New Mexico State University
[DE93-041101] p 2029 N94-21690
Cognitive engineering in aerospace applications
[NASA-CR-194782] p 1647 N94-21819
Automating the control of robotic systems in unstructured environments
[DE93-040753] p 1946 N94-21929
AUTOMATIC GAIN CONTROL
Software implementation of an adaptive digital automatic level control p 1773 N94-22124
AUTOMATIC PILOTS
Low-cost Unmanned Air Vehicle (UAV) for oceanographic research
[AD-A273103] p 1646 N94-21507
AUTOMATIC TEST EQUIPMENT
Design and test of field programmable gate arrays in space applications p 1765 N94-21710
AUTOMATION
A unified approach to VLSI layout automation and algorithm mapping on processor arrays
p 1759 N94-21127
AUTOMOBILE ENGINES
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597] p 1826 N94-22093
AUTOMOBILE FUELS
Technology to prevent greenhouse effect gases
[DE94-707420] p 1851 N94-20116
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597] p 1826 N94-22093
AUTOMOBILES
Some evidence on determinants of fuel economy as a function of driving cycle and test type
[DE93-019511] p 1825 N94-21637
Traffic noise in a roundabout way
p 1966 N94-21799
Ceramic Technology Project
[DE94-001011] p 1707 N94-21822
AUTONOMOUS NAVIGATION
A software architecture for a small autonomous underwater vehicle navigation system
[AD-A272322] p 1643 N94-21037
AUTOREGRESSIVE PROCESSES
Partial empirical autocorrelation of a vectorial chronological series
[RR-896-M] p 1963 N94-20162
AVALANCHE DIODES
Improvement of the performance of IMPATT oscillators through appropriate modification of resonant-cap activity
p 1782 N94-22179
AVIONICS
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[DOT/FAA/RD-93/22] p 1642 N94-20051
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
Handbook. Volume 2: Digital systems validation. Chapter 18: Avionic data bus integration technology
[DOT/FAA/CT-88/10-VOL-2] p 1647 N94-20343
Space Generic Open Avionics Architecture (SGOAA) standard specification
[NASA-CR-188269] p 1666 N94-22275
Towards the formal verification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191466] p 1937 N94-22414
AXIAL FLOW
Particle dispersion in turbulent sprays
[AD-A271314] p 1796 N94-19913
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
The effect of transverse curvature on the fluctuating wall pressure and structure of boundary layer turbulence
[AD-A271868] p 1800 N94-20486
AXIAL LOADS
A benchmark study of 2D and 3D finite element calculations simulating dynamic pulse buckling tests of cylindrical shells under axial impact
[DE93-018859] p 1829 N94-19940
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Improvements to a method for the geometrically nonlinear analysis of compressively loaded stiffened composite panels
[NASA-CR-194715] p 1832 N94-21814
AXIAL STRAIN
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
AXONS
The role of axon-Schwann cell interactions in nervous system ionic homeostasis
[AD-A270936] p 1890 N94-20045
Theoretical and numerical examinations of nonlinear parameter dependent advanced differential difference equations
[ETN-93-93681] p 1952 N94-21042
AZIMUTH
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
A motion extraction method for synthetic aperture radars
[DLR-FB-92-31] p 1742 N94-22279
AZO COMPOUNDS
Efficiency of reversible optical storage in azo polymers
[AD-A272923] p 1705 N94-21223
The 13C-NMR spectra of poly (4-((2-(acryloyloxy) ethyl) ethyl amino)- 4-nitroazobenzene-co-methyl methacrylate)
[AD-A273016] p 1705 N94-21238
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
Azo polymers for optical storage 3: Effect of film thickness on net phase retardation and writing speed
[AD-A272994] p 1705 N94-21267
Optically induced birefringence in copolymers and blends containing azobenzene groups
[AD-A273085] p 1706 N94-21523

B

B STARS
Circumstellar environments of Be stars at infra-red and radio wavelengths
[ISBN-0-315-83135-9] p 2081 N94-22426
BACKGROUND NOISE
Evaluation of a nonlinear method for the enhancement of tonal signal detection
[NASA-CR-191562] p 1968 N94-21741
BACKGROUND RADIATION
The NRL LACE program
[AD-A270861] p 1657 N94-19896
A deep x ray survey in the Lockman hole and the soft x ray log N - log S
[NASA-CR-194698] p 2054 N94-20174
CERN-derived analysis of lunar radiation backgrounds
p 2080 N94-20880
Visualizing the universe, part 1 p 2064 N94-22476
BACKSCATTERING
Radar backscatter measurements from simulated sea ice during CRRELEX 1990
[AD-A271034] p 1715 N94-19823
An assessment of COMSCAN, a Compton backscatter imaging camera, for the one-sided non-destructive inspection of aerospace components
[AD-A271331] p 1806 N94-19837
Study of electromagnetic wave scattering from characterized rough surfaces
[AD-A270931] p 1716 N94-19934
Time-of-flight heavy ion backscattering spectrometry
[DE93-019067] p 1973 N94-20306
Coherent lidar design and performance verification
[NASA-CR-193813] p 1816 N94-20341
A general rough-surface inversion algorithm: Theory and application to SAR data p 1719 N94-20407
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408
Relating ground truth collection to model sensitivity
p 1719 N94-20409
Determination of noise equivalent sigma(0) using highly correlated repeat-pass SAR images
p 1720 N94-20411
ERS-1 and Seasat scatterometer measurements of ocean winds: Model functions and the directional distribution of short waves p 1720 N94-20412
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Polarimetric backscattering from sea ice
p 1723 N94-20426
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430
Retrieval of ice thickness from polarimetric SAR data
p 1724 N94-20432
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign
p 1725 N94-20434
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992
p 1725 N94-20435

Near grazing scattering from non-Gaussian ocean surfaces p 1726 N94-20438
Second order distorted born approximation for backscattering from a layer of discrete random medium p 1728 N94-20448
Symmetry in polarimetric remote sensing p 1729 N94-20449
Application of neural network to remote sensing of soil moisture using theoretical polarimetric backscattering coefficients p 1730 N94-20455
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A271911] p 1882 N94-20489
The coherent backscattering opposition effect p 1991 N94-20646
Magellan vertical polarization radar observations p 1744 N94-20691
Combined backscatter Moessbauer spectrometer/x ray fluorescence analyzer (BaMS/XRF) for extraterrestrial surfaces p 1686 N94-20761
Scattering by Venus' surface p 2117 N94-20771
Earth-based measurement of lunar topography using delayed radar interferometry p 2119 N94-20787
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
Obtaining surface optical properties from space-based lidar systems
[AD-A272831] p 1987 N94-21172
The use of backscattered electron imaging mode to assess the effect of fine dispersions on development of superplastic microstructure in Al-Mg alloys
[AD-A272426] p 1691 N94-21258
Airborne surface backscattering strength measurements in the western Atlantic Ocean
[AD-A271737] p 1883 N94-21358
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals p 1871 N94-22295
CO2 lidar observations of Mount Pinatubo debris: FIRE 2 and longer-term measurements p 1876 N94-22323
A Backscatter Moessbauer Spectrometer (BaMS) for use on Mars p 1811 N94-22431

BACKWARD FACING STEPS
On the prediction of multigrid efficiency through local mode analysis p 1959 N94-21486

BALANCING
Analysis and design of weight balancing system for laser velocimetry traverse
[AD-A271171] p 1816 N94-20546

BALL BEARINGS
Detailed study of oxidation/wear mechanism in lox turbopump bearings
[NASA-TM-108434] p 1825 N94-21580

BALLISTIC MISSILES
Standard atmospheres for engagement modeling
[AD-A272447] p 1858 N94-21207
High-velocity interceptors for boost-phase intercepts
[DE94-001077] p 1965 N94-22403

BALLOON FLIGHT
Balloon exploration of the northern plains of Mars near and north of the Viking 2 landing site p 2092 N94-20401

BALLOON SOUNDING
Multiorder etalon sounder (MOES) development and test for balloon experiment
[NASA-CR-194730] p 1859 N94-22026

BALLOON-BORNE INSTRUMENTS
Concept report: Experimental vector magnetograph (EXVM) operational configuration balloon flight assembly
[NASA-CR-194702] p 1638 N94-21776
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights
[NASA-CR-194709] p 2056 N94-22281

BALLOONING MODES
Continuum damping of ideal toroidal Alfven eigenmodes
[DE94-001233] p 1998 N94-22560

BANACH SPACE
Modular interval spaces
[PB93-220663] p 1961 N94-22266

BAND STRUCTURE OF SOLIDS
Photoelectron spectroscopy at model boundary surfaces of energy converter semiconductors/electrolyte contacts: Adsorption, coadsorption, and triadsorption of Br2, Na, and H2O on Van der Waals surfaces of metal chalocogenide semiconductors
[ETN-93-95063] p 2015 N94-20152
The x ray microprobe determination of chromium oxidation state in olivine from lunar basalt and kimberlitic diamonds p 1686 N94-20807
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A272955] p 2027 N94-21248

BANDPASS FILTERS
Y-Ba-Cu-O superconducting/GaAs semiconducting hybrid circuits for microwave applications p 1735 N94-20514
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617
Examinations of a thallium atomic vapor filter for a Raman temperature lidar
[GKSS-92/E/13] p 1857 N94-21044

BANDWIDTH
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-194724] p 1897 N94-20336
Delivery of very high bandwidth with ATM switches and SONET
[DE93-019432] p 1899 N94-20476
Bandwidth enhancement of dielectric resonator antennas p 1734 N94-20507
On-board closed-loop congestion control for satellite based packet switching networks
[NASA-TM-106446] p 1656 N94-21581
Simulated behaviour of large scale SCI rings and tori
[DE93-040149] p 1935 N94-21745
Reentry vehicle adaptive telemetry
[DE94-001168] p 1656 N94-21852
Evaluation of DEC's GIGAswitch for distributed parallel computing
[DE94-001356] p 1936 N94-21853

BARIUM
Electron quantum yields from a barium photocathode illuminated with polarized light
[DE93-019232] p 1980 N94-20475

BARIUM COMPOUNDS
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505

BARIUM OXIDES
Local structure and superconductivity in La(2-x)Ba(x)CuO4 for x=0.125 and x=0.15
[DE93-040193] p 2029 N94-21555
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931

BARIUM TITANATES
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
Optical processing in photorefractive media p 1789 N94-22222

BARRIER LAYERS
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry p 2022 N94-20992

BARYONS
High-energy astrophysics: A theoretical analysis of thermal radiation from neutron stars
[NASA-CR-194808] p 2055 N94-20952
New production mechanisms for unstable nuclei in stars, supernovae, and the big bang
[DE93-018627] p 2081 N94-21618
A relativistic constituent quark model
[DE93-041085] p 1946 N94-21689
Searching for high baryon density at the AGS with ARC
[DE93-041155] p 1975 N94-21693

BASALT
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Petrogenesis of Apollo 12 mare basalts. Part 2: An open system model to explain the pigeonite basalt compositions p 1684 N94-20645
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Strength and deformation properties of basaltic lava flows on planetary surfaces p 1862 N94-20747
Lunar basalt meteorite EET 87521: Petrology of the clast population p 2083 N94-20752
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
FE-60 and the evolution of eucrites p 2083 N94-20768
Chronology and genesis of high-Ti mare volcanism: Melting of cogenetic depleted and enriched reservoirs p 2118 N94-20777
Geology and deposits of the Serenitatis basin p 2119 N94-20786
The U-Th-Pb, Sm-Nd, and Ar-Ar isotopic systematics of lunar meteorite Yamato-793169 p 2084 N94-20834
Consortium study of lunar meteorites Yamato-793169 and Asuka-881757: Geochemical evidence of mutual similarity, and dissimilarity versus other mare basalts p 2085 N94-20857
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1 p 2136 N94-20876
Formation of perched lava ponds on basaltic volcanoes: Interaction between cooling rate and flow geometry allows estimation of lava effusion rates p 1863 N94-20878
Consortium reports on lunar meteorites Yamato 793169 and Asuka 881757, a new type of mare basalt p 2086 N94-20893

BATCH PROCESSING
Physics Detector Simulation Facility. Phase 2: System software description
[DE93-019745] p 1928 N94-19812

BATHYMETERS
Inversion of gravity and bathymetry in oceanic regions for long-wavelength variations in upper mantle temperature and composition
[NASA-CR-192272] p 1882 N94-20131

BAYES THEOREM
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session)
[AD-A272125] p 1942 N94-20573
Computing with Bayesian multi-networks
[AD-A273106] p 1914 N94-21501
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458
Mobile robot perception in unknown and unstructured dynamic voxel environments
[ISBN-0-315-83951-1] p 1947 N94-22591

BCH CODES
Arithmetic in large GF(2(exp n)) p 1760 N94-21131
Toward a new method of decoding algebraic codes using Groebner bases
[AD-A273089] p 1959 N94-21524
The Schur Berlekamp-Massey algorithm is parallelizable p 1784 N94-22191

BCS THEORY
Microwave properties and characterization of co-evaporated BSCCO thin films p 1709 N94-20518

BEACON SATELLITES
Radio wave propagation studies along an Earth-space satellite link
[ISBN-0-315-60627-4] p 1742 N94-22408

BEAM CURRENTS
Observation of reflected waves on the SABRE positive polarity inductive adder MITL
[DE93-019413] p 1980 N94-20295
Optimization and control of a small angle ion source using an adaptive neural network controller
[DE93-040063] p 1946 N94-21845

BEAM INJECTION
Study of transverse coupled bunch instabilities by using non-linear Taylor maps for the Advanced Light Source (ALS)
[DE93-040267] p 1979 N94-19989
Fast ion behavior during neutral beam injection in ATF
[DE93-040267] p 1992 N94-20056
Bundle profile monitor for AmPS
[DIGEL-1992-8] p 1979 N94-20123
Heavy ion fusion injector experiments
[DE93-019188] p 1993 N94-20234
Emittance measurement and modeling of the ALS 50 MeV LINAC to booster line
[DE93-040116] p 1979 N94-20273
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos
[DE93-040141] p 1816 N94-20277
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289
Study of possible energy upgrade for the ALS and modeling of the real lattice for the diagnosis of lattice problems
[DE93-040286] p 2016 N94-20323
Multibunch beam break-up in detuned structures
[DE93-041056] p 1991 N94-21686
Stability of beam in the Fermilab Main Injector
[DE94-000619] p 1982 N94-21934
Plasma heating in toroidal systems p 2000 N94-22629

BEAM SPLITTERS
Optical beam forming techniques for phased array antennas p 1727 N94-20442
Dual-beam multiple wavelength light transmittance measurement for particle sizing in rocket motor plumes
[AD-A272491] p 1670 N94-21208
An integrated-optic polarization splitter on silicon substrate, appendix 4 p 1989 N94-21598

BEAMFORMING
Method to evaluate steering and alignment algorithms for controlling emittance growth
[DE93-041004] p 1978 N94-19856
Optical beam forming techniques for phased array antennas p 1727 N94-20442

Four-channel HF receiving antenna array simulator
[AD-A271876] p 1732 N94-20471

BEAMS (RADIATION)
Method to evaluate steering and alignment algorithms for controlling emittance growth
[DE93-041004] p 1978 N94-19856
Determination of structure factors of copper by convergent beam electron diffraction
[DE93-019520] p 2019 N94-20941
The preservation of low emittance flat beams
[DE93-040964] p 1981 N94-21773
Numerical method for computing the electric field produced by a microwave beam in a stratified medium
p 1746 N94-22197

BEARINGS
Frequency and temperature dependence of high damping elastomers
[DE93-019539] p 1697 N94-19809

BEAT FREQUENCIES
Fermiology and De Haas-Van Alphen effect of beta-(ET)2IBr2
[DE93-019523] p 2011 N94-19807

BEDROCK
Cryoplanation terraces of interior and western Alaska
p 2091 N94-20396

BEHAVIOR
Current status: Animal models of nausea
p 1889 N94-21915

BENDING
Automatic locking orthotic knee device
[NASA-CASE-MFS-28633-1] p 1896 N94-20493

BENDING VIBRATION
Interactive simulation package for coupled bending and torsional vibrations in flexible robot arms
[MEMO-1089] p 1944 N94-21140

BERNOULLI THEOREM
Acoustic radiation damping of flat rectangular plates subjected to subsonic flows
[NASA-TM-109382] p 1967 N94-20211

BERYLLIUM ALLOYS
Properties and potential of high-temperature niobium beryllides
[DE93-019169] p 1690 N94-20233
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312

BERYLLIUM COMPOUNDS
Properties and potential of high-temperature niobium beryllides
[DE93-019169] p 1690 N94-20233

BERYLLIUM 10
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona
p 1863 N94-20889

BETATRONS
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943
The preservation of low emittance flat beams
[DE93-040964] p 1981 N94-21773

BETHE-SALPETER EQUATION
Second order distorted born approximation for backscattering from a layer of discrete random medium
p 1728 N94-20448

BIBLIOGRAPHIES
Aeronautical engineering: A continuing bibliography with indexes (supplement 294)
[NASA-SP-7037(294)] p 1635 N94-20267
NASA patent abstracts bibliography: A continuing bibliography. Section 1: Abstracts (supplement 44)
[NASA-SP-7039(44)-SECT-1] p 2043 N94-21254
Index to 1992 NASA Tech Briefs, volume 16, numbers 1-12
[NASA-TM-109377] p 2053 N94-21736
Index to 1991 NASA Tech Briefs, volume 15, numbers 1-12
[NASA-TM-109376] p 2053 N94-21737
Cumulative index to NASA Tech Briefs, 1986-1990, volumes 10-14
[NASA-TM-109378] p 2054 N94-21738
Aircraft noise effects on cultural resources: Annotated bibliography
[PB93-205334] p 1969 N94-22054
SIMBAD quality-control p 2048 N94-22502

BICRYSTALS
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025

BIDIRECTIONAL REFLECTANCE
Goniospectrometric properties of a white standard
p 1684 N94-20864
Optical effects of space weathering on lunar soils and the role of the finest fraction p 2101 N94-20687
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296

BIMETALS
Evaluation of the fabricability of advanced iron aluminide-clad austenitic stainless steel tubing
[DE93-040598] p 1693 N94-21771

BINARY ALLOYS
First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21964

BINARY CODES
Toward a new method of decoding algebraic codes using Groebner bases
[AD-A273089] p 1959 N94-21524
Coded 64QAM using a binary convolutional code
p 1747 N94-22223
Some best rate 1/p and rate (p-1)/p systematic quasi-cyclic codes over GF(3) and GF(4)
p 1792 N94-22243

BINARY DATA
On a proposed symbolic dynamics for the Henon map
[AD-A272514] p 1955 N94-21359
Toward a new method of decoding algebraic codes using Groebner bases
[AD-A273089] p 1959 N94-21524
Interference reduction using neural networks
p 1783 N94-22186

BINARY DIGITS
A cost-effective methodology for the design of massively-parallel VLSI functional units
p 1760 N94-21132

BINARY MIXTURES
Lateral distribution of lipids in membranes at high pressure
[AD-A271183] p 1700 N94-20299
Speed of sound data and related models for mixtures of natural gas constituents
[PB93-200822] p 1968 N94-21447

BINARY PHASE SHIFT KEYING
Digital receiver for on-board FM/FSK-FM/BPSK demodulation p 1744 N94-21091

BINARY STARS
VVNRS: Variable phenomena in VV Cephei
[NASA-CR-194731] p 2056 N94-21835

BINDERS (MATERIALS)
Guanidine based vehicle/binders for use with oxides, metals, and ceramics
[NASA-CASE-LEW-15314-1] p 1700 N94-20195

BIOACOUSTICS
U.S. Tag for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock: Minutes of the accredited standards committee on bioacoustics, S3
[AD-A273014] p 1897 N94-21309

BIOCHEMISTRY
Enhancement of wound healing by biosynthetic growth factor
[AD-A272517] p 1892 N94-21415

BIODEGRADATION
Evaluation of pre-extraction analytical holding times for nitroaromatic and nitramine explosives in water
[AD-A271547] p 1712 N94-20927

BIODYNAMICS
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189

BIOELECTRIC POTENTIAL
Studies of neural and cognitive function in subjects exposed to the marine-air interface, phases 1 and 2
[AD-A272282] p 1891 N94-20624

BIOGRAPHY
Mathematician Wang Ju
[AD-A267882] p 1912 N94-21255

BIOLOGICAL EFFECTS
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
Compatibility and efficacy of biocides qualified under military specification MIL-S-53021
[AD-A271496] p 1712 N94-20551
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 383)
[NASA-SP-7011(383)] p 1892 N94-21288
ELF communications system ecological monitoring program
[AD-A272507] p 1740 N94-21412
Modeling the response of ecosystems to CO2 and climate change
[DE94-000748] p 1852 N94-21787
Spaceflight Radiation Health program at the Lyndon B. Johnson Space Center
[NASA-TM-104782] p 1893 N94-21863

BIOLOGICAL EVOLUTION
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate
p 2108 N94-20723
Fourier calculus on evolutionary trees
[CWI-BS-R9234] p 1954 N94-21231

BIOLOGICAL MODELS (MATHEMATICS)
Theoretical and numerical examinations of nonlinear parameter dependent advanced differential difference equations
[ETN-93-93681] p 1952 N94-21042
Modeling the response of ecosystems to CO2 and climate change
[DE94-000748] p 1852 N94-21787

BIOMASS
Biofuels: Project summaries
[DE93-010003] p 1712 N94-19984
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562

BIOMASS ENERGY PRODUCTION
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562
Current situation of development of petroleum substituting energies (USA)
[DE94-707492] p 1848 N94-22013
Current situation of development of petroleum substituting energies (Canada)
[DE94-707493] p 1849 N94-22014

BIOMEDICAL DATA
Development of bioelastic material for aspects of wound repair
[AD-A272000] p 1892 N94-21503

BIONICS
Application of molecular modeling to biological processing
[AD-A272612] p 1974 N94-21185

BIOPHYSICS
Lateral distribution of lipids in membranes at high pressure
[AD-A271183] p 1700 N94-20299

BIOREACTORS
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044

BIOSPHERE
Modeling of interactions between biosphere and atmosphere on the global scale
[NASA-CR-193423] p 1837 N94-20205
Global blackout following the K/T Chicxulub impact: Results of impact and atmospheric modeling
p 1854 N94-20698
Monitoring issues from a modeling perspective
p 1868 N94-21640

BIOTECHNOLOGY
Biotechnology and composite materials
[AD-A264278] p 1673 N94-20327
Research in progress: FY 1992
[DE94-000410] p 1836 N94-20936
The laser and its applications on environment and biotechnology research
[DE94-000376] p 1820 N94-21957

BIPOLAR TRANSISTORS
A breakdown model for the bipolar transistor to be used with circuit simulators
[DE93-019422] p 1750 N94-20218
A contribution to development and parameter extraction of SPICE compatible macromodels for discrete bipolar transistors
[HMI-B-499] p 1753 N94-21021
Bridging faults in BiCMOS circuits
p 1756 N94-21105
Design and implementation of GaAs HBT circuits with ACME p 1758 N94-21117
Heterojunction bipolar transistor technology for data acquisition and communication p 1763 N94-21697
Behavior of faulty double BJT BiCMOS logic gates
p 1767 N94-21727

BIPOLARITY
Behavior of faulty double BJT BiCMOS logic gates
p 1767 N94-21727

BIREFRINGENCE
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
Azo polymers for optical storage 3: Effect of film thickness on net phase retardation and writing speed
[AD-A272994] p 1705 N94-21267
Optically induced birefringence in copolymers and blends containing azobenzene groups
[AD-A273085] p 1706 N94-21523
Birefringence control and dispersion characteristics of silicon oxynitride optical waveguides, appendix 6
p 1989 N94-21600

BIREFRINGENT FILTERS
Evaluation of a single stage of the LADS filter
[AD-A271101] p 1814 N94-19851
BISMALEIMIDE
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008
BISMUTH
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691
BIT ERROR RATE
Advanced coding and modulation schemes for TDRSS
p 1744 N94-21350
QPPM receiver for free-space laser communications
[NASA-TM-106424] p 1741 N94-21567
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
Adaptive decoding of convolutional codes
p 1793 N94-22246
Bidirectional algorithms for the decoding of convolutional codes over memoryless channels p 1793 N94-22247
BIT SYNCHRONIZATION
A low cost alternative to high performance PCM bit synchronizers p 1813 N94-21347
BITS
A cost-effective methodology for the design of massively-parallel VLSI functional units
p 1760 N94-21132
BLACK BODY RADIATION
Fluorescent microthermographic imaging
[DE93-040332] p 1810 N94-22000
BLACK HOLES (ASTRONOMY)
Gamma ray bursts from collisions of primordial small mass black holes with comets p 2150 N94-20604
Accretion disks in bright x ray binaries
p 2002 N94-22639
General relativistic winds in a black hole magnetosphere p 2002 N94-22644
Properties of x ray emission from x ray novae
p 2007 N94-22676
Time variations of x rays from black hole candidates: Canonical time variations in high and low intensity states
p 2009 N94-22690
Pair plasmas in the galactic center region and in Nova Muscae p 2009 N94-22691
Time variation of MHD accretion onto a black hole
p 2009 N94-22692
Accretion of a hot plasma onto the central black hole: Fokker-Planck formulation p 2009 N94-22693
Shock formation in magnetohydrodynamical accretion onto a black hole p 2010 N94-22699
BLADE-VORTEX INTERACTION
The fluid mechanics of vortex cutting by a blade
[AD-A270932] p 1636 N94-20043
Rotorcraft noise: Status and recent developments
[NASA-CR-194761] p 1967 N94-20523
BLOCK COPOLYMERS
Dynamics of adsorbed, swollen block copolymers
[AD-A272013] p 1706 N94-21460
BLOCK DIAGRAMS
Development and testing of a reliability performance index for modular robotic systems
[AD-A271901] p 1942 N94-20488
BLOCKING
Throughput and blocking in circuit-switched interconnection networks p 1784 N94-22189
Throughput, blocking, and interference in packet radio networks p 1746 N94-22190
BLOOD
Physiologically based pharmacokinetic modelling of percutaneously absorbed dibromomethane utilizing multiple dermal sub-compartments
[AD-A271106] p 1889 N94-19981
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
BLOOD PRESSURE
Detection of emetic activity in the cat by monitoring venous pressure and audio signals
p 1886 N94-21903
BLUNT BODIES
Atmospheric breakup of a small comet in the Earth's atmosphere p 2084 N94-20824
BODY CENTERED CUBIC LATTICES
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398
BODY TEMPERATURE
Wind chill: The temperature feeling caused by the wind velocity
[KNMI-TR-103A] p 1890 N94-20238
Studies of neural and cognitive function in subjects exposed to the marine-air interface, phases 1 and 2
[AD-A272282] p 1891 N94-20624
BOEING 737 AIRCRAFT
Measurement of the influence of deicing liquids on aircraft aerodynamics p 1640 N94-22602
BOILING
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19987
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
BOLIDES
Dynamics of large scale impacts on Venus and Earth
p 2098 N94-20666
Delimitation of terrestrial impact craters by way of pseudotachylytic rock distribution p 1863 N94-20783
Impact-induced devolatilization of CaSO4 anhydrite and implications for K-T extinctions: Preliminary results
p 2085 N94-20840
BOLOMETERS
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528
BOLTS
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 1823 N94-20379
BOLTZMANN TRANSPORT EQUATION
Kinetic theory of runaway air-breakdown
[DE93-040731] p 1750 N94-20325
IR materials producibility
[AD-A273031] p 1987 N94-21321
BOMBARDMENT
Neutral copper cluster sputtering yields: Ne(+), Ar(+) and Xe(+) bombardment
[DE93-019010] p 1690 N94-20288
BONDED JOINTS
Durability predictions for adhesively bonded joints in humid environments
[AD-A271177] p 1830 N94-20001
Adhesive bonded joint with improved cyclic fatigue life for alumina-ceramic cylinders and hemispheres: Fourth generation housings
[AD-A273061] p 1831 N94-21310
BONDING
ALE project
[AD-A271080] p 2014 N94-19980
Automated HMC assembly
[DE93-040641] p 1749 N94-20005
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025
BONES
A geometrical process for three dimensional osteotomy planning
[ETN-93-93602] p 1892 N94-21134
BOOLEAN ALGEBRA
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358
Advice from nonadaptive queries to NP
[TR-470] p 1911 N94-21200
A new class of multi-function two-rail totally self-checking basic building blocks p 1788 N94-22215
Spatial region filtering in IRAF/PROS
p 1927 N94-22524
BORATES
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505
Interfacial reactions between titanium and borate glass
[DE93-012847] p 1683 N94-22031
BORIC ACIDS
A comparison of sulfuric acid/boric acid anodize and chromic acid anodize processes
[AD-A271933] p 1703 N94-20614
BORN APPROXIMATION
Second order distorted born approximation for backscattering from a layer of discrete random medium
p 1728 N94-20448
Application of the target decomposition theorem to a polarimetric random media model p 1730 N94-20453
BORON CARBIDES
Hydrodynamic compressibility of high-strength ceramics
[DE93-019424] p 1698 N94-19903
BORON ISOTOPES
The atomic weight and isotopic composition of boron and their variation in nature
[DE93-019046] p 1682 N94-21631
BORON OXIDES
Model for liquid boron oxide droplet gasification in H/O/C/F combustion environments
[AD-A272911] p 1682 N94-21243
BOSONS
A search for new gauge bosons in (bar p)p collisions at square root of s equals 1.8 TeV in the dielectron decay mode
[DE93-019901] p 1969 N94-19813
F-spin concept and g-bosons in the interceding boson model
[ETN-93-93607] p 1973 N94-21136
The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV
[DE93-019903] p 1976 N94-21847
BOUNDARIES
Generalization performance of backpropagation learning on a syllabification task p 1940 N94-20246
BOUNDARY CONDITIONS
The best of GYMNOS: A users guide
[DE93-041275] p 1992 N94-19991
A new conformal absorbing boundary condition for finite element meshes and parallelization of FEMATS
[NASA-CR-194740] p 1950 N94-20034
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
Polarimetric thermal emission from rough surfaces
p 1727 N94-20441
An integro-algebraic equation for high frequency wake fields in a tube with smoothly varying radius
[DE93-040940] p 1741 N94-21684
Microscopic and macroscopic dynamics
[DE93-019576] p 1937 N94-22042
BOUNDARY ELEMENT METHOD
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777
BOUNDARY INTEGRAL METHOD
Scattering by cavity-backed antennas on a circular cylinder p 1741 N94-21886
Radiation by cavity-backed antennas on a circular cylinder p 1741 N94-21887
User manual for EXCALIBUR: A FE-BI numerical laboratory for cavity-backed antennas in a circular cylinder, version 1.2 p 1741 N94-21888
BOUNDARY LAYER FLOW
Experimental and computational results from a large low-speed centrifugal impeller
[NASA-TM-106421] p 1636 N94-20136
A theoretical investigation of unsteady separation phenomena related to dynamic stall
[AD-A271865] p 1636 N94-20465
The effect of transverse curvature on the fluctuating wall pressure and structure of boundary layer turbulence
[AD-A271868] p 1800 N94-20466
Orthogonalization method for determination of boundary layer receptivity coefficients
[ISBN-0-315-83426-9] p 1805 N94-22580
BOUNDARY LAYER SEPARATION
Fluid dynamic mechanisms and interactions within separated flows
[AD-A271037] p 1797 N94-19978
A theoretical investigation of unsteady separation phenomena related to dynamic stall
[AD-A271865] p 1636 N94-20465
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169
BOUNDARY LAYER STABILITY
Some practical turbulence modeling options for Reynolds-averaged full Navier-Stokes calculations of three-dimensional flows
[NASA-TM-106399] p 1637 N94-20534
Orthogonalization method for determination of boundary layer receptivity coefficients
[ISBN-0-315-83426-9] p 1805 N94-22580

BOUNDARY LAYER TRANSITION
Numerical investigation of laminar-turbulent transition in two- and three-dimensional boundary layers
[DLR-FB-92-36] p 1800 N94-20533
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459
Flow transition with 2-D roughness elements in a 3-D channel p 1806 N94-21466
Orthogonalization method for determination of boundary layer receptivity coefficients
[ISBN-0-315-83426-9] p 1805 N94-22580
Surface hot film measurements at ATTAS laminar glove p 1639 N94-22598
Testing of a multisensor hot film technique in wind tunnel and free flight p 1639 N94-22599
Free flight experiment with a laminar wing glove p 1639 N94-22600

BOUNDARY LAYERS
Experimental study of a shock accelerated thin gas layer
[DE93-018354] p 1799 N94-20286
Response of the topography and gravity field on Venus to mantle upwelling beneath a chemical boundary layer p 2117 N94-20775
Physics of magnetospheric boundary layers
[NASA-CR-194725] p 1858 N94-21836
Riblet boundary layer measurements of an A-310 fuselage with Pitot combs p 1640 N94-22605

BOUNDARY VALUE PROBLEMS
Analytical evaluation of a surface integral expressing the coupling between interior and exterior volumes in a FE-IE approach p 1722 N94-20423
Stoermer-Cowell and related methods for the numerical solution of second order periodic initial value problems for ODE's 2: Numerical characteristics of the methods
[MEMO-1082] p 1953 N94-21075
Adaptive grids for quasilinear parabolic systems in one space dimension
[ETN-93-93611] p 1954 N94-21137
Some experiences of solving 1-D semiconductor device equations on a matrix coprocessor by a domain decomposition method
[CWI-NM-R9304] p 1935 N94-21492
Butcher-Kuntzmann methods for nonstiff problems on parallel computers
[CWI-NM-R9305] p 1935 N94-21493
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
Comparing quasi-Newton methods for solving sparse interface problems
[CWI-NM-R9303] p 1959 N94-21576
Universality in blow-up for non linear heat equations
[PB93-215465] p 2038 N94-22095
Hypersingular integrals at a corner
[DE94-000340] p 1961 N94-22379
Asymptotic analysis: Basic concepts and definitions
[DE94-001000] p 1961 N94-22393

BOW WAVES
Physics of magnetospheric boundary layers
[NASA-CR-194725] p 1858 N94-21836
Theoretical research program to study chemical reactions in AOTV bow shock tubes
[NASA-CR-194710] p 1804 N94-22027

BRAGG ANGLE
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439

BRAIN
Cognition and the brain: A continuation of the university research initiative at New York University
[AD-A271872] p 1894 N94-20467

BRAKES (FOR ARRESTING MOTION)
In-vacuo slip testing of materials for SSRMS friction brakes p 1661 N94-21381

BRANCHING (MATHEMATICS)
Back and forth bisimulations on prime event structures
[RR-888-I-IMAG-124-LIFIA] p 1929 N94-20124
SLD results from the study of polarized Z(sup 0) produced at the SLC
[DE93-041020] p 1982 N94-21952

BRAYTON CYCLE
Brayton power conversion system parametric design modelling for nuclear electric propulsion
[NASA-CR-191135] p 1671 N94-21874

BRAZING
Segregation of Si to the surface of Fe-29Ni-17Co alloy
[DE93-040053] p 1687 N94-19864

BRECCIA
The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640
Carbonaceous xenoliths from the Erevan howardite p 1684 N94-20642
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660
Abundance and composition of solar KR in the H3-H6 chondrite ACFER111 p 1684 N94-20676
Post-igneous redistribution of components in eucrites p 1685 N94-20684
Kalkkop crater, Eastern Cape: A new impact crater in South Africa p 1862 N94-20714
Post-metamorphic brecciation in type 3 ordinary chondrites p 2083 N94-20749
Lunar basalt meteorite EET 87521: Petrology of the clast population p 2083 N94-20752
Petrography of shock features in the 1953 Manson 2-A drill core p 1862 N94-20767
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis p 2118 N94-20779
Delimitation of terrestrial impact craters by way of pseudotachylytic rock distribution p 1863 N94-20783
Two-polarity magnetization in the Manson impact breccia p 1863 N94-20789
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
[CONTRIB-5241(804)] p 2084 N94-20795
The age of the Pretoria Saltpan impact crater, South Africa p 1863 N94-20798
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875
Regolith breccia consisting of H and LL chondrite mixture p 2080 N94-20892
Mineralogy of dark clasts in primitive versus differentiated meteorites p 2087 N94-20907

BREWSTER ANGLE
The Brewster angle effect in SAR polarimetry p 1731 N94-20456

BRIDGMAN METHOD
Characterization of convection related defects in II-VI compound semiconductors
[NASA-CR-194704] p 2030 N94-21778

BRIGHTNESS
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos
[DE93-040141] p 1816 N94-20277
Detection of x ray sources in PROS p 2062 N94-22466

BRIGHTNESS DISTRIBUTION
An x ray archive on your desk: The Einstein CD-ROM's p 2048 N94-22519

BRIGHTNESS TEMPERATURE
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
Ground-based passive remote sensing during FIRE IFO 2 p 1844 N94-22319
Surface-induced brightness temperature variations and their effects on detecting thin cirrus clouds using IR emission channels in the 8-12 micrometer region p 1880 N94-22341

BRILLOUIN EFFECT
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958

BRILLOUIN ZONES
Phonons and metastability in compressed nitrogen
[DE93-019913] p 2016 N94-20318
Non commutative geometry and physics
[PB93-215499] p 1961 N94-22264

BRINES
Polarimetric backscattering from sea ice p 1723 N94-20426
Briny lakes on early Mars? Terrestrial intracrater playas and Martian candidates p 2145 N94-21675

BRITTLE MATERIALS
A thermodynamic theory of dynamic fragmentation
[DE93-019066] p 1833 N94-21916

BRITTLENESS
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
Ductile-brittle transition behavior of tungsten under shock loading conditions
[DE93-019945] p 1693 N94-21843
Ni3Al aluminide alloys
[DE94-000493] p 1694 N94-21933

BROADBAND
Recent activities in printed Antennas at LeRC p 1722 N94-20422
Simulations of spectral broadening by cross-phase modulation (XPM) with chaotic light pulses
[DE93-019623] p 1819 N94-21872
Effect of bandwidth on beam smoothing and frequency conversion at the third harmonic of the Nova laser
[DE93-019917] p 1819 N94-21920
Wideband source location in two-dimensional array processing p 1747 N94-22250

BROADCASTING
NHK Science and Technical Research Laboratories p 2151 N94-20342
Spread spectrum random access networks
[AD-A272280] p 1737 N94-20585

BROKEN SYMMETRY
Summary of the Hadronic Weak Interaction session
[DE94-000592] p 1975 N94-21775
The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV
[DE93-019903] p 1976 N94-21847
Theoretical phase diagrams for solid H(sub 2)
[DE94-001049] p 1684 N94-22395
Likelihood analysis of parity violation in the compound nucleus
[DE94-000671] p 1977 N94-22572

BROMIDES
Fermiology and De Haas-Van Alphen effect of beta-(ET)2IBr2
[DE93-019523] p 2011 N94-19807
Heat transfer additives for absorption cooling system fluids
[PB93-202521] p 1714 N94-21426

BROMINE
Photoelectron spectroscopy at model boundary surfaces of energy converter semiconductors/electrolyte contacts: Adsorption, coadsorption, and triadsorption of Br2, Na, and H2O on Van der Waals surfaces of metal chalocogenide semiconductors
[ETN-93-95063] p 2015 N94-20152

BROMINE COMPOUNDS
Laser driven hydrodynamic instability experiments
[DE93-040550] p 1818 N94-21547

BRUSH SEALS
The 1992 Seals Flow Code Development Workshop
[NASA-CP-10124] p 1654 N94-21790
Brush seal bristle flexure and hard-rub characteristics p 1654 N94-21791
Integrity testing of brush seal in a T-700 engine p 1654 N94-21792
Air Force brush seal programs p 1655 N94-21793
Compliant seal development p 1655 N94-21795
Modeling bristle lift-off in idealized brush seal configurations p 1655 N94-21797

BSCCO SUPERCONDUCTORS
Machinable oxide ceramic
[AD-D015927] p 1699 N94-20017
Microwave properties and characterization of co-evaporated BSCCO thin films p 1709 N94-20518
The incongruent melting and melt textured solidification process of Bi2Sr2CaCu3O8
[DE93-041123] p 2032 N94-21936
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998
Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176

BUCKLING
A benchmark study of 2D and 3D finite element calculations simulating dynamic pulse buckling tests of cylindrical shells under axial impact
[DE93-018859] p 1829 N94-19940
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
Improvements to a method for the geometrically nonlinear analysis of compressively loaded stiffened composite panels
[NASA-CR-194715] p 1832 N94-21814

BUFFER STORAGE
A 20 MHz CMOS reorder buffer for a superscalar microprocessor p 1764 N94-21700
A shared buffer memory switch with maximum queue and minimum allocation p 1773 N94-22119
Buffer allocation in an ATM switch with output buffer and speed constraints p 1746 N94-22203
A self-defining hierarchical data system p 2046 N94-22448

BUILDINGS
Building integrated photovoltaic systems analysis
[DE93-018208] p 1846 N94-21298
The energy performance of prototype holographic glazings
[DE93-040451] p 1809 N94-21545
Aircraft noise effects on cultural resources: Recommendation and rationale for further research
[PB93-205326] p 1968 N94-22053
Aircraft noise effects on cultural resources: Annotated bibliography
[PB93-205334] p 1969 N94-22054

BUMPERS
PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943

BUNCHING
Persistent wakefields associated with waveguide damping of higher order modes
[DE93-040973] p 1715 N94-19874
Study of transverse coupled bunch instabilities by using non-linear Taylor maps for the Advanced Light Source (ALS)
[DE93-040287] p 1979 N94-19989
Multibunch beam break-up in detuned structures
[DE93-041056] p 1981 N94-21686
Simulation and compensation of multibunch energy variation in NLC
[DE93-041057] p 1981 N94-21687
Generation of harmonic radiation using the multi-cavity free-electron laser
[DE94-001261] p 1820 N94-21975
BUNDLES
Semi-stability and heights of cycles
[PB93-215507] p 1961 N94-22377
BUOYANCY
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus
p 2099 N94-20675
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452
BURN-IN
Design and test of field programmable gate arrays in space applications p 1765 N94-21710
BURNING RATE
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906
Investigation of flame driving and flow turning in axial solid rocket instabilities
[AD-A271066] p 1667 N94-20015
BURNS (INJURIES)
Non-ionic surfactants in the treatment of third degree burns
[AD-A271582] p 1891 N94-21035
BUS CONDUCTORS
A SCSI-bus data acquisition system for nuclear spectroscopy experiments
[USIP-92-03] p 2042 N94-20193
BUTANES
Computer simulation of molecular response at a shock front
[DE94-001050] p 1977 N94-22396
BYPASSES
A comprehensive theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20500
A comparative study between shielded and open coplanar waveguide discontinuities
p 1733 N94-20501
A theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20502

C

C (PROGRAMMING LANGUAGE)
Efficient and correct translation of strict applicative programming languages
[ETN-93-95056] p 1903 N94-20020
A self-defining hierarchical data system
p 2046 N94-22448
Writing instrument interfaces with xf/tktcl
p 1925 N94-22480
C BAND
Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters
p 1729 N94-20452
C++ (PROGRAMMING LANGUAGE)
An evaluation of integration of the trace assertion method with the box structure method for coding in C++
[DE93-040480] p 1918 N94-21924
A structured data transfer protocol
p 2047 N94-22450
On AIPS++, a new astronomical information processing system p 2047 N94-22463
C++, objected-oriented programming, and astronomical data models p 2063 N94-22473
CABLES (ROPES)
Counter-balanced, multiple cable construction crane
[NASA-CASE-LAR-14565-1-CU] p 1822 N94-20369
CADMIUM
Lightweight battery electrode and method of making it
[AD-D015895] p 1749 N94-20120
CADMIUM SULFIDES
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617
CADMIUM TELLURIDES
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Fabrication of stable large-area thin-film CdTe photovoltaic modules
[DE93-018204] p 1845 N94-20095
Thin-film CdTe and CuInSe2 photovoltaic technologies
[DE93-018217] p 1848 N94-21827
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922
CALCIFICATION
Review of using cardiac fluoroscopy in symptomatic and asymptomatic patients
[AD-A271690] p 1891 N94-20928
CALCIUM
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite p 2086 N94-20902
CALCIUM OXIDES
A calcium oxide sorbent process for bulk separation of carbon dioxide
[DE93-019288] p 1847 N94-21540
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb)
[DE93-040227] p 2033 N94-21992
CALCIUM PHOSPHATES
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives
[DE94-000330] p 1894 N94-21945
CALCULUS
Are types needed for natural language?
[PB93-191831] p 1949 N94-19997
Set theory and nominalisation, part 1
[PB93-191807-PT-1] p 1962 N94-20007
Fourier calculus on evolutionary trees
[CWI-BS-R9234] p 1954 N94-21231
CALDERAS
Calderas produced by hydromagmatic eruptions through permafrost in northwest Alaska p 2089 N94-20385
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Geology of Biblis Patera, Ulysses Patera, and Jovis Tholus, Mars p 2103 N94-20693
CALIBRATING
Focus history of the Hubble Space Telescope: Launch to May 1993
[NASA-CR-194179] p 2055 N94-20204
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign
p 1725 N94-20434
Internal camera calibration using rotation and geometric shapes
[AD-A272718] p 1808 N94-21167
Using the USCCS for sub microsecond spacecraft clock calibration p 1813 N94-21346
Calibration of a calorimeter for measuring the performance of thermal control surfaces
p 1660 N94-21378
An 18 bit 50 kHz ADC for low earth orbit
p 1764 N94-21702
Application guide for universal source encoding for space
[NASA-TP-3441] p 1741 N94-21783
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194727] p 2147 N94-21832
Calibration of radiation codes in climate models: Comparison of calculations with observations from the SPECtral Radiation Experiment (SPECTRE)
p 1879 N94-22337
SSH-2 measurements of cirrus at 18-28 micrometers from the King Air during FIRE 2 p 1880 N94-22338
PHOTCAL: The IRAF photometric calibration package
p 1925 N94-22465
The spectral world coordinate systems in IRAF/NOAO
p 2049 N94-22539
CALORIMETERS
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19987
A conceptual design for the STAR endcap electromagnetic calorimeter
[DE93-040801] p 1807 N94-19990
Techniques for reducing error in the calorimetric measurement of low wattage items
[DE93-018472] p 1807 N94-20114
Calorimeter measurements of low wattage items
[DE93-018473] p 1807 N94-20115
Calibration of a calorimeter for measuring the performance of thermal control surfaces
p 1660 N94-21378
CAMERAS
An assessment of COMSCAN, a Compton backscatter imaging camera, for the one-sided non-destructive inspection of aerospace components
[AD-A271331] p 1806 N94-19837
Head-centered orientation strategies in animate vision
[TR-442] p 1894 N94-20520
The High Resolution Stereo Camera (HRSC) for the Lunar Scout 1 Mission p 1813 N94-20650
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data
p 2101 N94-20686
Internal camera calibration using rotation and geometric shapes
[AD-A272718] p 1808 N94-21167
Restoration of HST images with missing data
p 2057 N94-22439
Writing instrument interfaces with xf/tktcl
p 1925 N94-22480
The University of Hawaii Institute for Astronomy CCD camera control system p 1828 N94-22489
Deconvolution of Hubble Space Telescope images using simulated point spread functions p 2048 N94-22497
HST PSF simulation using Tiny Tim
p 1926 N94-22498
Wilbur: A low-cost CCD camera system for MDM Observatory p 1814 N94-22510
CANADA
Current situation of development of petroleum substituting energies (Canada)
[DE94-707493] p 1849 N94-22014
CANALS
Early Mars: The inextricable link between internal and external influences on valley network formation
p 2146 N94-21681
The Martian valley networks: Origin by niveo-fluvial processes p 2146 N94-21682
CANARD CONFIGURATIONS
Experimental study on interference aerodynamics of close-coupled canard configuration
[AD-A267760] p 1636 N94-19963
CANCELLATION
System and method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-1] p 1801 N94-20588
CANOPIES (VEGETATION)
Second order distorted born approximation for backscattering from a layer of discrete random medium
p 1728 N94-20448
Relationship of attenuation in a vegetation canopy to physical parameters of the canopy p 1729 N94-20450
Application of the target decomposition theorem to a polarimetric random media model p 1730 N94-20453
Evaluation of C-band SAR data from SAREX 1992: Tapajos study site p 1839 N94-20964
CANYONS
Mars: New evidence for origin of some Valles Marineris layered deposits p 2112 N94-20748
CAPACITANCE
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973
InP MIS structures with diamondlike amorphous carbon films deposited by ion-beam sputtering and from plasma
p 1710 N94-20979
Use of switched capacitor filters to implement the discrete wavelet transform p 1755 N94-21097
Fully-depleted silicon-on-sapphire and its application to advanced VLSI design p 1765 N94-21709
Effects of aqueous solution compositions on Aerocapacitor energy density
[DE94-000385] p 1768 N94-21753
Verification of frequency scaling laws for capacitive rf discharges using two-dimensional simulations
[DE94-001306] p 1999 N94-22595
CAPACITORS
Preparation and properties of sol-gel derived PZT thin films for decoupling capacitor applications
[DE93-018853] p 2013 N94-19961
Flexible heating head for induction heating
[NASA-CASE-LAR-14418-15-B] p 1718 N94-20388
INPIStron switched pulsed power for dense plasma pinches p 1995 N94-21294
An 18 bit 50 kHz ADC for low earth orbit
p 1764 N94-21702
Effects of aqueous solution compositions on Aerocapacitor energy density
[DE94-000385] p 1768 N94-21753
An adaptive method for group delay compensation using switched capacitor filters p 1793 N94-22248
CAPILLARY FLOW
Thermocapillary and arc phenomena in stainless steel welds
[DE94-000518] p 1821 N94-19859
Surface path lines in plane Stokes flow driven by capillarity
[DE93-041277] p 1803 N94-21651

CARBON
C/O atomic ratios in micrometer-size crushed grains from Antarctic micrometeorites and two carbonaceous meteorites p 2082 N94-20678
C-O volatiles in Apollo 15 and Apollo 17 picritic glasses p 1685 N94-20727
C2, CN and dust in Comet Wilson (1987VII) p 2083 N94-20746
Molecular equilibria and condensation sequences in carbon rich gases p 2083 N94-20756
Cometary interplanetary dust particles? An update on carbon in anhydrous IDPS p 2084 N94-20828
The carbon components in SNC meteorites of feldspathic harzburgite composition p 2086 N94-20885
Further carbon isotope measurements of LEW 88516 p 2086 N94-20886
InP MIS structures with diamondlike amorphous carbon films deposited by ion-beam sputtering and from plasma p 1710 N94-20979
Interfacial properties of diamondlike amorphous carbon films on InP: Metal-insulator-semiconductor structures p 1710 N94-20980
Thin-film hermeticity: A quantitative analysis of diamondlike carbon using variable angle spectroscopic ellipsometry p 1710 N94-20981
Effects of aqueous solution compositions on Aerocapacitor energy density [DE94-000385] p 1768 N94-21753
Implantation of carbon in GaAs and compensating native defects [DE93-040122] p 2030 N94-21763
High temperature size selective membranes [DE93-019865] p 1709 N94-21982
Research on stable, high-efficiency amorphous silicon multijunction modules [DE93-018220] p 1850 N94-22257

CARBON CYCLE
Modeling the response of ecosystems to CO2 and climate change [DE94-000748] p 1852 N94-21787

CARBON DIOXIDE
Unlike-pair interactions at high pressure and high temperature [DE93-019948] p 1796 N94-19916
Technology to prevent greenhouse effect gases [DE94-707421] p 1850 N94-19976
Technology to prevent greenhouse effect gases [DE94-707420] p 1851 N94-20116
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
Spectral analysis of chemisorbed CO2 on Mars analog materials p 2140 N94-20900
One- and multi-component theories of mixtures [DE93-040543] p 1966 N94-21511
A calcium oxide sorbent process for bulk separation of carbon dioxide [DE93-019288] p 1847 N94-21540
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
A model for the evolution of CO2 on Mars p 2144 N94-21671
The young Sun and photochemistry of the primitive Martian atmosphere p 2145 N94-21679
Early Mars: The inextricable link between internal and external influences on valley network formation p 2146 N94-21681
Modeling the response of ecosystems to CO2 and climate change [DE94-000748] p 1852 N94-21787
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur [DE93-041167] p 1682 N94-21789
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy [DE94-714886] p 1849 N94-22043
Survey on chemical engineering technologies for the global environmental protection [DE94-714887] p 1852 N94-22044
Investigations on trends in global environment adaptive industrial technologies [DE94-714888] p 1853 N94-22258
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312

CARBON DIOXIDE CONCENTRATION
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate p 2108 N94-20723
Modeling the response of ecosystems to CO2 and climate change [DE94-000748] p 1852 N94-21787

CARBON DIOXIDE LASERS
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance [AD-A272101] p 1817 N94-20583
Compact lightweight CO2 laser for SDIO application [AD-A273010] p 1817 N94-21284

CARBON FIBER REINFORCED PLASTICS
Thermal stability relationships between PMR-15 resin and its composites [NASA-TM-106285] p 1675 N94-21488
Creep damage of carbon fiber reinforced PEEK [ISBN-0-315-58962-0] p 1677 N94-22420

CARBON FIBERS
Intercalated hybrid graphite fiber composite [NASA-CASE-LEW-15241-1] p 1673 N94-20539
Biaxial flexural testing of a carbon fiber reinforced epoxy composite [AD-A271956] p 1674 N94-20577

CARBON ISOTOPES
A carbon and nitrogen isotope study of carbonaceous vein material in ureilite meteorites p 2083 N94-20726
Micrometeorite pre-solar diamonds from Greenland cryoconite? p 2086 N94-20895

CARBON MONOXIDE
Unlike-pair interactions at high pressure and high temperature [DE93-019948] p 1796 N94-19916
Ab initio potential energy surface for the H + OCS reaction [AD-A270577] p 1698 N94-19947
Catalytic hydrogenation of carbon monoxide [DE94-000881] p 1678 N94-20103
Theoretical investigations of metastability and energy storage in molecular systems [AD-A271849] p 1973 N94-20612
Infrared absorption spectroscopy of the weakly bonded CO-Cl2 complex [AD-A271757] p 2027 N94-21304

CARBON 13
The carbon components in SNC meteorites of feldspathic harzburgite composition p 2086 N94-20885
Further carbon isotope measurements of LEW 88516 p 2086 N94-20886
The 13C-NMR spectra of poly (4-((2-(acryloyloxy) ethyl) ethyl amino)- 4-nitroazobenzene-co-methyl methacrylate) [AD-A273016] p 1705 N94-21238

CARBON-CARBON COMPOSITES
Performance of carbon-based hot frit substrates [DE94-000509] p 1676 N94-21754
Compilation of reinforced carbon-carbon transatlantic abort landing arc jet test results [NASA-TM-104778] p 1676 N94-21834

CARBON-PHENOLIC COMPOSITES
Modeling of outgassing and matrix decomposition in carbon-phenolic composites [NASA-CR-194741] p 1676 N94-21743

CARBONACEOUS CHONDRITES
The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640
Igneous rock from Severnyi Kolchim (H3) chondrite: Nebular origin p 2082 N94-20643
Exposure ages of carbonaceous chondrites, 1 p 2082 N94-20658
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
Oxygen isotopic relationships between the LEW85332 carbonaceous chondrite and CR chondrites p 2083 N94-20708
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Fe/Mn in olivine of carbonaceous meteorites p 2084 N94-20788
Hydrothermal alteration experiments of olivine with varying Fe contents: An attempt to simulate aqueous alteration of the carbonaceous chondrites p 1686 N94-20810
Comparison of visible and near-infrared reflectance spectra of CM2 carbonaceous chondrites and primitive asteroids p 2085 N94-20848
Diffusion-controlled magnesium isotopic fractionation of a single crystal forsterite evaporated from the solid state p 1686 N94-20855

CARBONACEOUS MATERIALS
A carbon and nitrogen isotope study of carbonaceous vein material in ureilite meteorites p 2083 N94-20726

CARBONACEOUS METEORITES
Carbonaceous xenoliths from the Erevan howardite p 1684 N94-20642
C/O atomic ratios in micrometer-size crushed grains from Antarctic micrometeorites and two carbonaceous meteorites p 2082 N94-20678

CARBONATES
A study of carbonates, sulfates, and phosphates using thermal emission spectroscopy p 1686 N94-20868
Spectral analysis of chemisorbed CO2 on Mars analog materials p 2140 N94-20900
Molten carbonate fuel cell networks: Principles, analysis, and performance [DE93-019872] p 1846 N94-21527
A calcium oxide sorbent process for bulk separation of carbon dioxide [DE93-019288] p 1847 N94-21540
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells [DE93-019536] p 1847 N94-21650

CARBONIZATION
A calcium oxide sorbent process for bulk separation of carbon dioxide [DE93-019288] p 1847 N94-21540

CARBONYL COMPOUNDS
Lightweight battery electrode and method of making it [AD-D015895] p 1749 N94-20120

CARBOXYLIC ACIDS
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins [DE94-000935] p 1683 N94-22021

CARDIOVASCULAR SYSTEM
Coronary angiography outcomes of US Army aircrew with the finding of coronary artery calcifications: Aviation epidemiology data register [AD-A271968] p 1891 N94-20615

CARRIER MOBILITY
Dephasing processes in III-V semiconductors [AD-A271677] p 2028 N94-21362

CARRIER TRANSPORT (SOLID STATE)
Are the C delta light nitrogen and noble gases located in the same carrier? p 2085 N94-20846
Solid-state dynamics and quantum transport in novel semiconductor nanostructures [AD-A272955] p 2027 N94-21248

CARTESIAN COORDINATES
Characteristic based methods for the time-domain Maxwell equations [AD-A272973] p 1802 N94-21263
An adaptive control to enable a robot to follow Cartesian trajectories p 1790 N94-22229
The 3D Euler solutions using automated Cartesian grid generation p 1920 N94-22367

CASCADE CONTROL
Cascaded recursive artificial neural networks p 1780 N94-22167

CASCADE FLOW
Measurement and prediction of the flow through an annular turbine cascade [AD-A272530] p 1803 N94-21417

CASES (CONTAINERS)
Characterization and modelling of extremely high frequency enclosures p 1782 N94-22177

CASSEGRAIN ANTENNAS
Performance of a simple circular polarization selective surface p 1746 N94-22198

CASTING
Machinable oxide ceramic [AD-D015927] p 1699 N94-20017
Fabrication of porous ceramics by freeze-casting/freeze-drying [PB93-202513] p 1705 N94-21425
Materials Science and Engineering [DE93-040497] p 1675 N94-21530
User's guide for the casting process simulator software CaPS-2D, version 1.0 [DE93-040398] p 1917 N94-21923

CATACLYSMIC VARIABLES
The x ray halo of AM Her [NASA-CR-189310] p 2054 N94-20142
Studies of an x ray selected sample of cataclysmic variables [NASA-CR-194773] p 2055 N94-20344

CATALYSIS
Catalytic hydrogenation of carbon monoxide [DE94-000881] p 1678 N94-20103
Surface science and modeling studies of endothermic fuels catalysis [AD-A272850] p 1712 N94-21192

CATALYSTS
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst [AD-A271060] p 1711 N94-19906
Fuel processing requirements and techniques for fuel cell propulsion power [DE93-019516] p 1750 N94-20257
Transient studies of low temperature catalysts for methane conversion [DE93-041232] p 1680 N94-20934

Polymerization of enantiomerically pure 2,3-dicarboalkoxy norbornadienes and 5,6-disubstituted norbornenes by well-characterized molybdenum ROMP catalysts
[AD-A272649] p 1704 N94-21186
Surface science and modeling studies of endothermic fuels catalysis
[AD-A272850] p 1712 N94-21192
Synthesis and catalytic properties of metal and semiconductor nanoclusters
[DE93-019418] p 2028 N94-21541
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043

CATHETERIZATION
Detection of emetic activity in the cat by monitoring venous pressure and audio signals
p 1886 N94-21903

CATHODES
Evaluation of externally heated pulsed MPD thruster cathodes
[NASA-CR-191090] p 1670 N94-21565
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells
[DE93-019536] p 1847 N94-21650
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870

CATHODOLUMINESCENCE
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953
Cathodoluminescence observations of in situ aqueous destruction of chondrules in the Murchison CM chondrite
p 2083 N94-20750

CATS
Changes in plasma vasopressin during motion sickness in cats p 1885 N94-21898
Detection of emetic activity in the cat by monitoring venous pressure and audio signals
p 1886 N94-21903
Area postrema ablations in cats: Evidence for separate neural routes for motion- and xylazine-induced CTA and emesis p 1887 N94-21906
Conditioned taste aversion and motion sickness in cats and squirrel monkeys p 1888 N94-21914

CAUCHY PROBLEM
Approximate methods for N-component solute transport and ion-exchange
[CWI-NM-R9223] p 1910 N94-21078

CAVITATION FLOW
Cavitation modelling p 1668 N94-20079
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo)
[DE93-041320] p 1694 N94-21943

CAVITIES
Measurement and computation of the higher order modes of the ALS 500 MHz accelerating cavities
[DE93-019256] p 1980 N94-20292
Speed of sound data and related models for mixtures of natural gas constituents
[PB93-200822] p 1968 N94-21447
Generation of harmonic radiation using the multi-cavity free-electron laser
[DE94-001261] p 1820 N94-21975

CAVITY RESONATORS
Tunable laser frequency stabilizing system
[AD-D015904] p 1815 N94-20055
Study of coupled-bunch collective effects in the PEP-2 B-Factory
[DE93-040117] p 1979 N94-20274
Measurement and computation of the higher order modes of the ALS 500 MHz accelerating cavities
[DE93-019256] p 1980 N94-20292
Three point lead screw positioning apparatus for a cavity tuning plate
[NASA-CASE-LEW-15216-1] p 1822 N94-20375
A comprehensive theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20500
Microwave properties and characterization of co-evaporated BSCCO thin films p 1709 N94-20518
An 85 GHz quasioptical gyroklystron experiment
[AD-A272020] p 1752 N94-20931
Simulation of traveling-wave output structures for high power RF tubes
[DE93-041005] p 1763 N94-21685
Improvement of the performance of IMPATT oscillators through appropriate modification of resonant-cap activity
p 1782 N94-22179
Aperture coupling of circular cylindrical dielectric resonator antenna
[ISBN-0-315-60632-0] p 1743 N94-22409

CCD STAR TRACKER
Wilbur: A low-cost CCD camera system for MDM Observatory p 1814 N94-22510

CD-ROM
Publication of science data on CD-ROM: A guide and example
[NASA-CR-4560] p 1842 N94-21585
The digital archive of the International Halley Watch
p 2047 N94-22496
An x ray archive on your desk: The Einstein CD-ROM's p 2048 N94-22519
UIT support observations archive
p 2048 N94-22534

CELESTIAL MECHANICS
A new procedure for orbit determination based on three lines of sight: Angles only
[AD-A272937] p 1652 N94-21224

CEMENTS
Some experiments on using backscattered electron and energy dispersive x ray imaging in determination of portland cement clinker phase composition p 1708 N94-21893
A quantitative S.E.M. image analysis of cement paste microstructure p 1708 N94-21894

CENTRAL NERVOUS SYSTEM
Reassessment of area postrema's role in motion sickness and conditioned taste aversion
p 1886 N94-21901

CENTRAL PROCESSING UNITS
Mongoose: Creation of a Rad-Hard MIPS R3000
p 1754 N94-21090
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114
Seeing the forest for the trees: Networked workstations as a parallel processing computer p 1938 N94-22454

CENTRIFUGAL COMPRESSORS
Experimental and computational results from a large low-speed centrifugal impeller
[NASA-TM-106421] p 1636 N94-20136

CENTRIFUGAL FORCE
A vibration model for centrifugal contactors
[DE93-040645] p 1833 N94-21927

CENTROIDS
A formulation of quantum statistical mechanics based on the Feynman path centroid density 2 dynamical properties
[AD-A272698] p 2037 N94-21166
A formulation of quantum statistical mechanics based on the Feynman path centroid density 1: Equilibrium properties
[AD-A272809] p 2037 N94-21171

CEPHEID VARIABLES
VVNRS: Variable phenomena in VV Cephei
[NASA-CR-194731] p 2056 N94-21835

CERAMIC BONDING
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025

CERAMIC FIBERS
Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618

CERAMIC MATRIX COMPOSITES
Integrity and testing concerns of thermostructural materials p 1661 N94-21384
Thermostructural material composites for space applications p 1664 N94-21398

CERAMICS
Dynamic, multiaxial impact response of confined and unconfined ceramic rods
[DE93-040057] p 1829 N94-19824
Hydrodynamic compressibility of high-strength ceramics
[DE93-019424] p 1698 N94-19903
Preparation and properties of sol-gel derived PZT thin films for decoupling capacitor applications
[DE93-018853] p 2013 N94-19961
Machinable oxide ceramic
[AD-D015927] p 1699 N94-20017
Polymer gels as precursors to high-performance materials
[AD-A270937] p 1699 N94-20046
Silver lined ceramic vessel
[AD-D015917] p 1700 N94-20057
Guanidine based vehicle/binders for use with oxides, metals, and ceramics
[NASA-CASE-LEW-15314-1] p 1700 N94-20195
Improved ceramic slip casting technique --- application to aircraft model fabrication
[NASA-CASE-LAR-14471-1] p 1702 N94-20377
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 1823 N94-20379
Development of improved processing and evaluation methods for high reliability structural ceramics for advanced heat engine applications, phase 1
[DE93-040528] p 1702 N94-20481
Sintering silicon nitride
[NASA-CASE-LEW-15489-1] p 1703 N94-20529
Development of fundamental understanding of friction and wear mechanisms by atomic-scale tribological studies of ceramic materials and multilayered thin films
[AD-A271485] p 1703 N94-20548
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications
[AD-A272897] p 1704 N94-21197
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
Adhesive bonded joint with improved cyclic fatigue life for alumina-ceramic cylinders and hemispheres: Fourth generation housings
[AD-A273061] p 1831 N94-21310
In-vacuo slip testing of materials for SSRMS friction brakes p 1661 N94-21381
High temperature simulation chambers. Physico-chemical and thermal effect of atmospheric reentry on ceramic materials p 1653 N94-21404
A method of measuring the thermoradiative properties of ceramic materials in a space environment
p 1665 N94-21405
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416
Utilization of metals to improve the lubrication of ceramic load-bearing devices
[PB93-202448] p 1825 N94-21424
Fabrication of porous ceramics by freeze-casting/freeze-drying
[PB93-202513] p 1705 N94-21425
Lubricated wear of steel-ceramic and ceramic-ceramic systems
[PB93-202356] p 1825 N94-21450
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride
[DE93-041307] p 1706 N94-21516
Issues related to mechanical properties of neutron-irradiated ceramics
[DE93-040262] p 1707 N94-21560
Electron holography applied to the study of ceramic materials
[DE94-000329] p 1707 N94-21653
Ceramic Technology Project
[DE94-001011] p 1707 N94-21822
Proceedings of the Seventh Annual Conference on Fossil Energy Materials
[DE94-001091] p 1848 N94-21823
An assessment of the cost of microwave sintering ceramic tiles for armor applications
[DE94-000978] p 1693 N94-21850
Dynamic properties of ceramic materials
[DE94-000654] p 1708 N94-21963
Time-dependent reliability analysis of ceramic engine components p 1828 N94-22619

CEREBRAL CORTEX
Toward a neurobiological theory of visual attention
[AD-A270724] p 1890 N94-20112

CERENKOV COUNTERS
A Monte Carlo study of the Sudbury Neutrino Observatory small test detector experiment
[ISBN-0-315-59056-4] p 1977 N94-22416

CERIUM
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987

CERIUM OXIDES
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb)
[DE93-040227] p 2033 N94-21992

CERMETS
In-vacuo slip testing of materials for SSRMS friction brakes p 1661 N94-21381
Dynamic properties of ceramic materials
[DE94-000654] p 1708 N94-21963

CESIUM ALLOYS
Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21762

CESIUM IODIDES
Csl and some new photocathodes
[DE93-019387] p 1750 N94-20314

CHALCOGENIDES
Photoelectron spectroscopy at model boundary surfaces of energy converter semiconductors/electrolyte contacts: Adsorption, coadsorption, and triadsorption of Br2, Na, and H2O on Van der Waals surfaces of metal chalocogenide semiconductors
[ETN-93-95063] p 2015 N94-20152

CHANGE DETECTION
Application of change detection to dynamic contact sensing
[AD-A270523] p 1939 N94-20105
Asymptotics of the GLRT for the disorder problem in diffusion processes
[INRIA-RR-1735] p 1951 N94-20227
The 7th Brazilian Remote Sensing Symposium, volume 2 p 1838 N94-20956
Change detection on land use and rainforest cover at Paragominas region, Brazilian Amazon p 1838 N94-20957

CHANNEL CAPACITY
Comparison of theoretical and simulated performance results for sloppy-slotted Aloha signaling p 1746 N94-22204
ARQ on fading channels p 1747 N94-22242

CHANNEL FLOW
Seismic-triggering history of the catastrophic outflows in the Chryse region of Mars p 2091 N94-20399
Discharge rates in Ma'adim Vallis, Mars p 2128 N94-20830
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels
[DE93-040181] p 1804 N94-21765

CHANNELS (DATA TRANSMISSION)
Handbook. Volume 2: Digital systems validation. Chapter 18: Avionic data bus integration technology
[DOT/FAA/CT-88/10-VOL-2] p 1647 N94-20343
Characteristics of 0.8- and 0.2-microns gate length In(x)Ga(1-x) As/In(0.52)Al(0.48)As/InP (0.53 less than or equal to x less than or equal to 0.70) modulation-doped field-effect transistors at cryogenic temperatures p 1733 N94-20499
A simplified token bus protocol specified using LOTOS
[TR-92-15] p 1910 N94-21062
A consideration of the integration of terrestrial and satellite mobile systems p 1746 N94-22172
Specification and formal verification of the safety criterion in the alternating bit protocol p 1784 N94-22193
Trellis coded multi-orthogonal modulation p 1747 N94-22231

CHAOS
Convergence of the hermite wavelet expansion
[AD-A271435] p 1854 N94-19841
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610
On a proposed symbolic dynamics for the Henon map
[AD-A272514] p 1955 N94-21359

CHARACTER RECOGNITION
Three original programmes for managers p 1923 N94-22083

CHARACTERIZATION
CMOS gate array characterization procedures
[AD-A269943] p 2014 N94-20029
Birefringence control and dispersion characteristics of silicon oxynitride optical waveguides, appendix 6 p 1989 N94-21600

CHARGE CARRIERS
Optical amplification and threshold behavior on InGaAs/InGaAsP multiquantum well structures
[ETN-93-94181] p 2026 N94-21151

CHARGE COUPLED DEVICES
Multiport solid-state imager characterization at variable pixel rates
[DE93-018366] p 1808 N94-20287
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging p 2082 N94-20659
An 18 bit 50 kHz ADC for low earth orbit p 1764 N94-21702
Charge integrating optical position sensor p 1778 N94-22152
Restoration of HST images with missing data p 2057 N94-22439
CCD surface photometry of galaxies p 2058 N94-22445
Visualizing the universe, part 2 p 2063 N94-22472
The University of Hawaii Institute for Astronomy CCD camera control system p 1826 N94-22489
CCD data acquisition systems at Lick and Keck Observatories p 2047 N94-22495
Wilbur: A low-cost CCD camera system for MDM Observatory p 1814 N94-22510
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552

CHARGE DISTRIBUTION
Interactions of slow H, H2, and H3 with thin foils
[DE93-040263] p 1976 N94-21995

CHARGE EXCHANGE
Testing double ionization mechanisms with highly-charged ions
[DE93-018750] p 1970 N94-19958

CHARGE TRANSFER
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions
[AD-A272665] p 1681 N94-21216

CHARGED PARTICLES
Surface science at the solid liquid interface
[AD-A271422] p 1678 N94-19839
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870
Energy gain spectroscopic study of Ar(q+)-Ar collisions at 40 qeV
[DE93-040284] p 1970 N94-19871
Persistent wakefields associated with waveguide damping of higher order modes
[DE93-040973] p 1715 N94-19874
Tactical laser weapons and other directed-energy weapons
[AD-A267961] p 1816 N94-20484
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937
Electrostatic charging and secondary effects in materials submitted to radiation in space p 1661 N94-21383
Detailed analysis case studies of trapped plasmas at the Earth's magnetic equator
[AD-A272497] p 1858 N94-21432
Production, collection and utilization of very long-lived heavy charged leptons
[DE93-040867] p 1977 N94-22009

CHARM (PARTICLE PHYSICS)
Measurement of the strange quark distribution function in W(+) charm quark events
[DE93-018267] p 1973 N94-20474
CERN-derived analysis of lunar radiation backgrounds p 2080 N94-20880
Recent Fermilab results on hadroproduction of heavy flavors
[DE94-000595] p 1976 N94-21867

CHARPY IMPACT TEST
Microscopic evaluation of low-temperature embrittlement in type 308 stainless steel welds
[DE93-040266] p 1690 N94-20282

CHASSIGNITES
High D/H ratios of water in magmatic amphiboles in Chassigny: Possible constraints on the isotopic composition of magmatic water on Mars p 2134 N94-20862
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668

CHEMICAL ANALYSIS
Wavelength dispersive analysis with the synchrotron x ray fluorescence microprobe p 1685 N94-20717
The chondrite Mihonoseki: New observed fall p 2083 N94-20764
Evaluation of pre-extraction analytical holding times for nitroaromatic and nitramine explosives in water
[AD-A271547] p 1712 N94-20927
Structural and chemical analysis of a silicon nitride film on GaAs by null ellipsometry p 1709 N94-20975
Orbital debris and micrometeoroids: LDEF and Mir data p 1659 N94-21368
Atomic oxygen interaction with spacecraft materials: Relationship between orbital and ground-based testing for materials certification p 1663 N94-21393
Improvement of the stability of the process for synthesizing chemically prepared varistor powder
[DE94-000345] p 1763 N94-21654

CHEMICAL BONDS
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Polyimides containing amide and perfluoroisopropylidene connecting groups
[NASA-CASE-LAR-14608-1] p 1702 N94-20374
Infrared absorption spectroscopy of the weakly bonded CO-Cl2 complex
[AD-A271757] p 2027 N94-21304

CHEMICAL CLEANING
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009

CHEMICAL COMPOSITION
Chemical equilibrium in high pressure molecular fluid mixtures
[DE93-040160] p 1796 N94-19829
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
Unlike-pair interactions at high pressure and high temperature
[DE93-019948] p 1796 N94-19916
Polybenzoxazole via aromatic nucleophilic displacement
[NASA-CASE-LAR-14606-1-CU] p 1672 N94-20540
Zinc and titanium smoke: Chemical composition and physical characteristics
[FOA-C-40277-4.9] p 1680 N94-20552
Helium in interplanetary dust particles p 2082 N94-20653
Impact glasses from the ultrafine fraction of lunar soils p 2097 N94-20662
Self diffusion of alkaline-Earth in Ca-Mg-aluminosilicate melts: Experimental improvements on the determination of the self-diffusion coefficients p 1684 N94-20669
Micrometeorite dynamic pyrometamorphism: Observation of a thermal gradient in iron-nickel sulfide p 2083 N94-20716
Further analyses of Rio Cuarto impact glass p 1685 N94-20745
Combined backscatter Moessbauer spectrometer/x ray fluorescence analyzer (BaMS/XRF) for extraterrestrial surfaces p 1686 N94-20761
The U-Th-Pb, Sm-Nd, and Ar-Ar isotopic systematics of lunar meteorite Yamato-793169 p 2084 N94-20834
Petrology and geochemistry of VLT glasses from double drive tube 79001/2 p 1687 N94-20870
The carbon components in SNC meteorites of feldspathic harzburgite composition p 2086 N94-20885
Further carbon isotope measurements of LEW 88516 p 2086 N94-20886
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona p 1863 N94-20889
Regolith breccia consisting of H and LL chondrite mixture p 2080 N94-20892
Consortium reports on lunar meteorites Yamato 793169 and Asuka 881757, a new type of mare basalt p 2086 N94-20893
Preliminary AEM study of the microstructure and composition of metal particles in ordinary chondrites p 2086 N94-20894
Micrometeorite pre-solar diamonds from Greenland cryoconite? p 2086 N94-20895
Age and thermochronology of K-feldspars from the Manson Impact Structure p 1863 N94-20899
Chemical composition of new Acapulcoites and Lodranites p 2086 N94-20905
Thin film compositional analysis using null or fixed wavelength ellipsometry p 1709 N94-20976
Analysis of a sandstorm weather process-translation
[AD-A272959] p 1867 N94-21250
Effects of aqueous solution compositions on Aerocapacitor energy density
[DE94-000385] p 1768 N94-21753
Acceleration of solar-flare particles as viewed from their chemical composition p 2006 N94-22672

CHEMICAL ENGINEERING
A project on parameter identification in reaction kinetics
[CWI-NM-R9301] p 1682 N94-21574
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044
Investigations on trends in global environment adaptive industrial technologies
[DE94-714868] p 1853 N94-22258

CHEMICAL EQUILIBRIUM
Chemical equilibrium in high pressure molecular fluid mixtures
[DE93-040160] p 1796 N94-19829
Molecular equilibria and condensation sequences in carbon rich gases p 2083 N94-20756

CHEMICAL EXPLOSIONS
Unlike-pair interactions at high pressure and high temperature
[DE93-019948] p 1796 N94-19916
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004
Computer simulation of molecular response at a shock front
[DE94-001050] p 1977 N94-22396

CHEMICAL FRACTIONATION
Fine resolution chronology based on initial Sr-87/Sr-86
[CONTRIB-5230(794)] p 1686 N94-20794
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875

CHEMICAL LASERS
A theory for optical wavelength control in short pulse free electron laser oscillators
[AD-A271706] p 1817 N94-21353
CHEMICAL MACHINING
Focused-ion-beam material removal rates
[AD-A270852] p 1713 N94-19834
CHEMICAL PROPERTIES
The metallic bond for monolayer transition metal layers on transition metal surfaces
[DE93-019060] p 1691 N94-20313
First discovery of the organic materials in deep-sea iron cosmic spherule p 1685 N94-20677
CHEMICAL REACTIONS
Chemical equilibrium in high pressure molecular fluid mixtures
[DE93-040160] p 1796 N94-19829
Unlike-pair interactions at high pressure and high temperature
[DE93-019948] p 1796 N94-19916
ALE project
[AD-A271080] p 2014 N94-19980
Computed potential energy surfaces for chemical reactions
[NASA-CR-194600] p 1679 N94-20169
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
Polybenzoxazole via aromatic nucleophilic displacement
[NASA-CASE-LAR-14606-1-CU] p 1672 N94-20540
Physical chemistry of energetic nitrogen compounds
[AD-A271819] p 1712 N94-20625
Chemical reaction fouling model for single-phase heat transfer
[DE93-019556] p 1802 N94-20942
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
Strength and toughness improvement of silicide intermetallics by nanophase and microphase reinforcements
[AD-A272914] p 1692 N94-21320
Atomic oxygen interaction with spacecraft materials: Relationship between orbital and ground-based testing for materials certification p 1663 N94-21393
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663
Femtosecond dynamics in hydrogen-bonded solvents
[DE93-019937] p 1683 N94-21842
Theoretical research program to study chemical reactions in AOTV bow shock tubes
[NASA-CR-194710] p 1804 N94-22027
Interfacial reactions between titanium and borate glass
[DE93-012847] p 1683 N94-22031
Characteristics of shock-compressed configuration of Ti and Si powder mixtures
[DE93-018857] p 1713 N94-22033
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384
CHEMICAL REACTORS
Direct aromatization of methane
[DE93-040631] p 1678 N94-19890
CHEMICAL TESTS
Materials evaluation at ESA/ESTEC
p 1662 N94-21386
CHEMICAL WARFARE
Air transport of samples containing chemical warfare agents
[FFI-93/6005] p 1851 N94-21455
CHEMILUMINESCENCE
Optical fibers and Fluorosensors having improved power efficiency and methods of producing same
[NASA-CASE-LAR-14525-1-CU] p 1986 N94-20378
CHEMISORPTION
Adhesive electroless metallization of fluoropolymeric substrates
[AD-A271858] p 1703 N94-20526
Spectral analysis of chemisorbed CO2 on Mars analog materials p 2140 N94-20900
Direct images of thermal disorder in the Cl-Si and H-O-Si chemisorption bond on Si(100)
[AD-A272386] p 1680 N94-21145
CHEMOTHERAPY
Numerical modeling for an electric-field hyperthermia applicator p 1729 N94-20451
CHIPS (ELECTRONICS)
Materials processing and manufacturing technologies for Diamond Substrate MultiChip Modules (DSMCM)
[AD-A271011] p 2011 N94-19821
CMOS gate array characterization procedures
[AD-A269943] p 2014 N94-20029
Efficient chip signature checking for diagnosing boundary scan systems
[RR-901-I] p 1749 N94-20166
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Quartz/fused silica chip carriers
[NASA-CR-194154] p 2016 N94-20340
High accuracy die mechanical stress measurement with the ATC04 Assembly Test Chip
[DE93-019435] p 1830 N94-20477
Cratering evaluations and results
[DE93-040347] p 1691 N94-20478
An adaptive, lossless data compression algorithm and VLSI implementations p 1753 N94-21080
Test results for SEU and SEL immune memory circuits p 1754 N94-21087
Space qualified high speed Reed Solomon encoder p 1754 N94-21088
Mixed voltage VLSI design p 1756 N94-21104
Materials processing and manufacturing technologies for diamond substrate multichip modules
[AD-A271484] p 2027 N94-21319
The 1992 4th NASA SERC Symposium on VLSI Design
[NASA-CR-194591] p 1763 N94-21694
Applications of correlator chips in radio science p 1763 N94-21695
An 18 bit 50 kHz ADC for low earth orbit p 1764 N94-21702
On the decomposition of synchronous state mechines using sequence invariant state machines p 1764 N94-21703
Schematic driven layout of Reed Solomon encoders p 1766 N94-21722
A 1 GHz sample rate, 256-channel, 1-bit quantization, CMOS, digital correlator chip p 1768 N94-21732
Low power, CMOS digital autocorrelator spectrometer for spaceborne applications p 1666 N94-21733
The distributed CAD system for LSI/VLSI design p 1923 N94-22068
VLSI design of a parallel video output interface p 1778 N94-22153
Architectures of the free space optical interconnects p 1789 N94-22220
Towards the formal verification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191466] p 1937 N94-22414
The VLBA correlator: Real-time in the distributed era p 2049 N94-22547
IRAF and STSDAS under the new ALPHA architecture p 2049 N94-22553
CHIPS (MEMORY DEVICES)
A DRAM compiler algorithm for high performance VLSI embedded memories p 1767 N94-21729
A novel cache mechanism p 1767 N94-21730
A set-associative, fault-tolerant cache design p 1768 N94-21731
CHIRAL DYNAMICS
Lattice gauge theory: Present status
[DE93-041154] p 2038 N94-21692
CHLORINE
Optical diagnostic instrument for monitoring etch uniformity during plasma etching of polysilicon in a chlorine-helium plasma
[DE93-019582] p 1993 N94-20261
Direct images of thermal disorder in the Cl-Si and H-O-Si chemisorption bond on Si(100)
[AD-A272386] p 1680 N94-21145
Infrared absorption spectroscopy of the weakly bonded CO-Cl2 complex
[AD-A271757] p 2027 N94-21304
CHLOROFLUOROCARBONS
Alternative refrigerants and refrigeration cycles for domestic refrigerators
[DE93-040481] p 1714 N94-20099
CHOLESKY FACTORIZATION
Fast scalar algorithms for multivariate partial correlations and their empirical counterparts
[RR-903-M] p 1905 N94-20201
The design of linear algebra libraries for high performance computers
[DE93-040458] p 1960 N94-21967
CHONDRITES
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
Carbonaceous xenoliths from the Erevan howardite p 1684 N94-20642
Igneous rock from Severnyi Kolchim (H3) chondrite: Nebular origin p 2082 N94-20643
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
Abundance and composition of solar KR in the H3-H6 chondrite ACFER111 p 1684 N94-20676
Elevated initial Sr-87/Sr-86 in ordinary chondrite metal p 1685 N94-20695
Oxygen isotopic relationships between the LEW85332 carbonaceous chondrite and CR chondrites p 2083 N94-20708
Cosmogenic-radionuclide profiles in Knyahinya: New measurements and models p 2106 N94-20713
Post-metamorphic brecciation in type 3 ordinary chondrites p 2083 N94-20749
Cathodoluminescence observations of in situ aqueous destruction of chondrules in the Murchison CM chondrite p 2083 N94-20750
Orthopyroxenes as recorders of diogenite petrogenesis: Trace element systematics p 1686 N94-20760
The chondrite Mihonoseki: New observed fall p 2083 N94-20764
Size distributions and aerodynamic equivalence of metal chondrules and silicate chondrules in Acfer 059 p 2084 N94-20773
Multielement analysis of interplanetary dust particles using TOF-SIMS p 2084 N94-20790
A new Antarctic meteorite with chromite, orthopyroxene and metal with reference to a formation model of S asteroids p 2084 N94-20813
Rhenium-osmium isotope systematics of ordinary chondrites and iron meteorites p 2085 N94-20854
Magnetic record in chondrite meteorites p 2085 N94-20858
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20866
Multivariate statistical analysis: Principles and applications to coorbital streams of meteorite falls p 1964 N94-20881
Regolith breccia consisting of H and LL chondrite mixture p 2080 N94-20892
Preliminary AEM study of the microstructure and composition of metal particles in ordinary chondrites p 2086 N94-20894
Lewis Cliff 87057: A new metal-rich E3 chondrite with similarities to Mt. Egerton, Shallowater and Happy Canyon p 2086 N94-20901
Mineralogy of dark clasts in primitive versus differentiated meteorites p 2087 N94-20907
CHONDRULE
Igneous rock from Severnyi Kolchim (H3) chondrite: Nebular origin p 2082 N94-20643
Oxygen isotopic relationships between the LEW85332 carbonaceous chondrite and CR chondrites p 2083 N94-20708
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Post-metamorphic brecciation in type 3 ordinary chondrites p 2083 N94-20749
Cathodoluminescence observations of in situ aqueous destruction of chondrules in the Murchison CM chondrite p 2083 N94-20750
Size distributions and aerodynamic equivalence of metal chondrules and silicate chondrules in Acfer 059 p 2084 N94-20773
Multiplicity of chondrule heating events and the coarsening of chondrule textures p 2085 N94-20860
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20866
CHROMATES
Evaluation of non-chromium-containing deoxidizers for aluminum
[DE94-001377] p 1695 N94-21978
CHROMATOGRAPHY
Hydrogen isotope separation experience at the Savannah River Site
[DE93-019832] p 1679 N94-20266
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021
CHROMIC ACID
A comparison of sulfuric acid/boric acid anodize and chromic acid anodize processes
[AD-A271933] p 1703 N94-20614
CHROMITES
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906
CHROMIUM
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite p 2086 N94-20902
Optical properties of chromium and neodymium in zirconium - barium - lanthanum - aluminum fluoride glass
[AD-A271609] p 1987 N94-21236
Shattering the myth of the resonantly photo-pumped neon-like titanium laser
[DE93-019624] p 1819 N94-21873

Evaluation of non-chromium-containing deoxidizers for aluminum
[DE94-001377] p 1695 N94-21978
Orientationally independent antiferromagnetic coupling in epitaxial Fe/Cr (211) and (100) superlattices
[DE94-001270] p 2035 N94-22584

CHROMIUM ALLOYS
Investigation of austenitic alloys for advanced heat recovery and hot gas cleanup systems
[DE93-017863] p 1687 N94-19802
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926
Investigation of moisture-induced embrittlement of iron aluminides
[DE93-040841] p 1695 N94-21949
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates
[DE93-018786] p 1696 N94-22037

CHRONOLOGY
Chronology of lunar granite 12033,576: Resetting of Rb-Sr and K-Ca isochrons p 2115 N94-20763
Chronology and genesis of high-Ti mare volcanism: Melting of cogenetic depleted and enriched reservoirs p 2118 N94-20777
Fine resolution chronology based on initial Sr-87/Sr-86
[CONTRIB-5230(794)] p 1686 N94-20794
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
[CONTRIB-5241(804)] p 2084 N94-20795
Aluminum-26 activities in meteorites p 1686 N94-20851
Consortium reports on lunar meteorites Yamato 793169 and Asuka 881757, a new type of mare basalt p 2086 N94-20893

CINETHEODOLITES
Trajectory computations for an improved cinetheodolite tracking system p 1791 N94-22236

CIRCLES (GEOMETRY)
Higher order Bezier circles
[NASA-CR-177633] p 1897 N94-21784

CIRCUIT BOARDS
Solder technology in the manufacturing of electronic products
[DE93-018842] p 1699 N94-19960
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-194724] p 1897 N94-20336

CIRCUIT RELIABILITY
VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110
Correct CMOS IC defect models for quality testing p 1755 N94-21093

CIRCUITS
CMOS gate array characterization procedures
[AD-A269943] p 2014 N94-20029
Wire assembly for electrically conductive circuits
[AD-D015966] p 1761 N94-21275
Variable-field permanent magnet dipole
[DE94-000800] p 1820 N94-22020

CIRCULAR CYLINDERS
Extinction efficiencies from DDA calculations solved for finite circular cylinders and disks p 1880 N94-22340

CIRCULAR ORBITS
Venus gravity: New Magellan low altitude data p 2117 N94-20772

CIRCULAR POLARIZATION
Circular polarizing mirrors for high power lasers
[AD-A267820] p 1815 N94-19965
Magnetic circular dichroism in x ray absorption and core-level photoemission
[DE93-019381] p 1688 N94-19986
The coherent backscattering opposition effect p 1991 N94-20646
Performance of a simple circular polarization selective surface p 1746 N94-22198

CIRCULATION
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment
[AD-A272851] p 1802 N94-21193

CIRCULATION DISTRIBUTION
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment
[AD-A272851] p 1802 N94-21193
Large-scale circulation regimes and tropical cyclone characteristics over the western pacific ocean
[AD-A273004] p 1867 N94-21307

CIRROSTRATUS CLOUDS
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303

CIRRUS CLOUDS
Holographic measurements of ice crystals in cirrus clouds during International Cirrus Experiment ICE
[GKSS-92/E/14] p 1866 N94-21052
The FIRE Cirrus Science Results 1993
[NASA-CP-3238] p 1871 N94-22292
Cirrus microphysics observations made during FIRE 2: Small particles, high concentrations, and probe comparisons p 1871 N94-22294
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals p 1871 N94-22295
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2 p 1872 N94-22298
Comparison of radiation and cloud parameters derived from satellite and aircraft measurements during FIRE 2 cirrus IFO p 1872 N94-22299
Microphysical properties of the November 26 cirrus cloud retrieved by Doppler radar/IR radiometer technique p 1873 N94-22304
Lidar and radar derived cirrus microphysical properties for the 26 November 1991 case study p 1873 N94-22305
CIMSS FIRE research activities p 1873 N94-22307
Meteorological analysis of the December 4-6 FIRE cirrus-2 case p 1875 N94-22314
Cirrus cloud retrievals from HIS observations during FIRE 2 p 1875 N94-22315
Analysis of the GOES 6.7 micrometer channel observations during FIRE 2 p 1875 N94-22316
Ground-based passive remote sensing during FIRE IFO 2 p 1844 N94-22319
Comparisons of downwelling radiation to model predictions based on groundbased measurements during FIRE 1991 p 1876 N94-22320
Spectral variation of scattering and absorption by cirrus p 1876 N94-22321
Spectral emissivity of cirrus clouds p 1876 N94-22322
Examination of the observed synoptic scale cirrus cloud environment: The December 3-6 FIRE cirrus case study p 1877 N94-22325
The 5-6 December 1991 FIRE IFO 2 jet stream cirrus case study: The influence of volcanic aerosols p 1877 N94-22326
Three dimensional modeling of cirrus during the 1991 FIRE IFO 2: Detailed process study p 1877 N94-22327
Meteorological analysis of the November 25 FIRE cirrus-2 case: A well-defined ridge-crest cirrus system over Oklahoma p 1877 N94-22328
Cirrus cloud development in a mobile upper tropospheric trough: The November 26th FIRE cirrus case study p 1878 N94-22329
Vertical velocity in cirrus case obtained from wind profiler p 1878 N94-22330
Mesoscale simulations of the November 25-26 and December 5-6 cirrus cases using the RAMS model p 1878 N94-22331
Dynamical characteristics of cirrus clouds from aircraft and radar measurements p 1878 N94-22332
Estimation of cirrus cloud particle fallspeeds from vertically pointing Doppler radar p 1879 N94-22333
Normalized vertical ice mass flux profiles from vertically pointing 8-mm-wavelength Doppler radar p 1879 N94-22334
Importance of aggregation and small ice crystals in cirrus clouds, based on observations and an ice particle growth model p 1879 N94-22336
SSH-2 measurements of cirrus at 18-28 micrometers from the King Air during FIRE 2 p 1880 N94-22338
Investigation of the effects of the macrophysical and microphysical properties of cirrus clouds on the retrieval of optical properties: Results for FIRE 2 p 1880 N94-22339
Extinction efficiencies from DDA calculations solved for finite circular cylinders and disks p 1880 N94-22340
Surface-induced brightness temperature variations and their effects on detecting thin cirrus clouds using IR emission channels in the 8-12 micrometer region p 1880 N94-22341
Remote sensing estimates of cirrus particle size for tropical and midlatitude cirrus: Hexagonal crystals and ice spheres p 1880 N94-22342
Are tropical cirrus brighter than mid-latitude cirrus? p 1881 N94-22343
An overview of the radiation component of the NASA TOGA-COARE experiment p 1881 N94-22344

CIRRUS SHIELDS
Spectral emissivity of cirrus clouds p 1876 N94-22322

CITIES
Role of surface characteristics in urban meteorology and air quality
[DE93-040929] p 1851 N94-21740
Urban applications of satellite remote sensing and GIS analysis
[PB93-202174] p 1842 N94-21855
The use of lidar for the evaluation of traffic-related urban pollution
[DE94-000704] p 1852 N94-22017

CITRIC ACID
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947

CLADDING
Optical fibers and Fluorosensors having improved power efficiency and methods of producing same
[NASA-CASE-LAR-14525-1-CU] p 1986 N94-20378
Evaluation of the fabricability of advanced iron aluminide-clad austenitic stainless steel tubing
[DE93-040598] p 1693 N94-21771

CLASSICAL MECHANICS
On the correspondence limit of relativistic quantum mechanics
[DE93-040939] p 2038 N94-21971

CLASSIFICATIONS
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
Classification of simple vegetation types using POLSAR image data p 1722 N94-20420
Post-metamorphic brecciation in type 3 ordinary chondrites p 2083 N94-20749
A classification scheme for the morphology of lava flow fields p 1863 N94-20879
Application of SPOT to GIS/LIS in land capability evaluation for regional planning of JAICO semi-arid region of Piaui, Brazil p 1838 N94-20955
Classification in feature-based default inheritance hierarchies
[TR-473] p 1911 N94-21180
Some extensions of the k-means algorithm for image segmentation and pattern classification
[AD-A271691] p 1913 N94-21364
Automated cloud classification with a fuzzy logic expert system p 1875 N94-22313

CLASSIFIERS
Classification of simple vegetation types using POLSAR image data p 1722 N94-20420

CLASSIFYING
Optimal sorting in linear arrays with minimum global control
[CWI-CS-R9244] p 1908 N94-21024
Sorting network for the partial selection problem p 1773 N94-22121

CLAYS
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668

CLEANERS
Evaluation of non-chromium-containing deoxidizers for aluminum
[DE94-001377] p 1695 N94-21978

CLEANING
A calcium oxide sorbent process for bulk separation of carbon dioxide
[DE93-019288] p 1847 N94-21540
Evaluation of non-chromium-containing deoxidizers for aluminum
[DE94-001377] p 1695 N94-21978
Experiments with a fluid deicing system for cleaning laminar wings p 1640 N94-22601

CLIMATE
Scientific development of a massively parallel ocean climate model
[DE93-019446] p 1855 N94-20219
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
A wet-geology and cold-climate Mars model: Punctuation of a slow dynamic approach to equilibrium p 2090 N94-20389
Climate forcings and feedbacks p 1869 N94-21641
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667
A model for the evolution of CO2 on Mars p 2144 N94-21671
Possible solutions to the problem of channel formation on early Mars p 2144 N94-21673
CIMSS FIRE research activities p 1873 N94-22307
Analysis of the tropospheric water distribution during FIRE 2 p 1876 N94-22324

CLIMATE CHANGE
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930

Study of regional climate change
[DE93-018926] p 1850 N94-19941
The CSIRO 9-level atmospheric general circulation model
[CSIRO-TP-26] p 1855 N94-20256
Soil temperatures
[KNMI-WR-92-05] p 1865 N94-20309
The fate of water deposited in the low-lying northern plains p 2089 N94-20387
Global blackout following the K/T Chicxulub impact: Results of impact and atmospheric modeling p 1854 N94-20698
Schools of the Pacific rainfall climate experiment p 1881 N94-20699
Research in progress: FY 1992
[DE94-000410] p 1836 N94-20936
Sunphotometer network for monitoring aerosol properties in the Brazilian Amazon p 1839 N94-20961
Long-Term Monitoring of Global Climate Forcings and Feedbacks
[NASA-CP-3234] p 1868 N94-21639
Monitoring issues from a modeling perspective p 1868 N94-21640
Climate forcings and feedbacks p 1869 N94-21641
Accuracy requirements — for monitoring of climate changes p 1869 N94-21642
Climsat rationale p 1869 N94-21643
Satellite orbit and data sampling requirements p 1870 N94-21648
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666
Role of surface characteristics in urban meteorology and air quality
[DE93-040929] p 1851 N94-21740
Modeling the response of ecosystems to CO2 and climate change
[DE94-000748] p 1852 N94-21787
Survey on evaluation of energy technology contributing to preservation of the global environment. 2
[DE94-714884] p 1853 N94-22051

CLIMATOLOGY
Worldwide frequency of temperatures at selected altitudes
[AD-A271111] p 1864 N94-19908
Study of regional climate change
[DE93-018926] p 1850 N94-19941
Scientific development of a massively parallel ocean climate model
[DE93-019446] p 1855 N94-20219
Observed climatic activity pertaining to the evolution of the northern plains p 2090 N94-20392
Processing of climatological data for model initialization
[AD-A271878] p 1865 N94-20487
The analysis of global cloud and radiation data for the study of cloud-climate interactions
[NASA-CR-193388] p 1865 N94-20535
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1866 N94-20559
Schools of the Pacific rainfall climate experiment p 1881 N94-20699
Research in progress: FY 1992
[DE94-000410] p 1836 N94-20936
Large-scale circulation regimes and tropical cyclone characteristics over the western pacific ocean
[AD-A273004] p 1867 N94-21307
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
A synoptic-scale overview of the TOGA COARE intensive observing period November 1992 to February 1993 based on analyses from US operational global data assimilation systems
[NASA-TM-104593] p 1868 N94-21605
Long-Term Monitoring of Global Climate Forcings and Feedbacks
[NASA-CP-3234] p 1868 N94-21639
Monitoring issues from a modeling perspective p 1868 N94-21640
Climate forcings and feedbacks p 1869 N94-21641
Accuracy requirements — for monitoring of climate changes p 1869 N94-21642
Climsat rationale p 1869 N94-21643
Michelson Interferometer (MINT) p 1813 N94-21646
Satellite orbit and data sampling requirements p 1870 N94-21648
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666
Fluvial valleys in the heavily cratered terrains of Mars: Evidence for paleoclimatic change? p 2144 N94-21670
The young Sun and photochemistry of the primitive Martian atmosphere p 2145 N94-21679
Proceedings of the Workshop on New Generation of Radiation Budget Measurements From Space and Their Use in Climate Modelling and Diagnostic Studies
[MPIM-90] p 1860 N94-22283
Satellite measurements of radiation budget parameters p 1860 N94-22284
The use of ERBE data for climate studies p 1860 N94-22286
Satellite validation of GCM-simulated annual cycle of the Earth radiation budget and cloud forcing p 1860 N94-22287
The seasonal variation of the cloud radiative forcing: Comparison of ECHAM model simulations with ERBE data p 1860 N94-22288
Use of satellite data for validation of the ECHAM models p 1861 N94-22289
Use of satellite data for validation of operational forecast models and operational analyses p 1861 N94-22291
The FIRE Cirrus Science Results 1993
[NASA-CP-3238] p 1871 N94-22292
Overview of microphysical and state parameter measurements from FIRE 2 p 1871 N94-22293
Development of methods for inferring cloud thickness and cloud-base height from satellite radiance data p 1872 N94-22301
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
CIMSS FIRE research activities p 1873 N94-22307
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312
Mesoscale simulations of the November 25-26 and December 5-6 cirrus cases using the RAMS model p 1878 N94-22331
Estimation of cirrus cloud particle fallspeeds from vertically pointing Doppler radar p 1879 N94-22333
Calibration of radiation codes in climate models: Comparison of calculations with observations from the SPECtral Radiation Experiment (SPECTRE) p 1879 N94-22337
SSH-2 measurements of cirrus at 18-26 micrometers from the King Air during FIRE 2 p 1880 N94-22338
Studies in remotely sensed geophysical parameter retrieval and analysis
[NASA-CR-194768] p 1842 N94-22374

CLINICAL MEDICINE
A concept for implementing hypermedia technology in computer aided workplaces in medicine
[ETN-93-95057] p 1889 N94-20022
Calculation and optimization of electromagnetic fields in a patient by local hyperthermia utilization
[ETN-93-95059] p 1889 N94-20024
Review of using cardiac fluoroscopy in symptomatic and asymptomatic patients
[AD-A271690] p 1891 N94-20928
Non-ionic surfactants in the treatment of third degree burns
[AD-A271582] p 1891 N94-21035

CLOCKS
The One-Day Workshop on Batteries, Stepping Motors, and Electronic Clock Displays
[ETN-93-94632] p 1752 N94-20628
Silver oxide batteries: Recent improvements and developments p 1752 N94-20629
Lithium batteries: Future batteries p 1752 N94-20630
Reliable interface design for combining asynchronous and synchronous circuits p 1758 N94-21119
Using the USCCS for sub microsecond spacecraft clock calibration p 1813 N94-21346
A low cost alternative to high performance PCM bit synchronizers p 1813 N94-21347

CLOSED CYCLES
Brayton power conversion system parametric design modelling for nuclear electric propulsion
[NASA-CR-191135] p 1671 N94-21874

CLOSED ECOLOGICAL SYSTEMS
Quinoa: An emerging new crop with potential for CELSS
[NASA-TP-3422] p 1895 N94-20137

CLOUD COVER
An analysis of cloud-cover reporting in the 1977 surface observation database
[AD-A271102] p 1864 N94-19852
The analysis of global cloud and radiation data for the study of cloud-climate interactions
[NASA-CR-193388] p 1865 N94-20535
Overview of microphysical and state parameter measurements from FIRE 2 p 1871 N94-22293
Comparison of radiation and cloud parameters derived from satellite and aircraft measurements during FIRE 2 cirrus IFO p 1872 N94-22299
Cloud properties from the analysis of AVHRR observations for FIRE 2 p 1872 N94-22300
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Observations of multi-layered clouds using K-band radar p 1874 N94-22311
Automated cloud classification with a fuzzy logic expert system p 1875 N94-22313
Comparison of cloud boundaries measured with 8.6 mm radar and 10.6 micrometer lidar p 1875 N94-22317
Cloud boundaries during FIRE 2 p 1876 N94-22318
Cirrus cloud development in a mobile upper tropospheric trough: The November 26th FIRE cirrus case study p 1878 N94-22329

CLOUD GLACIATION
Importance of aggregation and small ice crystals in cirrus clouds, based on observations and an ice particle growth model p 1879 N94-22336

CLOUD HEIGHT INDICATORS
Development of methods for inferring cloud thickness and cloud-base height from satellite radiance data p 1872 N94-22301
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Comparison of cloud boundaries measured with 8.6 mm radar and 10.6 micrometer lidar p 1875 N94-22317
Cloud boundaries during FIRE 2 p 1876 N94-22318

CLOUD PHYSICS
Clouds: Their prediction and simulation
[AD-A271161] p 1864 N94-19900
The analysis of global cloud and radiation data for the study of cloud-climate interactions
[NASA-CR-193388] p 1865 N94-20535
Computerized simulations with cellular automates for cloud formation
[GKSS-92/E/22] p 1867 N94-21312
Cirrus microphysics observations made during FIRE 2: Small particles, high concentrations, and probe comparisons p 1871 N94-22294
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296
Cloud properties from the analysis of AVHRR observations for FIRE 2 p 1872 N94-22300
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302
Microphysical properties of the November 26 cirrus cloud retrieved by Doppler radar/IR radiometer technique p 1873 N94-22304
Lidar and radar derived cirrus microphysical properties for the 26 November 1991 case study p 1873 N94-22305
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
CIMSS FIRE research activities p 1873 N94-22307
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308
A numerical technique for the calculation of cloud optical extinction from lidar p 1874 N94-22309
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312
Cirrus cloud retrievals from HIS observations during FIRE 2 p 1875 N94-22315
Comparison of cloud boundaries measured with 8.6 mm radar and 10.6 micrometer lidar p 1875 N94-22317
Spectral variation of scattering and absorption by cirrus p 1876 N94-22321
Spectral emissivity of cirrus clouds p 1876 N94-22322
Three dimensional modeling of cirrus during the 1991 FIRE IFO 2: Detailed process study p 1877 N94-22327
Normalized vertical ice mass flux profiles from vertically pointing 8-mm-wavelength Doppler radar p 1879 N94-22334
Importance of aggregation and small ice crystals in cirrus clouds, based on observations and an ice particle growth model p 1879 N94-22336
Investigation of the effects of the macrophysical and microphysical properties of cirrus clouds on the retrieval of optical properties: Results for FIRE 2 p 1880 N94-22339

Remote sensing estimates of cirrus particle size for tropical and midlatitude cirrus: Hexagonal crystals and ice spheres p 1880 N94-22342
Are tropical cirrus brighter than mid-latitude cirrus? p 1881 N94-22343
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384

CLOUD SEEDING
The 5-6 December 1991 FIRE IFO 2 jet stream cirrus case study: The influence of volcanic aerosols p 1877 N94-22326

CLOUDS (METEOROLOGY)
Intrusion of stratospheric ozone in the troposphere through tropopause folding and cold air droplets
[REPT-87] p 1851 N94-20154
Computerized simulations with cellular automates for cloud formation
[GKSS-92/E/22] p 1867 N94-21312
Low-power millimeter-wave radar observations of the atmosphere
[NASA-CR-194738] p 1858 N94-21811
A documentation of icing relevant cloud physical parameters on horizontal soundings of stratiform clouds (continuation)
[DLR-MITT-92-10] p 1871 N94-22280
The use of ERBE data for climate studies p 1860 N94-22286
Satellite validation of GCM-simulated annual cycle of the Earth radiation budget and cloud forcing p 1860 N94-22287
The seasonal variation of the cloud radiative forcing: Comparison of ECHAM model simulations with ERBE data p 1860 N94-22288
Overview of microphysical and state parameter measurements from FIRE 2 p 1871 N94-22293
Cloud properties from the analysis of AVHRR observations for FIRE 2 p 1872 N94-22300
Development of methods for inferring cloud thickness and cloud-base height from satellite radiance data p 1872 N94-22301
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
A numerical technique for the calculation of cloud optical extinction from lidar p 1874 N94-22309
Automated cloud classification with a fuzzy logic expert system p 1875 N94-22313
Analysis of the tropospheric water distribution during FIRE 2 p 1876 N94-22324

CLUSTER ANALYSIS
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428
Large-scale circulation regimes and tropical cyclone characteristics over the western pacific ocean
[AD-A273004] p 1867 N94-21307
Detecting topographical regions in digital terrain maps
[AD-A272889] p 1841 N94-21453
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458

CLUSTERS
Neutral copper cluster sputtering yields: Ne(+), Ar(+) and Xe(+) bombardment
[DE93-019010] p 1690 N94-20288

CLUTTER
State-space models for multichannel detection
[AD-A270608] p 1715 N94-19816

CMOS
CMOS gate array characterization procedures
[AD-A269943] p 2014 N94-20029
VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Rad-hard computer elements for space applications p 1753 N94-21082
Design of CMOS logic gates for TID radiation p 1754 N94-21083
Test results for SEU and SEL immune memory circuits p 1754 N94-21087
Correct CMOS IC defect models for quality testing p 1755 N94-21093
Power optimization in logic isomers p 1756 N94-21101
Delay analysis of combinations of pass transistors and classical logic gates p 1756 N94-21103
Bridging faults in BiCMOS circuits p 1756 N94-21105
A CAM-based LZ data compression IC p 1759 N94-21129
VLSI design for reliability-hot carrier effects
[AD-A271586] p 1761 N94-21256
The 1992 4th NASA SERC Symposium on VLSI Design
[NASA-CR-194591] p 1763 N94-21694
A 20 MHz CMOS reorder buffer for a superscalar microprocessor p 1764 N94-21700
Defect-sensitivity analysis of an SEU immune CMOS logic family p 1765 N94-21711
Detection of feed-through faults in CMOS storage elements p 1766 N94-21721
Bit-systolic arithmetic arrays using dynamic differential gallium arsenide circuits p 1767 N94-21724
A VLSI implementation of DCT using pass transistor technology p 1767 N94-21725
A high speed CMOS A/D converter p 1767 N94-21726
Behavior of faulty double BJT BiCMOS logic gates p 1767 N94-21727
A 1 GHz sample rate, 256-channel, 1-bit quantization, CMOS, digital correlator chip p 1768 N94-21732
Low power, CMOS digital autocorrelator spectrometer for spaceborne applications p 1666 N94-21733
Low energy CMOS for space applications p 1768 N94-21735
Micromachined actuator and sensor capabilities at the Microelectronics Development Laboratory
[DE93-019417] p 1769 N94-21918

COAGULATION
Coagulation of grains in static and collapsing protostellar clouds p 2085 N94-20865

COAL
Current situation in developing petroleum substituting energy (the United Kingdom)
[DE94-714897] p 1713 N94-22091
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569

COAL DERIVED GASES
A calcium oxide sorbent process for bulk separation of carbon dioxide
[DE93-019288] p 1847 N94-21540

COAL GASIFICATION
Surface modification for corrosion resistance
[DE93-017419] p 1693 N94-21825
Development of an electrochemical hydrogen separator
[DE93-019877] p 1683 N94-21984
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044

COALESCING
Head-on collision of drops: A numerical investigation
[NASA-TM-106394] p 1798 N94-20167

COASTAL PLAINS
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006

COASTAL WATER
Distribution of turbidity in Australian tropical waters
[AD-A271059] p 1881 N94-19905

COASTS
Comparison of satellite-derived velocity fields in the coastal transition zone
[AD-A272565] p 1883 N94-21360

COATING
Metal-glass composite field-emitting arrays
[AD-D015942] p 1673 N94-20064
Surface modification for corrosion resistance
[DE93-017419] p 1693 N94-21825
Techniques for producing free-standing thin films on frames
[DE93-041144] p 1708 N94-21954

COATINGS
Substrate recovery of Mo-Si multilayer coated optics
[DE93-019610] p 1698 N94-19810
Plasma chemical vapor deposition of halide glasses
[AD-D015933] p 1701 N94-20331
X ray characterization of a three-element condenser system for soft x ray projection lithography
[DE93-019916] p 1990 N94-21985

COBALT
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944

COBALT OXIDES
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870

COCKPITS
Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373

CODE DIVISION MULTIPLE ACCESS
Spread spectrum random access networks
[AD-A272280] p 1737 N94-20585
Capacity comparison between direct sequence PSK and MFSK spread spectrum systems in CDMA applications p 1747 N94-22224

CODERS
Space qualified high speed Reed Solomon encoder p 1754 N94-21088
Schematic driven layout of Reed Solomon encoders p 1766 N94-21722
Encoding and decoding quasi-spherical signal sets p 1747 N94-22233

CODING
Optical encoding of imaging data
[AD-D015915] p 1984 N94-20056
Low bit rate coding of Earth science images
[NASA-CR-193729] p 2041 N94-20158
Rotary encoding device using polygonal mirror with diffraction gratings on each facet
[NASA-CASE-GSC-13543-1] p 1985 N94-20240
A fixed/variable bit-rate data compression architecture p 1759 N94-21128
Behavioral model simulation studies of an image compressor p 1760 N94-21133
The Composite Analytic and Simulation Package or RFI (CASPR) on a coded channel p 1744 N94-21339
Reduction of blocking effects for the JPEG baseline image compression standard p 1765 N94-21714
A mean field neural network for hierarchical module placement p 1766 N94-21720
Directional coding of morphological pyramidal representations p 1771 N94-22106
Formal methods in the design of critical software systems p 1779 N94-22158
Coding of color quantized images p 1781 N94-22173
Hierarchical multirate vector quantization for image coding p 1781 N94-22174
A framework of connectionist network toward speech waveform coding p 1746 N94-22211

COEFFICIENTS
A real time correlator architecture using distributed arithmetic principles p 1768 N94-21734
Temperature and Doppler coefficients of various space nuclear reactors
[DE94-001388] p 1671 N94-21979

COGNITION
Building brains for bodies
[AD-A270531] p 1939 N94-19875
Incongruity, incongruity resolution, and mental states: The measure and modification of situational awareness and control
[NASA-CR-194568] p 1893 N94-20188
Cognition and the brain: A continuation of the university research initiative at New York University
[AD-A271872] p 1894 N94-20467
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610
Cognitive engineering in aerospace applications
[NASA-CR-194782] p 1647 N94-21819

COGNITIVE PSYCHOLOGY
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610

COHERENT LIGHT
Optical processing in photorefractive media p 1789 N94-22222

COHERENT RADAR
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430

COHERENT RADIATION
Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974

COHERENT SCATTERING
The coherent backscattering opposition effect p 1991 N94-20646

COLD GAS
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584

COLD PLASMAS
Laser diagnostics of RF hydrogen plasma reactors: Application to the processing of III-V materials
[AD-A272659] p 1994 N94-21214

COLD TOLERANCE
Studies of neural and cognitive function in subjects exposed to the marine-air interface, phases 1 and 2
[AD-A272282] p 1891 N94-20624

COLD WORKING
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates
[DE93-018786] p 1696 N94-22037

COLLAPSE
Computing solutions uniquely collapses the polynomial hierarchy
[TR-467] p 1954 N94-21314
COLLECTION
The aerogel mesh contamination collector
[AD-A270537] p 1651 N94-20011
COLLIMATION
Focus history of the Hubble Space Telescope: Launch to May 1993
[NASA-CR-194179] p 2055 N94-20204
COLLISION AVOIDANCE
Ground proximity warning system voice warning unit requirements study
[AD-A270541] p 1641 N94-19876
An algorithm for the interference detection among polygonal surfaces p 1791 N94-22239
Strategy for motion of a moving body of quasi-polygonal form within a polygonal space p 1792 N94-22240
Analytical representation of working articulation space of a plane manipulator in an encumbered environment p 1792 N94-22241
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277
COLLISIONAL PLASMAS
Prompt high-energy particle acceleration during two current loops collision p 2005 N94-22661
Formation of fast magnetosonic shock waves during two current loops collision in solar flare p 2005 N94-22662
Dynamics of physical state during two current loops collision p 2005 N94-22663
COLLISIONLESS PLASMAS
Consequences of chaotic particle motion for the stability of space plasma current sheets p 2001 N94-22636
COLLISIONS
Energy gain spectroscopic study of Ar(q+)-Ar collisions at 40 qeV
[DE93-040284] p 1970 N94-19871
Head-on collision of drops: A numerical investigation
[NASA-TM-106394] p 1798 N94-20167
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729
Equilibrium models of mass distribution and collisional lifetimes of asteroids p 2086 N94-20877
Antipodal fragment velocities for porous and weak targets at catastrophic impacts p 1836 N94-20891
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
Measurement of the inclusive jet cross section in p(bar-p) collisions at CDF
[DE94-000581] p 1982 N94-21866
COLLOIDS
Formation of colloidal Ag precipitates in fused silica by MeV ion implantation
[DE93-040268] p 2012 N94-19869
COLOR
Miniature color display, phase 4
[AD-A272920] p 1760 N94-21221
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings
[DE93-040547] p 1990 N94-22002
COLOR CODING
Coding of color quantized images p 1781 N94-22173
COLOR TELEVISION
Initial laboratory evaluation of color video cameras, phase 2
[DE93-040201] p 1809 N94-21556
COLUMBUS SPACE STATION
Columbus: Materials for 30 years habitability in space p 1662 N94-21387
COMBINATORIAL ANALYSIS
Eliminating amortization: On data structures with guaranteed response time
[TR-439] p 2049 N94-20098
On multiflow problems
[RR-889-M] p 1950 N94-20125
Applying the INN model to the MaxClique
[DE93-040137] p 1906 N94-20276
The combinatorics of reconstructing evolutionary trees
[CWI-BS-R9233] p 1963 N94-21022
On Update Last schemes
[CWI-CS-R9247] p 1952 N94-21027
The Robinson-Schensted and Schuetzenberger algorithms. Part 1: New combinatorial proofs
[CWI-AM-R9208-PT-1] p 1911 N94-21156
A mean field neural network for hierarchical module placement p 1766 N94-21720
The combinatorial algorithms for large scale discrete optimization problems p 1923 N94-22079
Some best rate 1/p and rate (p-1)/p systematic quasi-cyclic codes over GF(3) and GF(4) p 1792 N94-22243
COMBINED CYCLE POWER GENERATION
Investigation of austenitic alloys for advanced heat recovery and hot gas cleanup systems
[DE93-017863] p 1687 N94-19802
COMBUSTIBLE FLOW
Initiation and modification of reaction by energy addition: Kinetic and transport phenomena
[AD-A271315] p 1797 N94-19936
Liquid rocket propulsion. Theory p 1667 N94-20069
Reaction zone models for vortex simulation of turbulent combustion
[AD-A272723] p 1681 N94-21213
COMBUSTION
A database of selected transport coefficients for combustion studies
[DE93-041278] p 1678 N94-19889
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
Toxicity of thermal degradation in a manned space environment p 1664 N94-21403
COMBUSTION CHAMBERS
Initiation and modification of reaction by energy addition: Kinetic and transport phenomena
[AD-A271315] p 1797 N94-19936
Experimental investigation of nozzle/plume aerodynamics at hypersonic speeds
[NASA-CR-194628] p 1636 N94-20014
Method of fabricating a rocket engine combustion chamber
[NASA-CASE-MFS-28569-1] p 1703 N94-20541
Heat regenerative external combustion engine
[AD-D015965] p 1824 N94-21274
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1
[NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2
[NASA-CR-189192-VOL-2] p 1648 N94-21583
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct
[NASA-TM-106435] p 1649 N94-21758
COMBUSTION CHEMISTRY
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows
[AD-A271160] p 1678 N94-20000
Liquid rocket propulsion. Theory p 1667 N94-20069
Model for liquid boron oxide droplet gasification in H/O/C/F combustion environments
[AD-A272911] p 1682 N94-21243
Theoretical research program to study chemical reactions in AOTV bow shock tubes
[NASA-CR-194710] p 1804 N94-22027
COMBUSTION EFFICIENCY
Cryogenic propellant rocket engine problems p 1668 N94-20076
COMBUSTION PHYSICS
RADCAL: A narrow-band model for radiation calculations in a combustion environment
[PB93-200889] p 1682 N94-21448
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452
COMBUSTION PRODUCTS
Unlike-pair interactions at high pressure and high temperature
[DE93-019948] p 1796 N94-19916
Cryogenic propellant rocket engine problems p 1668 N94-20076
RADCAL: A narrow-band model for radiation calculations in a combustion environment
[PB93-200889] p 1682 N94-21448
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21969
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597] p 1826 N94-22093
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258
COMBUSTION STABILITY
Investigation of flame driving and flow turning in axial solid rocket instabilities
[AD-A271066] p 1667 N94-20015
COMET TAILS
Laboratory relations between the solar wind dynamic pressure and the magnetospheric structures of the Earth and comets p 2003 N94-22647
COMETARY ATMOSPHERES
C2, CN and dust in Comet Wilson (1987VII) p 2083 N94-20746
Atmospheric breakup of a small comet in the Earth's atmosphere p 2084 N94-20824
COMETS
Gamma ray bursts from collisions of primordial small mass black holes with comets p 2150 N94-20604
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
First discovery of the organic materials in deep-sea iron cosmic spherule p 1685 N94-20677
C2, CN and dust in Comet Wilson (1987VII) p 2083 N94-20746
Research program on the Manson impact structure, Iowa p 1862 N94-20766
Volatile loss from accreting icy protoplanets p 2084 N94-20793
Triton's cratering record and its time of capture p 2122 N94-20802
Synoptic observations of near surface processes of an insolated ice-dust body under space conditions: The case of KOSI 9 and 10 p 2084 N94-20827
Cometary interplanetary dust particles? An update on carbon in anhydrous IDPS p 2084 N94-20828
Measurements of the dielectric properties of simulated comet material as part of the KOSI 10 experiment p 2085 N94-20841
COMMAND AND CONTROL
Network command processing system overview p 1935 N94-21351
Data link development for the archytas vertical takeoff and landing transitional flight unmanned aerial vehicle
[AD-A272499] p 1646 N94-21548
High-velocity interceptors for boost-phase intercepts
[DE94-001077] p 1965 N94-22403
COMMAND LANGUAGES
The NSO FTS database program and archive (FTSDBM) p 1926 N94-22506
GammaCore: The Compton Observatory research environment p 2048 N94-22509
XPI: The Xanadu Parameter Interface p 1927 N94-22513
COMMERCE
Information sciences and business enterprises p 2046 N94-22059
The Soviet software market: Current state and aspects of development p 1923 N94-22066
Experiences of the bank of Finland's econometric simulation model p 2053 N94-22086
COMMERCIAL AIRCRAFT
Radiometry in commercial aircraft
[GSF-41/91] p 1892 N94-21141
Aviation safety research. Volume 1: Literature review of sources of aviation accident and incident data and selected factors contributing to accidents
[PB93-202885] p 1641 N94-21428
Utilization of lasers for air data measurements p 1640 N94-22603
Riblet boundary layer measurements of an A-310 fuselage with Pitot combs p 1640 N94-22605
Recent ONERA contributions to the development of flight test measurement techniques p 1641 N94-22607
Demonstrating damage tolerance of composite airframes p 1647 N94-22623
COMMUNICATING
Controlling multisupplier operations by intelligent EDI p 1744 N94-22076
COMMUNICATION
The communication complexity of set intersection problems
[MEMO-1077] p 1738 N94-21073
A response to Cheriton and Skeen's criticism of casual and totally ordered communication
[AD-A271486] p 1912 N94-21300
COMMUNICATION CABLES
Delivery of very high bandwidth with ATM switches and SONET
[DE93-019432] p 1899 N94-20476
COMMUNICATION EQUIPMENT
Satellite Communication Hardware Emulation System (SCHES) p 1744 N94-21344
COMMUNICATION NETWORKS
Ground wave emergency network. Final operational capability. Environmental assessment for south central Montana relay node, site no. RN8C925MT
[AD-A267795] p 1716 N94-19964

Label-connected graphs: An overview
[RR-898-M] p 1950 N94-20163
Design considerations for a fiber optic communications network for power systems
[DE93-018404] p 1984 N94-20179
A semi-Markov model of a home network access protocol
[MEMO-INF-92-71] p 1909 N94-21045
On the optimality of FCFS for networks of multi-server queues
[CWI-BS-R9235] p 1944 N94-21160
The NCC project: A quality management perspective p 1828 N94-21324
Software metrics: The key to quality software on the NCC project p 1922 N94-21326
Problem reporting management system performance simulation p 1931 N94-21328
Mission Operations Support Area (MOSA) for ground network support p 1932 N94-21331
Space network scheduling benchmark: A proof-of-concept process for technology transfer p 1932 N94-21332
Using manufacturing message specification for monitor and control at Venus p 1932 N94-21333
Predicting scheduling success p 1932 N94-21334
Generating and evaluating alternate schedules p 1933 N94-21336
The three-dimensional Event-Driven Graphics Environment (3D-EDGE) p 1922 N94-21342
Developing a space network interface simulator: The NTS approach p 1933 N94-21343
Satellite Communication Hardware Emulation System (SCHES) p 1744 N94-21344
Conversion of the proprietary ROLM (tm) inter-node link from multimode to singlemode operation p 1744 N94-21349
Telecommunications services for multimedia data exchange support
[AD-A271704] p 1740 N94-21352
PEGASUS, electronic bulletin board system user's guide
[AD-A271679] p 2044 N94-21363
On-board closed-loop congestion control for satellite based packet switching networks
[NASA-TM-106446] p 1656 N94-21581
IAS telecommunication infrastructure and value added network services provided by IASNET p 1744 N94-22069
Controlling multisupplier operations by intelligent EDI p 1744 N94-22076
TDMA satellite communication systems for ISDN services p 1746 N94-22171
A consideration of the integration of terrestrial and satellite mobile systems p 1746 N94-22172
Throughput and blocking in circuit-switched interconnection networks p 1784 N94-22189
Modeling and analysis of secure communication protocols using Petri net formalism p 1784 N94-22194
Neural networks for optimum routing in packet-switched communications networks p 1746 N94-22205
Recommendations for a service framework to access astronomical archives p 2049 N94-22537
STELAR: An experiment in the electronic distribution of astronomical literature p 2049 N94-22544

COMMUNICATION SATELLITES
NHK Science and Technical Research Laboratories p 2151 N94-20342
Multi-band reflector antenna with double-ring element frequency selective subreflector p 1728 N94-20447
A compact, portable EHF/SHF antenna for advanced SCAMP
[AD-A272614] p 1739 N94-21211
Downlink acquisition and tracking procedures for the ASCAMP satellite communications terminal
[AD-A272912] p 1739 N94-21244
A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites
[NASA-CR-191200] p 1762 N94-21566
Visibility considerations in frequency sharing with low Earth orbit satellites p 1746 N94-22187
Inclined orbits and interference to stationary service and to stationary service by satellite p 1653 N94-22188

COMMUNICATION THEORY
Specification and generation of Markov reward models
[MEMO-INF-92-60] p 1963 N94-21058

COMPANION STARS
Studies of an x ray selected sample of cataclysmic variables
[NASA-CR-194773] p 2055 N94-20344

COMPARATOR CIRCUITS
A high speed CMOS A/D converter p 1767 N94-21726

COMPARISON
Efficient comparison based string matching
[CWI-CS-R9249] p 1909 N94-21028
Tight comparison bounds for the string prefix-matching problem
[CWI-CS-R9250] p 1952 N94-21029
Simulated real-time intercomparison of hydrological models
[WMO-779] p 1867 N94-21070
Simulation of clear-sky outgoing longwave radiation over the oceans using operational analysis p 1861 N94-22290

COMPATIBILITY
Use of open systems for control, analysis, and data acquisition of the DIII-D tokamak
[DE94-001101] p 1998 N94-22089

COMPILERS
A parallelizing compiler based on partial evaluation
[AD-A270838] p 1898 N94-19832
Exploiting the parallelism exposed by partial evaluation
[AD-A270678] p 1928 N94-19877
Set based analysis of ML programs
[AD-A270597] p 1902 N94-19948
Standard ML signatures for a protocol stack
[AD-A272060] p 1908 N94-20622
Automated synthesis and verification of configurable DRAM blocks for ASIC's p 1759 N94-21123
Automated radiation hard ASIC design tool p 1759 N94-21126
A DRAM compiler algorithm for high performance VLSI embedded memories p 1767 N94-21729
Fortran for the nineties p 1926 N94-22481

COMPLETENESS
A declarative approach for first-order built-in's of PROLOG
[CWI-CS-R9246] p 1909 N94-21026

COMPLEX COMPOUNDS
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922

COMPLEX NUMBERS
Method for design rotation
[AD-A272440] p 1911 N94-21204

COMPLEX SYSTEMS
A complex systems approach to computational molecular biology
[DE93-040062] p 1884 N94-19866
Interval timed coloured petri nets and their analysis
[PB93-191732] p 1903 N94-19992
Feedback controlled optics with wavefront compensation
[NASA-CASE-NPO-18194-1-CU] p 1985 N94-20305
Experiments in knowledge refinement for a large rule-based system
[AD-A272055] p 1809 N94-21445

COMPLEX VARIABLES
Column reduced rational matrix functions with given null-pole data in the complex plane
[PB93-220531] p 1960 N94-22099

COMPLEXITY
Efficient comparison based string matching
[CWI-CS-R9249] p 1909 N94-21028
The communication complexity of set intersection problems
[MEMO-1077] p 1738 N94-21073
On the topological size of p-m-complete degrees
[TR-459] p 1965 N94-21286

COMPONENT RELIABILITY
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910

COMPOSITE FUNCTIONS
Scattering by Venus' surface p 2117 N94-20771

COMPOSITE MATERIALS
Quantitative evaluation of material composition of composites using x ray energy-dispersive NDE technique
[DE93-041157] p 1672 N94-19688
The Seventh International Conference on Composite Structures, volume 25, numbers 1-4
[AD-A269961] p 1672 N94-20031
Biotechnology and composite materials
[AD-A264278] p 1673 N94-20327
Electrochemical synthesis of ultrathin film composite membranes
[AD-A272721] p 1681 N94-21168
Composite materials with improved properties in compression
[AD-A272837] p 1675 N94-21176
A study of the induction heating of organic composites
[AD-A272657] p 1675 N94-21187
Materials Science and Engineering
[DE93-040497] p 1675 N94-21530
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940
The effect of delamination on the dynamic response of composite laminates as measured by embedded fiber optic Michelson sensor
[ISBN-0-315-83534-6] p 1677 N94-22587
Life prediction systems for critical rotating components p 1835 N94-22615
NASA Langley developments in response calculations needed for failure and life prediction p 1836 N94-22621

COMPOSITE PROPELLANTS
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906

COMPOSITE STRUCTURES
Structural crashworthiness and failure
[AD-A270429] p 1828 N94-19815
The Seventh International Conference on Composite Structures, volume 25, numbers 1-4
[AD-A269961] p 1672 N94-20031
Compression strength of composite primary structural components
[NASA-CR-194561] p 1830 N94-20159
Quantification of uncertainties in the performance of smart composite structures
[NASA-TM-106335] p 1830 N94-20171
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Biotechnology and composite materials
[AD-A264278] p 1673 N94-20327
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
Electrochemical synthesis of ultrathin film composite membranes
[AD-A272721] p 1681 N94-21168
A study of the structural stability of an unbalanced sandwich composite configuration
[AD-A272496] p 1675 N94-21431
Materials Science and Engineering
[DE93-040497] p 1675 N94-21530
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777
Computational Methods for Failure Analysis and Life Prediction
[NASA-CP-3230] p 1833 N94-22608
Nonlinear and progressive failure aspects of transport composite fuselage damage tolerance p 1834 N94-22609
An overview of computational simulation methods for composite structures failure and life analysis p 1835 N94-22617
Demonstrating damage tolerance of composite airframes p 1647 N94-22623

COMPOSITION (PROPERTY)
Contributions of the Clementine mission to our understanding of the processes and history of the Moon p 2119 N94-20784
Some experiments on using backscattered electron and energy dispersive x ray imaging in determination of portland cement clinker phase composition p 1708 N94-21893

COMPRESSED GAS
Phonons and metastability in compressed nitrogen
[DE93-019913] p 2016 N94-20318

COMPRESSIBILITY
Hydrodynamic compressibility of high-strength ceramics
[DE93-019424] p 1698 N94-19903
Shock response of porous Al-2 + Fe2O3 powder mixtures
[DE93-018851] p 1688 N94-19944
A comparison of two incompressible Navier-Stokes algorithms for unsteady internal flow
[NASA-TM-108794] p 1798 N94-20104
The effects of processing and constituent materials on compressive strength of thick composite laminates
[AD-A271912] p 1673 N94-20490
Two-dimensional finite element analysis of porous media at multikilobar stress levels
[AD-A271540] p 1831 N94-20916

COMPRESSIBILITY EFFECTS
Turbulence modeling for high speed compressible flows
[NASA-CR-194547] p 1799 N94-20210

COMPRESSIBLE BOUNDARY LAYER
Linear and nonlinear PSE for compressible boundary layers
[NASA-CR-191537] p 1797 N94-20033

COMPRESSIBLE FLOW
Turbulence modeling for high speed compressible flows
[NASA-CR-194547] p 1799 N94-20210
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351
Some practical turbulence modeling options for Reynolds-averaged full Navier-Stokes calculations of three-dimensional flows
[NASA-TM-106399] p 1637 N94-20534

Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386

COMPRESSIBLE FLUIDS
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
Two-dimensional finite element analysis of porous media at multikilobar stress levels
[AD-A271540] p 1831 N94-20916

COMPRESSION LOADS
Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931

COMPRESSION RATIO
A comparison of some of the most current methods of image compression
[AD-A271841] p 1907 N94-20525

COMPRESSION TESTS
Hydrodynamic compressibility of high-strength ceramics
[DE93-019424] p 1698 N94-19903
Deformation of an alumina-zirconia-silicon carbide-whisker reinforced composite
[DE93-040244] p 1676 N94-21559

COMPRESSIVE STRENGTH
Compression strength of composite primary structural components
[NASA-CR-194561] p 1830 N94-20159
Properties and potential of high-temperature niobium beryllides
[DE93-019169] p 1690 N94-20233
The effects of processing and constituent materials on compressive strength of thick composite laminates
[AD-A271912] p 1673 N94-20490
Strength and deformation properties of basaltic lava flows on planetary surfaces p 1862 N94-20747
Composite materials with improved properties in compression
[AD-A272837] p 1675 N94-21176

COMPRESSOR ROTORS
Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines
[AD-A272998] p 1648 N94-21268

COMPRESSORS
Navy GTE seal development activity
p 1655 N94-21794
Performance calculations and research direction for a water enhanced regenerative gas turbine cycle
[DE93-019866] p 1826 N94-21983

COMPTON EFFECT
An assessment of COMSCAN, a Compton backscatter imaging camera, for the one-sided non-destructive inspection of aerospace components
[AD-A271331] p 1806 N94-19837
New relativistic S-matrix results for scattering -- beyond the usual anomalous factors/beyond impulse approximation
[DE93-019148] p 1971 N94-20096
Photoabsorption and Compton scattering in ionization of helium at high photon energies
[DE94-000380] p 1974 N94-21658
Single and double ionization of helium by high-energy photon impact
[DE94-000381] p 1975 N94-21785
The polarization sensitivity of the liquid xenon imaging telescope p 2056 N94-22282
The effect of Compton scattering on the double to single ionization ratio in helium
[DE94-000884] p 1827 N94-22390
Compton Gamma Ray Observatory highlights of the sky survey p 2002 N94-22642

COMPUTATION
A declarative approach for first-order built-in's of PROLOG
[CWI-CS-R9246] p 1909 N94-21026
An NP set with no co-DP sparse subset
[TR-475] p 1954 N94-21199
Advice from nonadaptive queries to NP
[TR-470] p 1911 N94-21200
Threshold computation and cryptographic security
[TR-461] p 1912 N94-21285
Promises and fault-tolerant database access
[TR-447] p 2043 N94-21287
On the closure properties of #P in the context of PF of #P
[TR-445] p 1955 N94-21456
Mathematical theory of thermodynamics of computation
[CWI-CS-R9251] p 2038 N94-21533
Using parallel banded linear system solvers in generalized eigenvalue problems
[NASA-CR-191540] p 1915 N94-21584
A Hopfield neural net for discrete Fourier transform calculation p 1783 N94-22184

COMPUTATIONAL CHEMISTRY
Boost-phase discrimination research
[NASA-TM-109347] p 1666 N94-19818
Application of molecular modeling to biological processing
[AD-A272612] p 1974 N94-21185

COMPUTATIONAL FLUID DYNAMICS
Boost-phase discrimination research
[NASA-TM-109347] p 1666 N94-19818
Experimental investigation of nozzle/plume aerodynamics at hypersonic speeds
[NASA-CR-194628] p 1636 N94-20014
Future technical directions p 1668 N94-20072
Distributed loss model: Application to a spatial turbopump inducer p 1668 N94-20078
Cavitation modelling p 1668 N94-20079
Three dimensional unsteady flow calculations in radial components p 1669 N94-20080
Shape optimization governed by the Euler equations using an adjoint method
[NASA-CR-191555] p 1950 N94-20092
Head-on collision of drops: A numerical investigation
[NASA-TM-106394] p 1798 N94-20167
Turbulence modeling for high speed compressible flows
[NASA-CR-194547] p 1799 N94-20210
Prediction and control of vortex-dominated and vortex-wake flows
[NASA-CR-194722] p 1637 N94-21054
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169
Reaction zone models for vortex simulation of turbulent combustion
[AD-A272723] p 1681 N94-21213
An efficient numerical method for three-dimensional hypersonic flow
[AD-A272506] p 1637 N94-21411
Measurement and prediction of the flow through an annular turbine cascade
[AD-A272530] p 1803 N94-21417
The Sixth Copper Mountain Conference on Multigrid Methods, part 2
[NASA-CP-3224-PT-2] p 1955 N94-21464
Looking for O(N) Navier-Stokes solutions on non-structured meshes p 1806 N94-21471
Superpatch
[NASA-CR-177627] p 1914 N94-21489
Mathematical theory of thermodynamics of computation
[CWI-CS-R9251] p 2038 N94-21533
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1
[NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2
[NASA-CR-189192-VOL-2] p 1648 N94-21583
Order of accuracy of QUICK and related convection-diffusion schemes
[NASA-TM-106402] p 1959 N94-21588
A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct
[NASA-TM-106435] p 1649 N94-21758
The 1992 Seals Flow Code Development Workshop
[NASA-CP-10124] p 1654 N94-21790
Computation of the sound generated by isotropic turbulence
[NASA-CR-191543] p 1804 N94-21880
Unstructured Grid Generation Techniques and Software
[NASA-CP-10119] p 1918 N94-22350
Unstructured grid research and use at NASA Lewis Research Center p 1919 N94-22353
Johnson Space Center CFD grid generation requirements p 1919 N94-22355
The 3-D unstructured mesh generation using local transformations p 1919 N94-22356
Status of VGRID/USM3D aero analysis system p 1919 N94-22357
Unstructured low-Mach number viscous flow solver p 1919 N94-22358
Three-dimensional unstructured grid method applied to turbomachinery p 1919 N94-22360
Development of a gridless CFD method p 1919 N94-22361
An advancing-front Delaunay-triangulation algorithm designed for robustness p 1920 N94-22362
The 3D Euler solutions using automated Cartesian grid generation p 1920 N94-22367
Time-dependent grid adaptation for meshes of triangles and tetrahedra p 1920 N94-22369
NASA data exchange standards for computational fluid dynamics p 1920 N94-22371
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386

COMPUTATIONAL GEOMETRY
Eliminating amortization: On data structures with guaranteed response time
[TR-439] p 2049 N94-20098
Achieving high data reduction with integral cubic B-splines
[NASA-CR-177628] p 1966 N94-21881
An advancing-front Delaunay-triangulation algorithm designed for robustness p 1920 N94-22362
Dynamic mesh adaption for triangular and tetrahedral grids p 1920 N94-22363
Computational geometry issues p 1920 N94-22370
Surface acquisition through virtual milling p 1920 N94-22372

COMPUTATIONAL GRIDS
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
A new conformal absorbing boundary condition for finite element meshes and parallelization of FEMATS
[NASA-CR-194740] p 1950 N94-20034
A comparative study of an ABC and an artificial absorber for truncating finite element meshes
[NASA-CR-194275] p 1716 N94-20160
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids p 1724 N94-20431
Multigrid approach to solving the long transportation problem on a regular grid in cost space
[AD-A272323] p 1909 N94-21038
Approximate methods for N-component solute transport and ion-exchange
[CWI-NM-R9223] p 1910 N94-21078
Adaptive grids for quasilinear parabolic systems in one space dimension
[ETN-93-93611] p 1954 N94-21137
Numerical modeling of a propegating crack
[AD-A272604] p 1832 N94-21421
The block adaptive multigrid method applied to the solution of the Euler equations p 1641 N94-21472
A multigrid method for steady Euler equations on unstructured adaptive grids p 1957 N94-21476
Two-level Schwartz methods for nonconforming finite elements and discontinuous coefficients p 1957 N94-21477
Multigrid solution of the Navier-Stokes equations on highly stretched grids with defect correction p 1806 N94-21481
Superpatch
[NASA-CR-177627] p 1914 N94-21489
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531
Local uniform grid refinement and brine transport in porous media with inhomogeneities
[CWI-NM-R9224] p 1803 N94-21609
RHALE: A 3-D MMALE code for unstructured grids
[DE93-019405] p 1916 N94-21635
User's guide for the casting process simulator software CaPS-2D, version 1.0
[DE93-040398] p 1917 N94-21923
A moving finite element model of the tokamak scrapeoff layer
[DE94-000673] p 1997 N94-21965
Software systems used for unstructured grid generation at NASA Langley p 1918 N94-22351
NASA-Ames Research Center unstructured technology development p 1919 N94-22352
Unstructured grid research and use at NASA Lewis Research Center p 1919 N94-22353
Robust unstructured grid generation with VGRID p 1919 N94-22359
Three-dimensional unstructured grid method applied to turbomachinery p 1919 N94-22360
An advancing-front Delaunay-triangulation algorithm designed for robustness p 1920 N94-22362
Dynamic mesh adaption for triangular and tetrahedral grids p 1920 N94-22363
Cartesian-cell based grid generation and adaptive mesh refinement p 1920 N94-22364
The 2D and 3D hypersonic flows with unstructured meshes p 1920 N94-22365
Unstructured surface grid generation p 1920 N94-22366
The 3D Euler solutions using automated Cartesian grid generation p 1920 N94-22367

Accuracy assessment for grid adaptation
p 1920 N94-22368
Time-dependent grid adaptation for meshes of triangles and tetrahedra p 1920 N94-22369
Computational geometry issues p 1920 N94-22370
NASA data exchange standards for computational fluid dynamics p 1920 N94-22371

COMPUTER AIDED DESIGN
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110
PREVAIL-DM: A framework-based environment for formal hardware verification
[RR-899] p 1905 N94-20164
A proposal for reverse engineering CASE tools to support new software development
[DE93-040207] p 1906 N94-20281
Design structuring and allocation optimization (Destination) prototype level 1 user's manual
[AD-A272115] p 1929 N94-20571
The flow of gas across the piston-segments-cylinder interface
[ECL-92-40] p 1824 N94-20594
The electronics technology policy of the NLR Informatics Division: The NLR electronics CAE infrastructure
[NLR-TP-91001-U] p 1753 N94-21067
Design and implementation of GaAs HBT circuits with ACME p 1758 N94-21117
An investigation into the state of the practice of CASE tool integration
[AD-A272441] p 1912 N94-21205
VLSI design for reliability-hot carrier effects
[AD-A271586] p 1761 N94-21256
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
Model-based automatic generation of grasping regions
[NASA-TM-104785] p 1946 N94-21550
Computer-Aided Test Equipment Graphics System (CATEGS)
[DE94-000383] p 1915 N94-21561
Advanced failure analysis laboratory equipment networking
[DE93-019070] p 1916 N94-21633
The Milling assistant, case-based Reasoning, and machining strategy: A report on the development of automated numerical control programming systems at New Mexico State University
[DE93-041101] p 2029 N94-21690
HDL to verification logic translator
p 1766 N94-21717
Higher order Bezier circles
[NASA-CR-177633] p 1897 N94-21784
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851
User's guide for the casting process simulator software CaPS-2D, version 1.0
[DE93-040398] p 1917 N94-21923
Information sciences and business enterprises
p 2046 N94-22059
Computer-aided design system for objects location and reservoir with dispersed resource evolution investigation
p 1923 N94-22064
The distributed CAD system for LSI/VLSI design
p 1923 N94-22068
NASA data exchange standards for computational fluid dynamics p 1920 N94-22371

COMPUTER AIDED MANUFACTURING
Feature-based tolerancing for intelligent inspection process definition
[DE93-017984] p 1906 N94-20311
Graphical interactive planning of robotic applications with support of integrated simulation
[ETN-93-93793] p 1944 N94-21057
Advanced failure analysis laboratory equipment networking
[DE93-019070] p 1916 N94-21633
The Milling assistant, case-based Reasoning, and machining strategy: A report on the development of automated numerical control programming systems at New Mexico State University
[DE93-041101] p 2029 N94-21690
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851
Information sciences and business enterprises
p 2046 N94-22059
Manufacturing and information technology
p 2046 N94-22082

COMPUTER AIDED MAPPING
Application of SPOT to GIS/LIS in land capability evaluation for regional planning of JAICO semi-arid region of Piaui, Brazil p 1838 N94-20955

COMPUTER AIDED TOMOGRAPHY
Three-dimensional dynamic thermal imaging of structural flaws by dual-band infrared computed tomography
[DE93-019575] p 1908 N94-20316
A geometrical process for three dimensional osteotomy planning
[ETN-93-93602] p 1892 N94-21134
Optimal resolution in maximum entropy image reconstruction from projections with multigrid acceleration p 1955 N94-21465

COMPUTER ASSISTED INSTRUCTION
Weather tutor 1: Stability basics
[AD-A270758] p 1866 N94-20565
A graphical user-interface development tool for intelligent computer-assisted instruction systems
[AD-A272988] p 1912 N94-21265
Use of computers in the instruction of integral calculus
[AD-A272500] p 1913 N94-21409
The effects of instructional sets on reactions to and performance on an intelligent tutoring system
[NASA-CR-194739] p 1895 N94-21810

COMPUTER COMPONENTS
Rad-hard computer elements for space applications
p 1753 N94-21082
Crystal ball gazing p 1925 N94-22477

COMPUTER DESIGN
Multiple-fold clustered processor mesh array
p 1757 N94-21113
A novel visual hardware behavioral language
p 1765 N94-21715

COMPUTER GRAPHICS
A software architecture for the construction and management of real-time virtual worlds
[AD-A271465] p 1904 N94-20091
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1651 N94-20108
Weather tutor 1: Stability basics
[AD-A270758] p 1866 N94-20565
Simulating a user's preferences: Towards automated artificial evolution for computer generated images
[AD-A272058] p 1942 N94-20621
Analysis and evaluation of configuring of graphical systems on multiprocessor architectures
[ETN-93-93618] p 1930 N94-21018
AIDA: A graphical interactive system, adapted to the user
[ETN-93-93792] p 1908 N94-21020
Graphical interactive planning of robotic applications with support of integrated simulation
[ETN-93-93793] p 1944 N94-21057
A graphical user-interface development tool for intelligent computer-assisted instruction systems
[AD-A272988] p 1912 N94-21265
The three-dimensional Event-Driven Graphics Environment (3D-EDGE) p 1922 N94-21342
Simulation of tripod gaits for a hexapod underwater walking machine
[AD-A271719] p 1945 N94-21355
Computer-Aided Test Equipment Graphics System (CATEGS)
[DE94-000383] p 1915 N94-21561
Visualization on massively parallel computers using CM/AVS
[DE93-040151] p 1936 N94-21746
Geometric optimization
[DE93-040152] p 1917 N94-21764
Imaging vector fields using line integral convolution
[DE93-019922] p 1917 N94-21841
Post-experimental plots for high speed data acquisition program
[DE94-000956] p 1918 N94-22011
Unstructured grid research and use at NASA Lewis Research Center p 1919 N94-22353
Grid generation requirements at Marshall Space Flight Center p 1919 N94-22354
Status of VGRID/USM3D aero analysis system
p 1919 N94-22357
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461
Enhancements to IRAF/STSDAS graphics
p 1925 N94-22470
An IDL-based analysis package for COBE and other skycube-formatted astronomical data
p 1925 N94-22471
SKYMAP: Exploring the Universe in software
p 1927 N94-22511

COMPUTER INFORMATION SECURITY
Distributed Virtual System (DIVIRS) project
[NASA-CR-194360] p 1905 N94-20228
Threshold computation and cryptographic security
[TR-443] p 1907 N94-20536
Security management of electronic data interchange
[AD-A272962] p 1899 N94-21252
Threshold computation and cryptographic security
[TR-461] p 1912 N94-21285
Security evaluation of Unix networks
[AD-A273076] p 1945 N94-21520
Electronic resources for security related information: Reference document
[DE93-040488] p 2044 N94-21529
Formal methods in the design of critical software systems p 1779 N94-22158
Modeling and analysis of secure communication protocols using Petri net formalism
p 1784 N94-22194

COMPUTER NETWORKS
SISSY: An example of a multi-threaded, networked, object-oriented databased application
[DE93-019742] p 2041 N94-19811
Physics Detector Simulation Facility. Phase 2: System software description
[DE93-019745] p 1928 N94-19812
TCP performance analysis for wide area networks
[DE94-000449] p 1928 N94-19858
Robust, high-speed network design for large-scale multiprocessing
[AD-A271003] p 1716 N94-19977
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
Center for neural engineering
[AD-A271164] p 1890 N94-20185
Distributed Virtual System (DIVIRS) project
[NASA-CR-194360] p 1905 N94-20228
Research in image management and access
[NASA-CR-194797] p 1907 N94-20376
Delivery of very high bandwidth with ATM switches and SONET
[DE93-019432] p 1899 N94-20476
Standard ML signatures for a protocol stack
[AD-A272060] p 1908 N94-20622
Reduction of network cost and wiring in Ranade's butterfly routing
[CWI-CS-R9243] p 1930 N94-21023
Multi Wave Link: An interactive database for co-ordination of multiwavelength programs
[NASA-CR-194778] p 2043 N94-21055
On the optimality of FCFS for networks of multi-server queues
[CWI-BS-R9235] p 1944 N94-21160
Optimization of static traffic allocation policies
[CWI-BS-R9302] p 1930 N94-21161
The effects of block size on the performance of coherent caches in shared-memory multiprocessors
[AD-A272838] p 1899 N94-21177
Scheduling for locality in shared-memory multiprocessors
[AD-A272948] p 1930 N94-21228
Government Open Systems Interconnection Profile (GOSIP) transition strategy
[AD-A273005] p 1740 N94-21308
Networks Technology Conference
[NASA-CP-3241] p 1931 N94-21323
Security evaluation of Unix networks
[AD-A273076] p 1945 N94-21520
Electronic resources for security related information: Reference document
[DE93-040488] p 2044 N94-21529
Advanced failure analysis laboratory equipment networking
[DE93-019070] p 1916 N94-21633
Simulated behaviour of large scale SCI rings and tori
[DE93-040149] p 1935 N94-21745
Evaluation of DEC's GIGAswitch for distributed parallel computing
[DE94-001356] p 1936 N94-21853
Physics Detector Simulation Facility (PDSF) architecture/utilization
[DE93-019744] p 1936 N94-21919
Efficient communication primitives on mesh architectures with hardware routing
[DE93-018791] p 1936 N94-22032
Industry standards: Key to distributed computing
p 1938 N94-22070
Databases in distributed systems
p 2046 N94-22080
Investigation on construction of the database system for research and development of the global environment industry technology
[DE94-714890] p 1853 N94-22090
Introduction to the LaRC central scientific computing complex
[NASA-TM-104092-REV-1] p 1900 N94-22100
Distributed processing using Oracle7 and SQL*Net v2: An implementation story
[DE94-000494] p 1937 N94-22267
Everything you might want to know about the Internet but are afraid to ask!
[DE93-041118] p 2046 N94-22413
Scientific computing in the 1990ies: An astronomical perspective p 2057 N94-22440

Seeing the forest for the trees: Networked workstations as a parallel processing computer p 1938 N94-22454
A distributed clients/distributed servers model for STARCAT p 2047 N94-22469
Crystal ball gazing p 1925 N94-22477
Quality control of EUVE databases p 2047 N94-22490

COMPUTER PROGRAM INTEGRITY
Development and operations of the Astrophysics Data System
[NASA-CR-194691] p 2043 N94-21270

COMPUTER PROGRAMMING
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
System at the cross-roads of functional and logic programming
[PB93-191823] p 1928 N94-20009
An expert system executive for automated assembly of large space truss structures
[NASA-TM-4487] p 1939 N94-20089
A proposal for reverse engineering CASE tools to support new software development
[DE93-040207] p 1906 N94-20281
Four-channel HF receiving antenna array simulator
[AD-A271876] p 1732 N94-20471
A simplified token bus protocol specified using LOTOS
[TR-92-15] p 1910 N94-21062
Mathematician Wang Ju
[AD-A267882] p 1912 N94-21255
A response to Cheriton and Skeen's criticism of casual and totally ordered communication
[AD-A271486] p 1912 N94-21300
Computing solutions uniquely collapses the polynomial hierarchy
[TR-467] p 1954 N94-21314
The term processor Kimwitu manual and cookbook
[MEMO-INF-92-67] p 1914 N94-21454
Information Technology and Economic Modelling
[VTT-SYMP-135] p 2049 N94-22056
Soviet society informatization: The USSR state program p 2046 N94-22058
Information sciences and business enterprises p 2046 N94-22059
Industry standards: Key to distributed computing p 1938 N94-22070
Formal methods in the design of critical software systems p 1779 N94-22158
SPPTOOLS: Programming tools for the IRAF SPP language p 1925 N94-22474
Writing instrument interfaces with xf/tktcl p 1925 N94-22480
Fortran for the nineties p 1926 N94-22481
The Keck Task Library (KTL) p 2048 N94-22504
Development of the FITS tools package for multiple software environments p 1927 N94-22516

COMPUTER PROGRAMS
Set based analysis of ML programs
[AD-A270597] p 1902 N94-19948
Manual of DRANC (release 1.1): A computer program for the Dutch risk assessment of new chemical substances
[PB93-194827] p 1851 N94-19998
System at the cross-roads of functional and logic programming
[PB93-191823] p 1928 N94-20009
Absorption heat pump for space applications
[NASA-CR-194693] p 1845 N94-20066
A software architecture for the construction and management of real-time virtual worlds
[AD-A271465] p 1904 N94-20091
Qualifying codes under software quality assurance: Two examples as guidelines for codes that are existing or under development
[DE93-040452] p 1904 N94-20097
Object-oriented DFD models to present the functional and behavioral views
[DE93-040206] p 1906 N94-20280
A proposal for reverse engineering CASE tools to support new software development
[DE93-040207] p 1906 N94-20281
HERMES, a report generator for research on information processing in command posts: The effect of missing information
[IZF-1992-A-28] p 2042 N94-20310
Design structuring and allocation optimization (Destination) prototype level 1 user's manual
[AD-A272115] p 1929 N94-20571
Probability of detection calculations using MATLAB
[AD-A271958] p 1736 N94-20578
A parametric representation of a thunderstorm cell
[AD-A271983] p 1866 N94-20579
CERN-derived analysis of lunar radiation backgrounds p 2080 N94-20880
Test and evaluation: DOD has been slow in improving testing of software-intensive systems
[AD-A271541] p 1908 N94-20917
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918
Proving run-time properties of general programs w.r.t. constructive negation
[CWI-CS-R9245] p 1909 N94-21025
A declarative approach for first-order built-in's of PROLOG
[CWI-CS-R9246] p 1909 N94-21026
A software architecture for a small autonomous underwater vehicle navigation system
[AD-A272322] p 1643 N94-21037
GWB: Manual for the Grammar WorkBench version 1.5
[TR-92-14] p 1909 N94-21061
The readiness growth model: A quantitative analysis of software risk
[AD-A272383] p 1910 N94-21144
Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264
Development and operations of the Astrophysics Data System
[NASA-CR-194691] p 2043 N94-21270
Network command processing system overview p 1935 N94-21351
Integration opportunities for computer models, methods, and GIS used in Corps planning studies
[AD-A271714] p 2044 N94-21354
On a proposed symbolic dynamics for the Henon map
[AD-A272514] p 1955 N94-21359
The term processor Kimwitu manual and cookbook
[MEMO-INF-92-67] p 1914 N94-21454
MGGHAT: Elliptic PDE software with adaptive refinement, multigrid and high order finite elements p 1956 N94-21470
CMIFed: A presentation environment for porta ble hypermedia documents
[CWI-CS-R9305] p 2044 N94-21494
The Amsterdam hypermedia model: Extending hypertext to support real multimedia
[CWI-CS-R9306] p 2045 N94-21536
Computer-Aided Test Equipment Graphics System (CATEGS)
[DE94-000383] p 1915 N94-21561
A package for long integer arithmetic on the Cray Y-MP
[CWI-NM-R9227] p 1916 N94-21612
The 1992 Seals Flow Code Development Workshop
[NASA-CP-10124] p 1654 N94-21790
An evaluation of integration of the trace assertion method with the box structure method for coding in C++
[DE93-040480] p 1918 N94-21924
AJKA: An econometric macromodel for Finland p 2050 N94-22061
APL-technology of computer simulation p 1923 N94-22077
Method and software for decision making in public problems p 1923 N94-22087
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101
Tests of logic spaces: A new strategy for certifying the accuracy of programs p 1772 N94-22116
Modeling software systems for data flow testing p 1772 N94-22117
The conformance testing methodology to CTRON (communication and central TRON) extended OS p 1772 N94-22118
Unstructured Grid Generation Techniques and Software
[NASA-CP-10119] p 1918 N94-22350
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386
Towards the formal verification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191466] p 1937 N94-22414
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts
[NASA-TM-108245] p 2057 N94-22438
Multifrequency data analysis software on STARLINK p 1925 N94-22443
A self-defining hierarchical data system p 2046 N94-22448
A structured data transfer protocol p 2047 N94-22450
The ALEXIS data processing package: An IDL based system p 2047 N94-22453
New IRAF stellar photometry software p 1925 N94-22464
Enhancements to IRAF/STSDAS graphics p 1925 N94-22470
CCD data acquisition systems at Lick and Keck Observatories p 2047 N94-22495
AXAF user interfaces for heterogeneous analysis environments p 1926 N94-22507
Khoros software specification format and interoperability p 1927 N94-22523
The STARLINK software collection p 1927 N94-22545
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552
Parallel functional programming in SISAL: Fictions, facts, and future
[DE93-040486] p 1937 N94-22558
Time-dependent reliability analysis of ceramic engine components p 1828 N94-22619

COMPUTER STORAGE DEVICES
A novel method for characterizing the electrical Priorities of lead Zirconate Titanate (PZT) ferroelectric films and memory devices
[AD-A270463] p 2013 N94-19966
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Comparison of single event upset rates for microelectronic memory devices during interplanetary solar particle events p 1754 N94-21085

COMPUTER SYSTEMS DESIGN
Fast mutual exclusion, even with contention
[AD-A272947] p 1912 N94-21227
Software coherence in multiprocessor memory systems
[NASA-CR-194696] p 1931 N94-21272
Termination and confluence of rule execution
[CWI-CS-R9309] p 1916 N94-21587
A 20 MHz CMOS reorder buffer for a superscalar microprocessor p 1764 N94-21700
Micro-rollback and self-recovery synthesis p 1765 N94-21707
Application development in a PC/LAN environment p 1923 N94-22067
Use of open systems for control, analysis, and data acquisition of the DIII-D tokamak
[DE94-001101] p 1998 N94-22089
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101
System level modelling using Petri nets and VHDL p 1772 N94-22113
Fault tolerance for real-time multiprocessor operating systems p 1788 N94-22216
On AIPS++, a new astronomical information processing system p 2047 N94-22463
Crystal ball gazing p 1925 N94-22477
Khoros software specification format and interoperability p 1927 N94-22523

COMPUTER SYSTEMS PERFORMANCE
TCP performance analysis for wide area networks
[DE94-000449] p 1928 N94-19858
Global combine on mesh architectures with wormhole routing
[DE93-018792] p 1903 N94-19959
Specification and generation of Markov reward models
[MEMO-INF-92-60] p 1963 N94-21058
Avoiding and tolerating latency in large-scale next-generation shared-memory multiprocessors p 1753 N94-21081
The effects of block size on the performance of coherent caches in shared-memory multiprocessors
[AD-A272838] p 1899 N94-21177
Real-time fault tolerant computer systems
[AD-A272909] p 1899 N94-21230
Uniform self-stabilizing leader election. Part 1: Complete graph protocols
[CWI-CS-R9308-PT-1] p 1935 N94-21549
Efficient communication primitives on mesh architectures with hardware routing
[DE93-018791] p 1936 N94-22032
Introduction to the LaRC central scientific computing complex
[NASA-TM-104092-REV-1] p 1900 N94-22100
Scientific computing in the 1990ies: An astronomical perspective p 2057 N94-22440

COMPUTER SYSTEMS PROGRAMS
Physics Detector Simulation Facility. Phase 2: System software description
[DE93-019745] p 1928 N94-19812
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218
The NCC project: A quality management perspective p 1828 N94-21324
Developing a space network interface simulator: The NTS approach p 1933 N94-21343

COMPUTER SYSTEMS SIMULATION
APL-technology of computer simulation
p 1923 N94-22077
Formal verification of an ALU
p 1772 N94-22114
COMPUTER TECHNIQUES
A concept for implementing hypermedia technology in computer aided workplaces in medicine
[ETN-93-95057] p 1889 N94-20022
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids
p 1724 N94-20431
Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264
Implementing Electronic Data Interchange (EDI) with small business suppliers in the pre-award acquisition process
[AD-A271767] p 1945 N94-21305
Extracting information from wrong answers in computerized adaptive testing
[AD-A272832] p 1894 N94-21434
Compatibility evaluation and research on the Computerized Adaptive Screening Test (CAST): User and programmer's guide
[AD-A273112] p 1894 N94-21510
Structured multimedia authoring
[CWI-CS-R9304] p 2044 N94-21535
An expert system of econometric analysis
p 2052 N94-22081
Surface acquisition through virtual milling
p 1920 N94-22372
Scientific computing in the 1990ies: An astronomical perspective
p 2057 N94-22440
The Keck keyword layer
p 1925 N94-22460
A high temperature fatigue life prediction computer code based on the total strain version of StrainRange Partitioning (SRP)
p 1835 N94-22620
COMPUTER VISION
Recognizing 3-D objects using 2-D images
[AD-A271005] p 1983 N94-19819
Robust photo-topography by fusing shape-from-shading and stereo
[NASA-CR-194697] p 1806 N94-19920
On geometric and algebraic aspects of 3D affine and projective structures from perspective 2D views
[AD-A270520] p 1983 N94-19968
Robust and efficient 3D recognition by alignment
[AD-A270839] p 1904 N94-20041
Statistical object recognition
[AD-A270887] p 1962 N94-20113
Head-centered orientation strategies in animate vision
[TR-442] p 1894 N94-20520
Visual tracking
[AD-A271686] p 1943 N94-20920
Recognition by prototypes
[AD-A271687] p 1943 N94-20921
Graphical interactive planning of robotic applications with support of integrated simulation
[ETN-93-93793] p 1944 N94-21057
Nature's crucible: Manufacturing optical nonlinearities for high resolution, high sensitivity encoding in the compound eye of the fly, Musca domestica
p 1755 N94-21095
Adaptive analog video signal conditioner
p 1744 N94-21099
Internal camera calibration using rotation and geometric shapes
[AD-A272718] p 1808 N94-21167
Goal-oriented dynamic vision
[TR-466] p 1945 N94-21315
Experiments in knowledge refinement for a large rule-based system
[AD-A272055] p 1809 N94-21445
A 3-D vision method for estimating workspace occupancy of a power-line maintenance robot
p 1770 N94-22105
Optimal object modelling for an active-vision system
p 1771 N94-22107
Segmentation and fitting by residual consensus
p 1771 N94-22109
Sensor integration and data fusion for object localization in robotic workcells
p 1774 N94-22130
Ultrasonic sensor vision in robotics
p 1775 N94-22131
Segmenting the optical flow due to the motion of several rigid objects
p 1777 N94-22147
A neural network for multiresolution edge detection
p 1779 N94-22163
A software environment for the exploitation of the MAR image sensor
p 1785 N94-22200
A pyramid neural network architecture for stereo fusion
p 1785 N94-22201
An approach to the estimation of ground structure and aircraft motion from aerial image sequences
p 1789 N94-22226
Memory based vision: A new concept
p 1790 N94-22228
An insensitive algorithm for template matching with correlation
p 1793 N94-22249
Mobile robot perception in unknown and unstructured dynamic voxel environments
[ISBN-0-315-83951-1] p 1947 N94-22591
COMPUTERIZED SIMULATION
Simulating supersymmetry with ISAJET 7.0/ISASUSY 1.0
[DE93-018266] p 1969 N94-19804
State-space models for multichannel detection
[AD-A270608] p 1715 N94-19816
Some topics in regenerative steady-state simulation
[AD-A271145] p 1902 N94-19855
Pointing control design for autonomous space vehicle applications
[DE93-019943] p 1657 N94-19863
Longitudinal beam dynamics for heavy ion fusion using WARPrz
[DE93-019154] p 1992 N94-19915
A benchmark study of 2D and 3D finite element calculations simulating dynamic pulse buckling tests of cylindrical shells under axial impact
[DE93-018859] p 1829 N94-19940
The best of GYMNOS: A users guide
[DE93-041275] p 1992 N94-19991
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
A software architecture for the construction and management of real-time virtual worlds
[AD-A271465] p 1904 N94-20091
Qualifying codes under software quality assurance: Two examples as guidelines for codes that are existing or under development
[DE93-040452] p 1904 N94-20097
Toward a neurobiological theory of visual attention
[AD-A270724] p 1890 N94-20112
Development of a numerical simulation model for a-Si:H solar cells and application to the analysis of experimentally obtained spectral characteristics
[ETN-93-95061] p 1846 N94-20151
Multi-disciplinary coupling effects for integrated design of propulsion systems
[NASA-TM-106349] p 1830 N94-20170
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
High resolution signal processing
[AD-A271181] p 1717 N94-20215
A breakdown model for the bipolar transistor to be used with circuit simulators
[DE93-019422] p 1750 N94-20218
Computational model of a magnetic modulator for copper lasers
[DE93-019603] p 1815 N94-20223
Fast data parallel polygon rendering
[DE93-040157] p 1929 N94-20279
The GEM Silicon Tracking System
[DE93-040133] p 2016 N94-20322
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers
[DE94-000741] p 1701 N94-20352
An investigation into the integration of meter-level range and millimeter-level phase data using a multimode stimulation for optimal filter estimation software package
[AD-A267955] p 1751 N94-20483
Time warp operating system version 2.7 internals manual
[NASA-CR-194798] p 1899 N94-20549
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields
[AD-A272123] p 1831 N94-20572
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
A parametric representation of a thunderstorm cell
[AD-A271983] p 1866 N94-20579
Spread spectrum random access networks
[AD-A272280] p 1737 N94-20585
Modeling of particle dispersion in a stationary isotropic homogeneous turbulence by large scale numerical simulation
[ETN-93-94604] p 1801 N94-20601
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610
Asteroid collisions: Target size effects and resultant velocity distributions
p 2083 N94-20729
Mineralogy and cooling history of magnesian lunar granulite 67415
p 2124 N94-20811
The sand bag model of the dispersion of the cosmic body in the atmosphere
p 2084 N94-20823
Numerical simulation of lava flows: Applications to the terrestrial planets
p 1863 N94-20904
Formulation of a next-generation interior ballistic code
[AD-A271539] p 1801 N94-20915
A contribution to development and parameter extraction of SPICE compatible macromodels for discrete bipolar transistors
[HMI-B-499] p 1753 N94-21021
Graphical interactive planning of robotic applications with support of integrated simulation
[ETN-93-93793] p 1944 N94-21057
A geometrical process for three dimensional osteotomy planning
[ETN-93-93602] p 1892 N94-21134
A formulation of quantum statistical mechanics based on the Feynman path centroid density 2 dynamical properties
[AD-A272698] p 2037 N94-21166
Power conditioning system modelling for nuclear electric propulsion
[NASA-CR-191136] p 1846 N94-21179
Standard atmospheres for engagement modeling
[AD-A272447] p 1858 N94-21207
A graphical user-interface development tool for intelligent computer-assisted instruction systems
[AD-A272988] p 1912 N94-21265
Analysis of a diesel-electric hybrid urban bus system
[DE93-019514] p 1825 N94-21297
Computerized simulations with cellular automates for cloud formation
[GKSS-92/E/22] p 1867 N94-21312
The Composite Analytic and Simulation Package or RFI (CASPR) on a coded channel
p 1744 N94-21339
The three-dimensional Event-Driven Graphics Environment (3D-EDGE)
p 1922 N94-21342
Satellite Communication Hardware Emulation System (SCHES)
p 1744 N94-21344
Array Simulations Platform (ASP) predicts NASA Data Link Module (NDLM) performance
p 1744 N94-21348
Simulation of tripod gaits for a hexapod underwater walking machine
[AD-A271719] p 1945 N94-21355
Electrostatic charging and secondary effects in materials submitted to radiation in space
p 1661 N94-21383
Development and tests of a cloud physics parameterization for real-time aviation and public numerical weather forecasting
[PB93-202711] p 1868 N94-21427
Simulation studies of space-charge-dominated beam transport in large aperture ratio quadrupoles
[DE93-019238] p 1981 N94-21440
One- and multi-component theories of mixtures
[DE93-040543] p 1966 N94-21511
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531
The energy performance of prototype holographic glazings
[DE93-040451] p 1809 N94-21545
Development and evaluation of a profile negotiation process for integrating aircraft and air traffic control automation
[NASA-TM-4360] p 1643 N94-21606
RHALE: A 3-D MMALE code for unstructured grids
[DE93-019405] p 1916 N94-21635
Simulation of traveling-wave output structures for high power RF tubes
[DE93-041005] p 1763 N94-21685
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761
Performance assessment of low pressure nuclear thermal propulsion
[NASA-TM-108433] p 1671 N94-21860
Simulations of diffusion-reaction equations with implications to turbulent combustion modeling
[NASA-CR-191536] p 1804 N94-21861
User's guide for the casting process simulator software CaPS-2D, version 1.0
[DE93-040398] p 1917 N94-21923
An evaluation of integration of the trace assertion method with the box structure method for coding in C++
[DE93-040480] p 1918 N94-21924
A moving finite element model of the tokamak scrapeoff layer
[DE94-000673] p 1997 N94-21965
Transferable tight-binding parameters: An application to Ni and Ni-Al alloys
[DE94-001044] p 1695 N94-22023
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277

Parallel runway requirement analysis study. Volume 2: Simulation manual
[NASA-CR-191549-VOL-2] p 1644 N94-22278
Simulation of clear-sky outgoing longwave radiation over the oceans using operational analysis
p 1861 N94-22290
Calibration of radiation codes in climate models: Comparison of calculations with observations from the SPECtral Radiation Experiment (SPECTRE)
p 1879 N94-22337
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385
Computer simulation of molecular response at a shock front
[DE94-001050] p 1977 N94-22396
Smoothed-particle hydrodynamics and nonequilibrium molecular dynamics
[DE94-001059] p 1977 N94-22400
HST PSF simulation using Tiny Tim
p 1926 N94-22498
Verification of frequency scaling laws for capacitive rf discharges using two-dimensional simulations
[DE94-001306] p 1999 N94-22595
An overview of computational simulation methods for composite structures failure and life analysis
p 1835 N94-22617
Laboratory structure of the heliopause
p 2003 N94-22648
The onset and spectra of a magnetized Langmuir turbulence p 2006 N94-22673
Solar wind-magnetosphere interaction as simulated by a 3D, EM particle code p 2007 N94-22674
Hydrodynamical winds from an accretion disk
p 2008 N94-22683

COMPUTERS
Information Technology and Economic Modelling
[VTT-SYMP-135] p 2049 N94-22056
Introduction to the LaRC central scientific computing complex
[NASA-TM-104092-REV-1] p 1900 N94-22100
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101

CONCENTRATION (COMPOSITION)
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875

CONCENTRATORS
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1822 N94-20127

CONCRETES
Preparation of concrete specimens for microstructural image analysis studies p 1707 N94-21891
Optical air pore analysis p 1708 N94-21892
Determination of pore structure of concrete from thin sections by image analysis p 1708 N94-21895

CONCURRENT PROCESSING
Interval timed coloured petri nets and their analysis
[PB93-191732] p 1903 N94-19992
Total order assumption
[PB93-191740] p 1903 N94-19993
Bottom-up abstract interpretation of logic programs
[PB93-191773] p 1928 N94-19995
Multi-CPU plasma fluid turbulence calculations on a CRAY Y-MP C90
[DE93-015425] p 1801 N94-20562
MINIFOLD: A kernel for a MANIFOLD-like coordination language
[CWI-CS-R9252] p 1915 N94-21534

CONDENSATES
Atmospheric moisture collection device
[AD-D015935] p 1865 N94-20332
Molecular equilibria and condensation sequences in carbon rich gases p 2083 N94-20756

CONDENSATION NUCLEI
Shock induced condensation in fluids of high molar specific heat: Shock structure and relaxation
[MPIS-106/1993] p 1798 N94-20145

CONDENSING
Outgassing data for selecting spacecraft materials
[NASA-RP-1124-REV-3] p 1676 N94-21889

CONDITIONING (LEARNING)
Conditioned taste aversion induced by motion is prevented by selective vagotomy in the rat
p 1887 N94-21908
Investigating motion sickness using the conditioned taste aversion paradigm p 1888 N94-21913
Conditioned taste aversion and motion sickness in cats and squirrel monkeys p 1888 N94-21914
Current status: Animal models of nausea
p 1889 N94-21915

CONDUCTING FLUIDS
Electrode array electromagnetic velocimeter
[AD-D015950] p 1806 N94-19882

CONDUCTION BANDS
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953

CONDUCTORS
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids
p 1724 N94-20431
Magnetic force microscopy/current contrast imaging: A new technique for internal current probing of IC's
[DE93-040754] p 1761 N94-21532

CONES (VOLCANOES)
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732

CONFERENCES
Surface science at the solid liquid interface
[AD-A271422] p 1678 N94-19839
Proceedings of the 8th International Symposium on Applications of Ferroelectrics
[AD-A270679] p 1749 N94-20012
The Seventh International Conference on Composite Structures, volume 25, numbers 1-4
[AD-A269961] p 1672 N94-20031
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090
Proceedings of the Twentieth Annual Technologyfest
p 1645 N94-20188
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
Biotechnology and composite materials
[AD-A264278] p 1673 N94-20327
Progress In Electromagnetics Research Symposium (PIERS)
[NASA-CR-194629] p 1718 N94-20403
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session)
[AD-A272125] p 1942 N94-20573
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
The Fifth NASA Symposium on VLSI Design
[NASA-CR-194644] p 1753 N94-21079
Lecture notes in artificial intelligence 689: The 7th International Symposium on Methodologies for Intelligent Symposium (ISMIS 1993)
[AD-A271768] p 1944 N94-21162
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
Hypervelocity impact
[AD-A272957] p 1831 N94-21249
Networks Technology Conference
[NASA-CP-3241] p 1931 N94-21323
The Sixth Copper Mountain Conference on Multigrid Methods, part 2
[NASA-CP-3224-PT-2] p 1955 N94-21464
The 13th International Conference on Magnetically Levitated Systems and Linear Drives MAGLEV 1993
[DE93-040381] p 1825 N94-21544
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562
The 1992 4th NASA SERC Symposium on VLSI Design
[NASA-CR-194591] p 1763 N94-21694
The 1992 Seals Flow Code Development Workshop
[NASA-CP-10124] p 1654 N94-21790
Proceedings of the Seventh Annual Conference on Fossil Energy Materials
[DE94-001091] p 1848 N94-21823
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101
Proceedings of the Workshop on New Generation of Radiation Budget Measurements From Space and Their Use in Climate Modelling and Diagnostic Studies
[MPIM-90] p 1860 N94-22283
The FIRE Cirrus Science Results 1993
[NASA-CP-3238] p 1871 N94-22292
Unstructured Grid Generation Techniques and Software
[NASA-CP-10119] p 1918 N94-22350
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts
[NASA-TM-108245] p 2057 N94-22438
Electronic publishing and intelligent information retrieval p 2047 N94-22479
Computational Methods for Failure Analysis and Life Prediction
[NASA-CP-3230] p 1833 N94-22608
Fourth International Toki Conference on Plasma Physics and Controlled Nuclear Fusion
[ESA-SP-351] p 2000 N94-22624

CONFIDENCE
Believing in the basis of the evidence
[TR-438] p 2039 N94-20364

CONFIDENCE LIMITS
A search for new gauge bosons in (bar p)p collisions at square root of s equals 1.8 TeV in the dielectron decay mode
[DE93-019901] p 1969 N94-19813

CONFIGURATION INTERACTION
An introduction to GUGA in the COLUMBUS Program System
[DE93-018994] p 1902 N94-19928

CONFIGURATION MANAGEMENT
NCCDS configuration management process improvement p 1931 N94-21327

CONFINEMENT
Longitudinal beam dynamics for heavy ion fusion using WARPrz
[DE93-019154] p 1992 N94-19915
Enhanced confinement regimes and control technology in the DIII-D tokamak
[DE93-019004] p 1998 N94-22039
Physics of transport phenomena in magnetic confinement plasmas p 2000 N94-22628

CONFORMAL MAPPING
Surface path lines in plane Stokes flow driven by capillarity
[DE93-041277] p 1803 N94-21651

CONGRUENCES
Instruction set commutivity p 1766 N94-21719

CONICAL SCANNING
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1986 N94-20591

CONJUGATE GRADIENT METHOD
Layout optimization with algebraic multigrid methods
p 1957 N94-21474
The multigrid preconditioned conjugate gradient method p 1958 N94-21482
Extended range modified gradient technique for profile inversion (extended version of report Et/Em-1992-8)
[PB93-215242] p 1742 N94-22346

CONJUGATES
The Robinson-Schensted and Schuetzenberger algorithms. Part 2: Geometric interpretations
[CWI-AM-R9209-PT-2] p 1911 N94-21157

CONNECTORS
Disengagable adapter for an optical fiber connector
[AD-D015959] p 1822 N94-20356

CONSERVATION EQUATIONS
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052

CONSERVATION LAWS
Problems related to conservation laws: Phase transitions and viscoelasticity
[AD-A271429] p 1698 N94-19840
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
Symmetries and conservation laws of the system: $u(x)=vw(x)$, $v(y)=uw(y)$, $uv+w(xx)+w(yy)=0$
[MEMO-1084] p 1953 N94-21046

CONSISTENCY
On estimation and testing in Poisson regression models with over-dispersion
[MEMO-1083] p 1963 N94-21076

CONSTITUTIVE EQUATIONS
Modeling of failure and response to laminated composites subjected to in-plane loads
p 1834 N94-22612

CONSTRAINTS
Evaluation of head injury criteria
[NIAR-93-2] p 1890 N94-20190
Buffer allocation in an ATM switch with output buffer and speed constraints p 1746 N94-22203

CONSTRUCTION
Counter-balanced, multiple cable construction crane
[NASA-CASE-LAR-14565-1-CU] p 1822 N94-20369

CONSTRUCTION MATERIALS
Biotechnology and composite materials
[AD-A264278] p 1673 N94-20327
Production of NiAl and TiAl intermetallics by mechanical alloying
[VTT-JULK-760] p 1691 N94-20530
Symposium on Microscopy and Image Analysis of Building Materials
[VTT-SYMP-136] p 1707 N94-21890

CONSUMPTION
Analysis of consumer demand structure by means of economic indexes p 2052 N94-22074

CONTACT RESISTANCE
A finite element formulation and adaptive solution approach for large-scale thermomechanical problems with complex contact conditions
[DE93-019605] p 1960 N94-21996
CONTACTORS
A vibration model for centrifugal contactors
[DE93-040645] p 1833 N94-21927
CONTAMINANTS
The aerogel mesh contamination collector
[AD-A270537] p 1651 N94-20011
Spiral fluid separator
[NASA-CASE-MFS-28658-1] p 1800 N94-20361
CONTAMINATION
The aerogel mesh contamination collector
[AD-A270537] p 1651 N94-20011
New technique for oil backstreaming contamination measurements p 1652 N94-20511
Further carbon isotope measurements of LEW 88516 p 2086 N94-20886
Long Duration Exposure Facility (LDEF) contamination study
[AD-A272419] p 1658 N94-21147
Melt-spin processing of high (Tc) oxide superconductors
[DE94-000696] p 2036 N94-22582
CONTEXT FREE LANGUAGES
Hopfield models as neural-network acceptors p 1941 N94-20250
A single layer higher order neural net and its application to grammar recognition p 1941 N94-20251
CONTINUITY EQUATION
Acoustic radiation damping of flat rectangular plates subjected to subsonic flows
[NASA-TM-109362] p 1967 N94-20211
A parametric study of heat transfer within a planar thermosyphon
[DE93-019546] p 1799 N94-20258
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386
CONTINUOUS RADIATION
Design aspects and parametric characterisation of a neutral rare gas laser
[AD-A271100] p 1814 N94-19850
CONTINUOUS WAVE RADAR
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435
CONTINUUM MECHANICS
Dynamical systems and nonlinear partial differential equations
[AD-A271514] p 1951 N94-20545
Microscopic and macroscopic dynamics
[DE93-019576] p 1937 N94-22042
Smoothed-particle hydrodynamics and nonequilibrium molecular dynamics
[DE94-001059] p 1977 N94-22400
CONTINUUM MODELING
Fundamentals of mechanical behavior in structural intermetallics: A synthesis of atomistic and continuum modeling
[DE93-019166] p 1690 N94-20232
CONTOURS
Characterization of the Marquez Dome buried impact crater using gravity and magnetic data p 1863 N94-20882
CONTRACT MANAGEMENT
NASA property: Improving management of government equipment provided to contractors. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-93-191] p 2039 N94-20206
NASA procurement: Planning for pilot test of new procurement procedures is adequate. Report to the Chairman, Committee on Governmental Affairs, US Senate
[GAO/NSIAD-94-67] p 2039 N94-20236
A guide to resolving disputes over contractor delay entitlements
[AD-A272022] p 2039 N94-21444
Summary data on all NASA procurement actions
[NASA-TM-109392] p 2040 N94-21638
CONTRACT NEGOTIATION
Implementing Electronic Data Interchange (EDI) with small business suppliers in the pre-award acquisition process
[AD-A271767] p 1945 N94-21305
CONTRACTION
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
CONTRACTORS
NASA property: Improving management of government equipment provided to contractors. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-93-191] p 2039 N94-20206
A guide to resolving disputes over contractor delay entitlements
[AD-A272022] p 2039 N94-21444
CONTRACTS
NASA procurement report, FY 1992
[NASA-TM-109390] p 2040 N94-21623
Summary data on all NASA procurement actions
[NASA-TM-109392] p 2040 N94-21638
CONTROL BOARDS
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-194724] p 1897 N94-20336
CONTROL EQUIPMENT
Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188
Optimal flight guidance for aircraft in windshear
[CA-PATENT-1,307,573] p 1650 N94-21050
CONTROL STICKS
FSR based force torque transducer design
[AD-A271337] p 1650 N94-19879
CONTROL SURFACES
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
Active control of wake/blade-row interaction noise through the use of blade surface actuators
[NASA-CR-4556] p 1968 N94-21608
CONTROL SYSTEMS DESIGN
Pointing control design for autonomous space vehicle applications
[DE93-019943] p 1657 N94-19863
FSR based force torque transducer design
[AD-A271337] p 1650 N94-19879
Design of a state-space controller for an advanced gas turbine engine
[AD-A270859] p 1647 N94-20042
Telerobotic control of a mobile coordinated robotic server, executive summary
[NASA-CR-194685] p 1821 N94-20044
Control and readout of the extraction septum of AmPS
[DIGEL-1993-2] p 1979 N94-20117
Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188
Reconfigurable fuzzy cell
[NASA-CASE-MSC-21613-1] p 1907 N94-20492
Diagnostics and methods for real-time laser microchemistry
[AD-A270871] p 1680 N94-20566
An application of the Cerebellar Model Articulation Controller for a switched reluctance rotor position estimator
[AD-A271769] p 1943 N94-20926
Power supply and controller for the Sextupole magnet of AmPS
[DIGEL-1992-3] p 1753 N94-21064
Design, fabrication and test of a vertical attitude takeoff and landing unmanned air vehicle
[AD-A273003] p 1646 N94-21283
High dimension action spaces in robot skill learning
[TR-458] p 1945 N94-21317
A new eddy current model for magnetic bearing control system design p 1763 N94-21698
On the estimation algorithm used in adaptive performance optimization of turbofan engines
[NASA-TM-4551] p 1649 N94-21879
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258] p 1642 N94-22055
A robust adaptive control design for flexible joint manipulators p 1790 N94-22230
Fuzzy and neural control
[NASA-TM-108753] p 1947 N94-22270
VETA x ray data acquisition and control system p 2047 N94-22455
Wilbur: A low-cost CCD camera system for MDM Observatory p 1814 N94-22510
CONTROL THEORY
Design of a state-space controller for an advanced gas turbine engine
[AD-A270859] p 1647 N94-20042
Routing of freeway traffic: A discrete-time state space model and routing problems
[CWI-BS-R9232] p 1944 N94-21033
Replica control algorithms in distributed databases
[AD-A271571] p 1909 N94-21034
Linear programming for standard and nonstandard Markovian control problems. A survey
[PB93-191948] p 1963 N94-21066
A new eddy current model for magnetic bearing control system design p 1763 N94-21698
CONTROL VALVES
A novel scheme to handle highly pulsed loads with a standard helium refrigerator
[DE93-019617] p 1799 N94-20263
High-temperature, high-pressure oxygen metering valve
[NASA-CASE-MSC-21823-1] p 1824 N94-20589
The optohydraulic servovalve: A novel device for the precise optical control of hydraulic pressure
[ISBN-0-315-83580-X] p 1827 N94-22577
CONTROLLED ATMOSPHERES
Quinoa: An emerging new crop with potential for CELSS
[NASA-TP-3422] p 1895 N94-20137
CONTROLLERS
Design of a state-space controller for an advanced gas turbine engine
[AD-A270859] p 1647 N94-20042
Robot skill learning and the effects of basis function choice
[TR-437] p 1939 N94-20135
Reconfigurable fuzzy cell
[NASA-CASE-MSC-21613-1] p 1907 N94-20492
Analysis and design of weight balancing system for laser velocimetry traverse
[AD-A271171] p 1816 N94-20546
An application of the Cerebellar Model Articulation Controller for a switched reluctance rotor position estimator
[AD-A271769] p 1943 N94-20926
An ASIC memory buffer controller for a high speed disk system p 1754 N94-21089
Acceleration-augmented LQG control of an active magnetic bearing p 1757 N94-21112
Development and evaluation of a profile negotiation process for integrating aircraft and air traffic control automation
[NASA-TM-4360] p 1643 N94-21606
A new eddy current model for magnetic bearing control system design p 1763 N94-21698
On the decomposition of synchronous state machines using sequence invariant state machines p 1764 N94-21703
Optimization and control of a small angle ion source using an adaptive neural network controller
[DE93-040063] p 1946 N94-21845
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851
A software environment for the exploitation of the MAR image sensor p 1785 N94-22200
Fuzzy and neural control
[NASA-TM-108753] p 1947 N94-22270
VETA x ray data acquisition and control system p 2047 N94-22455
The University of Hawaii Institute for Astronomy CCD camera control system p 1828 N94-22489
CCD data acquisition systems at Lick and Keck Observatories p 2047 N94-22495
CONVECTION
Thermocapillary and arc phenomena in stainless steel welds
[DE94-000518] p 1821 N94-19859
A parametric representation of a thunderstorm cell
[AD-A271983] p 1866 N94-20579
Expectations for the Martian core magnetic field p 2120 N94-20792
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment
[AD-A272851] p 1802 N94-21193
Characterization of convection related defects in II-VI compound semiconductors
[NASA-CR-194704] p 2030 N94-21778
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar p 1874 N94-22310
CONVECTION-DIFFUSION EQUATION
Order of accuracy of QUICK and related convection-diffusion schemes
[NASA-TM-106402] p 1959 N94-21588
CONVECTIVE FLOW
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus p 2099 N94-20675
CONVECTIVE HEAT TRANSFER
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19987
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus p 2099 N94-20675

CONVENTIONS
Development of a naming convention and data ma nagement system
[NASA-CR-193860] p 2042 N94-20268
Asymptotic analysis. Working Note No. 2, approximation of integrals
[DE94-000433] p 1961 N94-22381
CONVERGENCE
Convergence of the hermite wavelet expansion
[AD-A271435] p 1854 N94-19841
Stochastic optimization by simulation: Numerical experiments with M/M/1 queue in steady-state
[AD-A271143] p 1949 N94-19854
Large deviations behavior of counting processes and their inverses
[AD-A271142] p 1939 N94-19909
Stochastic optimization by simulation: Convergence proofs for the G1/G/1 queue in steady-state
[AD-A271141] p 1962 N94-19999
A general rough-surface inversion algorithm: Theory and application to SAR data p 1719 N94-20407
Determination of structure factors of copper by convergent beam electron diffraction
[DE93-019520] p 2019 N94-20941
An automatic multigrid method for the solution of sparse linear systems p 1957 N94-21478
Sub-band adaptive noise cancelling p 1774 N94-22125
Development of a gridless CFD method p 1919 N94-22361
Accuracy assessment for grid adaptation p 1920 N94-22368
CONVERGENT NOZZLES
Instability modes excited by natural screech tones in a supersonic rectangular jet
[NASA-TM-106409] p 1638 N94-22274
CONVEXITY
Convex set and linear mixing model p 1844 N94-20888
CONVOLUTION INTEGRALS
The Composite Analytic and Simulation Package or RFI (CASPR) on a coded channel p 1744 N94-21339
Imaging vector fields using line integral convolution
[DE93-019922] p 1917 N94-21841
VLSI design of a bit serial parallel processing 4 extender chip for M-path convolutional decoding p 1775 N94-22132
Image convolution using the Myrias SPS-2 parallel computer p 1786 N94-22207
Parallelizing a maximum entropy image deconvolution algorithm p 1787 N94-22208
Coded 64QAM using a binary convolutional code p 1747 N94-22223
Deconvolution of Hubble Space Telescope images using simulated point spread functions p 2048 N94-22497
COOL STARS
The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446
COOLANTS
Cooling apparatus and couplings therefor
[NASA-CASE-ARC-11921-1] p 1800 N94-20371
Heat exchanger with oscillating flow
[NASA-CASE-LAR-14033-2] p 1800 N94-20495
Temperature and Doppler coefficients of various space nuclear reactors
[DE94-001388] p 1671 N94-21979
COOLING
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Preliminary estimation of tagamite cooling conditions (Puchezh-Katunki Astrobleme, Russia) p 2083 N94-20735
Mineralogy and cooling history of magnesian lunar granulite 67415 p 2124 N94-20811
High-energy astrophysics: A theoretical analysis of thermal radiation from neutron stars
[NASA-CR-194808] p 2055 N94-20952
The energy performance of prototype holographic glazings
[DE93-040451] p 1809 N94-21545
COOLING FLOWS (ASTROPHYSICS)
Magnetic reconnection in emission nebulae in clusters of galaxies p 2010 N94-22700
COOLING SYSTEMS
A tutorial on the aero/thermodynamical design of liquid-propellant rocket engine nozzles p 1668 N94-20074
Cooling apparatus and couplings therefor
[NASA-CASE-ARC-11921-1] p 1800 N94-20371
Cold-start minidiesel engine development
[AD-A271064] p 1823 N94-20567
Physiological efficacy of a lightweight ambient air cooling unit for various applications
[AD-A272952] p 1896 N94-21247
Heat transfer additives for absorption cooling system fluids
[PB93-202521] p 1714 N94-21426
COORDINATE TRANSFORMATIONS
New algorithm of ground track processing in high-frequency skywave over-the-horizon-B radar
[AD-A267821] p 1717 N94-20207
Registering and resampling images in STSDAS p 1927 N94-22550
COORDINATES
Processing of climatological data for model initialization
[AD-A271878] p 1865 N94-20487
Guide star catalogue data retrieval software 2 p 1927 N94-22533
The spectral world coordinate systems in IRAF/NOAO p 2049 N94-22539
COORDINATION
Structural modeling: An application framework and development process for flight simulators
[AD-A271348] p 1650 N94-19880
COPOLYMERIZATION
Swelling equilibria for cationic 2-hydroxyethyl methacrylate (HEMA)-based hydrogels
[DE94-000728] p 1707 N94-21856
COPOLYMERS
Optically induced rotation diffusion in polymer liquid crystals: Phenomenological theory and experimental verification
[ETN-93-95068] p 2014 N94-20026
Spatial organization of polymer chains in a crystallizable diblock polyethylene and polystyrene
[AD-A271862] p 1702 N94-20463
Mechanical properties and reliability of semi-crystalline polymers
[AD-A271591] p 1704 N94-20946
The 13C-NMR spectra of poly (4-((2-(acryloyloxy) ethyl) ethyl amino)- 4-nitroazobenzene-co-methyl methacrylate)
[AD-A273016] p 1705 N94-21238
Optically induced birefringence in copolymers and blends containing azobenzene groups
[AD-A273085] p 1706 N94-21523
COPPER
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906
Computational model of a magnetic modulator for copper lasers
[DE93-019603] p 1815 N94-20223
Neutral copper cluster sputtering yields: Ne(+), Ar(+) and Xe(+) bombardment
[DE93-019010] p 1690 N94-20288
Determination of structure factors of copper by convergent beam electron diffraction
[DE93-019520] p 2019 N94-20941
Impact of copper vapour contamination on argon arcs p 1994 N94-21053
Growth, characterization and device development in monocrystalline diamond films
[AD-A272715] p 2026 N94-21190
Some results of the oxidation investigation of copper and silver samples flown on LDEF p 1660 N94-21375
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768
High-power copper vapor lasers and their application to precision drilling and cutting
[DE93-019951] p 1819 N94-21844
Effect of copper sulphate on the rate of afferent discharge in the gastric branch of the vagus nerve in the rat p 1887 N94-21907
Experimental studies of gastric dysfunction in motion sickness: The effect of gastric and vestibular stimulation on the vagal and splanchnic gastric efferents p 1888 N94-21911
Microtextural characterization of annealed and deformed copper
[DE93-040144] p 1695 N94-21990
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025
COPPER ALLOYS
Method of fabricating a rocket engine combustion chamber
[NASA-CASE-MFS-28569-1] p 1703 N94-20541
Molecular dynamics modeling of the mechanical behavior of metallic multilayers
[DE93-019947] p 1694 N94-21921
Using the rule of mixtures to examine the hardness of Cu/Cu-Zr multilayers
[DE94-001068] p 1697 N94-22402
COPPER COMPOUNDS
Volatile CVD precursors based on copper alkoxides and mixed group 2A-copper alkoxides
[AD-D015930] p 1701 N94-20349
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
COPPER OXIDES
Local structure and superconductivity in La(2-x)Ba(x)CuO4 for x=0.125 and x=0.15
[DE93-040193] p 2029 N94-21555
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007
COPPER SELENIDES
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1847 N94-21614
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617
Thin-film CdTe and CuInSe2 photovoltaic technologies
[DE93-018217] p 1848 N94-21827
CORE SAMPLING
The age of the Pretoria Saltpan impact crater, South Africa p 1863 N94-20798
Solar proton events from a 180 year depth profile of nitrate concentrations from the central Greenland ice sheet
[AD-A272888] p 2147 N94-21196
CORNEA
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462
CORNERS
Hypersingular integrals at a corner
[DE94-000340] p 1961 N94-22379
CORONAL HOLES
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522
CORONAL LOOPS
MHD relaxation in magnetic loops p 2004 N94-22658
CORONARY ARTERY DISEASE
Coronary angiography outcomes of US Army aircrew with the finding of coronary artery calcifications: Aviation epidemiology data register
[AD-A271988] p 1891 N94-20615
Review of using cardiac fluoroscopy in symptomatic and asymptomatic patients
[AD-A271690] p 1891 N94-20928
CORONARY CIRCULATION
Coronary angiography outcomes of US Army aircrew with the finding of coronary artery calcifications: Aviation epidemiology data register
[AD-A271988] p 1891 N94-20615
CORONAS
Parga and Hecate Chasmata, Venus: Structure, volcanism and models of formation p 2121 N94-20786
CORRECTION
Automatic AVHRR image navigation software
[NASA-CR-194602] p 1643 N94-20148
CORRELATION COEFFICIENTS
Fast scalar algorithms for multivariate partial correlations and their empirical counterparts
[RR-903-M] p 1905 N94-20201
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624
CORRELATORS
Applications of correlator chips in radio science p 1763 N94-21695
NASA SERC digital correlator projects p 1765 N94-21706
A 1 GHz sample rate, 256-channel, 1-bit quantization, CMOS, digital correlator chip p 1768 N94-21732
Low power, CMOS digital autocorrelator spectrometer for spaceborne applications p 1666 N94-21733
A real time correlator architecture using distributed arithmetic principles p 1768 N94-21734
The VLBA correlator: Real-time in the distributed era p 2049 N94-22547
CORROSION
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride
[DE93-041307] p 1706 N94-21516
Laser Raman and x ray scattering studies of corrosion films on metals
[DE93-040243] p 1692 N94-21558
CORROSION PREVENTION
Corrosion inhibition in high temperature environment
[AD-D015910] p 1698 N94-19830

A comparison of sulfuric acid/boric acid anodize and chromic acid anodize processes
[AD-A271933] p 1703 N94-20614
Oxidation resistant protective coating system for gas turbine components and process for penetration thereof
[CA-PATENT-1,294,155] p 1704 N94-21143
Surface modification of TI3AI for improved oxidation resistance
[DE93-018297] p 1696 N94-22034

CORROSION RESISTANCE
Corrosion inhibition in high temperature environment
[AD-D015910] p 1698 N94-19830
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027
A comparison of sulfuric acid/boric acid anodize and chromic acid anodize processes
[AD-A271933] p 1703 N94-20614
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride
[DE93-041307] p 1706 N94-21516
Surface modification for corrosion resistance
[DE93-017419] p 1693 N94-21825

COSINE SERIES
Operational equations for the five-point rectangle
[DE94-000366] p 1959 N94-21655
An in-place and in-order algorithm for the discrete cosine transform p 1771 N94-22111

COSMIC BACKGROUND EXPLORER SATELLITE
An IDL-based analysis package for COBE and other skycube-formatted astronomical data
p 1925 N94-22471
Visualizing the universe, part 1 p 2064 N94-22476

COSMIC DUST
A study of Saturn's E-ring particles using the Voyager 1 plasma wave instrument
[NASA-CR-194694] p 2088 N94-20048
The x ray halo of AM Her
[NASA-CR-189310] p 2054 N94-20142
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging
p 2082 N94-20659
First discovery of the organic materials in deep-sea iron cosmic spherule p 1685 N94-20677
Molecular equilibria and condensation sequences in carbon rich gases p 2083 N94-20756
Intact capture of hypervelocity particles on Shuttle
p 2085 N94-20837
The x ray halo of Cen X-3
[NASA-CR-189309] p 2055 N94-21295
Dust content of a hydrogen rich, low surface brightness galaxy and the luminosity history of 3C273
[NASA-CR-194705] p 2056 N94-21779

COSMIC PLASMA
MHD flows from compact objects: Effects on magnetic field configurations p 2008 N94-22684
Three-dimensional simulations of cosmic jets employing the smoothed particle hydrodynamics technique
p 2008 N94-22685

COSMIC RAY SHOWERS
Evaluation of the chemical composition of cosmic radiation in energy area of 10(exp 15) eV
[ETN-93-93682] p 2150 N94-21056

COSMIC RAYS
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Gamma ray spectrometry of LDEF samples: Results of 1992 analyses
[DE94-001177] p 1684 N94-22046

COST ANALYSIS
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[DOT/FAA/RD-93/22] p 1642 N94-20051
Activities of National Inst. for Aviation Research
[NIAR-93-16] p 2151 N94-20150
Analysis of cost: CVD diamond deposition
[AD-A271980] p 2018 N94-20616
Multigrid approach to solving the long transportation problem on a regular grid in cost space
[AD-A272323] p 1909 N94-21038
On the selection of indices in relational databases
[MEMO-INF-92-72] p 2043 N94-21071
An assessment of the cost of microwave sintering ceramic tiles for armor applications
[DE94-000978] p 1693 N94-21850

COST EFFECTIVENESS
Turbine design p 1668 N94-20075
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1651 N94-20108
The manager's guide to NASA graphics standards
[NHB-1430.2] p 2042 N94-20308
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277

COST ESTIMATES
A conceptual design for the STAR endcap electromagnetic calorimeter
[DE93-040801] p 1807 N94-19990
An assessment of the cost of microwave sintering ceramic tiles for armor applications
[DE94-000978] p 1693 N94-21850
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569

COSTS
Analysis of cost: CVD diamond deposition
[AD-A271980] p 2018 N94-20616
Japanese space program p 1652 N94-21407

COUETTE FLOW
Turbulization of free shear flows: 3D perturbations
p 2000 N94-22626

COULOMB COLLISIONS
Accretion of a hot plasma onto the central black hole: Fokker-Planck formulation p 2009 N94-22693

COUNTER ROTATION
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531

COUNTERS
A lower bound on wait-free counting
[CWI-CS-R9307] p 1915 N94-21537

COUNTING
Large deviations behavior of counting processes and their inverses
[AD-A271142] p 1939 N94-19909
A lower bound on wait-free counting
[CWI-CS-R9307] p 1915 N94-21537

COUNTING CIRCUITS
A lower bound on wait-free counting
[CWI-CS-R9307] p 1915 N94-21537

COUPLED MODES
High resolution infrared spectroscopy of cyclobutane: A study of vibrational mode coupling involving large amplitude, low frequency modes
[AD-A271987] p 1973 N94-20619
Laser driven hydrodynamic instability experiments
[DE93-040550] p 1818 N94-21547

COUPLERS
Shaft mount for data coupler system
[NASA-CASE-LAR-13805-1] p 1822 N94-20365

COUPLING
Multi-disciplinary coupling effects for integrated design of propulsion systems
[NASA-TM-106349] p 1830 N94-20170
High resolution infrared spectroscopy of formamide and deuterated formamide in a molecular beam
[AD-A271986] p 1973 N94-20618
Photo- and thermal-induced antiferromagnetic interlayer coupling in Fe/(Fe-Si) superlattices
[DE93-040822] p 2031 N94-21930
Orientationally independent antiferromagnetic coupling in epitaxial Fe/Cr (211) and (100) superlattices
[DE94-001270] p 2035 N94-22564

COUPLING CIRCUITS
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method
p 1718 N94-20405

COUPLING COEFFICIENTS
Formulation for numerical solution of radiation and transmission from arbitrary apertures
p 1745 N94-22140
Orthogonalization method for determination of boundary layer receptivity coefficients
[ISBN-0-315-83426-9] p 1805 N94-22580

COUPLINGS
Cooling apparatus and couplings therefor
[NASA-CASE-ARC-11921-1] p 1800 N94-20371

COVALENT BONDS
Composite materials with improved properties in compression
[AD-A272837] p 1675 N94-21176

COVARIANCE
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761
Canonically covariant formulation of Landau's Newtonian superfluid dynamics
[PB93-221034] p 1805 N94-22272

COVERINGS
Development of bioelastic material for aspects of wound repair
[AD-A267832] p 1673 N94-20208

CRACK CLOSURE
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624

CRACK INITIATION
Brief summary of the evolution of high-temperature creep-fatigue life prediction models for crack initiation
p 1834 N94-22613

CRACK PROPAGATION
Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions
[AD-A272658] p 1691 N94-21188
Numerical modeling of a propagating crack
[AD-A272604] p 1832 N94-21421
The mechanical property data base from an Air Force/industry cooperative test program on advanced aluminum alloys: 2091 sheet, plate, and 8090 extrusion
[AD-A273091] p 1692 N94-21525
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624
Investigation of moisture-induced embrittlement of iron aluminides
[DE93-040841] p 1695 N94-21949
Nonlinear and progressive failure aspects of transport composite fuselage damage tolerance
p 1834 N94-22609
Projections on structures and material strength in the computational context p 1834 N94-22610
A thermodynamic analysis of propagating subcritical cracks with cohesive zones p 1834 N94-22611
Life prediction systems for critical rotating components
p 1835 N94-22615
Demonstrating damage tolerance of composite airframes p 1647 N94-22623

CRACK TIPS
Numerical modeling of a propagating crack
[AD-A272604] p 1832 N94-21421
Projections on structures and material strength in the computational context p 1834 N94-22610
A thermodynamic analysis of propagating subcritical cracks with cohesive zones p 1834 N94-22611

CRACKING (FRACTURING)
Investigation of cracking and erratic behavior of the uranium-titanium alloy
[DE93-018591] p 1688 N94-19957
Cratering evaluations and results
[DE93-040347] p 1691 N94-20478
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions
[AD-A272658] p 1691 N94-21188
Stress-induced cracking of fluorocarbon rubber MTL-0002 after exposure to DS-2
[AD-A271753] p 1705 N94-21302
Numerical modeling of a propagating crack
[AD-A272604] p 1832 N94-21421
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504

CRACKS
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624
A thermodynamic theory of dynamic fragmentation
[DE93-019066] p 1833 N94-21916

CRANES
Counter-balanced, multiple cable construction crane
[NASA-CASE-LAR-14565-1-CU] p 1822 N94-20369

CRASHWORTHINESS
Structural crashworthiness and failure
[AD-A270429] p 1828 N94-19815

CRATERING
Cratering evaluations and results
[DE93-040347] p 1691 N94-20478
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars
p 2082 N94-20648
Searching for ancient Venus p 2111 N94-20743
SPH modelling of energy partitioning during impacts on Venus p 2124 N94-20809
Determination of parameters for hypervelocity dust grains encountered in near-Earth space
p 2084 N94-20817
Original size of the Vredefort structure, South Africa
p 1863 N94-20825
Limits on differentiation of melt sheets from basin-scale lunar impacts p 2133 N94-20856
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864
Shock attenuation at the Slate Islands revisited
p 1863 N94-20887

CRATERS
Calderas produced by hydromagmatic eruptions through permafrost in northwest Alaska p 2089 N94-20385
Gravity investigation of the Manson impact structure, Iowa p 2082 N94-20694

Pressure versus drag effects on crater size
p 1862 N94-20742
Impactor control of central peak and peak-ring formation p 1862 N94-20744
Linear structures on the small inner satellites of Saturn p 2121 N94-20797
Characterization of the Marquez Dome buried impact crater using gravity and magnetic data
p 1863 N94-20882

CRATONS
Primary differentiation in the early Earth: Nd and Sr isotopic evidence from diamondiferous eclogites for both old depleted and old enriched mantle, Yakutia, Siberia
p 1862 N94-20776

CRAY COMPUTERS
Segmented operations for sparse matrix computation on vector multiprocessors
[AD-A270601] p 1928 N94-19950
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
Multi-CPU plasma fluid turbulence calculations on a CRAY Y-MP C90
[DE93-015425] p 1801 N94-20562
Some experiences of solving 1-D semiconductor device equations on a matrix coprocessor by a domain decomposition method
[CWI-NM-R9304] p 1935 N94-21492

CREEP ANALYSIS
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777

CREEP PROPERTIES
Investigation of austenitic alloys for advanced heat recovery and hot gas cleanup systems
[DE93-017863] p 1687 N94-19802
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
Durability predictions for adhesively bonded joints in humid environments
[AD-A271177] p 1830 N94-20001
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948
Creep damage of carbon fiber reinforced PEEK
[ISBN-0-315-58962-0] p 1677 N94-22420
Brief summary of the evolution of high-temperature creep-fatigue life prediction models for crack initiation
p 1834 N94-22613

CREEP RUPTURE STRENGTH
Creep damage of carbon fiber reinforced PEEK
[ISBN-0-315-58962-0] p 1677 N94-22420

CREEP STRENGTH
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093

CREEP TESTS
Creep damage of carbon fiber reinforced PEEK
[ISBN-0-315-58962-0] p 1677 N94-22420

CRETACEOUS PERIOD
Research program on the Manson impact structure, Iowa p 1862 N94-20766

CRETACEOUS-TERTIARY BOUNDARY
The Koshak section: Evidence for element fractionation and an oxidation event at the K/T boundary
p 1862 N94-20641
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Global blackout following the K/T Chicxulub impact: Results of impact and atmospheric modeling
p 1854 N94-20698
U-Pb provenance ages of shocked zircons from the K-T boundary, Raton Basin, Colorado p 1685 N94-20701
Research program on the Manson impact structure, Iowa p 1862 N94-20766
Two-polarity magnetization in the Manson impact breccia p 1863 N94-20789

CRITICAL FREQUENCIES
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951

CRITICAL LOADING
Crystal orientation dependence of elastic precursor strength in pentaerythritol tetranitrate
[DE93-018340] p 2034 N94-22035

CRITICAL TEMPERATURE
Thermal expansion of electronic highly correlated materials
[ETN-93-93605] p 2026 N94-21135
Spin-polaron theory of high-T(c) superconductivity. 3: Gap function and critical temperature
[DE93-019198] p 2030 N94-21831

CROP GROWTH
Quinoa: An emerging new crop with potential for CELSS
[NASA-TP-3422] p 1895 N94-20137
The 7th Brazilian Remote Sensing Symposium, volume4 p 1840 N94-20965

CROSS CORRELATION
Optoelectronic associative memory
[NASA-CASE-NPO-18278-1-CU] p 1985 N94-20303
Using crosscorrelation techniques to determine the impulse response of linear systems
p 1759 N94-21122
The IRAF radial velocity analysis package
p 1925 N94-22475
SPECFOCUS: An IRAF task for focusing spectrographs p 1965 N94-22540
Registering and resampling images in STSDAS
p 1927 N94-22550

CROSS FLOW
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels
[DE93-040181] p 1804 N94-21765

CROSS POLARIZATION
Radar backscatter measurements from simulated sea ice during CRRELEX 1990
[AD-A271034] p 1715 N94-19823
Multiple scattering effects on the Linear Depolarization Ratio (LDR) measured during CaPE by a Ka-band air-borne radar p 1728 N94-20446

CROSS SECTIONS
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870

CROSSLINKING
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526

CRUDE OIL
Biofuels: Project summaries
[DE93-010003] p 1712 N94-19984
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
Current situation in developing petroleum substituting energy (the United Kingdom)
[DE94-714897] p 1713 N94-22091
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569

CRUSTAL FRACTURES
Ridge belt-related scarps and troughs: Compressional crustal bending on Venus p 2106 N94-20711
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
Photogeological analysis of Europan tectonic features
p 2129 N94-20838
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
Large floor-fractured craters and isostatic crater modification: Implications for lithospheric thickness on Venus p 2135 N94-20873

CRUSTS
Diapirs and cantaloupes: Layering and overturn of Triton's crust p 2111 N94-20738

CRYOGENIC COOLING
Properties of cryogenic liquids p 1668 N94-20073
Flow and heat transfer model for a rotating cryogenic motor
[DE94-001151] p 1794 N94-22405

CRYOGENIC EQUIPMENT
Measurements of atomic interactions and frequency stability with a cryogenic hydrogen maser
[AD-A271132] p 1814 N94-19853
Acoustic microscopy and nonlinear effects in pressurized superfluid helium
[AD-A270598] p 1967 N94-19949
The Vulcain cryogenic engine p 1668 N94-20077
A novel scheme to handle highly pulsed loads with a standard helium refrigerator
[DE93-019617] p 1799 N94-20263
Detailed study of oxidation/wear mechanism in lox turbopump bearings
[NASA-TM-108434] p 1825 N94-21580
Passive Cryogenic Sampler
[DE94-000918] p 1811 N94-22392

CRYOGENIC FLUID STORAGE
Properties of cryogenic liquids p 1668 N94-20073
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177

CRYOGENIC FLUIDS
Spacecraft Propulsion
[VKI-LS-1993-01] p 1667 N94-20068

CRYOGENIC ROCKET PROPELLANTS
Spacecraft Propulsion
[VKI-LS-1993-01] p 1667 N94-20068
Properties of cryogenic liquids p 1668 N94-20073
Cryogenic propellant rocket engine problems
p 1668 N94-20076
The Vulcain cryogenic engine p 1668 N94-20077

CRYOGENIC TEMPERATURE
The National High Magnetic Field Laboratory, a user facility in support of research in high magnetic fields
[DE93-040145] p 1714 N94-20278

CRYOGENICS
A novel scheme to handle highly pulsed loads with a standard helium refrigerator
[DE93-019617] p 1799 N94-20263
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions
[AD-A272658] p 1691 N94-21188
Fabrication of porous ceramics by freeze-casting/freeze-drying
[PB93-202513] p 1705 N94-21425
Stability of an uncooled segment of a high-temperature superconductor
[DE94-000476] p 2032 N94-21932
Passive Cryogenic Sampler
[DE94-000918] p 1811 N94-22392
Flow and heat transfer model for a rotating cryogenic motor
[DE94-001151] p 1794 N94-22405

CRYOSTATS
Operation of a test bed axial-gap brushless dc rotor with a superconducting stator
[DE93-019167] p 1769 N94-21830
Test results of two high temperature superconducting sample coils
[DE94-000496] p 2035 N94-22570

CRYPTOGRAPHY
Threshold computation and cryptographic security
[TR-443] p 1907 N94-20536
Threshold computation and cryptographic security
[TR-461] p 1912 N94-21285
Modeling and analysis of secure communication protocols using Petri net formalism
p 1784 N94-22194

CRYSTAL DEFECTS
General introduction to microstructural evolution under cascade damage conditions
[DE93-017443] p 2012 N94-19923
Fundamentals of mechanical behavior in structural intermetallics: A synthesis of atomistic and continuum modeling
[DE93-019166] p 1690 N94-20232
X ray analysis of alpha mercuric iodide crystal structure and processing effects
[DE93-017620] p 2027 N94-21296
IR materials producibility
[AD-A273031] p 1987 N94-21321
Defect motion as the origin of the 1/f conductance noise in solids
[EUT-92-E-259] p 2029 N94-21552
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763
Surface and subsurface defect detection in Si3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772
Characterization of convection related defects in II-VI compound semiconductors
[NASA-CR-194704] p 2030 N94-21778

CRYSTAL DISLOCATIONS
On the experimental determination of low order structure factors in TiAl by energy filtered convergent beam electron diffraction
[DE93-019521] p 1687 N94-19806
Examinations of composition and deformation behavior of intermetallic phases on the basis of Fe3(AlSi)
[GKSS-92/E/16] p 1692 N94-21311
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO2
[DE93-040229] p 2033 N94-21993

CRYSTAL GROWTH
Materials processing and manufacturing technologies for Diamond Substrate MultiChip Modules (DSMCM)
[AD-A271011] p 2011 N94-19821
Growth mechanisms and characterization of hydrogenated amorphous-silicon-alloy films
[DE93-018202] p 1699 N94-20047
Growth of zinc selenide single crystals by physical vapor transport in microgravity
[NASA-CR-194679] p 2017 N94-20346

Real-time analysis of in-situ spectroscopic ellipsometric data during MBE growth of III-V semiconductors
p 2024 N94-21004
Holographic measurements of ice crystals in cirrus clouds during International Cirrus Experiment ICE
[GKSS-92/E/14] p 1866 N94-21052
X ray analysis of alpha mercuric iodide crystal structure and processing effects
[DE93-017620] p 2027 N94-21296
Materials processing and manufacturing technologies for diamond substrate multichip modules
[AD-A271484] p 2027 N94-21319
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505
Characterization of convection related defects in II-VI compound semiconductors
[NASA-CR-194704] p 2030 N94-21778
Initial development of a high-pressure crystal growth facility: Center director's discretionary fund
[NASA-TM-108430] p 2030 N94-21807
Annual Report, Materials Science Branch, FY 1992
[DE94-000204] p 1849 N94-22015
Growth and morphology of crystals: Theory and observations
[PB93-221166] p 2035 N94-22273

CRYSTAL LATTICES
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Fundamentals of mechanical behavior in structural intermetallics: A synthesis of atomistic and continuum modeling
[DE93-019166] p 1690 N94-20232
Phonons and metastability in compressed nitrogen
[DE93-019913] p 2016 N94-20318
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505
Static ultra-high pressure study of lanthanide and actinide metals using a diamond-anvil cell
[DE94-000369] p 1693 N94-21656
Microtextural characterization of annealed and deformed copper
[DE93-040144] p 1695 N94-21990
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb)
[DE93-040227] p 2033 N94-21992
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997
Lattice damage during ion implantation of semiconductors
[DE94-000335] p 2034 N94-22016
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388
Theoretical phase diagrams for solid H(sub 2)
[DE94-001049] p 1684 N94-22395
Spectroscopic studies of magnetic transitions in TbPO4
[DE94-001274] p 2035 N94-22565

CRYSTAL OSCILLATORS
Measuring liquid properties with smooth and textured-surface resonators
[DE93-019433] p 1749 N94-20054

CRYSTAL STRUCTURE
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Common Themes and Mechanisms of Epitaxial Growth, volume 312 — Materials Research Society symposium proceedings
[AD-A270513] p 2013 N94-19967
Neutron-scattering studies of Yb-bearing silicate glasses
[DE93-019768] p 1700 N94-20265
Molecular and atomic arrays in nano- and mesoporous materials synthesis
[AD-A271500] p 2017 N94-20544
Microstructure evolution in the presence of constraints and implications on the properties of Mg-Li and Nb-Al constraints
[AD-A272088] p 1674 N94-20623
Inter- and intra-crystalline oxygen isotope distribution of fassaites in Allende CAI p 2086 N94-20898
Determination of structure factors of copper by convergent beam electron diffraction
[DE93-019520] p 2019 N94-20941
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry
p 2022 N94-20992
X ray analysis of alpha mercuric iodide crystal structure and processing effects
[DE93-017620] p 2027 N94-21296
Synthesis and catalytic properties of metal and semiconductor nanoclusters
[DE93-019418] p 2028 N94-21541
First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21964
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO2
[DE93-040229] p 2033 N94-21993
Growth and morphology of crystals: Theory and observations
[PB93-221166] p 2035 N94-22273
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388

CRYSTAL SURFACES
Oxidation-reduction induced roughening of platinum (111) surface
[DE93-017406] p 1687 N94-19922
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638

CRYSTALLINITY
Complex and stereoregular nonlinear optical materials
[AD-A271067] p 1983 N94-19848
Petrography of shock features in the 1953 Manson 2-A drill core p 1862 N94-20767
Mechanical properties and reliability of semi-crystalline polymers
[AD-A271591] p 1704 N94-20946

CRYSTALLIZATION
Method for controlling protein crystallization
[NASA-CASE-MFS-28688-1] p 2017 N94-20528
Evaporation of a sodium tellurite melt in the jamic low gravity drop shaft p 1713 N94-20605
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon
p 2096 N94-20660
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690
Preliminary estimation of tagamite cooling conditions (Puchezh-Katunki Astrobleme, Russia)
p 2083 N94-20735
Origin of the Apollo 15 very low Ti green glass. A perspective from the compositional diversity in the very low Ti glasses p 1685 N94-20759
Orthopyroxenes as recorders of diogenite petrogenesis: Trace element systematics p 1686 N94-20760
Ti-bearing oxide minerals in lunar meteorite Y793169 with the VLT affinity p 2084 N94-20812
Equilibrium and fractional crystallization of a primitive Shergottite composition p 2085 N94-20861
Mechanical properties and reliability of semi-crystalline polymers
[AD-A271591] p 1704 N94-20946

CRYSTALLOGRAPHY
High resolution electron crystallography of protein molecules
[DE93-040114] p 1884 N94-19826
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Thermal expansion of electronic highly correlated materials
[ETN-93-93605] p 2026 N94-21135
Static ultra-high pressure study of lanthanide and actinide metals using a diamond-anvil cell
[DE94-000369] p 1693 N94-21656
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb)
[DE93-040227] p 2033 N94-21992
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO2
[DE93-040229] p 2033 N94-21993
Growth and morphology of crystals: Theory and observations
[PB93-221166] p 2035 N94-22273
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394

CRYSTALS
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262
Spatial organization of polymer chains in a crystallizable diblock polyethylene and polystyrene
[AD-A271862] p 1702 N94-20463
First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21964
Crystal orientation dependence of elastic precursor strength in pentaerythritol tetranitrate
[DE93-018340] p 2034 N94-22035
Growth and morphology of crystals: Theory and observations
[PB93-221166] p 2035 N94-22273
Cirrus microphysics observations made during FIRE 2: Small particles, high concentrations, and probe comparisons p 1871 N94-22294
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals
p 1871 N94-22295
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388

CUBIC EQUATIONS
Achieving high data reduction with integral cubic B-splines
[NASA-CR-177628] p 1966 N94-21881

CULTURAL RESOURCES
Aircraft noise effects on cultural resources: Recommendation and rationale for further research
[PB93-205326] p 1968 N94-22053
Aircraft noise effects on cultural resources: Annotated bibliography
[PB93-205334] p 1969 N94-22054

CUMULATIVE DAMAGE
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504

CUMULUS CLOUDS
Clouds: Their prediction and simulation
[AD-A271161] p 1864 N94-19900
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar
p 1874 N94-22310

CURING
Phthalonitrile prepolymer as high temperature sizing material for composite fibers
[AD-D015912] p 1672 N94-20010
Stress-induced cracking of fluorocarbon rubber MTL-0002 after exposure to DS-2
[AD-A271753] p 1705 N94-21302

CURRENT DENSITY
First results on InGaAsP separate confinement heterostructure diode lasers
[AD-A270849] p 1815 N94-19878
Superconducting property measurements in tape geometry
[DE93-018943] p 2014 N94-19970
VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312
CsI and some new photocathodes
[DE93-019387] p 1750 N94-20314
Beta-limiting instabilities in D3-D discharges with large bootstrap current
[DE93-015476] p 1993 N94-20326
Microwave properties and characterization of co-evaporated BSCCO thin films p 1709 N94-20518
Field emitter array RF amplifier development project, phase 1, option 1
[AD-A272567] p 1740 N94-21361
A new innovative instrument for space plasma instrumentation
[NASA-CR-194736] p 1666 N94-21780
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583

CURVATURE
The effect of transverse curvature on the fluctuating wall pressure and structure of boundary layer turbulence
[AD-A271868] p 1800 N94-20466

CURVE FITTING
A database of selected transport coefficients for combustion studies
[DE93-041278] p 1678 N94-19889
Measure fields for function approximation
[AD-A272660] p 1964 N94-21215
Achieving high data reduction with integral cubic B-splines
[NASA-CR-177628] p 1966 N94-21881

Segmentation and fitting by residual consensus
p 1771 N94-22109
Interactive Spectral Analysis and Computation (ISAAC)
p 1926 N94-22505

CURVES (GEOMETRY)
Affine and non-affine blossoms
[RR-913-M] p 1950 N94-20200

CUTTING
High-power copper vapor lasers and their application to precision drilling and cutting
[DE93-019951] p 1819 N94-21844

CYANIDES
C2, CN and dust in Comet Wilson (1987VII)
p 2083 N94-20746
Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold
[DE93-041126] p 1694 N94-21937

CYCLES
Long cycles in graphs containing a 2-factor with many odd components
[MEMO-1086] p 1953 N94-21048
Degree sums, k-factors and Hamiltonian cycles in graphs
[MEMO-1078] p 1953 N94-21074
Semi-stability and heights of cycles
[PB93-215507] p 1961 N94-22377

CYCLIC COMPOUNDS
Fullerene derivatives and fullerene superconductors
[DE93-019568] p 2031 N94-21871

CYCLIC LOADS
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Life assessment of structural components using inelastic finite element analyses p 1834 N94-22614
Time-dependent reliability analysis of ceramic engine components p 1828 N94-22619

CYCLOBUTANE
High resolution infrared spectroscopy of cyclobutane: A study of vibrational mode coupling involving large amplitude, low frequency modes
[AD-A271987] p 1973 N94-20619

CYCLOHEXANE
Surface science and modeling studies of endothermic fuels catalysis
[AD-A272850] p 1712 N94-21192

CYCLONES
The life cycles of intense cyclonic and anticyclonic circulation systems observed over oceans
[NASA-CR-194760] p 1865 N94-20353
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
Large-scale circulation regimes and tropical cyclone characteristics over the western pacific ocean
[AD-A273004] p 1867 N94-21307
A synoptic-scale overview of the TOGA COARE intensive observing period November 1992 to February 1993 based on analyses from US operational global data assimilation systems
[NASA-TM-104593] p 1868 N94-21605

CYCLOTRON FREQUENCY
Fusion plasma theory grant. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE94-000779] p 1994 N94-20940

CYCLOTRON RADIATION
Particle behavior in an ECR plasma etch tool
[DE93-040343] p 1996 N94-21769

CYCLOTRON RESONANCE
Particle behavior in an ECR plasma etch tool
[DE93-040343] p 1996 N94-21769

CYCLOTRON RESONANCE DEVICES
An 85 GHz quasioptical gyroklystron experiment
[AD-A272020] p 1752 N94-20931

CYLINDRICAL ANTENNAS
Radiation and scattering from printed antennas on cylindrically conformal platforms
[NASA-CR-194703] p 1741 N94-21885
Scattering by cavity-backed antennas on a circular cylinder p 1741 N94-21886
Radiation by cavity-backed antennas on a circular cylinder p 1741 N94-21887
User manual for EXCALIBUR: A FE-BI numerical laboratory for cavity-backed antennas in a circular cylinder, version 1.2 p 1741 N94-21888
Aperture coupling of circular cylindrical dielectric resonator antenna
[ISBN-0-315-60632-0] p 1743 N94-22409

CYLINDRICAL BODIES
Probe compensation in cylindrical near-field scanning: A novel simulation methodology p 1718 N94-20404
The effect of transverse curvature on the fluctuating wall pressure and structure of boundary layer turbulence
[AD-A271868] p 1800 N94-20466
Approximation to sound radiation and scattering by simply supported layered cylinder
[AD-A272964] p 1967 N94-21306
Speed of sound data and related models for mixtures of natural gas constituents
[PB93-200822] p 1968 N94-21447
Improved approximate formulas for flux from cylindrical and rectangular sources
[DE93-011390] p 1742 N94-22268

CYLINDRICAL CHAMBERS
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583

CYLINDRICAL COORDINATES
A moving finite element model of the tokamak scrapeoff layer
[DE94-000673] p 1997 N94-21965

CYLINDRICAL SHELLS
A benchmark study of 2D and 3D finite element calculations simulating dynamic pulse buckling tests of cylindrical shells under axial impact
[DE93-018859] p 1829 N94-19940
Compression strength of composite primary structural components
[NASA-CR-194561] p 1830 N94-20159
Approximation to sound radiation and scattering by simply supported layered cylinder
[AD-A272964] p 1967 N94-21306
Adhesive bonded joint with improved cyclic fatigue life for alumina-ceramic cylinders and hemispheres: Fourth generation housings
[AD-A273061] p 1831 N94-21310
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757

CYLINDRICAL WAVES
Probe compensation in cylindrical near-field scanning: A novel simulation methodology p 1718 N94-20404

D

D REGION
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918
High Frequency (HF) and meteor burst communications in a polar environment
[AD-A271604] p 1737 N94-20949

DAMAGE
Cratering evaluations and results
[DE93-040347] p 1691 N94-20478
Lattice damage during ion irnplantation of semiconductors
[DE94-000335] p 2034 N94-22016
Demonstrating damage tolerance of composite airframes p 1647 N94-22623

DAMAGE ASSESSMENT
The Seventh International Conference on Composite Structures, volume 25, numbers 1-4
[AD-A269961] p 1672 N94-20031
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields
[AD-A272123] p 1831 N94-20572
Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729
Variable angle spectroscopic ellipsometric characterization of surface damage in chemical-mechanical polished GaAs p 1710 N94-20986
Flight and laboratory testing of materials in low Earth orbit p 1659 N94-21389
Measured space environmental effects to LDEF during retrieval p 1659 N94-21372
Thermostructural material composites for space applications p 1664 N94-21398
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-51
[NASA-TM-109189] p 1656 N94-21884
Aircraft noise effects on cultural resources: Recommendation and rationale for further research
[PB93-205326] p 1968 N94-22053
Aircraft noise effects on cultural resources: Annotated bibliography
[PB93-205334] p 1969 N94-22054

DAMPING
Frequency and temperature dependence of high damping elastomers
[DE93-019539] p 1697 N94-19809
Persistent wakefields associated with waveguide damping of higher order modes
[DE93-040973] p 1715 N94-19874
Acoustic radiation damping of flat rectangular plates subjected to subsonic flows
[NASA-TM-109382] p 1967 N94-20211
Measurement and computation of the higher order modes of the ALS 500 MHz accelerating cavities
[DE93-019256] p 1980 N94-20292
Teleoperation with virtual force feedback
[DE93-019406] p 1942 N94-20293
Active damping of oscillations in a long compliant manipulator link
[DE93-018878] p 1826 N94-22038
Continuum damping of ideal toroidal Alfven eigenmodes
[DE94-001233] p 1998 N94-22560

DARK MATTER
The distribution of dark matter in the A2256 cluster
[NASA-CR-194699] p 2055 N94-21579
How to handle 6GBytes a night and not get swamped p 2058 N94-22444
Dark matter: Neutron star halo and the nature of gamma-bursts p 2002 N94-22643

DATA ACQUISITION
SISSY: An example of a multi-threaded, networked, object-oriented databased application
[DE93-019742] p 2041 N94-19811
Data management for support of the Oregon Transect Ecosystem Research (OTTER) project
[NASA-CR-4557] p 1905 N94-20149
A SCSI-bus data acquisition system for nuclear spectroscopy experiments
[USIP-92-03] p 2042 N94-20193
Development of a naming convention and data ma nagement system
[NASA-CR-193860] p 2042 N94-20268
The GEM Silicon Tracking System
[DE93-040133] p 2016 N94-20322
Recommendations resulting from the SPDS Community-Wide Workshop
[NASA-CR-194684] p 2042 N94-20363
Magellan at Venus: Summary of science findings p 2110 N94-20734
NAVSPASUR sensor system digital signal processing receiver. Volume 1: Hardware and software overview
[AD-A272899] p 1736 N94-21198
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222
Low-cost, dual-use platforms for environmental sensing, phase 1
[AD-A272951] p 1646 N94-21246
Software metrics: The key to quality software on the NCC project p 1922 N94-21326
Heterojunction bipolar transistor technology for data acquisition and communication p 1763 N94-21697
Geometric optimization
[DE93-040152] p 1917 N94-21764
Three dimensional ultrasonic imaging
[DE93-040549] p 1968 N94-22003
Post-experimental plots for high speed data acquisition program
[DE94-000956] p 1918 N94-22011
Use of open systems for control, analysis, and data acquisition of the DIII-D tokamak
[DE94-001101] p 1998 N94-22089
A four-band infrared data acquisition facility for signal processing development p 1791 N94-22235
Near wake measurements on a rotor model with Mie-vanes in the Delft open jet tunnel
[PB93-215382] p 1638 N94-22260
An overview of the radiation component of the NASA TOGA-COARE experiment p 1881 N94-22344
Access to D3-D data located in multiple files and multiple locations
[DE94-001104] p 2045 N94-22404
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts
[NASA-TM-108245] p 2057 N94-22438
VETA x ray data acquisition and control system p 2047 N94-22455
The Keck keyword layer p 1925 N94-22460
ROSAT implementation of a proposed multi-mission x ray data format p 2047 N94-22462
The ADAM environment and transputers p 1926 N94-22494
CCD data acquisition systems at Lick and Keck Observatories p 2047 N94-22495
The digital archive of the International Halley Watch p 2047 N94-22496
The ISO SWS on-line system p 1927 N94-22522
The data acquisition system for the Anglo-Australian Observatory 2-degree field project p 2048 N94-22529

NASA's astrophysics archives at the National Space Science Data Center p 2049 N94-22541
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552
Interpretation of Ground Penetrating Radar data at the Hanford Site, Richland, Washington
[DE93-040409] p 1743 N94-22557
Measurement of the influence of deicing liquids on aircraft aerodynamics p 1640 N94-22602

DATA BASE MANAGEMENT SYSTEMS
SISSY: An example of a multi-threaded, networked, object-oriented databased application
[DE93-019742] p 2041 N94-19811
RDA-PC system user's guide
[AD-A270356] p 2041 N94-20038
Dynamics Explorer 2: Continued FPI and NACS instrument data analysis and associated scientific activity at the University of Michigan
[NASA-CR-194689] p 1657 N94-20173
Optics survivability support, volume 2
[DE93-040310] p 1985 N94-20283
Design and implementation of a prototype PC based graphical and interactive MILSATCOM requirements database system
[AD-A272960] p 1658 N94-21251
Let your fingers do the walking: The projects most invaluable tool p 1922 N94-21325
Termination and confluence of rule execution
[CWI-CS-R9309] p 1916 N94-21587
Advanced failure analysis laboratory equipment networking
[DE93-019070] p 1916 N94-21633
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851
Project Records Information System (PRIS): User's manual
[DE94-001548] p 2045 N94-22047
Investigation on construction of the database system for research and development of the global environment industry technology
[DE94-714890] p 1853 N94-22090
Distributed processing using Oracle7 and SQL*Net v2: An implementation story
[DE94-000494] p 1937 N94-22267
Access to D3-D data located in multiple files and multiple locations
[DE94-001104] p 2045 N94-22404
Implementation of a laboratory information management system for environmental regulatory analyses
[DE94-001198] p 2046 N94-22407
The extreme ultraviolet explorer archive p 2047 N94-22468
The NSO FTS database program and archive (FTSDBM) p 1926 N94-22506
STARBASE: Database software for the automated plate scanner p 1927 N94-22512
Evaluation of RDBMS packages for use in astronomy p 2048 N94-22514
The EXOSAT database and archive p 2048 N94-22521
SkiCAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546

DATA BASES
An analysis of cloud-cover reporting in the 1977 surface observation database
[AD-A271102] p 1864 N94-19852
Development of the UTC-PAB normative database
[AD-A271319] p 1893 N94-20023
RDA-PC system user's guide
[AD-A270356] p 2041 N94-20038
Data and Analysis Center for Software
[AD-A270571] p 2041 N94-20106
Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262
Development of a naming convention and data management system
[NASA-CR-193860] p 2042 N94-20268
Optics survivability support, volume 2
[DE93-040310] p 1985 N94-20283
Recommendations resulting from the SPDS Community-Wide Workshop
[NASA-CR-194684] p 2042 N94-20363
Processing of climatological data for model initialization
[AD-A271878] p 1865 N94-20487
Threshold computation and cryptographic security
[TR-443] p 1907 N94-20536
Studying Venus using a GIS database p 2105 N94-20707
Named Venusian craters p 2109 N94-20725
Replica control algorithms in distributed databases
[AD-A271571] p 1909 N94-21034
Multi Wave Link: An interactive database for co-ordination of multiwavelength programs
[NASA-CR-194778] p 2043 N94-21055
On the selection of indices in relational databases
[MEMO-INF-92-72] p 2043 N94-21071
A conceptual database design and performance analysis of the MILSATCOM requirements database
[AD-A272672] p 1658 N94-21217
Conversion of LDEF experiment M0003 sample observation database to MS-DOS formats
[AD-A272945] p 1681 N94-21226
Design and implementation of a prototype PC based graphical and interactive MILSATCOM requirements database system
[AD-A272980] p 1658 N94-21251
Light update notification mechanism for shared data structures
[AD-D015967] p 2043 N94-21276
Threshold computation and cryptographic security
[TR-461] p 1912 N94-21285
Promises and fault-tolerant database access
[TR-447] p 2043 N94-21287
Problem reporting management system performance simulation p 1931 N94-21328
The Test Analysis Retrieval System (TARS): Meeting the challenges of the network's test processes p 1933 N94-21337
The mechanical property data base from an Air Force/industry cooperative test program on advanced aluminum alloys: 2091 sheet, plate, and 8090 extrusion
[AD-A273091] p 1692 N94-21525
Interpolative modeling of GaAs FET S-parameter data bases for use in Monte Carlo simulations p 1767 N94-21723
Databases in distributed systems p 2046 N94-22080
Investigation on construction of the database system for research and development of the global environment industry technology
[DE94-714890] p 1853 N94-22090
Survey on utilization of database for research and development of global environmental industry technology
[DE94-714891] p 1853 N94-22259
Distributed processing using Oracle7 and SQL*Net v2: An implementation story
[DE94-000494] p 1937 N94-22267
Database computing in HEP
[NASA-CR-194791] p 1921 N94-22375
Implementation of a laboratory information management system for environmental regulatory analyses
[DE94-001198] p 2046 N94-22407
Database of proposed payloads and instruments for SEI missions p 1811 N94-22432
Archiving data from ground-based telescopes p 2045 N94-22442
How to handle 6GBytes a night and not get swamped p 2058 N94-22444
Database activity in the Italian Astronet: DIRA 2 p 2047 N94-22452
The EUVE proposal database and scheduling system p 2047 N94-22459
A distributed clients/distributed servers model for STARCAT p 2047 N94-22469
An IDL-based analysis package for COBE and other skycube-formatted astronomical data p 1925 N94-22471
C++, objected-oriented programming, and astronomical data models p 2063 N94-22473
The IRAF radial velocity analysis package p 1925 N94-22475
Programmability in AIPS++ p 1926 N94-22482
The HEASARC graphical user interface p 1926 N94-22487
Quality control of EUVE databases p 2047 N94-22490
A generic archive protocol and an implementation p 2047 N94-22493
SIMBAD quality-control p 2048 N94-22502
The NSO FTS database program and archive (FTSDBM) p 1926 N94-22506
STARBASE: Database software for the automated plate scanner p 1927 N94-22512
Evaluation of RDBMS packages for use in astronomy p 2048 N94-22514
The European Southern Observatory-MIDAS table file system p 2048 N94-22518
Integrating a local database into the StarView distributed user interface p 2048 N94-22530
STELAR: An experiment in the electronic distribution of astronomical literature p 2049 N94-22544
StarView: The object oriented design of the ST DADS user interface p 2049 N94-22548

DATA COMPRESSION
Low bit rate coding of Earth science images
[NASA-CR-193729] p 2041 N94-20158
A comparison of some of the most current methods of image compression
[AD-A271841] p 1907 N94-20525
An adaptive, lossless data compression algorithm and VLSI implementations p 1753 N94-21080
High performance MPEG-audio decoder IC p 1744 N94-21092
A fixed/variable bit-rate data compression architecture p 1759 N94-21128
A CAM-based LZ data compression IC p 1759 N94-21129
Behavioral model simulation studies of an image compressor p 1760 N94-21133
Data compression by using wavelet transforms and vector quantization
[AD-A272763] p 1738 N94-21182
Reduction of blocking effects for the JPEG baseline image compression standard p 1765 N94-21714
Application guide for universal source encoding for space
[NASA-TP-3441] p 1741 N94-21783
A neural M-ary tree method for data compression p 1780 N94-22166
Coding of color quantized images p 1781 N94-22173
Hierarchical multirate vector quantization for image coding p 1781 N94-22174
Efficient transfer of images over networks p 1748 N94-22517

DATA CONVERSION ROUTINES
FITS data conversion efforts at the Compton Observatory Science Support Center p 1926 N94-22488

DATA CORRELATION
Performance evaluation of the JPL TOPSAR system: An across-track interferometric SAR system for topographic mapping p 1732 N94-20461
Specific heat of YBa2Cu3O7
[DE93-040640] p 2031 N94-21926
Sensor integration and data fusion for object localization in robotic workcells p 1774 N94-22130
STAR-1 SAR road extraction using texture analysis and mathematical morphology
[ISBN-0-315-83255-X] p 1843 N94-22429

DATA FLOW ANALYSIS
Set based analysis of ML programs
[AD-A270597] p 1902 N94-19948
Object-oriented DFD models to present the functional and behavioral views
[DE93-040206] p 1906 N94-20280
MINIFOLD: A kernel for a MANIFOLD-like coordination language
[CWI-CS-R9252] p 1915 N94-21534
Micro-rollback and self-recovery synthesis p 1765 N94-21707
Modeling software systems for data flow testing p 1772 N94-22117
A neural network approach to the maximum flow problem p 1783 N94-22183
Throughput and blocking in circuit-switched interconnection networks p 1784 N94-22189
GRO/EGRET data analysis software: An integrated system of custom and commercial software using standard interfaces p 1926 N94-22501

DATA INTEGRATION
Robust photo-topography by fusing shape-from-shading and stereo
[NASA-CR-194697] p 1806 N94-19920
GammaCore: The Compton Observatory research environment p 2048 N94-22509

DATA LINKS
Understanding Open Systems Interconnection (OSI)
[AD-A271877] p 1929 N94-20472
Satellite Communication Hardware Emulation System (SCHES) p 1744 N94-21344
A packet switched communications system for GRO p 1744 N94-21345
Array Simulations Platform (ASP) predicts NASA Data Link Module (NDLM) performance p 1744 N94-21348
Advanced coding and modulation schemes for TDRSS p 1744 N94-21350
PEGASUS, electronic bulletin board system user's guide
[AD-A271679] p 2044 N94-21363
Low-cost Unmanned Air Vehicle (UAV) for oceanographic research
[AD-A273103] p 1646 N94-21507
Data link development for the archytas vertical takeoff and landing transitional flight unmanned aerial vehicle
[AD-A272499] p 1646 N94-21548
Specification and formal verification of the safety criterion in the alternating bit protocol p 1784 N94-22193

DATA MANAGEMENT
RDA-PC system user's guide
[AD-A270356] p 2041 N94-20038
Data and Analysis Center for Software
[AD-A270571] p 2041 N94-20106

Data management for support of the Oregon Transect Ecosystem Research (OTTER) project
[NASA-CR-4557] p 1905 N94-20149
Development of a naming convention and data management system
[NASA-CR-193860] p 2042 N94-20268
On Update Last schemes
[CWI-CS-R9247] p 1952 N94-21027
The electronics technology policy of the NLR Informatics Division: The NLR electronics CAE infrastructure
[NLR-TP-91001-U] p 1753 N94-21067
Light update notification mechanism for shared data structures
[AD-D015967] p 2043 N94-21276
Distributed processing using Oracle7 and SQL*Net v2: An implementation story
[DE94-000494] p 1937 N94-22267
Data management for interdisciplinary field experiments: OTTER project support
[NASA-CR-4559] p 1842 N94-22345
Database computing in HEP
[NASA-CR-194791] p 1921 N94-22375
A proof-of-concept implementation of persistence in a hierarchical storage system
[NASA-CR-194790] p 1921 N94-22376
Access to D3-D data located in multiple files and multiple locations
[DE94-001104] p 2045 N94-22404
How to handle 6GBytes a night and not get swamped
p 2058 N94-22444
ROSAT implementation of a proposed multi-mission x ray data format p 2047 N94-22462
The extreme ultraviolet explorer archive
p 2047 N94-22468
Programmability in AIPS++ p 1926 N94-22482
The NSO FTS database program and archive (FTSDBM) p 1926 N94-22506
The European Southern Observatory-MIDAS table file system p 2048 N94-22518

DATA PROCESSING

A concept for implementing hypermedia technology in computer aided workplaces in medicine
[ETN-93-95057] p 1889 N94-20022
Explainable expert systems: A research program in information processing
[NASA-CR-193422] p 2041 N94-20133
A proposed research program in information processing
[NASA-CR-194271] p 2041 N94-20134
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
Connectionism and Natural Language Processing
[MEMO-INF-92-64] p 1940 N94-20242
Speech synthesis with artificial neural networks
p 1743 N94-20245
A single layer higher order neural net and its application to grammar recognition p 1941 N94-20251
Syntactic neural networks for natural language processing p 1941 N94-20254
Development of a naming convention and data management system
[NASA-CR-193860] p 2042 N94-20268
Understanding Open Systems Interconnection (OSI)
[AD-A271877] p 1929 N94-20472
Shipboard ADCP observations during RRS Charles Darwin Cruise 62
[IOS-298-1992] p 1882 N94-20531
Standard ML signatures for a protocol stack
[AD-A272060] p 1908 N94-20622
Data format standards for civilian remote sensing satellites
[PB93-192920] p 1841 N94-21446
Self assembly: An approach to terascale integration
[DE93-040104] p 1769 N94-21846
Design document and database specifications for the Naval Interactive Data Analysis System (NIDAS), version 1.0
[NASA-CR-194817] p 2045 N94-21865
Enhanced software for the GT1022 automated gaging system
[DE94-001374] p 1918 N94-21977
System architectures for banking applications
p 2046 N94-22057
Use of open systems for control, analysis, and data acquisition of the DIII-D tokamak
[DE94-001101] p 1998 N94-22089
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties
p 1874 N94-22308
How to handle 6GBytes a night and not get swamped
p 2058 N94-22444
The ALEXIS data processing package: An IDL based system p 2047 N94-22453
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461
On AIPS++, a new astronomical information processing system p 2047 N94-22463
Deep near-infrared survey of the Southern Sky (DENIS) p 2062 N94-22467
A distributed clients/distributed servers model for STARCAT p 2047 N94-22469
An IDL-based analysis package for COBE and other skycube-formatted astronomical data
p 1925 N94-22471
GRO/EGRET data analysis software: An integrated system of custom and commercial software using standard interfaces p 1926 N94-22501
Data indexing techniques for the EUVE all-sky survey
p 2048 N94-22503
AXAF user interfaces for heterogeneous analysis environments p 1926 N94-22507
GammaCore: The Compton Observatory research environment p 2048 N94-22509
Evaluation of RDBMS packages for use in astronomy
p 2048 N94-22514
Managing an archive of weather satellite images
p 2048 N94-22525
The IRAF Fabry-Perot analysis package: Ring fitting
p 2048 N94-22527
PCIPS 2.0: Powerful multiprofile image processing implemented on PCs p 1927 N94-22532
IRAF in the nineties p 2048 N94-22535

DATA PROCESSING EQUIPMENT

A SCSI-bus data acquisition system for nuclear spectroscopy experiments
[USIP-92-03] p 2042 N94-20193
NAVSPASUR sensor system digital signal processing receiver. Volume 1: Hardware and software overview
[AD-A272899] p 1738 N94-21198
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218

DATA RECORDERS

Audit report. Navy's aircraft structural life surveillance program data recorders
[AD-A270391] p 1645 N94-20040

DATA RECORDING

Efficiency of reversible optical storage in azo polymers
[AD-A272923] p 1705 N94-21223
The VLBA correlator: Real-time in the distributed era
p 2049 N94-22547

DATA REDUCTION

Study of regional climate change
[DE93-018926] p 1850 N94-19941
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918
A geometrical process for three dimensional osteotomy planning
[ETN-93-93602] p 1892 N94-21134
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194726] p 2147 N94-21815
Achieving high data reduction with integral cubic B-splines
[NASA-CR-177628] p 1966 N94-21881
Automated analysis tools for reducing spacecraft telemetry data
[DE94-000400] p 1657 N94-21981
On the discovery of approximate arithmetic relations by backpropagation networks p 1782 N94-22181
Studies in remotely sensed geophysical parameter retrieval and analysis
[NASA-CR-194768] p 1842 N94-22374
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts
[NASA-TM-108245] p 2057 N94-22438
Multifrequency data analysis software on STARLINK
p 1925 N94-22443
CCD surface photometry of galaxies
p 2058 N94-22445
An object-oriented data reduction system in Fortran
p 2046 N94-22447
GUIs in the MIDAS environment p 2047 N94-22449
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461
PHOTCAL: The IRAF photometric calibration package
p 1925 N94-22465
The HEASARC graphical user interface
p 1926 N94-22487
Interactive Spectral Analysis and Computation (ISAAC)
p 1926 N94-22505
The European Southern Observatory-MIDAS table file system p 2048 N94-22518
Adaptive filtering of Echelle spectra of distant Quasars
p 2072 N94-22520
The IRAF Fabry-Perot analysis package: Ring fitting
p 2048 N94-22527
The evolution of the FIGARO data reduction system
p 2048 N94-22528
IRAF in the nineties p 2048 N94-22535
Miyun 232 MHz survey 1: Fields centered at: alpha:00(h)41(m), delta:41 deg 12 min and alpha: 07(h)00(m),delta:35 deg 00 min p 2060 N94-22554
ROSAT data analysis with EXSAS
p 2060 N94-22555

DATA RETRIEVAL

On the selection of indices in relational databases
[MEMO-INF-92-72] p 2043 N94-21071
Database computing in HEP
[NASA-CR-194791] p 1921 N94-22375
A generic archive protocol and an implementation
p 2047 N94-22493
STARBASE: Database software for the automated plate scanner p 1927 N94-22512
Guide star catalogue data retrieval software 2
p 1927 N94-22533
Recommendations for a service framework to access astronomical archives p 2049 N94-22537

DATA SAMPLING

Satellite orbit and data sampling requirements
p 1870 N94-21648
Specific heat of YBa2Cu3O7
[DE93-040640] p 2031 N94-21926
Some practicable applications of quadtree data structures/representation in astronomy
p 1927 N94-22515

DATA SIMULATION

Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549

DATA SMOOTHING

A geometrical process for three dimensional osteotomy planning
[ETN-93-93602] p 1892 N94-21134
Measure fields for function approximation
[AD-A272660] p 1964 N94-21215

DATA STORAGE

M-dimensional computer memory with M-1 dimensional hyperplane access
[AD-D015960] p 1898 N94-20357
Recommendations resulting from the SPDS Community-Wide Workshop
[NASA-CR-194684] p 2042 N94-20363
A comparison of some of the most current methods of image compression
[AD-A271841] p 1907 N94-20525
An ASIC memory buffer controller for a high speed disk system p 1754 N94-21089
The effects of block size on the performance of coherent caches in shared-memory multiprocessors
[AD-A272838] p 1899 N94-21177
Mode transition matrix measuring system
[AD-D015973] p 1987 N94-21279
Publication of science data on CD-ROM: A guide and example
[NASA-CR-4560] p 1842 N94-21585
A simple modern correctness condition for a space-based high-performance multiprocessor
p 1766 N94-21718
A proof-of-concept implementation of persistence in a hierarchical storage system
[NASA-CR-194790] p 1921 N94-22376
Access to D3-D data located in multiple files and multiple locations
[DE94-001104] p 2045 N94-22404
ROSAT implementation of a proposed multi-mission x ray data format p 2047 N94-22462
The extreme ultraviolet explorer archive
p 2047 N94-22468
A generic archive protocol and an implementation
p 2047 N94-22493
The digital archive of the International Halley Watch
p 2047 N94-22496
Integrating a local database into the StarView distributed user interface p 2048 N94-22530

DATA STRUCTURES

Exploiting the parallelism exposed by partial evaluation
[AD-A270678] p 1928 N94-19677
Implementation of a portable nested data-parallel language
[AD-A270524] p 1902 N94-19932
Eliminating amortization: On data structures with guaranteed response time
[TR-439] p 2049 N94-20096
Structural similitude and design of scaled down laminated models
[NASA-CR-194687] p 1673 N94-20172
Parallel logic programming systems
[RR-891-I] p 1929 N94-20176

A conceptual database design and performance analysis of the MILSATCOM requirements database
[AD-A272672] p 1858 N94-21217
The term processor Kimwitu manual and cookbook
[MEMO-INF-92-67] p 1914 N94-21454
Databases in distributed systems
p 2046 N94-22080
Dynamic mesh adaption for triangular and tetrahedral grids p 1920 N94-22363
Surface acquisition through virtual milling
p 1920 N94-22372
A self-defining hierarchical data system
p 2046 N94-22448
A structured data transfer protocol
p 2047 N94-22450
Some practicable applications of quadtree data structures/representation in astronomy
p 1927 N94-22515
The evolution of the FIGARO data reduction system
p 2048 N94-22528

DATA SYSTEMS
The EXOSAT operational experience
[ESA-STM-248] p 1657 N94-20235
Recommendations resulting from the SPDS Community-Wide Workshop
[NASA-CR-194684] p 2042 N94-20363
Shaft mount for data coupler system
[NASA-CASE-LAR-13805-1] p 1822 N94-20365
Development and operations of the Astrophysics Data System
[NASA-CR-194691] p 2043 N94-21270
Structured multimedia authoring
[CWI-CS-R9304] p 2044 N94-21535
The 1992 4th NASA SERC Symposium on VLSI Design
[NASA-CR-194591] p 1763 N94-21694
Design document and database specifications for the Naval Interactive Data Analysis System (NIDAS), version 1.0
[NASA-CR-194817] p 2045 N94-21865
A packet based, data driven telemetry system for autonomous experimental sub-orbital spacecraft
[DE94-000399] p 1657 N94-21980
System architectures for banking applications
p 2046 N94-22057
Data management for interdisciplinary field experiments: OTTER project support
[NASA-CR-4559] p 1842 N94-22345
Access to D3-D data located in multiple files and multiple locations
[DE94-001104] p 2045 N94-22404
Multifrequency data analysis software on STARLINK
p 1925 N94-22443
An object-oriented data reduction system in Fortran
p 2046 N94-22447
A self-defining hierarchical data system
p 2046 N94-22448
On AIPS++, a new astronomical information processing system p 2047 N94-22463
C++, objected-oriented programming, and astronomical data models p 2063 N94-22473
Crystal ball gazing p 1925 N94-22477
A generic archive protocol and an implementation
p 2047 N94-22493
The ADAM environment and transputers
p 1926 N94-22494
Intelligent text retrieval in the NASA astrophysics data system p 2048 N94-22499
AXAF user interfaces for heterogeneous analysis environments p 1926 N94-22507
GammaCore: The Compton Observatory research environment p 2048 N94-22509
Recommendations for a service framework to access astronomical archives p 2049 N94-22537

DATA TRANSFER (COMPUTERS)
TCP performance analysis for wide area networks
[DE94-000449] p 1928 N94-19858
A SCSI-bus data acquisition system for nuclear spectroscopy experiments
[USIP-92-03] p 2042 N94-20193
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20468
Telecommunications services for multimedia data exchange support
[AD-A271704] p 1740 N94-21352
File transfer performance in LAN interconnection through a satellite channel p 1746 N94-22209
NASA data exchange standards for computational fluid dynamics p 1920 N94-22371
A structured data transfer protocol
p 2047 N94-22450
Efficient transfer of images over networks
p 1748 N94-22517
The European Southern Observatory-MIDAS table file system p 2048 N94-22518

DATA TRANSMISSION
Shaft mount for data coupler system
[NASA-CASE-LAR-13805-1] p 1822 N94-20365
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20468
Delivery of very high bandwidth with ATM switches and SONET
[DE93-019432] p 1899 N94-20476
A comparison of some of the most current methods of image compression
[AD-A271841] p 1907 N94-20525
Optimization of a satellite localization and message sending system
[ETN-93-94448] p 1737 N94-20592
Measuring the effects of thread placement on the Kendall Square KSR1
[DE93-040655] p 1906 N94-20932
An optically-assisted 3-D cellular array machine
[AD-A272683] p 1987 N94-21163
Security management of electronic data interchange
[AD-A272962] p 1899 N94-21252
Generating and evaluating alternate schedules
p 1933 N94-21336
A low cost alternative to high performance PCM bit synchronizers p 1813 N94-21347
Array Simulations Platform (ASP) predicts NASA Data Link Module (NDLM) performance p 1744 N94-21348
Telecommunications services for multimedia data exchange support
[AD-A271704] p 1740 N94-21352
Tandem queues with deterministic service times
[CWI-BS-R9238] p 1946 N94-21577
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
Investigation on construction of the database system for research and development of the global environment industry technology
[DE94-714890] p 1853 N94-22090
CREIR: A multiaccess protocol for on-board processing satellite systems p 1780 N94-22168
Specification and formal verification of the safety criterion in the alternating bit protocol
p 1784 N94-22193
Coded 64QAM using a binary convolutional code
p 1747 N94-22223
Access to D3-D data located in multiple files and multiple locations
[DE94-001104] p 2045 N94-22404
Everything you might want to know about the Internet but are afraid to ask!
[DE93-041118] p 2046 N94-22413

DAYGLOW
A comparison of a simple model of EUV dayglow with Viking data
[ISBN-0-315-83258-4] p 1861 N94-22574

DAYTIME
Evaluation of a single stage of the LADS filter
[AD-A271101] p 1814 N94-19851

DEBRIS
PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-51
[NASA-TM-109189] p 1656 N94-21884
CO2 lidar observations of Mount Pinatubo debris: FIRE 2 and longer-term measurements p 1876 N94-22323

DECAY RATES
Optical properties of chromium and neodymium in zirconium - barium - lanthanum - aluminum fluoride glass
[AD-A271609] p 1987 N94-21236

DECISION MAKING
Believing in the basis of the evidence
[TR-438] p 2039 N94-20364
Neural network for processing both spatial and temporal data with time based back-propagation
[NASA-CASE-MSC-21874-1] p 1942 N94-20366
Integration opportunities for computer models, methods, and GIS used in Corps planning studies
[AD-A271714] p 2044 N94-21354
Conversion and maintenance of Co-oP for Windows
[AD-A272513] p 1914 N94-21414
Modelling decision-making by pilots
[NASA-CR-194767] p 2040 N94-21821
Information and decision structure in a Japanese type of management with respect to QCC and just-in-time systems p 2046 N94-22063
Method and software for decision making in public problems p 1923 N94-22087

DECISION THEORY
Linear programming for standard and nonstandard Markovian control problems. A survey
[PB93-191948] p 1963 N94-21066
Goal-oriented dynamic vision
[TR-466] p 1945 N94-21315
Method and software for decision making in public problems p 1923 N94-22087
Algorithms for Markov decision chains with partial information
[PB93-220085] p 1918 N94-22098
SkICAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546

DECODERS
High performance MPEG-audio decoder IC
p 1744 N94-21092
VLSI design of a bit serial parallel processing 4 extender chip for M-path convolutional decoding
p 1775 N94-22132

DECODING
High-speed Viterbi decoding with overlapping code sequences p 1760 N94-21130
Arithmetic in large GF(2(exp n)) p 1760 N94-21131
Toward a new method of decoding algebraic codes using Groebner bases
[AD-A273089] p 1959 N94-21524
The Schur Berlekamp-Massey algorithm is parallelizable p 1784 N94-22191
Encoding and decoding quasi-spherical signal sets
p 1747 N94-22233
On the capacity of (T,U) permutation decoding method
p 1792 N94-22245
Adaptive decoding of convolutional codes
p 1793 N94-22246
Bidirectional algorithms for the decoding of convolutional codes over memoryless channels p 1793 N94-22247

DECOMPOSITION
Space-charge dominated beam transport in magnetic quadrupoles with large aperture ratios
[DE93-040443] p 1992 N94-20004
Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570
Impact-induced devolatilization of CaSO4 anhydrite and implications for K-T extinctions: Preliminary results
p 2085 N94-20840
On the decomposition of synchronous state mechines using sequence invariant state machines
p 1764 N94-21703
Modeling of outgassing and matrix decomposition in carbon-phenolic composites
[NASA-CR-194741] p 1676 N94-21743
A multiresolution wavelet representation in two or more dimensions p 1925 N94-22456

DEEP SPACE NETWORK
Networks Technology Conference
[NASA-CP-3241] p 1931 N94-21323
Using manufacturing message specification for monitor and control at Venus p 1932 N94-21333
The Test Analysis Retrieval System (TARS): Meeting the challenges of the network's test processes
p 1933 N94-21337

DEEP WATER
On the sources of North Atlantic deep water
[AD-A270854] p 1881 N94-19895

DEFECTS
Research on defects and transport in amorphous-silicon-based semiconductors
[DE93-017117] p 2013 N94-19939
Solder technology in the manufacturing of electronic products
[DE93-018842] p 1699 N94-19960
Characterization and possible repair of defects in soft x ray projection lithography masks
[DE93-019147] p 1750 N94-20231
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20468
Process characterization and control of hand-soldered printed wiring assemblies
[DE93-041290] p 1763 N94-21652
Defect-sensitivity analysis of an SEU immune CMOS logic family p 1765 N94-21711
Behavior of faulty double BJT BiCMOS logic gates
p 1767 N94-21727
A set-associative, fault-tolerant cache design
p 1768 N94-21731
Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000665] p 1697 N94-22571

DEFENSE PROGRAM
Data and Analysis Center for Software
[AD-A270571] p 2041 N94-20106
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20468
Clementine: An inexpensive mission to the Moon and Geographos p 1652 N94-20765
Listing of approved recurring information requirements
[AD-A271673] p 2042 N94-20919

Implementing Electronic Data Interchange (EDI) with small business suppliers in the pre-award acquisition process
[AD-A271767] p 1945 N94-21305

DEFLECTION
Thermal characterization of thin films by photothermally induced laser beam deflection p 1710 N94-21007
The preservation of low emittance flat beams
[DE93-040964] p 1981 N94-21773

DEFORMATION
Durability predictions for adhesively bonded joints in humid environments
[AD-A271177] p 1830 N94-20001
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093
Some deformation trends and topographic characteristics of tesserae on Venus
p 2105 N94-20706
Strength and deformation properties of basaltic lava flows on planetary surfaces p 1862 N94-20747
A tectonic resurfacing model for Venus
p 2118 N94-20781
Parga and Hecate Chasmata, Venus: Structure, volcanism and models of formation
p 2121 N94-20796
Atmospheric breakup of a small comet in the Earth's atmosphere p 2084 N94-20824
Adaptation of model parameters of a rail model at measured rail compliances
[ILR-MITT-274(1992)] p 1831 N94-21153
Experimental and numerical studies of high-velocity impact fragmentation
[DE93-040205] p 1832 N94-21557
Deformation of an alumina-zirconia-silicon carbide-whisker reinforced composite
[DE93-040244] p 1676 N94-21559
Microtextural characterization of annealed and deformed copper
[DE93-040144] p 1695 N94-21990
A finite element formulation and adaptive solution approach for large-scale thermomechanical problems with complex contact conditions
[DE93-019605] p 1960 N94-21996

DEGASSING
Are Plinian type eruptions possible on Venus?
p 2123 N94-20803
Residual atmosphere in the FRECOPA experiment and degassing of materials p 1660 N94-21374
Core formation, wet early mantle, and H2O degassing on early Mars p 2145 N94-21674
Evolution of the Martian atmosphere
p 2146 N94-21680

DEGRADATION
Degradation sequence of young lunar craters from orbital infrared survey p 2136 N94-20874
Evaluation of radiation effects in re-oxidized nitrided oxide devices by hot carrier stressing at 77 K
p 1754 N94-21084
Conversion of LDEF experiment M0003 sample observation database to MS-DOS formats
[AD-A272945] p 1681 N94-21226
Fifth International Symposium on Materials in a Space Environment
[ISBN-2-85-428293-0] p 1659 N94-21367
German space experiments on Spacelab D-2 and Eureca-1 to investigate atomic oxygen interaction with materials p 1662 N94-21390
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676

DEGREES OF FREEDOM
Collisions of molecules with clusters: A quasiclassical study
[DE93-018614] p 1971 N94-20050

DEHYDRATION
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975

DEHYDROGENATION
Surface science and modeling studies of endothermic fuels catalysis
[AD-A272850] p 1712 N94-21192
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258

DEICERS
Radome having integral heating and impedance matching elements
[CA-PATENT-APPL-SN-2,026,85] p 1738 N94-21049
Measurement of the influence of deicing liquids on aircraft aerodynamics p 1640 N94-22602

DEICING
Measurement Technology for Flight Tests
[ILR-MITT-256(1991)] p 1639 N94-22597
Experiments with a fluid deicing system for cleaning laminar wings p 1640 N94-22601
Measurement of the influence of deicing liquids on aircraft aerodynamics p 1640 N94-22602

DELAMINATING
Compression strength of composite primary structural components
[NASA-CR-194561] p 1830 N94-20159
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504
The effect of delamination on the dynamic response of composite laminates as measured by embedded fiber optic Michelson sensor
[ISBN-0-315-83534-6] p 1677 N94-22587
An embedded fibre optic for damage growth monitoring in Kevlar composites
[ISBN-0-315-83501-X] p 1677 N94-22589
Delamination, durability, and damage tolerance of laminated composite materials p 1678 N94-22622

DELAY
The correlated M/G/1 queue
[CWI-BS-R9303] p 1943 N94-21032
Computation of signal delays in RC networks
p 1744 N94-21102
Optimization of static traffic allocation policies
[CWI-BS-R9302] p 1930 N94-21161
Optimization of fixed time polling schemes
[CWI-BS-R9237] p 1945 N94-21233
Optimal repairman assignment in two maintenance models which are equivalent to routing models with early decisions
[CWI-BS-R9301] p 1930 N94-21234

DELAY CIRCUITS
Computation of signal delays in RC networks
p 1744 N94-21102
Delay analysis of combinations of pass transistors and classical logic gates p 1756 N94-21103
An adaptive method for group delay compensation using switched capacitor filters p 1793 N94-22248

DEMAGNETIZATION
Magnetic record in chondrite meteorites
p 2085 N94-20858

DEMAND (ECONOMICS)
Analysis of consumer demand structure by means of economic indexes p 2052 N94-22074

DEMODULATION
Digital receiver for on-board FM/FSK-FM/BPSK demodulation p 1744 N94-21091
A digital demodulation scheme for use in a high dynamic range radar system p 1745 N94-22144
The influence of lowpass filtering and the effects of fading on the group demodulation of QPSK signals
p 1746 N94-22170
Demodulation of a fiber Fabry-Perot strain rosette using white light interferometry
[ISBN-0-315-83427-7] p 1990 N94-22579

DEMODULATORS
Digital receiver for on-board FM/FSK-FM/BPSK demodulation p 1744 N94-21091
Timing recovery in the channel processor of a digital group demodulator p 1780 N94-22169

DEMULTIPLEXING
Wide passband wavelength multi/demultiplexer at 1.3/1.55 micrometers based on etched Fresnel mirror, appendix 8 p 1989 N94-21602

DENDRITIC CRYSTALS
Microstructure evolution in the presence of constraints and implications on the properties of Mg-Li and Nb-Al constraints
[AD-A272088] p 1674 N94-20623

DENMARK
Magnetic results 1991: Brorfelde, Godhavn, Thule and Narsarsuaq
[DATA-REPT-92-3] p 1856 N94-20609

DENSE PLASMAS
Opacity measurements in shock-generated argon plasmas
[DE94-001057] p 1998 N94-22399
Physical properties of dense astrophysical plasmas
p 2001 N94-22637
Neutrino emission processes in dense high-temperature plasmas p 2001 N94-22638
Thermal properties and radiation processes in astrophysical plasmas p 2002 N94-22640
Pair plasmas in the central engine of active galactic nuclei p 2002 N94-22641
Pair plasmas in the galactic center region and in Nova Muscae p 2009 N94-22691

DENSIFICATION
Polymer gels as precursors to high-performance materials
[AD-A270937] p 1699 N94-20046
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives
[DE94-000330] p 1694 N94-21945

DENSITY (MASS/VOLUME)
Quantitative evaluation of material composition of composites using x ray energy-dispersive NDE technique
[DE93-041157] p 1672 N94-19888
Measuring liquid properties with smooth and textured-surface resonators
[DE93-019433] p 1749 N94-20054

DENSITY DISTRIBUTION
On the experimental determination of low order structure factors in TiAl by energy filtered convergent beam electron diffraction
[DE93-019521] p 1687 N94-19806
Impact of copper vapour contamination on argon arcs
p 1994 N94-21053
Accretion of a hot plasma onto the central black hole: Fokker-Planck formulation p 2009 N94-22693

DENSITY MEASUREMENT
Wavefront sensors for optical diagnostics in fluid mechanics: Application to heated flow, turbulence, and droplet evaporation
[DE93-040060] p 1797 N94-19974
Measuring liquid properties with smooth and textured-surface resonators
[DE93-019433] p 1749 N94-20054

DEPLOYMENT
Self-deploying photovoltaic power system
[NASA-CASE-LEW-15308-1] p 1846 N94-20196

DEPOLARIZATION
Multiple scattering effects on the Linear Depolarization Ratio (LDR) measured during CaPE by a Ka-band air-borne radar p 1728 N94-20446
Radio wave propagation studies along an Earth-space satellite link
[ISBN-0-315-60627-4] p 1742 N94-22408

DEPOLYMERIZATION
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers
[AD-A271128] p 1699 N94-20016

DEPOSITION
Geomorphic evidence for an eolian contribution to the formation of the Martian northern plains
p 2092 N94-20402
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191
Single crystal diamond films
[AD-A266759] p 2028 N94-21517

DEPOSITS
Adhesive electroless metallization of fluoropolymeric substrates
[AD-A271858] p 1703 N94-20526
Mars: New evidence for origin of some Valles Marineris layered deposits p 2112 N94-20748
Geology and deposits of the Serenitatis basin
p 2119 N94-20786
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663

DEPTH
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952
Impactor control of central peak and peak-ring formation p 1862 N94-20744
Geometrical analysis of the microcraters found on LDEF samples p 1666 N94-20890
A quantitative model for interpreting nanometer scale hardness measurements of thin films
[DE93-040601] p 2034 N94-22005

DEPTH MEASUREMENT
Evaluation of a single stage of the LADS filter
[AD-A271101] p 1814 N94-19851
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770

DERIVATION
Development of a gridless CFD method
p 1919 N94-22361

DESERTS
Areally averaged estimates of surface heat flux from ARM field studies
[DE93-018569] p 1859 N94-22036

DESICCANTS
Atmospheric moisture collection device
[AD-D015935] p 1865 N94-20332
DESIGN ANALYSIS
Turbine design p 1668 N94-20075
Total systems design analysis of high performance structures
[NASA-TP-3432] p 1653 N94-20141
A design optimization procedure for epicyclic gears
[MATHS-REPT-A-188] p 1822 N94-20146
The GEM Silicon Tracking System
[DE93-040133] p 2016 N94-20322
Coherent lidar design and performance verification
[NASA-CR-193813] p 1816 N94-20341
Design structuring and allocation optimization (Destination) prototype level 1 user's manual
[AD-A272115] p 1929 N94-20571
Validation of the design of a high resolution all-reflection Michelson interferometer for atmospheric spectroscopy
[AD-A272505] p 1987 N94-21410
Dynamics of face seals for high speed turbomachinery p 1655 N94-21796
Improvements on the design of optimum SAW filters with the Remez Exchange Algorithm p 1773 N94-22123
Manual design technique for broadband passive thin-film attenuators using the Smith chart p 1782 N94-22178
The logistic model: The integration of business process redesign and information systems development based on logistic principles
[MEMO-INF-92-70] p 2045 N94-22276
Towards the formal verification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191466] p 1937 N94-22414
A study of parallel pier finger airport terminal configuration
[ISBN-0-315-83126-6] p 1652 N94-22425
DESORPTION
Focus history of the Hubble Space Telescope: Launch to May 1993
[NASA-CR-194179] p 2055 N94-20204
DETECTION
Resistive gate magnetic field sensor
[AD-D015923] p 1749 N94-20199
Direct photon results from CDF
[DE93-019908] p 1980 N94-20317
Detection of feed-through faults in CMOS storage elements p 1766 N94-21721
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004
DETONATION WAVES
Initiation and modification of reaction by energy addition: Kinetic and transport phenomena
[AD-A271315] p 1797 N94-19936
DETONATORS
SPICE macromodel for a 1-megawatt power MOSFET switch
[DE93-019415] p 1748 N94-19844
Digital wireless control system
[DE93-040211] p 1714 N94-19946
DEUTERIUM
Encounters of H and D atoms with O2 in water: Relative diffusion and reaction rates
[DE93-016587] p 1970 N94-19956
Collisions of molecules with clusters: A quasiclassical study
[DE93-018614] p 1971 N94-20050
High D/H ratios of water in magmatic amphiboles in Chassigny: Possible constraints on the isotopic composition of magmatic water on Mars p 2134 N94-20862
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941
DEUTERIUM COMPOUNDS
High resolution infrared spectroscopy of formamide and deuterated formamide in a molecular beam
[AD-A271986] p 1973 N94-20618
Dynamics of adsorbed, swollen block copolymers
[AD-A272013] p 1706 N94-21460
DEUTERONS
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941
DEVELOPING NATIONS
Urban applications of satellite remote sensing and GIS analysis
[PB93-202174] p 1842 N94-21855
DIAGNOSIS
A concept for implementing hypermedia technology in computer aided workplaces in medicine
[ETN-93-95057] p 1889 N94-20022
Diagnostics and methods for real-time laser microchemistry
[AD-A270871] p 1680 N94-20566
DIAMETERS
Impactor control of central peak and peak-ring formation p 1862 N94-20744
Geometrical analysis of the microcraters found on LDEF samples p 1666 N94-20890
DIAMOND FILMS
Thermal diffusivity measurements by photothermal laser beam deflection (PTD): Data analysis using the Levenberg-Marquardt algorithm p 1820 N94-21006
Growth, characterization and device development in monocrystalline diamond films
[AD-A272715] p 2026 N94-21190
Materials processing and manufacturing technologies for diamond substrate multichip modules
[AD-A271484] p 2027 N94-21319
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Single crystal diamond films
[AD-A266759] p 2028 N94-21517
Fabrication of amorphous diamond films
[DE94-000404] p 2032 N94-21960
DIAMONDS
Materials processing and manufacturing technologies for Diamond Substrate MultiChip Modules (DSMCM)
[AD-A271011] p 2011 N94-19821
Analysis of cost: CVD diamond deposition
[AD-A271980] p 2018 N94-20616
A carbon and nitrogen isotope study of carbonaceous vein material in ureilite meteorites p 2083 N94-20726
Are the C delta light nitrogen and noble gases located in the same carrier? p 2085 N94-20846
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
Fabrication of amorphous diamond films
[DE94-000404] p 2032 N94-21960
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
DIAPHRAGMS (MECHANICS)
Bladder operated robotic joint
[NASA-CASE-MFS-28682-1] p 1701 N94-20359
DIATOMIC GASES
Polymeric nitrogen
[DE93-040544] p 1706 N94-21512
DIATOMIC MOLECULES
Theoretical investigations of metastability and energy storage in molecular systems
[AD-A271849] p 1973 N94-20612
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments)
[AD-A272918] p 1802 N94-21220
Polymeric nitrogen
[DE93-040544] p 1706 N94-21512
Non-adiabatic effects in low-energy electron-molecule scattering
[DE93-040485] p 1976 N94-21968
DICHROISM
Magnetic circular dichroism in x ray absorption and core-level photoemission
[DE93-019381] p 1688 N94-19986
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
Azo polymers for optical storage 3: Effect of film thickness on net phase retardation and writing speed
[AD-A272994] p 1705 N94-21267
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944
DICTIONARIES
A computational theory of lexical relatedness
[TR-421] p 1904 N94-20067
DIELECTRIC PROPERTIES
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917
Preparation and properties of sol-gel derived PZT thin films for decoupling capacitor applications
[DE93-018853] p 2013 N94-19961
Sol-spray preparation, particulate characteristics, and sintering of alumina powders
[DE93-018577] p 1690 N94-20183
Measurements of the dielectric properties of simulated comet material as part of the KOSI 10 experiment p 2085 N94-20841
Characterization of an asymmetric triangular multiple quantum well, by variable angle spectroscopic ellipsometry p 2022 N94-20995
Temperature dependence of optical properties of AlAs, studied by in-situ spectroscopic ellipsometry p 2023 N94-20999
Dielectric function of InGaAs in the visible p 2023 N94-21000
Study of concentration-dependent dielectric properties of n-type GaAs using variable angle spectroscopic ellipsometry p 2024 N94-21002
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940
DIELECTRICS
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows
[AD-A271160] p 1678 N94-20000
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20406
Linearly tapered slot antenna with dielectric superstrate p 1734 N94-20505
Bandwidth enhancement of dielectric resonator antennas p 1734 N94-20507
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575
Interfacial properties of diamondlike amorphous carbon films on InP: Metal-insulator-semiconductor structures p 1710 N94-20980
A new matrix formulation of classical electrodynamics. Part 3: Wave propagation through a multilayer dielectric medium with planar boundaries
[AD-A271610] p 1739 N94-21240
Fully-depleted silicon-on-sapphire and its application to advanced VLSI design p 1765 N94-21709
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940
Time-laplace-transform-domain analysis of wave propagation in planar waveguides
[PB93-215226] p 1960 N94-22096
Study of TE(1-delta) mode in open dielectric resonators by a finite difference time domain method p 1747 N94-22253
Modelling short bent, graded index dielectric slab waveguides
[PB93-215283] p 1742 N94-22349
DIESEL ENGINES
Analysis of a diesel-electric hybrid urban bus system
[DE93-019514] p 1825 N94-21297
Utilization of metals to improve the lubrication of ceramic load-bearing devices
[PB93-202448] p 1825 N94-21424
Ceramic Technology Project
[DE94-001011] p 1707 N94-21822
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391
DIESEL FUELS
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391
DIFFERENCE EQUATIONS
Theoretical and numerical examinations of nonlinear parameter dependent advanced differential difference equations
[ETN-93-93681] p 1952 N94-21042
Adaptive grids for quasilinear parabolic systems in one space dimension
[ETN-93-93611] p 1954 N94-21137
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386
DIFFERENTIAL CALCULUS
Explicit results on gl(lambda) and sl(lambda)
[MEMO-1075] p 1953 N94-21072
Non commutative geometry and physics
[PB93-215499] p 1961 N94-22264
DIFFERENTIAL EQUATIONS
Dynamics of vortices in superconductors
[DE93-019535] p 2011 N94-19808
Numerical solution of differential-algebraic equations with ill-conditioned constraints
[AD-A270934] p 1949 N94-19898
Asymptotics of the GLRT for the disorder problem in diffusion processes
[INRIA-RR-1735] p 1951 N94-20227
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568

Theoretical and numerical examinations of nonlinear parameter dependent advanced differential difference equations
[ETN-93-93681] p 1952 N94-21042
Stoermer-Cowell and related methods for the numerical solution of second order periodic initial value problems for ODE's 2: Numerical characteristics of the methods
[MEMO-1082] p 1953 N94-21075
Classical and generalized solutions of time-dependent linear differential algebraic equations
[AD-A272834] p 1954 N94-21173
Finite difference methods for time-dependent, linear differential algebraic equations
[AD-A272835] p 1954 N94-21174
Derivation of a model of the exciter of a brushless synchronous machine
[EUT-92-E-258] p 1761 N94-21538
A project on parameter identification in reaction kinetics
[CWI-NM-R9301] p 1682 N94-21574
Surface path lines in plane Stokes flow driven by capillarity
[DE93-041277] p 1803 N94-21651

DIFFERENTIAL GEOMETRY
Detecting topographical regions in digital terrain maps
[AD-A272889] p 1841 N94-21453

DIFFERENTIAL INTERFEROMETRY
Demodulation of a fiber Fabry-Perot strain rosette using white light interferometry
[ISBN-0-315-83427-7] p 1990 N94-22579

DIFFERENTIAL PRESSURE
System test results of the Advanced Technology Anti-G Suit (ATAGS)
[AD-A271535] p 1896 N94-20914

DIFFERENTIAL PULSE CODE MODULATION
A fixed/variable bit-rate data compression architecture p 1759 N94-21128

DIFFRACTION
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408
Calculation of a diffracted electric field with the aid of the Method of Equivalent Currents (MEC) p 1745 N94-22127

DIFFRACTION PATTERNS
Determination of structure factors of copper by convergent beam electron diffraction
[DE93-019520] p 2019 N94-20941

DIFFUSE RADIATION
Diffuse reflectance spectra of orthopyroxene, olivine, and plagioclase as a function of composition and structure p 2087 N94-20906
Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold
[DE93-041126] p 1694 N94-21937

DIFFUSION
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
The use of x ray techniques in the in situ study of corrosion
[DE93-019845] p 1690 N94-20301
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20667
Self diffusion of alkaline-Earth in Ca-Mg-aluminosilicate melts: Experimental improvements on the determination of the self-diffusion coefficients p 1684 N94-20669
Chronology of lunar granite 12033,576: Resetting of Rb-Sr and K-Ca isochrons p 2115 N94-20763
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite p 2086 N94-20902
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
Multilevel methods for transport equations in diffusive regimes p 1955 N94-21467
A note on singularities caused by the hydrodynamic dispersion tensor
[CWI-NM-R9302] p 1803 N94-21575

DIFFUSION FLAMES
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452

DIFFUSION PUMPS
New technique for oil backstreaming contamination measurements p 1652 N94-20511

DIFFUSION WELDING
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1896 N94-22025
Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000665] p 1697 N94-22571

DIFFUSIVITY
Diffusive redistribution of water vapor in the solar nebula revisited p 2113 N94-20751
Multilevel methods for transport equations in diffusive regimes p 1955 N94-21467
Femtosecond dynamics in hydrogen-bonded solvents
[DE93-019937] p 1683 N94-21842

DIGITAL COMPUTERS
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358

DIGITAL DATA
Handbook. Volume 2: Digital systems validation. Chapter 18: Avionic data bus integration technology
[DOT/FAA/CT-88/10-VOL-2] p 1647 N94-20343
Local topography of Mars and its relationship to surface weathering processes p 2111 N94-20737
High performance MPEG-audio decoder IC p 1744 N94-21092
VLSI mixed signal processing system p 1744 N94-21100
Reduction of blocking effects for the JPEG baseline image compression standard p 1765 N94-21714

DIGITAL ELECTRONICS
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110
Fault detection in digital and analog circuits using an i(DD) temporal analysis technique p 1757 N94-21106
Faulty behavior of asynchronous storage elements p 1757 N94-21108
Detection of CMOS bridging faults using minimal stuck-at fault test sets p 1757 N94-21110
QPPM receiver for free-space laser communications
[NASA-TM-106424] p 1741 N94-21567
Dimension scaling effects on the yield sensitivity of HEMT digital circuits p 1765 N94-21712
Real-time step frequency radar
[ISBN-0-315-83588-5] p 1743 N94-22576

DIGITAL FILTERS
Neural network for processing both spatial and temporal data with time based back-propagation
[NASA-CASE-MSC-21874-1] p 1942 N94-20366
Use of switched capacitor filters to implement the discrete wavelet transform p 1755 N94-21097
Applications of correlator chips in radio science p 1763 N94-21695
Heuristic-based scheduling algorithm for high level synthesis p 1764 N94-21704
Evaluation of floating-point sum or difference of products in carry-save domain p 1764 N94-21705
Micro-rollback and self-recovery synthesis p 1765 N94-21707
A real time correlator architecture using distributed arithmetic principles p 1768 N94-21734
Intersymbol interference effects in digital matched filters p 1788 N94-22218
On coefficient quantization and computational roundoff effects in frequency interpolation filter banks p 1793 N94-22251

DIGITAL RADAR SYSTEMS
Four-dimensional remote sensing of the marine boundary layer with a digital beamforming radar wind profiler
[AD-A270627] p 1882 N94-20564
A digital demodulation scheme for use in a high dynamic range radar system p 1745 N94-22144
Real-time step frequency radar
[ISBN-0-315-83588-5] p 1743 N94-22576

DIGITAL SIMULATION
Delay analysis of combinations of pass transistors and classical logic gates p 1756 N94-21103
Modeling of glass fabrication p 1711 N94-21800
Impact of partitioning on parallel discrete event simulation of logic circuits p 1772 N94-22115

DIGITAL SYSTEMS
A pipelined superconducting digital processor
[DE93-040852] p 1898 N94-19886
Model checking, abstraction, and compositional verification
[AD-A270552] p 1902 N94-19919
Digital wireless control system
[DE93-040211] p 1714 N94-19946
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
A methodology for formal hardware verification, with application to microprocessors
[AD-A270550] p 1898 N94-20085
Handbook. Volume 2: Digital systems validation. Chapter 18: Avionic data bus integration technology
[DOT/FAA/CT-88/10-VOL-2] p 1647 N94-20343
Reconfigurable fuzzy cell
[NASA-CASE-MSC-21613-1] p 1907 N94-20492
Diagnostics and methods for real-time laser microchemistry
[AD-A270871] p 1680 N94-20566
Digital receiver for on-board FM/FSK-FM/BPSK demodulation p 1744 N94-21091
Testing self-timed circuits using scan paths p 1757 N94-21109
The 1992 4th NASA SERC Symposium on VLSI Design
[NASA-CR-194591] p 1763 N94-21694
On the decomposition of synchronous state machines using sequence invariant state machines p 1764 N94-21703
NASA SERC digital correlator projects p 1765 N94-21708
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
The VLBA correlator: Real-time in the distributed era p 2049 N94-22547

DIGITAL TECHNIQUES
VLSI mixed signal processing system p 1744 N94-21100
An optically-assisted 3-D cellular array machine
[AD-A272683] p 1987 N94-21163
Security management of electronic data interchange
[AD-A272962] p 1899 N94-21252
Journal of rehabilitation research and development, volume 30, number 1, 1993
[AD-A272956] p 1893 N94-21613
Determination of pore structure of concrete from thin sections by image analysis p 1708 N94-21895
Hierarchical multirate vector quantization for image coding p 1781 N94-22174
Quadrature biorthogonal modulation p 1747 N94-22232
SkICAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546

DIGITAL TELEVISION
NHK Science and Technical Research Laboratories p 2151 N94-20342

DIHEDRAL ANGLE
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
Polymeric nitrogen
[DE93-040544] p 1706 N94-21512

DIMENSIONAL MEASUREMENT
Feature-based tolerancing for intelligent inspection process definition
[DE93-017984] p 1906 N94-20311
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis p 1710 N94-20984

DIMENSIONAL STABILITY
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373

DIMERS
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982
Direct detection of atomic ions from molecular photofragmentation during nonresonant multiphoton ionization of sputtered species
[DE93-040886] p 1976 N94-21951

DINING PHILOSOPHERS PROBLEM
System level modelling using Petri nets and VHDL p 1772 N94-22113

DIODES
First results on InGaAsP separate confinement heterostructure diode lasers
[AD-A270849] p 1815 N94-19878
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289

DIPHENYL COMPOUNDS
Polybenzoxazole via aromatic nucleophilic displacement
[NASA-CASE-LAR-14606-1-CU] p 1672 N94-20540

DIPOLE ANTENNAS
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method p 1718 N94-20405
A 10 GHz Y-Ba-Cu-O/GaAs hybrid oscillator proximity coupled to a circular microstrip patch antenna p 1736 N94-20517

DIPOLE MOMENTS
Cognition and the brain: A continuation of the university research initiative at New York University
[AD-A271872] p 1894 N94-20467

DIRAC EQUATION
The quantum structure of matter grand challenge project: Large-scale 3-D solutions in relativistic quantum dynamics
[DE94-000328] p 1960 N94-21955

DIRECT CURRENT
Operational Requirements Document (ORD) for the Alternating Current/Direct Current (AC/DC) clamp-on ammeter, mE-563
[AD-A271808] p 1751 N94-20555
A dc Penning surface-plasma source
[DE93-040126] p 1997 N94-21989
DIRECTION FINDING
Use of the Weiss-Weinstein bound to compare the direction-finding performance of sparse arrays
[AD-A272582] p 1738 N94-21210
DIRECTIONAL ANTENNAS
Mobile antenna development at JPL
p 1731 N94-20457
DIRECTIONAL SOLIDIFICATION (CRYSTALS)
Experimental study of void formation during aluminum solidification in reduced gravity
[NASA-TM-106190] p 1692 N94-21604
DIRECTORIES
PHOTCAL: The IRAF photometric calibration package
p 1925 N94-22465
DISCHARGE COEFFICIENT
Battery tests p 1752 N94-20631
DISCONTINUITY
A comparative study between shielded and open coplanar waveguide discontinuities
p 1733 N94-20501
DISCRETE FUNCTIONS
Multilevel methods for transport equations in diffusive regimes p 1955 N94-21467
An in-place and in-order algorithm for the discrete cosine transform p 1771 N94-22111
DISCRIMINANT ANALYSIS (STATISTICS)
Multivariate statistical analysis: Principles and applications to coorbital streams of meteorite falls
p 1964 N94-20881
Measure fields for function approximation
[AD-A272660] p 1964 N94-21215
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458
DISEASES
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930
DISILICIDES
Strength and toughness improvement of silicide intermetallics by nanophase and microphase reinforcements
[AD-A272914] p 1692 N94-21320
DISKS (SHAPES)
Extinction efficiencies from DDA calculations solved for finite circular cylinders and disks p 1880 N94-22340
DISLOCATIONS (MATERIALS)
Ductile-brittle transition behavior of tungsten under shock loading conditions
[DE93-019945] p 1693 N94-21843
DISPERSING
The use of x ray techniques in the in situ study of corrosion
[DE93-019645] p 1690 N94-20301
DISPLACEMENT
Interferometric detection of freeze-thaw displacements of Alaskan permafrost using ERS-1 data
p 1732 N94-20460
Polybenzoxazole via aromatic nucleophilic displacement
[NASA-CASE-LAR-14606-1-CU] p 1672 N94-20540
DISPLAY DEVICES
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1651 N94-20108
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358
Liquid crystal displays p 1752 N94-20634
LCD display tests p 1752 N94-20635
Silicon microelectronic field-emissive devices for advanced display technology
[DE94-000397] p 1794 N94-22380
An object-oriented approach for supporting both X and terminal interfaces p 1926 N94-22491
STARBASE: Database software for the automated plate scanner p 1927 N94-22512
DISSOCIATION
Collisions of molecules with clusters: A quasiclassical study
[DE93-018614] p 1971 N94-20050
One- and multi-component theories of mixtures
[DE93-040543] p 1966 N94-21511
DISSOLVING
The use of x ray techniques in the in situ study of corrosion
[DE93-019645] p 1690 N94-20301
DISTANCE
Determining the distance to the perfect matching polytope of a bipartite graph
[RR-895-M] p 1950 N94-20161
DISTANCE MEASURING EQUIPMENT
Testing of DME/P equipment performance for complex MLS procedures p 1644 N94-22136
DISTORTION
Second order distorted born approximation for backscattering from a layer of discrete random medium
p 1728 N94-20448
Detector noise statistics in the non-linear regime
p 1748 N94-22526
DISTRIBUTED PARAMETER SYSTEMS
Interactive simulation package for coupled bending and torsional vibrations in flexible robot arms
[MEMO-1089] p 1944 N94-21140
Distributed intelligent control and status networking
p 1932 N94-21335
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851
Language as primary dimension of distributed AI systems activity p 1776 N94-22141
DISTRIBUTED PROCESSING
Physics Detector Simulation Facility. Phase 2: System software description
[DE93-019745] p 1928 N94-19812
Distributed Virtual System (DIVIRS) project
[NASA-CR-194360] p 1905 N94-20228
DISCERN: A distributed neural network model of script processing and memory p 1941 N94-20255
On Update Last schemes
[CWI-CS-R9247] p 1952 N94-21027
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114
Optimization of static traffic allocation policies
[CWI-BS-R9302] p 1930 N94-21161
Distributed intelligent control and status networking
p 1932 N94-21335
Uniform self-stabilizing leader election. Part 1: Complete graph protocols
[CWI-CS-R9308-PT-1] p 1935 N94-21549
A data distributed, parallel algorithm for ray-traced volume rendering
[DE93-040150] p 1935 N94-21622
Simulated behaviour of large scale SCI rings and tori
[DE93-040149] p 1935 N94-21745
The design of linear algebra libraries for high performance computers
[DE93-040458] p 1960 N94-21967
Efficient communication primitives on mesh architectures with hardware routing
[DE93-018791] p 1936 N94-22032
The distributed CAD system for LSI/VLSI design
p 1923 N94-22068
Industry standards: Key to distributed computing
p 1938 N94-22070
Databases in distributed systems
p 2046 N94-22080
Experiences in airborne computing at NRC for geophysical exploration applications
p 1783 N94-22185
Distributed processing using Oracle7 and SQL*Net v2: An implementation story
[DE94-000494] p 1937 N94-22267
Distributed input/output processing in data-driven multiprocessors
[DE94-000323] p 1937 N94-22378
Access to D3-D data located in multiple files and multiple locations
[DE94-001104] p 2045 N94-22404
A self-defining hierarchical data system
p 2046 N94-22448
DISTRIBUTION FUNCTIONS
Direct photon results from CDF
[DE93-019908] p 1980 N94-20317
Measurement of the strange quark distribution function in W(+) charm quark events
[DE93-018267] p 1973 N94-20474
Triton's cratering record and its time of capture
p 2122 N94-20802
Equilibrium models of mass distribution and collisional lifetimes of asteroids p 2086 N94-20877
Measure fields for function approximation
[AD-A272660] p 1964 N94-21215
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761
DISTURBING FUNCTIONS
Turbulization of free shear flows: 3D perturbations
p 2000 N94-22626
DIURNAL VARIATIONS
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549
DIVERGENCE
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584
DIVERTERS
Transient thermal analysis of cryocondensation pump for JET
[DE93-040372] p 1992 N94-20003
Neoclassical kinetic theory near an X-point: Plateau regime
[DE93-019825] p 1951 N94-20224
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937
Enhanced confinement regimes and control technology in the DIII-D tokamak
[DE93-019004] p 1998 N94-22039
The TST: A small steady-state tokamak for integrated divertor testing
[DE94-001016] p 1998 N94-22045
DOCUMENT STORAGE
Project Records Information System (PRIS): User's manual
[DE94-001548] p 2045 N94-22047
DOCUMENTS
The manager's guide to NASA graphics standards
[NHB-1430.2] p 2042 N94-20308
Electronic publishing and intelligent information retrieval p 2047 N94-22479
DOLOMITE (MINERAL)
A calcium oxide sorbent process for bulk separation of carbon dioxide
[DE93-019288] p 1847 N94-21540
DOMES (STRUCTURAL FORMS)
Characterization of the Marquez Dome buried impact crater using gravity and magnetic data
p 1863 N94-20882
DONOR MATERIALS
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922
DOPED CRYSTALS
Resonantly pumped, erbium-doped, GSGG, 2.8 micron, solid state laser with energy recycling and high slope efficiency
[AD-D015920] p 1815 N94-20060
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Optical measurement of built-in and applied electric fields in Al(x)Ga(1-x)As/GaAs heterostructures
p 1796 N94-20989
Study of InGaAs-based modulation doped field effect transistor structures using variable-angle spectroscopic ellipsometry p 1796 N94-21001
Study of concentration-dependent dielectric properties of n-type GaAs using variable angle spectroscopic ellipsometry p 2024 N94-21002
Single crystal diamond films
[AD-A266759] p 2028 N94-21517
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768
The n-p(p(+))-n Al(yGa)(1-y) As-GaAs-In(x)Ga(1-x) as quantum well laser with p(+)-n(+)GaAs-InGaAs tunnel contact on n GaAs
[AD-A271292] p 2030 N94-21805
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870
Fullerene derivatives and fullerene superconductors
[DE93-019568] p 2031 N94-21871
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO2
[DE93-040229] p 2033 N94-21993
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007
Positron annihilation study of Sr Doping in La(2-x)Sr(x)CuO4
[DE94-000307] p 2036 N94-22594
DOPPLER EFFECT
A general purpose ionospheric ray tracing procedure
[AD-A271058] p 1854 N94-19860
Coherent lidar design and performance verification
[NASA-CR-193813] p 1816 N94-20341
Utilization of lasers for air data measurements
p 1640 N94-22603
DOPPLER RADAR
Target motion detecting impulse Doppler radar system
[AD-D015898] p 1717 N94-20198

Coherent lidar design and performance verification [NASA-CR-193813] p 1816 N94-20341
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439
GMM-1: A 50 degree and order gravitational field model for Mars p 2117 N94-20774
Microphysical properties of the November 26 cirrus cloud retrieved by Doppler radar/IR radiometer technique p 1873 N94-22304
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar p 1874 N94-22310
Observations of multi-layered clouds using K-band radar p 1874 N94-22311
CO2 lidar observations of Mount Pinatubo debris: FIRE 2 and longer-term measurements p 1876 N94-22323
Estimation of cirrus cloud particle fallspeeds from vertically pointing Doppler radar p 1879 N94-22333
Normalized vertical ice mass flux profiles from vertically pointing 8-mm-wavelength Doppler radar p 1879 N94-22334

DOSAGE
Non-ionic surfactants in the treatment of third degree burns [AD-A271582] p 1891 N94-21035

DOSIMETERS
Radiometry in commercial aircraft [GSF-41/91] p 1892 N94-21141

DOUBLE CUSPS
Affine and non-affine blossoms [RR-913-M] p 1950 N94-20200

DOWNLINKING
Downlink acquisition and tracking procedures for the ASCAMP satellite communications terminal [AD-A272912] p 1739 N94-21244

DOWNWASH
Rotorwash wind sensor evaluation [AD-A268987] p 1807 N94-20203

DRAINAGE
Geologic mapping of Harmakhis and Reull Valles region, Mars: Evidence for multiple resurfacing and drainage events p 1844 N94-20705
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664

DRAINAGE PATTERNS
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676

DRIFT RATE
Interfacial properties of diamondlike amorphous carbon films on InP: Metal-insulator-semiconductor structures p 1710 N94-20980

DRILLING
Petrography of shock features in the 1953 Manson 2-A drill core p 1862 N94-20767
High-power copper vapor lasers and their application to precision drilling and cutting [DE93-019951] p 1819 N94-21844

DROP SIZE
A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites [NASA-CR-191200] p 1762 N94-21566

DROP TOWERS
Evaporation of a sodium tellurite melt in the jamic low gravity drop shaft p 1713 N94-20605

DROPS (LIQUIDS)
Particle dispersion in turbulent sprays [AD-A271314] p 1796 N94-19913
Wavefront sensors for optical diagnostics in fluid mechanics: Application to heated flow, turbulence, and droplet evaporation [DE93-040060] p 1797 N94-19974
Shock induced condensation in fluids of high molar specific heat: Shock structure and relaxation [MPIS-106/1993] p 1798 N94-20145
Head-on collision of drops: A numerical investigation [NASA-TM-106394] p 1798 N94-20167
Size distributions and aerodynamic equivalence of metal chondrules and silicate chondrules in Acfer 059 p 2084 N94-20773
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment [AD-A272851] p 1802 N94-21193

DROUGHT
Health effects of global warming: Problems in assessment [DE93-040323] p 1850 N94-19930
The 7th Brazilian Remote Sensing Symposium, volume4 p 1840 N94-20965
Drought early warning system for crop production p 1840 N94-20966

DUCTED FLOW
A study of the compressible flow through a diffusing S-duct [NASA-TM-106411] p 1638 N94-21591
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct [NASA-TM-106435] p 1649 N94-21758

DUCTILITY
Structural crashworthiness and failure [AD-A270429] p 1828 N94-19815
Investigation of cracking and erratic behavior of the uranium-titanium alloy [DE93-018591] p 1688 N94-19957
Ductile-brittle transition behavior of tungsten under shock loading conditions [DE93-019945] p 1693 N94-21843
Ni3Al aluminide alloys [DE94-000493] p 1694 N94-21933
Alloying effects on mechanical and metallurgical properties of NiAl [DE93-040814] p 1694 N94-21948

DUMMIES
Evaluation of head injury criteria [NIAR-93-2] p 1890 N94-20190

DURABILITY
Durability predictions for adhesively bonded joints in humid environments [AD-A271177] p 1830 N94-20001
Study of space factors effect on materials for spacecraft external surfaces in NPO Energia programs p 1664 N94-21401
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride [DE93-041307] p 1706 N94-21516
Delamination, durability, and damage tolerance of laminated composite materials p 1678 N94-22622

DUST
Cathodoluminescence observations of in situ aqueous destruction of chondrules in the Murchison CM chondrite p 2083 N94-20750
Analysis of a sandstorm weather process-translation [AD-A272959] p 1867 N94-21250

DUST STORMS
Analysis of a sandstorm weather process-translation [AD-A272959] p 1867 N94-21250

DWARF GALAXIES
Dust content of a hydrogen rich, low surface brightness galaxy and the luminosity history of 3C273 [NASA-CR-194705] p 2056 N94-21779

DYE LASERS
Ocular damage induced by ultrashort laser pulses [AD-A271859] p 1890 N94-20462
Examinations of a thallium atomic vapor filter for a Raman temperature lidar [GKSS-92/E/13] p 1857 N94-21044

DYES
Green Sheet project: Dye sheet evolution [AD-A272019] p 1883 N94-21443

DYNAMIC CHARACTERISTICS
Interval timed coloured petri nets and their analysis [PB93-191732] p 1903 N94-19992
Design of a controllable pitch underwater thruster system [AD-A271140] p 1821 N94-20021
Specialized data analysis for the Space Shuttle Main Engine and diagnostic evaluation of advanced propulsion system components [NASA-CR-194720] p 1656 N94-21813
Dynamic properties of ceramic materials [DE94-000654] p 1708 N94-21963

DYNAMIC CONTROL
Replica control algorithms in distributed databases [AD-A271571] p 1909 N94-21034
COCOLOG: A conditional observer and controller logic for finite machines [INRIA-RR-1714] p 1910 N94-21063

DYNAMIC LOADS
Acceleration-augmented LQG control of an active magnetic bearing p 1757 N94-21112
Dynamic properties of ceramic materials [DE94-000654] p 1708 N94-21963
Time-dependent reliability analysis of ceramic engine components p 1828 N94-22619

DYNAMIC MODELS
Interval timed coloured petri nets and their analysis [PB93-191732] p 1903 N94-19992
Dynamics Explorer 2: Continued FPI and NACS instrument data analysis and associated scientific activity at the University of Michigan [NASA-CR-194689] p 1657 N94-20173
Interactive simulation package for coupled bending and torsional vibrations in flexible robot arms [MEMO-1089] p 1944 N94-21140
Paired comparison models with time-varying parameters [AD-A272016] p 1964 N94-21442
Derivation of a model of the exciter of a brushless synchronous machine [EUT-92-E-258] p 1761 N94-21538

DYNAMIC PROGRAMMING
Algorithm/architecture study for artificial neural nets [AD-A271820] p 1943 N94-20626
Optimal repairman assignment in two maintenance models which are equivalent to routing models with early decisions [CWI-BS-R9301] p 1930 N94-21234
Procedural dynamic semantics, verb-phrase ellipsis, and presupposition [CWI-CS-R9311] p 1914 N94-21495

DYNAMIC RESPONSE
Frequency and temperature dependence of high damping elastomers [DE93-019539] p 1697 N94-19809
Structural crashworthiness and failure [AD-A270429] p 1828 N94-19815
Design of a controllable pitch underwater thruster system [AD-A271140] p 1821 N94-20021
Using crosscorrelation techniques to determine the impulse response of linear systems p 1759 N94-21122
Dynamic response of multiphase porous media [AD-A272915] p 1831 N94-21219
Dynamic properties of ceramic materials [DE94-000654] p 1708 N94-21963
Computer simulation of molecular response at a shock front [DE94-001050] p 1977 N94-22396
Response statistics of shell structures with geometrical and material nonlinearities, volume 1 [ISBN-0-315-84006-4] p 1833 N94-22590

DYNAMIC STABILITY
Problems related to conservation laws: Phase transitions and viscoelasticity [AD-A271429] p 1698 N94-19840
Stability limits and dynamics of nonaxisymmetric liquid bridges [NASA-CR-194706] p 1797 N94-20037
Robot link and contact surface dynamic interaction: An experimental study of contact instability [ISBN-0-315-83439-0] p 1827 N94-22578

DYNAMIC STRUCTURAL ANALYSIS
Interactive simulation package for coupled bending and torsional vibrations in flexible robot arms [MEMO-1089] p 1944 N94-21140
Modal combination in response spectrum modal dynamic analysis [DE94-000339] p 1833 N94-21956
Robot link and contact surface dynamic interaction: An experimental study of contact instability [ISBN-0-315-83439-0] p 1827 N94-22578
System identification of the Daisy large space structure emulator [ISBN-0-315-83533-8] p 1653 N94-22588
Response statistics of shell structures with geometrical and material nonlinearities, volume 1 [ISBN-0-315-84006-4] p 1833 N94-22590

DYNAMIC TESTS
Solar simulator for solar dynamic space power system testing [NASA-TM-106393] p 1984 N94-20140

DYNAMICAL SYSTEMS
Literature review of the errors-in-variables approach to the problem of system identification [AD-A271098] p 1949 N94-19907
Dynamical systems and nonlinear partial differential equations [AD-A271514] p 1951 N94-20545

DYNAMO THEORY
Modeling of the coupled magnetospheric and neutral wind dynamos [NASA-CR-194728] p 1856 N94-20537
Magnetically controlled solar nebula p 2120 N94-20791
Expectations for the Martian core magnetic field p 2120 N94-20792
Dynamo driven by weak plasma turbulence: The effect of differential rotation p 2005 N94-22665
Double diffusion convection in a rotating spherical shell p 2006 N94-22666
Generation and maintenance of bisymmetric spiral magnetic fields in disk galaxies in differential rotation p 2010 N94-22695
Magnetic fields in spiral galaxies p 2010 N94-22697

E

E REGION
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918
High Frequency (HF) and meteor burst communications in a polar environment
[AD-A271604] p 1737 N94-20949
EARLY WARNING SYSTEMS
Drought early warning system for crop production
p 1840 N94-20966
EARTH (PLANET)
Dynamics of large scale impacts on Venus and Earth
p 2098 N94-20666
EARTH ATMOSPHERE
Remote sounding of tropospheric minor constituents
[NASA-CR-194265] p 1855 N94-20132
Atmospheric infrared sounder
[NASA-CR-194814] p 1856 N94-20362
Atmospheric breakup of a small comet in the Earth's atmosphere p 2084 N94-20824
EARTH CORE
Iridium in sediments containing large abundances of Australasian microtektites from DSDP hole 758B in the Eastern Indian Ocean and from DSDP hole 769A in the Sulu Sea p 2083 N94-20741
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
EARTH CRUST
Analysis of the effects of eurasian crustal and upper mantel structure on regional phases using broadband seismic data
[AD-A272446] p 1858 N94-21206
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006
EARTH GRAVITATION
Inversion of gravity and bathymetry in oceanic regions for long-wavelength variations in upper mantle temperature and composition
[NASA-CR-192272] p 1882 N94-20131
EARTH IONOSPHERE
Ionospheric tomography using the FORTE satellite
[DE93-018545] p 1854 N94-19955
Detection of traveling ionospheric disturbances induced by atmospheric gravity waves using the global positioning system p 1723 N94-20425
Measurement of mesospheric turbulence in the framework of the metal campaign and development of a sensor for static pressure free measurements of neutral and electron density
[BONN-IR-92-45] p 1857 N94-21149
Physics of magnetospheric boundary layers
[NASA-CR-194725] p 1858 N94-21836
Studies of electromagnetic ion cyclotron waves using AMPTE/CCE and Dynamics Explorer
[NASA-CR-194711] p 1982 N94-21878
EARTH MAGNETOSPHERE
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-194728] p 1856 N94-20537
Physics of magnetospheric boundary layers
[NASA-CR-194725] p 1858 N94-21836
Implications of Viking dayside auroral measurements
[ISBN-0-315-83273-8] p 1861 N94-22575
EARTH MANTLE
Inversion of gravity and bathymetry in oceanic regions for long-wavelength variations in upper mantle temperature and composition
[NASA-CR-192272] p 1882 N94-20131
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus
p 2099 N94-20675
Analysis of the effects of eurasian crustal and upper mantel structure on regional phases using broadband seismic data
[AD-A272446] p 1858 N94-21206
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
EARTH OBSERVATIONS (FROM SPACE)
Application of the target decomposition theorem to a polarimetric random media model p 1730 N94-20453
Data format standards for civilian remote sensing satellites
[PB93-192920] p 1841 N94-21446
EARTH OBSERVING SYSTEM (EOS)
Earth observing scanning polarimeter
p 1844 N94-21645
EARTH ORBITAL ENVIRONMENTS
Fifth International Symposium on Materials in a Space Environment
[ISBN-2-85-428293-0] p 1659 N94-21367
Flight and laboratory testing of materials in low Earth orbit p 1659 N94-21369
Complex-2: Low Earth orbital environment simulation facility for materials durability evaluation
p 1653 N94-21370
Results of the post flight analyses on system materials for the LDEF-FRECOPA experiment
p 1659 N94-21371
Measured space environmental effects to LDEF during retrieval p 1659 N94-21372
Space environmental effects on polymer matrix composites: The UTIAS/LDEF experiment
p 1660 N94-21373
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377
Durability of thermal control and environmental protective materials for the SSRMS in simulated LEO environment p 1663 N94-21392
Atomic oxygen interaction with spacecraft materials: Relationship between orbital and ground-based testing for materials certification p 1663 N94-21393
Study of space factors effect on materials for spacecraft external surfaces in NPO Energia programs
p 1664 N94-21401
Evaluation of electroconductivity of two surface paints for spacecraft
[AD-A273063] p 1706 N94-21437
Single event phenomena: Testing and prediction
p 1763 N94-21696
An 18 bit 50 kHz ADC for low earth orbit
p 1764 N94-21702
EARTH PLANETARY STRUCTURE
Origin of the Vredefort structure, South Africa: Impact model p 1863 N94-20826
EARTH RADIATION BUDGET
Climate forcings and feedbacks p 1869 N94-21641
Proceedings of the Workshop on New Generation of Radiation Budget Measurements From Space and Their Use in Climate Modelling and Diagnostic Studies
[MPIM-90] p 1860 N94-22283
Satellite measurements of radiation budget parameters p 1860 N94-22284
ScaRaB and its subsystems p 1860 N94-22285
The use of ERBE data for climate studies
p 1860 N94-22286
Satellite validation of GCM-simulated annual cycle of the Earth radiation budget and cloud forcing
p 1860 N94-22287
The seasonal variation of the cloud radiative forcing: Comparison of ECHAM model simulations with ERBE data p 1860 N94-22288
Simulation of clear-sky outgoing longwave radiation over the oceans using operational analysis
p 1861 N94-22290
EARTH RADIATION BUDGET EXPERIMENT
The seasonal variation of the cloud radiative forcing: Comparison of ECHAM model simulations with ERBE data p 1860 N94-22288
EARTH RESOURCES
Application of SPOT to GIS/LIS in land capability evaluation for regional planning of JAICO semi-arid region of Piaui, Brazil p 1838 N94-20955
The development of remote sensing in Brazil and Canada: Comparative case studies
p 1840 N94-20968
EARTH ROTATION
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
EARTH SCIENCES
The Board on Earth sciences and resources
[DE94-000745] p 1859 N94-22018
Data management for interdisciplinary field experiments: OTTER project support
[NASA-CR-4559] p 1842 N94-22345
EARTH SURFACE
Cryoplanation terraces of interior and western Alaska
p 2091 N94-20396
Simulsted retrieval of land surface parameters using multichannel satellite microwave radiometry
p 1727 N94-20443
A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454
Interferometric detection of freeze-thaw displacements of Alaskan permafrost using ERS-1 data
p 1732 N94-20460
Areally averaged estimates of surface heat flux from ARM field studies
[DE93-018569] p 1859 N94-22036
EARTH TERMINALS
Downlink acquisition and tracking procedures for the ASCAMP satellite communications terminal
[AD-A272912] p 1739 N94-21244
EARTH-MARS TRAJECTORIES
Entry velocities at Mars and Earth for short transit times
[AD-A272591] p 1665 N94-21420
EARTHQUAKES
Detection of traveling ionospheric disturbances induced by atmospheric gravity waves using the global positioning system p 1723 N94-20425
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006
The Board on Earth sciences and resources
[DE94-000745] p 1859 N94-22018
ECOLOGY
ELF communications system ecological monitoring program
[AD-A272507] p 1740 N94-21412
ECONOMIC ANALYSIS
Wind energy: Program overview, FY 1992
[DE93-000056] p 1845 N94-19921
Technology to prevent greenhouse effect gases
[DE94-707420] p 1851 N94-20116
Low-cost, dual-use platforms for environmental sensing, phase 1
[AD-A272951] p 1646 N94-21246
Information Technology and Economic Modelling
[VTT-SYMP-135] p 2049 N94-22056
Mathematical modelling of economic systems
p 2050 N94-22060
AJKA: An econometric macromodel for Finland
p 2050 N94-22061
Macromodel of centrally planned economy
p 2050 N94-22062
The Soviet software market: Current state and aspects of development p 1923 N94-22066
Models of transient processes in centrally planned economy p 2051 N94-22071
An economic analysis of transboundary air pollution between Finland and the Soviet Union
[ETLA-DISCUSSION-PAPER-335] p 1854 N94-22072
An expert system of econometric analysis
p 2052 N94-22081
Use of economic models in Finnish economic policy
p 2053 N94-22085
Experiences of the bank of Finland's econometric simulation model p 2053 N94-22086
ECONOMIC DEVELOPMENT
Technology to prevent greenhouse effect gases
[DE94-707420] p 1851 N94-20116
Soviet society informatization: The USSR state program p 2046 N94-22058
Models of transient processes in centrally planned economy p 2051 N94-22071
ECONOMIC FACTORS
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[DOT/FAA/RD-93/22] p 1642 N94-20051
Activities of National Inst. for Aviation Research
[NIAR-93-16] p 2151 N94-20150
ECONOMIC IMPACT
Biofuels: Project summaries
[DE93-010003] p 1712 N94-19984
An airport economic impact study procedure for Atlantic Canada
[ISBN-0-315-59445-4] p 1651 N94-22419
ECONOMICS
Information Technology and Economic Modelling
[VTT-SYMP-135] p 2049 N94-22056
Mathematical modelling of economic systems
p 2050 N94-22060
AJKA: An econometric macromodel for Finland
p 2050 N94-22061
Microdynamic model of reproduction: Taxation and currency issue as regulators of economy
p 2053 N94-22084
Use of economic models in Finnish economic policy
p 2053 N94-22085
Experiences of the bank of Finland's econometric simulation model p 2053 N94-22086
ECONOMY
The Soviet software market: Current state and aspects of development p 1923 N94-22066
Models of transient processes in centrally planned economy p 2051 N94-22071
Microdynamic model of reproduction: Taxation and currency issue as regulators of economy
p 2053 N94-22084
ECOSYSTEMS
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
Data management for support of the Oregon Transect Ecosystem Research (OTTER) project
[NASA-CR-4557] p 1905 N94-20149
Analysis of hyper-spectral AVIRIS image data over a mixed-conifer forest in Maine p 1838 N94-20959

Modeling the response of ecosystems to CO2 and climate change
[DE94-000748] p 1852 N94-21787

EDDY CURRENTS
A new eddy current model for magnetic bearing control system design p 1763 N94-21698
Demonstrating damage tolerance of composite airframes p 1647 N94-22623

EDGE DETECTION
Image detection using edge extraction algorithms
[AD-A272439] p 1911 N94-21203
Elliptical-shape parameter estimation from a set of normal lines p 1777 N94-22148
A neural network for multiresolution edge detection p 1779 N94-22163

EDITING
An assessment of the statistical and editorial output of text analysis programs
[AD-A272185] p 2042 N94-20924
CMIFed: A presentation environment for porta ble hypermedia documents
[CWI-CS-R9305] p 2044 N94-21494
New IRAF stellar photometry software p 1925 N94-22464

EDITING ROUTINES (COMPUTERS)
An assessment of the statistical and editorial output of text analysis programs
[AD-A272185] p 2042 N94-20924
CMIFed: A presentation environment for porta ble hypermedia documents
[CWI-CS-R9305] p 2044 N94-21494

EDUCATION
Mathematics B for the study direction VWO: A reconnaissance
[REPT-92-80] p 1950 N94-20032
A comprehensive software engineering educational experience
[AD-A270583] p 1905 N94-20109
NASA's Education Program
[NASA-EP-297] p 2038 N94-20129
Rockets: Physical science teacher's guide with activities
[NASA-EP-291] p 1669 N94-20226
Schools of the Pacific rainfall climate experiment p 1881 N94-20699
Tumuli and tubes: Teaching scientific techniques p 2039 N94-20818
Sparking young minds with Moon rocks and meteorites p 2039 N94-20819
A practical software engineering curriculum: A pilot study
[AD-A272781] p 1911 N94-21183
Use of computers in the instruction of integral calculus
[AD-A272500] p 1913 N94-21409
Extracting information from wrong answers in computerized adaptive testing
[AD-A272832] p 1894 N94-21434
NASA Propulsion Engineering Research Center, volume 1
[NASA-CR-194721-VOL-1] p 1671 N94-22428

EFFUSIVES
Elevation and igneous crater modification on Venus: Implications for magmatic volatile content p 2135 N94-20872

EIGENVALUES
Parallel band reduction and tridiagonalization
[DE93-019566] p 1951 N94-20221
Numerical ranges and stability estimates
[TW-92-10] p 1953 N94-21060
The multigrid preconditioned conjugate gradient method p 1958 N94-21482
Using parallel banded linear system solvers in generalized eigenvalue problems
[NASA-CR-191540] p 1915 N94-21584
A sharp upper bound for departure from normality
[DE93-040457] p 1960 N94-21966

EJECTA
Morphologic and morphometric studies of impact craters in the northern plains of Mars p 2089 N94-20384
The Manson impact crater: Estimation of the energy of formation, possible size of the impacting asteroid or comet, and ejecta volume and mass p 2083 N94-20721
Parabolic features and the erosion rate on Venus p 2122 N94-20801
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona p 1863 N94-20889
Antipodal fragment velocities for porous and weak targets at catastrophic impacts p 1836 N94-20891

ELASTIC BODIES
Research in lightweight elastic robotic arms
[AD-A270846] p 1821 N94-19833

ELASTIC DEFORMATION
Graphite/polyurethane flexible composites: Mechanical and vibration damping properties
[AD-A271608] p 1674 N94-20950

ELASTIC PROPERTIES
Research in lightweight elastic robotic arms
[AD-A270846] p 1821 N94-19833
Innovative acoustic technique for studying new materials and new developments in solid state physics
[AD-A270540] p 2013 N94-19933
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
Compliant seal development p 1655 N94-21795
Crystal orientation dependence of elastic precursor strength in pentaerythritol tetranitrate
[DE93-018340] p 2034 N94-22035

ELASTIC SCATTERING
Examinations of a thallium atomic vapor filter for a Raman temperature lidar
[GKSS-92/E/13] p 1857 N94-21044
Parton-parton elastic scattering and rapidity gaps at Tevatron energies
[DE93-041024] p 1974 N94-21515
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941
Non-adiabatic effects in low-energy electron-molecule scattering
[DE93-040485] p 1976 N94-21968

ELASTIC WAVES
System and method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-1] p 1801 N94-20588

ELASTIN
Development of bioelastic material for aspects of wound repair
[AD-A272000] p 1892 N94-21503

ELASTOMERS
Frequency and temperature dependence of high damping elastomers
[DE93-019539] p 1697 N94-19809
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers
[AD-A271128] p 1699 N94-20016

ELASTOPLASTICITY
The p-version of the finite element method in incremental elasto-plastic analysis
[NASA-CR-194707] p 1830 N94-20036

ELASTOSTATICS
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777

ELECTRIC ARCS
Two dimensional simulation of the electric arc behavior in a cut-off device
[ECL-92-41] p 1751 N94-20595

ELECTRIC BATTERIES
Current status of environmental, health, and safety issues of nickel metal-hydride batteries for electric vehicles
[DE93-017079] p 1748 N94-19902
Development of the UTC-PAB normative database
[AD-A271319] p 1893 N94-20023
Lightweight battery electrode and method of making it
[AD-D015895] p 1749 N94-20120
Power standard
[ESA-PSS-02-10-VOL-1-ISSUE-] p 1669 N94-20241
Analysis of a diesel-electric hybrid urban bus system
[DE93-019514] p 1825 N94-21297

ELECTRIC BRIDGES
A comprehensive theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20500
A theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20502

ELECTRIC CONDUCTORS
Operational Requirements Document (ORD) for the Alternating Current/Direct Current (AC/DC) clamp-on ammeter, mE-563
[AD-A271808] p 1751 N94-20555

ELECTRIC CONNECTORS
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1821 N94-20126

ELECTRIC CONTACTS
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312

ELECTRIC CURRENT
Superconducting property measurements in tape geometry
[DE93-018943] p 2014 N94-19970
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-194728] p 1856 N94-20537
Correct CMOS IC defect models for quality testing p 1755 N94-21093

ELECTRIC DISCHARGES
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1822 N94-20127
Kinetic theory of runaway air-breakdown
[DE93-040731] p 1750 N94-20325
Research on plasma-puff initiation of high Coulomb transfer switches
[NASA-CR-194371] p 1994 N94-21289
INPIStron switched pulsed power for dense plasma pinches p 1995 N94-21294

ELECTRIC EQUIPMENT TESTS
Lavet type stepping motors and associated controls p 1752 N94-20632
Test device for Lavet motors p 1752 N94-20633

ELECTRIC FIELDS
A novel method for characterizing the electrical Priorities of lead Zirconate Titanate (PZT) ferroelectric films and memory devices
[AD-A270463] p 2013 N94-19966
Calculation and optimization of electromagnetic fields in a patient by local hyperthermia utilization
[ETN-93-95059] p 1889 N94-20024
Metal-glass composite field-emitting arrays
[AD-D015942] p 1673 N94-20064
CsI and some new photocathodes
[DE93-019387] p 1750 N94-20314
Light scattering studies of an electrorheological fluid
[DE93-019419] p 1700 N94-20315
Layered thin-edged field-emitter device
[AD-D015932] p 1751 N94-20350
Statistical fluctuations in lasers
[DE94-000710] p 1817 N94-20939
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Optical measurement of built-in and applied electric fields in Al(x)Ga(1-x)As/GaAs heterostructures p 1796 N94-20989
The sea breeze convergence zone and its relationship to fair weather electricity in east central Florida
[AD-A268511] p 1868 N94-21502
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
Simulation and compensation of multibunch energy variation in NLC
[DE93-041057] p 1981 N94-21687
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766
Studies of electromagnetic ion cyclotron waves using AMPTE/CCE and Dynamics Explorer
[NASA-CR-194711] p 1982 N94-21878
Calculation of a diffracted electric field with the aid of the Method of Equivalent Currents (MEC) p 1745 N94-22127
Numerical method for computing the electric field produced by a microwave beam in a stratified medium p 1746 N94-22197

ELECTRIC FILTERS
An adaptive method for group delay compensation using switched capacitor filters p 1793 N94-22248

ELECTRIC GENERATORS
Building integrated photovoltaic systems analysis
[DE93-018208] p 1846 N94-21298
Derivation of a model of the exciter of a brushless synchronous machine
[EUT-92-E-258] p 1761 N94-21538
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569

ELECTRIC MOTOR VEHICLES
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885
Evaluation of externally heated pulsed MPD thruster cathodes
[NASA-CR-191090] p 1670 N94-21565
Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE93-019159] p 1762 N94-21620
Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE94-000391] p 1762 N94-21621

ELECTRIC MOTORS
Operation of a test bed axial-gap brushless dc rotor with a superconducting stator
[DE93-019167] p 1769 N94-21830
A vibration model for centrifugal contactors
[DE93-040645] p 1833 N94-21927

Flow and heat transfer model for a rotating cryogenic motor
[DE94-001151] p 1794 N94-22405

ELECTRIC NETWORKS
High resolution signal processing
[AD-A271181] p 1717 N94-20215

ELECTRIC POTENTIAL
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973
The sea breeze convergence zone and its relationship to fair weather electricity in east central Florida
[AD-A268511] p 1868 N94-21502
Results from long conduction time plasma opening switch experiments at Sandia National Laboratories
[DE93-019063] p 1762 N94-21632
Localization of pellicle-induced open contacts using charge-induced voltage alteration
[DE93-019407] p 1762 N94-21636
Analog/digital pH meter system I.C.
p 1764 N94-21701
Low energy CMOS for space applications
p 1768 N94-21735
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583

ELECTRIC POWER
Technology to prevent greenhouse effect gases
[DE94-707420] p 1851 N94-20116

ELECTRIC POWER SUPPLIES
System performance predictions for Space Station Freedom's electric power system
[NASA-TM-106396] p 1667 N94-20062
Self-deploying photovoltaic power system
[NASA-CASE-LEW-15308-1] p 1846 N94-20196
Power supply and controller for the Sextupole magnet of AmPS
[DIGEL-1992-3] p 1753 N94-21064

ELECTRIC PROPULSION
Performance potential of plasma thrusters: Arcjet and Hall thruster modeling
[AD-A271085] p 1667 N94-19847

ELECTRIC SWITCHES
Research on plasma-puff initiation of high Coulomb transfer switches
[NASA-CR-194371] p 1994 N94-21289
Plasma-puff initiation of high Coulomb transfer switches p 1994 N94-21290
Characteristics of plasma-puff trigger for a inverse-pinch plasma switch p 1995 N94-21291
Characteristics of switching plasma in an inverse-pinch switch p 1995 N94-21292
Comparative study of INPIStron and spark gap p 1995 N94-21293
INPIStron switched pulsed power for dense plasma pinches p 1995 N94-21294
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770

ELECTRICAL ENGINEERING
Progress In Electromagnetics Research Symposium (PIERS)
[NASA-CR-194629] p 1718 N94-20403
Computer-Aided Test Equipment Graphics System (CATEGS)
[DE94-000383] p 1915 N94-21561
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101

ELECTRICAL FAULTS
VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110
Correct CMOS IC defect models for quality testing p 1755 N94-21093
Faulty behavior of asynchronous storage elements p 1757 N94-21108
Detection of CMOS bridging faults using minimal stuck-at fault test sets p 1757 N94-21110

ELECTRICAL IMPEDANCE
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-016205] p 1688 N94-19985
Manual design technique for broadband passive thin-film attenuators using the Smith chart p 1782 N94-22178

ELECTRICAL MEASUREMENT
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917
Superconducting property measurements in tape geometry
[DE93-016943] p 2014 N94-19970
Optical measurement of built-in and applied electric fields in Al(x)Ga(1-x)As/GaAs heterostructures p 1796 N94-20989
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
A new innovative instrument for space plasma instrumentation
[NASA-CR-194736] p 1668 N94-21780
Test results of two high temperature superconducting sample coils
[DE94-000496] p 2035 N94-22570

ELECTRICAL PROPERTIES
Characterization studies of lower and non-TDI polyurethane encapsulants
[DE93-041129] p 1696 N94-19857
Frequency dependent electrical properties of minerals and partial-melts
[DE93-019918] p 2012 N94-19861
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
Surface treatment of InP and contribution to the optimization of the InP(p)/InP(p) regrown interfaces grown by GSMBE
[ECL-92-48] p 2018 N94-20598
Synthesis and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A272955] p 2027 N94-21248
Semiconductors A(III)B(VI): Translation
[AD-A273064] p 2028 N94-21438
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells
[DE93-019536] p 1847 N94-21650
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763
Non-linear analysis of the electrical properties of the active circuits of high-frequency oscillators p 1785 N94-22195

ELECTRICAL RESISTANCE
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987
Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176

ELECTRICAL RESISTIVITY
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
Solar proton events from a 180 year depth profile of nitrate concentrations from the central Greenland ice sheet
[AD-A272888] p 2147 N94-21196
Wire assembly for electrically conductive circuits
[AD-D015966] p 1761 N94-21275
Evaluation of electroconductivity of two surface paints for spacecraft
[AD-A273063] p 1706 N94-21437
Defect motion as the origin of the 1/f conductance noise in solids
[EUT-92-E-259] p 2029 N94-21552
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870
Iterative electromagnetic Born inversion applied to earth conductivity imaging
[DE93-040668] p 1859 N94-21928
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584

ELECTRICITY
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569

ELECTRO-OPTICS
Proceedings of the 8th International Symposium on Applications of Ferroelectrics
[AD-A270679] p 1749 N94-20012
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Photonic electromagnetic field sensor apparatus
[AD-D015939] p 1718 N94-20334
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
NOVAM evaluation utilizing electro-optics and meteorological data from KEY-90
[AD-A271722] p 1868 N94-21356
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416
Photonics and nonlinear optics with molecular materials and polymers
[AD-A271747] p 1988 N94-21457
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526
Optical integrated structures and circuits on silicon
[VTT-PUBS-106] p 1988 N94-21594
Architectures of the free space optical interconnects p 1789 N94-22220

ELECTROACOUSTICS
U.S. Tag for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock: Minutes of the accredited standards committee on bioacoustics, S3
[AD-A273014] p 1897 N94-21309

ELECTROCATALYSTS
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691

ELECTROCHEMICAL CELLS
The One-Day Workshop on Batteries, Stepping Motors, and Electronic Clock Displays
[ETN-93-94632] p 1752 N94-20628
Silver oxide batteries: Recent improvements and developments p 1752 N94-20629
Battery tests p 1752 N94-20631

ELECTROCHEMICAL CORROSION
The use of x ray techniques in the in situ study of corrosion
[DE93-019845] p 1690 N94-20301
In-situ electrochemical surface science
[AD-A265942] p 1680 N94-20330

ELECTROCHEMICAL OXIDATION
Development of an electrochemical hydrogen separator
[DE93-019877] p 1683 N94-21984

ELECTROCHEMISTRY
In-situ electrochemical surface science
[AD-A265942] p 1680 N94-20330
Electrochemical synthesis of ultrathin film composite membranes
[AD-A272721] p 1681 N94-21168
Laser Raman and x ray scattering studies of corrosion films on metals
[DE93-040243] p 1692 N94-21558
The electrochemical performance of thin-electrolyte solid oxide fuel cells
[DE93-041184] p 1848 N94-21942
Development of an electrochemical hydrogen separator
[DE93-019877] p 1683 N94-21984

ELECTRODE MATERIALS
High-power gas switch with hydride electrodes
[AD-D015956] p 1751 N94-20354
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells
[DE93-019536] p 1847 N94-21650
Effects of aqueous solution compositions on Aerocapacitor energy density
[DE94-000385] p 1768 N94-21753
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870

ELECTRODEPOSITION
Surface electrochemistry of metals
[AD-A272913] p 1691 N94-21245
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691
Surface modification for corrosion resistance
[DE93-017419] p 1693 N94-21825

ELECTRODES
Electrode array electromagnetic velocimeter
[AD-D015950] p 1806 N94-19882
Process to fabricate thick coplanar microwave electrode structures
[AD-D015913] p 1748 N94-19892
Lightweight battery electrode and method of making it
[AD-D015895] p 1749 N94-20120
Layered thin-edged field-emitter device
[AD-D015932] p 1751 N94-20350
High-power gas switch with hydride electrodes
[AD-D015956] p 1751 N94-20354
Laser Raman and x ray scattering studies of corrosion films on metals
[DE93-040243] p 1692 N94-21558

Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043

ELECTRODYNAMICS

Measurement and computation of the higher order modes of the ALS 500 MHz accelerating cavities
[DE93-019256] p 1980 N94-20292
A new matrix formulation of classical electrodynamics. Part 3: Wave propagation through a multilayer dielectric medium with planar boundaries
[AD-A271610] p 1739 N94-21240
Data analysis support for the SPREE instruments on the TSS-1 shuttle flight
[AD-A272445] p 1654 N94-21429

ELECTROENCEPHALOGRAPHY

Cognition and the brain: A continuation of the university research initiative at New York University
[AD-A271872] p 1894 N94-20467
Localization from near-source quasi-static electromagnetic fields
[DE93-040390] p 1732 N94-20479

ELECTROHYDRODYNAMICS

Absorption heat pump for space applications
[NASA-CR-194693] p 1845 N94-20066
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101

ELECTROLESS DEPOSITION

Adhesive electroless metallization of fluoropolymeric substrates
[AD-A271858] p 1703 N94-20526

ELECTROLYTES

Surface science at the solid liquid interface
[AD-A271422] p 1678 N94-19839
Photoelectron spectroscopy at model boundary surfaces of energy converter semiconductors/electrolyte contacts: Adsorption, coadsorption, and triadsorption of Br2, Na, and H2O on Van der Waals surfaces of metal chalocogenide semiconductors
[ETN-93-95063] p 2015 N94-20152
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells
[DE93-019536] p 1847 N94-21650
Effects of aqueous solution compositions on Aerocapacitor energy density
[DE94-000385] p 1768 N94-21753
The electrochemical performance of thin-electrolyte solid oxide fuel cells
[DE93-041184] p 1848 N94-21942

ELECTROLYTIC CELLS

Modeling of polymer electrolyte fuel cell systems
[DE93-041187] p 1847 N94-21774
The electrochemical performance of thin-electrolyte solid oxide fuel cells
[DE93-041184] p 1848 N94-21942
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044

ELECTROMAGNETIC ABSORPTION

High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805
Optically induced rotation diffusion in polymer liquid crystals: Phenomenological theory and experimental verification
[ETN-93-95068] p 2014 N94-20026
Optical and transport properties of metallic and semiconductor nanostructures
[AD-A271716] p 2018 N94-20554
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Forecasting technique of variations of the optical absorptivity of thermal control coatings under different simultaneous radiations p 1664 N94-21399
Photonics and nonlinear optics with molecular materials and polymers
[AD-A271747] p 1988 N94-21457
The use of ERBE data for climate studies
p 1860 N94-22286
Low temperature absorption spectra and ground state electronic structure of tetrakis(2,6-di-tert-butylphenoxide)uranium(IV)
[DE94-000774] p 2035 N94-22387

ELECTROMAGNETIC COMPATIBILITY

SLAC measurement of the neutron spin structure function
[DE93-040998] p 1975 N94-21788
Improvements in antenna coupling path algorithms for aircraft EMC analysis p 1745 N94-22126

ELECTROMAGNETIC COUPLING

The preservation of low emittance flat beams
[DE93-040964] p 1981 N94-21773
Linearly tapered slot antenna circular array for mobile communications
[NASA-TM-106441] p 1769 N94-21808
Full wave numerical model of arbitrarily-shaped proximity coupled microstrip antennas p 1745 N94-22137

ELECTROMAGNETIC FIELDS

Characterization of electromagnetic fields in an extended chamber at the Short Pulse Experimental Electron Device (SPEED) simulator
[AD-A265955] p 1717 N94-20329
Photonic electromagnetic field sensor apparatus
[AD-D015938] p 1717 N94-20333
Photonic electromagnetic field sensor apparatus
[AD-D015939] p 1718 N94-20334
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20406
An efficient formulation of the coupled finite element-integral equation technique for solving large 3D scattering problems p 1725 N94-20436
Localization from near-source quasi-static electromagnetic fields
[DE93-040390] p 1732 N94-20479
VLF Harold E. Holt RADHAZ measurements
[AD-A272018] p 1737 N94-20620
A new matrix formulation of classical electrodynamics. Part 3: Wave propagation through a multilayer dielectric medium with planar boundaries
[AD-A271610] p 1739 N94-21240
ELF communications system ecological monitoring program
[AD-A272507] p 1740 N94-21412
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
An integro-algebraic equation for high frequency wake fields in a tube with smoothly varying radius
[DE93-040940] p 1741 N94-21684
Performance of a simple circular polarization selective surface p 1746 N94-22198
Electromagnetic interference and shielding: An introduction (revised version of 1991-23)
[PB93-215275] p 1742 N94-22348
Prompt high-energy particle acceleration during two current loops collision p 2005 N94-22661
Dynamics of physical state during two current loops collision p 2005 N94-22663
Time variation of MHD accretion onto a black hole
p 2009 N94-22692

ELECTROMAGNETIC INTERACTIONS

A Monte Carlo study of the Sudbury Neutrino Observatory small test detector experiment
[ISBN-0-315-59056-4] p 1977 N94-22416

ELECTROMAGNETIC INTERFERENCE

Improvements in antenna coupling path algorithms for aircraft EMC analysis p 1745 N94-22126
Characterization and modelling of extremely high frequency enclosures p 1782 N94-22177
FM interference in radio navigation receivers
p 1645 N94-22219
Applications of planar near-field measurements to electromagnetic radiation and interference problems
p 1747 N94-22252
Electromagnetic interference and shielding: An introduction (revised version of 1991-23)
[PB93-215275] p 1742 N94-22348

ELECTROMAGNETIC MEASUREMENT

Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Localization from near-source quasi-static electromagnetic fields
[DE93-040390] p 1732 N94-20479
Iterative electromagnetic Born inversion applied to earth conductivity imaging
[DE93-040668] p 1859 N94-21928

ELECTROMAGNETIC NOISE

Literature review of the errors-in-variables approach to the problem of system identification
[AD-A271098] p 1949 N94-19907
Proton radiation testing of an 18 bit A/D converter
p 1755 N94-21096

ELECTROMAGNETIC PROPERTIES

Electrode array electromagnetic velocimeter
[AD-D015950] p 1806 N94-19882
High temperature superconducting planar circuit structure for high frequency applications
[AD-A273083] p 2028 N94-21521

ELECTROMAGNETIC PULSES

Measurement and correction of magnetic fields in pulsed slotted-tube microwigglers
[DE93-040100] p 1815 N94-20272
Ultrafast gas switching experiments
[DE93-019071] p 1762 N94-21634
A broadband V-antenna for pulsed field measurements: Experimental results p 1745 N94-22139
Continuous-time discretized-space approach to modeling short-pulse propagation and scattering
[PB93-215259] p 1742 N94-22347

ELECTROMAGNETIC RADIATION

Near grazing scattering from non-Gaussian ocean surfaces p 1726 N94-20438
A comparative study between shielded and open coplanar waveguide discontinuities
p 1733 N94-20501
Modeling of coaxial-fed microstrip patch antenna by finite difference time domain method p 1745 N94-22138
Langmuir microstructures and pulsar radio emission
p 2007 N94-22678

ELECTROMAGNETIC SCATTERING

Study of electromagnetic wave scattering from characterized rough surfaces
[AD-A270931] p 1716 N94-19934
Analytical evaluation of a surface integral expressing the coupling between interior and exterior volumes in a FE-IE approach p 1722 N94-20423
Polarimetric backscattering from sea ice
p 1723 N94-20426
An efficient formulation of the coupled finite element-integral equation technique for solving large 3D scattering problems p 1725 N94-20436
Near grazing scattering from non-Gaussian ocean surfaces p 1726 N94-20438
Extinction efficiencies from DDA calculations solved for finite circular cylinders and disks p 1880 N94-22340
Extended range modified gradient technique for profile inversion (extended version of report Et/Em-1992-8)
[PB93-215242] p 1742 N94-22346
Continuous-time discretized-space approach to modeling short-pulse propagation and scattering
[PB93-215259] p 1742 N94-22347

ELECTROMAGNETIC SHIELDING

Characterization of electromagnetic fields in an extended chamber at the Short Pulse Experimental Electron Device (SPEED) simulator
[AD-A265955] p 1717 N94-20329
Electromagnetic interference and shielding: An introduction (revised version of 1991-23)
[PB93-215275] p 1742 N94-22348

ELECTROMAGNETIC WAVE TRANSMISSION

Photonic electromagnetic field sensor apparatus
[AD-D015938] p 1717 N94-20333
A new matrix formulation of classical electrodynamics. Part 3: Wave propagation through a multilayer dielectric medium with planar boundaries
[AD-A271610] p 1739 N94-21240
Time-laplace-transform-domain analysis of wave propagation in planar waveguides
[PB93-215226] p 1980 N94-22096
Continuous-time discretized-space approach to modeling short-pulse propagation and scattering
[PB93-215259] p 1742 N94-22347
Electromagnetic interference and shielding: An introduction (revised version of 1991-23)
[PB93-215275] p 1742 N94-22348

ELECTROMAGNETISM

Progress In Electromagnetics Research Symposium (PIERS)
[NASA-CR-194629] p 1718 N94-20403
Electromagnetic interference and shielding: An introduction (revised version of 1991-23)
[PB93-215275] p 1742 N94-22348

ELECTROMAGNETS

Power supply and controller for the Sextupole magnet of AmPS
[DIGEL-1992-3] p 1753 N94-21064

ELECTROMECHANICAL DEVICES

Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE93-019159] p 1762 N94-21620
Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE94-000391] p 1762 N94-21621

ELECTROMECHANICS

Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE94-000391] p 1762 N94-21621

ELECTROMIGRATION

VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110

ELECTROMOTIVE FORCES

Data analysis support for the SPREE instruments on the TSS-1 shuttle flight
[AD-A272445] p 1654 N94-21429

ELECTROMYOGRAPHY

Cosmos 2229
[NASA-CR-194734] p 1895 N94-20338

ELECTRON ACCELERATION

Electron acceleration in and radio emission from SN1987A p 2007 N94-22677

ELECTRON ACCELERATORS
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
Demonstration of ultraviolet lasing with a low energy electron beam
[DE93-040192] p 1818 N94-21554
ELECTRON ATTACHMENT
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
ELECTRON AVALANCHE
SPICE macromodel for a 1-megawatt power MOSFET switch
[DE93-019415] p 1748 N94-19844
ELECTRON BEAM WELDING
Thermocapillary and arc phenomena in stainless steel welds
[DE94-000518] p 1821 N94-19859
ELECTRON BEAMS
Initial performance of Los Alamos advanced free electron laser
[DE93-040158] p 1814 N94-19828
Laser amplifier developments at Mercury
[DE93-040103] p 1814 N94-19867
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870
A field-based technique for the longitudinal profiling of ultrarelativistic electron or positron bunches down to lengths of less than or equal to 10 microns
[DE93-040954] p 1978 N94-19873
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
Bundle profile monitor for AmPS
[DIGEL-1992-8] p 1979 N94-20123
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos
[DE93-040141] p 1816 N94-20277
The modification of polymer surfaces and the fabrication of submicron-scale functionalized structures by deep-UV and electron beam lithography
[AD-A265956] p 1700 N94-20328
Characterization of electromagnetic fields in an extended chamber at the Short Pulse Experimental Electron Device (SPEED) simulator
[AD-A265955] p 1717 N94-20329
Electron quantum yields from a barium photocathode illuminated with polarized light
[DE93-019232] p 1980 N94-20475
An 85 GHz quasioptical gyroklystron experiment
[AD-A272020] p 1752 N94-20931
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191
Simulated space environmental effects on some experimental high performance polymers
p 1662 N94-21385
Demonstration of ultraviolet lasing with a low energy electron beam
[DE93-040192] p 1818 N94-21554
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
SLAC measurement of the neutron spin structure function
[DE93-040998] p 1975 N94-21788
Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974
ELECTRON BUNCHING
A field-based technique for the longitudinal profiling of ultrarelativistic electron or positron bunches down to lengths of less than or equal to 10 microns
[DE93-040954] p 1978 N94-19873
Study of coupled-bunch collective effects in the PEP-2 B-Factory
[DE93-040117] p 1979 N94-20274
An 85 GHz quasioptical gyroklystron experiment
[AD-A272020] p 1752 N94-20931
Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974
ELECTRON CAPTURE
Energy gain spectroscopic study of Ar(q+)-Ar collisions at 40 qeV
[DE93-040284] p 1970 N94-19871
ELECTRON COUNTERS
A search for new gauge bosons in (bar p)p collisions at square root of s equals 1.8 TeV in the dielectron decay mode
[DE93-019901] p 1969 N94-19813
ELECTRON DENSITY (CONCENTRATION)
On the experimental determination of low order structure factors in TiAl by energy filtered convergent beam electron diffraction
[DE93-019521] p 1687 N94-19806
Ionospheric tomography using the FORTE satellite
[DE93-018545] p 1854 N94-19955
Spectral characterization of lithographic sources
[DE93-019941] p 1997 N94-21848
ELECTRON DIFFRACTION
On the experimental determination of low order structure factors in TiAl by energy filtered convergent beam electron diffraction
[DE93-019521] p 1687 N94-19806
Facilities for in situ ion beam studies in transmission electron microscopes
[DE93-019567] p 1979 N94-20222
Determination of structure factors of copper by convergent beam electron diffraction
[DE93-019520] p 2019 N94-20941
Diffraction and holography of photoelectrons and fluorescent x rays
[DE93-019240] p 1808 N94-21441
Synthesis and catalytic properties of metal and semiconductor nanoclusters
[DE93-019418] p 2028 N94-21541
ELECTRON DISTRIBUTION
Kinetic theory of runaway air-breakdown
[DE93-040731] p 1750 N94-20325
Detailed analysis case studies of trapped plasmas at the Earth's magnetic equator
[AD-A272497] p 1858 N94-21432
Studies of electromagnetic ion cyclotron waves using AMPTE/CCE and Dynamics Explorer
[NASA-CR-194711] p 1982 N94-21878
ELECTRON EMISSION
Research on defects and transport in amorphous-silicon-based semiconductors
[DE93-017117] p 2013 N94-19939
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766
Magnetic insulation of secondary electrons in plasma source ion implantation
[DE93-040106] p 1997 N94-21988
ELECTRON ENERGY
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Angular distributions of high-order ATI
[DE93-019125] p 1972 N94-20230
In-situ electrochemical surface science
[AD-A265942] p 1680 N94-20330
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
Spectral characterization of lithographic sources
[DE93-019941] p 1997 N94-21848
Studies of electromagnetic ion cyclotron waves using AMPTE/CCE and Dynamics Explorer
[NASA-CR-194711] p 1982 N94-21878
Inelastic electron scattering from surfaces
[DE94-001738] p 1977 N94-22049
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas
[DE94-001304] p 1999 N94-22566
Electron temperature gradient driven instability in the tokamak boundary plasma
[DE94-001307] p 1999 N94-22596
ELECTRON FLUX DENSITY
Photoelectron holography of platinum (111)
[DE93-040856] p 1810 N94-21950
ELECTRON GAS
Synthesis and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229
ELECTRON IMPACT
Collisional processes involving atmospheric gases
[AD-A270729] p 1854 N94-19954
ELECTRON IRRADIATION
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
ELECTRON MICROSCOPES
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Facilities for in situ ion beam studies in transmission electron microscopes
[DE93-019567] p 1979 N94-20222
Electron holography applied to the study of ceramic materials
[DE94-000329] p 1707 N94-21653
ELECTRON MICROSCOPY
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
Preliminary AEM study of the microstructure and composition of metal particles in ordinary chondrites
p 2086 N94-20894
ELECTRON MOBILITY
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Research on defects and transport in amorphous-silicon-based semiconductors
[DE93-017117] p 2013 N94-19939
Defect motion as the origin of the 1/f conductance noise in solids
[EUT-92-E-259] p 2029 N94-21552
ELECTRON ORBITALS
Rotational isomers of Mo(VI) alkylidene complexes and Cis/trans polymer structure: Investigations in ring-opening metathesis polymerization
[AD-A272647] p 1704 N94-21184
ELECTRON PLASMA
Spectral characterization of lithographic sources
[DE93-019941] p 1997 N94-21848
A unified Monte Carlo interpretation of particle simulations and applications to nonneutral plasmas
[DE94-001231] p 1997 N94-21973
ELECTRON PROBES
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
ELECTRON RADIATION
Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974
ELECTRON SCATTERING
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
New relativistic S-matrix results for scattering -- beyond the usual anomalous factors/beyond impulse approximation
[DE93-019148] p 1971 N94-20096
The angular velocity spread of REB induced by magnetic field discontinuity
[IPPCZ-331] p 1996 N94-21573
Non-adiabatic effects in low-energy electron-molecule scattering
[DE93-040485] p 1976 N94-21968
Inelastic electron scattering from surfaces
[DE94-001738] p 1977 N94-22049
The effect of Compton scattering on the double to single ionization ratio in helium
[DE94-000884] p 1827 N94-22390
ELECTRON SOURCES
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos
[DE93-040141] p 1816 N94-20277
Electron quantum yields from a barium photocathode illuminated with polarized light
[DE93-019232] p 1980 N94-20475
ELECTRON SPECTROSCOPY
Energy gain spectroscopic study of Ar(q+)-Ar collisions at 40 qeV
[DE93-040284] p 1970 N94-19871
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944
Inelastic electron scattering from surfaces
[DE94-001738] p 1977 N94-22049
ELECTRON STATES
The Coulomb anomaly in strongly disordered films
[AD-A271095] p 2012 N94-19849
Collisional processes involving atmospheric gases
[AD-A270729] p 1854 N94-19954
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
Optical amplification and threshold behavior on InGaAs/InGaAsP multiquantum well structures
[ETN-93-94181] p 2026 N94-21151
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766
Ionization of H2(+) in intense laser fields
[DE93-019160] p 1818 N94-21829
Theoretical studies of the structures and electronic properties of U(NH2)(sub 3) and Np(NH2)(sub 3)
[DE94-000768] p 2031 N94-21857
ELECTRON TRAJECTORIES
Magnetic insulation of secondary electrons in plasma source ion implantation
[DE93-040106] p 1997 N94-21988

ELECTRON TRANSFER
The proximity effect in ultrathin granular Pb films
[AD-A271094] p 2012 N94-19848
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470
Ionospheric photoelectrons measured at geosynchronous orbit
[AD-A272431] p 1857 N94-21202
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions
[AD-A272665] p 1681 N94-21216
Infrared absorption spectroscopy of the weakly bonded CO-Cl2 complex
[AD-A271757] p 2027 N94-21304
Data analysis support for the SPREE instruments on the TSS-1 shuttle flight
[AD-A272445] p 1654 N94-21429
Photochemical approaches to conversion of light to electricity or fuel
[DE94-001650] p 1849 N94-22048
ELECTRON TRANSITIONS
Collisional processes involving atmospheric gases
[AD-A270729] p 1854 N94-19954
Determining the composition of olivine on asteroidal surfaces p 1686 N94-20805
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
Local structure and superconductivity in La(2-x)Ba(x)CuO4 for x=0.125 and x=0.15
[DE93-040193] p 2029 N94-21555
ELECTRON TUNNELING
The Coulomb anomaly in strongly disordered films
[AD-A271095] p 2012 N94-19849
Growth mechanisms and characterization of hydrogenated amorphous-silicon-alloy films
[DE93-018202] p 1699 N94-20047
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Energy-resolving x ray detectors with charge amplification due to multiple quasiparticle tunneling
[DE93-019506] p 2031 N94-21869
ELECTRON-POSITRON PAIRS
Study of coupled-bunch collective effects in the PEP-2 B-Factory
[DE93-040117] p 1979 N94-20274
ELECTRON-POSITRON PLASMAS
Gamma ray burst as a result of the explosive instability in the magnetosphere of old neutron star p 2007 N94-22675
ELECTRONIC BULLETIN BOARDS
PEGASUS, electronic bulletin board system user's guide
[AD-A271679] p 2044 N94-21363
ELECTRONIC EQUIPMENT
Control vane guidance for a ducted-fan unmanned air vehicle
[AD-A271957] p 1645 N94-20561
The electronics technology policy of the NLR Informatics Division: The NLR electronics CAE infrastructure
[NLR-TP-91001-U] p 1753 N94-21067
The 1992 4th NASA SERC Symposium on VLSI Design
[NASA-CR-194591] p 1763 N94-21694
Electronic locking system p 1796 N94-21801
ELECTRONIC EQUIPMENT TESTS
An x-band peeled HEMT amplifier p 1732 N94-20498
Proton radiation testing of an 18 bit A/D converter p 1755 N94-21096
Non-destructive semiconductor wafer probing system using laser pulses to generate and detect millimeter-wave signals
[CA-PATENT-APPL-SN-2,020,73] p 1760 N94-21178
ELECTRONIC FILTERS
An investigation into the integration of meter-level range and millimeter-level phase data using a multimode stimulation for optimal filter estimation software package
[AD-A267955] p 1751 N94-20483
ELECTRONIC MAIL
Multi Wave Link: An interactive database for co-ordination of multiwavelength programs
[NASA-CR-194778] p 2043 N94-21055
PEGASUS, electronic bulletin board system user's guide
[AD-A271679] p 2044 N94-21363
Controlling multisupplier operations by intelligent EDI p 1744 N94-22076
ELECTRONIC PACKAGING
Quartz/fused silica chip carriers
[NASA-CR-194154] p 2016 N94-20340
A simple modern correctness condition for a space-based high-performance multiprocessor p 1786 N94-21718
Characterization and modelling of extremely high frequency enclosures p 1782 N94-22177
ELECTRONIC WARFARE
Operational test and evaluation of electronic combat systems
[AD-A273093] p 1647 N94-21500
ELECTRONS
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Evaluation of the chemical composition of cosmic radiation in energy area of 10(exp 15) eV
[ETN-93-93682] p 2150 N94-21056
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766
SLAC measurement of the neutron spin structure function
[DE93-040998] p 1975 N94-21788
Energy-resolving x ray detectors with charge amplification due to multiple quasiparticle tunneling
[DE93-019506] p 2031 N94-21869
ELECTRORHEOLOGICAL FLUIDS
Light scattering studies of an electrorheological fluid
[DE93-019419] p 1700 N94-20315
ELECTROSTATIC CHARGE
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1822 N94-20127
Electrostatic charging and secondary effects in materials submitted to radiation in space p 1661 N94-21383
ELECTROSTATICS
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388
ELEMENTARY EXCITATIONS
Energy-resolving x ray detectors with charge amplification due to multiple quasiparticle tunneling
[DE93-019506] p 2031 N94-21869
ELEMENTARY PARTICLE INTERACTIONS
The cross section for the production of b(bar-b) pairs in p(bar p) collisions at the square root of s equals 1.8 TeV
[DE93-019900] p 1972 N94-20225
Measurement of the strange quark distribution function in W(+) charm quark events
[DE93-018267] p 1973 N94-20474
Hadronic molecules and scattering amplitudes from the nonrelativistic quark model
[DE94-000377] p 1974 N94-21657
Measurement of the inclusive jet cross section in p(bar-p) collisions at CDF
[DE94-000581] p 1982 N94-21866
ELEVATION
Topographic mapping using a monopulse SAR system p 1721 N94-20417
Distribution of small volcanic cones on the surface of Venus by size and elevation: Implications for differential deposition of volcanic features p 2110 N94-20731
Discharge rates in Ma'adim Vallis, Mars p 2128 N94-20830
Elevation and igneous crater modification on Venus: Implications for magmatic volatile content p 2135 N94-20872
ELEVATION ANGLE
Topographic mapping using a monopulse SAR system p 1721 N94-20417
ELLIPSOIDS
Linear structures on the small inner satellites of Saturn p 2121 N94-20797
Elliptical-shape parameter estimation from a set of normal lines p 1777 N94-22148
ELLIPSOMETERS
Thin film compositional analysis using null or fixed wavelength ellipsometry p 1709 N94-20976
Applications of variable angle spectroscopic ellipsometry in semiconductor technology p 2025 N94-21010
ELLIPSOMETRY
Spectroscopic ellipsometry studies of HF treated Si (100) surfaces p 1734 N94-20508
Ellipsometric study of Si(0.5)Ge(0.5)/Si strained-layer superlattices p 1734 N94-20509
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 1734 N94-20510
New technique for oil backstreaming contamination measurements p 1652 N94-20511
Materials, Structures, and Devices for High-Speed Electronics
[NASA-CR-193177] p 2019 N94-20971
Ellipsometric studies of sputtered silicon nitride on n-GaAs p 1709 N94-20972
Multiple-wavelength angle-of-incidence ellipsometry: Application to silicon nitride-gallium arsenide structures p 2019 N94-20974
Structural and chemical analysis of a silicon nitride film on GaAs by null ellipsometry p 1709 N94-20975
Thin film compositional analysis using null or fixed wavelength ellipsometry p 1709 N94-20976
Analytic solutions for optimized ellipsometric measurements of interfaces and surface layers in thin film structures p 2019 N94-20977
Variable wavelength, variable angle ellipsometry including a sensitivities correlation test p 1710 N94-20978
Thin-film hermeticity: A quantitative analysis of diamondlike carbon using variable angle spectroscopic ellipsometry p 1710 N94-20981
Variable angle of incidence spectroscopic ellipsometric study of semiconductor multilayer structures p 2020 N94-20982
Ellipsometric measurements of molecular-beam-epitaxy-grown semiconductor multilayer thicknesses: A comparative study p 1710 N94-20983
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis p 1710 N94-20984
Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry p 1796 N94-20985
Variable angle spectroscopic ellipsometric characterization of surface damage in chemical-mechanical polished GaAs p 1710 N94-20986
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Optical measurement of built-in and applied electric fields in Al(x)Ga(1-x)As/GaAs heterostructures p 1796 N94-20989
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry p 2022 N94-20992
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
Characterization of an asymmetric triangular multiple quantum well, by variable angle spectroscopic ellipsometry p 2022 N94-20995
GaAs(100) surface modifications at elevated temperatures, studied by in-situ spectroscopic ellipsometry p 2023 N94-20997
Ellipsometric study of GaAs(100) surface changes induced at elevated temperatures p 2023 N94-20998
Temperature dependence of optical properties of AlAs, studied by in-situ spectroscopic ellipsometry p 2023 N94-20999
Dielectric function of InGaAs in the visible p 2023 N94-21000
Study of InGaAs-based modulation doped field effect transistor structures using variable-angle spectroscopic ellipsometry p 1796 N94-21001
Study of concentration-dependent dielectric properties of n-type GaAs using variable angle spectroscopic ellipsometry p 2024 N94-21002
In-situ spectroscopic ellipsometry for real time semiconductor growth monitor p 2024 N94-21003
Real-time analysis of in-situ spectroscopic ellipsometric data during MBE growth of III-V semiconductors p 2024 N94-21004
In-situ spectroscopic ellipsometry in molecular beam epitaxy p 2024 N94-21005
Micro-ellipsometric measurements of strained layer structures p 2025 N94-21008
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009
Applications of variable angle spectroscopic ellipsometry in semiconductor technology p 2025 N94-21010
Fundamentals and applications of variable angle spectroscopic ellipsometry p 1687 N94-21011
Non-destructive evaluation in manufacturing using spectroscopic ellipsometry p 1828 N94-21012
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013

VASE (variable angle spectroscopic ellipsometry) p 1687 N94-21014
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG) [DE93-040546] p 1709 N94-21970
ELLIPTIC DIFFERENTIAL EQUATIONS
MGGHAT: Elliptic PDE software with adaptive refinement, multigrid and high order finite elements p 1956 N94-21470
Two-level Schwartz methods for nonconforming finite elements and discontinuous coefficients p 1957 N94-21477
A multigrid algorithm for the cell-centered finite difference scheme p 1957 N94-21479
ELLIPTIC FUNCTIONS
MGD1M: A parallel multigrid code with a fast vectorized ILU-relaxation [CWI-NM-R9222] p 1930 N94-21077
Numerical multigrid software (MGD5M): A parallel multigrid code with a twisted ILLU-relaxation [CWI-NM-R9226] p 1916 N94-21611
ELLIPTICAL GALAXIES
Surface photometry of the shell galaxy NGC 2865 [ISBN-0-315-60441-7] p 2056 N94-22412
Visualizing the universe, part 2 p 2063 N94-22472
ELLIPTICITY
The connection between Venus' free obliquity and its CMB oblateness p 2139 N94-20896
EMBEDDED COMPUTER SYSTEMS
The University of Hawaii Institute for Astronomy CCD camera control system p 1828 N94-22489
EMBEDDING
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers [DE94-000741] p 1701 N94-20352
Writing instrument interfaces with xf/tktcl p 1925 N94-22480
EMBRITTLEMENT
Rapid heating tensile testing update: 304L stainless steel [DE93-018770] p 1688 N94-19942
Microscopic evaluation of low-temperature embrittlement in type 308 stainless steel welds [DE93-040266] p 1690 N94-20282
EMISSION
On dust emissions from the jovian system p 2141 N94-20909
EMISSION SPECTRA
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate p 2108 N94-20723
A study of carbonates, sulfates, and phosphates using thermal emission spectroscopy p 1686 N94-20868
Spatial distribution of near infrared line radiation in galactic nuclei measured with Fabry-Perot spectrometer FAST [MPE-239] p 2081 N94-21138
Comparative study of INPIStron and spark gap p 1995 N94-21293
Spectral characterization of lithographic sources [DE93-019941] p 1997 N94-21848
Temperature dependence of CsI(Tl) gamma ray excited scintillation characteristics [DE94-000836] p 2034 N94-22028
Radio galaxies and their environment [DE93-040851] p 2150 N94-22397
The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446
The ALEXIS data processing package: An IDL based system p 2047 N94-22453
Magnetic reconnection in emission nebulae in clusters of galaxies p 2010 N94-22700
EMISSIVITY
Polarimetric thermal emission from periodic water surfaces p 1728 N94-20445
Relationship of attenuation in a vegetation canopy to physical parameters of the canopy p 1729 N94-20450
Subduction on the margins of coronae on Venus: Evidence from radiothermal emissivity measurements p 2107 N94-20718
Thermal infrared remote sensing and Kirchhoff's law: 1. Laboratory measurements p 1685 N94-20733
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
Cloud properties from the analysis of AVHRR observations for FIRE 2 p 1872 N94-22300
Surface-induced brightness temperature variations and their effects on detecting thin cirrus clouds using IR emission channels in the 8-12 micrometer region p 1880 N94-22341
EMITTANCE
Initial performance of Los Alamos advanced free electron laser [DE93-040158] p 1814 N94-19828
Aperture determination of RHIC92 from randomly generated initial coordinates [DE93-040174] p 1978 N94-19945
Emittance measurement and modeling of the ALS 50 MeV LINAC to booster line [DE93-040116] p 1979 N94-20273
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos [DE93-040141] p 1816 N94-20277
Demonstration of ultraviolet lasing with a low energy electron beam [DE93-040192] p 1818 N94-21554
The preservation of low emittance flat beams [DE93-040964] p 1981 N94-21773
Detector noise statistics in the non-linear regime p 1748 N94-22526
EMITTERS
Layered thin-edged field-emitter device [AD-D015932] p 1751 N94-20350
Field emitter array RF amplifier development project, phase 1, option 1 [AD-A272567] p 1740 N94-21361
Silicon microelectronic field-emissive devices for advanced display technology [DE94-000397] p 1794 N94-22380
EMOTIONS
Female security as a general mobility condition [ISBN-3-79-831536-1] p 2039 N94-20153
ENCAPSULATING
Characterization studies of lower and non-TDI polyurethane encapsulants [DE93-041129] p 1698 N94-19857
END EFFECTORS
Spline screw payload fastening system [NASA-CASE-GSC-13454-1] p 1821 N94-20126
Bladder operated robotic joint [NASA-CASE-MFS-28682-1] p 1701 N94-20359
Counter-balanced, multiple cable construction crane [NASA-CASE-LAR-14565-1-CU] p 1822 N94-20369
Model-based automatic generation of grasping regions [NASA-TM-104785] p 1946 N94-21550
END-TO-END DATA SYSTEMS
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461
ENDOTHERMIC FUELS
Surface science and modeling studies of endothermic fuels catalysis [AD-A272650] p 1712 N94-21192
ENDOTHERMIC REACTIONS
Micrometeorite dynamic pyrometamorphism: Observation of a thermal gradient in iron-nickel sulfide p 2083 N94-20716
Surface science and modeling studies of endothermic fuels catalysis [AD-A272850] p 1712 N94-21192
ENERGETIC PARTICLES
Fast ion behavior during neutral beam injection in ATF [DE93-040267] p 1992 N94-20058
ENERGY ABSORPTION
Magnetic circular dichroism in x ray absorption and core-level photoemission [DE93-019381] p 1688 N94-19986
Fluid absorption solar energy receiver [NASA-CR-194688] p 1846 N94-20229
Ocular damage induced by ultrashort laser pulses [AD-A271859] p 1890 N94-20462
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas [DE94-000817] p 1820 N94-22585
ENERGY BUDGETS
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations [NASA-CR-194802] p 1837 N94-20951
Role of surface characteristics in urban meteorology and air quality [DE93-040929] p 1851 N94-21740
ENERGY CONSERVATION
Biofuels: Project summaries [DE93-010003] p 1712 N94-19984
Alternative refrigerants and refrigeration cycles for domestic refrigerators [DE93-040481] p 1714 N94-20099
Technology to prevent greenhouse effect gases [DE94-707420] p 1851 N94-20116
The energy performance of prototype holographic glazings [DE93-040451] p 1809 N94-21545
Advanced Energy Projects, FY 1993 [DE94-000539] p 1847 N94-21755
The FY1992 survey on multi-purpose dam and energy utilization system by the wind power generation eration [DE94-707408] p 1848 N94-22012
Present status of developing petroleum-substituting energy (EC) [DE94-707494] p 1849 N94-22030
Study on possibility of developing energy integration technology [DE94-714903] p 1849 N94-22052
Current situation in developing petroleum substituting energy (the United Kingdom) [DE94-714897] p 1713 N94-22091
ENERGY CONSUMPTION
Survey on chemical engineering technologies for the global environmental protection [DE94-714887] p 1852 N94-22044
Silicon microelectronic field-emissive devices for advanced display technology [DE94-000397] p 1794 N94-22380
ENERGY CONVERSION
Technology to prevent greenhouse effect gases [DE94-707420] p 1851 N94-20116
In-situ electrochemical surface science [AD-A265942] p 1680 N94-20330
Advanced Energy Projects, FY 1993 [DE94-000539] p 1847 N94-21755
Current situation of development of petroleum substituting energies (USA) [DE94-707492] p 1848 N94-22013
Study on possibility of developing energy integration technology [DE94-714903] p 1849 N94-22052
ENERGY CONVERSION EFFICIENCY
Development of high-efficiency CdTe solar cells [DE93-018206] p 1845 N94-19925
Generation of intense ultrashort x ray pulses [DE93-019607] p 1817 N94-21299
Effects of stimulated Raman scattering on light beam properties during high-power laser beam long-path propagation [AD-A273109] p 1818 N94-21509
Electromechanical battery research and development at the Lawrence Livermore National Laboratory [DE93-019159] p 1762 N94-21620
Thin-film CdTe and CuInSe2 photovoltaic technologies [DE93-018217] p 1848 N94-21827
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy [DE94-714886] p 1849 N94-22043
ENERGY DISSIPATION
Fluid absorption solar energy receiver [NASA-CR-194688] p 1846 N94-20229
Mixed voltage VLSI design p 1756 N94-21104
A thermodynamic analysis of propagating subcritical cracks with cohesive zones p 1834 N94-22611
ENERGY DISTRIBUTION
Ab initio potential energy surface for the H + OCS reaction [AD-A270577] p 1698 N94-19947
ENERGY GAPS (SOLID STATE)
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987
Spin-polaron theory of high-T(c) superconductivity. 3: Gap function and critical temperature [DE93-019198] p 2030 N94-21831
ENERGY LEVELS
Electron reactions in nonpolar liquids: Pressure effects [DE93-040328] p 1970 N94-19931
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys [DE93-018205] p 1688 N94-19985
ENERGY OF FORMATION
The Manson impact crater: Estimation of the energy of formation, possible size of the impacting asteroid or comet, and ejecta volume and mass p 2083 N94-20721
ENERGY POLICY
Biofuels: Project summaries [DE93-010003] p 1712 N94-19984
Technology to prevent greenhouse effect gases [DE94-707420] p 1851 N94-20116
Research in progress: FY 1992 [DE94-000410] p 1836 N94-20936
Present status of developing petroleum-substituting energy (EC) [DE94-707494] p 1849 N94-22030
Current situation in developing petroleum substituting energy (the United Kingdom) [DE94-714897] p 1713 N94-22091
ENERGY SOURCES
Biofuels: Project summaries [DE93-010003] p 1712 N94-19984
ENERGY SPECTRA
Energy gain spectroscopic study of Ar(q+)-Ar collisions at 40 qeV [DE93-040284] p 1970 N94-19871
Fast ion behavior during neutral beam injection in ATF [DE93-040267] p 1992 N94-20058

Characterization of electromagnetic fields in an extended chamber at the Short Pulse Experimental Electron Device (SPEED) simulator
[AD-A265955] p 1717 N94-20329
CERN-derived analysis of lunar radiation backgrounds
p 2080 N94-20880
Evaluation of the chemical composition of cosmic radiation in energy area of 10(exp 15) eV
[ETN-93-93682] p 2150 N94-21056
Comparison of higher order moment spectrum estimation techniques
[AD-A272967] p 1967 N94-21260
Semiconductors A(III)B(VI): Translation
[AD-A273064] p 2028 N94-21438
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21786

ENERGY STORAGE
Statement of David E. Baldwin, Associate Director for Energy, Lawrence Livermore National Laboratory and John C. Crawford, Vice President, Sandia National Laboratories, California, to the Subcommittee on Research and Development of the Committee on Environment and Public Works, US Senate, Washington, DC, 22 March 1993
[DE93-017991] p 1844 N94-19803
Energy storage and conversion in solid hydrogen
[AD-A271439] p 1845 N94-20086
Theoretical investigations of metastability and energy storage in molecular systems
[AD-A271849] p 1973 N94-20612
Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE93-019159] p 1762 N94-21620
Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE94-000391] p 1762 N94-21621
Advanced Energy Projects, FY 1993
[DE94-000539] p 1847 N94-21755
Study on possibility of developing energy integration technology
[DE94-714903] p 1849 N94-22052

ENERGY TECHNOLOGY
Statement of David E. Baldwin, Associate Director for Energy, Lawrence Livermore National Laboratory and John C. Crawford, Vice President, Sandia National Laboratories, California, to the Subcommittee on Research and Development of the Committee on Environment and Public Works, US Senate, Washington, DC, 22 March 1993
[DE93-017991] p 1844 N94-19803
Research in progress: FY 1992
[DE94-000410] p 1836 N94-20936
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562
Proceedings of the 1993 DOE/NREL Hydrogen Program Review
[DE93-018207] p 1847 N94-21616
Advanced Energy Projects, FY 1993
[DE94-000539] p 1847 N94-21755
Proceedings of the Seventh Annual Conference on Fossil Energy Materials
[DE94-001091] p 1848 N94-21823
Current situation of development of petroleum substituting energies (Canada)
[DE94-707493] p 1849 N94-22014
Survey on evaluation of energy technology contributing to preservation of the global environment. 2
[DE94-714884] p 1853 N94-22051
Study on possibility of developing energy integration technology
[DE94-714903] p 1849 N94-22052
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569

ENERGY TRANSFER
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910
Physical chemistry of energetic nitrogen compounds
[AD-A271819] p 1712 N94-20625
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations
[NASA-CR-194802] p 1837 N94-20951
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments)
[AD-A272918] p 1802 N94-21220
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941
Energy release at Alfvenic fronts in solar flares
p 2003 N94-22652

ENGINE DESIGN
Design of a state-space controller for an advanced gas turbine engine
[AD-A270859] p 1647 N94-20042
Cold-start minidiesel engine development
[AD-A271064] p 1823 N94-20567
Advanced transportation system studies, technical area 3. Alternate propulsion subsystem concepts: J-2S restart study
[NASA-CR-193874] p 1670 N94-21271
The 1992 Seals Flow Code Development Workshop
[NASA-CP-10124] p 1654 N94-21790
Navy GTE seal development activity
p 1655 N94-21794
Modeling bristle lift-off in idealized brush seal configurations p 1655 N94-21797
Specialized data analysis for the Space Shuttle Main Engine and diagnostic evaluation of advanced propulsion system components
[NASA-CR-194720] p 1656 N94-21813

ENGINE PARTS
Development of improved processing and evaluation methods for high reliability structural ceramics for advanced heat engine applications, phase 1
[DE93-040528] p 1702 N94-20481
The flow of gas across the piston-segments-cylinder interface
[ECL-92-40] p 1824 N94-20594
The 1992 Seals Flow Code Development Workshop
[NASA-CP-10124] p 1654 N94-21790
Brush seal bristle flexure and hard-rub characteristics
p 1654 N94-21791
Compliant seal development p 1655 N94-21795
Ceramic Technology Project
[DE94-001011] p 1707 N94-21822
Time-dependent reliability analysis of ceramic engine components p 1828 N94-22619

ENGINE TESTS
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments
[NASA-TM-106439] p 1713 N94-21760
Air Force brush seal programs p 1655 N94-21793

ENGINEERS
Improved approximate formulas for flux from cylindrical and rectangular sources
[DE93-011390] p 1742 N94-22268

ENGINES
Thrust expansion engine
[AD-D015896] p 1669 N94-20121

ENSTATITE
Micrometeorite dynamic pyrometamorphism: Nonstoichiometric clinoenstatite (CLEN)
p 2083 N94-20715
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20866

ENTHALPY
On one numerical approach to Stefan problem
[IPPCZ-330] p 1996 N94-21572

ENTRAINMENT
An analysis of pool surface deformation due to a plunging liquid jet
[AD-A272970] p 1802 N94-21261
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar
p 1874 N94-22310

ENTROPY
Image detection using edge extraction algorithms
[AD-A272439] p 1911 N94-21203
A thermodynamic theory of dynamic fragmentation
[DE93-019066] p 1833 N94-21916
DECONV-TOOL: An IDL based deconvolution software package p 1927 N94-22542
The relaxed state and entropy production due to the electric resistivity and viscosity of plasma
p 2010 N94-22696

ENVIRONMENT EFFECTS
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
ELF communications system ecological monitoring program
[AD-A272507] p 1740 N94-21412
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562
Modeling the response of ecosystems to CO2 and climate change
[DE94-000748] p 1852 N94-21787

ENVIRONMENT MANAGEMENT
EDMS microcomputer pollution model for civilian airports and Air Forces bases: User's guide, supplement A
[AD-A271596] p 1851 N94-20948
Present status of developing petroleum-substituting energy (EC)
[DE94-707494] p 1849 N94-22030
Current situation in developing petroleum substituting energy (the United Kingdom)
[DE94-714897] p 1713 N94-22091
Implementation of a laboratory information management system for environmental regulatory analyses
[DE94-001198] p 2046 N94-22407

ENVIRONMENT MODELS
EDMS microcomputer pollution model for civilian airports and Air Forces bases: User's guide, supplement A
[AD-A271596] p 1851 N94-20948

ENVIRONMENT PROTECTION
Current status of environmental, health, and safety issues of nickel metal-hydride batteries for electric vehicles
[DE93-017079] p 1748 N94-19902
Parameters affecting hydrogen chloride measurements
[AD-A271326] p 1851 N94-20025
Alternative refrigerants and refrigeration cycles for domestic refrigerators
[DE93-040481] p 1714 N94-20099
Technology to prevent greenhouse effect gases
[DE94-707420] p 1851 N94-20116
Durability of thermal control and environmental protective materials for the SSRMS in simulated LEO environment p 1663 N94-21392
Present status of developing petroleum-substituting energy (EC)
[DE94-707494] p 1849 N94-22030
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569

ENVIRONMENT SIMULATION
Apparatus and method for measuring subject work rate on an exercise device
[NASA-CASE-MSC-21752-1] p 1895 N94-20194

ENVIRONMENT SIMULATORS
Complex-2: Low Earth orbital environment simulation facility for materials durability evaluation
p 1653 N94-21370

ENVIRONMENTAL ENGINEERING
Investigation on construction of the database system for research and development of the global environment industry technology
[DE94-714890] p 1853 N94-22090
Survey on utilization of database for research and development of global environmental industry technology
[DE94-714891] p 1853 N94-22259

ENVIRONMENTAL MONITORING
Research in progress: FY 1992
[DE94-000410] p 1836 N94-20936
The 7th Brazilian Remote Sensing Symposium, volume4 p 1840 N94-20965
SIMA: An integrated environmental monitoring system
p 1840 N94-20967
Low-cost, dual-use platforms for environmental sensing, phase 1
[AD-A272951] p 1646 N94-21246
Long-Term Monitoring of Global Climate Forcings and Feedbacks
[NASA-CP-3234] p 1868 N94-21639
Monitoring issues from a modeling perspective
p 1868 N94-21640
Climate forcings and feedbacks p 1869 N94-21641
Accuracy requirements --- for monitoring of climate changes p 1869 N94-21642
Climsat rationale p 1869 N94-21643
Michelson Interferometer (MINT)
p 1813 N94-21646
Orbit and sampling requirements: TRMM experience
p 1870 N94-21647
Satellite orbit and data sampling requirements
p 1870 N94-21648
Implementation of a laboratory information management system for environmental regulatory analyses
[DE94-001198] p 2046 N94-22407

ENVIRONMENTAL QUALITY
Technology to prevent greenhouse effect gases
[DE94-707420] p 1851 N94-20116
SIMA: An integrated environmental monitoring system
p 1840 N94-20967

ENVIRONMENTAL SURVEYS
Ground wave emergency network. Final operational capability. Environmental assessment for south central Montana relay node, site no. RN8C925MT
[AD-A267795] p 1716 N94-19964
Interpretation of Ground Penetrating Radar data at the Hanford Site, Richland, Washington
[DE93-040409] p 1743 N94-22557

ENVIRONMENTAL TESTS
Proton radiation testing of an 18 bit A/D converter p 1755 N94-21096
Fifth International Symposium on Materials in a Space Environment
[ISBN-2-85-428293-0] p 1659 N94-21367
Complex-2: Low Earth orbital environment simulation facility for materials durability evaluation p 1653 N94-21370
Space environmental effects on polymer matrix composites: The UTIAS/LDEF experiment p 1660 N94-21373
Aragatz project samples experiment/MAPOL (polymer materials) experiment: Postflight expert evaluation p 1660 N94-21376
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377
Effect of geostationary environment constituents on secondary electron emission rates p 1661 N94-21382
Simulated space environmental effects on some experimental high performance polymers p 1662 N94-21385
Fast oxygen atom studies related to low Earth orbit activities p 1663 N94-21395

ENZYMES
Immunocytochemical localization of glutamic acid decarboxylase (GAD) and substance P in neural areas mediating motion-induced emesis: Effects of vagal stimulation on GAD immunoreactivity p 1887 N94-21909

EPIDERMIS
Physiologically based pharmacokinetic modelling of percutaneously absorbed dibromomethane utilizing multiple dermal sub-compartments
[AD-A271106] p 1889 N94-19981

EPITAXY
High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Ti(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835
Common Themes and Mechanisms of Epitaxial Growth, volume 312 — Materials Research Society symposium proceedings
[AD-A270513] p 2013 N94-19967
ALE project
[AD-A271080] p 2014 N94-19980
Process for the homoepitaxial growth of single-crystal silicon carbide films on silicon carbide wafers
[NASA-CASE-LEW-15223-1] p 2017 N94-20381
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575
Growth, characterization and device development in monocrystalline diamond films
[AD-A272715] p 2026 N94-21190
Structure and morphology of Pd overlayers on epitaxial SnO2 films studies with the atomic force microscope
[AD-A271827] p 2028 N94-21458
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394

EPOXY MATRIX COMPOSITES
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Fiber reinforced thermosetting resin composition with coated fibers for improved toughness
[CA-PATENT-1,306,320] p 1674 N94-21040

EPOXY RESINS
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Thermal stability relationships between PMR-15 resin and its composites
[NASA-TM-106285] p 1675 N94-21488
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008

EQUATIONS OF MOTION
Rockets: Physical science teacher's guide with activities
[NASA-EP-291] p 1669 N94-20226
Microscopic and macroscopic dynamics
[DE93-019576] p 1937 N94-22042

EQUATIONS OF STATE
Further examinations on the thermodynamic stability of the Mie-Grueneisen equation of state
[AD-A270526] p 2037 N94-19631
An equation of state for shock in homogeneous materials and comparison to shock data
[AD-A271436] p 1829 N94-19881
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
SPH modelling of energy partitioning during impacts on Venus p 2124 N94-20809
Multilevel methods for transport equations in diffusive regimes p 1955 N94-21467
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546

EQUATORIAL REGIONS
Volcanic rises on Venus: Geology, formation, and sequence of evolution p 2113 N94-20755
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A272685] p 1857 N94-21189

EQUILIBRIUM FLOW
Cavitation modelling p 1668 N94-20079

EQUIVALENCE
The accuracy-through-order and the equivalence properties in the algebraic approximant
[DE93-040188] p 1960 N94-21946

EQUIVALENT CIRCUITS
A comprehensive theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20500
A theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20502

ERBIUM
Resonantly pumped, erbium-doped, GSGG, 2.8 micron, solid state laser with energy recycling and high slope efficiency
[AD-D015920] p 1815 N94-20060

EROSION
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647
Geologic mapping of Harmakhis and Reull Valles region, Mars: Evidence for multiple resurfacing and drainage events p 1844 N94-20705
Mars: New evidence for origin of some Valles Marineris layered deposits p 2112 N94-20748
Parabolic features and the erosion rate on Venus p 2122 N94-20801
Numerical modeling of impact erosion of atmospheres: Preliminary results p 2131 N94-20847
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676
Performance of carbon-based hot frit substrates
[DE94-000509] p 1676 N94-21754

ERROR ANALYSIS
Comparison of a distributed Kalman filter versus a centralized Kalman filter with fault detection considerations
[AD-A270713] p 1903 N94-19969
Some VTOL head-up display drive-law problems and solutions
[NASA-TM-104027] p 1635 N94-20035
Techniques for reducing error in the calorimetric measurement of low wattage items
[DE93-018472] p 1807 N94-20114
Threshold computation and cryptographic security
[TR-443] p 1907 N94-20536
A retrieval error analysis technique for passive infrared atmospheric sounders
[AD-A272618] p 1867 N94-21212
Two visually meaningful correlation measures for comparing calculated and measured response histories
[AD-A273044] p 1964 N94-21322
Links between N-modular redundancy and the theory of error-correcting codes p 1765 N94-21713
A methodology for quantifying uncertainty in models
[DE93-040154] p 1916 N94-21747
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761
Application guide for universal source encoding for space
[NASA-TP-3441] p 1741 N94-21783
MLS signal-in-space category 3 landing hazard analysis p 1644 N94-22134
Application of scattering by arrays of cylinders to MLS signal propagation error estimation p 1644 N94-22135

ERROR CORRECTING CODES
Links between N-modular redundancy and the theory of error-correcting codes p 1765 N94-21713
VLSI design of a bit serial parallel processing 4 extender chip for M-path convolutional decoding p 1775 N94-22132
The Schur Berlekamp-Massey algorithm is parallelizable p 1784 N94-22191
Some best rate 1/p and rate (p-1)/p systematic quasi-cyclic codes over GF(3) and GF(4) p 1792 N94-22243
On the capacity of (T,U) permutation decoding method p 1792 N94-22245

ERROR CORRECTING DEVICES
Micro-rollback and self-recovery synthesis p 1765 N94-21707
A new class of multi-function two-rail totally self-checking basic building blocks p 1788 N94-22215

ERROR DETECTION CODES
Space qualified high speed Reed Solomon encoder p 1754 N94-21088
The Schur Berlekamp-Massey algorithm is parallelizable p 1784 N94-22191
ARQ on fading channels p 1747 N94-22242

ERROR SIGNALS
Tunable laser frequency stabilizing system
[AD-D015904] p 1815 N94-20055
Silicon retina for optical tracking systems p 1755 N94-21098

ERRORS
Literature review of the errors-in-variables approach to the problem of system identification
[AD-A271098] p 1949 N94-19907
Feedback controlled optics with wavefront compensation
[NASA-CASE-NPO-18194-1-CU] p 1985 N94-20305
Snow cover measurements and areal assessment of precipitation and soil moisture
[WMO-749] p 1841 N94-21068
Two visually meaningful correlation measures for comparing calculated and measured response histories
[AD-A273044] p 1964 N94-21322
Toward a new method of decoding algebraic codes using Groebner bases
[AD-A273089] p 1959 N94-21524
Schematic driven layout of Reed Solomon encoders p 1766 N94-21722
Influence of geoid model uncertainty on the determination of ocean circulation with satellite altimetry
[PB93-219301] p 1842 N94-22097
Time-dependent grid adaptation for meshes of triangles and tetrahedra p 1920 N94-22369
Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373
HST PSF simulation using Tiny Tim p 1926 N94-22498

ERS-1 (ESA SATELLITE)
Offshore decision support system: ERS-1 pilot project WAVEWATCH
[BCRS-92-09] p 1865 N94-20532

ESCAPE VELOCITY
Volatile loss from accreting icy protoplanets p 2084 N94-20793
Variety in planetary systems p 2086 N94-20871

ESCARPMENTS
Cryoplanation terraces of interior and western Alaska p 2091 N94-20396
Geologic mapping of Harmakhis and Reull Valles region, Mars: Evidence for multiple resurfacing and drainage events p 1844 N94-20705
Ridge belt-related scarps and troughs: Compressional crustal bending on Venus p 2106 N94-20711
Comparison of flank modification on Ascraeus and Arsia Montes volcanoes, Mars p 2140 N94-20903

ESTIMATES
Parameter estimation with cost function of second order in output-error-problem
[DLR-FB-92-38] p 1964 N94-21139
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457

ESTIMATING
An investigation into the integration of meter-level range and millimeter-level phase data using a multimode stimulation for optimal filter estimation software package
[AD-A267955] p 1751 N94-20483
The Manson impact crater: Estimation of the energy of formation, possible size of the impacting asteroid or comet, and ejecta volume and mass p 2083 N94-20721
On estimation and testing in Poisson regression models with over-dispersion
[MEMO-1083] p 1963 N94-21076
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265

ETALONS
Multiorder etalon sounder (MOES) development and test for balloon experiment
[NASA-CR-194730] p 1859 N94-22026
ETCHING
Substrate recovery of Mo-Si multilayer coated optics
[DE93-019610] p 1698 N94-19810
Process for the homoepitaxial growth of single-crystal silicon carbide films on silicon carbide wafers
[NASA-CASE-LEW-15223-1] p 2017 N94-20381
Method for anisotropic etching in the manufacture of semiconductor devices
[NASA-CASE-MSC-21631-1] p 1993 N94-20491
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875
Particle behavior in an ECR plasma etch tool
[DE93-040343] p 1996 N94-21769
Micromachined actuator and sensor capabilities at the Microelectronics Development Laboratory
[DE93-019417] p 1769 N94-21918
ETHERS
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021
ETHYL ALCOHOL
Fuel processing requirements and techniques for fuel cell propulsion power
[DE93-019516] p 1750 N94-20257
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947
ETHYL COMPOUNDS
The 13C-NMR spectra of poly (4-((2-(acryloyloxy) ethyl) ethyl amino)- 4-nitroazobenzene-co-methyl methacrylate)
[AD-A273016] p 1705 N94-21238
Stress-induced cracking of fluorocarbon rubber MTL-0002 after exposure to DS-2
[AD-A271753] p 1705 N94-21302
ETHYLENE
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043
EUCLIDEAN GEOMETRY
Representation and recognition with algebraic invariants and geometric constraint models
[AD-A271395] p 1949 N94-19838
Determining the distance to the perfect matching polytope of a bipartite graph
[RR-895-M] p 1950 N94-20161
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385
EULER EQUATIONS OF MOTION
Distributed loss model: Application to a spatial turbopump inducer p 1668 N94-20078
Three dimensional unsteady flow calculations in radial components p 1669 N94-20080
Shape optimization governed by the Euler equations using an adjoint method
[NASA-CR-191555] p 1950 N94-20092
Looking for O(N) Navier-Stokes solutions on non-structured meshes p 1806 N94-21471
The block adaptive multigrid method applied to the solution of the Euler equations p 1641 N94-21472
A multigrid method for steady Euler equations on unstructured adaptive grids p 1957 N94-21476
Unstructured multigrid through agglomeration p 1958 N94-21484
Multigrid properties of upwind-biased data reconstructions p 1806 N94-21485
EUROPA
Photogeological analysis of Europan tectonic features p 2129 N94-20838
EUROPE
Rapid estimates of crop production using remote sensing: European experience p 1840 N94-20969
Present status of developing petroleum-substituting energy (EC)
[DE94-707494] p 1849 N94-22030
EUROPEAN SPACE AGENCY
Power standard
[ESA-PSS-02-10-VOL-1-ISSUE-] p 1669 N94-20241
EVALUATION
Evaluation of plasma-deposited protective coatings for spacecraft applications p 1663 N94-21394
EVAPORATION
Method for controlling protein crystallization
[NASA-CASE-MFS-28688-1] p 2017 N94-20528
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
Diffusion-controlled magnesium isotopic fractionation of a single crystal forsterite evaporated from the solid state p 1686 N94-20855
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment
[AD-A272851] p 1802 N94-21193
Modeling of outgassing and matrix decomposition in carbon-phenolic composites
[NASA-CR-194741] p 1676 N94-21743
EVAPORATION RATE
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment
[AD-A272851] p 1802 N94-21193
EVAPOTRANSPIRATION
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations
[NASA-CR-194802] p 1837 N94-20951
EXCIMER LASERS
Laser amplifier developments at Mercury
[DE93-040103] p 1814 N94-19867
EXCIMERS
Lateral distribution of lipids in membranes at high pressure
[AD-A271183] p 1700 N94-20299
EXCITATION
Optical fiber sensor having an active core
[NASA-CASE-LAR-14607-1-SB] p 1986 N94-20586
Derivation of a model of the exciter of a brushless synchronous machine
[EUT-92-E-258] p 1761 N94-21538
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
EXCITONS
Effect of exciton localization and delocalization on magnetic-field-dependent photoluminescence linewidths in semiconductors
[DE93-018860] p 1748 N94-19884
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
Dephasing processes in III-V semiconductors
[AD-A271677] p 2028 N94-21362
EXCLUSION
Fast mutual exclusion, even with contention
[AD-A272947] p 1912 N94-21227
EXERCISE PHYSIOLOGY
Maximum team lifting capacity as a function of team size
[AD-A271642] p 1892 N94-21036
EXHAUST EMISSION
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies
[DE93-041130] p 1826 N94-21938
Survey on evaluation of energy technology contributing to preservation of the global environment. 2
[DE94-714884] p 1853 N94-22051
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391
EXHAUST GASES
Dual-beam multiple wavelength light transmittance measurement for particle sizing in rocket motor plumes
[AD-A272491] p 1670 N94-21208
Survey on evaluation of energy technology contributing to preservation of the global environment. 2
[DE94-714884] p 1853 N94-22051
EXHAUST VELOCITY
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments
[NASA-TM-106439] p 1713 N94-21760
EXOBIOLOGY
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 383)
[NASA-SP-7011(383)] p 1892 N94-21288
EXOSAT SATELLITE
The EXOSAT operational experience
[ESA-STM-248] p 1657 N94-20235
The EXOSAT database and archive p 2048 N94-22521
EXOTHERMIC REACTIONS
Shock wave interactions with exothermic mixtures
[AD-A271149] p 1829 N94-19836
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
EXPERIMENT DESIGN
German space experiments on Spacelab D-2 and Eureca-1 to investigate atomic oxygen interaction with materials p 1662 N94-21390
EXPERT SYSTEMS
An expert system executive for automated assembly of large space truss structures
[NASA-TM-4487] p 1939 N94-20089
Explainable expert systems: A research program in information processing
[NASA-CR-193422] p 2041 N94-20133
An expert system shell for inferring vegetation characteristics
[NASA-CR-189318] p 1837 N94-20284
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session)
[AD-A272125] p 1942 N94-20573
Design of a computer assisted tool for object oriented acquisition, modeling and simulation of knowledge structure
[ETN-93-94183] p 1910 N94-21152
Lecture notes in artificial intelligence 689: The 7th International Symposium on Methodologies for Intelligent Symposium (ISMIS 1993)
[AD-A271768] p 1944 N94-21162
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416
Experiments in knowledge refinement for a large rule-based system
[AD-A272055] p 1809 N94-21445
Reducing the cognitive workload: Trouble managing power systems
[NASA-TM-106413] p 1714 N94-21564
Design and implementation of a status at a glance user interface for a power distribution expert system
[NASA-TM-106412] p 1715 N94-21589
The program system for the diagnostics of strains and fracture prediction of solids p 1836 N94-22065
An expert system of econometric analysis p 2052 N94-22081
EXPLORER 2 SATELLITE
Dynamics Explorer 2: Continued FPI and NACS instrument data analysis and associated scientific activity at the University of Michigan
[NASA-CR-194689] p 1657 N94-20173
EXPLOSIONS
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
EXPOSURE
Studies of neural and cognitive function in subjects exposed to the marine-air interface, phases 1 and 2
[AD-A272282] p 1891 N94-20624
Development and demonstration of a personal monitoring system for exposure to hydrogen fluoride
[DE93-041273] p 1891 N94-20935
U.S. Tag for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock: Minutes of the accredited standards committee on bioacoustics, S3
[AD-A273014] p 1897 N94-21309
EXPULSION
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177
EXTERNAL COMBUSTION ENGINES
Heat regenerative external combustion engine
[AD-D015965] p 1824 N94-21274
EXTRACTION
Control and readout of the extraction septum of AmPS
[DIGEL-1993-2] p 1979 N94-20117
Observation of reflected waves on the SABRE positive polarity inductive adder MITL
[DE93-019413] p 1980 N94-20295
One- and multi-component theories of mixtures
[DE93-040543] p 1966 N94-21511
EXTRATERRESTRIAL ENVIRONMENTS
Evaluation of plasma-deposited protective coatings for spacecraft applications p 1663 N94-21394
EXTRATERRESTRIAL MATTER
The sand bag model of the dispersion of the cosmic body in the atmosphere p 2084 N94-20823
EXTRATERRESTRIAL RADIATION
Spaceflight Radiation Health program at the Lyndon B. Johnson Space Center
[NASA-TM-104782] p 1893 N94-21863
Jets associated with active galactic nuclei p 2000 N94-22631
EXTRAVEHICULAR ACTIVITY
Loads produced by a suited subject performing tool tasks without the use of foot restraints
[NASA-TP-3424] p 1896 N94-20606
EVA tools and equipment reference book
[NASA-TM-109350] p 1897 N94-21812
EXTREME ULTRAVIOLET EXPLORER SATELLITE
The EUVE proposal database and scheduling system p 2047 N94-22459
The extreme ultraviolet explorer archive p 2047 N94-22468
Quality control of EUVE databases p 2047 N94-22490
EXTREME ULTRAVIOLET RADIATION
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
ROSAT data analysis with EXSAS p 2080 N94-22555
A comparison of a simple model of EUV dayglow with Viking data
[ISBN-0-315-83258-4] p 1861 N94-22574

EXTREMELY HIGH FREQUENCIES
Mobile antenna development at JPL
p 1731 N94-20457
A compact, portable EHF/SHF antenna for advanced SCAMP
[AD-A272614] p 1739 N94-21211
Characterization and modelling of extremely high frequency enclosures p 1782 N94-22177

EXTREMELY LOW RADIO FREQUENCIES
ELF communications system ecological monitoring program
[AD-A272507] p 1740 N94-21412

EXTRUDING
The mechanical property data base from an Air Force/industry cooperative test program on advanced aluminum alloys: 2091 sheet, plate, and 8090 extrusion
[AD-A273091] p 1692 N94-21525
Evaluation of the fabricability of advanced iron aluminide-clad austenitic stainless steel tubing
[DE93-040598] p 1693 N94-21771
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948

EYE (ANATOMY)
Analysis of health status from preliminary physical examination of flight academy applicants
[AD-A267759] p 1889 N94-19962
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462

EYE MOVEMENTS
Techniques used for the analysis of oculometer eye-scanning data obtained from an air traffic control display
[NASA-CR-191559] p 1643 N94-21629

F

F REGION
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A272685] p 1857 N94-21189

F-18 AIRCRAFT
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914

FABRICATION
Process to fabricate thick coplanar microwave electrode structures
[AD-D015913] p 1748 N94-19892
Fabrication of stable large-area thin-film CdTe photovoltaic modules
[DE93-018204] p 1845 N94-20095
Improved ceramic slip casting technique --- application to aircraft model fabrication
[NASA-CASE-LAR-14471-1] p 1702 N94-20377
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 1823 N94-20379
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943
Long range fast tool servo
[AD-A271614] p 1761 N94-21257
Design, fabrication and test of a vertical attitude takeoff and landing unmanned air vehicle
[AD-A273003] p 1646 N94-21283
Thermostructural material composites for space applications p 1664 N94-21398
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416
Fabrication of porous ceramics by freeze-casting/freeze-drying
[PB93-202513] p 1705 N94-21425
Materials Science and Engineering
[DE93-040497] p 1675 N94-21530
A novel semiconductor process for optoelectronic applications on silicon substrate p 1988 N94-21595
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1647 N94-21614
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617
Fabrication of amorphous diamond films
[DE94-000404] p 2032 N94-21960
High temperature size selective membranes
[DE93-019865] p 1709 N94-21982
Variable-field permanent magnet dipole
[DE94-000800] p 1820 N94-22020
Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022
Silicon micromachined threshold accelerometers
p 1778 N94-22151

FABRY-PEROT INTERFEROMETERS
Remote sounding of tropospheric minor constituents
[NASA-CR-194265] p 1855 N94-20132
Multiorder etalon sounder (MOES) development and test for balloon experiment
[NASA-CR-194730] p 1859 N94-22026
Demodulation of a fiber Fabry-Perot strain rosette using white light interferometry
[ISBN-0-315-83427-7] p 1990 N94-22579
Phase demodulation of interferometric fiber-optic sensors
[ISBN-0-315-83425-0] p 1991 N94-22581

FABRY-PEROT SPECTROMETERS
Spatial distribution of near infrared line radiation in galactic nuclei measured with Fabry-Perot spectrometer FAST
[MPE-239] p 2081 N94-21138

FACE CENTERED CUBIC LATTICES
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827
Stability of the face-centered-cubic phase of heavy rare gas solids
[DE93-019949] p 1679 N94-20319
Molecular dynamics modeling of the mechanical behavior of metallic multilayers
[DE93-019947] p 1694 N94-21921
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394

FACTOR ANALYSIS
Factor analysis as a tool for spectral line component separation 21cm emission in the direction of L1780
p 1965 N94-22536

FACTORIZATION
On the numerical stability of quasi-definite systems
[DE93-019404] p 1950 N94-20217

FAILURE
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910

FAILURE ANALYSIS
The Seventh International Conference on Composite Structures, volume 25, numbers 1-4
[AD-A269961] p 1672 N94-20031
Efficient chip signature checking for diagnosing boundary scan systems
[RR-901-I] p 1749 N94-20166
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Advanced failure analysis laboratory equipment networking
[DE93-019070] p 1916 N94-21633
Localization of pellicle-induced open contacts using charge-induced voltage alteration
[DE93-019407] p 1762 N94-21636
Micro-rollback and self-recovery synthesis
p 1765 N94-21707
Design and test of field programmable gate arrays in space applications p 1765 N94-21710
Brush seal bristle flexure and hard-rub characteristics
p 1654 N94-21791
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo)
[DE93-041320] p 1694 N94-21943
A robust quality control system for GPS navigation and kinematic positioning
[ISBN-0-315-83148-0] p 1644 N94-22427
Computational Methods for Failure Analysis and Life Prediction
[NASA-CP-3230] p 1833 N94-22608
Nonlinear and progressive failure aspects of transport composite fuselage damage tolerance
p 1834 N94-22609
Modeling of failure and response to laminated composites subjected to in-plane loads
p 1834 N94-22612
An overview of computational simulation methods for composite structures failure and life analysis
p 1835 N94-22617
NASA Langley developments in response calculations needed for failure and life prediction
p 1836 N94-22621
Delamination, durability, and damage tolerance of laminated composite materials p 1678 N94-22622

FAILURE MODES
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373
A study of the structural stability of an unbalanced sandwich composite configuration
[AD-A272496] p 1675 N94-21431
Magnetic force microscopy/current contrast imaging: A new technique for internal current probing of IC's
[DE93-040754] p 1761 N94-21532
Modeling of failure and response to laminated composites subjected to in-plane loads
p 1834 N94-22612
Recent advances in computational structural reliability analysis methods p 1828 N94-22616

FAINT OBJECT CAMERA
Restoration of HST images with missing data
p 2057 N94-22439

FALSE ALARMS
Asymptotics of the GLRT for the disorder problem in diffusion processes
[INRIA-RR-1735] p 1951 N94-20227
Army aircraft fire-detection systems operation and reliability
[AD-A271327] p 1641 N94-20912
CFAR processing for airborne pulse-Doppler radars
p 1745 N94-22142

FAR FIELDS
Radiation of plasma wave wings through an electrodynamic tether satellite system with any sharp angle geometry
[REPT-85] p 1993 N94-20156
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408
An efficient formulation of the coupled finite element-integral equation technique for solving large 3D scattering problems p 1725 N94-20436

FAR INFRARED RADIATION
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528

FAR ULTRAVIOLET RADIATION
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
National Synchrotron Light Source user's manual: Guide to the VUV and x ray beamlines
[DE93-019564] p 2015 N94-20260

FARADAY EFFECT
A new innovative instrument for space plasma instrumentation
[NASA-CR-194736] p 1666 N94-21780

FARM CROPS
Drought early warning system for crop production
p 1840 N94-20966
Rapid estimates of crop production using remote sensing: European experience p 1840 N94-20969
Using NDVI/AVHRR data for crop monitoring and forecasting in South Italy p 1841 N94-20970

FAST FOURIER TRANSFORMATIONS
SIMBAT theoretical manual
[AD-A271063] p 1882 N94-19979
A comparative study of an ABC and an artificial absorber for truncating finite element meshes
[NASA-CR-194275] p 1716 N94-20160
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-194724] p 1897 N94-20336
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164
Continuous-time discretized-space approach to modeling short-pulse propagation and scattering
[PB93-215259] p 1742 N94-22347

FASTENERS
Self locking set screw
[AD-D015969] p 1824 N94-21277
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504

FATIGUE (MATERIALS)
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions
[AD-A272658] p 1691 N94-21188
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines
[AD-A272998] p 1648 N94-21268

The mechanical property data base from an Air Force/industry cooperative test program on advanced aluminum alloys: 2091 sheet, plate, and 8090 extrusion
[AD-A273091] p 1692 N94-21525
Benefits of thread rolling process to the stress corrosion cracking and fatigue resistance of high strength fasteners
[DE93-040438] p 1833 N94-22001

FATIGUE LIFE
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
Adhesive bonded joint with improved cyclic fatigue life for alumina-ceramic cylinders and hemispheres: Fourth generation housings
[AD-A273061] p 1831 N94-21310
Columbus PMP Critical Technologies Program: Approach for materials life time prediction
p 1664 N94-21402
Brief summary of the evolution of high-temperature creep-fatigue life prediction models for crack initiation
p 1834 N94-22613
A high temperature fatigue life prediction computer code based on the total strain version of StrainRange Partitioning (SRP) p 1835 N94-22620

FATIGUE TESTS
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504

FAULT DETECTION
Comparison of a distributed Kalman filter versus a centralized Kalman filter with fault detection considerations
[AD-A270713] p 1903 N94-19969
Correct CMOS IC defect models for quality testing
p 1755 N94-21093
Fault detection in digital and analog circuits using an i(DD) temporal analysis technique p 1757 N94-21106
Test pattern generation for ILA sequential circuits
p 1757 N94-21107
Detection of CMOS bridging faults using minimal stuck-at fault test sets p 1757 N94-21110
Model-based reasoning for power system management using KATE and the SSM/PMAD
[NASA-CR-194716] p 1671 N94-21882
A robust quality control system for GPS navigation and kinematic positioning
[ISBN-0-315-83148-0] p 1644 N94-22427

FAULT TOLERANCE
Robust, high-speed network design for large-scale multiprocessing
[AD-A271003] p 1716 N94-19977
Lightweight recoverable virtual memory
[AD-A270576] p 1898 N94-20107
Design considerations for a fiber optic communications network for power systems
[DE93-018404] p 1984 N94-20179
Self-organization via active exploration in robotic applications. Phase 2: Hybrid hardware prototype
[NASA-CR-194723] p 1939 N94-20212
Design methods for fault-tolerant finite state machines
p 1758 N94-21120
Fault tolerant real-time systems
[AD-A272878] p 1899 N94-21195
Real-time fault tolerant computer systems
[AD-A272909] p 1899 N94-21230
Promises and fault-tolerant database access
[TR-447] p 2043 N94-21287
Links between N-modular redundancy and the theory of error-correcting codes p 1765 N94-21713
Model-based reasoning for power system management using KATE and the SSM/PMAD
[NASA-CR-194716] p 1671 N94-21882
A new class of multi-function two-rail totally self-checking basic building blocks p 1788 N94-22215
Fault tolerance for real-time multiprocessor operating systems p 1788 N94-22216
Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373
Towards the formal verification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191466] p 1937 N94-22414

FEASIBILITY ANALYSIS
Performance evaluation of video on ethernet
[DE93-040696] p 1936 N94-21749
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies
[DE93-041130] p 1826 N94-21938

FEDERAL BUDGETS
The future of remote sensing from space: Civilian satellite systems and applications
[OTA-ISC-558] p 1837 N94-20209
NASA procurement report, FY 1992
[NASA-TM-109390] p 2040 N94-21623

FEEDBACK
Measurement and computation of the higher order modes of the ALS 500 MHz accelerating cavities
[DE93-019256] p 1980 N94-20292
Teleoperation with virtual force feedback
[DE93-019406] p 1942 N94-20293
Accuracy requirements — for monitoring of climate changes p 1869 N94-21642
Climsat rationale p 1869 N94-21643
A software environment for the exploitation of the MAR image sensor p 1785 N94-22200
General asymmetric neural networks and structure design by genetic algorithms: A learning rule for temporal patterns
[DE94-001254] p 1947 N94-22563

FEEDBACK CONTROL
Feedback controlled optics with wavefront compensation
[NASA-CASE-NPO-18194-1-CU] p 1985 N94-20305
Actively controlled shaft seals for aerospace applications
[NASA-CR-194759] p 1823 N94-20538
Diagnostics and methods for real-time laser microchemistry
[AD-A270871] p 1680 N94-20566
On-board closed-loop congestion control for satellite based packet switching networks
[NASA-TM-106446] p 1656 N94-21581

FEEDFORWARD CONTROL
A comparative robustness evaluation of feedforward neurofilters
[NASA-TM-106440] p 1650 N94-21742

FELDSPARS
Post-igneous redistribution of components in eucrites
p 1685 N94-20684
SCR neon and argon in Kapoeta feldspar: Evidence for an active ancient Sun p 2106 N94-20712
Age and thermochronology of K-feldspars from the Manson impact Structure p 1863 N94-20899
Diffuse reflectance spectra of orthopyroxene, olivine, and plagioclase as a function of composition and structure p 2087 N94-20906

FELSITE
Chronology of lunar granite 12033,576: Resetting of Rb-Sr and K-Ca isochrons p 2115 N94-20763

FEMALES
Female security as a general mobility condition
[ISBN-3-79-831536-1] p 2039 N94-20153

FERMI SURFACES
Fermiology and De Haas-Van Alphen effect of beta-(ET)2IBr2
[DE93-019523] p 2011 N94-19807
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario
[DE94-001183] p 2032 N94-21972
Positron annihilation study of Sr Doping in La(2-x)Sr(x)CuO4
[DE94-000307] p 2036 N94-22594

FERMIONS
Temperature dependence of 4f PES features and hole occupancy in ytterbium heavy fermions
[DE93-040131] p 1691 N94-20321
F-spin concept and g-bosons in the interceding boson model
[ETN-93-93607] p 1973 N94-21136
Photoemission and the electronic properties of heavy fermions: Limitations of the Kondo model
[DE93-040191] p 1974 N94-21553
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385

FERROELECTRICITY
A novel method for characterizing the electrical Priorities of lead Zirconate Titanate (PZT) ferroelectric films and memory devices
[AD-A270463] p 2013 N94-19966
Proceedings of the 8th International Symposium on Applications of Ferroelectrics
[AD-A270679] p 1749 N94-20012
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416

FERROMAGNETISM
A microscopic theory of quantum optics and new photon-locked bistable states
[AD-A271250] p 1983 N94-19901

FEYNMAN DIAGRAMS
A formulation of quantum statistical mechanics based on the Feynman path centroid density 1: Equilibrium properties
[AD-A272809] p 2037 N94-21171

FIBER COMPOSITES
The Seventh International Conference on Composite Structures, volume 25, numbers 1-4
[AD-A269961] p 1672 N94-20031
Strengthening of NiAl matrix composites
[AD-A271491] p 1674 N94-20550
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Fiber reinforced thermosetting resin composition with coated fibers for improved toughness
[CA-PATENT-1,306,320] p 1674 N94-21040
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777
An embedded fibre optic for damage growth monitoring in Kevlar composites
[ISBN-0-315-83501-X] p 1677 N94-22586

FIBER OPTICS
Optical signal processing
[AD-A271036] p 1983 N94-20013
Fiber optic Michelson sensor and arrays with passive elimination of polarization fading and source feedback isolation
[AD-D015944] p 1984 N94-20065
Thermal dilation fiber optical flow sensor
[AD-D015926] p 1797 N94-20094
Design considerations for a fiber optic communications network for power systems
[DE93-018404] p 1984 N94-20179
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297
Plasma chemical vapor deposition of halide glasses
[AD-D015933] p 1701 N94-20331
Wide-angle imaging system with fiberoptic components providing angle-dependent virtual material stops
[NASA-CASE-NPO-18146-1-CU] p 1986 N94-20345
Disengagable adapter for an optical fiber connector
[AD-D015959] p 1822 N94-20356
Understanding Open Systems Interconnection (OSI)
[AD-A271877] p 1929 N94-20472
Novel N x N integrated channel waveguide optical crossbars for large scale high speed non-blocking data switching
[AD-A272065] p 1986 N94-20922
Mode transition matrix measuring system
[AD-D015973] p 1987 N94-21279
Conversion of the proprietary ROLM (tm) inter-node link from multimode to singlemode operation
p 1744 N94-21349
Materials Science and Engineering
[DE93-040497] p 1675 N94-21530
Fibre pigtailed silicon based low cost passive optical components, appendix 5 p 1989 N94-21599
Acoustic, fiber optic, and silicon microelectronic microsensors research and development activities at Sandia National Laboratories
[DE93-019075] p 1770 N94-22040
The effect of delamination on the dynamic response of composite laminates as measured by embedded fiber optic Michelson sensor
[ISBN-0-315-83534-6] p 1677 N94-22587

FIBERS
Phthalonitrile prepolymer as high temperature sizing material for composite fibers
[AD-D015912] p 1672 N94-20010

FIELD EFFECT TRANSISTORS
SPICE macromodel for a 1-megawatt power MOSFET switch
[DE93-019415] p 1748 N94-19844
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910
Resistive gate magnetic field sensor
[AD-D015923] p 1749 N94-20199
Study of InGaAs-based modulation doped field effect transistor structures using variable-angle spectroscopic ellipsometry p 1796 N94-21001
Design of CMOS logic gates for TID radiation
p 1754 N94-21083

Complementary heterojunction FET technology for space application p 1755 N94-21094
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Interpolative modeling of GaAs FET S-parameter data bases for use in Monte Carlo simulations p 1767 N94-21723
Bit-systolic arithmetic arrays using dynamic differential gallium arsenide circuits p 1767 N94-21724
A FET-switched induction accelerator cell
[DE93-019604] p 1769 N94-21838

FIELD EMISSION
Metal-glass composite field-emitting arrays
[AD-D015942] p 1673 N94-20064
Silicon microelectronic field-emissive devices for advanced display technology
[DE94-000397] p 1794 N94-22380

FIELD OF VIEW
The data acquisition system for the Anglo-Australian Observatory 2-degree field project p 2048 N94-22529
UIT support observations archive p 2048 N94-22534

FIELD STRENGTH
Photonic electromagnetic field sensor apparatus
[AD-D015939] p 1718 N94-20334
Variable-field permanent magnet dipole
[DE94-000800] p 1820 N94-22020

FIELD THEORY (PHYSICS)
Relativistic calculations of the superheavy nucleus (sup 298)114
[KVI-969] p 1971 N94-20119

FIGURE OF MERIT
Optimization and control of a small angle ion source using an adaptive neural network controller
[DE93-040063] p 1946 N94-21845

FILAMENT WINDING
The effects of processing and constituent materials on compressive strength of thick composite laminates
[AD-A271912] p 1673 N94-20490

FILE MAINTENANCE (COMPUTERS)
A proof-of-concept implementation of persistence in a hierarchical storage system
[NASA-CR-194790] p 1921 N94-22376
ROSAT implementation of a proposed multi-mission x ray data format p 2047 N94-22462

FILLERS
Thermally activated retainer means utilizing shape memory alloy
[NASA-CASE-MSC-21793-1] p 1654 N94-20304
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 1823 N94-20379

FILM THICKNESS
Particles on surfaces of laser ablated Y1Ba2Cu3O(7-delta) films
[DE93-040269] p 2013 N94-19929
Structural and chemical analysis of a silicon nitride film on GaAs by null ellipsometry p 1709 N94-20975
Variable wavelength, variable angle ellipsometry including a sensitivities correlation test p 1710 N94-20978
Applications of variable angle spectroscopic ellipsometry in semiconductor technology p 2025 N94-21010
Non-destructive evaluation in manufacturing using spectroscopic ellipsometry p 1828 N94-21012
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013
VASE (variable angle spectroscopic ellipsometry) p 1687 N94-21014
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191
Azo polymers for optical storage 3: Effect of film thickness on net phase retardation and writing speed
[AD-A272994] p 1705 N94-21267
A quantitative model for interpreting nanometer scale hardness measurements of thin films
[DE93-040601] p 2034 N94-22005

FILMS
Image processing as a tool in flight testing evaluation p 1640 N94-22606

FILTRATION
Fabrication of porous ceramics by freeze-casting/freeze-drying
[PB93-202513] p 1705 N94-21425

FINANCE
System architectures for banking applications p 2046 N94-22057

FINANCIAL MANAGEMENT
Aerospace: Facts and figures, 1992-1993
[AD-A272571] p 1635 N94-21419

FINE STRUCTURE
Magnetic circular dichroism in x ray absorption and core-level photoemission
[DE93-019381] p 1688 N94-19986
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522

FINITE DIFFERENCE THEORY
A Kirchhoff approach to seismic modeling and prestack depth migration
[AD-A271010] p 1854 N94-19820
Stochastic differential equations and numerical simulation for pedestrians
[DE93-040651] p 1949 N94-20006
On the spline-based wavelet differentiation matrix
[NASA-CR-191557] p 1950 N94-20087
A comparison of two incompressible Navier-Stokes algorithms for unsteady internal flow
[NASA-TM-108794] p 1798 N94-20104
Development of a numerical simulation model for a-Si:H solar cells and application to the analysis of experimentally obtained spectral characteristics
[ETN-93-95061] p 1846 N94-20151
Head-on collision of drops: A numerical investigation
[NASA-TM-106394] p 1798 N94-20167
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method p 1718 N94-20405
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20406
Interactive simulation package for coupled bending and torsional vibrations in flexible robot arms
[MEMO-1089] p 1944 N94-21140
Finite difference methods for time-dependent, linear differential algebraic equations
[AD-A272635] p 1954 N94-21174
A multigrid algorithm for the cell-centered finite difference scheme p 1957 N94-21479
High temperature superconducting planar circuit structure for high frequency applications
[AD-A273083] p 2028 N94-21521
On one numerical approach to Stefan problem
[IPPCZ-330] p 1996 N94-21572
Order of accuracy of QUICK and related convection-diffusion schemes
[NASA-TM-106402] p 1959 N94-21588
Study of TE(1-delta) mode in open dielectric resonators by a finite difference time domain method p 1747 N94-22253
On the relationship between spectral domain approach and method of lines p 1794 N94-22254
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386

FINITE ELEMENT METHOD
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
A benchmark study of 2D and 3D finite element calculations simulating dynamic pulse buckling tests of cylindrical shells under axial impact
[DE93-018859] p 1829 N94-19940
A new conformal absorbing boundary condition for finite element meshes and parallelization of FEMATS
[NASA-CR-194740] p 1950 N94-20034
The p-version of the finite element method in incremental elasto-plastic analysis
[NASA-CR-194707] p 1830 N94-20036
A comparative study of an ABC and an artificial absorber for truncating finite element meshes
[NASA-CR-194275] p 1716 N94-20160
Analytical evaluation of a surface integral expressing the coupling between interior and exterior volumes in a FE-IE approach p 1722 N94-20423
An efficient formulation of the coupled finite element-integral equation technique for solving large 3D scattering problems p 1725 N94-20436
Massively parallel computation of RCS with finite elements p 1726 N94-20437
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
Finite element numerical simulation of three dimensional turbulent flows with dispersion: Eulerian and Lagrangian approaches
[ECL-92-42] p 1801 N94-20597
Wrinkle ridges, reverse faulting, and the depth penetration of lithospheric stress in lunae planum, Mars p 2141 N94-20910
Two-dimensional finite element analysis of porous media at multikilobar stress levels
[AD-A271540] p 1831 N94-20916
Thermal stress analysis of composites in the space environment p 1661 N94-21379
Numerical modeling of a propagating crack
[AD-A272604] p 1832 N94-21421
MGGHAT: Elliptic PDE software with adaptive refinement, multigrid and high order finite elements p 1956 N94-21470
Two-level Schwartz methods for nonconforming finite elements and discontinuous coefficients p 1957 N94-21477
Coupling of smooth particle hydrodynamics with PRONTO
[DE93-019080] p 1915 N94-21539
Radiation and scattering from printed antennas on cylindrically conformal platforms
[NASA-CR-194703] p 1741 N94-21885
Scattering by cavity-backed antennas on a circular cylinder p 1741 N94-21886
Radiation by cavity-backed antennas on a circular cylinder p 1741 N94-21887
User manual for EXCALIBUR: A FE-BI numerical laboratory for cavity-backed antennas in a circular cylinder, version 1.2 p 1741 N94-21888
Modal combination in response spectrum modal dynamic analysis
[DE94-000339] p 1833 N94-21956
A moving finite element model of the tokamak scrapeoff layer
[DE94-000673] p 1997 N94-21965
A finite element formulation and adaptive solution approach for large-scale thermomechanical problems with complex contact conditions
[DE93-019605] p 1960 N94-21996
Mixed finite element and finite volume methods
[ISBN-0-315-63035-3] p 1805 N94-22417
Coupling of smooth particle hydrodynamics with the finite element method
[DE93-019081] p 1805 N94-22556
Response statistics of shell structures with geometrical and material nonlinearities, volume 1
[ISBN-0-315-84006-4] p 1833 N94-22590
Life assessment of structural components using inelastic finite element analyses p 1834 N94-22614
NASA Langley developments in response calculations needed for failure and life prediction p 1836 N94-22621

FINITE VOLUME METHOD
A comparison of two incompressible Navier-Stokes algorithms for unsteady internal flow
[NASA-TM-108794] p 1798 N94-20104
Approximate methods for N-component solute transport and ion-exchange
[CWI-NM-R9223] p 1910 N94-21078
Unstructured multigrid through agglomeration p 1958 N94-21484
Order of accuracy of QUICK and related convection-diffusion schemes
[NASA-TM-106402] p 1959 N94-21588
User's guide for the casting process simulator software CaPS-2D, version 1.0
[DE93-040398] p 1917 N94-21923
Mixed finite element and finite volume methods
[ISBN-0-315-63035-3] p 1805 N94-22417

FINNED BODIES
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19987

FIR FILTERS
Timing recovery in the channel processor of a digital group demodulator p 1780 N94-22169

FIRE (CLIMATOLOGY)
Overview of microphysical and state parameter measurements from FIRE 2 p 1871 N94-22293
Cirrus microphysics observations made during FIRE 2: Small particles, high concentrations, and probe comparisons p 1871 N94-22294
Optical properties of cirrus derived from airborne measurements during FIRE IFO 2 p 1872 N94-22297
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2 p 1872 N94-22298
Comparison of radiation and cloud parameters derived from satellite and aircraft measurements during FIRE 2 cirrus IFO p 1872 N94-22299
Cloud properties from the analysis of AVHRR observations for FIRE 2 p 1872 N94-22300
Development of methods for inferring cloud thickness and cloud-base height from satellite radiance data p 1872 N94-22301
Meteorological analysis of the December 4-6 FIRE cirrus-2 case p 1875 N94-22314
Cirrus cloud retrievals from HIS observations during FIRE 2 p 1875 N94-22315
Analysis of the GOES 6.7 micrometer channel observations during FIRE 2 p 1875 N94-22316
Cloud boundaries during FIRE 2 p 1876 N94-22318
Ground-based passive remote sensing during FIRE IFO 2 p 1844 N94-22319
Comparisons of downwelling radiation to model predictions based on groundbased measurements during FIRE 1991 p 1876 N94-22320

FIRE CONTROL
Digital wireless control system
[DE93-040211] p 1714 N94-19946

FIRE EXTINGUISHERS
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165
FIRE FIGHTING
Expanded polystyrene protective barricade full-scale fire exposure test
[AD-A271450] p 1698 N94-19938
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
Aircraft cabin water spray disbenefits study
[NASA-CR-194750] p 1642 N94-21818
FIRE PREVENTION
Army aircraft fire-detection systems operation and reliability
[AD-A271327] p 1641 N94-20912
FIRES
Expanded polystyrene protective barricade full-scale fire exposure test
[AD-A271450] p 1698 N94-19938
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165
FITTING
The IRAF Fabry-Perot analysis package: Ring fitting
p 2048 N94-22527
FIXED WINGS
Torsion spring powered missile wing deployment system
[CA-PATENT-1,306,384] p 1645 N94-21051
FLAME PROPAGATION
Investigation of flame driving and flow turning in axial solid rocket instabilities
[AD-A271066] p 1667 N94-20015
Reaction zone models for vortex simulation of turbulent combustion
[AD-A272723] p 1681 N94-21213
FLAME RETARDANTS
Expanded polystyrene protective barricade full-scale fire exposure test
[AD-A271450] p 1698 N94-19938
FLAMES
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows
[AD-A271160] p 1678 N94-20000
FLAMMABILITY
Expanded polystyrene protective barricade full-scale fire exposure test
[AD-A271450] p 1698 N94-19938
Materials evaluation at ESA/ESTEC
p 1662 N94-21386
Toxicity of thermal degradation in a manned space environment p 1664 N94-21403
FLANGES
Compression strength of composite primary structural components
[NASA-CR-194561] p 1830 N94-20159
FLASHOVER
Research on plasma-puff initiation of high Coulomb transfer switches
[NASA-CR-194371] p 1994 N94-21289
Plasma-puff initiation of high Coulomb transfer switches p 1994 N94-21290
Characteristics of plasma-puff trigger for a inverse-pinch plasma switch p 1995 N94-21291
FLAT PLATES
Acoustic radiation damping of flat rectangular plates subjected to subsonic flows
[NASA-TM-109382] p 1967 N94-20211
The effect of transverse curvature on the fluctuating wall pressure and structure of boundary layer turbulence
[AD-A271868] p 1800 N94-20466
FLAT SURFACES
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals
p 1871 N94-22295
FLEXIBLE BODIES
Flexible heating head for induction heating
[NASA-CASE-LAR-14418-15-B] p 1718 N94-20368
Active damping of oscillations in a long compliant manipulator link
[DE93-018878] p 1826 N94-22038
A robust adaptive control design for flexible joint manipulators p 1790 N94-22230
Optimal control of the tip of a flexible arm
p 1794 N94-22256
Dynamic analyses of flexible robotic manipulators
[ISBN-0-315-59251-6] p 1827 N94-22421
Robot link and contact surface dynamic interaction: An experimental study of contact instability
[ISBN-0-315-83439-0] p 1827 N94-22578
FLIGHT ALTITUDE
Radiometry in commercial aircraft
[GSF-41/91] p 1892 N94-21141
FLIGHT CONTROL
Ground proximity warning system voice warning unit requirements study
[AD-A270541] p 1641 N94-19876
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
Control vane guidance for a ducted-fan unmanned air vehicle
[AD-A271957] p 1645 N94-20561
Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20627
Optimal flight guidance for aircraft in windshear
[CA-PATENT-1,307,573] p 1650 N94-21050
FLIGHT CREWS
Coronary angiography outcomes of US Army aircrew with the finding of coronary artery calcifications: Aviation epidemiology data register
[AD-A271968] p 1891 N94-20615
Radiometry in commercial aircraft
[GSF-41/91] p 1892 N94-21141
In-flight measurement of aircrew breathing in Navy aircraft
[AD-A271811] p 1896 N94-21154
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
Strength capabilities and load requirements while performing torquing tasks in zero gravity
[NASA-TP-3433] p 1897 N94-21627
FLIGHT HAZARDS
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
MLS signal-in-space category 3 landing hazard analysis p 1644 N94-22134
FLIGHT MANAGEMENT SYSTEMS
Incongruity, incongruity resolution, and mental states: The measure and modification of situational awareness and control
[NASA-CR-194568] p 1893 N94-20168
Development and evaluation of a profile negotiation process for integrating aircraft and air traffic control automation
[NASA-TM-4360] p 1643 N94-21606
FLIGHT OPERATIONS
Aircraft noise effects on cultural resources: Recommendation and rationale for further research
[PB93-205326] p 1968 N94-22053
FLIGHT PATHS
Optimal flight guidance for aircraft in windshear
[CA-PATENT-1,307,573] p 1650 N94-21050
Radiometry in commercial aircraft
[GSF-41/91] p 1892 N94-21141
Parallel runway requirement analysis study. Volume 2: Simulation manual
[NASA-CR-191549-VOL-2] p 1644 N94-22278
FLIGHT SAFETY
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Description and availability of airborne Doppler radar data p 1722 N94-20419
ATC/pilot voice communications: A survey of the literature
[DOT/FAA/AM-93/20] p 1738 N94-21201
Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373
Delamination, durability, and damage tolerance of laminated composite materials p 1678 N94-22622
FLIGHT SIMULATION
Some VTOL head-up display drive-law problems and solutions
[NASA-TM-104027] p 1635 N94-20035
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
A simulation model for probabilistic analysis of Space Shuttle abort modes
[NASA-TM-108432] p 1656 N94-21859
Spaceplane flight simulation: Project definition
[PB93-211399] p 1651 N94-22094
FLIGHT SIMULATORS
Structural modeling: An application framework and development process for flight simulators
[AD-A271348] p 1650 N94-19880
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1651 N94-20108
FLIGHT TEST INSTRUMENTS
The modern rotor aerodynamic limits survey: A report and data survey
[NASA-TM-4446] p 1635 N94-21490
FLIGHT TESTS
Flight and laboratory testing of materials in low Earth orbit p 1659 N94-21369
Results of the post flight analyses on system materials for the LDEF-FRECOPA experiment
p 1659 N94-21371
The modern rotor aerodynamic limits survey: A report and data survey
[NASA-TM-4446] p 1635 N94-21490
Low-cost Unmanned Air Vehicle (UAV) for oceanographic research
[AD-A273103] p 1646 N94-21507
A flight test system design for the microwave landing system p 1645 N94-22156
Measurement Technology for Flight Tests
[ILR-MITT-256(1991)] p 1639 N94-22597
Testing of a multisensor hot film technique in wind tunnel and free flight p 1639 N94-22599
Free flight experiment with a laminar wing glove
p 1639 N94-22600
Measurement of the influence of deicing liquids on aircraft aerodynamics p 1640 N94-22602
Utilization of lasers for air data measurements
p 1640 N94-22603
Hot wire anemometry: A versatile instrumentation used for predevelopment studies and flight testing of the Do-328 aircraft p 1640 N94-22604
Image processing as a tool in flight testing evaluation
p 1640 N94-22606
Recent ONERA contributions to the development of flight test measurement techniques
p 1641 N94-22607
FLIP-FLOPS
Reliable interface design for combining asynchronous and synchronous circuits p 1758 N94-21119
FLOATING POINT ARITHMETIC
Evaluation of floating-point sum or difference of products in carry-save domain p 1764 N94-21705
Reverse automatic differentiation of modular FORTRAN programs
[DE94-000336] p 1918 N94-22088
FLOODS
Constraints on the rate of discharge and duration of the Mangala Valles flood p 2099 N94-20674
FLOW CHARACTERISTICS
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct
[NASA-TM-106435] p 1649 N94-21758
FLOW DISTRIBUTION
Fluid dynamic mechanisms and interactions within separated flows
[AD-A271037] p 1797 N94-19978
Three dimensional unsteady flow calculations in radial components p 1669 N94-20080
Experimental and computational results from a large low-speed centrifugal impeller
[NASA-TM-106421] p 1636 N94-20136
Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20627
A classification scheme for the morphology of lava flow fields p 1863 N94-20879
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment
[AD-A272851] p 1802 N94-21193
Measurement and prediction of the flow through an annular turbine cascade
[AD-A272530] p 1803 N94-21417
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1
[NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2
[NASA-CR-189192-VOL-2] p 1648 N94-21583
A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct
[NASA-TM-106435] p 1649 N94-21758
Instability modes excited by natural screech tones in a supersonic rectangular jet
[NASA-TM-106409] p 1638 N94-22274
Johnson Space Center CFD grid generation requirements p 1919 N94-22355
Flow and heat transfer model for a rotating cryogenic motor
[DE94-001151] p 1794 N94-22405
Recent ONERA contributions to the development of flight test measurement techniques
p 1641 N94-22607
FLOW EQUATIONS
Formation of perched lava ponds on basaltic volcanoes: Interaction between cooling rate and flow geometry allows estimation of lava effusion rates p 1863 N94-20878
A semi-Lagrangian approach to the shallow water equation p 1806 N94-21480

NASA-Ames Research Center unstructured technology development p 1919 N94-22352
FLOW GEOMETRY
Formation of perched lava ponds on basaltic volcanoes: Interaction between cooling rate and flow geometry allows estimation of lava effusion rates p 1863 N94-20878
A classification scheme for the morphology of lava flow fields p 1863 N94-20879
Unstructured grid research and use at NASA Lewis Research Center p 1919 N94-22353
FLOW MEASUREMENT
Experimental investigation of nozzle/plume aerodynamics at hypersonic speeds
[NASA-CR-194626] p 1636 N94-20014
Thermal dilation fiber optical flow sensor
[AD-D015926] p 1797 N94-20094
Rotorwash wind sensor evaluation
[AD-A268987] p 1807 N94-20203
An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight
[AD-A270201] p 1636 N94-20486
Speed of sound data and related models for mixtures of natural gas constituents
[PB93-200822] p 1968 N94-21447
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
FLOW STABILITY
Experimental study of a shock accelerated thin gas layer
[DE93-018354] p 1799 N94-20286
Numerical investigation of laminar-turbulent transition in two- and three-dimensional boundary layers
[DLR-FB-92-36] p 1800 N94-20533
Time-accurate Navier-Stokes calculations with multigrid acceleration p 1956 N94-21469
Laser driven hydrodynamic instability experiments
[DE93-040550] p 1818 N94-21547
Instability modes excited by natural screech tones in a supersonic rectangular jet
[NASA-TM-106409] p 1638 N94-22274
FLOW VELOCITY
Design of a state-space controller for an advanced gas turbine engine
[AD-A270659] p 1647 N94-20042
Absorption heat pump for space applications
[NASA-CR-194693] p 1845 N94-20066
Thermal dilation fiber optical flow sensor
[AD-D015926] p 1797 N94-20094
Experimental and computational results from a large low-speed centrifugal impeller
[NASA-TM-106421] p 1636 N94-20136
An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight
[AD-A270201] p 1636 N94-20486
Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20627
Formation of perched lava ponds on basaltic volcanoes: Interaction between cooling rate and flow geometry allows estimation of lava effusion rates p 1863 N94-20878
Testing of a multisensor hot film technique in wind tunnel and free flight p 1639 N94-22599
FLOW VISUALIZATION
Principles and applications of oil film interferometry for measuring wall friction fields in air flows
[ETN-93-95062] p 1798 N94-20147
Formulation of a next-generation interior ballistic code
[AD-A271539] p 1801 N94-20915
Description and assessment of a new Optical Pressure Measurement System (OPMS) demonstrated in the high speed wind tunnel in Goettingen (Germany)
[DLR-FB-92-24] p 1651 N94-21280
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
Measurement of thermal-hydraulic parameters in two-phase flow using flow visualization image analysis
[DE93-006255] p 1805 N94-22269
NASA-Ames Research Center unstructured technology development p 1919 N94-22352
Unstructured grid research and use at NASA Lewis Research Center p 1919 N94-22353
Grid generation requirements at Marshall Space Flight Center p 1919 N94-22354
FLUENCE
Combination of on ground experiments and analysis software for the evaluation of material degradation in space (SILEX project) p 1662 N94-21389
German space experiments on Spacelab D-2 and Eureca-1 to investigate atomic oxygen interaction with materials p 1662 N94-21390
The International Telecommunications Satellite (INTELSAT) Solar Array Coupon (ISAC) atomic oxgyen flight experiment: Techniques, results and summary p 1662 N94-21391
FLUID DYNAMICS
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690
Investigation of the physics of the turbulent boundary layer focusing on vortex structures
[AD-A272879] p 1802 N94-21155
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels
[DE93-040181] p 1804 N94-21765
FLUID FILMS
Principles and applications of oil film interferometry for measuring wall friction fields in air flows
[ETN-93-95062] p 1798 N94-20147
Compliant seal development p 1655 N94-21795
FLUID FLOW
Hydrostatic/nonhydrostatic comparison with the MERCURE code on orographic flows
[ETN-93-94603] p 1866 N94-20600
Thermal and rheological controls on magma migration in dikes: Examples from the east rift zone of Kilauea volcano, Hawaii p 1862 N94-20673
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690
Formation of perched lava ponds on basaltic volcanoes: Interaction between cooling rate and flow geometry allows estimation of lava effusion rates p 1863 N94-20878
A classification scheme for the morphology of lava flow fields p 1863 N94-20879
Numerical simulation of lava flows: Applications to the terrestrial planets p 1863 N94-20904
Chemical reaction fouling model for single-phase heat transfer
[DE93-019556] p 1802 N94-20942
Dynamic response of multiphase porous media
[AD-A272915] p 1831 N94-21219
A note on singularities caused by the hydrodynamic dispersion tensor
[CWI-NM-R9302] p 1803 N94-21575
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels
[DE93-040181] p 1804 N94-21765
Iterative electromagnetic Born inversion applied to earth conductivity imaging
[DE93-040668] p 1859 N94-21928
Microscopic and macroscopic dynamics
[DE93-019576] p 1937 N94-22042
Development of a gridless CFD method p 1919 N94-22361
FLUID INJECTION
Iterative electromagnetic Born inversion applied to earth conductivity imaging
[DE93-040668] p 1859 N94-21928
FLUID JETS
An analysis of pool surface deformation due to a plunging liquid jet
[AD-A272970] p 1802 N94-21261
FLUID MECHANICS
Wavefront sensors for optical diagnostics in fluid mechanics: Application to heated flow, turbulence, and droplet evaporation
[DE93-040060] p 1797 N94-19974
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
Microscopic and macroscopic dynamics
[DE93-019576] p 1937 N94-22042
FLUID PRESSURE
Two-dimensional finite element analysis of porous media at multikilobar stress levels
[AD-A271540] p 1831 N94-20916
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels
[DE93-040181] p 1804 N94-21765
FLUIDS
Spiral fluid separator
[NASA-CASE-MFS-28658-1] p 1800 N94-20361
FLUORESCENCE
Optical fibers and Fluorosensors having improved power efficiency and methods of producing same
[NASA-CASE-LAR-14525-1-CU] p 1986 N94-20378
Optical fiber sensor having an active core
[NASA-CASE-LAR-14607-1-SB] p 1986 N94-20566
Optical properties of chromium and neodymium in zirconium - barium - lanthanum - aluminum fluoride glass
[AD-A271609] p 1987 N94-21236
Diffraction and holography of photoelectrons and fluorescent x rays
[DE93-019240] p 1808 N94-21441
Fluorescent microthermographic imaging
[DE93-040332] p 1810 N94-22000
FLUORIDES
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
FLUORINE ORGANIC COMPOUNDS
Laser driven hydrodynamic instability experiments
[DE93-040550] p 1818 N94-21547
FLUOROCARBONS
Stress-induced cracking of fluorocarbon rubber MTL-0002 after exposure to DS-2
[AD-A271753] p 1705 N94-21302
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258
FLUOROHYDROCARBONS
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165
FLUOROPOLYMERS
Adhesive electroless metallization of fluoropolymeric substrates
[AD-A271858] p 1703 N94-20526
FLUOROSCOPY
Coronary angiography outcomes of US Army aircrew with the finding of coronary artery calcifications: Aviation epidemiology data register
[AD-A271968] p 1891 N94-20615
Review of using cardiac fluoroscopy in symptomatic and asymptomatic patients
[AD-A271690] p 1891 N94-20928
FLUTTER ANALYSIS
The Seventh International Conference on Composite Structures, volume 25, numbers 1-4
[AD-A269961] p 1672 N94-20031
Blade row interaction effects on flutter and forced response
[NASA-TM-106438] p 1649 N94-21586
FLUX (RATE)
CERN-derived analysis of lunar radiation backgrounds p 2080 N94-20880
Improved approximate formulas for flux from cylindrical and rectangular sources
[DE93-011390] p 1742 N94-22268
FLUX DENSITY
IMPS albedo and diameter for Asteroid 243 Ida p 2085 N94-20845
Orbital debris and micrometeoroids: LDEF and Mir data p 1659 N94-21368
Effects of aqueous solution compositions on Aerocapacitor energy density
[DE94-000385] p 1768 N94-21753
Satellite measurements of radiation budget parameters p 1860 N94-22284
FLUX PINNING
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997
FLYBY MISSIONS
Contributions of the Clementine mission to our understanding of the processes and history of the Moon p 2119 N94-20784
The Clementine Mission science return at the Moon and Geographos p 1652 N94-20850
FLYWHEELS
Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE93-019159] p 1762 N94-21620
Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE94-000391] p 1762 N94-21621
FM/PM (MODULATION)
Trellis coded multi-orthogonal modulation p 1747 N94-22231
Quadrature biorthogonal modulation p 1747 N94-22232
FOAMS
Structural crashworthiness and failure
[AD-A270429] p 1828 N94-19815
Expanded polystyrene protective barricade full-scale fire exposure test
[AD-A271450] p 1698 N94-19938

Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546
FOCAL PLANE DEVICES
Multiport solid-state imager characterization at variable pixel rates
[DE93-018366] p 1808 N94-20287
Silicon retina for optical tracking systems
p 1755 N94-21098
ROSAT data analysis with EXSAS
p 2080 N94-22555
FOCI
Focus history of the Hubble Space Telescope: Launch to May 1993
[NASA-CR-194179] p 2055 N94-20204
FOCUSING
Focus history of the Hubble Space Telescope: Launch to May 1993
[NASA-CR-194179] p 2055 N94-20204
Micro-ellipsometric measurements of strained layer structures p 2025 N94-21008
Plasma lens experiments at the Final Focus Test Beam
[DE93-041081] p 1981 N94-21688
SPECFOCUS: An IRAF task for focusing spectrographs p 1965 N94-22540
FOILS (MATERIALS)
Interactions of slow H, H2, and H3 with thin foils
[DE93-040263] p 1976 N94-21995
FOKKER-PLANCK EQUATION
Accretion of a hot plasma onto the central black hole: Fokker-Planck formulation p 2009 N94-22693
FOLDING STRUCTURES
Torsion spring powered missile wing deployment system
[CA-PATENT-1,306,384] p 1645 N94-21051
FOLDS (GEOLOGY)
Diapirs and cantaloupes: Layering and overturn of Triton's crust p 2111 N94-20738
FORCE DISTRIBUTION
Control of multiple robot manipulators with optimal force distribution p 1794 N94-22255
FORCE-FREE MAGNETIC FIELDS
Determination of coronal magnetic fields from vector magnetograms
[NASA-CR-194744] p 2147 N94-21877
FORECASTING
Using NDVI/AVHRR data for crop monitoring and forecasting in South Italy p 1841 N94-20970
An evaluation of artificial neural network modeling for manpower analysis
[AD-A273001] p 1945 N94-21269
FOREST MANAGEMENT
Data management for support of the Oregon Transect Ecosystem Research (OTTER) project
[NASA-CR-4557] p 1905 N94-20149
FORESTS
Relating ground truth collection to model sensitivity
p 1719 N94-20409
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters
p 1729 N94-20452
Analysis of hyper-spectral AVIRIS image data over a mixed-conifer forest in Maine p 1838 N94-20959
FORM FACTORS
Qualitative and quantitative aspects of the QCD theory of elastic form factors
[DE93-040864] p 2038 N94-21513
A relativistic constituent quark model
[DE93-041085] p 1946 N94-21689
FORMALISM
Application of the reactive flux formalism to study water hydrogen bond dynamics
[AD-A271824] p 1680 N94-20560
GWB: Manual for the Grammar WorkBench version 1.5
[TR-92-14] p 1909 N94-21061
Likelihood analysis of parity violation in the compound nucleus
[DE94-000671] p 1977 N94-22572
FORMAT
Conversion of LDEF experiment M0003 sample observation database to MS-DOS formats
[AD-A272945] p 1681 N94-21226
Data format standards for civilian remote sensing satellites
[PB93-192920] p 1841 N94-21446
ROSAT implementation of a proposed multi-mission x ray data format p 2047 N94-22462
FITS data conversion efforts at the Compton Observatory Science Support Center
p 1926 N94-22488
FORSTERITE
Fe/Mn in olivine of carbonaceous meteorites
p 2084 N94-20788
Diffusion-controlled magnesium isotopic fractionation of a single crystal forsterite evaporated from the solid state
p 1686 N94-20855
FORTRAN
Documentation for PCDIST, a FORTRAN subroutine to calculate Poliack-Cuzzi scattering
[AD-A273070] p 1988 N94-21491
Reverse automatic differentiation of modular FORTRAN programs
[DE94-000336] p 1918 N94-22088
An object-oriented data reduction system in Fortran
p 2046 N94-22447
A self-defining hierarchical data system
p 2046 N94-22448
Fortran for the nineties p 1926 N94-22481
FOSSIL FUELS
Proceedings of the Seventh Annual Conference on Fossil Energy Materials
[DE94-001091] p 1848 N94-21823
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21989
FOULING
Chemical reaction fouling model for single-phase heat transfer
[DE93-019556] p 1802 N94-20942
FOUR-WAVE MIXING
Center for the integration of optical computing
[AD-A271874] p 1899 N94-20469
Statistical fluctuations in lasers
[DE94-000710] p 1817 N94-20939
Photonics and nonlinear optics with molecular materials and polymers
[AD-A271747] p 1988 N94-21457
FOURIER ANALYSIS
High resolution signal processing
[AD-A271181] p 1717 N94-20215
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164
Fourier calculus on evolutionary trees
[CWI-BS-R9234] p 1954 N94-21231
Flow transition with 2-D roughness elements in a 3-D channel p 1806 N94-21466
Multigrid schemes for viscous hypersonic flows
p 1641 N94-21473
Optimal convolution SOR acceleration of waveform relaxation with application to semiconductor device simulation p 1922 N94-21475
FOURIER SERIES
Rational trigonometric approximations using Fourier series partial sums
[NASA-CR-191535] p 1959 N94-21568
FOURIER TRANSFORMATION
High resolution signal processing
[AD-A271181] p 1717 N94-20215
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method
p 1718 N94-20405
Asymptotic behavior of Fourier transform of surface measures on convex and radial hypersurfaces
[ETN-93-93790] p 1952 N94-21019
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164
Femtosecond dynamics in hydrogen-bonded solvents
[DE93-019937] p 1683 N94-21842
A Hopfield neural net for discrete Fourier transform calculation p 1783 N94-22184
Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised)
[PB93-215432] p 1969 N94-22262
Verification of the PROS timing analysis package
p 1926 N94-22508
FRACTALS
A comparison of some of the most current methods of image compression
[AD-A271841] p 1907 N94-20525
Computerized simulations with cellular automates for cloud formation
[GKSS-92/E/22] p 1867 N94-21312
FRACTIONATION
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20636
The Koshak section: Evidence for element fractionation and an oxidation event at the K/T boundary
p 1862 N94-20641
Low-energy ion implantation: Large mass fractionation of argon p 1685 N94-20697
FE-60 and the evolution of eucrites
p 2083 N94-20768
Fe/Mn in olivine of carbonaceous meteorites
p 2084 N94-20788
Recondensation in the early solar system: Physical conditions and source material p 2085 N94-20849
Diffusion-controlled magnesium isotopic fractionation of a single crystal forsterite evaporated from the solid state
p 1686 N94-20855
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona
p 1863 N94-20889
Requirements for the early atmosphere of Mars from nitrogen isotope ratios p 2144 N94-21669
Mars atmosphere loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape
p 2144 N94-21672
FRACTURE MECHANICS
Innovative acoustic technique for studying new materials and new developments in solid state physics
[AD-A270540] p 2013 N94-19933
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
The 1992 USAF structural integrity program conference
[AD-A272878] p 1635 N94-21194
Numerical modeling of a propagating crack
[AD-A272604] p 1832 N94-21421
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
Ni3Al aluminide alloys
[DE94-000493] p 1694 N94-21933
The program system for the diagnostics of strains and fracture prediction of solids p 1836 N94-22065
Nonlinear and progressive failure aspects of transport composite fuselage damage tolerance
p 1834 N94-22609
Projections on structures and material strength in the computational context p 1834 N94-22610
A thermodynamic analysis of propagating subcritical cracks with cohesive zones p 1834 N94-22611
Modeling of failure and response to laminated composites subjected to in-plane loads
p 1834 N94-22612
FRACTURE STRENGTH
Investigation of austenitic alloys for advanced heat recovery and hot gas cleanup systems
[DE93-017863] p 1687 N94-19802
Properties and potential of high-temperature niobium beryllides
[DE93-019169] p 1690 N94-20233
Composite materials with improved properties in compression
[AD-A272837] p 1675 N94-21176
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions
[AD-A272658] p 1691 N94-21188
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications
[AD-A272897] p 1704 N94-21197
Strength and toughness improvement of silicide intermetallics by nanophase and microphase reinforcements
[AD-A272914] p 1692 N94-21320
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride
[DE93-041307] p 1706 N94-21516
The mechanical property data base from an Air Force/industry cooperative test program on advanced aluminum alloys: 2091 sheet, plate, and 8090 extrusion
[AD-A273091] p 1692 N94-21525
Fundamental studies of stress distributions and stress relaxation in oxide scales on high temperature alloys
[DE94-001444] p 1693 N94-21854
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives
[DE94-000330] p 1694 N94-21945
Dynamic properties of ceramic materials
[DE94-000654] p 1706 N94-21963
Benefits of thread rolling process to the stress corrosion cracking and fatigue resistance of high strength fasteners
[DE93-040438] p 1833 N94-22001
Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides
[DE93-040600] p 1697 N94-22559
FRACTURES (MATERIALS)
Coupling of smooth particle hydrodynamics with PRONTO
[DE93-019080] p 1915 N94-21539
Investigation of moisture-induced embrittlement of iron aluminides
[DE93-040841] p 1695 N94-21949
FRACTURING
Strength and deformation properties of basaltic lava flows on planetary surfaces p 1862 N94-20747
Linear structures on the small inner satellites of Saturn p 2121 N94-20797
Coupling of smooth particle hydrodynamics with PRONTO
[DE93-019080] p 1915 N94-21539

Experimental and numerical studies of high-velocity impact fragmentation
[DE93-040205] p 1832 N94-21557
Ductile-brittle transition behavior of tungsten under shock loading conditions
[DE93-019945] p 1693 N94-21843
Fundamental studies of stress distributions and stress relaxation in oxide scales on high temperature alloys
[DE94-001444] p 1693 N94-21854
An overview of computational simulation methods for composite structures failure and life analysis
p 1835 N94-22617

FRAGMENTATION
The sand bag model of the dispersion of the cosmic body in the atmosphere p 2084 N94-20823
Equilibrium models of mass distribution and collisional lifetimes of asteroids p 2086 N94-20877
Hypervelocity impact
[AD-A272957] p 1831 N94-21249
Experimental and numerical studies of high-velocity impact fragmentation
[DE93-040205] p 1832 N94-21557
A thermodynamic theory of dynamic fragmentation
[DE93-019066] p 1833 N94-21916
Fragmentation of magnetized filamentary interstellar clouds p 2008 N94-22687

FRAGMENTS
Antipodal fragment velocities for porous and weak targets at catastrophic impacts p 1836 N94-20891

FRAUNHOFER LINES
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952

FREE ATMOSPHERE
Convergence of the hermite wavelet expansion
[AD-A271435] p 1854 N94-19841

FREE ELECTRON LASERS
Initial performance of Los Alamos advanced free electron laser
[DE93-040158] p 1814 N94-19828
Measurement and correction of magnetic fields in pulsed slotted-tube microwigglers
[DE93-040100] p 1815 N94-20272
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos
[DE93-040141] p 1816 N94-20277
A theory for optical wavelength control in short pulse free electron laser oscillators
[AD-A271706] p 1817 N94-21353
Demonstration of ultraviolet lasing with a low energy electron beam
[DE93-040192] p 1818 N94-21554
Generation of harmonic radiation using the multi-cavity free-electron laser
[DE94-001261] p 1820 N94-21975
Variable-field permanent magnet dipole
[DE94-000800] p 1820 N94-22020
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas
[DE94-000817] p 1820 N94-22585

FREE ENERGY
Stability of the face-centered-cubic phase of heavy rare gas solids
[DE93-019949] p 1679 N94-20319
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions
[AD-A272665] p 1681 N94-21216

FREE FALL
Melt-spin processing of high (Tc) oxide superconductors
[DE94-000696] p 2036 N94-22582

FREEZE DRYING
Fabrication of porous ceramics by freeze-casting/freeze-drying
[PB93-202513] p 1705 N94-21425

FREON
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas
[DE94-000817] p 1820 N94-22585

FREQUENCIES
Worldwide frequency of temperatures at selected altitudes
[AD-A271111] p 1864 N94-19908
Longitudinal instability of an induction linac with acceleration
[DE93-019249] p 1980 N94-20290
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580

FREQUENCY ASSIGNMENT
Visibility considerations in frequency sharing with low Earth orbit satellites p 1746 N94-22187

FREQUENCY CONTROL
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912

FREQUENCY DIVISION MULTIPLEXING
Multi-band reflector antenna with double-ring element frequency selective subreflector p 1728 N94-20447

FREQUENCY MEASUREMENT
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912
Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000685] p 1697 N94-22571

FREQUENCY MODULATION
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992
p 1725 N94-20435
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Effect of bandwidth on beam smoothing and frequency conversion at the third harmonic of the Nova laser
[DE93-019917] p 1819 N94-21920
FM interference in radio navigation receivers
p 1645 N94-22219

FREQUENCY MULTIPLIERS
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912

FREQUENCY RANGES
Frequency and temperature dependence of high damping elastomers
[DE93-019539] p 1697 N94-19809

FREQUENCY RESPONSE
Frequency dependent electrical properties of minerals and partial-melts
[DE93-019918] p 2012 N94-19861

FREQUENCY SHIFT
Measuring liquid properties with smooth and textured-surface resonators
[DE93-019433] p 1749 N94-20054
A motion extraction method for synthetic aperture radars
[DLR-FB-92-31] p 1742 N94-22279

FREQUENCY SHIFT KEYING
Digital receiver for on-board FM/FSK-FM/BPSK demodulation p 1744 N94-21091
Capacity comparison between direct sequence PSK and MFSK spread spectrum systems in CDMA applications
p 1747 N94-22224

FREQUENCY STABILITY
Measurements of atomic interactions and frequency stability with a cryogenic hydrogen maser
[AD-A271132] p 1814 N94-19853
Tunable laser frequency stabilizing system
[AD-D015904] p 1815 N94-20055

FREQUENCY STANDARDS
Measurements of atomic interactions and frequency stability with a cryogenic hydrogen maser
[AD-A271132] p 1814 N94-19853

FREQUENCY SYNTHESIZERS
Low-latency digital frequency synthesizer using the residue number system p 1759 N94-21121

FRESNEL DIFFRACTION
Wide passband wavelength multi/demultiplexer at 1.3/1.55 micrometers based on etched Fresnel mirror, appendix B p 1989 N94-21602

FRESNEL REGION
Material optimization for hard x ray Fresnel zone plates
[DE93-019569] p 1990 N94-21837

FRICTION
Development of fundamental understanding of friction and wear mechanisms by atomic-scale tribological studies of ceramic materials and multilayered thin films
[AD-A271485] p 1703 N94-20548
The connection between Venus' free obliquity and its CMB oblateness p 2139 N94-20896
Lubricated wear of steel-ceramic and ceramic-ceramic systems
[PB93-202356] p 1825 N94-21450
Dynamics of face seals for high speed turbomachinery
p 1655 N94-21796

FRICTION FACTOR
Distributed loss model: Application to a spatial turbopump inducer p 1668 N94-20078

FUEL CELL POWER PLANTS
Molten carbonate fuel cell networks: Principles, analysis, and performance
[DE93-019872] p 1846 N94-21527
Modeling of polymer electrolyte fuel cell systems
[DE93-041187] p 1847 N94-21774

FUEL CELLS
Fuel processing requirements and techniques for fuel cell propulsion power
[DE93-019516] p 1750 N94-20257
Molten carbonate fuel cell networks: Principles, analysis, and performance
[DE93-019872] p 1846 N94-21527
A calcium oxide sorbent process for bulk separation of carbon dioxide
[DE93-019288] p 1847 N94-21540
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells
[DE93-019536] p 1847 N94-21650
Modeling of polymer electrolyte fuel cell systems
[DE93-041187] p 1847 N94-21774
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870
The electrochemical performance of thin-electrolyte solid oxide fuel cells
[DE93-041184] p 1848 N94-21942
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044

FUEL COMBUSTION
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21969
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391

FUEL CONSUMPTION
Some evidence on determinants of fuel economy as a function of driving cycle and test type
[DE93-019511] p 1825 N94-21637

FUEL CONTAMINATION
Compatibility and efficacy of biocides qualified under military specification MIL-S-53021
[AD-A271496] p 1712 N94-20551

FUEL FLOW
Design of a state-space controller for an advanced gas turbine engine
[AD-A270859] p 1647 N94-20042
Some evidence on determinants of fuel economy as a function of driving cycle and test type
[DE93-019511] p 1825 N94-21637

FUEL INJECTION
Liquid fuel injection elements for rocket engines
[NASA-CASE-MFS-28547-1] p 1669 N94-20370
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391

FUEL PRODUCTION
Fuel processing requirements and techniques for fuel cell propulsion power
[DE93-019516] p 1750 N94-20257

FUEL SYSTEMS
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597] p 1826 N94-22093

FUEL TANK PRESSURIZATION
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177

FUEL TANKS
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355

FUEL TESTS
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597] p 1826 N94-22093

FUEL VALVES
High-temperature, high-pressure oxygen metering valve
[NASA-CASE-MSC-21823-1] p 1824 N94-20589

FUEL-AIR RATIO
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391

FUELS
Biofuels: Project summaries
[DE93-010003] p 1712 N94-19984
Monopropellant aqueous hydroxyl ammonium nitrate/fuel
[AD-D015922] p 1712 N94-20061

FULLERENES
Fullerene derivatives and fullerene superconductors
[DE93-019568] p 2031 N94-21871

FUNCTION SPACE
Large deviations behavior of counting processes and their inverses
[AD-A271142] p 1939 N94-19909

FUNCTIONAL ANALYSIS
Functional statistical data analysis and modeling
[AD-A271520] p 1963 N94-20913
Large-scale circulation regimes and tropical cyclone characteristics over the western pacific ocean
[AD-A273004] p 1867 N94-21307

FUNCTIONAL DESIGN SPECIFICATIONS
Structural modeling: An application framework and development process for flight simulators
[AD-A271348] p 1650 N94-19880
Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188
FUNCTIONS (MATHEMATICS)
Polynomial interpolation of real functions 1: Interpolation in an interval
[AD-A272330] p 1951 N94-20527
On the closure properties of #P in the context of PF of #P
[TR-445] p 1955 N94-21456
FURNACES
Initial development of a high-pressure crystal growth facility: Center director's discretionary fund
[NASA-TM-108430] p 2030 N94-21807
Melt-spin processing of high (Tc) oxide superconductors
[DE94-000696] p 2036 N94-22582
FUSELAGES
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
Nonlinear and progressive failure aspects of transport composite fuselage damage tolerance p 1834 N94-22609
Demonstrating damage tolerance of composite airframes p 1647 N94-22623
FUSION REACTORS
Multi-CPU plasma fluid turbulence calculations on a CRAY Y-MP C90
[DE93-015425] p 1801 N94-20562
FUZZY SETS
Logic oriented neural networks p 1782 N94-22182
FUZZY SYSTEMS
Telerobotic control of a mobile coordinated robotic server, executive summary
[NASA-CR-194685] p 1821 N94-20044
Reconfigurable fuzzy cell
[NASA-CASE-MSC-21613-1] p 1907 N94-20492
Reentry vehicle adaptive telemetry
[DE94-001168] p 1656 N94-21852
Fuzzy and neural control
[NASA-TM-108753] p 1947 N94-22270
Automated cloud classification with a fuzzy logic expert system p 1875 N94-22313

G

GALACTIC CLUSTERS
X ray archeology in the Coma cluster
[NASA-CR-194799] p 2054 N94-20175
Radio galaxies and their environment
[DE93-040851] p 2150 N94-22397
Magnetic reconnection in emission nebulae in clusters of galaxies p 2010 N94-22700
GALACTIC EVOLUTION
Dust content of a hydrogen rich, low surface brightness galaxy and the luminosity history of 3C273
[NASA-CR-194705] p 2056 N94-21779
Magnetic superbubbles in the galactic disk and halo p 2009 N94-22694
GALACTIC HALOS
The x ray halo of Cen X-3
[NASA-CR-189309] p 2055 N94-21295
How to handle 6GBytes a night and not get swamped p 2058 N94-22444
GALACTIC MASS
Magnetic superbubbles in the galactic disk and halo p 2009 N94-22694
GALACTIC NUCLEI
Spatial distribution of near infrared line radiation in galactic nuclei measured with Fabry-Perot spectrometer FAST
[MPE-239] p 2081 N94-21136
Pair plasmas in the galactic center region and in Nova Muscae p 2009 N94-22691
GALACTIC RADIATION
Radio galaxies and their environment
[DE93-040851] p 2150 N94-22397
GALACTIC ROTATION
Generation and maintenance of bisymmetric spiral magnetic fields in disk galaxies in differential rotation p 2010 N94-22695
GALACTIC STRUCTURE
X ray archeology in the Coma cluster
[NASA-CR-194799] p 2054 N94-20175
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458
GALAXIES
CCD surface photometry of galaxies p 2058 N94-22445
Visualizing the universe, part 1 p 2064 N94-22476
GALERKIN METHOD
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
MGGHAT: Elliptic PDE software with adaptive refinement, multigrid and high order finite elements p 1956 N94-21470
Numerical study of a multigrid method with four smoothing methods for the incompressible Navier-Stokes equations in general coordinates p 1806 N94-21487
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
GALILEO PROJECT
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data p 2101 N94-20686
GALLIUM ARSENIDE LASERS
First results on InGaAsP separate confinement heterostructure diode lasers
[AD-A270849] p 1815 N94-19878
AlGaAs laser diode FM spectrum: Phased array antenna application p 1746 N94-22196
GALLIUM ARSENIDES
High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312
An x-band peeled HEMT amplifier p 1732 N94-20498
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Ellipsometric studies of sputtered silicon nitride on n-GaAs p 1709 N94-20972
Multiple-wavelength angle-of-incidence ellipsometry: Application to silicon nitride-gallium arsenide structures p 2019 N94-20974
Structural and chemical analysis of a silicon nitride film on GaAs by null ellipsometry p 1709 N94-20975
Ellipsometric measurements of molecular-beam-epitaxy-grown semiconductor multilayer thicknesses: A comparative study p 1710 N94-20983
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis p 1710 N94-20984
Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry p 1796 N94-20985
Variable angle spectroscopic ellipsometric characterization of surface damage in chemical-mechanical polished GaAs p 1710 N94-20986
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
Polarized-light reflection mode p-i-n modulators with GaAs/AlGaAs multiple quantum well active layers: Design and simulation p 2023 N94-20996
GaAs(100) surface modifications at elevated temperatures, studied by in-situ spectroscopic ellipsometry p 2023 N94-20997
Ellipsometric study of GaAs(100) surface changes induced at elevated temperatures p 2023 N94-20998
Temperature dependence of optical properties of AlAs, studied by in-situ spectroscopic ellipsometry p 2023 N94-20999
Study of concentration-dependent dielectric properties of n-type GaAs using variable angle spectroscopic ellipsometry p 2024 N94-21002
In-situ spectroscopic ellipsometry for real time semiconductor growth monitor p 2024 N94-21003
Real-time analysis of in-situ spectroscopic ellipsometric data during MBE growth of III-V semiconductors p 2024 N94-21004
Design and implementation of GaAs HBT circuits with ACME p 1758 N94-21117
Synthesis and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229
Decoupled computer architectures for very high-speed technologies
[AD-A271646] p 1900 N94-21301
Dephasing processes in III-V semiconductors
[AD-A271677] p 2028 N94-21362
Analysis of semi-insulating bulk GaAs using glow discharge mass spectrometry
[AD-A273032] p 1682 N94-21435
Bit-systolic arithmetic arrays using dynamic differential gallium arsenide circuits p 1767 N94-21724
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922
SLD results from the study of polarized Z(sup 0) produced at the SLC
[DE93-041020] p 1982 N94-21952
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings
[DE93-040547] p 1990 N94-22002
GALLIUM OXIDES
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb)
[DE93-040227] p 2033 N94-21992
GALLIUM PHOSPHIDES
Photoconductive Semiconductor Switches for pulsed power applications
[DE93-019411] p 1750 N94-20294
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922
GAME THEORY
Explanation closure, action closure, and the Sandewall test suite for reasoning about change
[TR-440] p 1907 N94-20522
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session)
[AD-A272125] p 1942 N94-20573
On the core-structure of minimum cost spanning tree games
[MEMO-1085] p 1953 N94-21047
Linear programming for standard and nonstandard Markovian control problems. A survey
[PB93-191948] p 1963 N94-21066
The communication complexity of set intersection problems
[MEMO-1077] p 1738 N94-21073
A model of negotiation in an extensive form game p 1965 N94-22075
GAMMA RAY ASTRONOMY
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights
[NASA-CR-194709] p 2056 N94-22281
GAMMA RAY BURSTS
Optical and Gamma Ray Space Observations
[NASA-TM-109389] p 2149 N94-20602
Simultaneous optical/gamma ray observations of GRB's p 2149 N94-20603
Gamma ray bursts from collisions of primordial small mass black holes with comets p 2150 N94-20604
Radio and optical emission: Spectral shapes and breaks in GRB
[NASA-CR-194763] p 2150 N94-21781
Relativistic shock spectra: A prediction
[NASA-CR-194764] p 2150 N94-21782
Compton Gamma Ray Observatory highlights of the sky survey p 2002 N94-22642
Dark matter: Neutron star halo and the nature of gamma-bursts p 2002 N94-22643
Relativistically expanding pair plasmas as bursting sources of cosmic gamma rays p 2003 N94-22646
Yohkoh Gamma ray Spectral Observations (YGSO) p 2004 N94-22656
Gamma ray burst as a result of the explosive instability in the magnetosphere of old neutron star p 2007 N94-22675
VHE gamma ray generation by radio pulsars p 2007 N94-22680
GAMMA RAY OBSERVATORY
Simultaneous optical/gamma ray observations of GRB's p 2149 N94-20603
A packet switched communications system for GRO p 1744 N94-21345
FITS data conversion efforts at the Compton Observatory Science Support Center p 1926 N94-22488
Compton Gamma Ray Observatory highlights of the sky survey p 2002 N94-22642
GAMMA RAY SPECTRA
Temperature dependence of CsI(Tl) gamma ray excited scintillation characteristics
[DE94-000836] p 2034 N94-22028
Yohkoh Gamma ray Spectral Observations (YGSO) p 2004 N94-22656
VHE gamma ray generation by radio pulsars p 2007 N94-22680
GAMMA RAY TELESCOPES
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights
[NASA-CR-194709] p 2056 N94-22281
The polarization sensitivity of the liquid xenon imaging telescope p 2056 N94-22282
GAMMA RAYS
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049

Simultaneous optical/gamma ray observations of GRB's p 2149 N94-20603
Gamma ray bursts from collisions of primordial small mass black holes with comets p 2150 N94-20604
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources [DE93-040260] p 1706 N94-21542
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights [NASA-CR-194709] p 2056 N94-22281
The polarization sensitivity of the liquid xenon imaging telescope p 2056 N94-22282
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485

GANYMEDE
Geology of Galileo Regio quadrangle, Ganymede p 2130 N94-20642

GAPS
Thermally activated retainer means utilizing shape memory alloy [NASA-CASE-MSC-21793-1] p 1654 N94-20304

GARNETS
Primary differentiation in the early Earth: Nd and Sr isotopic evidence from diamondiferous eclogites for both old depleted and old enriched mantle, Yakutia, Siberia p 1862 N94-20776
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb) [DE93-040227] p 2033 N94-21992

GAS ANALYSIS
Outgassing rate of Reemay Spunbonded Polyester and DuPont Double Aluminized Mylar [DE93-040015] p 1699 N94-19973
Dating native gold by noble gas analyses p 1684 N94-20652
The chondrite Mihonoseki: New observed fall p 2083 N94-20764
Materials processing and manufacturing technologies for diamond substrate multichip modules [AD-A271484] p 2027 N94-21319
Instantaneous velocity field imaging instrument for supersonic reacting flows [NASA-CR-191162] p 1809 N94-21607
The laser and its applications on environment and biotechnology research [DE94-000376] p 1820 N94-21957
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection [DE93-040593] p 1852 N94-22004
Passive Cryogenic Sampler [DE94-000918] p 1811 N94-22392

GAS COMPOSITION
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875
A calcium oxide sorbent process for bulk separation of carbon dioxide [DE93-019288] p 1847 N94-21540

GAS DETECTORS
Outgassing rate of Reemay Spunbonded Polyester and DuPont Double Aluminized Mylar [DE93-040015] p 1699 N94-19973
Development and demonstration of a personal monitoring system for exposure to hydrogen fluoride [DE93-041273] p 1891 N94-20935
Surface acoustic wave sensing of VOC's in harsh chemical environments [DE93-040721] p 1968 N94-21751

GAS DISCHARGES
Evaluation of externally heated pulsed MPD thruster cathodes [NASA-CR-191090] p 1670 N94-21565

GAS DISSOCIATION
Unlike-pair interactions at high pressure and high temperature [DE93-019948] p 1796 N94-19916
Ultrafast gas switching experiments [DE93-019071] p 1782 N94-21634
Performance assessment of low pressure nuclear thermal propulsion [NASA-TM-106433] p 1671 N94-21860
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas [DE94-000817] p 1820 N94-22585

GAS DYNAMICS
The sand bag model of the dispersion of the cosmic body in the atmosphere p 2084 N94-20823
Computational and analytical methods in nonlinear fluid dynamics [AD-A272722] p 1802 N94-21169
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments) [AD-A272918] p 1802 N94-21220
An analysis of pool surface deformation due to a plunging liquid jet [AD-A272970] p 1802 N94-21261
Dynamics of face seals for high speed turbomachinery p 1655 N94-21796

GAS EVOLUTION
Evolution of the Martian atmosphere p 2146 N94-21680

GAS EXPANSION
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647

GAS FLOW
The flow of gas across the piston-segments-cylinder interface [ECL-92-40] p 1824 N94-20594
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments) [AD-A272918] p 1802 N94-21220
Compliant seal development p 1655 N94-21795
F2D users manual: A two-dimensional compressible gas flow code [DE94-000653] p 1805 N94-22386

GAS GIANT PLANETS
Laboratory studies of low temperature rate coefficients: The atmospheric chemistry of the outer planets [NASA-CR-193485] p 1972 N94-20130

GAS INJECTION
Thrust expansion engine [AD-D015896] p 1669 N94-20121

GAS IONIZATION
Photoabsorption and Compton scattering in ionization of helium at high photon energies [DE94-000380] p 1974 N94-21658
Plasma lens experiments at the Final Focus Test Beam [DE93-041081] p 1981 N94-21688

GAS JETS
A high-intensity He-jet production source for radioactive beams [DE93-040247] p 1981 N94-21767

GAS LASERS
Design aspects and parametric characterisation of a neutral rare gas laser [AD-A271100] p 1814 N94-19850

GAS MIXTURES
Speed of sound data and related models for mixtures of natural gas constituents [PB93-200822] p 1968 N94-21447

GAS PRESSURE
Research on plasma-puff initiation of high Coulomb transfer switches [NASA-CR-194371] p 1994 N94-21289
Plasma-puff initiation of high Coulomb transfer switches p 1994 N94-21290
Characteristics of plasma-puff trigger for a inverse-pinch plasma switch p 1995 N94-21291
Stability curves for a thermoacoustic prime mover [AD-A272607] p 1968 N94-21422
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives [DE94-000330] p 1694 N94-21945

GAS TEMPERATURE
Fluid absorption solar energy receiver [NASA-CR-194688] p 1846 N94-20229
Are Plinian type eruptions possible on Venus? p 2123 N94-20803

GAS TRANSPORT
Parameters affecting hydrogen chloride measurements [AD-A271326] p 1851 N94-20025

GAS TUNGSTEN ARC WELDING
Thermocapillary and arc phenomena in stainless steel welds [DE94-000518] p 1821 N94-19859
Microscopic evaluation of low-temperature embrittlement in type 308 stainless steel welds [DE93-040266] p 1690 N94-20282

GAS TURBINE ENGINES
Design of a state-space controller for an advanced gas turbine engine [AD-A270859] p 1647 N94-20042
Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines [AD-A272998] p 1648 N94-21268
Thrust augmentation options for the Beta 2 two-stage-to-orbit vehicle [NASA-TM-106448] p 1648 N94-21563
The 1992 Seals Flow Code Development Workshop [NASA-CP-10124] p 1654 N94-21790
Brush seal bristle flexure and hard-rub characteristics p 1654 N94-21791
Air Force brush seal programs p 1655 N94-21793
Navy GTE seal development activity p 1655 N94-21794
Compliant seal development p 1655 N94-21795
Ceramic Technology Project [DE94-001011] p 1707 N94-21822
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies [DE93-041130] p 1826 N94-21938
Life prediction systems for critical rotating components p 1835 N94-22615

GAS TURBINES
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1 [NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2 [NASA-CR-189192-VOL-2] p 1648 N94-21583
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct [NASA-TM-106435] p 1649 N94-21758
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies [DE93-041130] p 1826 N94-21938
Performance calculations and research direction for a water enhanced regenerative gas turbine cycle [DE93-019866] p 1826 N94-21983

GAS-SOLID INTERACTIONS
Model for liquid boron oxide droplet gasification in H/O/C/F combustion environments [AD-A272911] p 1682 N94-21243
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663

GASEOUS DIFFUSION
A database of selected transport coefficients for combustion studies [DE93-041278] p 1678 N94-19889
Encounters of H and D atoms with O2 in water: Relative diffusion and reaction rates [DE93-018587] p 1970 N94-19956

GASEOUS FUELS
Biofuels: Project summaries [DE93-010003] p 1712 N94-19984

GASIFICATION
Model for liquid boron oxide droplet gasification in H/O/C/F combustion environments [AD-A272911] p 1682 N94-21243

GASTROINTESTINAL SYSTEM
Effect of copper sulphate on the rate of afferent discharge in the gastric branch of the vagus nerve in the rat p 1887 N94-21907
Conditioned taste aversion induced by motion is prevented by selective vagotomy in the rat p 1887 N94-21908

GATES (CIRCUITS)
CMOS gate array characterization procedures [AD-A269943] p 2014 N94-20029
Resistive gate magnetic field sensor [AD-D015923] p 1749 N94-20199
Characteristics of 0.8- and 0.2-microns gate length In(x)Ga(1-x) As/In(0.52)Al(0.48)As/InP (0.53 less than or equal to x less than or equal to 0.70) modulation-doped field-effect transistors at cryogenic temperatures p 1733 N94-20499
Design of CMOS logic gates for TID radiation p 1754 N94-21083
Mixed voltage VLSI design p 1756 N94-21104
Test pattern generation for ILA sequential circuits p 1757 N94-21107
VLSI design for reliability-hot carrier effects [AD-A271586] p 1761 N94-21256
Design and test of field programmable gate arrays in space applications p 1765 N94-21710
Defect-sensitivity analysis of an SEU immune CMOS logic family p 1765 N94-21711
Dimension scaling effects on the yield sensitivity of HEMT digital circuits p 1765 N94-21712
A high speed CMOS A/D converter p 1767 N94-21726
Behavior of faulty double BJT BiCMOS logic gates p 1767 N94-21727
On fast carry select adders p 1767 N94-21728

GAUGE INVARIANCE
On the twisted N=2 superconformal structure in 2d gravity coupled to matter [DE93-628627] p 2037 N94-20178

GAUGE THEORY
On the twisted N=2 superconformal structure in 2d gravity coupled to matter [DE93-628627] p 2037 N94-20178
Lattice gauge theory: Present status [DE93-041154] p 2038 N94-21692

GAUSSIAN ELIMINATION
On the numerical stability of quasi-definite systems [DE93-019404] p 1950 N94-20217

GEAR TEETH
The relative noise levels of parallel axis gear sets with various contact ratios and gear tooth forms [NASA-TM-106431] p 1826 N94-21756

GEARS
A design optimization procedure for epicyclic gears
[MATHS-REPT-A-188] p 1822 N94-20146
The relative noise levels of parallel axis gear sets with various contact ratios and gear tooth forms
[NASA-TM-106431] p 1826 N94-21756
GELATION
Polymer gels as precursors to high-performance materials
[AD-A270937] p 1699 N94-20046
GELS
Polymer gels as precursors to high-performance materials
[AD-A270937] p 1699 N94-20046
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546
Swelling equilibria for cationic 2-hydroxyethyl methacrylate (HEMA)-based hydrogels
[DE94-000728] p 1707 N94-21856
GENERAL AVIATION AIRCRAFT
Aviation safety research. Volume 1: Literature review of sources of aviation accident and incident data and selected factors contributing to accidents
[PB93-202885] p 1641 N94-21428
GENETIC ALGORITHMS
General asymmetric neural networks and structure design by genetic algorithms: A learning rule for temporal patterns
[DE94-001254] p 1947 N94-22563
GENETICS
Statistical analysis of a reciprocal translocations data base
[RR-900-I] p 1963 N94-20165
GEOCHEMISTRY
The Koshak section: Evidence for element fractionation and an oxidation event at the K/T boundary p 1862 N94-20641
Core formation in the Moon: The mystery of the excess depletion of Mo, W and P p 2095 N94-20651
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
Primary differentiation in the early Earth: Nd and Sr isotopic evidence from diamondiferous eclogites for both old depleted and old enriched mantle, Yakutia, Siberia p 1862 N94-20776
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis p 2118 N94-20779
Discovery Venera surface: Atmosphere geochemistry experiments mission concept p 2123 N94-20806
Consortium study of lunar meteorites Yamato-793169 and Asuka-881757: Geochemical evidence of mutual similarity, and dissimilarity versus other mare basalts p 2085 N94-20857
Petrology and geochemistry of VLT glasses from double drive tube 79001/2 p 1687 N94-20870
K, U, and Th behavior in Martian environmental conditions p 2141 N94-20908
Core formation, wet early mantle, and H2O degassing on early Mars p 2145 N94-21674
GEOCHRONOLOGY
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
Dating native gold by noble gas analyses p 1684 N94-20652
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Structural evidence for reorientation of Miranda about a paleo-pole p 2098 N94-20671
U-Pb provenance ages of shocked zircons from the K-T boundary, Raton Basin, Colorado p 1685 N94-20701
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778
The age of the Pretoria Saltpan impact crater, South Africa p 1863 N94-20798
Age and thermochronology of K-feldspars from the Manson Impact Structure p 1863 N94-20899
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676
GEODESY
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
GEODYNAMICS
Dynamics of large scale impacts on Venus and Earth p 2098 N94-20666
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
GEOGRAPHIC INFORMATION SYSTEMS
Studying Venus using a GIS database p 2105 N94-20707
Drought early warning system for crop production p 1840 N94-20966
Integration opportunities for computer models, methods, and GIS used in Corps planning studies
[AD-A271714] p 2044 N94-21354
Urban applications of satellite remote sensing and GIS analysis
[PB93-202174] p 1842 N94-21855
Computer-aided design system for objects location and reservoir with dispersed resource evolution investigation p 1923 N94-22064
GEOIDS
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
Influence of geoid model uncertainty on the determination of ocean circulation with satellite altimetry
[PB93-219301] p 1842 N94-22097
GEOLOGICAL FAULTS
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Thermal and rheological controls on magma migration in dikes: Examples from the east rift zone of Kilauea volcano, Hawaii p 1862 N94-20673
Constraints on the rate of discharge and duration of the Mangala Valles flood p 2099 N94-20674
Chocolate tablet aspects of cytherean Meshkenet Tessera p 2106 N94-20710
Ridge belt-related scarps and troughs: Compressional crustal bending on Venus p 2106 N94-20711
Rifting at Devana Chasma, Venus: Structure and estimation of the effective thickness of the elastic lithosphere p 2113 N94-20754
Extensional history of Mars' Tharsis Region p 2125 N94-20814
Complex structure of the Thaumasia region of Mars p 2125 N94-20815
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
Wrinkle ridges, reverse faulting, and the depth penetration of lithospheric stress in lunae planum, Mars p 2141 N94-20910
On the origin and evolution of circular forms observed in remote sensing images of the Rio de Janeiro State, Brazil p 1839 N94-20963
GEOLOGICAL SURVEYS
Evidence for an ice sheet/frozen lake in Utopia Planitia, Mars p 2089 N94-20388
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Constraints on the rate of discharge and duration of the Mangala Valles flood p 2099 N94-20674
Kalkkop crater, Eastern Cape: A new impact crater in South Africa p 1862 N94-20714
Discharge rates in Ma'adim Vallis, Mars p 2128 N94-20830
Complex ridged terrain-related ridge belts on Venus: Global distribution and classification p 2129 N94-20835
Experiences in airborne computing at NRC for geophysical exploration applications p 1783 N94-22185
Interpretation of Ground Penetrating Radar data at the Hanford Site, Richland, Washington
[DE93-040409] p 1743 N94-22557
GEOLOGY
Cryoplanation terraces of interior and western Alaska p 2091 N94-20396
Delimitation of terrestrial impact craters by way of pseudotachylytic rock distribution p 1863 N94-20783
Tumuli and tubes: Teaching scientific techniques p 2039 N94-20818
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
GEOMAGNETIC TAIL
Modeling the minimum energy state of the Earth's magnetotail
[AD-A267984] p 1856 N94-20485
GEOMAGNETISM
A general purpose ionospheric ray tracing procedure
[AD-A271058] p 1854 N94-19860
Narsarsuaq Geophysical Observatory: Magnetic results, 1985 - 1990
[DATA-REPT-93-1] p 1856 N94-20607
Magnetic results 1991: Brorfelde, Godhavn, Thule and Narsarsuaq
[DATA-REPT-92-3] p 1856 N94-20608
Thule Geophysical Observatory: Magnetic results 1985 - 1990
[DATA-REPT-92-4] p 1857 N94-20609
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647
Structural evidence for reorientation of Miranda about a paleo-pole p 2098 N94-20671
Reverse polarity magnetized melt rocks from the Chicxulub impact structure, Yucatan Peninsula, Mexico p 1863 N94-20843
Physics of magnetospheric boundary layers
[NASA-CR-194725] p 1858 N94-21836
GEOMETRICAL OPTICS
RCS Analysis of Plate Geometries, parts 1 and 2
[NASA-CR-194173] p 1717 N94-20269
GEOMETRICAL THEORY OF DIFFRACTION
High resolution electron crystallography of protein molecules
[DE93-040114] p 1884 N94-19826
An extended UTD analysis for the scattering and diffraction from cubic polynomial strips
[NASA-CR-194581] p 1716 N94-20139
RCS Analysis of Plate Geometries, parts 1 and 2
[NASA-CR-194173] p 1717 N94-20269
High-frequency techniques for RCS prediction of plate geometries p 1717 N94-20270
GEOMETRY
Geometric optimization
[DE93-040152] p 1917 N94-21764
Non commutative geometry and physics
[PB93-215499] p 1961 N94-22264
GEOMORPHOLOGY
Hydrological consequences of ponded water on Mars p 2089 N94-20383
Evidence for an ice sheet/frozen lake in Utopia Planitia, Mars p 2089 N94-20388
Geomorphic evidence for an eolian contribution to the formation of the Martian northern plains p 2092 N94-20402
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Chicxulub impact basin: Gravity characteristics and implications for basin morphology and deep structure p 1862 N94-20757
Numerical modeling of impact erosion of atmospheres: Preliminary results p 2131 N94-20847
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
Degradation sequence of young lunar craters from orbital infrared survey p 2136 N94-20874
On the origin and evolution of circular forms observed in remote sensing images of the Rio de Janeiro State, Brazil p 1839 N94-20963
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667
GEOPHYSICAL OBSERVATORIES
Narsarsuaq Geophysical Observatory: Magnetic results, 1985 - 1990
[DATA-REPT-93-1] p 1856 N94-20607
Magnetic results 1991: Brorfelde, Godhavn, Thule and Narsarsuaq
[DATA-REPT-92-3] p 1856 N94-20608
Thule Geophysical Observatory: Magnetic results 1985 - 1990
[DATA-REPT-92-4] p 1857 N94-20609
GEOPHYSICS
Inversion of gravity and bathymetry in oceanic regions for long-wavelength variations in upper mantle temperature and composition
[NASA-CR-192272] p 1882 N94-20131
Progress In Electromagnetics Research Symposium (PIERS)
[NASA-CR-194629] p 1718 N94-20403
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Comparative hypsometric analysis of both Earth and Venus topographic distributions p 2108 N94-20722
A tectonic resurfacing model for Venus p 2118 N94-20781
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024

GEOSYNCHRONOUS ORBITS
Inclined orbits and interference to stationary service and to stationary service by satellite p 1653 N94-22188
GERMANIUM
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953
Monocrystalline germanium film on sapphire
[AD-D015925] p 2017 N94-20348
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009
GERMANIUM ALLOYS
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312
Stable, high-efficiency amorphous-silicon solar cells with low hydrogen content
[DE93-018214] p 1848 N94-21826
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987
GERMANIUM COMPOUNDS
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973
GERMANIUM ISOTOPES
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
GERMANY
Documents on the history of aeronautical and space research in Germany, 1900 - 1970
[DLR-MITT-92-08] p 2152 N94-20543
GIBBS FREE ENERGY
A Green function method for calculation of atomic and electronic properties of isolated adsorbate atoms
[ETN-93-95055] p 2014 N94-20018
GIMBALS
Apparatus for simulating an exoatmospheric structure
[NASA-CASE-MSC-21975-1] p 1653 N94-20339
GLACIAL DRIFT
Ice in the northern plains: Relic of a frozen ocean? p 2090 N94-20391
GLACIERS
Workshop on the Martian Northern Plains: Sedimentological, Periglacial, and Paleoclimatic Evolution
[NASA-CR-194831] p 2088 N94-20382
Milankovitch insulation forcing and cyclic formation of large-scale glacial, fluvial, and eolian landforms in central Alaska p 2089 N94-20386
A wet-geology and cold-climate Mars model: Punctuation of a slow dynamic approach to equilibrium p 2090 N94-20389
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434
Ancient Martian valley genesis and paleoclimatic inference: The present as a key to the past p 2142 N94-21661
GLASS
Metal-glass composite field-emitting arrays
[AD-D015942] p 1673 N94-20064
Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262
Neutron-scattering studies of Yb-bearing silicate glasses
[DE93-019768] p 1700 N94-20265
Optics survivability support, volume 2
[DE93-040310] p 1985 N94-20263
Plasma chemical vapor deposition of halide glasses
[AD-D015933] p 1701 N94-20331
Kinetics of phase transformations in glass forming systems
[NASA-CR-194270] p 1701 N94-20347
Sintering silicon nitride
[NASA-CASE-LEW-15489-1] p 1703 N94-20529
The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640
Impact glasses from the ultrafine fraction of lunar soils p 2097 N94-20662
Self diffusion of alkaline-Earth in Ca-Mg-aluminosilicate melts: Experimental improvements on the determination of the self-diffusion coefficients p 1684 N94-20669
Post-igneous redistribution of components in eucrites p 1685 N94-20684
C-O volatiles in Apollo 15 and Apollo 17 picritic glasses p 1685 N94-20727
Further analyses of Rio Cuarto impact glass p 1685 N94-20745
Magnetic properties and Moessbauer analyses of glass from the K-T boundary, Beloc, Haiti p 1685 N94-20753
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
Origin of the Apollo 15 very low Ti green glass. A perspective from the compositional diversity in the very low Ti glasses p 1685 N94-20759
The age of the Pretoria Saltpan impact crater, South Africa p 1863 N94-20798
Origin of high-Ti lunar ultramafic glasses p 1686 N94-20853
Petrology and geochemistry of VLT glasses from double drive tube 79001/2 p 1687 N94-20870
Optical properties of chromium and neodymium in zirconium - barium - lanthanum - aluminum fluoride glass
[AD-A271609] p 1987 N94-21236
The energy performance of prototype holographic glazings
[DE93-040451] p 1809 N94-21545
Activities Report of the Institute of Applied Physics
[ETN-93-93749] p 1966 N94-21798
Modeling of glass fabrication p 1711 N94-21800
GLAZES
Microstructural stability of wrought, laser and electron beam glazed NARloy-Z alloy at elevated temperatures
[NASA-TM-108431] p 1689 N94-20100
GLIDE PATHS
All-weather precision landing system for aircraft in remote areas
[AD-D015924] p 1643 N94-20197
GLOBAL POSITIONING SYSTEM
Detection of traveling ionospheric disturbances induced by atmospheric gravity waves using the global positioning system p 1723 N94-20425
An investigation into the integration of meter-level range and millimeter-level phase data using a multimode stimulation for optimal filter estimation software package
[AD-A267955] p 1751 N94-20483
A software architecture for a small autonomous underwater vehicle navigation system
[AD-A272322] p 1643 N94-21037
Vector gravimetry by a combination of inertial and GPS satellite measurements
[ISBN-0-315-61980-5] p 1861 N94-22424
A robust quality control system for GPS navigation and kinematic positioning
[ISBN-0-315-83148-0] p 1644 N94-22427
GLOBAL WARMING
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930
Climate forcings and feedbacks p 1869 N94-21641
Accuracy requirements — for monitoring of climate changes p 1869 N94-21642
GLOW DISCHARGES
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
Growth mechanisms and characterization of hydrogenated amorphous-silicon-alloy films
[DE93-018202] p 1699 N94-20047
Laser diagnostics of RF hydrogen plasma reactors: Application to the processing of III-V materials
[AD-A272659] p 1994 N94-21214
Analysis of semi-insulating bulk GaAs using glow discharge mass spectrometry
[AD-A273032] p 1682 N94-21435
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004
GLUONS
A conceptual design for the STAR endcap electromagnetic calorimeter
[DE93-040801] p 1807 N94-19990
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
B production at D0
[DE93-019250] p 1972 N94-20291
New perspectives in quantum chromodynamics
[DE93-041021] p 2038 N94-21935
Time evolution of the quark-gluon plasma
[DE94-000804] p 1998 N94-22389
GLUTAMIC ACID
Immunocytochemical localization of glutamic acid decarboxylase (GAD) and substance P in neural areas mediating motion-induced emesis: Effects of vagal stimulation on GAD immunoreactivity p 1887 N94-21909
GLYCOLS
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021
GOES SATELLITES
Comparison of radiation and cloud parameters derived from satellite and aircraft measurements during FIRE 2 cirrus IFO p 1872 N94-22299
GOGGLES
Night vision goggle model F4949 preflight adjustment/assessment procedures
[AD-A271079] p 1895 N94-19935
GOLD
Automated HMC assembly
[DE93-040641] p 1749 N94-20005
Dating native gold by noble gas analyses p 1684 N94-20652
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766
Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold
[DE93-041126] p 1694 N94-21937
GOLD ALLOYS
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312
GOLD ISOTOPES
Searching for high baryon density at the AGS with ARC
[DE93-041155] p 1975 N94-21693
GOODNESS OF FIT
Extracting information from wrong answers in computerized adaptive testing
[AD-A272832] p 1894 N94-21434
GOVERNMENT PROCUREMENT
NASA procurement: Planning for pilot test of new procurement procedures is adequate. Report to the Chairman, Committee on Governmental Affairs, US Senate
[GAO/NSIAD-94-67] p 2039 N94-20236
Implementing Electronic Data Interchange (EDI) with small business suppliers in the pre-award acquisition process
[AD-A271767] p 1945 N94-21305
NASA procurement report, FY 1992
[NASA-TM-109390] p 2040 N94-21623
Summary data on all NASA procurement actions
[NASA-TM-109392] p 2040 N94-21638
GOVERNMENT/INDUSTRY RELATIONS
Statement of David E. Baldwin, Associate Director for Energy, Lawrence Livermore National Laboratory and John C. Crawford, Vice President, Sandia National Laboratories, California, to the Subcommittee on Research and Development of the Committee on Environment and Public Works, US Senate, Washington, DC, 22 March 1993
[DE93-017991] p 1844 N94-19803
Microdynamic model of reproduction: Taxation and currency issue as regulators of economy p 2053 N94-22084
GRADIENTS
Chicxulub impact basin: Gravity characteristics and implications for basin morphology and deep structure p 1862 N94-20757
GRAIN BOUNDARIES
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027
Microstructural stability of wrought, laser and electron beam glazed NARloy-Z alloy at elevated temperatures
[NASA-TM-108431] p 1689 N94-20100
Examinations of composition and deformation behavior of intermetallic phases on the basis of Fe3(AlSi)
[GKSS-92/E/16] p 1692 N94-21311
Electron holography applied to the study of ceramic materials
[DE94-000329] p 1707 N94-21653
Microtextural characterization of annealed and deformed copper
[DE93-040144] p 1695 N94-21990
Temperature-dependent ion beam mixing
[DE93-040281] p 2033 N94-21999
GRAIN SIZE
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging p 2082 N94-20659
Lamellar olivine in the Divnoe achondrite: Evidence for high-pressure exsolution? p 1685 N94-20679
Optical effects of space weathering on lunar soils and the role of the finest fraction p 2101 N94-20687
Visible-infrared properties of controlled laboratory soils p 1685 N94-20689
Thermal conductivity measurements of particulate materials under Martian conditions p 1685 N94-20703

The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
[CONTRIB-5241(804)] p 2084 N94-20795
Coagulation of grains in static and collapsing protostellar clouds p 2085 N94-20865
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications
[AD-A272897] p 1704 N94-21197

GRAMMARS
Program derivation in acyclic graphs and related problems
[PB93-191765] p 1903 N94-19994
Bottom-up abstract interpretation of logic programs
[PB93-191773] p 1928 N94-19995
Representation of idioms in connectionist models p 1940 N94-20247
A single layer higher order neural net and its application to grammar recognition p 1941 N94-20251
Syntactic neural networks for natural language processing p 1941 N94-20254
GWB: Manual for the Grammar WorkBench version 1.5
[TR-92-14] p 1909 N94-21061

GRANITE
Chronology of lunar granite 12033,576: Resetting of Rb-Sr and K-Ca isochrons p 2115 N94-20763
The age of the Pretoria Saltpan impact crater, South Africa p 1863 N94-20798

GRANTS
Summary data on all NASA procurement actions
[NASA-TM-109392] p 2040 N94-21638

GRANULAR MATERIALS
The Coulomb anomaly in strongly disordered films
[AD-A271095] p 2012 N94-19849
Multiplicity of chondrule heating events and the coarsening of chondrule textures p 2085 N94-20860
Dynamic response of multiphase porous media
[AD-A272915] p 1831 N94-21219

GRAPH THEORY
Program derivation in acyclic graphs and related problems
[PB93-191765] p 1903 N94-19994
On multiflow problems
[RR-889-M] p 1950 N94-20125
Determining the distance to the perfect matching polytope of a bipartite graph
[RR-895-M] p 1950 N94-20161
Label-connected graphs: An overview
[RR-898-M] p 1950 N94-20163
Totally strong and strong graphs
[RR-902-I] p 1951 N94-20237
Applying the INN model to the MaxClique
[DE93-040137] p 1906 N94-20276
Half-integral flows in a planar graph with four holes
[RR-894-M] p 1951 N94-20302
Graph minors: Structure theory and algorithms
[AD-A271851] p 1952 N94-20613
Long cycles in graphs containing a 2-factor with many odd components
[MEMO-1086] p 1953 N94-21048
Degree sums, k-factors and Hamiltonian cycles in graphs
[MEMO-1078] p 1953 N94-21074
Modular interval spaces
[PB93-220663] p 1961 N94-22266

GRAPHIC ARTS
The manager's guide to NASA graphics standards
[NHB-1430.2] p 2042 N94-20308

GRAPHICAL USER INTERFACE
Advanced software development workstation: Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
[NASA-CR-193643] p 1930 N94-21065
A graphical user-interface development tool for intelligent computer-assisted instruction systems
[AD-A272988] p 1912 N94-21265
Military satellite communications decision support system requirements analysis and user interface design
[AD-A273047] p 1740 N94-21436
Design and implementation of a status at a glance user interface for a power distribution expert system
[NASA-TM-106412] p 1715 N94-21589
Design document and database specifications for the Naval Interactive Data Analysis System (NIDAS), version 1.0
[NASA-CR-194817] p 2045 N94-21865
Application development in a PC/LAN environment p 1923 N94-22067
Software systems used for unstructured grid generation at NASA Langley p 1918 N94-22351
An object-oriented data reduction system in Fortran p 2046 N94-22447
GUIs in the MIDAS environment p 2047 N94-22449
Writing instrument interfaces with xf/tktcl p 1925 N94-22480
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485
The HEASARC graphical user interface p 1926 N94-22487
The University of Hawaii Institute for Astronomy CCD camera control system p 1828 N94-22489
An object-oriented approach for supporting both X and terminal interfaces p 1926 N94-22491
AXAF user interfaces for heterogeneous analysis environments p 1926 N94-22507
STARBASE: Database software for the automated plate scanner p 1927 N94-22512
XPI: The Xanadu Parameter Interface p 1927 N94-22513
PCIPS 2.0: Powerful multiprofile image processing implemented on PCs p 1927 N94-22532
SPECFOCUS: An IRAF task for focusing spectrographs p 1965 N94-22540

GRAPHITE
Lightweight battery electrode and method of making it
[AD-D015895] p 1749 N94-20120
Intercalated hybrid graphite fiber composite
[NASA-CASE-LEW-15241-1] p 1673 N94-20539
Graphite/polyurethane flexible composites: Mechanical and vibration damping properties
[AD-A271608] p 1674 N94-20950
Performance of carbon-based hot frit substrates
[DE94-000509] p 1676 N94-21754

GRAPHITE-EPOXY COMPOSITES
Thermal stability relationships between PMR-15 resin and its composites
[NASA-TM-106285] p 1675 N94-21486
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504

GRAPHITE-POLYIMIDE COMPOSITES
R and D to HOPE airframe p 1665 N94-21406

GRAPHS (CHARTS)
Degree sums, k-factors and Hamiltonian cycles in graphs
[MEMO-1078] p 1953 N94-21074
Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264

GRATINGS (SPECTRA)
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings
[DE93-040547] p 1990 N94-22002

GRAVIMETRY
Vector gravimetry by a combination of inertial and GPS satellite measurements
[ISBN-0-315-61980-5] p 1861 N94-22424

GRAVITATION
On the twisted N=2 superconformal structure in 2d gravity coupled to matter
[DE93-628627] p 2037 N94-20178
Venus gravity: New Magellan low altitude data p 2117 N94-20772

GRAVITATION THEORY
On the twisted N=2 superconformal structure in 2d gravity coupled to matter
[DE93-628627] p 2037 N94-20178

GRAVITATIONAL COLLAPSE
Coagulation of grains in static and collapsing protostellar clouds p 2085 N94-20865
New production mechanisms for unstable nuclei in stars, supernovae, and the big bang
[DE93-018627] p 2081 N94-21618

GRAVITATIONAL EFFECTS
Equilibrium models of mass distribution and collisional lifetimes of asteroids p 2088 N94-20877
System test results of the Advanced Technology Anti-G Suit (ATAGS)
[AD-A271535] p 1896 N94-20914

GRAVITATIONAL FIELDS
Gravity investigation of the Manson impact structure, Iowa p 2082 N94-20694
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
GMM-1: A 50 degree and order gravitational field model for Mars p 2117 N94-20774
Response of the topography and gravity field on Venus to mantle upwelling beneath a chemical boundary layer p 2117 N94-20775
Vector gravimetry by a combination of inertial and GPS satellite measurements
[ISBN-0-315-61980-5] p 1861 N94-22424

GRAVITATIONAL WAVES
Interactions of free modes, tides, and gravity waves in the middle atmosphere
[REPT-84] p 1855 N94-20155

GRAVITY ANOMALIES
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Gravity investigation of the Manson impact structure, Iowa p 2082 N94-20694
Chicxulub impact basin: Gravity characteristics and implications for basin morphology and deep structure p 1862 N94-20757
Is there uniformitarian or catastrophic tectonics on Venus? p 2129 N94-20839
Characterization of the Marquez Dome buried impact crater using gravity and magnetic data p 1863 N94-20862
Possible flexural signatures around Olympus and Ascraeus Montes, Mars p 2142 N94-20911
Vector gravimetry by a combination of inertial and GPS satellite measurements
[ISBN-0-315-61980-5] p 1861 N94-22424

GRAVITY WAVES
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
Detection of traveling ionospheric disturbances induced by atmospheric gravity waves using the global positioning system p 1723 N94-20425
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar p 1874 N94-22310

GRAZING INCIDENCE
Near grazing scattering from non-Gaussian ocean surfaces p 1726 N94-20438
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987

GREEN'S FUNCTIONS
A Green function method for calculation of atomic and electronic properties of isolated adsorbate atoms
[ETN-93-95055] p 2014 N94-20018
Shielding from space radiations
[NASA-CR-194683] p 1895 N94-20063
Multigrid properties of upwind-biased data reconstructions p 1806 N94-21485
Scattering by cavity-backed antennas on a circular cylinder p 1741 N94-21886
Interface reflection of spherical acoustic waves in the first- and second-order rational parabolic approximations and their artifacts
[PB93-215424] p 1969 N94-22261
Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised)
[PB93-215432] p 1969 N94-22262

GREENHOUSE EFFECT
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
Technology to prevent greenhouse effect gases
[DE94-707420] p 1851 N94-20116
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
Research in progress: FY 1992
[DE94-000410] p 1836 N94-20936
Accuracy requirements --- for monitoring of climate changes p 1869 N94-21642
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
A model for the evolution of CO2 on Mars p 2144 N94-21671
Early Mars: The inextricable link between internal and external influences on valley network formation p 2146 N94-21681
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044
Survey on evaluation of energy technology contributing to preservation of the global environment. 2
[DE94-714884] p 1853 N94-22051
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258

GREENLAND
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434
Narsarsuaq Geophysical Observatory: Magnetic results, 1985 - 1990
[DATA-REPT-93-1] p 1856 N94-20607
Magnetic results 1991: Brorfelde, Godhavn, Thule and Narsarsuaq
[DATA-REPT-92-3] p 1856 N94-20608

Thule Geophysical Observatory: Magnetic results 1985 - 1990
[DATA-REPT-92-4] p 1857 N94-20609

GRID GENERATION (MATHEMATICS)
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
A comparative study of an ABC and an artificial absorber for truncating finite element meshes
[NASA-CR-194275] p 1716 N94-20160
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids p 1724 N94-20431
Massively parallel computation of RCS with finite elements p 1728 N94-20437
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
Adaptive grids for quasilinear parabolic systems in one space dimension
[ETN-93-93611] p 1954 N94-21137
Flow transition with 2-D roughness elements in a 3-D channel p 1806 N94-21466
A multigrid method for steady Euler equations on unstructured adaptive grids p 1957 N94-21476
Two-level Schwartz methods for nonconforming finite elements and discontinuous coefficients p 1957 N94-21477
Unstructured multigrid through agglomeration p 1958 N94-21484
Multigrid properties of upwind-biased data reconstructions p 1806 N94-21485
Superpatch
[NASA-CR-177627] p 1914 N94-21489
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531
RHALE: A 3-D MMALE code for unstructured grids
[DE93-019405] p 1916 N94-21635
User's guide for the casting process simulator software CaPS-2D, version 1.0
[DE93-040398] p 1917 N94-21923
Unstructured Grid Generation Techniques and Software
[NASA-CP-10119] p 1918 N94-22350
Software systems used for unstructured grid generation at NASA Langley p 1918 N94-22351
NASA-Ames Research Center unstructured technology development p 1919 N94-22352
Unstructured grid research and use at NASA Lewis Research Center p 1919 N94-22353
Grid generation requirements at Marshall Space Flight Center p 1919 N94-22354
Johnson Space Center CFD grid generation requirements p 1919 N94-22355
The 3-D unstructured mesh generation using local transformations p 1919 N94-22356
Status of VGRID/USM3D aero analysis system p 1919 N94-22357
Unstructured low-Mach number viscous flow solver p 1919 N94-22358
Robust unstructured grid generation with VGRID p 1919 N94-22359
Three-dimensional unstructured grid method applied to turbomachinery p 1919 N94-22360
Dynamic mesh adaption for triangular and tetrahedral grids p 1920 N94-22363
Cartesian-cell based grid generation and adaptive mesh refinement p 1920 N94-22364
The 2D and 3D hypersonic flows with unstructured meshes p 1920 N94-22365
Unstructured surface grid generation p 1920 N94-22366
The 3D Euler solutions using automated Cartesian grid generation p 1920 N94-22367
Accuracy assessment for grid adaptation p 1920 N94-22368
Time-dependent grid adaptation for meshes of triangles and tetrahedra p 1920 N94-22369
Computational geometry issues p 1920 N94-22370
NASA Langley developments in response calculations needed for failure and life prediction p 1836 N94-22621

GROUND BASED CONTROL
Automatic AVHRR image navigation software
[NASA-CR-194602] p 1643 N94-20148
Control vane guidance for a ducted-fan unmanned air vehicle
[AD-A271957] p 1645 N94-20561
Next Generation Weather Radar (NEXRAD) Principal User Processor (PUP) Operational Test and Evaluation (OT/E)
[AD-A273075] p 1868 N94-21519

GROUND EFFECT (COMMUNICATIONS)
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar p 1874 N94-22310

GROUND HANDLING
A study of parallel pier finger airport terminal configuration
[ISBN-0-315-83128-6] p 1652 N94-22425

GROUND STATE
High resolution infrared spectroscopy of cyclobutane: A study of vibrational mode coupling involving large amplitude, low frequency modes
[AD-A271987] p 1973 N94-20619
Proof of stability of the hydrogen molecule
[PB93-221026] p 1977 N94-22271
Low temperature absorption spectra and ground state electronic structure of tetrakis(2,6-di-tert-butylphenoxide)uranium(IV)
[DE94-000774] p 2035 N94-22387

GROUND STATIONS
Enhanced networks operations using the X Window System p 1932 N94-21329
The automated ground network system p 1932 N94-21330
Mission Operations Support Area (MOSA) for ground network support p 1932 N94-21331
Network command processing system overview p 1935 N94-21351
On-board closed-loop congestion control for satellite based packet switching networks
[NASA-TM-106446] p 1656 N94-21581
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549

GROUND TESTS
Combination of on ground experiments and analysis software for the evaluation of material degradation in space (SILEX project) p 1662 N94-21389
The International Telecommunications Satellite (INTELSAT) Solar Array Coupon (ISAC) atomic oxygen flight experiment: Techniques, results and summary p 1662 N94-21391
Atomic oxygen interaction with spacecraft materials: Relationship between orbital and ground-based testing for materials certification p 1663 N94-21393
Interpretation of Ground Penetrating Radar data at the Hanford Site, Richland, Washington
[DE93-040409] p 1743 N94-22557

GROUND TRACKS
New algorithm of ground track processing in high-frequency skywave over-the-horizon-B radar
[AD-A267821] p 1717 N94-20207

GROUND TRUTH
A general rough-surface inversion algorithm: Theory and application to SAR data p 1719 N94-20407
Relating ground truth collection to model sensitivity p 1719 N94-20409
Predicting LANDSAT MSS endmember signatures from corresponding higher resolution TM fraction images p 1839 N94-20962

GROUND WATER
Calderas produced by hydromagmatic eruptions through permafrost in northwest Alaska p 2089 N94-20385
Possible occurrence and origin of massive ice in Utopia Planitia p 2090 N94-20390
The distribution of ground ice on Mars p 2090 N94-20394
Seismic-triggering history of the catastrophic outflows in the Chryse region of Mars p 2091 N94-20399
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
Fluvial valleys in the heavily cratered terrains of Mars: Evidence for paleoclimatic change? p 2144 N94-21670
Early Mars: The inextricable link between internal and external influences on valley network formation p 2146 N94-21681
The Martian valley networks: Origin by niveo-fluvial processes p 2146 N94-21682

GROUND WIND
Analysis of wind observation from towers in the period 1977-1991
[KNMI-TR-148] p 1865 N94-20239
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413
A synoptic-scale overview of the TOGA COARE intensive observing period November 1992 to February 1993 based on analyses from US operational global data assimilation systems
[NASA-TM-104593] p 1868 N94-21605

GROUND-AIR-GROUND COMMUNICATION
A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites
[NASA-CR-191200] p 1762 N94-21566

GROUP DYNAMICS
Conversion and maintenance of Co-oP for Windows
[AD-A272513] p 1914 N94-21414

GROUP THEORY
F-spin concept and g-bosons in the interceding boson model
[ETN-93-93607] p 1973 N94-21136
The Robinson-Schensted and Schuetzenberger algorithms. Part 1: New combinatorial proofs
[CWI-AM-R9208-PT-1] p 1911 N94-21156
The Robinson-Schensted and Schuetzenberger algorithms. Part 2: Geometric interpretations
[CWI-AM-R9209-PT-2] p 1911 N94-21157
On semisimple cocommutative bialgebras
[CWI-AM-R9210] p 1954 N94-21158

GRUNEISEN CONSTANT
An equation of state for shock in homogeneous materials and comparison to shock data
[AD-A271436] p 1829 N94-19881

GUANIDINES
Guanidine based vehicle/binders for use with oxides, metals, and ceramics
[NASA-CASE-LEW-15314-1] p 1700 N94-20195

GUIDANCE (MOTION)
Strategy for motion of a moving body of quasi-polygonal form within a polygonal space p 1792 N94-22240

GUIDE VANES
Control vane guidance for a ducted-fan unmanned air vehicle
[AD-A271957] p 1645 N94-20561
Active control of wake/blade-row interaction noise through the use of blade surface actuators
[NASA-CR-4556] p 1968 N94-21608

GULF OF MEXICO
Research program on the Manson impact structure, Iowa p 1862 N94-20766
Green Sheet project: Dye sheet evolution
[AD-A272019] p 1883 N94-21443

GULF STREAM
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413

GYPSUM
Impact-induced devolatilization of CaSO4 anhydrite and implications for K-T extinctions: Preliminary results p 2085 N94-20840

H

H ALPHA LINE
Berne (Switzerland) solar observations: Data for April 1991 - August 1992
[REPT-59] p 2147 N94-21150

HABITABILITY
Columbus: Materials for 30 years habitability in space p 1662 N94-21387

HADRONS
The two-jet differential cross-section at CDF
[DE93-019905] p 1978 N94-19983
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
Energy and luminosity limits of hadron supercolliders
[DE93-019248] p 1980 N94-20300
Qualitative and quantitative aspects of the QCD theory of elastic form factors
[DE93-040864] p 2038 N94-21513
Hadronic molecules and scattering amplitudes from the nonrelativistic quark model
[DE94-000377] p 1974 N94-21657
Summary of the Hadronic Weak Interaction session
[DE94-000592] p 1975 N94-21775
New perspectives in quantum chromodynamics
[DE93-041021] p 2038 N94-21935

HALIDES
Plasma chemical vapor deposition of halide glasses
[AD-D015933] p 1701 N94-20331

HALL EFFECT
Performance potential of plasma thrusters: Arcjet and Hall thruster modeling
[AD-A271085] p 1667 N94-19847
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763

HALLEY'S COMET
The digital archive of the International Halley Watch p 2047 N94-22496

HALOGENS
Plasma chemical vapor deposition of halide glasses
[AD-D015933] p 1701 N94-20331

HALOS
The x ray halo of AM Her
[NASA-CR-189310] p 2054 N94-20142

HAMILTONIAN FUNCTIONS
A microscopic theory of quantum optics and new photon-locked bistable states
[AD-A271250] p 1983 N94-19901

Long cycles in graphs containing a 2-factor with many odd components
[MEMO-1086] p 1953 N94-21048
Degree sums, k-factors and Hamiltonian cycles in graphs
[MEMO-1078] p 1953 N94-21074
F-spin concept and g-bosons in the interceding boson model
[ETN-93-93607] p 1973 N94-21136

HANDBOOKS
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
Handbook. Volume 2: Digital systems validation. Chapter 18: Avionic data bus integration technology
[DOT/FAA/CT-88/10-VOL-2] p 1647 N94-20343
Technical manual PCDU MT 254
[FFI-92/7020] p 1751 N94-20553

HARDENING (MATERIALS)
Rad-hard computer elements for space applications p 1753 N94-21082

HARDNESS
Properties and potential of high-temperature niobium beryllides
[DE93-019169] p 1690 N94-20233
Automated radiation hard ASIC design tool p 1759 N94-21126
A quantitative model for interpreting nanometer scale hardness measurements of thin films
[DE93-040601] p 2034 N94-22005
Using the rule of mixtures to examine the hardness of Cu/Cu-Zr multilayers
[DE94-001068] p 1697 N94-22402

HARDNESS TESTS
Using the rule of mixtures to examine the hardness of Cu/Cu-Zr multilayers
[DE94-001068] p 1697 N94-22402

HARDWARE
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
PREVAIL-DM: A framework-based environment for formal hardware verification
[RR-899] p 1905 N94-20164
A SCSI-bus data acquisition system for nuclear spectroscopy experiments
[USIP-92-03] p 2042 N94-20193
Technical manual PCDU MT 254
[FFI-92/7020] p 1751 N94-20553
Correctness properties for iterated hardware structures p 1759 N94-21124

HARDWARE DESCRIPTION LANGUAGES
A statistical-based scheduling algorithm in automated data path synthesis p 1764 N94-21706
A novel visual hardware behavioral language p 1765 N94-21715
System level modelling using Petri nets and VHDL p 1772 N94-22113

HARMONIC EXCITATION
Adaptation of model parameters of a rail model at measured rail compliances
[ILR-MITT-274(1992)] p 1831 N94-21153

HARMONIC GENERATIONS
Acoustic microscopy and nonlinear effects in pressurized superfluid helium
[AD-A270598] p 1967 N94-19949
Photonics and nonlinear optics with molecular materials and polymers
[AD-A271747] p 1988 N94-21457
Effect of bandwidth on beam smoothing and frequency conversion at the third harmonic of the Nova laser
[DE93-019917] p 1819 N94-21920
Generation of harmonic radiation using the multi-cavity free-electron laser
[DE94-001261] p 1820 N94-21975

HARMONIC RADIATION
Generation of harmonic radiation using the multi-cavity free-electron laser
[DE94-001261] p 1820 N94-21975

HAZARDS
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762

HEAD (ANATOMY)
Evaluation of head injury criteria
[NIAR-93-2] p 1890 N94-20190

HEAD-UP DISPLAYS
Some VTOL head-up display drive-law problems and solutions
[NASA-TM-104027] p 1635 N94-20035
Image processing as a tool in flight testing evaluation p 1640 N94-22606

HEALTH
Current status of environmental, health, and safety issues of nickel metal-hydride batteries for electric vehicles
[DE93-017079] p 1748 N94-19902
Analysis of health status from preliminary physical examination of flight academy applicants
[AD-A267759] p 1889 N94-19962
Research in progress: FY 1992
[DE94-000410] p 1836 N94-20936
Journal of rehabilitation research and development, volume 30, number 1, 1993
[AD-A272956] p 1893 N94-21613
Self-Motion Perception and Motion Sickness
[NASA-CR-194276] p 1885 N94-21897

HEART
Review of using cardiac fluoroscopy in symptomatic and asymptomatic patients
[AD-A271690] p 1891 N94-20928

HEAT ACCLIMATIZATION
Human responses to exercise-heat stress
[AD-A272581] p 1892 N94-21209

HEAT ENGINES
Development of improved processing and evaluation methods for high reliability structural ceramics for advanced heat engine applications, phase 1
[DE93-040526] p 1702 N94-20481
Heat regenerative external combustion engine
[AD-D015965] p 1824 N94-21274
Ceramic Technology Project
[DE94-001011] p 1707 N94-21822

HEAT EXCHANGERS
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19987
A novel scheme to handle highly pulsed loads with a standard helium refrigerator
[DE93-019617] p 1799 N94-20263
Heat exchanger with oscillating flow
[NASA-CASE-LAR-14033-2] p 1800 N94-20495
Review of corrosion behavior of ceramic heat exchanger materials: Corrosion characteristics of silicon carbide and silicon nitride
[DE93-041307] p 1706 N94-21516
Preliminary SP-100/Stirling heat exchanger designs
[NASA-TM-106444] p 1670 N94-21809
Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022

HEAT FLUX
On the sources of North Atlantic deep water
[AD-A270854] p 1881 N94-19895
Heat exchanger with oscillating flow
[NASA-CASE-LAR-14033-2] p 1800 N94-20495
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459
Areally averaged estimates of surface heat flux from ARM field studies
[DE93-018569] p 1859 N94-22036
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study p 1879 N94-22335

HEAT MEASUREMENT
Techniques for reducing error in the calorimetric measurement of low wattage items
[DE93-018472] p 1807 N94-20114
Calorimeter measurements of low wattage items
[DE93-018473] p 1807 N94-20115

HEAT OF COMBUSTION
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452

HEAT PIPES
Preliminary SP-100/Stirling heat exchanger designs
[NASA-TM-106444] p 1670 N94-21809
Rewetting of monogroove heat pipe in Space Station radiators
[NASA-CR-194781] p 1804 N94-21820

HEAT PUMPS
Absorption heat pump for space applications
[NASA-CR-194693] p 1845 N94-20066
The FY1992 survey on commercialization of Stirling engine utilization equipment
[DE94-707416] p 1849 N94-22029

HEAT RESISTANT ALLOYS
Investigation of austenitic alloys for advanced heat recovery and hot gas cleanup systems
[DE93-017863] p 1687 N94-19802
Fundamental studies of stress distributions and stress relaxation in oxide scales on high temperature alloys
[DE94-001444] p 1693 N94-21854

HEAT SINKS
Cooling apparatus and couplings therefor
[NASA-CASE-ARC-11921-1] p 1800 N94-20371
Analysis of cost: CVD diamond deposition
[AD-A271980] p 2018 N94-20616

HEAT SOURCES
Core formation, wet early mantle, and H2O degassing on early Mars p 2145 N94-21674

HEAT STORAGE
Fluid absorption solar energy receiver
[NASA-CR-194688] p 1846 N94-20229

HEAT TOLERANCE
Human responses to exercise-heat stress
[AD-A272581] p 1892 N94-21209
Physiological efficacy of a lightweight ambient air cooling unit for various applications
[AD-A272952] p 1896 N94-21247

HEAT TRANSFER
Parametric variations of ion transport in TFTR
[DE93-012653] p 1991 N94-19883
High performance heavy alloys by alloying and process control
[AD-A271129] p 1689 N94-20019
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177
Fluid absorption solar energy receiver
[NASA-CR-194688] p 1846 N94-20229
A parametric study of heat transfer within a planar thermosyphon
[DE93-019546] p 1799 N94-20256
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
Heat exchanger with oscillating flow
[NASA-CASE-LAR-14033-2] p 1800 N94-20495
Heat transfer additives for absorption cooling system fluids
[PB93-202521] p 1714 N94-21426
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452
Molten carbonate fuel cell networks: Principles, analysis, and performance
[DE93-019872] p 1846 N94-21527
On one numerical approach to Stefan problem
[IPPCZ-330] p 1996 N94-21572
Flow and heat transfer model for a rotating cryogenic motor
[DE94-001151] p 1794 N94-22405

HEAT TRANSMISSION
Three-dimensional dynamic thermal imaging of structural flaws by dual-band infrared computed tomography
[DE93-019575] p 1906 N94-20316
A finite element formulation and adaptive solution approach for large-scale thermomechanical problems with complex contact conditions
[DE93-019605] p 1960 N94-21996
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings
[DE93-040547] p 1990 N94-22002
Flow and heat transfer model for a rotating cryogenic motor
[DE94-001151] p 1794 N94-22405

HEAT TREATMENT
GaAs(100) surface modifications at elevated temperatures, studied by in-situ spectroscopic ellipsometry p 2023 N94-20997
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications
[AD-A272897] p 1704 N94-21197
Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines
[AD-A272998] p 1648 N94-21266
Specific heat of YBa2Cu3O7
[DE93-040640] p 2031 N94-21926

HEATING
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20667
Multiplicity of chondrule heating events and the coarsening of chondrule textures p 2085 N94-20860
The energy performance of prototype holographic glazings
[DE93-040451] p 1809 N94-21545

HEATING EQUIPMENT
Numerical modeling for an electric-field hyperthermia applicator p 1729 N94-20451

HEAVY IONS
Longitudinal beam dynamics for heavy ion fusion using WARPrz
[DE93-019154] p 1992 N94-19915
Space-charge dominated beam transport in magnetic quadrupoles with large aperture ratios
[DE93-040443] p 1992 N94-20004
Shielding from space radiations
[NASA-CR-194683] p 1895 N94-20063
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289

Time-of-flight heavy ion backscattering spectrometry
[DE93-019067] p 1973 N94-20306
Comparison of single event upset rates for microelectronic memory devices during interplanetary solar particle events p 1754 N94-21085
STRV RADMON: An integrated high-energy particle detector p 1666 N94-21086
Low emittance 0.8A K(+) ion source for the LBL Induction Linac System Experiment (ILSE)
[DE93-019237] p 1981 N94-21439
Simulation studies of space-charge-dominated beam transport in large aperture ratio quadrupoles
[DE93-019238] p 1981 N94-21440
Searching for high baryon density at the AGS with ARC
[DE93-041155] p 1975 N94-21693
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763
Low p(sub T) phenomena observed in high energy nuclear collisions
[DE94-000825] p 1982 N94-21849
Time evolution of the quark-gluon plasma
[DE94-000804] p 1998 N94-22389

HEAVY NUCLEI
Relativistic calculations of the superheavy nucleus (sup 298)114
[KVI-969] p 1971 N94-20119
New perspectives in quantum chromodynamics
[DE93-041021] p 2038 N94-21935
Symmetry-dictated trucation: Solutions of the spherical shell model for heavy nuclei
[DE94-000482] p 1976 N94-21961

HEIGHT
Ocean wave height transformation model using surface roller theory
[AD-A272610] p 1883 N94-21423
Semi-stability and heights of cycles
[PB93-215507] p 1961 N94-22377

HEISENBERG THEORY
A microscopic theory of quantum optics and new photon-locked bistable states
[AD-A271250] p 1983 N94-19901

HELICAL ANTENNAS
Mobile terminal antennas for helicopters
p 1731 N94-20458

HELICAL FLOW
Gravitational instability of magnetized filamentary clouds. 1: Helical magnetic fields p 2008 N94-22688

HELICOPTER CONTROL
Improvement of helicopter attitude stability by active control of the conventional swash plate
[NASA-CR-194786] p 1650 N94-20524

HELICOPTER PERFORMANCE
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[DOT/FAA/RD-93/22] p 1642 N94-20051

HELICOPTER WAKES
Rotorwash wind sensor evaluation
[AD-A268987] p 1807 N94-20203

HELICOPTERS
Mobile terminal antennas for helicopters
p 1731 N94-20458
The relative noise levels of parallel axis gear sets with various contact ratios and gear tooth forms
[NASA-TM-106431] p 1826 N94-21756
Aircraft noise effects on cultural resources: Recommendation and rationale for further research
[PB93-205326] p 1968 N94-22053
Aircraft noise effects on cultural resources: Annotated bibliography
[PB93-205334] p 1969 N94-22054

HELIOSEISMOLOGY
Solar simulator for solar dynamic space power system testing
[NASA-TM-106393] p 1984 N94-20140
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549

HELIOSPHERE
Laboratory structure of the heliopause
p 2003 N94-22648
Large-scale structure of the solar plasma corona: An analysis of Yohkoh SXT images p 2004 N94-22657

HELIUM
Testing double ionization mechanisms with highly-charged ions
[DE93-018750] p 1970 N94-19958
A novel scheme to handle highly pulsed loads with a standard helium refrigerator
[DE93-019617] p 1799 N94-20263
Helium in interplanetary dust particles
p 2082 N94-20653
Stability curves for a thermoacoustic prime mover
[AD-A272607] p 1968 N94-21422
A high-intensity He-jet production source for radioactive beams
[DE93-040247] p 1981 N94-21767
The FY1992 survey on commercialization of Stirling engine utilization equipment
[DE94-707416] p 1849 N94-22029
The effect of Compton scattering on the double to single ionization ratio in helium
[DE94-000884] p 1827 N94-22390

HELIUM FILM
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584

HELIUM IONS
Photoabsorption and Compton scattering in ionization of helium at high photon energies
[DE94-000380] p 1974 N94-21658
Single and double ionization of helium by high-energy photon impact
[DE94-000381] p 1975 N94-21785

HELIUM ISOTOPES
Rapid heating tensile testing update: 304L stainless steel
[DE93-018770] p 1688 N94-19942
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187
SLAC measurement of the neutron spin structure function
[DE93-040998] p 1975 N94-21788
Mean elemental composition and He-3 enrichments in solar energetic particles p 2006 N94-22670

HELIUM PLASMA
Optical diagnostic instrument for monitoring etch uniformity during plasma etching of polysilicon in a chlorine-helium plasma
[DE93-019582] p 1993 N94-20261

HELIUM-NEON LASERS
Micro-ellipsometric measurements of strained layer structures p 2025 N94-21008

HELMET MOUNTED DISPLAYS
Miniature color display, phase 4
[AD-A272920] p 1760 N94-21221

HEMATITE
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800

HEMORRHAGES
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462

HERBIG-HARO OBJECTS
Three-dimensional simulations of cosmic jets employing the smoothed particle hydrodynamics technique
p 2008 N94-22685
Helical kink instability of jets from young stellar objects p 2008 N94-22686

HERMES MANNED SPACEPLANE
Meteoroids and debris impact risk assessment on Columbus and Hermes using a realistic geometrical analysis tool p 1662 N94-21388

HERMITIAN POLYNOMIAL
A sharp upper bound for departure from normality
[DE93-040457] p 1960 N94-21966

HETEROCYCLIC COMPOUNDS
Catalytic hydrogenation of carbon monoxide
[DE94-000881] p 1678 N94-20103
Polybenzoxazole via aromatic nucleophilic displacement
[NASA-CASE-LAR-14606-1-CU] p 1672 N94-20540

HETEROJUNCTION DEVICES
High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805
Investigation of quantum effects in heterostructures
[AD-A270938] p 2011 N94-19817
Design and implementation of GaAs HBT circuits with ACME p 1758 N94-21117
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1847 N94-21614
Heterojunction bipolar transistor technology for data acquisition and communication p 1763 N94-21697

HETEROJUNCTIONS
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
Ellipsometric measurements of molecular-beam-epitaxy-grown semiconductor multilayer thicknesses: A comparative study p 1710 N94-20983
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis
p 1710 N94-20984
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987
In-situ spectroscopic ellipsometry in molecular beam epitaxy p 2024 N94-21005
Complementary heterojunction FET technology for space application p 1755 N94-21094
Synthesis and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A272955] p 2027 N94-21248
Heterojunction bipolar transistor technology for data acquisition and communication p 1763 N94-21697

HEURISTIC METHODS
Program derivation in acyclic graphs and related problems
[PB93-191765] p 1903 N94-19994
Retrieval of ice thickness from polarimetric SAR data
p 1724 N94-20432
On the selection of indices in relational databases
[MEMO-INF-92-72] p 2043 N94-21071
Heuristic-based scheduling algorithm for high level synthesis p 1764 N94-21704
A statistical-based scheduling algorithm in automated data path synthesis p 1764 N94-21706
Fuzzy and neural control
[NASA-TM-108753] p 1947 N94-22270

HIERARCHIES
Nominalization, prediction and type containment
[PB93-191799] p 1898 N94-20082
Classification in feature-based default inheritance hierarchies
[TR-473] p 1911 N94-21180
Computing solutions uniquely collapses the polynomial hierarchy
[TR-467] p 1954 N94-21314
On the closure properties of #P in the context of PF of #P
[TR-445] p 1955 N94-21456
A proof-of-concept implementation of persistence in a hierarchical storage system
[NASA-CR-194790] p 1921 N94-22376
A self-defining hierarchical data system
p 2046 N94-22448
Some practicable applications of quadtree data structures/representation in astronomy
p 1927 N94-22515

HIGH ALTITUDE BREATHING
In-flight measurement of aircrew breathing in Navy aircraft
[AD-A271811] p 1896 N94-21154

HIGH CURRENT
SPICE macromodel for a 1-megawatt power MOSFET switch
[DE93-019415] p 1748 N94-19844
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312
Demonstration of ultraviolet lasing with a low energy electron beam
[DE93-040192] p 1818 N94-21554

HIGH DEFINITION TELEVISION
NHK Science and Technical Research Laboratories
p 2151 N94-20342

HIGH ELECTRON MOBILITY TRANSISTORS
An x-band peaked HEMT amplifier
p 1732 N94-20498
Dimension scaling effects on the yield sensitivity of HEMT digital circuits p 1765 N94-21712

HIGH ENERGY INTERACTIONS
Top search at the TEVATRON
[DE93-019392] p 1978 N94-19988
Energy and luminosity limits of hadron supercolliders
[DE93-019248] p 1980 N94-20300
High energy physics program at Texas A/M University
[DE93-041089] p 1980 N94-20933
Theoretical particle physics
[DE94-000538] p 1973 N94-20938
Photoabsorption and Compton scattering in ionization of helium at high photon energies
[DE94-000380] p 1974 N94-21658
Low p(sub T) phenomena observed in high energy nuclear collisions
[DE94-000825] p 1982 N94-21849

HIGH FREQUENCIES
New algorithm of ground track processing in high-frequency skywave over-the-horizon-B radar
[AD-A267821] p 1717 N94-20207
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
High Frequency (HF) and meteor burst communications in a polar environment
[AD-A271604] p 1737 N94-20949
An integro-algebraic equation for high frequency wake fields in a tube with smoothly varying radius
[DE93-040940] p 1741 N94-21684

HIGH LEVEL LANGUAGES
Explainable expert systems: A research program in information processing
[NASA-CR-193422] p 2041 N94-20133
MAYGEN: A symbolic debugger generation system
[AD-A272512] p 1913 N94-21413
HIGH POWER LASERS
Circular polarizing mirrors for high power lasers
[AD-A267820] p 1815 N94-19965
High-power copper vapor lasers and their application to precision drilling and cutting
[DE93-019951] p 1819 N94-21844
Simulations of spectral broadening by cross-phase modulation (XPM) with chaotic light pulses
[DE93-019623] p 1819 N94-21872
Phase screens for the control of the focal irradiance of the Nova laser
[DE94-001067] p 1820 N94-22401
HIGH PRESSURE
Chemical equilibrium in high pressure molecular fluid mixtures
[DE93-040160] p 1796 N94-19829
Unlike-pair interactions at high pressure and high temperature
[DE93-019948] p 1796 N94-19916
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Shock response of porous Al-2 + Fe2O3 powder mixtures
[DE93-018851] p 1688 N94-19944
Lateral distribution of lipids in membranes at high pressure
[AD-A271183] p 1700 N94-20299
High-temperature, high-pressure oxygen metering valve
[NASA-CASE-MSC-21823-1] p 1824 N94-20589
Lamellar olivine in the Divnoe achondrite: Evidence for high-pressure exsolution? p 1685 N94-20679
Static ultra-high pressure study of lanthanide and actinide metals using a diamond-anvil cell
[DE94-000369] p 1693 N94-21656
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998
The FY1992 survey on commercialization of Stirling engine utilization equipment
[DE94-707416] p 1849 N94-22029
HIGH PRESSURE OXYGEN
Detailed study of oxidation/wear mechanism in lox turbopump bearings
[NASA-TM-108434] p 1825 N94-21580
HIGH RESOLUTION
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1651 N94-20108
High resolution signal processing
[AD-A271181] p 1717 N94-20215
Ultrafast scanning microscopy
[DE93-040121] p 1985 N94-20320
Wide-bandwidth high-resolution search for extraterrestrial intelligence
[NASA-CR-194724] p 1897 N94-20336
The High Resolution Stereo Camera (HRSC) for the Lunar Scout 1 Mission p 1813 N94-20650
Constraints on the rate of discharge and duration of the Mangala Valles flood p 2099 N94-20674
MinMap: An imaging spectrometer for high resolution compositional mapping of the Moon p 1813 N94-20688
Preliminary results from Mariner 10: High resolution images of the Moon p 2107 N94-20719
Predicting LANDSAT MSS endmember signatures from corresponding higher resolution TM fraction images p 1839 N94-20962
Nature's crucible: Manufacturing optical nonlinearities for high resolution, high sensitivity encoding in the compound eye of the fly, Musca domestica p 1755 N94-21095
Validation of the design of a high resolution all-reflection Michelson interferometer for atmospheric spectroscopy
[AD-A272505] p 1987 N94-21410
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522
HIGH REYNOLDS NUMBER
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459
HIGH SPEED
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391
HIGH SPEED PHOTOGRAPHY
Multiport solid-state imager characterization at variable pixel rates
[DE93-018366] p 1808 N94-20287
HIGH STRENGTH ALLOYS
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027
HIGH STRENGTH STEELS
Experimental and numerical studies of high-velocity impact fragmentation
[DE93-040205] p 1832 N94-21557
HIGH TEMPERATURE
Unlike-pair interactions at high pressure and high temperature
[DE93-019948] p 1796 N94-19916
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093
Microstructural stability of wrought, laser and electron beam glazed NARloy-Z alloy at elevated temperatures
[NASA-TM-108431] p 1689 N94-20100
Strengthening of NiAl matrix composites
[AD-A271491] p 1674 N94-20550
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20667
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
Ellipsometric study of GaAs(100) surface changes induced at elevated temperatures p 2023 N94-20998
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications
[AD-A272897] p 1704 N94-21197
Performance of carbon-based hot frit substrates
[DE94-000509] p 1676 N94-21754
Ceramic Technology Project
[DE94-001011] p 1707 N94-21822
High temperature size selective membranes
[DE93-019865] p 1709 N94-21982
Strengthening and toughening in refractory metal alloys
[DE93-019942] p 1695 N94-21986
Projections on structures and material strength in the computational context p 1834 N94-22610
HIGH TEMPERATURE ENVIRONMENTS
Corrosion inhibition in high temperature environment
[AD-D015910] p 1698 N94-19830
Cold-start minidiesel engine development
[AD-A271064] p 1823 N94-20567
Model for liquid boron oxide droplet gasification in H/O/C/F combustion environments
[AD-A272911] p 1682 N94-21243
Utilization of metals to improve the lubrication of ceramic load-bearing devices
[PB93-202448] p 1825 N94-21424
Fundamental studies of stress distributions and stress relaxation in oxide scales on high temperature alloys
[DE94-001444] p 1693 N94-21854
Benefits of thread rolling process to the stress corrosion cracking and fatigue resistance of high strength fasteners
[DE93-040438] p 1833 N94-22001
Brief summary of the evolution of high-temperature creep-fatigue life prediction models for crack initiation p 1834 N94-22613
HIGH TEMPERATURE GASES
High-temperature, high-pressure oxygen metering valve
[NASA-CASE-MSC-21823-1] p 1824 N94-20589
A calcium oxide sorbent process for bulk separation of carbon dioxide
[DE93-019288] p 1847 N94-21540
HIGH TEMPERATURE LUBRICANTS
Lubricated wear of steel-ceramic and ceramic-ceramic systems
[PB93-202356] p 1825 N94-21450
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451
HIGH TEMPERATURE PLASMAS
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-001234] p 1998 N94-22561
Neutrino emission processes in dense high-temperature plasmas p 2001 N94-22638
Accretion of a hot plasma onto the central black hole: Fokker-Planck formulation p 2009 N94-22693
HIGH TEMPERATURE SUPERCONDUCTORS
Superconductivity Technology Program for Electric Power Systems: Proceedings
[DE93-040074] p 2011 N94-19825
Superconducting property measurements in tape geometry
[DE93-018943] p 2014 N94-19970
Spin-polaron theory of high-(Tc) superconductivity. 1: Spin polarons and high (Tc) pairing
[DE93-019196] p 2014 N94-20002
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275
Space applications of superconducting microwave electronics at NASA Lewis Research Center p 1671 N94-20513
TlCaBaCuO high Tc superconducting microstrip ring resonators designed for 12 GHz p 1735 N94-20516
Thermal expansion of electronic highly correlated materials
[ETN-93-93605] p 2026 N94-21135
High temperature superconducting planar circuit structure for high frequency applications
[AD-A273083] p 2026 N94-21521
Photoemission and the electronic properties of heavy fermions: Limitations of the Kondo model
[DE93-040191] p 1974 N94-21553
Local structure and superconductivity in La(2-x)Ba(x)CuO4 for x=0.125 and x=0.15
[DE93-040193] p 2029 N94-21555
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21788
Spin-polaron theory of high-T(c) superconductivity. 3: Gap function and critical temperature
[DE93-019198] p 2030 N94-21831
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931
Stability of an uncooled segment of a high-temperature superconductor
[DE94-000476] p 2032 N94-21932
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385
Flow and heat transfer model for a rotating cryogenic motor
[DE94-001151] p 1794 N94-22405
Test results of two high temperature superconducting sample coils
[DE94-000496] p 2035 N94-22570
Positron annihilation study of Sr Doping in La(2-x)Sr(x)CuO4
[DE94-000307] p 2036 N94-22594
HIGH TEMPERATURE TESTS
Rapid heating tensile testing update: 304L stainless steel
[DE93-018770] p 1688 N94-19942
Integrity and testing concerns of thermostructural materials p 1681 N94-21384
Compilation of reinforced carbon-carbon transatlantic abort landing arc jet test results
[NASA-TM-104778] p 1676 N94-21834
HIGH VOLTAGES
SPICE macromodel for a 1-megawatt power MOSFET switch
[DE93-019415] p 1748 N94-19844
Characteristics of switching plasma in an inverse-pinch switch p 1995 N94-21292
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583
HIGHLANDS
Crater destruction on the Venusian highlands by tectonic processes p 2103 N94-20696
U-Pb isotopic ages and characteristics of ancient (greater than 4.0 Ga) lunar highland rocks p 2104 N94-20700
Some deformation trends and topographic characteristics of tesserae on Venus p 2105 N94-20706
Volcanic rises on Venus: Geology, formation, and sequence of evolution p 2113 N94-20755
The Mg-suite and the highland crust: An unsolved enigma p 2126 N94-20822
Briny lakes on early Mars? Terrestrial intracrater playas and Martian candidates p 2145 N94-21675
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676
HILBERT SPACE
Totally strong and strong graphs
[RR-902-I] p 1951 N94-20237
Hilbert 90 for polynomial matrices
[CWI-AM-R9211] p 1954 N94-21159

HILL METHOD
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
HISTOGRAMS
Dimension scaling effects on the yield sensitivity of HEMT digital circuits p 1765 N94-21712
Scale-space filtering and threshold hierarchy for image segmentation p 1777 N94-22149
HISTOLOGY
Non-ionic surfactants in the treatment of third degree burns
[AD-A271582] p 1891 N94-21035
HISTORIES
Documents on the history of aeronautical and space research in Germany, 1900 - 1970
[DLR-MITT-92-08] p 2152 N94-20543
Asymptotic analysis. Working Note No. 2, approximation of integrals
[DE94-000433] p 1961 N94-22381
HMX
Evaluation of pre-extraction analytical holding times for nitroaromatic and nitramine explosives in water
[AD-A271547] p 1712 N94-20927
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
HOLES (ELECTRON DEFICIENCIES)
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry p 2022 N94-20992
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
HOLES (MECHANICS)
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 1623 N94-20379
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504
HOLOGRAPHY
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1986 N94-20591
Holographic measurements of ice crystals in cirrus clouds during International Cirrus Experiment ICE
[GKSS-92/E/14] p 1866 N94-21052
Diffraction and holography of photoelectrons and fluorescent x rays
[DE93-019240] p 1808 N94-21441
The energy performance of prototype holographic glazings
[DE93-040451] p 1809 N94-21545
High resolution, three dimensional soft x ray imaging
[DE93-018667] p 1989 N94-21630
Electron holography applied to the study of ceramic materials
[DE94-000329] p 1707 N94-21653
Photoelectron holography of platinum (111)
[DE93-040856] p 1810 N94-21950
Optical processing in photorefractive media p 1789 N94-22222
Holographic optical elements correcting the off-axis aberrations of a parabolic mirror
[ISBN-0-315-57581-6] p 1990 N94-22411
HOMEOSTASIS
The role of axon-Schwann cell interactions in nervous system ionic homeostasis
[AD-A270936] p 1890 N94-20045
HOMOGENEITY
Applications of variable angle spectroscopic ellipsometry in semiconductor technology p 2025 N94-21010
HOMOGENEOUS TURBULENCE
Modeling of particle dispersion in a stationary isotropic homogeneous turbulence by large scale numerical simulation
[ETN-93-94604] p 1801 N94-20601
New results on the realizability of Reynolds stress turbulence closures
[NASA-CR-191548] p 1804 N94-21875
HOMOLOGY
Hilbert 90 for polynomial matrices
[CWI-AM-R9211] p 1954 N94-21159
HORIZONTAL FLIGHT
Rotorcraft noise: Status and recent developments
[NASA-CR-194761] p 1967 N94-20523
HORIZONTAL TAIL SURFACES
Apparatus and method for improving spin recovery on aircraft
[NASA-CASE-LAR-14747-1] p 1650 N94-20556
HORMONES
Changes in plasma vasopressin during motion sickness in cats p 1885 N94-21868
HORN ANTENNAS
Applications of planar near-field measurements to electromagnetic radiation and interference problems p 1747 N94-22252
HORSEPOWER
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies
[DE93-041130] p 1826 N94-21938
HORSESHOE VORTICES
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531
HOT ELECTRONS
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910
HOT ISOSTATIC PRESSING
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications
[AD-A272897] p 1704 N94-21197
Strength and toughness improvement of silicide intermetallics by nanophase and microphase reinforcements
[AD-A272914] p 1692 N94-21320
HOT STARS
Radiation driven winds of hot stars: Some remarks on stationary models and spectrum synthesis in time-dependent simulations
[NASA-CR-194691] p 2081 N94-21578
HOT-FILM ANEMOMETERS
Measurement Technology for Flight Tests
[ILR-MITT-256(1991)] p 1639 N94-22597
Surface hot film measurements at ATTAS laminar glove p 1639 N94-22598
Testing of a multisensor hot film technique in wind tunnel and free flight p 1639 N94-22599
HOT-WIRE ANEMOMETERS
Near wake measurements on a rotor model with Mie-vanes in the Delft open jet tunnel
[PB93-215362] p 1638 N94-22260
Hot wire anemometry: A versatile instrumentation used for predevelopment studies and flight testing of the Do-328 aircraft p 1640 N94-22604
HOUSINGS
Cooling apparatus and couplings therefor
[NASA-CASE-ARC-11921-1] p 1800 N94-20371
Characterization and modelling of extremely high frequency enclosures p 1782 N94-22177
HOVERING
An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight
[AD-A270201] p 1636 N94-20486
Rotorcraft noise: Status and recent developments
[NASA-CR-194761] p 1967 N94-20523
HUBBLE SPACE TELESCOPE
Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01
[NASA-TM-109344] p 1653 N94-20192
Focus history of the Hubble Space Telescope: Launch to May 1993
[NASA-CR-194179] p 2055 N94-20204
Restoration of HST images with missing data p 2057 N94-22439
HST image restoration: A comparison of pre- and post-servicing mission results p 1925 N94-22478
SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486
The application of artificial intelligence to astronomical scheduling problems p 1949 N94-22492
Deconvolution of Hubble Space Telescope images using simulated point spread functions p 2048 N94-22497
HST PSF simulation using Tiny Tim p 1926 N94-22498
StarView: The object oriented design of the ST DADS user interface p 2049 N94-22548
HUGONIOT EQUATION OF STATE
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
HUMAN BEHAVIOR
Female security as a general mobility condition
[ISBN-3-79-831536-1] p 2039 N94-20153
HUMAN FACTORS ENGINEERING
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
AIDA: A graphical interactive system, adapted to the user
[ETN-93-93792] p 1908 N94-21020
Columbus: Materials for 30 years habitability in space p 1662 N94-21387
Design and implementation of a status at a glance user interface for a power distribution expert system
[NASA-TM-106412] p 1715 N94-21589
Cognitive engineering in aerospace applications
[NASA-CR-194782] p 1647 N94-21819
Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373
HUMAN PERFORMANCE
Development of the UTC-PAB normative database
[AD-A271319] p 1893 N94-20023
Physiological correlates of stress-induced decrements in human perceptual performance
[DOT/FAA/AM-93/19] p 1893 N94-20061
Loads produced by a suited subject performing tool tasks without the use of foot restraints
[NASA-TP-3424] p 1896 N94-20606
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610
Maximum team lifting capacity as a function of team size
[AD-A271642] p 1892 N94-21036
Psychometric developments related to tests and selection
[AD-A272971] p 1894 N94-21262
Strength capabilities and load requirements while performing torquing tasks in zero gravity
[NASA-TP-3433] p 1897 N94-21627
The effects of instructional sets on reactions to and performance on an intelligent tutoring system
[NASA-CR-194739] p 1895 N94-21810
Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373
HUMAN TOLERANCES
Evaluation of head injury criteria
[NIAR-93-2] p 1890 N94-20190
HUMAN-COMPUTER INTERFACE
CMIFed: A presentation environment for porta ble hypermedia documents
[CWI-CS-R9305] p 2044 N94-21494
Structured multimedia authoring
[CWI-CS-R9304] p 2044 N94-21535
Design and implementation of a status at a glance user interface for a power distribution expert system
[NASA-TM-106412] p 1715 N94-21589
Modelling decision-making by pilots
[NASA-CR-194767] p 2040 N94-21821
Application development in a PC/LAN environment p 1923 N94-22067
Integrating a local database into the StarView distributed user interface p 2048 N94-22530
HUMIDITY
Durability predictions for adhesively bonded joints in humid environments
[AD-A271177] p 1830 N94-20001
Incorporation and comparative evaluation of a non-convective cloud parameterization scheme in the Naval Research Laboratory west coast mesoscale weather prediction model
[AD-A272417] p 1867 N94-21146
Analysis of the GOES 6.7 micrometer channel observations during FIRE 2 p 1875 N94-22316
HUMIDITY MEASUREMENT
Overview of microphysical and state parameter measurements from FIRE 2 p 1871 N94-22293
Analysis of the tropospheric water distribution during FIRE 2 p 1876 N94-22324
HYBRID CIRCUITS
Y-Ba-Cu-O superconducting/GaAs semiconducting hybrid circuits for microwave applications p 1735 N94-20514
MHMIC: Technology for the integration of microwave sub-assemblies p 1785 N94-22199
HYBRID COMPOSITES
Polymer gels as precursors to high-performance materials
[AD-A270937] p 1699 N94-20046
Quantification of uncertainties in the performance of smart composite structures
[NASA-TM-106335] p 1830 N94-20171
HYBRID PROPULSION
Analysis of a diesel-electric hybrid urban bus system
[DE93-019514] p 1825 N94-21297
HYDRATES
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
HYDRATION
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691
A quantitative S.E.M. image analysis of cement paste microstructure p 1708 N94-21894
HYDRAULIC EQUIPMENT
Long range fast tool servo
[AD-A271614] p 1761 N94-21257

HYDRAZINES
N,N'-bis(4,4,4-trinitro butyryl) hydrazine
[AD-D015897] p 1712 N94-20122
HYDROCARBON COMBUSTION
Theoretical research program to study chemical reactions in AOTV bow shock tubes
[NASA-CR-194710] p 1804 N94-22027
HYDROCARBON FUELS
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562
HYDROCARBONS
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
HYDROCHLORIC ACID
Parameters affecting hydrogen chloride measurements
[AD-A271326] p 1851 N94-20025
HYDRODYNAMICS
Hydrodynamic compressibility of high-strength ceramics
[DE93-019424] p 1698 N94-19903
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields
[AD-A272123] p 1831 N94-20572
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729
SPH modelling of energy partitioning during impacts on Venus p 2124 N94-20809
The sand bag model of the dispersion of the cosmic body in the atmosphere p 2084 N94-20823
Atmospheric breakup of a small comet in the Earth's atmosphere p 2084 N94-20824
Coupling of smooth particle hydrodynamics with PRONTO
[DE93-019080] p 1915 N94-21539
Laser driven hydrodynamic instability experiments
[DE93-040550] p 1818 N94-21547
A note on singularities caused by the hydrodynamic dispersion tensor
[CWI-NM-R9302] p 1803 N94-21575
RHALE: A 3-D MMALE code for unstructured grids
[DE93-019405] p 1916 N94-21635
Canonically covariant formulation of Landau's Newtonian superfluid dynamics
[PB93-221034] p 1805 N94-22272
Smoothed-particle hydrodynamics and nonequilibrium molecular dynamics
[DE94-001059] p 1977 N94-22400
Coupling of smooth particle hydrodynamics with the finite element method
[DE93-019081] p 1905 N94-22556
Hydrodynamical winds from an accretion disk p 2008 N94-22683
HYDROELECTRIC POWER STATIONS
Current situation of development of petroleum substituting energies (USA)
[DE94-707492] p 1848 N94-22013
HYDROFLUORIC ACID
Spectroscopic ellipsometry studies of HF treated Si (100) surfaces p 1734 N94-20508
Development and demonstration of a personal monitoring system for exposure to hydrogen fluoride
[DE93-041273] p 1891 N94-20935
HYDROGEN
Encounters of H and D atoms with O2 in water: Relative diffusion and reaction rates
[DE93-018587] p 1970 N94-19956
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027
Energy storage and conversion in solid hydrogen
[AD-A271439] p 1845 N94-20086
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4
[DE93-018050] p 1689 N94-20182
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
High D/H ratios of water in magmatic amphiboles in Chassigny: Possible constraints on the isotopic composition of magmatic water on Mars p 2134 N94-20862
Performance of carbon-based hot frit substrates
[DE94-000509] p 1676 N94-21754
Performance assessment of low pressure nuclear thermal propulsion
[NASA-TM-108433] p 1671 N94-21860
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922
Development of an electrochemical hydrogen separator
[DE93-019877] p 1683 N94-21984
Proof of stability of the hydrogen molecule
[PB93-221026] p 1977 N94-22271
HYDROGEN ATOMS
Energy storage and conversion in solid hydrogen
[AD-A271439] p 1845 N94-20086
Laser diagnostics of RF hydrogen plasma reactors: Application to the processing of III-V materials
[AD-A272659] p 1994 N94-21214
HYDROGEN BONDS
Application of the reactive flux formalism to study water hydrogen bond dynamics
[AD-A271824] p 1680 N94-20560
Femtosecond dynamics in hydrogen-bonded solvents
[DE93-019937] p 1683 N94-21842
HYDROGEN CLOUDS
Dust content of a hydrogen rich, low surface brightness galaxy and the luminosity history of 3C273
[NASA-CR-194705] p 2056 N94-21779
HYDROGEN COMPOUNDS
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922
HYDROGEN EMBRITTLEMENT
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4
[DE93-018050] p 1689 N94-20182
Investigation of moisture-induced embrittlement of iron aluminides
[DE93-040841] p 1695 N94-21949
HYDROGEN FUELS
Statement of David E. Baldwin, Associate Director for Energy, Lawrence Livermore National Laboratory and John C. Crawford, Vice President, Sandia National Laboratories, California, to the Subcommittee on Research and Development of the Committee on Environment and Public Works, US Senate, Washington, DC, 22 March 1993
[DE93-017991] p 1844 N94-19803
Fuel processing requirements and techniques for fuel cell propulsion power
[DE93-019516] p 1750 N94-20257
HYDROGEN IONS
Ionization of H2(+) in intense laser fields
[DE93-019160] p 1818 N94-21829
A dc Penning surface-plasma source
[DE93-040126] p 1997 N94-21989
Interactions of slow H, H2, and H3 with thin foils
[DE93-040263] p 1976 N94-21995
HYDROGEN ISOTOPES
Hydrogen isotope separation experience at the Savannah River Site
[DE93-019832] p 1679 N94-20266
HYDROGEN MASERS
Measurements of atomic interactions and frequency stability with a cryogenic hydrogen maser
[AD-A271132] p 1814 N94-19853
HYDROGEN OXYGEN ENGINES
Turbine design p 1668 N94-20075
The Vulcain cryogenic engine p 1668 N94-20077
HYDROGEN PEROXIDE
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
HYDROGEN PLASMA
Laser diagnostics of RF hydrogen plasma reactors: Application to the processing of III-V materials
[AD-A272659] p 1994 N94-21214
HYDROGEN PRODUCTION
Statement of David E. Baldwin, Associate Director for Energy, Lawrence Livermore National Laboratory and John C. Crawford, Vice President, Sandia National Laboratories, California, to the Subcommittee on Research and Development of the Committee on Environment and Public Works, US Senate, Washington, DC, 22 March 1993
[DE93-017991] p 1844 N94-19803
A calcium oxide sorbent process for bulk separation of carbon dioxide
[DE93-019288] p 1847 N94-21540
Proceedings of the 1993 DOE/NREL Hydrogen Program Review
[DE93-018207] p 1847 N94-21616
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
HYDROGEN RECOMBINATIONS
Energy storage and conversion in solid hydrogen
[AD-A271439] p 1845 N94-20086
Performance assessment of low pressure nuclear thermal propulsion
[NASA-TM-108433] p 1671 N94-21860
HYDROGEN SULFIDE
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
HYDROGEN-BASED ENERGY
Statement of David E. Baldwin, Associate Director for Energy, Lawrence Livermore National Laboratory and John C. Crawford, Vice President, Sandia National Laboratories, California, to the Subcommittee on Research and Development of the Committee on Environment and Public Works, US Senate, Washington, DC, 22 March 1993
[DE93-017991] p 1844 N94-19803
Proceedings of the 1993 DOE/NREL Hydrogen Program Review
[DE93-018207] p 1847 N94-21616
HYDROGENATION
Catalytic hydrogenation of carbon monoxide
[DE94-000881] p 1678 N94-20103
Synthesis and catalytic properties of metal and semiconductor nanoclusters
[DE93-019418] p 2028 N94-21541
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258
HYDROLOGICAL CYCLE
A wet-geology and cold-climate Mars model: Punctuation of a slow dynamic approach to equilibrium p 2090 N94-20389
A marine sedimentary model for the evolution of the northern plains p 2091 N94-20395
Workshop on Early Mars: How Warm and How Wet?, part 1
[NASA-CR-193553] p 2142 N94-21659
Evolution of the global water cycle on Mars: The geological evidence p 2142 N94-21660
HYDROLOGY
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
Simulated real-time intercomparison of hydrological models
[WMO-779] p 1867 N94-21070
Workshop on Early Mars: How Warm and How Wet?, part 1
[NASA-CR-193553] p 2142 N94-21659
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666
HYDROLOGY MODELS
Hydrological consequences of ponded water on Mars p 2089 N94-20383
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
Simulated real-time intercomparison of hydrological models
[WMO-779] p 1867 N94-21070
HYDROMETEOROLOGY
Radio wave propagation studies along an Earth-space satellite link
[ISBN-0-315-60627-4] p 1742 N94-22408
HYDRONIUM IONS
Electronically metastable molecules of high symmetry
[AD-A272015] p 1974 N94-21461
HYDROPYROLYSIS
Synthesis and catalytic properties of metal and semiconductor nanoclusters
[DE93-019418] p 2028 N94-21541
HYDROSTATIC PRESSURE
Durability predictions for adhesively bonded joints in humid environments
[AD-A271177] p 1830 N94-20001
Hydrostatic/nonhydrostatic comparison with the MERCURE code on orographic flows
[ETN-93-94603] p 1866 N94-20600
HYDROTHERMAL SYSTEMS
Fluvial valleys in the heavily cratered terrains of Mars: Evidence for paleoclimatic change? p 2144 N94-21670
HYGROMETERS
Overview of microphysical and state parameter measurements from FIRE 2 p 1871 N94-22293

A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study p 1879 N94-22335

HYGROSCOPICITY
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models [DE93-041164] p 1853 N94-22384

HYPERBOLIC FUNCTIONS
Approximate methods for N-component solute transport and ion-exchange [CWI-NM-R9223] p 1910 N94-21078

HYPERCUBE MULTIPROCESSORS
The quantum structure of matter grand challenge project: Large-scale 3-D solutions in relativistic quantum dynamics [DE94-000328] p 1960 N94-21955
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity [DE94-000489] p 2035 N94-22385

HYPERGEOMETRIC FUNCTIONS
Asymptotic behavior of Fourier transform of surface measures on convex and radial hypersurfaces [ETN-93-93790] p 1952 N94-21019

HYPERPLANES
M-dimensional computer memory with M-1 dimensional hyperplane access [AD-D015960] p 1898 N94-20357

HYPERSONIC AIRCRAFT
Optimization and performance analysis of a supersonic conical-flow waverider for a deck-launched intercept mission [AD-A272498] p 1648 N94-21433

HYPERSONIC FLOW
Experimental investigation of nozzle/plume aerodynamics at hypersonic speeds [NASA-CR-194628] p 1636 N94-20014
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments) [AD-A272918] p 1802 N94-21220
An efficient numerical method for three-dimensional hypersonic flow [AD-A272506] p 1637 N94-21411
Multigrid schemes for viscous hypersonic flows p 1641 N94-21473
The 2D and 3D hypersonic flows with unstructured meshes p 1920 N94-22365

HYPERSONIC SPEED
Optimization and performance analysis of a supersonic conical-flow waverider for a deck-launched intercept mission [AD-A272498] p 1648 N94-21433
Thrust augmentation options for the Beta 2 two-stage-to-orbit vehicle [NASA-TM-106448] p 1648 N94-21563

HYPERSONICS
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647
An efficient numerical method for three-dimensional hypersonic flow [AD-A272506] p 1637 N94-21411

HYPERTHERMIA
Calculation and optimization of electromagnetic fields in a patient by local hyperthermia utilization [ETN-93-95059] p 1889 N94-20024
Numerical modeling for an electric-field hyperthermia applicator p 1729 N94-20451

HYPERVELOCITY IMPACT
An equation of state for shock in homogeneous materials and comparison to shock data [AD-A271436] p 1829 N94-19881
PVDF gauge characterization of hypervelocity-impact-generated debris clouds [DE93-018831] p 1829 N94-19943
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields [AD-A272123] p 1831 N94-20572
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647
Impact glasses from the ultrafine fraction of lunar soils p 2097 N94-20662
Impactor control of central peak and peak-ring formation p 1862 N94-20744
Further analyses of Rio Cuarto impact glass p 1685 N94-20745
Determination of parameters for hypervelocity dust grains encountered in near-Earth space p 2084 N94-20817
Antipodal fragment velocities for porous and weak targets at catastrophic impacts p 1836 N94-20891
Hypervelocity impact [AD-A272957] p 1831 N94-21249
Meteoroids and debris impact risk assessment on Columbus and Hermes using a realistic geometrical analysis tool p 1662 N94-21388
Hypervelocity impact studies at CEG: Experimental and numerical capabilities p 1664 N94-21397

HYPERVELOCITY PROJECTILES
Impactor control of central peak and peak-ring formation p 1862 N94-20744
Determination of parameters for hypervelocity dust grains encountered in near-Earth space p 2084 N94-20817
Core formation by giant impacts: Conditions for intact melt region formation p 1863 N94-20833
Intact capture of hypervelocity particles on Shuttle p 2085 N94-20837
Hypervelocity impact [AD-A272957] p 1831 N94-21249
Experimental and numerical studies of high-velocity impact fragmentation [DE93-040205] p 1832 N94-21557

HYPSOGRAPHY
Comparative hypsometric analysis of both Earth and Venus topographic distributions p 2108 N94-20722

HYSTERESIS
Relaxation of hysteresis loop in a single crystal of YBa2Cu4O8 [DE93-019519] p 2029 N94-21649
Disks of YBa2Cu3O7 shocked to 10 GPa pressures [DE94-000464] p 2031 N94-21931

I

IBM PERSONAL COMPUTERS
An expert system of econometric analysis p 2052 N94-22081

ICE
Calderas produced by hydromagmatic eruptions through permafrost in northwest Alaska p 2089 N94-20385
Ice in the northern plains: Relic of a frozen ocean? p 2090 N94-20391
The thumbprint terrain: What will Mars Observer tell us? p 2091 N94-20397
Volatile loss from accreting icy protoplanets p 2084 N94-20793
Solar proton events from a 180 year depth profile of nitrate concentrations from the central Greenland ice sheet [AD-A272888] p 2147 N94-21196
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
Cirrus microphysics observations made during FIRE 2: Small particles, high concentrations, and probe comparisons p 1871 N94-22294
Spectral variation of scattering and absorption by cirrus p 1876 N94-22321
Mesoscale simulations of the November 25-26 and December 5-6 cirrus cases using the RAMS model p 1878 N94-22331
Estimation of cirrus cloud particle fallspeeds from vertically pointing Doppler radar p 1879 N94-22333
Normalized vertical ice mass flux profiles from vertically pointing 8-mm-wavelength Doppler radar p 1879 N94-22334

ICE CLOUDS
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals p 1871 N94-22295
Microphysical properties of the November 26 cirrus cloud retrieved by Doppler radar/IR radiometer technique p 1873 N94-22304
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308
Importance of aggregation and small ice crystals in cirrus clouds, based on observations and an ice particle growth model p 1879 N94-22336
SSH-2 measurements of cirrus at 18-28 micrometers from the King Air during FIRE 2 p 1880 N94-22338
Remote sensing estimates of cirrus particle size for tropical and midlatitude cirrus: Hexagonal crystals and ice spheres p 1880 N94-22342
Are tropical cirrus brighter than mid-latitude cirrus? p 1881 N94-22343

ICE ENVIRONMENTS
A wet-geology and cold-climate Mars model: Punctuation of a slow dynamic approach to equilibrium p 2090 N94-20389
Early Mars was wet but not warm: Erosion, fluvial features, liquid water habitats, and life below freezing p 2145 N94-21677

ICE FORMATION
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-51 [NASA-TM-109189] p 1656 N94-21884

ICE MAPPING
Polarimetric backscattering from sea ice p 1723 N94-20426
Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations p 1723 N94-20427
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435

ICE NUCLEI
Holographic measurements of ice crystals in cirrus clouds during International Cirrus Experiment ICE [GKSS-92/E/14] p 1866 N94-21052
Remote sensing estimates of cirrus particle size for tropical and midlatitude cirrus: Hexagonal crystals and ice spheres p 1880 N94-22342
Are tropical cirrus brighter than mid-latitude cirrus? p 1881 N94-22343

ICE REPORTING
Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations p 1723 N94-20427
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434

ICY SATELLITES
The 3-D Moons: The Voyager stereo atlas of the outer solar system p 2111 N94-20740

IDENTIFYING
Experiments in knowledge refinement for a large rule-based system [AD-A272055] p 1809 N94-21445

IDENTITIES
Vanishing theorem on arithmetic surfaces [PB93-215481] p 1961 N94-22263

IGNEOUS ROCKS
The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640
Carbonaceous xenoliths from the Erevan howardite p 1684 N94-20642
Igneous rock from Severnyi Kolchim (H3) chondrite: Nebular origin p 2082 N94-20643
Venus magmatic and tectonic evolution p 2101 N94-20683
Post-igneous redistribution of components in eucrites p 1685 N94-20684

IGNITION
A spheromak ignition experiment reusing Mirror Fusion Test Facility (MFTF) equipment [DE94-001856] p 2034 N94-22050

ILLUMINATING
The energy performance of prototype holographic glazings [DE93-040451] p 1809 N94-21545

ILMENITE
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Abundance and composition of solar KR in the H3-H6 chondrite ACFER111 p 1684 N94-20676
Production of O2 on the Moon: A lab-top demonstration of ilmenite reduction with hydrogen p 2126 N94-20821
A Backscatter Moessbauer Spectrometer (BaMS) for use on Mars p 1811 N94-22431

IMAGE ANALYSIS
Recognizing 3-D objects using 2-D images [AD-A271005] p 1983 N94-19819
Statistical object recognition [AD-A270887] p 1962 N94-20113
Evaluation of lunar rocks and soils for resource utilization: Detailed image analysis of raw materials and beneficiated products p 2126 N94-20820
Objective determination of image end-members in spectral mixture analysis p 1686 N94-20831
Rapid estimates of crop production using remote sensing: European experience p 1840 N94-20969
Holographic measurements of ice crystals in cirrus clouds during International Cirrus Experiment ICE [GKSS-92/E/14] p 1866 N94-21052
Determining the 3-D structure and motion of objects using a scanning laser range sensor [NASA-CR-194745] p 1818 N94-21817
Symposium on Microscopy and Image Analysis of Building Materials [VTT-SYMP-136] p 1707 N94-21890
Preparation of concrete specimens for microstructural image analysis studies p 1707 N94-21891
Optical air pore analysis p 1708 N94-21892

A quantitative S.E.M. image analysis of cement paste microstructure p 1708 N94-21894
Determination of pore structure of concrete from thin sections by image analysis p 1708 N94-21895
Microstructure in mortar: A summary of a new project of research p 1708 N94-21896
Quantitative analysis of scanning tunneling microscopy images for surface structure determination: Sulfur on Re(0001)
[DE93-019235] p 2034 N94-22041
A 3-D vision method for estimating workspace occupancy of a power-line maintenance robot p 1770 N94-22105
Directional coding of morphological pyramidal representations p 1771 N94-22106
Optimal object modelling for an active-vision system p 1771 N94-22107
Hierarchical surface triangulation of range data p 1771 N94-22108
Segmenting the optical flow due to the motion of several rigid objects p 1777 N94-22147
Elliptical-shape parameter estimation from a set of normal lines p 1777 N94-22148
An insensitive algorithm for template matching with correlation p 1793 N94-22249
Measurement of thermal-hydraulic parameters in two-phase flow using flow visualization image analysis
[DE93-006255] p 1805 N94-22269
STAR-1 SAR road extraction using texture analysis and mathematical morphology
[ISBN-0-315-83255-X] p 1843 N94-22429
GUIs in the MIDAS environment p 2047 N94-22449
An IDL-based analysis package for COBE and other skycube-formatted astronomical data p 1925 N94-22471
SkICAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546

IMAGE CLASSIFICATION
Recognition by prototypes
[AD-A271687] p 1943 N94-20921
Goal-oriented dynamic vision
[TR-466] p 1945 N94-21315
Improvement in invariant pattern recognition with neural networks and Fourier-Mellin filters p 1780 N94-22164
A modified moment invariants technique for classification of noisy objects p 1780 N94-22165
Automated cloud classification with a fuzzy logic expert system p 1875 N94-22313
STARBASE: Database software for the automated plate scanner p 1927 N94-22512

IMAGE CONTRAST
Why stereo vision is not always about 3D reconstruction
[AD-A270522] p 1939 N94-19893
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940

IMAGE ENHANCEMENT
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457

IMAGE FILTERS
Improvement in invariant pattern recognition with neural networks and Fourier-Mellin filters p 1780 N94-22164

IMAGE INTENSIFIERS
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617

IMAGE MOTION COMPENSATION
Visual tracking
[AD-A271686] p 1943 N94-20920
Determining the 3-D structure and motion of objects using a scanning laser range sensor
[NASA-CR-194745] p 1818 N94-21817
A motion extraction method for synthetic aperture radars
[DLR-FB-92-31] p 1742 N94-22279

IMAGE PROCESSING
Metrics for specifying and/or testing neural networks statement of government interest
[AD-D015946] p 1938 N94-19843
Robust photo-topography by fusing shape-from-shading and stereo
[NASA-CR-194697] p 1808 N94-19920
Robust and efficient 3D recognition by alignment
[AD-A270839] p 1904 N94-20041
Low bit rate coding of Earth science images
[NASA-CR-193729] p 2041 N94-20158
Optoelectronic associative memory
[NASA-CASE-NPO-18278-1-CU] p 1985 N94-20303
A comparison of some of the most current methods of image compression
[AD-A271841] p 1907 N94-20525
Simulating a user's preferences: Towards automated artificial evolution for computer generated images
[AD-A272058] p 1942 N94-20621
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging p 2082 N94-20659
Visual tracking
[AD-A271686] p 1943 N94-20920
Recognition by prototypes
[AD-A271687] p 1943 N94-20921
Nature's crucible: Manufacturing optical nonlinearities for high resolution, high sensitivity encoding in the compound eye of the fly, Musca domestica p 1755 N94-21095
Adaptive analog video signal conditioner p 1744 N94-21099
Multiple-fold clustered processor mesh array p 1757 N94-21113
An optically-assisted 3-D cellular array machine
[AD-A272683] p 1987 N94-21163
Internal camera calibration using rotation and geometric shapes
[AD-A272718] p 1808 N94-21167
Image detection using edge extraction algorithms
[AD-A272439] p 1911 N94-21203
Some extensions of the k-means algorithm for image segmentation and pattern classification
[AD-A271691] p 1913 N94-21364
Data and model-driven selection using parallel-line groups
[AD-A271702] p 1913 N94-21365
Magnetic force microscopy/current contrast imaging: A new technique for internal current probing of IC's
[DE93-040754] p 1761 N94-21532
A data distributed, parallel algorithm for ray-traced volume rendering
[DE93-040150] p 1935 N94-21622
Reduction of blocking effects for the JPEG baseline image compression standard p 1765 N94-21714
Visualization on massively parallel computers using CM/AVS
[DE93-040151] p 1936 N94-21746
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
Performance evaluation of video on ethernet
[DE93-040696] p 1936 N94-21749
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761
Geometric optimization
[DE93-040152] p 1917 N94-21764
Imaging vector fields using line integral convolution
[DE93-019922] p 1917 N94-21841
Three dimensional ultrasonic imaging
[DE93-040549] p 1968 N94-22003
A 3-D vision method for estimating workspace occupancy of a power-line maintenance robot p 1770 N94-22105
Directional coding of morphological pyramidal representations p 1771 N94-22106
Segmentation and fitting by residual consensus p 1771 N94-22109
The local measurement and global interpretation of 3D motion field generated by several moving objects from range image sequences p 1777 N94-22146
Scale-space filtering and threshold hierarchy for image segmentation p 1777 N94-22149
New algorithm for the detection of the orientation of a planar Lambertian surface in 3D p 1777 N94-22150
VLSI design of a parallel video output interface p 1778 N94-22153
Coding of color quantized images p 1781 N94-22173
Hierarchical multirate vector quantization for image coding p 1781 N94-22174
Image convolution using the Myrias SPS-2 parallel computer p 1786 N94-22207
Parallelizing a maximum entropy image deconvolution algorithm p 1787 N94-22208
Optical processing in photorefractive media p 1789 N94-22222
A real-time infrared image processing testbed p 1790 N94-22227
Memory based vision: A new concept p 1790 N94-22228
Automated investigation of quasars at a galactic latitude of -45 deg
[ISBN-0-315-57576-X] p 2056 N94-22415
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts
[NASA-TM-108245] p 2057 N94-22438
A low-cost vector processor boosting compute-intensive image processing operations p 1925 N94-22441
Multifrequency data analysis software on STARLINK p 1925 N94-22443
CCD surface photometry of galaxies p 2058 N94-22445
GUIs in the MIDAS environment p 2047 N94-22449
A neural network prototyping package within IRAF p 1949 N94-22451
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461
PHOTCAL: The IRAF photometric calibration package p 1925 N94-22465
Deep near-infrared survey of the Southern Sky (DENIS) p 2062 N94-22467
Enhancements to IRAF/STSDAS graphics p 1925 N94-22470
An IDL-based analysis package for COBE and other skycube-formatted astronomical data p 1925 N94-22471
Programmability in AIPS++ p 1926 N94-22482
Telescope image modelling software in STSDAS p 1926 N94-22483
How is WFPC flat field made p 1926 N94-22484
Deconvolution of Hubble Space Telescope images using simulated point spread functions p 2048 N94-22497
The IDL astronomy user's library p 2048 N94-22500
SKYMAP: Exploring the Universe in software p 1927 N94-22511
Some practicable applications of quadtree data structures/representation in astronomy p 1927 N94-22515
A new programming metaphor for image processing procedures p 1927 N94-22531
PCIPS 2.0: Powerful multiprofile image processing implemented on PCs p 1927 N94-22532
The spectral world coordinate systems in IRAF/NOAO p 2049 N94-22539
MOSAIC: Software for creating mosaics from collections of images p 1927 N94-22543
Registering and resampling images in STSDAS p 1927 N94-22550
First MEM task IRMEO in IRAF p 1928 N94-22551
Image processing as a tool in flight testing evaluation p 1640 N94-22606

IMAGE RECONSTRUCTION
Optimal resolution in maximum entropy image reconstruction from projections with multigrid acceleration p 1955 N94-21465
Hierarchical surface triangulation of range data p 1771 N94-22108
A software environment for the exploitation of the MAR image sensor p 1785 N94-22200
Applications of a two-dimensional nonlinear filters to image restoration p 1789 N94-22225
Memory based vision: A new concept p 1790 N94-22228
Surface acquisition through virtual milling p 1920 N94-22372
STAR-1 SAR road extraction using texture analysis and mathematical morphology
[ISBN-0-315-83255-X] p 1843 N94-22429
Restoration of HST images with missing data p 2057 N94-22439
Efficient transfer of images over networks p 1748 N94-22517
First MEM task IRMEO in IRAF p 1928 N94-22551

IMAGE RESOLUTION
Why stereo vision is not always about 3D reconstruction
[AD-A270522] p 1939 N94-19893
Nature's crucible: Manufacturing optical nonlinearities for high resolution, high sensitivity encoding in the compound eye of the fly, Musca domestica p 1755 N94-21095
Data compression by using wavelet transforms and vector quantization
[AD-A272763] p 1738 N94-21182
A neural network for multiresolution edge detection p 1779 N94-22163
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
A multiresolution wavelet representation in two or more dimensions p 1925 N94-22456
Enhancements to IRAF/STSDAS graphics p 1925 N94-22470
An IDL-based analysis package for COBE and other skycube-formatted astronomical data p 1925 N94-22471
HST image restoration: A comparison of pre- and post-servicing mission results p 1925 N94-22478

IMAGE ROTATION
Registering and resampling images in STSDAS p 1927 N94-22550

IMAGERY
The digital archive of the International Halley Watch p 2047 N94-22496

IMAGES
Optical encoding of imaging data
[AD-D015915] p 1984 N94-20056
Hierarchical multirate vector quantization for image coding p 1781 N94-22174
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549
IMAGING RADAR
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918
IMAGING SPECTROMETERS
MinMap: An imaging spectrometer for high resolution compositional mapping of the Moon p 1813 N94-20686
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2 p 1872 N94-22298
IMAGING TECHNIQUES
Uncertainty limited atomic position measurement using optical fields
[AD-A271013] p 1970 N94-19822
An assessment of COMSCAN, a Compton backscatter imaging camera, for the one-sided non-destructive inspection of aerospace components
[AD-A271331] p 1906 N94-19837
The NRL LACE program
[AD-A270861] p 1657 N94-19896
Proceedings of the 8th International Symposium on Applications of Ferroelectrics
[AD-A270679] p 1749 N94-20012
Optical encoding of imaging data
[AD-D015915] p 1984 N94-20056
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
Automatic AVHRR image navigation software
[NASA-CR-194602] p 1643 N94-20148
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Optical diagnostic instrument for monitoring etch uniformity during plasma etching of polysilicon in a chlorine-helium plasma
[DE93-019582] p 1993 N94-20261
The National High Magnetic Field Laboratory, a user facility in support of research in high magnetic fields
[DE93-040145] p 1714 N94-20278
Three-dimensional dynamic thermal imaging of structural flaws by dual-band infrared computed tomography
[DE93-019575] p 1906 N94-20316
Ultrafast scanning microscopy
[DE93-040121] p 1985 N94-20320
Wide-angle imaging system with fiberoptic components providing angle-dependent virtual material stops
[NASA-CASE-NPO-18146-1-CU] p 1986 N94-20345
Cognition and the brain: A continuation of the university research initiative at New York University
[AD-A271872] p 1894 N94-20467
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617
The High Resolution Stereo Camera (HRSC) for the Lunar Scout 1 Mission p 1813 N94-20650
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging p 2082 N94-20659
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging p 2101 N94-20685
The 3-D Moons: The Voyager stereo atlas of the outer solar system p 2111 N94-20740
The Clementine Mission science return at the Moon and Geographos p 1652 N94-20850
Information extraction for multispectral images using radiation interaction models
[BCRS-90-22] p 1841 N94-21015
Image detection using edge extraction algorithms
[AD-A272439] p 1911 N94-21203
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
Some extensions of the k-means algorithm for image segmentation and pattern classification
[AD-A271691] p 1913 N94-21364
Data and model-driven selection using parallel-line groups
[AD-A271702] p 1913 N94-21365
Magnetic force microscopy/current contrast imaging: A new technique for internal current probing of IC's
[DE93-040754] p 1761 N94-21532
Instantaneous velocity field imaging instrument for supersonic reacting flows
[NASA-CR-191162] p 1809 N94-21607
A data distributed, parallel algorithm for ray-traced volume rendering
[DE93-040150] p 1935 N94-21622
High resolution, three dimensional soft x ray imaging
[DE93-018667] p 1989 N94-21630
Electron holography applied to the study of ceramic materials
[DE94-000329] p 1707 N94-21653
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761
Imaging vector fields using line integral convolution
[DE93-019922] p 1917 N94-21841
Some experiments on using backscattered electron and energy dispersive x ray imaging in determination of portland cement clinker phase composition p 1708 N94-21893
Iterative electromagnetic Born inversion applied to earth conductivity imaging
[DE93-040668] p 1859 N94-21928
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940
Three dimensional ultrasonic imaging
[DE93-040549] p 1968 N94-22003
Inelastic electron scattering from surfaces
[DE94-001738] p 1977 N94-22049
Surface acquisition through virtual milling p 1920 N94-22372
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457
New IRAF stellar photometry software p 1925 N94-22464
How is WFPC flat field made p 1926 N94-22484
SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486
HST PSF simulation using Tiny Tim p 1926 N94-22498
An x ray archive on your desk: The Einstein CD-ROM's p 2048 N94-22519
UIT support observations archive p 2048 N94-22534
SkICAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552
IMPACT
Impact-induced devolatilization of CaSO4 anhydrite and implications for K-T extinctions: Preliminary results p 2085 N94-20840
IMPACT DAMAGE
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Dynamics of large scale impacts on Venus and Earth p 2098 N94-20666
Kalkkop crater, Eastern Cape: A new impact crater in South Africa p 1862 N94-20714
Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729
Numerical modeling of impact erosion of atmospheres: Preliminary results p 2131 N94-20847
Morphologic classes of impact basins on Venus p 2137 N94-20883
Orbital debris and micrometeoroids: LDEF and Mir data p 1659 N94-21368
Measured space environmental effects to LDEF during retrieval p 1659 N94-21372
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668
IMPACT LOADS
Shock wave interactions with exothermic mixtures
[AD-A271149] p 1829 N94-19836
A benchmark study of 2D and 3D finite element calculations simulating dynamic pulse buckling tests of cylindrical shells under axial impact
[DE93-018859] p 1829 N94-19940
Shock response of porous Al-2 + Fe2O3 powder mixtures
[DE93-018851] p 1688 N94-19944
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields
[AD-A272123] p 1831 N94-20572
Shock attenuation at the Slate Islands revisited p 1863 N94-20887
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931
IMPACT MELTS
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Impact glasses from the ultrafine fraction of lunar soils p 2097 N94-20662
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Self diffusion of alkaline-Earth in Ca-Mg-aluminosilicate melts: Experimental improvements on the determination of the self-diffusion coefficients p 1684 N94-20669
Preliminary estimation of tagamite cooling conditions (Puchezh-Katunki Astrobleme, Russia) p 2083 N94-20735
Original size of the Vredefort structure, South Africa p 1863 N94-20825
Core formation by giant impacts: Conditions for intact melt region formation p 1863 N94-20833
Reverse polarity magnetized melt rocks from the Chicxulub impact structure, Yucatan Peninsula, Mexico p 1863 N94-20843
Limits on differentiation of melt sheets from basin-scale lunar impacts p 2133 N94-20856
IMPACT STRENGTH
Dynamic properties of ceramic materials
[DE94-000654] p 1708 N94-21963
IMPACT TESTS
Dynamic, multiaxial impact response of confined and unconfined ceramic rods
[DE93-040057] p 1829 N94-19824
Shock wave interactions with exothermic mixtures
[AD-A271149] p 1829 N94-19836
A benchmark study of 2D and 3D finite element calculations simulating dynamic pulse buckling tests of cylindrical shells under axial impact
[DE93-018859] p 1829 N94-19940
Impactor control of central peak and peak-ring formation p 1862 N94-20744
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864
Combination of on ground experiments and analysis software for the evaluation of material degradation in space (SILEX project) p 1662 N94-21389
Hypervelocity impact studies at CEG: Experimental and numerical capabilities p 1664 N94-21397
Experimental and numerical studies of high-velocity impact fragmentation
[DE93-040205] p 1832 N94-21557
Dynamic properties of ceramic materials
[DE94-000654] p 1708 N94-21963
IMPACT TOLERANCES
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864
IMPACTORS
Searching for ancient Venus p 2111 N94-20743
IMPEDANCE
Observation of reflected waves on the SABRE positive polarity inductive adder MITL
[DE93-019413] p 1980 N94-20295
IMPELLERS
Three dimensional unsteady flow calculations in radial components p 1669 N94-20080
Experimental and computational results from a large low-speed centrifugal impeller
[NASA-TM-106421] p 1636 N94-20136
IMPLANTATION
Implantation of nitrogen: Effects of hydrogen and implantation energy p 1686 N94-20804
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583
IMPLOSIONS
Laser driven hydrodynamic instability experiments
[DE93-040550] p 1818 N94-21547
IMPULSES
Using crosscorrelation techniques to determine the impulse response of linear systems p 1759 N94-21122
IMPURITIES
Segregation of Si to the surface of Fe-29Ni-17Co alloy
[DE93-040053] p 1687 N94-19864
Transient thermal analysis of cryocondensation pump for JET
[DE93-040372] p 1992 N94-20003
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744

Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
On Plasma Edge Spectroscopy and Spectroscopic Studies of Impurity Densities and Impurity Transport
[IPF-92-2] p 1996 N94-21802
Plasma edge spectroscopy p 1996 N94-21803
Spectroscopic studies of impurity densities and impurity transport p 1997 N94-21804

IN SITU MEASUREMENT
Optical diagnostic instrument for monitoring etch uniformity during plasma etching of polysilicon in a chlorine-helium plasma
[DE93-019582] p 1993 N94-20261
Comparison of satellite-derived velocity fields in the coastal transition zone
[AD-A272565] p 1883 N94-21360
In situ identification of the Martian surface material and its interaction with the Martian atmosphere using DTA/GC p 1812 N94-22434

IN-FLIGHT MONITORING
In-flight measurement of aircrew breathing in Navy aircraft
[AD-A271811] p 1896 N94-21154

INCIDENCE
Topographic mapping using a monopulse SAR system p 1721 N94-20417
Multiple-wavelength angle-of-incidence ellipsometry: Application to silicon nitride-gallium arsenide structures p 2019 N94-20974
Thin film compositional analysis using null or fixed wavelength ellipsometry p 1709 N94-20976
Variable wavelength, variable angle ellipsometry including a sensitivities correlation test p 1710 N94-20978
Variable angle of incidence spectroscopic ellipsometric study of semiconductor multilayer structures p 2020 N94-20982
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
Micro-ellipsometric measurements of strained layer structures p 2025 N94-21008
Fundamentals and applications of variable angle spectroscopic ellipsometry p 1687 N94-21011
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013
VASE (variable angle spectroscopic ellipsometry) p 1687 N94-21014

INCLUSIONS
Petrography and origin of refractory inclusions from the Murray and Murchison C2 chondrites p 2084 N94-20770
Primary differentiation in the early Earth: Nd and Sr isotopic evidence from diamondiferous eclogites for both old depleted and old enriched mantle, Yakutia, Siberia p 1662 N94-20776
Fe/Mn in olivine of carbonaceous meteorites p 2084 N94-20788
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
[CONTRIB-5241(804)] p 2084 N94-20795
Diffusion-controlled magnesium isotopic fractionation of a single crystal forsterite evaporated from the solid state p 1686 N94-20855
Trace element compositions of spinel-rich refractory inclusions from the Murchison meteorite p 2086 N94-20897
Inter- and intra-crystalline oxygen isotope distribution of fassaites in Allende CAI p 2086 N94-20898
Mineralogy of dark clasts in primitive versus differentiated meteorites p 2087 N94-20907
Surface and subsurface defect detection in Si3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772

INCOMPRESSIBLE FLOW
A comparison of two incompressible Navier-Stokes algorithms for unsteady internal flow
[NASA-TM-108794] p 1798 N94-20104
Multigrid solution of the Navier-Stokes equations on highly stretched grids with defect correction p 1806 N94-21481
Modelling stalled airfoils
[ISBN-0-315-59525-6] p 1639 N94-22382

INDENE
Chemical reaction fouling model for single-phase heat transfer
[DE93-019556] p 1802 N94-20942

INDEPENDENT VARIABLES
Longitudinal instability of an induction linac with acceleration
[DE93-019249] p 1980 N94-20290

INDEXES (DOCUMENTATION)
Aeronautical engineering: A continuing bibliography with indexes (supplement 294)
[NASA-SP-7037(294)] p 1635 N94-20267
On the selection of indices in relational databases
[MEMO-INF-92-72] p 2043 N94-21071
Index to 1992 NASA Tech Briefs, volume 16, numbers 1-12
[NASA-TM-109377] p 2053 N94-21736
Index to 1991 NASA Tech Briefs, volume 15, numbers 1-12
[NASA-TM-109376] p 2053 N94-21737
Cumulative index to NASA Tech Briefs, 1986-1990, volumes 10-14
[NASA-TM-109378] p 2054 N94-21738
Data indexing techniques for the EUVE all-sky survey p 2048 N94-22503

INDEXES (RATIOS)
Analysis of consumer demand structure by means of economic indexes p 2052 N94-22074

INDIUM ALLOYS
Thin-film CdTe and CuInSe2 photovoltaic technologies
[DE93-018217] p 1848 N94-21827

INDIUM ARSENIDES
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Synthesis and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229

INDIUM COMPOUNDS
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1847 N94-21614
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617

INDIUM GALLIUM ARSENIDES
Characteristics of 0.8- and 0.2-microns gate length In(x)Ga(1-x) As/In(0.52)Al(0.48)As/InP (0.53 less than or equal to x less than or equal to 0.70) modulation-doped field-effect transistors at cryogenic temperatures p 1733 N94-20499
Dielectric function of InGaAs in the visible p 2023 N94-21000
Study of InGaAs-based modulation doped field effect transistor structures using variable-angle spectroscopic ellipsometry p 1796 N94-21001

INDIUM PHOSPHIDES
First results on InGaAsP separate confinement heterostructure diode lasers
[AD-A270849] p 1815 N94-19878
Study of the utilization of thin oxides in indium phosphides for the realisation of electron components
[ECL-92-38] p 2018 N94-20593
Surface treatment of InP and contribution to the optimization of the InP(p)/InP(p) regrown interfaces grown by GSMBE
[ECL-92-48] p 2018 N94-20598

INDOOR AIR POLLUTION
Long Duration Exposure Facility (LDEF) contamination study
[AD-A272419] p 1658 N94-21147

INDUCTION HEATING
Flexible heating head for induction heating
[NASA-CASE-LAR-14418-15-B] p 1718 N94-20368
A study of the induction heating of organic composites
[AD-A272657] p 1675 N94-21187

INDUSTRIAL PLANTS
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044

INDUSTRIAL WASTES
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789

INDUSTRIES
Wind energy: Program overview, FY 1992
[DE93-000056] p 1845 N94-19921
Self assembly: An approach to terascale integration
[DE93-040104] p 1769 N94-21846
Industry standards: Key to distributed computing p 1938 N94-22070
Investigation on construction of the database system for research and development of the global environment industry technology
[DE94-714890] p 1853 N94-22090
Survey on utilization of database for research and development of global environmental industry technology
[DE94-714891] p 1853 N94-22259

INELASTIC SCATTERING
Examination of low level magnetic dipole intensities in the transition nuclei Sm-148, Sm-150, Sm-152 and Sm-154, with inelastic photon scattering at S-DALINAC
[ETN-93-95069] p 1971 N94-20030
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187
Neutron-scattering studies of Yb-bearing silicate glasses
[DE93-019768] p 1700 N94-20265
Measurement of the strange quark distribution function in W(+) charm quark events
[DE93-018267] p 1973 N94-20474
SLAC measurement of the neutron spin structure function
[DE93-040998] p 1975 N94-21788
Toward a QCD analysis of jet rates in deep-inelastic Muon-Proton scattering
[DE94-000618] p 1976 N94-21962
Non-adiabatic effects in low-energy electron-molecule scattering
[DE93-040485] p 1976 N94-21968
Inelastic electron scattering from surfaces
[DE94-001738] p 1977 N94-22049
Inelastic neutron scattering of (gamma)-iron, and the determination of the elastic constants by lattice dynamics
[DE94-000694] p 1978 N94-22573

INEQUALITIES
Vanishing theorem on arithmetic surfaces
[PB93-215481] p 1961 N94-22263

INERTIAL CONFINEMENT FUSION
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958
Phase screens for the control of the focal irradiance of the Nova laser
[DE94-001067] p 1820 N94-22401

INERTIAL NAVIGATION
Automatic AVHRR image navigation software
[NASA-CR-194602] p 1643 N94-20148
A software architecture for a small autonomous underwater vehicle navigation system
[AD-A272322] p 1643 N94-21037
Vector gravimetry by a combination of inertial and GPS satellite measurements
[ISBN-0-315-61980-5] p 1861 N94-22424

INFLATABLE STRUCTURES
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 1658 N94-20590
System test results of the Advanced Technology Anti-G Suit (ATAGS)
[AD-A271535] p 1896 N94-20914

INFORMATION DISSEMINATION
Label-connected graphs: An overview
[RR-898-M] p 1950 N94-20163
Listing of approved recurring information requirements
[AD-A271673] p 2042 N94-20919
Assessment of the organizational structure and services of DOE National Laboratory Libraries
[DE93-040697] p 2045 N94-21750
Implementation of a laboratory information management system for environmental regulatory analyses
[DE94-001198] p 2046 N94-22407
Everything you might want to know about the Internet but are afraid to ask!
[DE93-041118] p 2046 N94-22413
The extreme ultraviolet explorer archive p 2047 N94-22468
A distributed clients/distributed servers model for STARCAT p 2047 N94-22469
STELAR: An experiment in the electronic distribution of astronomical literature p 2049 N94-22544
The STARLINK software collection p 1927 N94-22545

INFORMATION MANAGEMENT
Distributed Virtual System (DIVIRS) project
[NASA-CR-194360] p 1905 N94-20228
HERMES, a report generator for research on information processing in command posts: The effect of missing information
[IZF-1992-A-28] p 2042 N94-20310
Security management of electronic data interchange
[AD-A272962] p 1899 N94-21252
Urban applications of satellite remote sensing and GIS analysis
[PB93-202174] p 1842 N94-21855
Implementation of a laboratory information management system for environmental regulatory analyses
[DE94-001198] p 2046 N94-22407
The extreme ultraviolet explorer archive p 2047 N94-22468

A distributed clients/distributed servers model for STARCAT p 2047 N94-22469
SIMBAD quality-control p 2048 N94-22502
Data indexing techniques for the EUVE all-sky survey p 2048 N94-22503
The NSO FTS database program and archive (FTSDBM) p 1926 N94-22506

INFORMATION PROCESSING (BIOLOGY)
Physiological correlates of stress-induced decrements in human perceptual performance
[DOT/FAA/AM-93/19] p 1893 N94-20081
Toward a neurobiological theory of visual attention
[AD-A270724] p 1890 N94-20112
Incongruity, incongruity resolution, and mental states: The measure and modification of situational awareness and control
[NASA-CR-194568] p 1893 N94-20168
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610
Nature's crucible: Manufacturing optical nonlinearities for high resolution, high sensitivity encoding in the compound eye of the fly, Musca domestica p 1755 N94-21095

INFORMATION RETRIEVAL
Research in image management and access
[NASA-CR-194797] p 1907 N94-20376
Information extraction for multispectral images using radiation interaction models
[BCRS-90-22] p 1841 N94-21015
A conceptual database design and performance analysis of the MILSATCOM requirements database
[AD-A272672] p 1658 N94-21217
Extracting information from wrong answers in computerized adaptive testing
[AD-A272832] p 1894 N94-21434
Project Records Information System (PRIS): User's manual
[DE94-001548] p 2045 N94-22047
The Keck keyword layer p 1925 N94-22460
Electronic publishing and intelligent information retrieval p 2047 N94-22479
Intelligent text retrieval in the NASA astrophysics data system p 2048 N94-22499
SIMBAD quality-control p 2048 N94-22502
StarView: The object oriented design of the ST DADS user interface p 2049 N94-22548

INFORMATION SYSTEMS
Data and Analysis Center for Software
[AD-A270571] p 2041 N94-20106
A proposed research program in information processing
[NASA-CR-194271] p 2041 N94-20134
Distributed Virtual System (DIVIRS) project
[NASA-CR-194360] p 1905 N94-20228
HERMES, a report generator for research on information processing in command posts: The effect of missing information
[IZF-1992-A-28] p 2042 N94-20310
Multi Wave Link: An interactive database for co-ordination of multiwavelength programs
[NASA-CR-194778] p 2043 N94-21055
The electronics technology policy of the NLR Informatics Division: The NLR electronics CAE infrastructure
[NLR-TP-91001-U] p 1753 N94-21067
Government Open Systems Interconnection Profile (GOSIP) transition strategy
[AD-A273005] p 1740 N94-21308
PEGASUS, electronic bulletin board system user's guide
[AD-A271679] p 2044 N94-21363
CMIFed: A presentation environment for porta ble hypermedia documents
[CWI-CS-R9305] p 2044 N94-21494
Electronic resources for security related information: Reference document
[DE93-040488] p 2044 N94-21529
Assessment of the organizational structure and services of DOE National Laboratory Libraries
[DE93-040697] p 2045 N94-21750
Project Records Information System (PRIS): User's manual
[DE94-001548] p 2045 N94-22047
Information Technology and Economic Modelling
[VTT-SYMP-135] p 2049 N94-22056
Soviet society informatization: The USSR state program p 2046 N94-22058
Information sciences and business enterprises p 2046 N94-22059
Information and decision structure in a Japanese type of management with respect to QCC and just-in-time systems p 2046 N94-22063
Manufacturing and information technology p 2046 N94-22082
Survey on utilization of database for research and development of global environmental industry technology
[DE94-714891] p 1853 N94-22259
The logistic model: The integration of business process redesign and information systems development based on logistic principles
[MEMO-INF-92-70] p 2045 N94-22276
A comparison of IDEF1X and NIAM ISDM
[DE93-040899] p 1921 N94-22383
Everything you might want to know about the Internet but are afraid to ask!
[DE93-041118] p 2046 N94-22413
Archiving data from ground-based telescopes p 2046 N94-22442
Electronic publishing and intelligent information retrieval p 2047 N94-22479
Programmability in AIPS++ p 1926 N94-22482
Intelligent text retrieval in the NASA astrophysics data system p 2048 N94-22499
SIMBAD quality-control p 2048 N94-22502
NASA's astrophysics archives at the National Space Science Data Center p 2049 N94-22541
STELAR: An experiment in the electronic distribution of astronomical literature p 2049 N94-22544
The STARLINK software collection p 1927 N94-22545

INFORMATION THEORY
A complex systems approach to computational molecular biology
[DE93-040062] p 1884 N94-19866
The communication complexity of set intersection problems
[MEMO-1077] p 1738 N94-21073
Reasoning about update logic
[CWI-CS-R9312] p 1914 N94-21496

INFORMATION TRANSFER
Data and Analysis Center for Software
[AD-A270571] p 2041 N94-20106
Security management of electronic data interchange
[AD-A272962] p 1899 N94-21252
Implementing Electronic Data Interchange (EDI) with small business suppliers in the pre-award acquisition process
[AD-A271767] p 1945 N94-21305
Government Open Systems Interconnection Profile (GOSIP) transition strategy
[AD-A273005] p 1740 N94-21308
Survey on utilization of database for research and development of global environmental industry technology
[DE94-714891] p 1853 N94-22259
NASA data exchange standards for computational fluid dynamics p 1920 N94-22371

INFRARED ABSORPTION
Infrared absorption spectroscopy of the weakly bonded CO-Cl2 complex
[AD-A271757] p 2027 N94-21304

INFRARED ASTRONOMY
Circumstellar environments of Be stars at infra-red and radio wavelengths
[ISBN-0-315-83135-9] p 2081 N94-22426
A neural network prototyping package within IRAF p 1949 N94-22451
The spectral world coordinate systems in IRAF/NOAO p 2049 N94-22539
SPECFOCUS: An IRAF task for focusing spectrographs p 1965 N94-22540

INFRARED DETECTORS
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Models of refraction in the marine atmosphere surface layer
[AD-A271724] p 1858 N94-21357
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528
Optical properties of cirrus derived from airborne measurements during FIRE IFO 2 p 1872 N94-22297

INFRARED IMAGERY
Three-dimensional dynamic thermal imaging of structural flaws by dual-band infrared computed tomography
[DE93-019575] p 1906 N94-20316
The quantum efficiency of HgCdTe photodiodes in relation to the direction of illumination and to their geometry p 1735 N94-20512
The 7th Brazilian Remote Sensing Symposium, volume 2 p 1838 N94-20956
Analysis of hyper-spectral AVIRIS image data over a mixed-conifer forest in Maine p 1838 N94-20959
A real-time infrared image processing testbed p 1790 N94-22227
A four-band infrared data acquisition facility for signal processing development p 1791 N94-22235
Deep near-infrared survey of the Southern Sky (DENIS) p 2062 N94-22467

INFRARED INSTRUMENTS
Atmospheric infrared sounder
[NASA-CR-194814] p 1856 N94-20362
A retrieval error analysis technique for passive infrared atmospheric sounders
[AD-A272618] p 1867 N94-21212
Fluorescent microthermographic imaging
[DE93-040332] p 1810 N94-22000

INFRARED PHOTOMETRY
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging p 2101 N94-20685
Circumstellar environments of Be stars at infra-red and radio wavelengths
[ISBN-0-315-83135-9] p 2081 N94-22426

INFRARED RADAR
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals p 1871 N94-22295
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308

INFRARED RADIATION
Innovative acoustic technique for studying new materials and new developments in solid state physics
[AD-A270540] p 2013 N94-19933
Visible-infrared properties of controlled laboratory soils p 1685 N94-20689
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate p 2108 N94-20723
Thermal infrared remote sensing and Kirchhoff's law: 1. Laboratory measurements p 1685 N94-20733
Comparisons of downwelling radiation to model predictions based on groundbased measurements during FIRE 1991 p 1876 N94-22320
Calibration of radiation codes in climate models: Comparison of calculations with observations from the SPECtral Radiation Experiment (SPECTRE) p 1879 N94-22337
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas
[DE94-000817] p 1820 N94-22585

INFRARED RADIOMETERS
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Microphysical properties of the November 26 cirrus cloud retrieved by Doppler radar/IR radiometer technique p 1873 N94-22304
Observations of multi-layered clouds using K-band radar p 1874 N94-22311
SSH-2 measurements of cirrus at 18-28 micrometers from the King Air during FIRE 2 p 1880 N94-22338

INFRARED SCANNERS
A four-band infrared data acquisition facility for signal processing development p 1791 N94-22235
Signal processing and target discrimination algorithms for a rosette scan tracker p 1747 N94-22237

INFRARED SIGNATURES
Optical properties of cirrus derived from airborne measurements during FIRE IFO 2 p 1872 N94-22297

INFRARED SPACE OBSERVATORY (ISO)
The ISO SWS on-line system p 1927 N94-22522

INFRARED SPECTRA
Phonons and metastability in compressed nitrogen
[DE93-019913] p 2016 N94-20318
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
High resolution infrared spectroscopy of formamide and deuterated formamide in a molecular beam
[AD-A271986] p 1973 N94-20618
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging p 2101 N94-20685
Visible-infrared properties of controlled laboratory soils p 1685 N94-20689
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate p 2108 N94-20723
C-O volatiles in Apollo 15 and Apollo 17 picritic glasses p 1685 N94-20727
A retrieval error analysis technique for passive infrared atmospheric sounders
[AD-A272618] p 1867 N94-21212
Michelson Interferometer (MINT) p 1813 N94-21646

Calibration of radiation codes in climate models: Comparison of calculations with observations from the SPECtral Radiation Experiment (SPECTRE)
p 1879 N94-22337
The spectral world coordinate systems in IRAF/NOAO
p 2049 N94-22539
SPECFOCUS: An IRAF task for focusing spectrographs
p 1965 N94-22540

INFRARED SPECTROMETERS
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2
p 1872 N94-22298
The ISO SWS on-line system
p 1927 N94-22522

INFRARED SPECTROSCOPY
High resolution infrared spectroscopy of formamide and deuterated formamide in a molecular beam
[AD-A271986]
p 1973 N94-20618
High resolution infrared spectroscopy of cyclobutane: A study of vibrational mode coupling involving large amplitude, low frequency modes
[AD-A271987]
p 1973 N94-20619
Chemistry of the burning surface
[AD-A272725]
p 1681 N94-21181
Infrared absorption spectroscopy of the weakly bonded CO-Cl2 complex
[AD-A271757]
p 2027 N94-21304
Deep near-infrared survey of the Southern Sky (DENIS)
p 2062 N94-22467

INFRARED TRACKING
A real-time infrared image processing testbed
p 1790 N94-22227
Signal processing and target discrimination algorithms for a rosette scan tracker
p 1747 N94-22237

INHIBITORS
Enhancement of wound healing by biosynthetic growth factor
[AD-A272517]
p 1892 N94-21415

INHOMOGENEITY
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite
p 2086 N94-20902

INITIATION
Digital wireless control system
[DE93-040211]
p 1714 N94-19946

INITIATORS (EXPLOSIVES)
N,N'-bis(4,4,4-trinitro butyryl) hydrazine
[AD-D015897]
p 1712 N94-20122

INJECTORS
Heavy ion fusion injector experiments
[DE93-019188]
p 1993 N94-20234
High current injector for heavy ion fusion
[DE93-019241]
p 1979 N94-20289
Liquid fuel injection elements for rocket engines
[NASA-CASE-MFS-28547-1]
p 1669 N94-20370
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597]
p 1826 N94-22093

INJURIES
Evaluation of head injury criteria
[NIAR-93-2]
p 1890 N94-20190

INLET FLOW
Design of a state-space controller for an advanced gas turbine engine
[AD-A270859]
p 1647 N94-20042

INLET TEMPERATURE
Design of a state-space controller for an advanced gas turbine engine
[AD-A270859]
p 1647 N94-20042

INPUT/OUTPUT ROUTINES
Database computing in HEP
[NASA-CR-194791]
p 1921 N94-22375
Distributed input/output processing in data-driven multiprocessors
[DE94-000323]
p 1937 N94-22378
Development of the FITS tools package for multiple software environments
p 1927 N94-22516

INSOLATION
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901]
p 1850 N94-22092

INSPECTION
Demonstrating damage tolerance of composite airframes
p 1647 N94-22623

INSTALLING
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249]
p 1994 N94-20943

INSTRUCTION SETS (COMPUTERS)
A set-associative, fault-tolerant cache design
p 1768 N94-21731

INSTRUMENT ERRORS
Techniques for reducing error in the calorimetric measurement of low wattage items
[DE93-018472]
p 1807 N94-20114
Calorimeter measurements of low wattage items
[DE93-018473]
p 1807 N94-20115
Parameter estimation with cost function of second order in output-error-problem
[DLR-FB-92-38]
p 1964 N94-21139
Description and assessment of a new Optical Pressure Measurement System (OPMS) demonstrated in the high speed wind tunnel in Goettingen (Germany)
[DLR-FB-92-24]
p 1651 N94-21280
Mirror velocity sampling errors in a Michelson interferometer
[AD-A273105]
p 1809 N94-21508
Orbit and sampling requirements: TRMM experience
p 1870 N94-21647
MLS pointing angle error sources and effects
p 1644 N94-22154

INSTRUMENT FLIGHT RULES
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[DOT/FAA/RD-93/22]
p 1642 N94-20051
Parallel runway requirement analysis study. Volume 2: Simulation manual
[NASA-CR-191549-VOL-2]
p 1644 N94-22278

INSTRUMENT LANDING SYSTEMS
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258]
p 1642 N94-22055
FM interference in radio navigation receivers
p 1645 N94-22219

INSTRUMENT ORIENTATION
Analysis and dosign of weight balancing system for laser velocimetry traverse
[AD-A271171]
p 1816 N94-20546
An application of the Cerebellar Model Articulation Controller for a switched reluctance rotor position estimator
[AD-A271769]
p 1943 N94-20926

INSTRUMENT PACKAGES
Database of proposed payloads and instruments for SEI missions
p 1811 N94-22432

INSULATION
Milankovitch insulation forcing and cyclic formation of large-scale glacial, fluvial, and eolian landforms in central Alaska
p 2089 N94-20386
Asbestos characterization using scanning electron microscopy/light element x ray spectrometry
[AD-A271611]
p 1681 N94-21241

INSULATORS
The proximity effect in ultrathin granular Pb films
[AD-A271094]
p 2012 N94-19848
Magnetic instability of Kondo insulators
[DE93-040064]
p 1768 N94-21762

INTAKE SYSTEMS
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597]
p 1826 N94-22093

INTEGERS
A package for long integer arithmetic on the Cray Y-MP
[CWI-NM-R9227]
p 1916 N94-21612

INTEGRAL CALCULUS
Use of computers in the instruction of integral calculus
[AD-A272500]
p 1913 N94-21409
Asymptotic analysis. Working Note No. 2, approximation of integrals
[DE94-000433]
p 1961 N94-22381

INTEGRAL EQUATIONS
A Kirchhoff approach to seismic modeling and prestack depth migration
[AD-A271010]
p 1854 N94-19820
Analytical evaluation of a surface integral expressing the coupling between interior and exterior volumes in a FE-IE approach
p 1722 N94-20423
An efficient formulation of the coupled finite element-integral equation technique for solving large 3D scattering problems
p 1725 N94-20436
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions
[AD-A272665]
p 1681 N94-21216
An integro-algebraic equation for high frequency wake fields in a tube with smoothly varying radius
[DE93-040940]
p 1741 N94-21684
Continuous-time discretized-space approach to modeling short-pulse propagation and scattering
[PB93-215259]
p 1742 N94-22347
Modelling short bent, graded index dielectric slab waveguides
[PB93-215283]
p 1742 N94-22349

INTEGRALS
Use of computers in the instruction of integral calculus
[AD-A272500]
p 1913 N94-21409
Asymptotic analysis. Working Note No. 2, approximation of integrals
[DE94-000433]
p 1961 N94-22381

INTEGRATED CIRCUITS
Preparation and properties of sol-gel derived PZT thin films for decoupling capacitor applications
[DE93-018853]
p 2013 N94-19961
Automated HMC assembly
[DE93-040641]
p 1749 N94-20005
A methodology for formal hardware verification, with application to microprocessors
[AD-A270550]
p 1898 N94-20085
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158]
p 2015 N94-20184
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178]
p 2015 N94-20214
High resolution signal processing
[AD-A271181]
p 1717 N94-20215
A breakdown model for the bipolar transistor to be used with circuit simulators
[DE93-019422]
p 1750 N94-20218
Recent activities in printed Antennas at LeRC
p 1722 N94-20422
Cratering evaluations and results
[DE93-040347]
p 1691 N94-20478
Solid State Technology Branch of NASA Lewis Research Center: Fifth Annual Digest
[NASA-TM-106303]
p 1732 N94-20497
An x-band peeled HEMT amplifier
p 1732 N94-20498
Coplanar waveguide radial line stub
p 1733 N94-20503
Correct CMOS IC defect models for quality testing
p 1755 N94-21093
Fault detection in digital and analog circuits using an i(DD) temporal analysis technique
p 1757 N94-21106
Experiments on technology mapping using different cell libraries
p 1758 N94-21118
A CAM-based LZ data compression IC
p 1759 N94-21129
Decoupled computer architectures for very high-speed technologies
[AD-A271646]
p 1900 N94-21301
Layout optimization with algebraic multigrid methods
p 1957 N94-21474
Magnetic force microscopy/current contrast imaging: A new technique for internal current probing of IC's
[DE93-040754]
p 1761 N94-21532
Optical integrated structures and circuits on silicon
[VTT-PUBS-106]
p 1988 N94-21594
A novel semiconductor process for optoelectronic applications on silicon substrate
p 1988 N94-21595
Advanced failure analysis laboratory equipment networking
[DE93-019070]
p 1916 N94-21633
Localization of pellicle-induced open contacts using charge-induced voltage alteration
[DE93-019407]
p 1762 N94-21636
Heterojunction bipolar transistor technology for data acquisition and communication
p 1763 N94-21697
Design and test of field programmable gate arrays in space applications
p 1765 N94-21710
A high speed CMOS A/D converter
p 1767 N94-21726
A novel cache mechanism
p 1767 N94-21730
A set-associative, fault-tolerant cache design
p 1768 N94-21731
Spectral characterization of lithographic sources
[DE93-019941]
p 1997 N94-21848
Fluorescent microthermographic imaging
[DE93-040332]
p 1810 N94-22000
Characterization and modelling of extremely high frequency enclosures
p 1782 N94-22177
MHMIC: Technology for the integration of microwave sub-assemblies
p 1785 N94-22199

INTEGRATED LIBRARY SYSTEMS
Research in image management and access
[NASA-CR-194797]
p 1907 N94-20376

INTEGRATED OPTICS
Optical integrated structures and circuits on silicon
[VTT-PUBS-106]
p 1988 N94-21594
A novel semiconductor process for optoelectronic applications on silicon substrate
p 1988 N94-21595
Integrated optical coupling element on silicon substrate, appendix 2
p 1988 N94-21596
Bidirectional method for optical channel waveguide attenuation measurement by detectors integrated on the wafer, appendix 3
p 1988 N94-21597
An integrated-optic polarization splitter on silicon substrate, appendix 4
p 1989 N94-21598
Fibre pigtailed silicon based low cost passive optical components, appendix 5
p 1989 N94-21599
Wide passband wavelength multi/demultiplexer at 1.3/1.55 micrometers based on etched Fresnel mirror, appendix 8
p 1989 N94-21602
Architectures of the free space optical interconnects
p 1789 N94-22220

INTELLIGENCE TESTS
Compatibility evaluation and research on the Computerized Adaptive Screening Test (CAST): User and programmer's guide
[AD-A273112] p 1894 N94-21510
INTERATOMIC FORCES
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398
INTERCEPTION
High-velocity interceptors for boost-phase intercepts
[DE94-001077] p 1965 N94-22403
INTERCONTINENTAL BALLISTIC MISSILES
Mathematician Wang Ju
[AD-A267882] p 1912 N94-21255
INTERFACES
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
Comparing quasi-Newton methods for solving sparse interface problems
[CWI-NM-R9303] p 1959 N94-21576
The conformance testing methodology to CTRON (communication and central TRON) extended OS
p 1772 N94-22118
VLSI design of a parallel video output interface
p 1778 N94-22153
INTERFACIAL ENERGY
Thermal stability relationships between PMR-15 resin and its composites
[NASA-TM-106285] p 1675 N94-21488
INTERFACIAL TENSION
Surface path lines in plane Stokes flow driven by capillarity
[DE93-041277] p 1803 N94-21651
Interfacial reactions between titanium and borate glass
[DE93-012847] p 1683 N94-22031
INTERFERENCE LIFT
Experimental study on interference aerodynamics of close-coupled canard configuration
[AD-A267760] p 1636 N94-19963
INTERFEROMETERS
Analysis of the TDRS multiple access system for possible use as an attitude control system sensor
p 1666 N94-21338
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2 p 1872 N94-22296
CIMSS FIRE research activities p 1873 N94-22307
INTERFEROMETRY
Spatial patterns in semiconductor lasers
[DE93-040056] p 1814 N94-19865
Principles and applications of oil film interferometry for measuring wall friction fields in air flows
[ETN-93-95062] p 1798 N94-20147
Two microstrip arrays for interferometric SAR applications p 1722 N94-20421
Advances in spaceborne radar remote sensing
p 1723 N94-20424
Topographic slope from the SAR interferometric phase gradient p 1731 N94-20459
Interferometric detection of freeze-thaw displacements of Alaskan permafrost using ERS-1 data
p 1732 N94-20460
Performance evaluation of the JPL TOPSAR system: An across-track interferometric SAR system for topographic mapping p 1732 N94-20461
Earth-based measurement of lunar topography using delayed radar interferometry p 2119 N94-20787
Mirror velocity sampling errors in a Michelson interferometer
[AD-A273105] p 1809 N94-21508
INTERIOR BALLISTICS
Formulation of a next-generation interior ballistic code
[AD-A271539] p 1801 N94-20915
INTERLAMINAR STRESS
Compression strength of composite primary structural components
[NASA-CR-194561] p 1830 N94-20159
INTERLAYERS
Growth, characterization and device development in monocrystalline diamond films
[AD-A272715] p 2026 N94-21190
Synthesis and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229
Orientationally independent antiferromagnetic coupling in epitaxial Fe/Cr (211) and (100) superlattices
[DE94-001270] p 2035 N94-22564
INTERMETALLICS
Fundamentals of mechanical behavior in structural intermetallics: A synthesis of atomistic and continuum modeling
[DE93-019166] p 1690 N94-20232
Properties and potential of high-temperature niobium beryllides
[DE93-019169] p 1690 N94-20233
Production of NiAl and TiAl intermetallics by mechanical alloying
[VTT-JULK-760] p 1691 N94-20530
Strengthening of NiAl matrix composites
[AD-A271491] p 1674 N94-20550
Microstructure evolution in the presence of constraints and implications on the properties of Mg-Li and Nb-Al constraints
[AD-A272088] p 1674 N94-20623
Surface science and modeling studies of endothermic fuels catalysis
[AD-A272850] p 1712 N94-21192
Examinations of composition and deformation behavior of intermetallic phases on the basis of Fe3(AlSi)
[GKSS-92/E/16] p 1692 N94-21311
Strength and toughness improvement of silicide intermetallics by nanophase and microphase reinforcements
[AD-A272914] p 1692 N94-21320
Proceedings of the Seventh Annual Conference on Fossil Energy Materials
[DE94-001091] p 1848 N94-21823
Ni3Al aluminide alloys
[DE94-000493] p 1694 N94-21933
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo)
[DE93-041320] p 1694 N94-21943
Characteristics of shock-compressed configuration of Ti and Si powder mixtures
[DE93-018857] p 1713 N94-22033
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584
INTERNAL COMBUSTION ENGINES
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451
INTERNAL ENERGY
Electronically metastable molecules of high symmetry
[AD-A272015] p 1974 N94-21461
INTERNATIONAL COOPERATION
An economic analysis of transboundary air pollution between Finland and the Soviet Union
[ETLA-DISCUSSION-PAPER-335] p 1854 N94-22072
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092
Fortran for the nineties p 1926 N94-22481
INTERNATIONAL RELATIONS
The future of remote sensing from space: Civilian satellite systems and applications
[OTA-ISC-558] p 1837 N94-20209
INTERNATIONAL TRADE
Aerospace: Facts and figures, 1992-1993
[AD-A272571] p 1635 N94-21419
INTERNETS
Survey on utilization of database for research and development of global environmental industry technology
[DE94-714891] p 1853 N94-22259
INTERPLANETARY DUST
Helium in interplanetary dust particles
p 2082 N94-20653
Micrometeorite dynamic pyrometamorphism: Observation of a thermal gradient in iron-nickel sulfide
p 2083 N94-20716
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Multielement analysis of interplanetary dust particles using TOF-SIMS p 2084 N94-20790
Determination of parameters for hypervelocity dust grains encountered in near-Earth space
p 2084 N94-20817
Cometary interplanetary dust particles? An update on carbon in anhydrous IDPS p 2084 N94-20828
Micrometeorite pre-solar diamonds from Greenland cryoconite? p 2086 N94-20895
On dust emissions from the jovian system
p 2141 N94-20909
INTERPLANETARY MAGNETIC FIELDS
Magnetic fields in spiral galaxies
p 2010 N94-22697
Magnetic reconnection in emission nebulae in clusters of galaxies p 2010 N94-22700
INTERPLANETARY MEDIUM
Compressible MHD turbulence in the interplanetary medium p 2003 N94-22650
INTERPOLATION
Polynomial interpolation of real functions 1: Interpolation in an interval
[AD-A272330] p 1951 N94-20527
Theoretical and numerical examinations of nonlinear parameter dependent advanced differential difference equations
[ETN-93-93681] p 1952 N94-21042
A geometrical process for three dimensional osteotomy planning
[ETN-93-93602] p 1892 N94-21134
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164
Operational equations for the five-point rectangle
[DE94-000366] p 1959 N94-21655
On coefficient quantization and computational roundoff effects in frequency interpolation filter banks
p 1793 N94-22251
INTERPROCESSOR COMMUNICATION
Exploiting the parallelism exposed by partial evaluation
[AD-A270678] p 1928 N94-19877
Global combine on mesh architectures with wormhole routing
[DE93-018792] p 1903 N94-19959
Robust, high-speed network design for large-scale multiprocessing
[AD-A271003] p 1716 N94-19977
Multilist scheduling: A new parallel programming model
[AD-A270549] p 1929 N94-20084
Standard ML signatures for a protocol stack
[AD-A272060] p 1908 N94-20622
Using manufacturing message specification for monitor and control at Venus p 1932 N94-21333
Analysis of multigrid methods on massively parallel computers: Architectural implications
p 1938 N94-21468
Uniform self-stabilizing leader election. Part 1: Complete graph protocols
[CWI-CS-R9308-PT-1] p 1935 N94-21549
A simple modern correctness condition for a space-based high-performance multiprocessor
p 1766 N94-21718
Using stream interleaving to eliminate the need for interlocks in deeply pipelined processors
p 1781 N94-22175
Integration of parallel processing structures using a matrix approach p 1784 N94-22192
Survey on utilization of database for research and development of global environmental industry technology
[DE94-714891] p 1853 N94-22259
A self-defining hierarchical data system
p 2046 N94-22448
INTERSTELLAR CHEMISTRY
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
INTERSTELLAR EXTINCTION
Coagulation of grains in static and collapsing protostellar clouds p 2085 N94-20865
INTERSTELLAR GAS
Fragmentation of magnetized filamentary interstellar clouds p 2008 N94-22687
Gravitational instability of magnetized filamentary clouds. 1: Helical magnetic fields p 2008 N94-22688
Gravitational instability of magnetized filamentary clouds. 2: Rotation p 2009 N94-22689
INTERSTELLAR MAGNETIC FIELDS
Helical kink instability of jets from young stellar objects p 2008 N94-22686
Fragmentation of magnetized filamentary interstellar clouds p 2008 N94-22687
Generation and maintenance of bisymmetric spiral magnetic fields in disk galaxies in differential rotation
p 2010 N94-22695
INTERSTELLAR MASERS
Consequences of plasma-maser in plasma astrophysics p 2006 N94-22669
INTERSTELLAR MATTER
The x ray halo of AM Her
[NASA-CR-189310] p 2054 N94-20142
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging
p 2082 N94-20659
Molecular equilibria and condensation sequences in carbon rich gases p 2083 N94-20756
Coagulation of grains in static and collapsing protostellar clouds p 2085 N94-20865
The x ray halo of Cen X-3
[NASA-CR-189309] p 2055 N94-21295
Non-linear thermal instability of optical thin molecular structures p 2006 N94-22667
Magnetic superbubbles in the galactic disk and halo
p 2009 N94-22694
INTERSTITIALS
Temperature-dependent ion beam mixing
[DE93-040281] p 2033 N94-21999

INTERSYMBOLIC INTERFERENCE
Interference reduction using neural networks
p 1783 N94-22186
Intersymbol interference effects in digital matched filters
p 1788 N94-22218
INVARIANCE
Representation and recognition with algebraic invariants and geometric constraint models
[AD-A271395] p 1949 N94-19838
Restoring locality with faster-than-light velocities
[DE93-040926] p 2038 N94-22010
A multiresolution wavelet representation in two or more dimensions
p 1925 N94-22456
INVENTIONS
The official gazette of the United States Patent and Trademark Office, vol. 1145, no. 4
[PB93-202240] p 2044 N94-21449
INVENTORIES
Recommendations resulting from the SPDS Community-Wide Workshop
[NASA-CR-194684] p 2042 N94-20363
Venus' impact-crater database: Update to approximately 98 percent of the planet's surface
p 2110 N94-20736
INVENTORY MANAGEMENT
NASA property: Improving management of government equipment provided to contractors. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-93-191] p 2039 N94-20206
Data management for interdisciplinary field experiments: OTTER project support
[NASA-CR-4559] p 1842 N94-22345
INVERSE KINEMATICS
Dynamic analyses of flexible robotic manipulators
[ISBN-0-315-59251-6] p 1827 N94-22421
INVERSE SCATTERING
Extended range modified gradient technique for profile inversion (extended version of report Et/Em-1992-8)
[PB93-215242] p 1742 N94-22346
INVERSIONS
Inversion of gravity and bathymetry in oceanic regions for long-wavelength variations in upper mantle temperature and composition
[NASA-CR-192272] p 1882 N94-20131
High resolution signal processing
[AD-A271181] p 1717 N94-20215
Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298
A general rough-surface inversion algorithm: Theory and application to SAR data
p 1719 N94-20407
An inverse DWT for nonorthogonal wavelets
[AD-A272064] p 1737 N94-20582
Two-polarity magnetization in the Manson impact breccia
p 1863 N94-20789
INVERTERS
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092
INVISCID FLOW
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
IODIDES
X ray analysis of alpha mercuric iodide crystal structure and processing effects
[DE93-017620] p 2027 N94-21296
IODINE
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments)
[AD-A272918] p 1802 N94-21220
IODINE COMPOUNDS
Fermiology and De Haas-Van Alphen effect of beta-(ET)2IBr2
[DE93-019523] p 2011 N94-19807
ION ACCELERATORS
Facilities for in situ ion beam studies in transmission electron microscopes
[DE93-019567] p 1979 N94-20222
ION ATOM INTERACTIONS
Testing double ionization mechanisms with highly-charged ions
[DE93-018750] p 1970 N94-19958
Interactions of slow H, H2, and H3 with thin foils
[DE93-040263] p 1976 N94-21995
ION BEAMS
Focused-ion-beam material removal rates
[AD-A270852] p 1713 N94-19834
Longitudinal beam dynamics for heavy ion fusion using WARPrz
[DE93-019154] p 1992 N94-19915
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
Facilities for in situ ion beam studies in transmission electron microscopes
[DE93-019567] p 1979 N94-20222
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289
Observation of reflected waves on the SABRE positive polarity inductive adder MITL
[DE93-019413] p 1980 N94-20295
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297
InP MIS structures with diamondlike amorphous carbon films deposited by ion-beam sputtering and from plasma
p 1710 N94-20979
A dc Penning surface-plasma source
[DE93-040126] p 1997 N94-21989
Temperature-dependent ion beam mixing
[DE93-040281] p 2033 N94-21999
ION CURRENTS
Charge collectors for the omega upgrade
[DE93-019684] p 1972 N94-20264
Low emittance 0.8A K(+) ion source for the LBL Induction Linac System Experiment (ILSE)
[DE93-019237] p 1981 N94-21439
ION CYCLOTRON RADIATION
Fusion plasma theory grant. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE94-000779] p 1994 N94-20940
Studies of electromagnetic ion cyclotron waves using AMPTE/CCE and Dynamics Explorer
[NASA-CR-194711] p 1982 N94-21878
ION DENSITY (CONCENTRATION)
High energy ionization in liquids: The free ion yield
[DE93-040329] p 1973 N94-20324
ION DISTRIBUTION
Direct images of thermal disorder in the Cl-Si and H-O-Si chemisorption bond on Si(100)
[AD-A272386] p 1680 N94-21145
Detailed analysis case studies of trapped plasmas at the Earth's magnetic equator
[AD-A272497] p 1858 N94-21432
ION ENGINES
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 1669 N94-20496
SPACE-R Thermionic Space Nuclear Power System: Design and Technology Demonstration Program
[DE93-013969] p 1670 N94-21824
ION EXCHANGING
Approximate methods for N-component solute transport and ion-exchange
[CWI-NM-R9223] p 1910 N94-21078
ION IMPLANTATION
Formation of colloidal Ag precipitates in fused silica by MeV ion implantation
[DE93-040268] p 2012 N94-19869
Low-energy ion implantation: Large mass fractionation of argon
p 1685 N94-20697
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763
Surface modification for corrosion resistance
[DE93-017419] p 1693 N94-21825
Magnetic insulation of secondary electrons in plasma source ion implantation
[DE93-040106] p 1997 N94-21988
Lattice damage during ion implantation of semiconductors
[DE94-000335] p 2034 N94-22016
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583
ION IRRADIATION
Facilities for in situ ion beam studies in transmission electron microscopes
[DE93-019567] p 1979 N94-20222
Neutral copper cluster sputtering yields: Ne(+), Ar(+) and Xe(+) bombardment
[DE93-019010] p 1690 N94-20288
Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides
[DE93-040600] p 1697 N94-22559
ION MICROSCOPES
Atom probe field ion microscopy characterizations of VVER steels
[DE93-017864] p 1689 N94-20180
ION MOTION
Parametric variations of ion transport in TFTR
[DE93-012653] p 1991 N94-19883
Fast ion behavior during neutral beam injection in ATF
[DE93-040267] p 1992 N94-20058
High energy ionization in liquids: The free ion yield
[DE93-040329] p 1973 N94-20324
ION PROBES
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4
[DE93-018050] p 1689 N94-20182
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging
p 2082 N94-20659
ION PROPULSION
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 1669 N94-20496
ION SCATTERING
Time-of-flight heavy ion backscattering spectrometry
[DE93-019067] p 1973 N94-20306
Accretion of a hot plasma onto the central black hole: Fokker-Planck formulation
p 2009 N94-22693
ION SOURCES
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870
Low emittance 0.8A K(+) ion source for the LBL Induction Linac System Experiment (ILSE)
[DE93-019237] p 1981 N94-21439
Simulation studies of space-charge-dominated beam transport in large aperture ratio quadrupoles
[DE93-019236] p 1981 N94-21440
Optimization and control of a small angle ion source using an adaptive neural network controller
[DE93-040063] p 1946 N94-21845
A dc Penning surface-plasma source
[DE93-040126] p 1997 N94-21989
ION TEMPERATURE
Parametric variations of ion transport in TFTR
[DE93-012653] p 1991 N94-19883
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-001234] p 1998 N94-22561
IONIC COLLISIONS
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870
Testing double ionization mechanisms with highly-charged ions
[DE93-018750] p 1970 N94-19958
Interactions of slow H, H2, and H3 with thin foils
[DE93-040263] p 1976 N94-21995
IONIC MOBILITY
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768
IONIZATION
Testing double ionization mechanisms with highly-charged ions
[DE93-018750] p 1970 N94-19958
High energy ionization in liquids: The free ion yield
[DE93-040329] p 1973 N94-20324
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface
p 2082 N94-20647
Spectral characterization of lithographic sources
[DE93-019941] p 1997 N94-21848
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004
The effect of Compton scattering on the double to single ionization ratio in helium
[DE94-000884] p 1827 N94-22390
Non-equilibrium ionization in an M class solar flare
p 2004 N94-22653
IONIZATION CHAMBERS
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 1669 N94-20496
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights
[NASA-CR-194709] p 2056 N94-22281
IONIZATION CROSS SECTIONS
The effect of Compton scattering on the double to single ionization ratio in helium
[DE94-000884] p 1827 N94-22390
IONIZATION GAGES
Measurement of mesospheric turbulence in the framework of the metal campaign and development of a sensor for static pressure free measurements of neutral and electron density
[BONN-IR-92-45] p 1857 N94-21149
IONIZING RADIATION
Design of CMOS logic gates for TID radiation
p 1754 N94-21083
Improved approximate formulas for flux from cylindrical and rectangular sources
[DE93-011390] p 1742 N94-22268

IONOSPHERIC CONDUCTIVITY
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951
IONOSPHERIC CURRENTS
Radiation of plasma wave wings through an electrodynamic tether satellite system with any sharp angle geometry
[REPT-85] p 1993 N94-20156
IONOSPHERIC PROPAGATION
A general purpose ionospheric ray tracing procedure
[AD-A271058] p 1854 N94-19860
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951
IONS
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870
Energy gain spectroscopic study of Ar(q+)-Ar collisions at 40 qeV
[DE93-040284] p 1970 N94-19871
Charge collectors for the omega upgrade
[DE93-019684] p 1972 N94-20264
Neutron-scattering studies of Yb-bearing silicate glasses
[DE93-019768] p 1700 N94-20265
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions
[AD-A272665] p 1681 N94-21216
Electron emissions in low energy Ar(q+)-Ar collisions
[DE93-040285] p 1974 N94-21543
Radial diffusion of toroidally trapped particles induced by lower hybrid and fast waves
[IPPCZ-327] p 1996 N94-21593
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584
IOWA
Research program on the Manson impact structure, Iowa p 1862 N94-20766
Petrography of shock features in the 1953 Manson 2-A drill core p 1862 N94-20767
IRIDIUM
Iridium in sediments containing large abundances of Australasian microtektites from DSDP hole 758B in the Eastern Indian Ocean and from DSDP hole 769A in the Sulu Sea p 2083 N94-20741
IRON
First discovery of the organic materials in deep-sea iron cosmic spherule p 1685 N94-20677
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions
[AD-A272665] p 1681 N94-21216
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663
Shattering the myth of the resonantly photo-pumped neon-like titanium laser
[DE93-019624] p 1819 N94-21873
Photo- and thermal-induced antiferromagnetic interlayer coupling in Fe/(Fe-Si) superlattices
[DE93-040822] p 2031 N94-21930
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
Orientationally independent antiferromagnetic coupling in epitaxial Fe/Cr (211) and (100) superlattices
[DE94-001270] p 2035 N94-22564
IRON ALLOYS
Segregation of Si to the surface of Fe-29Ni-17Co alloy
[DE93-040053] p 1687 N94-19864
Examinations of composition and deformation behavior of intermetallic phases on the basis of Fe3(AlSi)
[GKSS-92/E/16] p 1692 N94-21311
Investigation of moisture-induced embrittlement of iron aluminides
[DE93-040841] p 1695 N94-21949
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates
[DE93-018788] p 1696 N94-22037
IRON COMPOUNDS
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
Fe/Mn in olivine of carbonaceous meteorites p 2084 N94-20788
Microanalysis of iron oxidation state in iron oxides using X Ray Absorption Near Edge Structure (XANES) p 1686 N94-20808
IRON ISOTOPES
Shielding from space radiations
[NASA-CR-194683] p 1895 N94-20063
FE-60 and the evolution of eucrites p 2083 N94-20768
IRON METEORITES
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20667
Chaunskij: The most highly metamorphosed, shock-modified and metal-rich mesosiderite p 2082 N94-20681
Magnetic properties and Mcessbauer analyses of glass from the K-T boundary, Beloc, Haiti p 1685 N94-20753
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
[CONTRIB-5241(804)] p 2084 N94-20795
A new Antarctic meteorite with chromite, orthopyroxene and metal with reference to a formation model of S asteroids p 2084 N94-20813
Rhenium-osmium isotope systematics of ordinary chondrites and iron meteorites p 2085 N94-20854
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20866
IRON OXIDES
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870
IRRADIANCE
Phase screens for the control of the focal irradiance of the Nova laser
[DE94-001067] p 1820 N94-22401
IRRADIATION
General introduction to microstructural evolution under cascade damage conditions
[DE93-017443] p 2012 N94-19923
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
LREE variability in CM matrices: Another look at meteorite compaction ages p 2086 N94-20884
Evaluation of radiation effects in re-oxidized nitrided oxide devices by hot carrier stressing at 77 K p 1754 N94-21084
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008
IRREGULARITIES
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A272685] p 1857 N94-21189
IRRIGATION
The FY1992 survey on multi-purpose dam and energy utilization system by the wind power generation eration
[DE94-707408] p 1848 N94-22012
Areally averaged estimates of surface heat flux from ARM field studies
[DE93-018569] p 1859 N94-22036
ISCCP PROJECT
The FIRE Cirrus Science Results 1993
[NASA-CP-3238] p 1871 N94-22292
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302
SSH-2 measurements of cirrus at 18-28 micrometers from the King Air during FIRE 2 p 1880 N94-22338
An overview of the radiation component of the NASA TOGA-COARE experiment p 1881 N94-22344
ISING MODEL
Study of (+-)J Ising spin glasses via multicanonical ensemble
[DE93-018269] p 2016 N94-20285
ISOCHORIC PROCESSES
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187
ISOELECTRONIC SEQUENCE
Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21762
ISOLATION
Comparison of a distributed Kalman filter versus a centralized Kalman filter with fault detection considerations
[AD-A270713] p 1903 N94-19989
ISOMERIZATION
Optically induced rotation diffusion in polymer liquid crystals: Phenomenological theory and experimental verification
[ETN-93-95068] p 2014 N94-20026
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
ISOMERS
Rotational isomers of Mo(VI) alkylidene complexes and Cis/trans polymer structure: Investigations in ring-opening metathesis polymerization
[AD-A272647] p 1704 N94-21184
ISOPROPYL COMPOUNDS
Polyimides containing amide and perfluoroisopropylidene connecting groups
[NASA-CASE-LAR-14608-1] p 1702 N94-20374
ISOTHERMAL PROCESSES
Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines
[AD-A272998] p 1648 N94-21268
ISOTOPE EFFECT
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
ISOTOPE SEPARATION
Computational model of a magnetic modulator for copper lasers
[DE93-019603] p 1815 N94-20223
Hydrogen isotope separation experience at the Savannah River Site
[DE93-019832] p 1679 N94-20266
High-power copper vapor lasers and their application to precision drilling and cutting
[DE93-019951] p 1819 N94-21844
ISOTOPES
Milankovitch insulation forcing and cyclic formation of large-scale glacial, fluvial, and eolian landforms in central Alaska p 2089 N94-20386
Helium in interplanetary dust particles p 2082 N94-20653
Cosmogenic-radionuclide profiles in Knyahinya: New measurements and models p 2106 N94-20713
Kalkkop crater, Eastern Cape: A new impact crater in South Africa p 1862 N94-20714
Primary differentiation in the early Earth: Nd and Sr isotopic evidence from diamondiferous eclogites for both old depleted and old enriched mantle, Yakutia, Siberia p 1862 N94-20776
The U-Th-Pb, Sm-Nd, and Ar-Ar isotopic systematics of lunar meteorite Yamato-793169 p 2084 N94-20834
Consortium reports on lunar meteorites Yamato 793169 and Asuka 881757, a new type of mare basalt p 2086 N94-20893
Mars atmosphere loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape p 2144 N94-21672
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
ISOTOPIC LABELING
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
{CONTRIB-5241(804)} p 2084 N94-20795
ISOTROPIC MEDIA
Acoustic radiation damping of flat rectangular plates subjected to subsonic flows
[NASA-TM-109382] p 1967 N94-20211
ISOTROPIC TURBULENCE
Modeling of particle dispersion in a stationary isotropic homogeneous turbulence by large scale numerical simulation
[ETN-93-94604] p 1801 N94-20601
Computation of the sound generated by isotropic turbulence
[NASA-CR-191543] p 1804 N94-21880
ITALY
Using NDVI/AVHRR data for crop monitoring and forecasting in South Italy p 1841 N94-20970
ITERATION
Stochastic optimization by simulation: Convergence proofs for the G1/G/1 queue in steady-state
[AD-A271141] p 1962 N94-19999
Correctness properties for iterated hardware structures p 1759 N94-21124
Optimal convolution SOR acceleration of waveform relaxation with application to semiconductor device simulation p 1922 N94-21475
Butcher-Kuntzmann methods for nonstiff problems on parallel computers
[CWI-NM-R9305] p 1935 N94-21493
ITERATIVE SOLUTION
Set theory and nominalisation, part 1
[PB93-191807-PT-1] p 1962 N94-20007
A multi-level solution algorithm for steady-state Markov chains
[NASA-CR-191558] p 1914 N94-21462
Using parallel banded linear system solvers in generalized eigenvalue problems
[NASA-CR-191540] p 1915 N94-21584

Extended range modified gradient technique for profile inversion (extended version of report Et/Em-1992-8)
[PB93-215242] p 1742 N94-22346

IUE
The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446

J

J-2 ENGINE
Advanced transportation system studies, technical area 3. Alternate propulsion subsystem concepts: J-2S restart study
[NASA-CR-193874] p 1670 N94-21271

JAMMERS
The application of sample vector selection to adaptive nulling: Performance comparison for techniques combining Gram-Schmidt orthogonalization with averaging
p 1747 N94-22234

JAPAN
The chondrite Mihonoseki: New observed fall
p 2083 N94-20764

JAPANESE SPACE PROGRAM
Japanese space program p 1652 N94-21407

JAPANESE SPACECRAFT
Japanese space program p 1652 N94-21407
SPIKE: Application for ASTRO-D mission planning
p 1926 N94-22486

JET ENGINE FUELS
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165

JET FLOW
Development of phased twin flip-flop jets
[NASA-TM-106404] p 1637 N94-20563
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1
[NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2
[NASA-CR-189192-VOL-2] p 1648 N94-21583

JET MIXING FLOW
Finite element numerical simulation of three dimensional turbulent flows with dispersion: Eulerian and Lagrangian approaches
[ECL-92-42] p 1801 N94-20597
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1
[NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2
[NASA-CR-189192-VOL-2] p 1648 N94-21583
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct
[NASA-TM-106435] p 1649 N94-21758

JET STREAMS (METEOROLOGY)
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
Examination of the observed synoptic scale cirrus cloud environment: The December 3-6 FIRE cirrus case study
p 1877 N94-22325
The 5-6 December 1991 FIRE IFO 2 jet stream cirrus case study: The influence of volcanic aerosols
p 1877 N94-22326

JETS
Toward a QCD analysis of jet rates in deep-inelastic Muon-Proton scattering
[DE94-000618] p 1976 N94-21962

JOINT EUROPEAN TORUS
Transient thermal analysis of cryocondensation pump for JET
[DE93-040372] p 1992 N94-20003

JOINTS (ANATOMY)
Automatic locking orthotic knee device
[NASA-CASE-MFS-28633-1] p 1896 N94-20493

JOINTS (JUNCTIONS)
Bladder operated robotic joint
[NASA-CASE-MFS-28682-1] p 1701 N94-20359
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000665] p 1697 N94-22571

JOSEPHSON JUNCTIONS
A pipelined superconducting digital processor
[DE93-040852] p 1898 N94-19886

JP-8 JET FUEL
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165

JUNCTION TRANSISTORS
A breakdown model for the bipolar transistor to be used with circuit simulators
[DE93-019422] p 1750 N94-20218
A contribution to development and parameter extraction of SPICE compatible macromodels for discrete bipolar transistors
[HMI-B-499] p 1753 N94-21021
Behavior of faulty double BJT BiCMOS logic gates
p 1767 N94-21727

JUPITER (PLANET)
Diffusive redistribution of water vapor in the solar nebula revisited p 2113 N94-20751
On dust emissions from the jovian system
p 2141 N94-20909

K

K-EPSILON TURBULENCE MODEL
Finite element numerical simulation of three dimensional turbulent flows with dispersion: Eulerian and Lagrangian approaches
[ECL-92-42] p 1801 N94-20597

KALMAN FILTERS
Comparison of a distributed Kalman filter versus a centralized Kalman filter with fault detection considerations
[AD-A270713] p 1903 N94-19969
Paired comparison models with time-varying parameters
[AD-A272016] p 1964 N94-21442
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457

KAPOETA ACHONDRITE
SCR neon and argon in Kapoeta feldspar: Evidence for an active ancient Sun p 2106 N94-20712

KAPTON (TRADEMARK)
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574

KELVIN-HELMHOLTZ INSTABILITY
Shear flow generation by Reynolds stress and suppression of resistive g-modes
[DE93-040911] p 1995 N94-21514
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar
p 1874 N94-22310
Implications of Viking dayside auroral measurements
[ISBN-0-315-83273-8] p 1861 N94-22575
Tangential stress due to Kelvin-Helmholtz instability at the magnetospheric boundary p 2003 N94-22651
Three-dimensional simulations of cosmic jets employing the smoothed particle hydrodynamics technique
p 2008 N94-22685

KEROSENE
Compatibility and efficacy of biocides qualified under military specification MIL-S-53021
[AD-A271496] p 1712 N94-20551
Chemical reaction fouling model for single-phase heat transfer
[DE93-019556] p 1802 N94-20942

KETONES
Catalytic hydrogenation of carbon monoxide
[DE94-000681] p 1678 N94-20103

KEVLAR (TRADEMARK)
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940
An embedded fibre optic for damage growth monitoring in Kevlar composites
[ISBN-0-315-83501-X] p 1677 N94-22589

KINEMATIC EQUATIONS
Dynamic analyses of flexible robotic manipulators
[ISBN-0-315-59251-6] p 1827 N94-22421

KINEMATICS
Development and testing of a reliability performance index for modular robotic systems
[AD-A271901] p 1942 N94-20488
Smoothed-particle hydrodynamics and nonequilibrium molecular dynamics
[DE94-001059] p 1977 N94-22400
Vector gravimetry by a combination of inertial and GPS satellite measurements
[ISBN-0-315-61980-5] p 1861 N94-22424
A robust quality control system for GPS navigation and kinematic positioning
[ISBN-0-315-83148-0] p 1644 N94-22427

KINETIC ENERGY
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface
p 2082 N94-20647
Micrometeorite dynamic pyrometamorphism: Nonstoichiometric clinoenstatite (CLEN)
p 2083 N94-20715
Magnetically controlled solar nebula
p 2120 N94-20791
Computer simulation of molecular response at a shock front
[DE94-001050] p 1977 N94-22396

KINETIC EQUATIONS
Neoclassical kinetic theory near an X-point: Plateau regime
[DE93-019825] p 1951 N94-20224
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937
A two-dimensional kinetic model of the scrape-off layer
[DE94-001235] p 1999 N94-22562

KINETIC THEORY
Neoclassical kinetic theory near an X-point: Plateau regime
[DE93-019825] p 1951 N94-20224
Kinetic theory of runaway air-breakdown
[DE93-040731] p 1750 N94-20325
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937

KINETICS
Kinetics of phase transformations in glass forming systems
[NASA-CR-194270] p 1701 N94-20347

KINOFORM
Phase screens for the control of the focal irradiance of the Nova laser
[DE94-001067] p 1820 N94-22401

KIRCHHOFF LAW OF RADIATION
Thermal infrared remote sensing and Kirchhoff's law: 1. Laboratory measurements p 1685 N94-20733

KLYSTRONS
An 85 GHz quasioptical gyroklystron experiment
[AD-A272020] p 1752 N94-20931
Simulation of traveling-wave output structures for high power RF tubes
[DE93-041005] p 1763 N94-21685

KNEE (ANATOMY)
Automatic locking orthotic knee device
[NASA-CASE-MFS-28633-1] p 1896 N94-20493

KNOWLEDGE BASED SYSTEMS
Building brains for bodies
[AD-A270531] p 1939 N94-19875
An expert system shell for inferring vegetation characteristics
[NASA-CR-189318] p 1837 N94-20284
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session)
[AD-A272125] p 1942 N94-20573
The Milling assistant, case-based Reasoning, and machining strategy: A report on the development of automated numerical control programming systems at New Mexico State University
[DE93-041101] p 2029 N94-21690
Model-based reasoning for power system management using KATE and the SSM/PMAD
[NASA-CR-194716] p 1671 N94-21882

KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)
Advanced software development workstation: Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
[NASA-CR-193643] p 1930 N94-21065
Computing with Bayesian multi-networks
[AD-A273106] p 1914 N94-21501

KNOWLEDGE REPRESENTATION
Building brains for bodies
[AD-A270531] p 1939 N94-19875
A computational theory of lexical relatedness
[TR-421] p 1904 N94-20067
Causal reconstruction
[AD-A271692] p 1908 N94-20929
Design of a computer assisted tool for object oriented acquisition, modeling and simulation of knowledge structure
[ETN-93-94183] p 1910 N94-21152
Experiments in knowledge refinement for a large rule-based system
[AD-A272055] p 1809 N94-21445
Reasoning about update logic
[CWI-CS-R9312] p 1914 N94-21496
Computing with Bayesian multi-networks
[AD-A273106] p 1914 N94-21501
Changing preferences
[CWI-CS-R9310] p 1915 N94-21551

KNUDSEN FLOW
Shock induced condensation in fluids of high molar specific heat: Shock structure and relaxation
[MPIS-106/1993] p 1798 N94-20145

KOLMOGOROV THEORY
Mathematical theory of thermodynamics of computation
[CWI-CS-R9251] p 2038 N94-21533

KONDO EFFECT
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275

Temperature dependence of 4f PES features and hole occupancy in ytterbium heavy fermions
[DE93-040131] p 1691 N94-20321
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335
Thermal expansion of electronic highly correlated materials
[ETN-93-93605] p 2026 N94-21135
Photoemission and the electronic properties of heavy fermions: Limitations of the Kondo model
[DE93-040191] p 1974 N94-21553
Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21762
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584

KOVAR (TRADEMARK)
Segregation of Si to the surface of Fe-29Ni-17Co alloy
[DE93-040053] p 1687 N94-19864

KREEP
The Mg-suite and the highland crust: An unsolved enigma p 2126 N94-20822

KRYPTON FLUORIDE LASERS
Laser amplifier developments at Mercury
[DE93-040103] p 1814 N94-19867

L

LABORATORY EQUIPMENT
The National High Magnetic Field Laboratory, a user facility in support of research in high magnetic fields
[DE93-040145] p 1714 N94-20278
Advanced failure analysis laboratory equipment networking
[DE93-019070] p 1916 N94-21633

LABYRINTH SEALS
Navy GTE seal development activity p 1655 N94-21794
Compliant seal development p 1655 N94-21795

LAGRANGE MULTIPLIERS
Shape optimization governed by the Euler equations using an adjoint method
[NASA-CR-191555] p 1950 N94-20092

LAGRANGIAN FUNCTION
Effect of limiter end loss in finite Larmor radius theory
[DE93-040913] p 1992 N94-19887
Coupling of smooth particle hydrodynamics with PRONTO
[DE93-019080] p 1915 N94-21539
RHALE: A 3-D MMALE code for unstructured grids
[DE93-019405] p 1916 N94-21635
Microscopic and macroscopic dynamics
[DE93-019576] p 1937 N94-22042
Coupling of smooth particle hydrodynamics with the finite element method
[DE93-019081] p 1805 N94-22556

LAKES
Chromaticity analysis of LANDSAT multispectral scanner and thematic mapper imagery of Chilko Lake, British Columbia, using a theoretical optical water quality model
[ISBN-0-315-63832-X] p 1843 N94-22422

LAMBERT SURFACE
Goniospectrometric properties of a white standard p 1684 N94-20664
New algorithm for the detection of the orientation of a planar Lambertian surface in 3D p 1777 N94-22150

LAMINAR FLOW
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111
Surface hot film measurements at ATTAS laminar glove p 1639 N94-22596
Recent ONERA contributions to the development of flight test measurement techniques p 1641 N94-22607

LAMINAR FLOW AIRFOILS
Measurement Technology for Flight Tests
[ILR-MITT-256(1991)] p 1639 N94-22597
Surface hot film measurements at ATTAS laminar glove p 1639 N94-22598
Testing of a multisensor hot film technique in wind tunnel and free flight p 1639 N94-22599
Free flight experiment with a laminar wing glove p 1639 N94-22600
Experiments with a fluid deicing system for cleaning laminar wings p 1640 N94-22601

LAMINATES
Quantification of uncertainties in the performance of smart composite structures
[NASA-TM-106335] p 1830 N94-20171
Structural similitude and design of scaled down laminated models
[NASA-CR-194687] p 1673 N94-20172
Layered thin-edged field-emitter device
[AD-D015932] p 1751 N94-20350
The effects of processing and constituent materials on compressive strength of thick composite laminates
[AD-A271912] p 1673 N94-20490
Intercalated hybrid graphite fiber composite
[NASA-CASE-LEW-15241-1] p 1673 N94-20539
Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry p 1796 N94-20985
A new matrix formulation of classical electrodynamics. Part 3: Wave propagation through a multilayer dielectric medium with planar boundaries
[AD-A271610] p 1739 N94-21240
Approximation to sound radiation and scattering by simply supported layered cylinder
[AD-A272964] p 1967 N94-21306
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504
Materials Science and Engineering
[DE93-040497] p 1675 N94-21530
Modeling of failure and response to laminated composites subjected to in-plane loads p 1834 N94-22612
Delamination, durability, and damage tolerance of laminated composite materials p 1678 N94-22622

LAND ICE
The distribution of ground ice on Mars p 2090 N94-20394

LAND USE
Application of SPOT to GIS/LIS in land capability evaluation for regional planning of JAICO semi-arid region of Piaui, Brazil p 1838 N94-20955
The 7th Brazilian Remote Sensing Symposium, volume 2 p 1838 N94-20956
Change detection on land use and rainforest cover at Paragominas region, Brazilian Amazon p 1838 N94-20957
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
Urban applications of satellite remote sensing and GIS analysis
[PB93-202174] p 1842 N94-21855

LANDAU DAMPING
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-001234] p 1998 N94-22561

LANDAU FACTOR
On the nonlinear instability of thermal structures p 2006 N94-22668

LANDAU-GINZBURG EQUATIONS
Dynamics of vortices in superconductors
[DE93-019535] p 2011 N94-19808

LANDFORMS
The distribution of ground ice on Mars p 2090 N94-20394
The thumbprint terrain: What will Mars Observer tell us? p 2091 N94-20397
Local topography of Mars and its relationship to surface weathering processes p 2111 N94-20737
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662

LANDING GEAR
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 1658 N94-20590

LANDING LOADS
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 1658 N94-20590

LANDING SITES
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
Notes on Antarctic aviation
[AD-A273018] p 1651 N94-21239

LANDSAT SATELLITES
The development of remote sensing in Brazil and Canada: Comparative case studies p 1840 N94-20968
Comparison of radiation and cloud parameters derived from satellite and aircraft measurements during FIRE 2 cirrus IFO p 1872 N94-22299

LANGEVIN FORMULA
Stochastic differential equations and numerical simulation for pedestrians
[DE93-040651] p 1949 N94-20006

LANGUAGES
Beta(sub k)-complete problems and greediness
[TR-455] p 1913 N94-21318
Language as primary dimension of distributed AI systems activity p 1776 N94-22141

LANTHANUM ALLOYS
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416

LANTHANUM ISOTOPES
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007

LANTHANUM OXIDES
Local structure and superconductivity in La(2-x)Ba(x)CuO4 for x=0.125 and x=0.15
[DE93-040193] p 2029 N94-21555
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO2
[DE93-040229] p 2033 N94-21993
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007

LAPLACE TRANSFORMATION
Time-laplace-transform-domain analysis of wave propagation in planar waveguides
[PB93-215226] p 1960 N94-22096
Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised)
[PB93-215432] p 1969 N94-22262
Continuous-time discretized-space approach to modeling short-pulse propagation and scattering
[PB93-215259] p 1742 N94-22347

LAPSE RATE
Windshear detection for aircraft using temperature lapse rate
[CA-PATENT-1,295,736] p 1641 N94-21030

LARGE SCALE INTEGRATION
Self assembly: An approach to terascale integration
[DE93-040104] p 1769 N94-21846
The distributed CAD system for LSI/VLSI design p 1923 N94-22068

LARGE SPACE STRUCTURES
An expert system executive for automated assembly of large space truss structures
[NASA-TM-4487] p 1939 N94-20089
Phase demodulation of interferometric fiber-optic sensors
[ISBN-0-315-83425-0] p 1991 N94-22581
System identification of the Daisy large space structure emulator
[ISBN-0-315-83533-8] p 1653 N94-22588

LARMOR RADIUS
Finite Larmor radius flute mode theory with end loss
[DE93-040914] p 1991 N94-19872
Effect of limiter end loss in finite Larmor radius theory
[DE93-040913] p 1992 N94-19887

LASER ABLATION
Particles on surfaces of laser ablated Y1Ba2Cu3O(7-delta) films
[DE93-040269] p 2013 N94-19929
Charge collectors for the omega upgrade
[DE93-019684] p 1972 N94-20264
Stability analysis of unsteady ablation fronts
[DE93-019689] p 1819 N94-21839

LASER ANEMOMETERS
Utilization of lasers for air data measurements p 1640 N94-22603

LASER APPLICATIONS
Laser amplifier developments at Mercury
[DE93-040103] p 1814 N94-19867
Initiation and modification of reaction by energy addition: Kinetic and transport phenomena
[AD-A271315] p 1797 N94-19936
PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943
Photoconductive Semiconductor Switches for pulsed power applications
[DE93-019411] p 1750 N94-20294
Coherent lidar design and performance verification
[NASA-CR-193813] p 1816 N94-20341
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943
Obtaining surface optical properties from space-based lidar systems
[AD-A272831] p 1987 N94-21172
Non-destructive semiconductor wafer probing system using laser pulses to generate and detect millimeter-wave signals
[CA-PATENT-APPL-SN-2,020,73] p 1760 N94-21178
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
Compact lightweight CO2 laser for SDIO application
[AD-A273010] p 1817 N94-21264
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505
Laser driven hydrodynamic instability experiments
[DE93-040550] p 1818 N94-21547
Surface and subsurface defect detection in Si3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772

The laser and its applications on environment and biotechnology research
[DE94-000376] p 1820 N94-21957
Surface acquisition through virtual milling p 1920 N94-22372

LASER ARRAYS
Statistical fluctuations in lasers
[DE94-000710] p 1817 N94-20939

LASER BEAMS
The NRL LACE program
[AD-A270861] p 1657 N94-19896
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
Laser propagation in underdense plasmas: Scaling arguments
[DE93-040439] p 1816 N94-20480
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Statistical fluctuations in lasers
[DE94-000710] p 1817 N94-20939
Thermal diffusivity measurements by photothermal laser beam deflection (PTD): Data analysis using the Levenberg-Marquardt algorithm p 1820 N94-21006
Thermal characterization of thin films by photothermally induced laser beam deflection p 1710 N94-21007
Micro-ellipsometric measurements of strained layer structures p 2025 N94-21008
Effects of stimulated Raman scattering on light beam properties during high-power laser beam long-path propagation
[AD-A273109] p 1818 N94-21509
Plasma lens experiments at the Final Focus Test Beam
[DE93-041081] p 1981 N94-21688
Surface and subsurface defect detection in Si3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772
Ionization of H2(+) in intense laser fields
[DE93-019160] p 1818 N94-21829
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG)
[DE93-040546] p 1709 N94-21970
Phase screens for the control of the focal irradiance of the Nova laser
[DE94-001067] p 1820 N94-22401

LASER CAVITIES
Initial performance of Los Alamos advanced free electron laser
[DE93-040158] p 1814 N94-19828
Tunable laser frequency stabilizing system
[AD-D015904] p 1815 N94-20055
Compact lightweight CO2 laser for SDIO application
[AD-A273010] p 1817 N94-21284
The n-p(p(+))-n Al(yGa)(1-y) As-GaAs-In(x)Ga(1-x) as quantum well laser with p(+)-n(+)GaAs-InGaAs tunnel contact on n GaAs
[AD-A271292] p 2030 N94-21805

LASER DAMAGE
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462

LASER DOPPLER VELOCIMETERS
Fluid dynamic mechanisms and interactions within separated flows
[AD-A271037] p 1797 N94-19978
An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight
[AD-A270201] p 1636 N94-20486
Two-point laser Doppler velocimetry measurements of length-turbulent scales
[ECL-92-12] p 1801 N94-20542
Analysis and design of weight balancing system for laser velocimetry traverse
[AD-A271171] p 1816 N94-20546
Low-altitude cross-wind velocity measurements using pulsed visible fringe-type laser anemometry
[ISL-CO-216/92] p 1866 N94-20557
Measurement and prediction of the flow through an annular turbine cascade
[AD-A272530] p 1803 N94-21417

LASER GUIDANCE
Laser guide star adaptive optics: Present and future
[DE93-018642] p 1989 N94-21619

LASER INDUCED FLUORESCENCE
Experimental study of a shock accelerated thin gas layer
[DE93-018354] p 1799 N94-20286
Laser diagnostics of RF hydrogen plasma reactors: Application to the processing of III-V materials
[AD-A272659] p 1994 N94-21214
Instantaneous velocity field imaging instrument for supersonic reacting flows
[NASA-CR-191162] p 1809 N94-21607

LASER MATERIALS
Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262

LASER MODE LOCKING
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580

LASER OUTPUTS
Suppression of relaxation oscillations in flashpumped, two-micron tunable solid state lasers
[AD-D015928] p 1814 N94-19800
Initial performance of Los Alamos advanced free electron laser
[DE93-040158] p 1814 N94-19828
Tunable laser frequency stabilizing system
[AD-D015904] p 1815 N94-20055
Resonantly pumped, erbium-doped, GSGG, 2.8 micron, solid state laser with energy recycling and high slope efficiency
[AD-D015920] p 1815 N94-20060
Compact lightweight CO2 laser for SDIO application
[AD-A273010] p 1817 N94-21284
Conversion of the proprietary ROLM (tm) inter-node link from multimode to singlemode operation p 1744 N94-21349
Simulations of spectral broadening by cross-phase modulation (XPM) with chaotic light pulses
[DE93-019623] p 1819 N94-21872
Shattering the myth of the resonantly photo-pumped neon-like titanium laser
[DE93-019624] p 1819 N94-21873
Effect of bandwidth on beam smoothing and frequency conversion at the third harmonic of the Nova laser
[DE93-019917] p 1819 N94-21920
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958

LASER PLASMA INTERACTIONS
Laser propagation in underdense plasmas: Scaling arguments
[DE93-040439] p 1816 N94-20480
Spectral characterization of lithographic sources
[DE93-019941] p 1997 N94-21848

LASER PLASMAS
Charge collectors for the omega upgrade
[DE93-019684] p 1972 N94-20264
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943

LASER POWER BEAMING
Power transmission by laser beam from lunar-synchronous satellite
[NASA-TM-4496] p 1669 N94-20102
Method for remotely powering a device such as a lunar rover
[NASA-CASE-LAR-14789-1] p 1824 N94-20587

LASER PUMPING
Suppression of relaxation oscillations in flashpumped, two-micron tunable solid state lasers
[AD-D015928] p 1814 N94-19800
Resonantly pumped, erbium-doped, GSGG, 2.8 micron, solid state laser with energy recycling and high slope efficiency
[AD-D015920] p 1815 N94-20060

LASER RANGE FINDERS
Development of a lidar for integration with the Naval Postgraduate School Infrared Search and Target Designation (NPS-IRSTD) system
[AD-A271847] p 1817 N94-20611
Determining the 3-D structure and motion of objects using a scanning laser range sensor
[NASA-CR-194745] p 1818 N94-21817
Two-dimensional perception based on a laser rangefinder p 1786 N94-22202

LASER SPECTROSCOPY
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Laser Raman and x ray scattering studies of corrosion films on metals
[DE93-040243] p 1692 N94-21558

LASER STABILITY
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958

LASER TARGET DESIGNATORS
Long-range laser imaging
[AD-A273020] p 1817 N94-21253

LASER TARGET INTERACTIONS
Stability analysis of unsteady ablation fronts
[DE93-019689] p 1819 N94-21839

LASER TARGETS
Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
Stability analysis of unsteady ablation fronts
[DE93-019689] p 1819 N94-21839
Shattering the myth of the resonantly photo-pumped neon-like titanium laser
[DE93-019624] p 1819 N94-21873

LASER WEAPONS
Tactical laser weapons and other directed-energy weapons
[AD-A267961] p 1816 N94-20484

LASERS
Diagnostics and methods for real-time laser microchemistry
[AD-A270871] p 1680 N94-20566

LASING
Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298
Generation of intense ultrashort x ray pulses
[DE93-019607] p 1817 N94-21299
Shattering the myth of the resonantly photo-pumped neon-like titanium laser
[DE93-019624] p 1819 N94-21873

LATCH-UP
Test results for SEU and SEL immune memory circuits p 1754 N94-21087
Proton radiation testing of an 18 bit A/D converter p 1755 N94-21096
Single event phenomena: Testing and prediction p 1763 N94-21696

LATE STARS
The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446

LATENT HEAT
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study p 1879 N94-22335

LATITUDE
Radiometry in commercial aircraft
[GSF-41/91] p 1892 N94-21141

LATTICE PARAMETERS
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926
Fundamentals of mechanical behavior in structural intermetallics: A synthesis of atomistic and continuum modeling
[DE93-019166] p 1690 N94-20232
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275
Lattice gauge theory: Present status
[DE93-041154] p 2038 N94-21692

LATTICE VIBRATIONS
Inelastic neutron scattering of (gamma)-iron, and the determination of the elastic constants by lattice dynamics
[DE94-000694] p 1978 N94-22573

LATTICES (MATHEMATICS)
Lattice gauge theory: Present status
[DE93-041154] p 2038 N94-21692

LAUNCH VEHICLES
Total systems design analysis of high performance structures
[NASA-TP-3432] p 1653 N94-20141
Japanese space program p 1652 N94-21407
Options for thrust augmentation for the Beta 2 two-stage-to-orbit launch vehicle
[NASA-TM-106418] p 1649 N94-21759
Specialized data analysis for the Space Shuttle Main Engine and diagnostic evaluation of advanced propulsion system components
[NASA-CR-194720] p 1656 N94-21813
Spaceplane flight simulation: Project definition
[PB93-211399] p 1651 N94-22094

LAVA
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690
Parabolic features and the erosion rate on Venus p 2122 N94-20801
Tumuli and tubes: Teaching scientific techniques p 2039 N94-20818
Formation of perched lava ponds on basaltic volcanoes: Interaction between cooling rate and flow geometry allows estimation of lava effusion rates p 1863 N94-20878
A classification scheme for the morphology of lava flow fields p 1863 N94-20879
Numerical simulation of lava flows: Applications to the terrestrial planets p 1863 N94-20904

LAYOUTS
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943
A unified approach to VLSI layout automation and algorithm mapping on processor arrays p 1759 N94-21127
Layout optimization with algebraic multigrid methods p 1957 N94-21474
Schematic driven layout of Reed Solomon encoders p 1766 N94-21722

LEACHING
Elemental depletions in Antarctic micrometeorites and Arctic cosmic spherules: Comparison and relationships p 2082 N94-20704

LEAD (METAL)
The proximity effect in ultrathin granular Pb films
[AD-A271094] p 2012 N94-19848
Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176

LEAD ACID BATTERIES
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885

LEAD COMPOUNDS
Preparation and properties of sol-gel derived PZT thin films for decoupling capacitor applications
[DE93-018853] p 2013 N94-19961
MOCVD growth and structure of PbTiO3 thin films
[DE93-040230] p 2033 N94-21994

LEAD ISOTOPES
U-Pb isotopic ages and characteristics of ancient (greater than 4.0 Ga) lunar highland rocks p 2104 N94-20700
U-Pb provenance ages of shocked zircons from the K-T boundary, Raton Basin, Colorado p 1685 N94-20701
U-Pb isotopic systematics of ferroan anorthosite 60025 p 1685 N94-20702

LEAD TITANATES
The multicomponent lineshape of the anharmonic A(1)(TO) phonon in PbTiO3
[DE93-018995] p 1970 N94-19971

LEAD ZIRCONATE TITANATES
A novel method for characterizing the electrical Priorities of lead Zirconate Titanate (PZT) ferroelectric films and memory devices
[AD-A270463] p 2013 N94-19966
Long range fast tool servo
[AD-A271614] p 1761 N94-21257
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416

LEADING EDGES
Compilation of reinforced carbon-carbon transatlantic abort landing arc jet test results
[NASA-TM-104778] p 1676 N94-21834

LEAKAGE
Brush seal bristle flexure and hard-rub characteristics p 1654 N94-21791
Compliant seal development p 1655 N94-21795

LEARNING
High dimension action spaces in robot skill learning
[TR-458] p 1945 N94-21317

LEARNING THEORY
The effects of instructional sets on reactions to and performance on an intelligent tutoring system
[NASA-CR-194739] p 1895 N94-21810

LEAST SQUARES METHOD
Literature review of the errors-in-variables approach to the problem of system identification
[AD-A271098] p 1949 N94-19907
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049
Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570
Predicting LANDSAT MSS endmember signatures from corresponding higher resolution TM fraction images p 1839 N94-20962
Development of a gridless CFD method p 1919 N94-22361
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458
Interactive Spectral Analysis and Computation (ISAAC) p 1926 N94-22505

LEGAL LIABILITY
A guide to resolving disputes over contractor delay entitlements
[AD-A272022] p 2039 N94-21444

LENNARD-JONES POTENTIAL
A database of selected transport coefficients for combustion studies
[DE93-041278] p 1678 N94-19689

LENSES
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462
Plasma lens experiments at the Final Focus Test Beam
[DE93-041081] p 1981 N94-21688

LEPTONS
Top search at the TEVATRON
[DE93-019392] p 1978 N94-19988
Recent results on top, bottom and exotic physics at the Tevatron
[DE94-000578] p 1975 N94-21786
The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV
[DE93-019903] p 1976 N94-21847
Production, collection and utilization of very long-lived heavy charged leptons
[DE93-040867] p 1977 N94-22009

LESIONS
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462
Area postrema ablations in cats: Evidence for separate neural routes for motion- and xylazine-induced CTA and emesis p 1887 N94-21906

LETHALITY
Current directions in the vulnerability/lethality process structure
[AD-A272836] p 1964 N94-21175

LEWIS BASE
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Volatile CVD precursors based on copper alkoxides and mixed group 2A-copper alkoxides
[AD-D015930] p 1701 N94-20349

LIBRARIES
Research in image management and access
[NASA-CR-194797] p 1907 N94-20376
Experiments on technology mapping using different cell libraries p 1758 N94-21118
The three-dimensional Event-Driven Graphics Environment (3D-EDGE) p 1922 N94-21342
Assessment of the organizational structure and services of DOE National Laboratory Libraries
[DE93-040697] p 2045 N94-21750

LIE GROUPS
Explicit results on gl(lambda) and sl(lambda)
[MEMO-1075] p 1953 N94-21072

LIFE (DURABILITY)
Measurement of the B(+) and B(0) lifetimes
[DE93-019906] p 1969 N94-19814
Computational Methods for Failure Analysis and Life Prediction
[NASA-CP-3230] p 1833 N94-22608
Nonlinear and progressive failure aspects of transport composite fuselage damage tolerance p 1834 N94-22609
NASA Langley developments in response calculations needed for failure and life prediction p 1836 N94-22621

LIFE CYCLE COSTS
The automated ground network system p 1932 N94-21330

LIFE SCIENCES
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 383)
[NASA-SP-7011(383)] p 1892 N94-21288

LIFE SUPPORT SYSTEMS
Quinoa: An emerging new crop with potential for CELSS
[NASA-TP-3422] p 1895 N94-20137
Characterization of Minnesota lunar simulant for plant growth p 1897 N94-20665
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 383)
[NASA-SP-7011(383)] p 1892 N94-21288

LIFT
Nonlinear aerodynamics and the design of wing tips
[NASA-CR-194732] p 1638 N94-21833

LIFT DRAG RATIO
Optimization and performance analysis of a supersonic conical-flow waverider for a deck-launched intercept mission
[AD-A272498] p 1648 N94-21433

LIFT FANS
Survey of lift-fan aerodynamic technology
[NASA-CR-177615] p 1646 N94-21592

LIFTING BODIES
Users manual for the NASA Lewis three-dimensional ice accretion code (LEWICE 3D)
[NASA-TM-105974] p 1642 N94-21590

LIGANDS
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Catalytic hydrogenation of carbon monoxide
[DE94-000881] p 1678 N94-20103
Low temperature absorption spectra and ground state electronic structure of tetrakis(2,6-di-tert-butylphenoxide)uranium(IV)
[DE94-000774] p 2035 N94-22367

LIGHT (VISIBLE RADIATION)
Optical and Gamma Ray Space Observations
[NASA-TM-109389] p 2149 N94-20602
Simultaneous optical/gamma ray observations of GRB's p 2149 N94-20603

LIGHT AMPLIFIERS
Laser amplifier developments at Mercury
[DE93-040103] p 1814 N94-19867
Compact lightweight CO2 laser for SDIO application
[AD-A273010] p 1817 N94-21284

LIGHT BEAMS
Rotary encoding device using polygonal mirror with diffraction gratings on each facet
[NASA-CASE-GSC-13543-1] p 1985 N94-20240
Study of possible energy upgrade for the ALS and modeling of the real lattice for the diagnosis of lattice problems
[DE93-040286] p 2016 N94-20323
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358
Optical beam forming techniques for phased array antennas p 1727 N94-20442
Effects of stimulated Raman scattering on light beam properties during high-power laser beam long-path propagation
[AD-A273109] p 1818 N94-21509
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958

LIGHT ELEMENTS
Cometary interplanetary dust particles? An update on carbon in anhydrous IDPS p 2084 N94-20828
Asbestos characterization using scanning electron microscopy/light element x ray spectrometry
[AD-A271611] p 1681 N94-21241

LIGHT EMISSION
Collisional processes involving atmospheric gases
[AD-A270729] p 1854 N94-19954
Radio and optical emission: Spectral shapes and breaks in GRB
[NASA-CR-194763] p 2150 N94-21781

LIGHT GAS GUNS
Intact capture of hypervelocity particles on Shuttle p 2085 N94-20837
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546

LIGHT IONS
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297

LIGHT MODULATION
Optoelectronic associative memory
[NASA-CASE-NPO-18278-1-CU] p 1985 N94-20303
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358
Optical beam forming techniques for phased array antennas p 1727 N94-20442
Center for the integration of optical computing
[AD-A271874] p 1899 N94-20469
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Polarized-light reflection mode p-i-n modulators with GaAs/AlGaAs multiple quantum well active layers: Design and simulation p 2023 N94-20996
Simulations of spectral broadening by cross-phase modulation (XPM) with chaotic light pulses
[DE93-019623] p 1819 N94-21872
Effect of bandwidth on beam smoothing and frequency conversion at the third harmonic of the Nova laser
[DE93-019917] p 1819 N94-21920

LIGHT SCATTERING
Study of electromagnetic wave scattering from characterized rough surfaces
[AD-A270931] p 1716 N94-19934
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows
[AD-A271160] p 1678 N94-20000

Light scattering studies of an electrorheological fluid
[DE93-019419] p 1700 N94-20315
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles
p 1721 N94-20416
Obtaining surface optical properties from space-based lidar systems
[AD-A272831] p 1987 N94-21172
Documentation for PCDIST, a FORTRAN subroutine to calculate Pollack-Cuzzi scattering
[AD-A273070] p 1988 N94-21491
Surface and subsurface defect detection in SI3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772

LIGHT SOURCES
Robust photo-topography by fusing shape-from-shading and stereo
[NASA-CR-194697] p 1806 N94-19920
ALE project
[AD-A271080] p 2014 N94-19980
Study of transverse coupled bunch instabilities by using non-linear Taylor maps for the Advanced Light Source (ALS)
[DE93-040287] p 1979 N94-19989
Emittance measurement and modeling of the ALS 50 MeV LINAC to booster line
[DE93-040116] p 1979 N94-20273
Measurement and computation of the higher order modes of the ALS 500 MHz accelerating cavities
[DE93-019256] p 1980 N94-20292
Study of possible energy upgrade for the ALS and modeling of the real lattice for the diagnosis of lattice problems
[DE93-040286] p 2016 N94-20323
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358
Survey and alignment analysis for the ALS storage ring using computer spreadsheets
[DE93-019254] p 1917 N94-21917

LIGHT TRANSMISSION
Photonic electromagnetic field sensor apparatus
[AD-D015939] p 1718 N94-20334
Optical and transport properties of metallic and semiconductor nanostructures
[AD-A271716] p 2018 N94-20554
X ray reflection masks: Manufacturing, characterization and first tests
[BONN-IR-92-31] p 1986 N94-21043
Photonics and nonlinear optics with molecular materials and polymers
[AD-A271747] p 1988 N94-21457
Effects of stimulated Raman scattering on light beam properties during high-power laser beam long-path propagation
[AD-A273109] p 1818 N94-21509
OTDR strain gauge for smart skins
[DE93-041043] p 1810 N94-21953

LIGHT VALVES
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1651 N94-20108

LIGHTHILL GAS MODEL
Computation of the sound generated by isotropic turbulence
[NASA-CR-191543] p 1804 N94-21880

LIGHTNING
Predicting lightning events in the KSC area: A feasibility study using single station data
[AD-A271440] p 1864 N94-20088

LIKELIHOOD RATIO
Stochastic optimization by simulation: Convergence proofs for the G1/G/1 queue in steady-state
[AD-A271141] p 1962 N94-19999
Asymptotics of the GLRT for the disorder problem in diffusion processes
[INRIA-RR-1735] p 1951 N94-20227

LIMB DARKENING
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging
p 2101 N94-20685

LIMITERS (FUSION REACTORS)
A two-dimensional kinetic model of the scrape-off layer
[DE94-001235] p 1999 N94-22562

LINE OF SIGHT
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951
A new procedure for orbit determination based on three lines of sight: Angles only
[AD-A272937] p 1652 N94-21224

LINE SHAPE
Photoemission and the electronic properties of heavy fermions: Limitations of the Kondo model
[DE93-040191] p 1974 N94-21553

LINE SPECTRA
Interactive Spectral Analysis and Computation (ISAAC)
p 1926 N94-22505
Adaptive filtering of Echelle spectra of distant Quasars
p 2072 N94-22520
Factor analysis as a tool for spectral line component separation 21cm emission in the direction of L1780
p 1965 N94-22536

LINEAR ACCELERATORS
Method to evaluate steering and alignment algorithms for controlling emittance growth
[DE93-041004] p 1978 N94-19856
Emittance measurement and modeling of the ALS 50 MeV LINAC to booster line
[DE93-040116] p 1979 N94-20273
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos
[DE93-040141] p 1816 N94-20277
Longitudinal instability of an induction linac with acceleration
[DE93-019249] p 1980 N94-20290
Low emittance 0.8A K(+) ion source for the LBL Induction Linac System Experiment (ILSE)
[DE93-019237] p 1981 N94-21439
Demonstration of ultraviolet lasing with a low energy electron beam
[DE93-040192] p 1818 N94-21554
A high-intensity He-jet production source for radioactive beams
[DE93-040247] p 1981 N94-21767
The preservation of low emittance flat beams
[DE93-040964] p 1981 N94-21773
A FET-switched induction accelerator cell
[DE93-019604] p 1769 N94-21838

LINEAR AMPLIFIERS
Quantum noise studies with superconducting tunnel junction mixers
[AD-A270897] p 2012 N94-19897

LINEAR ARRAYS
Rotary encoding device using polygonal mirror with diffraction gratings on each facet
[NASA-CASE-GSC-13543-1] p 1985 N94-20240
Probe compensation in cylindrical near-field scanning: A novel simulation methodology p 1718 N94-20404
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method
p 1718 N94-20405
Optimal sorting in linear arrays with minimum global control
[CWI-CS-R9244] p 1908 N94-21024

LINEAR CIRCUITS
Using crosscorrelation techniques to determine the impulse response of linear systems
p 1759 N94-21122

LINEAR EQUATIONS
On the numerical stability of quasi-definite systems
[DE93-019404] p 1950 N94-20217
Classical and generalized solutions of time-dependent linear differential algebraic equations
[AD-A272834] p 1954 N94-21173
Finite difference methods for time-dependent, linear differential algebraic equations
[AD-A272835] p 1954 N94-21174
A retrieval error analysis technique for passive infrared atmospheric sounders
[AD-A272618] p 1867 N94-21212
Derivation of a model of the exciter of a brushless synchronous machine
[EUT-92-E-258] p 1761 N94-21538
Universality in blow-up for non linear heat equations
[PB93-215465] p 2038 N94-22095

LINEAR FILTERS
A comparative robustness evaluation of feedforward neurofilters
[NASA-TM-106440] p 1650 N94-21742
Imaging vector fields using line integral convolution
[DE93-019922] p 1917 N94-21841
An adaptive method for group delay compensation using switched capacitor filters p 1793 N94-22248

LINEAR OPERATORS
Parameter estimation with cost function of second order in output-error-problem
[DLR-FB-92-38] p 1964 N94-21139

LINEAR POLARIZATION
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles
p 1721 N94-20416
The Brewster angle effect in SAR polarimetry
p 1731 N94-20456
The coherent backscattering opposition effect
p 1991 N94-20846
Magellan vertical polarization radar observations
p 1744 N94-20691
SLD results from the study of polarized Z(sup 0) produced at the SLC
[DE93-041020] p 1982 N94-21952

LINEAR PROGRAMMING
Optimal sorting in linear arrays with minimum global control
[CWI-CS-R9244] p 1908 N94-21024
Multigrid approach to solving the long transportation problem on a regular grid in cost space
[AD-A272323] p 1909 N94-21038
Linear programming for standard and nonstandard Markovian control problems. A survey
[PB93-191948] p 1963 N94-21066
A neural network approach to the maximum flow problem p 1783 N94-22183
Algorithmic advances in stochastic programming
[DE94-001160] p 1921 N94-22406

LINEAR QUADRATIC GAUSSIAN CONTROL
Acceleration-augmented LQG control of an active magnetic bearing p 1757 N94-21112
A new eddy current model for magnetic bearing control system design p 1763 N94-21698

LINEAR SYSTEMS
Convex set and linear mixing model
p 1844 N94-20888
Using crosscorrelation techniques to determine the impulse response of linear systems
p 1759 N94-21122
An automatic multigrid method for the solution of sparse linear systems p 1957 N94-21478
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
Using parallel banded linear system solvers in generalized eigenvalue problems
[NASA-CR-191540] p 1915 N94-21584

LINEAR TRANSFORMATIONS
On geometric and algebraic aspects of 3D affine and projective structures from perspective 2D views
[AD-A270520] p 1963 N94-19968

LINEAR VIBRATION
Acoustic radiation damping of flat rectangular plates subjected to subsonic flows
[NASA-TM-109382] p 1967 N94-20211

LINGUISTICS
Connectionism and Natural Language Processing
[MEMO-INF-92-64] p 1940 N94-20242
Representation of idioms in connectionist models
p 1940 N94-20247
Neural data oriented parsing p 1940 N94-20248
Hopfield models as neural-network acceptors
p 1941 N94-20250
Recognizing hesitation phenomena in continuous, spontaneous speech p 1746 N94-22210

LINKAGES
A robust adaptive control design for flexible joint manipulators p 1790 N94-22230
Robot link and contact surface dynamic interaction: An experimental study of contact instability
[ISBN-0-315-83439-0] p 1827 N94-22578

LIOUVILLE THEOREM
On the twisted N=2 superconformal structure in 2d gravity coupled to matter
[DE93-628627] p 2037 N94-20178

LIPIDS
Lateral distribution of lipids in membranes at high pressure
[AD-A271183] p 1700 N94-20299

LIQUEFIED GASES
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19987
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights
[NASA-CR-194709] p 2056 N94-22281
The polarization sensitivity of the liquid xenon imaging telescope p 2056 N94-22282

LIQUID BRIDGES
Stability limits and dynamics of nonaxisymmetric liquid bridges
[NASA-CR-194706] p 1797 N94-20037

LIQUID COOLING
Cold-start minidiesel engine development
[AD-A271064] p 1823 N94-20567
A dc Penning surface-plasma source
[DE93-040126] p 1997 N94-21989

LIQUID CRYSTALS
Complex and stereoregular nonlinear optical materials
[AD-A271067] p 1983 N94-19846
Optically induced rotation diffusion in polymer liquid crystals: Phenomenological theory and experimental verification
[ETN-93-95068] p 2014 N94-20026
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1651 N94-20108

Molecular and atomic arrays in nano- and mesoporous materials synthesis
[AD-A271500] p 2017 N94-20544
Liquid crystal displays p 1752 N94-20634
LCD display tests p 1752 N94-20635
Miniature color display, phase 4
[AD-A272920] p 1760 N94-21221
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
Fluorescent microthermographic imaging
[DE93-040332] p 1810 N94-22000

LIQUID FUELS
Liquid rocket propulsion. Theory p 1667 N94-20069
Cryogenic propellant rocket engine problems p 1668 N94-20076

LIQUID HELIUM
Acoustic microscopy and nonlinear effects in pressurized superfluid helium
[AD-A270598] p 1967 N94-19949
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187

LIQUID OXYGEN
Actively controlled shaft seals for aerospace applications
[NASA-CR-194759] p 1823 N94-20538
Production of O2 on the Moon: A lab-top demonstration of ilmenite reduction with hydrogen p 2126 N94-20821
Detailed study of oxidation/wear mechanism in lox turbopump bearings
[NASA-TM-108434] p 1825 N94-21580

LIQUID PHASE SINTERING
High performance heavy alloys by alloying and process control
[AD-A271129] p 1689 N94-20019

LIQUID PHASES
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187

LIQUID PROPELLANT ROCKET ENGINES
A tutorial on the aero/thermodynamical design of liquid-propellant rocket engine nozzles p 1668 N94-20074
Liquid fuel injection elements for rocket engines
[NASA-CASE-MFS-28547-1] p 1669 N94-20370
Method of fabricating a rocket engine combustion chamber
[NASA-CASE-MFS-28569-1] p 1703 N94-20541
Advanced transportation system studies, technical area 3. Alternate propulsion subsystem concepts: J-2S restart study
[NASA-CR-193874] p 1670 N94-21271
NASA Propulsion Engineering Research Center, volume 1
[NASA-CR-194721-VOL-1] p 1671 N94-22428

LIQUID ROCKET PROPELLANTS
Liquid rocket propulsion. Theory p 1667 N94-20069
Cryogenic propellant rocket engine problems p 1668 N94-20076
The Vulcain cryogenic engine p 1668 N94-20077

LIQUID-SOLID INTERFACES
Surface science at the solid liquid interface
[AD-A271422] p 1678 N94-19839
Surface electrochemistry of metals
[AD-A272913] p 1691 N94-21245

LIQUID-VAPOR INTERFACES
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177
Experimental study of void formation during aluminum solidification in reduced gravity
[NASA-TM-106190] p 1692 N94-21604

LIQUIDS
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Measuring liquid properties with smooth and textured-surface resonators
[DE93-019433] p 1749 N94-20054

LIQUIDUS
Origin of high-Ti lunar ultramafic glasses p 1666 N94-20853

LISP (PROGRAMMING LANGUAGE)
A proposed research program in information processing
[NASA-CR-194271] p 2041 N94-20134

LITHIUM
Transient studies of low temperature catalysts for methane conversion
[DE93-041232] p 1680 N94-20934
Heat transfer additives for absorption cooling system fluids
[PB93-202521] p 1714 N94-21426
Preliminary SP-100/Stirling heat exchanger designs
[NASA-TM-106444] p 1670 N94-21809

LITHIUM OXIDES
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870

LITHIUM SULFUR BATTERIES
Lithium batteries: Future batteries p 1752 N94-20630

LITHOGRAPHY
Uncertainty limited atomic position measurement using optical fields
[AD-A271013] p 1970 N94-19822
Characterization and possible repair of defects in soft x ray projection lithography masks
[DE93-019147] p 1750 N94-20231
The modification of polymer surfaces and the fabrication of submicron-scale functionalized structures by deep-UV and electron beam lithography
[AD-A265956] p 1700 N94-20328
Spectral characterization of lithographic sources
[DE93-019941] p 1997 N94-21848
Center for X-Ray Optics, 1992
[DE94-000726] p 1990 N94-21868

LITHOLOGY
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Opaque-rich lithology in the Divnoe achondrite: Petrology and origin p 2082 N94-20680
Chaunskij: The most highly metamorphosed, shock-modified and metal-rich mesosiderite p 2082 N94-20681
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
Petrography of shock features in the 1953 Manson 2-A drill core p 1862 N94-20767
Distribution and geologic history of materials excavated by the lunar crater Bullialdus p 2128 N94-20832
Equilibrium and fractional crystallization of a primitive Shergottite composition p 2085 N94-20861

LITHOSPHERE
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Venus magmatic and tectonic evolution p 2101 N94-20683
Rifting at Devana Chasma, Venus: Structure and estimation of the effective thickness of the elastic lithosphere p 2113 N94-20754
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
A tectonic resurfacing model for Venus p 2118 N94-20781
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
Large floor-fractured craters and isostatic crater modification: Implications for lithospheric thickness on Venus p 2135 N94-20873

LOAD TESTS
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577

LOADS (FORCES)
Automatic locking orthotic knee device
[NASA-CASE-MFS-28633-1] p 1896 N94-20493
Loads produced by a suited subject performing tool tasks without the use of foot restraints
[NASA-TP-3424] p 1896 N94-20606
Possible flexural signatures around Olympus and Ascraeus Montes, Mars p 2142 N94-20911
Maximum team lifting capacity as a function of team size
[AD-A271642] p 1892 N94-21036
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624
Strength capabilities and load requirements while performing torquing tasks in zero gravity
[NASA-TP-3433] p 1897 N94-21627
Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618

LOCAL AREA NETWORKS
A distributed reinforcement learning scheme for network routing
[AD-A270600] p 1938 N94-19845
Understanding Open Systems Interconnection (OSI)
[AD-A271877] p 1929 N94-20472
Using manufacturing message specification for monitor and control at Venus p 1932 N94-21333
Distributed intelligent control and status networking p 1932 N94-21335
The Test Analysis Retrieval System (TARS): Meeting the challenges of the network's test processes p 1933 N94-21337
Performance evaluation of video on ethernet
[DE93-040696] p 1936 N94-21749
Evaluation of DEC's GIGAswitch for distributed parallel computing
[DE94-001356] p 1936 N94-21853
Application development in a PC/LAN environment p 1923 N94-22067
File transfer performance in LAN interconnection through a satellite channel p 1746 N94-22209

LOCKING
Automatic locking orthotic knee device
[NASA-CASE-MFS-28633-1] p 1896 N94-20493
Self locking set screw
[AD-D015969] p 1824 N94-21277

LOCKS (FASTENERS)
Activities Report of the Institute of Applied Physics
[ETN-93-93749] p 1966 N94-21798
Electronic locking system p 1796 N94-21801

LOCOMOTION
Apparatus and method for measuring subject work rate on an exercise device
[NASA-CASE-MSC-21752-1] p 1895 N94-20194
Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20627

LOCOMOTIVES
Adaptation of model parameters of a rail model at measured rail compliances
[ILR-MITT-274(1992)] p 1831 N94-21153

LOGARITHMS
Vanishing theorem on arithmetic surfaces
[PB93-215481] p 1961 N94-22263

LOGIC CIRCUITS
Reconfigurable fuzzy cell
[NASA-CASE-MSC-21613-1] p 1907 N94-20492
Design of CMOS logic gates for TID radiation p 1754 N94-21083
Complementary heterojunction FET technology for space application p 1755 N94-21094
Bridging faults in BiCMOS circuits p 1756 N94-21105
Fault detection in digital and analog circuits using an i(DD) temporal analysis technique p 1757 N94-21106
Faulty behavior of asynchronous storage elements p 1757 N94-21108
Detection of CMOS bridging faults using minimal stuck-at fault test sets p 1757 N94-21110
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114
Experiments on technology mapping using different cell libraries p 1758 N94-21118
Low-latency digital frequency synthesizer using the residue number system p 1759 N94-21121
Correctness properties for iterated hardware structures p 1759 N94-21124
Partition algebraic design of asynchronous sequential circuits p 1759 N94-21125
Defect-sensitivity analysis of an SEU immune CMOS logic family p 1765 N94-21711
Dimension scaling effects on the yield sensitivity of HEMT digital circuits p 1765 N94-21712
Detection of feed-through faults in CMOS storage elements p 1766 N94-21721
Bit-systolic arithmetic arrays using dynamic differential gallium arsenide circuits p 1767 N94-21724
A VLSI implementation of DCT using pass transistor technology p 1767 N94-21725
On fast carry select adders p 1767 N94-21728
A 1 GHz sample rate, 256-channel, 1-bit quantization, CMOS, digital correlator chip p 1768 N94-21732
Formal hardware verification in Maple p 1771 N94-22112
Impact of partitioning on parallel discrete event simulation of logic circuits p 1772 N94-22115
Logic oriented neural networks p 1782 N94-22182
A Hopfield neural net for discrete Fourier transform calculation p 1783 N94-22184
A new class of multi-function two-rail totally self-checking basic building blocks p 1788 N94-22215
Fuzzy and neural control
[NASA-TM-108753] p 1947 N94-22270

LOGIC DESIGN
Power optimization in logic isomers p 1756 N94-21101
Test pattern generation for ILA sequential circuits p 1757 N94-21107
Partition algebraic design of asynchronous sequential circuits p 1759 N94-21125
High-speed Viterbi decoding with overlapping code sequences p 1760 N94-21130
Behavioral model simulation studies of an image compressor p 1760 N94-21133

HDL to verification logic translator
p 1766 N94-21717
Detection of feed-through faults in CMOS storage elements p 1766 N94-21721
Formal hardware verification in Maple
p 1771 N94-22112
Towards the formal verification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191466] p 1937 N94-22414

LOGIC PROGRAMMING
Bottom-up abstract interpretation of logic programs
[PB93-191773] p 1928 N94-19995
Programming logic for F omega
[PB93-191781] p 1928 N94-19996
System at the cross-roads of functional and logic programming
[PB93-191823] p 1928 N94-20009
Parallel logic programming systems
[RR-691-I] p 1929 N94-20176
A declarative approach for first-order built-in's of PROLOG
[CWI-CS-R9246] p 1909 N94-21026
COCOLOG: A conditional observer and controller logic for finite machines
[INRIA-RR-1714] p 1910 N94-21063
Correctness properties for iterated hardware structures p 1759 N94-21124
Reasoning about update logic
[CWI-CS-R9312] p 1914 N94-21496
Changing preferences
[CWI-CS-R9310] p 1915 N94-21551
Termination and confluence of rule execution
[CWI-CS-R9309] p 1916 N94-21587

LOGISTICS
Planning process software: A user guide for the DMCA
[AD-A271252] p 1902 N94-19911
The logistic model: The integration of business process redesign and information systems development based on logistic principles
[MEMO-INF-92-70] p 2045 N94-22276

LOGISTICS MANAGEMENT
Multigrid approach to solving the long transportation problem on a regular grid in cost space
[AD-A272323] p 1909 N94-21038

LONG DURATION EXPOSURE FACILITY
Long Duration Exposure Facility (LDEF) contamination study
[AD-A272419] p 1658 N94-21147
Conversion of LDEF experiment M0003 sample observation database to MS-DOS formats
[AD-A272945] p 1681 N94-21226
Results of the post flight analyses on system materials for the LDEF-FRECOPA experiment
p 1659 N94-21371
Measured space environmental effects to LDEF during retrieval p 1659 N94-21372
Space environmental effects on polymer matrix composites: The UTIAS/LDEF experiment
p 1660 N94-21373
Some results of the oxidation investigation of copper and silver samples flown on LDEF p 1660 N94-21375
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377
Gamma ray spectrometry of LDEF samples: Results of 1992 analyses
[DE94-001177] p 1684 N94-22046

LONG WAVE RADIATION
Simulation of clear-sky outgoing longwave radiation over the oceans using operational analysis
p 1861 N94-22290

LONGITUDE
Venus gravity: New Magellan low altitude data
p 2117 N94-20772

LONGITUDINAL STABILITY
Longitudinal beam dynamics for heavy ion fusion using WARPrz
[DE93-019154] p 1992 N94-19915

LORENTZ FORCE
Electrode array electromagnetic velocimeter
[AD-D015950] p 1806 N94-19882
Modeling the minimum energy state of the Earth's magnetotail
[AD-A267984] p 1856 N94-20485

LORENTZ GAS
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937

LOSSES
Volatile loss from accreting icy protoplanets
p 2084 N94-20793
Outgassing data for selecting spacecraft materials
[NASA-RP-1124-REV-3] p 1676 N94-21889

LOW ALTITUDE
Low-cost, dual-use platforms for environmental sensing, phase 1
[AD-A272951] p 1646 N94-21246

LOW COST
Clementine: An inexpensive mission to the Moon and Geographos p 1652 N94-20765
A low cost alternative to high performance PCM bit synchronizers p 1813 N94-21347
Silicon microelectronic field-emissive devices for advanced display technology
[DE94-000397] p 1794 N94-22380
A low-cost vector processor boosting compute-intensive image processing operations p 1925 N94-22441
Wilbur: A low-cost CCD camera system for MDM Observatory p 1814 N94-22510

LOW DENSITY MATERIALS
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546

LOW FREQUENCIES
High resolution infrared spectroscopy of cyclobutane: A study of vibrational mode coupling involving large amplitude, low frequency modes
[AD-A271987] p 1973 N94-20619

LOW MOLECULAR WEIGHTS
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers
[AD-A271128] p 1699 N94-20016

LOW NOISE
A unified Monte Carlo interpretation of particle simulations and applications to nonneutral plasmas
[DE94-001231] p 1997 N94-21973

LOW PASS FILTERS
The influence of lowpass filtering and the effects of fading on the group demodulation of QPSK signals
p 1746 N94-22170

LOW SPEED
Experimental and computational results from a large low-speed centrifugal impeller
[NASA-TM-106421] p 1636 N94-20136

LOW SPEED WIND TUNNELS
Hot wire anemometry: A versatile instrumentation used for predevelopment studies and flight testing of the Do-328 aircraft p 1640 N94-22604

LOW TEMPERATURE
N,N'-bis(4,4,4-trinitro butyryl) hydrazine
[AD-D015897] p 1712 N94-20122
Transient studies of low temperature catalysts for methane conversion
[DE93-041232] p 1680 N94-20934
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597] p 1826 N94-22093
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study
p 1879 N94-22335
Low temperature absorption spectra and ground state electronic structure of tetrakis(2,6-di-tert-butylphenoxide)uranium(IV)
[DE94-000774] p 2035 N94-22387
Spectroscopic studies of magnetic transitions in TbPO4
[DE94-001274] p 2035 N94-22565

LOW THRUST
Design of a controllable pitch underwater thruster system
[AD-A271140] p 1821 N94-20021

LOWER ATMOSPHERE
Refractive index structure in the lower atmosphere
[AD-A270935] p 1854 N94-19899
Empirical wind model for the middle and lower atmosphere. Part 2: Local time variations
[NASA-TM-104592] p 1870 N94-21862

LUBRICANT TESTS
The use of screening tests in spacecraft lubricant evaluation
[AD-A272943] p 1705 N94-21225

LUBRICANTS
Microscopic modeling of tribological and interfacial phenomena
[AD-A271864] p 1823 N94-20464
The use of screening tests in spacecraft lubricant evaluation
[AD-A272943] p 1705 N94-21225
Scanning tunneling microscopy investigations of metal dichalcogenide materials
[AD-A272910] p 2027 N94-21242
Utilization of metals to improve the lubrication of ceramic load-bearing devices
[PB93-202448] p 1825 N94-21424
Integrity testing of brush seal in a T-700 engine
p 1654 N94-21792
Navy GTE seal development activity
p 1655 N94-21794
Dynamics of face seals for high speed turbomachinery
p 1655 N94-21796

LUBRICATING OILS
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451

LUBRICATION
Microscopic modeling of tribological and interfacial phenomena
[AD-A271864] p 1823 N94-20464
Utilization of metals to improve the lubrication of ceramic load-bearing devices
[PB93-202448] p 1825 N94-21424
Lubricated wear of steel-ceramic and ceramic-ceramic systems
[PB93-202356] p 1825 N94-21450
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451
Navy GTE seal development activity
p 1655 N94-21794
Dynamics of face seals for high speed turbomachinery
p 1655 N94-21796

LUMINESCENCE
Optical luminescence spectroscopy as a probe of the surface mineralogy of Mars p 1813 N94-22437

LUMINOSITY
Energy and luminosity limits of hadron supercolliders
[DE93-019248] p 1980 N94-20300
The preservation of low emittance flat beams
[DE93-040964] p 1981 N94-21773
Silicon microelectronic field-emissive devices for advanced display technology
[DE94-000397] p 1794 N94-22380

LUMINOUS INTENSITY
Optical switching devices
[AD-D015918] p 1984 N94-20059
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles
p 1721 N94-20416

LUMPING
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049

LUNAR BASES
Characterization of Minnesota lunar simulant for plant growth p 1897 N94-20665

LUNAR COMPOSITION
Core formation in the Moon: The mystery of the excess depletion of Mo, W and P p 2095 N94-20651
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon
p 2096 N94-20660
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe
p 2097 N94-20661
Impact glasses from the ultrafine fraction of lunar soils
p 2097 N94-20662
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution
p 2097 N94-20663
MinMap: An imaging spectrometer for high resolution compositional mapping of the Moon
p 1813 N94-20688
Chronology and genesis of high-Ti mare volcanism: Melting of cogenetic depleted and enriched reservoirs
p 2118 N94-20777
Implantation of nitrogen: Effects of hydrogen and implantation energy p 1686 N94-20804
Mineralogy and cooling history of magnesian lunar granulite 67415 p 2124 N94-20811
Ti-bearing oxide minerals in lunar meteorite Y793169 with the VLT affinity p 2084 N94-20812
Distribution and geologic history of materials excavated by the lunar crater Bullialdus p 2128 N94-20832
Origin of high-Ti lunar ultramafic glasses
p 1686 N94-20853
Petrology and geochemistry of VLT glasses from double drive tube 79001/2 p 1687 N94-20870
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1
p 2136 N94-20876

LUNAR CORE
Petrology and geochemistry of VLT glasses from double drive tube 79001/2 p 1687 N94-20870

LUNAR CRATERS
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data
p 2101 N94-20686
Chronology of lunar granite 12033,576: Resetting of Rb-Sr and K-Ca isochrons p 2115 N94-20763
Distribution and geologic history of materials excavated by the lunar crater Bullialdus p 2128 N94-20832

Consortium study of lunar meteorites Yamato-793169 and Asuka-881757: Geochemical evidence of mutual similarity, and dissimilarity versus other mare basalts p 2085 N94-20857
Large floor-fractured craters and isostatic crater modification: Implications for lithospheric thickness on Venus p 2135 N94-20873
Degradation sequence of young lunar craters from orbital infrared survey p 2136 N94-20874
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1 p 2136 N94-20876

LUNAR CRUST
Petrogenesis of Apollo 12 mare basalts. Part 2: An open system model to explain the pigeonite basalt compositions p 1684 N94-20645
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe p 2097 N94-20661
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data p 2101 N94-20686
Geology and deposits of the Serenitatis basin p 2119 N94-20786
The Mg-suite and the highland crust: An unsolved enigma p 2126 N94-20822
The Clementine Mission science return at the Moon and Geographos p 1652 N94-20850
Limits on differentiation of melt sheets from basin-scale lunar impacts p 2133 N94-20856

LUNAR EVOLUTION
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
Degradation sequence of young lunar craters from orbital infrared survey p 2136 N94-20874
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1 p 2136 N94-20876

LUNAR EXPLORATION
The High Resolution Stereo Camera (HRSC) for the Lunar Scout 1 Mission p 1813 N94-20650
Clementine: An inexpensive mission to the Moon and Geographos p 1652 N94-20765
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments [NASA-TM-106439] p 1713 N94-21760

LUNAR GEOLOGY
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z [NASA-CR-193149] p 2092 N94-20636
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Petrogenesis of Apollo 12 mare basalts. Part 2: An open system model to explain the pigeonite basalt compositions p 1684 N94-20645
Core formation in the Moon: The mystery of the excess depletion of Mo, W and P p 2095 N94-20651
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe p 2097 N94-20661
Impact glasses from the ultrafine fraction of lunar soils p 2097 N94-20662
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
U-Pb isotopic ages and characteristics of ancient (greater than 4.0 Ga) lunar highland rocks p 2104 N94-20700
U-Pb isotopic systematics of ferroan anorthosite 60025 p 1685 N94-20702
C-O volatiles in Apollo 15 and Apollo 17 picritic glasses p 1685 N94-20727
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
Origin of the Apollo 15 very low Ti green glass. A perspective from the compositional diversity in the very low Ti glasses p 1685 N94-20759
Combined backscatter Moessbauer spectrometer/x ray fluorescence analyzer (BaMS/XRF) for extraterrestrial surfaces p 1686 N94-20761
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis p 2118 N94-20779
Geology and deposits of the Serenitatis basin p 2119 N94-20786
Mineralogy and cooling history of magnesian lunar granulite 67415 p 2124 N94-20811
Sparking young minds with Moon rocks and meteorites p 2039 N94-20819
Evaluation of lunar rocks and soils for resource utilization: Detailed image analysis of raw materials and beneficiated products p 2126 N94-20820
The Mg-suite and the highland crust: An unsolved enigma p 2126 N94-20822
Distribution and geologic history of materials excavated by the lunar crater Bullialdus p 2128 N94-20832
Limits on differentiation of melt sheets from basin-scale lunar impacts p 2133 N94-20856

LUNAR GRAVITATION
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data p 2101 N94-20686

LUNAR MANTLE
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
C-O volatiles in Apollo 15 and Apollo 17 picritic glasses p 1685 N94-20727

LUNAR MAPS
MinMap: An imaging spectrometer for high resolution compositional mapping of the Moon p 1813 N94-20688

LUNAR MARIA
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Petrogenesis of Apollo 12 mare basalts. Part 2: An open system model to explain the pigeonite basalt compositions p 1684 N94-20645
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data p 2101 N94-20686
C-O volatiles in Apollo 15 and Apollo 17 picritic glasses p 1685 N94-20727
Lunar basalt meteorite EET 87521: Petrology of the clast population p 2083 N94-20752
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
Chronology of lunar granite 12033,576: Resetting of Rb-Sr and K-Ca isochrons p 2115 N94-20763

The U-Th-Pb, Sm-Nd, and Ar-Ar isotopic systematics of lunar meteorite Yamato-793169 p 2084 N94-20834
Consortium study of lunar meteorites Yamato-793169 and Asuka-881757: Geochemical evidence of mutual similarity, and dissimilarity versus other mare basalts p 2085 N94-20857
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1 p 2136 N94-20876
Consortium reports on lunar meteorites Yamato 793169 and Asuka 881757, a new type of mare basalt p 2086 N94-20893

LUNAR ORBITS
Degradation sequence of young lunar craters from orbital infrared survey p 2136 N94-20874

LUNAR PHOTOGRAPHS
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data p 2101 N94-20686

LUNAR PHOTOGRAPHY
Preliminary results from Mariner 10: High resolution images of the Moon p 2107 N94-20719

LUNAR PROGRAMS
MinMap: An imaging spectrometer for high resolution compositional mapping of the Moon p 1813 N94-20688

LUNAR RADIATION
CERN-derived analysis of lunar radiation backgrounds p 2080 N94-20880

LUNAR RESOURCES
Production of O2 on the Moon: A lab-top demonstration of ilmenite reduction with hydrogen p 2126 N94-20821
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments [NASA-TM-106439] p 1713 N94-21760

LUNAR ROCKS
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe p 2097 N94-20661
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
Characterization of Minnesota lunar simulant for plant growth p 1897 N94-20665
Optical effects of space weathering on lunar soils and the role of the finest fraction p 2101 N94-20687
U-Pb isotopic ages and characteristics of ancient (greater than 4.0 Ga) lunar highland rocks p 2104 N94-20700
U-Pb isotopic systematics of ferroan anorthosite 60025 p 1685 N94-20702
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778
Geology and deposits of the Serenitatis basin p 2119 N94-20786
Sparking young minds with Moon rocks and meteorites p 2039 N94-20819
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875

LUNAR ROVING VEHICLES
Power transmission by laser beam from lunar-synchronous satellite [NASA-TM-4496] p 1669 N94-20102
Method for remotely powering a device such as a lunar rover [NASA-CASE-LAR-14789-1] p 1824 N94-20587

LUNAR SOIL
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660
Impact glasses from the ultrafine fraction of lunar soils p 2097 N94-20662
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
Characterization of Minnesota lunar simulant for plant growth p 1897 N94-20665
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data p 2101 N94-20686
Optical effects of space weathering on lunar soils and the role of the finest fraction p 2101 N94-20687
Implantation of nitrogen: Effects of hydrogen and implantation energy p 1686 N94-20804
Petrology and geochemistry of VLT glasses from double drive tube 79001/2 p 1687 N94-20870
Degradation sequence of young lunar craters from orbital infrared survey p 2136 N94-20874

LUNAR SPACECRAFT
The High Resolution Stereo Camera (HRSC) for the Lunar Scout 1 Mission p 1813 N94-20650

LUNAR SURFACE
Impact glasses from the ultrafine fraction of lunar soils p 2097 N94-20662
Optical effects of space weathering on lunar soils and the role of the finest fraction p 2101 N94-20687
Preliminary results from Mariner 10: High resolution images of the Moon p 2107 N94-20719
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
Chronology and genesis of high-Ti mare volcanism: Melting of cogenetic depleted and enriched reservoirs p 2118 N94-20777
Contributions of the Clementine mission to our understanding of the processes and history of the Moon p 2119 N94-20784
Earth-based measurement of lunar topography using delayed radar interferometry p 2119 N94-20787
Degradation sequence of young lunar craters from orbital infrared survey p 2136 N94-20874
CERN-derived analysis of lunar radiation backgrounds p 2080 N94-20880

LUNAR TOPOGRAPHY
Earth-based measurement of lunar topography using delayed radar interferometry p 2119 N94-20787

LYSINE
Quinoa: An emerging new crop with potential for CELSS [NASA-TP-3422] p 1895 N94-20137

Thermal and rheological controls on magma migration in dikes: Examples from the east rift zone of Kilauea volcano, Hawaii p 1862 N94-20673
Venus magmatic and tectonic evolution
p 2101 N94-20683
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
Origin of the Apollo 15 very low Ti green glass. A perspective from the compositional diversity in the very low Ti glasses p 1685 N94-20759
Orthopyroxenes as recorders of diogenite petrogenesis: Trace element systematics p 1686 N94-20760
FE-60 and the evolution of eucrites
p 2083 N94-20788
Chronology and genesis of high-Ti mare volcanism: Melting of cogenetic depleted and enriched reservoirs
p 2118 N94-20777
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis
p 2118 N94-20779
Differentiation of magma oceans and the thickness of the depleted layer on Venus p 2118 N94-20780
The parent magma of the Nakhla (SNC) meteorite: Reconciliation of composition estimates from magmatic inclusions and element partitioning
p 2085 N94-20836
Elevation and igneous crater modification on Venus: Implications for magmatic volatile content
p 2135 N94-20872

MAGNESIUM ALLOYS
The use of backscattered electron imaging mode to assess the effect of fine dispersions on development of superplastic microstructure in Al-Mg alloys
[AD-A272426] p 1691 N94-21258

MAGNESIUM COMPOUNDS
The Mg-suite and the highland crust: An unsolved enigma p 2126 N94-20822

MAGNESIUM ISOTOPES
Diffusion-controlled magnesium isotopic fractionation of a single crystal forsterite evaporated from the solid state
p 1686 N94-20855

MAGNESIUM OXIDES
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191
MOCVD growth and structure of PbTiO3 thin films
[DE93-040230] p 2033 N94-21994
Orientationally independent antiferromagnetic coupling in epitaxial Fe/Cr (211) and (100) superlattices
[DE94-001270] p 2035 N94-22564

MAGNET COILS
Stability of an uncooled segment of a high-temperature superconductor
[DE94-000476] p 2032 N94-21932

MAGNETIC ANOMALIES
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Characterization of the Marquez Dome buried impact crater using gravity and magnetic data
p 1863 N94-20882

MAGNETIC BEARINGS
Acceleration-augmented LQG control of an active magnetic bearing p 1757 N94-21112
A new eddy current model for magnetic bearing control system design p 1763 N94-21698

MAGNETIC CLOUDS
Fragmentation of magnetized filamentary interstellar clouds p 2008 N94-22687
Gravitational instability of magnetized filamentary clouds. 1: Helical magnetic fields p 2008 N94-22688

MAGNETIC COMPRESSION
Compact lightweight CO2 laser for SDIO application
[AD-A273010] p 1817 N94-21284
Physics of transport phenomena in magnetic confinement plasmas p 2000 N94-22628

MAGNETIC CONTROL
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Fusion Plasma Theory. Task 1: Magnetic confinement fusion plasma theory
[DE94-000778] p 1998 N94-22019

MAGNETIC CORES
Expectations for the Martian core magnetic field
p 2120 N94-20792

MAGNETIC DIFFUSION
Magnetic fields in spiral galaxies
p 2010 N94-22697

MAGNETIC DIPOLES
Examination of low level magnetic dipole intensities in the transition nuclei Sm-148, Sm-150, Sm-152 and Sm-154, with inelastic photon scattering at S-DALINAC
[ETN-93-95069] p 1971 N94-20030
Iterative electromagnetic Born inversion applied to earth conductivity imaging
[DE93-040668] p 1859 N94-21928
Stability of beam in the Fermilab Main Injector
[DE94-000619] p 1982 N94-21934
Variable-field permanent magnet dipole
[DE94-000800] p 1820 N94-22020

MAGNETIC DISTURBANCES
Preliminary results of observations of solar flares with Nobeyama Radioheliograph p 2001 N94-22633

MAGNETIC EFFECTS
A general purpose ionospheric ray tracing procedure
[AD-A271058] p 1854 N94-19660
Study of possible energy upgrade for the ALS and modeling of the real lattice for the diagnosis of lattice problems
[DE93-040286] p 2016 N94-20323
Characterization of convection related defects in II-VI compound semiconductors
[NASA-CR-194704] p 2030 N94-21778
Effects of magnetic field perturbations in the ATF torsatron
[DE94-000474] p 1999 N94-22568

MAGNETIC FIELD CONFIGURATIONS
Magnetically controlled solar nebula
p 2120 N94-20791
Temperature dependence of magnetic order in single-crystalline UPdSn
[DE93-040153] p 2033 N94-21991
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583
Numerical simulation of magnetic reconnection associated with emerging flux in the solar atmosphere
p 2004 N94-22654
MHD relaxation in magnetic loops
p 2004 N94-22656
Particle acceleration in a filamentary current sheet model p 2004 N94-22659
Dynamics of physical state during two current loops collision p 2005 N94-22663
Enhanced absorption of p-modes on sunspot and plage regions p 2006 N94-22671
Gamma ray burst as a result of the explosive instability in the magnetosphere of old neutron star
p 2007 N94-22675
Asymptotic structure of magnetically driven MHD wind
p 2008 N94-22682
MHD flows from compact objects: Effects on magnetic field configurations p 2008 N94-22684
Gravitational instability of magnetized filamentary clouds. 1: Helical magnetic fields p 2008 N94-22688
Gravitational instability of magnetized filamentary clouds. 2: Rotation p 2009 N94-22689
Magnetic superbubbles in the galactic disk and halo
p 2009 N94-22694
Generation and maintenance of bisymmetric spiral magnetic fields in disk galaxies in differential rotation
p 2010 N94-22695
The relaxed state and entropy production due to the electric resistivity and viscosity of plasma
p 2010 N94-22696
Magnetic fields in spiral galaxies
p 2010 N94-22697

MAGNETIC FIELD RECONNECTION
Driven reconnection and self-organization
p 2000 N94-22625
Numerical simulation of magnetic reconnection associated with emerging flux in the solar atmosphere
p 2004 N94-22654
Magnetic reconnection in emission nebulae in clusters of galaxies p 2010 N94-22700

MAGNETIC FIELDS
Effect of exciton localization and delocalization on magnetic-field-dependent photoluminescence linewidths in semiconductors
[DE93-018860] p 1748 N94-19864
Space-charge dominated beam transport in magnetic quadrupoles with large aperture ratios
[DE93-040443] p 1992 N94-20004
Resistive gate magnetic field sensor
[AD-D015923] p 1749 N94-20199
Neoclassical kinetic theory near an X-point: Plateau regime
[DE93-019825] p 1951 N94-20224
Measurement and correction of magnetic fields in pulsed slotted-tube microwigglers
[DE93-040100] p 1815 N94-20272
The National High Magnetic Field Laboratory, a user facility in support of research in high magnetic fields
[DE93-040145] p 1714 N94-20278
Longitudinal instability of an induction linac with acceleration
[DE93-019249] p 1980 N94-20290
A study of the induction heating of organic composites
[AD-A272657] p 1675 N94-21187
Ionospheric photoelectrons measured at geosynchronous orbit
[AD-A272431] p 1857 N94-21202

The angular velocity spread of REB induced by magnetic field discontinuity
[IPPCZ-331] p 1996 N94-21573
Results from long conduction time plasma opening switch experiments at Sandia National Laboratories
[DE93-019063] p 1762 N94-21632
Relaxation of hysteresis loop in a single crystal of YBa2Cu4O8
[DE93-019519] p 2029 N94-21649
On the stability of shear-Alfven vortices
[DE93-040912] p 1996 N94-21752
Studies of electromagnetic ion cyclotron waves using AMPTE/CCE and Dynamics Explorer
[NASA-CR-194711] p 1982 N94-21878
Iterative electromagnetic Born inversion applied to earth conductivity imaging
[DE93-040668] p 1859 N94-21928
A moving finite element model of the tokamak scrapeoff layer
[DE94-000673] p 1997 N94-21965
Magnetic insulation of secondary electrons in plasma source ion implantation
[DE93-040106] p 1997 N94-21988
Variable-field permanent magnet dipole
[DE94-000800] p 1820 N94-22020
Effects of magnetic field perturbations in the ATF torsatron
[DE94-000474] p 1999 N94-22568
Test results of two high temperature superconducting sample coils
[DE94-000496] p 2035 N94-22570

MAGNETIC FILMS
Magnetic circular dichroism in x ray absorption and core-level photoemission
[DE93-019381] p 1688 N94-19986

MAGNETIC FLUX
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194727] p 2147 N94-21832
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997

MAGNETIC LEVITATION VEHICLES
The 13th International Conference on Magnetically Levitated Systems and Linear Drives MAGLEV 1993
[DE93-040381] p 1825 N94-21544

MAGNETIC MEASUREMENT
Resistive gate magnetic field sensor
[AD-D015923] p 1749 N94-20199
Measurement and correction of magnetic fields in pulsed slotted-tube microwigglers
[DE93-040100] p 1815 N94-20272
Narsarsuaq Geophysical Observatory: Magnetic results, 1985 - 1990
[DATA-REPT-93-1] p 1856 N94-20607
Thule Geophysical Observatory: Magnetic results 1985 - 1990
[DATA-REPT-92-4] p 1857 N94-20609
Magnetic properties and Moessbauer analyses of glass from the K-T boundary, Beloc, Haiti
p 1685 N94-20753
Concept report: Experimental vector magnetograph (EXVM) operational configuration balloon flight assembly
[NASA-CR-194702] p 1638 N94-21776

MAGNETIC MOMENTS
A relativistic constituent quark model
[DE93-041085] p 1946 N94-21689

MAGNETIC PERMEABILITY
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584

MAGNETIC POLES
Structural evidence for reorientation of Miranda about a paleo-pole p 2098 N94-20671
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data
p 2101 N94-20686

MAGNETIC PROPERTIES
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Magnetic properties and Moessbauer analyses of glass from the K-T boundary, Beloc, Haiti
p 1685 N94-20753
Magnetic record in chondrite meteorites
p 2085 N94-20858
Magnetic force microscopy/current contrast imaging: A new technique for internal current probing of IC's
[DE93-040754] p 1761 N94-21532
Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21762
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987
Temperature dependence of magnetic order in single-crystalline UPdSn
[DE93-040153] p 2033 N94-21991
Orientationally independent antiferromagnetic coupling in epitaxial Fe/Cr (211) and (100) superlattices
[DE94-001270] p 2035 N94-22564
Spectroscopic studies of magnetic transitions in TbPO4
[DE94-001274] p 2035 N94-22565
Inelastic neutron scattering of (gamma)-iron, and the determination of the elastic constants by lattice dynamics
[DE94-000694] p 1978 N94-22573

MAGNETIC RELAXATION
Relaxation of hysteresis loop in a single crystal of YBa2Cu4O8
[DE93-019519] p 2029 N94-21649

MAGNETIC RESONANCE
The National High Magnetic Field Laboratory, a user facility in support of research in high magnetic fields
[DE93-040145] p 1714 N94-20278
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558

MAGNETIC SHIELDING
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558

MAGNETIC SIGNATURES
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194726] p 2147 N94-21815
Solar imaging vector magnetograph
[NASA-CR-194729] p 1810 N94-21876
Determination of coronal magnetic fields from vector magnetograms
[NASA-CR-194744] p 2147 N94-21877

MAGNETIC STORMS
Dynamics Explorer 2: Continued FPI and NACS instrument data analysis and associated scientific activity at the University of Michigan
[NASA-CR-194689] p 1657 N94-20173
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A272685] p 1857 N94-21189

MAGNETIC SUSPENSION
The 13th International Conference on Magnetically Levitated Systems and Linear Drives MAGLEV 1993
[DE93-040381] p 1825 N94-21544

MAGNETIZATION
Fermiology and De Haas-Van Alphen effect of beta-(ET)2IBr2
[DE93-019523] p 2011 N94-19807
Two-polarity magnetization in the Manson impact breccia p 1863 N94-20789
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944

MAGNETOHYDRODYNAMIC FLOW
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface
p 2082 N94-20647
Driven reconnection and self-organization
p 2000 N94-22625
Turbulization of free shear flows: 3D perturbations
p 2000 N94-22626
Laboratory structure of the heliopause
p 2003 N94-22648
Prompt high-energy particle acceleration during two current loops collision p 2005 N94-22661
Plasma structure in a plasma flow along a magnetic mirror field p 2005 N94-22664
Mean elemental composition and He-3 enrichments in solar energetic particles p 2006 N94-22670
MHD flows from compact objects: Effects on magnetic field configurations p 2008 N94-22684
Three-dimensional simulations of cosmic jets employing the smoothed particle hydrodynamics technique
p 2008 N94-22685
Time variation of MHD accretion onto a black hole
p 2009 N94-22692
Magnetic fields in spiral galaxies
p 2010 N94-22697
Shock formation in magnetohydrodynamical accretion onto a black hole p 2010 N94-22699
Magnetohydrodynamic phenomena in star-forming processes and their environment p 2010 N94-22701

MAGNETOHYDRODYNAMIC STABILITY
Finite Larmor radius flute mode theory with end loss
[DE93-040914] p 1991 N94-19872
Effect of limiter end loss in finite Larmor radius theory
[DE93-040913] p 1992 N94-19887
Beta-limiting instabilities in D3-D discharges with large bootstrap current
[DE93-015476] p 1993 N94-20326
Two-dimensional nonlinear Schrodinger equations and their properties
[AD-A272184] p 1952 N94-20923
Three-wave resonant interaction in a thin layer
[AD-A272331] p 1994 N94-21039
Shear flow generation by Reynolds stress and suppression of resistive g-modes
[DE93-040911] p 1995 N94-21514
On the stability of shear-Alfven vortices
[DE93-040912] p 1996 N94-21752
Continuum damping of ideal toroidal Alfven eigenmodes
[DE94-001233] p 1998 N94-22560
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-001234] p 1998 N94-22561
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas
[DE94-001304] p 1999 N94-22566
Driven reconnection and self-organization
p 2000 N94-22625
MHD instabilities of fusion oriented plasmas
p 2000 N94-22627
Consequences of chaotic particle motion for the stability of space plasma current sheets p 2001 N94-22636
Tangential stress due to Kelvin-Helmholtz instability at the magnetospheric boundary p 2003 N94-22651
Non-linear thermal instability of optical thin molecular structures p 2006 N94-22667
On the nonlinear instability of thermal structures
p 2006 N94-22668
Consequences of plasma-maser in plasma astrophysics p 2006 N94-22669
The onset and spectra of a magnetized Langmuir turbulence p 2006 N94-22673
Langmuir microstructures and pulsar radio emission
p 2007 N94-22678
Helical kink instability of jets from young stellar objects p 2008 N94-22686
Fragmentation of magnetized filamentary interstellar clouds p 2008 N94-22687
Gravitational instability of magnetized filamentary clouds. 1: Helical magnetic fields p 2008 N94-22688
Gravitational instability of magnetized filamentary clouds. 2: Rotation p 2009 N94-22689
Spiral Alfven instability in accretion disks
p 2010 N94-22698

MAGNETOHYDRODYNAMIC TURBULENCE
Compressible MHD turbulence in the interplanetary medium p 2003 N94-22650
Structure of accretion plasmas of x ray binary pulsars in MHD turbulence p 2007 N94-22679
Spiral Alfven instability in accretion disks
p 2010 N94-22698

MAGNETOHYDRODYNAMIC WAVES
On the stability of shear-Alfven vortices
[DE93-040912] p 1996 N94-21752
Continuum damping of ideal toroidal Alfven eigenmodes
[DE94-001233] p 1998 N94-22560
MHD instabilities of fusion oriented plasmas
p 2000 N94-22627
Theory of leaked auroral kilometric radiation
p 2003 N94-22649
Compressible MHD turbulence in the interplanetary medium p 2003 N94-22650
Energy release at Alfvenic fronts in solar flares
p 2003 N94-22652
Dynamo driven by weak plasma turbulence: The effect of differential rotation p 2005 N94-22665
The onset and spectra of a magnetized Langmuir turbulence p 2006 N94-22673
Langmuir microstructures and pulsar radio emission
p 2007 N94-22678
Magnetic superbubbles in the galactic disk and halo
p 2009 N94-22694
Spiral Alfven instability in accretion disks
p 2010 N94-22698
Shock formation in magnetohydrodynamical accretion onto a black hole p 2010 N94-22699

MAGNETOHYDRODYNAMICS
Magnetically controlled solar nebula
p 2120 N94-20791
On the stability of shear-Alfven vortices
[DE93-040912] p 1996 N94-21752
Physics of magnetospheric boundary layers
[NASA-CR-194725] p 1858 N94-21836

A spheromak ignition experiment reusing Mirror Fusion Test Facility (MFTF) equipment
[DE94-001856] p 2034 N94-22050
Compressible MHD turbulence in the interplanetary medium p 2003 N94-22650
MHD relaxation in magnetic loops p 2004 N94-22658
Formation of fast magnetosonic shock waves during two current loops collision in solar flare p 2005 N94-22662
Helical kink instability of jets from young stellar objects p 2008 N94-22686
Time variation of MHD accretion onto a black hole p 2009 N94-22692
Accretion of a hot plasma onto the central black hole: Fokker-Planck formulation p 2009 N94-22693
Magnetic superbubbles in the galactic disk and halo p 2009 N94-22694
Generation and maintenance of bisymmetric spiral magnetic fields in disk galaxies in differential rotation p 2010 N94-22695
Magnetohydrodynamic phenomena in star-forming processes and their environment p 2010 N94-22701

MAGNETOMETERS
Solar imaging vector magnetograph
[NASA-CR-194729] p 1810 N94-21876

MAGNETOPAUSE
Laboratory relations between the solar wind dynamic pressure and the magnetospheric structures of the Earth and comets p 2003 N94-22647

MAGNETOPLASMADYNAMICS
Evaluation of externally heated pulsed MPD thruster cathodes
[NASA-CR-191090] p 1670 N94-21565

MAGNETORESISTIVITY
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997

MAGNETOSHEATH
Tangential stress due to Kelvin-Helmholtz instability at the magnetospheric boundary p 2003 N94-22651

MAGNETOSONIC RESONANCE
Formation of fast magnetosonic shock waves during two current loops collision in solar flare p 2005 N94-22662
Mean elemental composition and He-3 enrichments in solar energetic particles p 2006 N94-22670

MAGNETOSPHERE-IONOSPHERE COUPLING
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-194728] p 1856 N94-20537
Implications of Viking dayside auroral measurements
[ISBN-0-315-83273-8] p 1861 N94-22575

MAGNETOSTATICS
The best of GYMNOS: A users guide
[DE93-041275] p 1992 N94-19991

MAGNETRON SPUTTERING
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615
Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176

MAGNETRONS
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394

MAGNETS
A summary of studies of particle stability at RHIC
[DE93-040173] p 1970 N94-19868
Survey and alignment analysis for the ALS storage ring using computer spreadsheets
[DE93-019254] p 1917 N94-21917

MAIN SEQUENCE STARS
The circumstellar environments of intermediate mass main sequence stars
[NASA-CR-189311] p 2055 N94-21498
VVNRS: Variable phenomena in VV Cephei
[NASA-CR-194731] p 2056 N94-21835

MAINTENANCE
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20468
Four-channel HF receiving antenna array simulator
[AD-A271876] p 1732 N94-20471
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943
N parallel queueing systems with server breakdown and repair
[CWI-BS-R9236] p 1944 N94-21232
Optimal repairman assignment in two maintenance models which are equivalent to routing models with early decisions
[CWI-BS-R9301] p 1930 N94-21234
Reducing the cognitive workload: Trouble managing power systems
[NASA-TM-106413] p 1714 N94-21564

MAMMALS
Physiologically based pharmacokinetic modelling of percutaneously absorbed dibromomethane utilizing multiple dermal sub-compartments
[AD-A271106] p 1889 N94-19981

MAN ENVIRONMENT INTERACTIONS
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21969

MAN MACHINE SYSTEMS
Research in image management and access
[NASA-CR-194797] p 1907 N94-20376
AIDA: A graphical interactive system, adapted to the user
[ETN-93-93792] p 1908 N94-21020
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 383)
[NASA-SP-7011(383)] p 1892 N94-21288
Automating the control of robotic systems in unstructured environments
[DE93-040753] p 1946 N94-21929
Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373

MAN-COMPUTER INTERFACE
The Keck keyword layer p 1925 N94-22480
A distributed clients/distributed servers model for STARCAT p 2047 N94-22489
GRO/EGRET data analysis software: An integrated system of custom and commercial software using standard interfaces p 1926 N94-22501
Interactive Spectral Analysis and Computation (ISAAC) p 1926 N94-22505
GammaCore: The Compton Observatory research environment p 2048 N94-22509
XPI: The Xanadu Parameter Interface p 1927 N94-22513
Khoros software specification format and interoperability p 1927 N94-22523

MANAGEMENT ANALYSIS
Development of a naming convention and data ma nagement system
[NASA-CR-193860] p 2042 N94-20268

MANAGEMENT INFORMATION SYSTEMS
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20468
A conceptual database design and performance analysis of the MILSATCOM requirements database
[AD-A272672] p 1658 N94-21217
Three original programmes for managers p 1923 N94-22083

MANAGEMENT METHODS
Performance management systems: A statistical analysis
[AD-A272989] p 2043 N94-21266
An evaluation of artificial neural network modeling for manpower analysis
[AD-A273001] p 1945 N94-21269
The NCC project: A quality management perspective p 1828 N94-21324
Let your fingers do the walking: The projects most invaluable tool p 1922 N94-21325
NCCDS configuration management process improvement p 1931 N94-21327
Issues in NASA program and project management. Special Report: 1993 conference
[NASA-SP-6101(07)] p 2039 N94-21497
Issues in NASA program and project management
[NASA-SP-6101(06)] p 2040 N94-21499

MANAGEMENT PLANNING
Planning process software: A user guide for the DMCA
[AD-A271252] p 1902 N94-19911
Government Open Systems Interconnection Profile (GOSIP) transition strategy
[AD-A273005] p 1740 N94-21308
Models of transient processes in centrally planned economy p 2051 N94-22071
Three original programmes for managers p 1923 N94-22083

MANAGEMENT SYSTEMS
Data management for support of the Oregon Transect Ecosystem Research (OTTER) project
[NASA-CR-4557] p 1905 N94-20149
Development of a naming convention and data ma nagement system
[NASA-CR-193860] p 2042 N94-20268
Performance management systems: A statistical analysis
[AD-A272989] p 2043 N94-21266
Problem reporting management system performance simulation p 1931 N94-21328
Information and decision structure in a Japanese type of management with respect to QCC and just-in-time systems p 2046 N94-22063

MANGANESE
High performance heavy alloys by alloying and process control
[AD-A271129] p 1689 N94-20019
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite p 2066 N94-20902

MANGANESE COMPOUNDS
Fe/Mn in olivine of carbonaceous meteorites p 2084 N94-20788
Characterization of convection related defects in II-VI compound semiconductors
[NASA-CR-194704] p 2030 N94-21778

MANGANESE OXIDES
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870

MANIPULATORS
Application of change detection to dynamic contact sensing
[AD-A270523] p 1939 N94-20105
Teleoperation with virtual force feedback
[DE93-019406] p 1942 N94-20293
Development and testing of a reliability performance index for modular robotic systems
[AD-A271901] p 1942 N94-20488
Active damping of oscillations in a long compliant manipulator link
[DE93-018878] p 1826 N94-22038
A robust adaptive control design for flexible joint manipulators p 1790 N94-22230
Analytical representation of working articulation space of a plane manipulator in an encumbered environment p 1792 N94-22241
Control of multiple robot manipulators with optimal force distribution p 1794 N94-22255
Optimal control of the tip of a flexible arm p 1794 N94-22256
Dynamic analyses of flexible robotic manipulators
[ISBN-0-315-59251-6] p 1827 N94-22421
Robot link and contact surface dynamic interaction: An experimental study of contact instability
[ISBN-0-315-83439-0] p 1827 N94-22578

MANNED MARS MISSIONS
Mars exploration study workshop 2
[NASA-CP-3243] p 2146 N94-21883

MANNED SPACECRAFT
Entry velocities at Mars and Earth for short transit times
[AD-A272591] p 1665 N94-21420

MANPOWER
An evaluation of artificial neural network modeling for manpower analysis
[AD-A273001] p 1945 N94-21269

MANUALS
Publication of science data on CD-ROM: A guide and example
[NASA-CR-4560] p 1842 N94-21585
Everything you might want to know about the Internet but are afraid to ask!
[DE93-041118] p 2046 N94-22413

MANUFACTURING
Materials processing and manufacturing technologies for Diamond Substrate MultiChip Modules (DSMCM)
[AD-A271011] p 2011 N94-19821
Solder technology in the manufacturing of electronic products
[DE93-018842] p 1699 N94-19980
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20468
Non-destructive evaluation in manufacturing using spectroscopic ellipsometry p 1828 N94-21012
Optimization of static traffic allocation policies
[CWI-BS-R9302] p 1930 N94-21161
Materials processing and manufacturing technologies for diamond substrate multichip modules
[AD-A271484] p 2027 N94-21319
Improvement of the stability of the process for synthesizing chemically prepared varistor powder
[DE94-000345] p 1763 N94-21654
Modeling of glass fabrication p 1711 N94-21800
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851

MANY BODY PROBLEM
A microscopic theory of quantum optics and new photon-locked bistable states
[AD-A271250] p 1983 N94-19901
MAPPING
Topographic mapping using a monopulse SAR system p 1721 N94-20417
Performance evaluation of the JPL TOPSAR system: An across-track interferometric SAR system for topographic mapping p 1732 N94-20461
Ocean mapping using satellite radar altimetry
[ETN-93-93470] p 1841 N94-21017
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
MAPS
Detecting topographical regions in digital terrain maps
[AD-A272889] p 1841 N94-21453
MARINE ENVIRONMENTS
SIMA: An integrated environmental monitoring system p 1840 N94-20967
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222
Low-cost, dual-use platforms for environmental sensing, phase 1
[AD-A272951] p 1646 N94-21246
MARINE METEOROLOGY
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186
Scientific development of a massively parallel ocean climate model
[DE93-019446] p 1855 N94-20219
Four-dimensional remote sensing of the marine boundary layer with a digital beamforming radar wind profiler
[AD-A270627] p 1882 N94-20564
Low-cost, dual-use platforms for environmental sensing, phase 1
[AD-A272951] p 1646 N94-21246
NOVAM evaluation utilizing electro-optics and meteorological data from KEY-90
[AD-A271722] p 1868 N94-21356
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
MARINE TECHNOLOGY
SIMBAT theoretical manual
[AD-A271063] p 1882 N94-19979
MARINER 10 SPACE PROBE
Preliminary results from Mariner 10: High resolution images of the Moon p 2107 N94-20719
MARINER 9 SPACE PROBE
GMM-1: A 50 degree and order gravitational field model for Mars p 2117 N94-20774
MARKET RESEARCH
Wind energy: Program overview, FY 1992
[DE93-000056] p 1845 N94-19921
MARKOV CHAINS
Some topics in regenerative steady-state simulation
[AD-A271145] p 1902 N94-19855
Determination of the optimal stochastic upper bound of a Markovian generator
[RR-906-I] p 1963 N94-20202
Specification and generation of Markov reward models
[MEMO-INF-92-60] p 1963 N94-21058
Linear programming for standard and nonstandard Markovian control problems. A survey
[PB93-191948] p 1963 N94-21066
A multi-level solution algorithm for steady-state Markov chains
[NASA-CR-191558] p 1914 N94-21462
Dependability and performability analysis
[NASA-CR-191565] p 1965 N94-21463
Algorithms for Markov decision chains with partial information
[PB93-220085] p 1918 N94-22098
MARKOV PROCESSES
The effect of dissipative inhomogeneous medium on the statistics of the wave intensity p 1726 N94-20440
A semi-Markov model of a home network access protocol
[MEMO-INF-92-71] p 1909 N94-21045
Linear programming for standard and nonstandard Markovian control problems. A survey
[PB93-191948] p 1963 N94-21066
N parallel queueing systems with server breakdown and repair
[CWI-BS-R9236] p 1944 N94-21232
Throughput and blocking in circuit-switched interconnection networks p 1784 N94-22189
Speaker-independent isolated-digit recognition using neural networks and hidden Markov model p 1747 N94-22213
MARS (PLANET)
Constraints on the rate of discharge and duration of the Mangala Valles flood p 2099 N94-20674
GMM-1: A 50 degree and order gravitational field model for Mars p 2117 N94-20774
Expectations for the Martian core magnetic field p 2120 N94-20792
Workshop on Early Mars: How Warm and How Wet?, part 1
[NASA-CR-193553] p 2142 N94-21659
Ancient Martian valley genesis and paleoclimatic inference: The present as a key to the past p 2142 N94-21661
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668
Briny lakes on early Mars? Terrestrial intracrater playas and Martian candidates p 2145 N94-21675
Early Mars was wet but not warm: Erosion, fluvial features, liquid water habitats, and life below freezing p 2145 N94-21677
Wet inside and out? Constraints on water in the Martian mantle and on outgassed water, based on melt inclusions in SNC meteorites p 2145 N94-21678
MARS ATMOSPHERE
Balloon exploration of the northern plains of Mars near and north of the Viking 2 landing site p 2092 N94-20401
Workshop on Early Mars: How Warm and How Wet?, part 1
[NASA-CR-193553] p 2142 N94-21659
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667
Requirements for the early atmosphere of Mars from nitrogen isotope ratios p 2144 N94-21669
A model for the evolution of CO2 on Mars p 2144 N94-21671
Mars atmosphere loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape p 2144 N94-21672
Possible solutions to the problem of channel formation on early Mars p 2144 N94-21673
Early Mars was wet but not warm: Erosion, fluvial features, liquid water habitats, and life below freezing p 2145 N94-21677
The young Sun and photochemistry of the primitive Martian atmosphere p 2145 N94-21679
Evolution of the Martian atmosphere p 2146 N94-21680
MSATT Workshop on Innovative Instrumentation for the In Situ Study of Atmosphere-Surface Interactions on Mars
[NASA-CR-194584] p 1811 N94-22430
Determination of Martian soil mineralogy and water content using the Thermal Analyzer for Planetary Soils (TAPS) p 1812 N94-22433
Temperature/pressure and water vapor sounding with microwave spectroscopy p 1812 N94-22436
MARS CRATERS
Morphologic and morphometric studies of impact craters in the northern plains of Mars p 2089 N94-20384
Evidence for an ice sheet/frozen lake in Utopia Planitia, Mars p 2089 N94-20388
Ice in the northern plains: Relic of a frozen ocean? p 2090 N94-20391
A model for the origin of Martian polygonal terrain p 2090 N94-20393
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676
MARS ENVIRONMENT
The fate of water deposited in the low-lying northern plains p 2089 N94-20387
K, U, and Th behavior in Martian environmental conditions p 2141 N94-20908
Workshop on Early Mars: How Warm and How Wet?, part 1
[NASA-CR-193553] p 2142 N94-21659
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667
Fluvial valleys in the heavily cratered terrains of Mars: Evidence for paleoclimatic change? p 2144 N94-21670
Possible solutions to the problem of channel formation on early Mars p 2144 N94-21673
Mars and the early Sun p 2146 N94-21683
MARS LANDING
Mars exploration study workshop 2
[NASA-CP-3243] p 2146 N94-21883
MARS OBSERVER
The thumbprint terrain: What will Mars Observer tell us? p 2091 N94-20397
MARS PHOTOGRAPHS
Geomorphic evidence for an eolian contribution to the formation of the Martian northern plains p 2092 N94-20402
MARS SURFACE
Workshop on the Martian Northern Plains: Sedimentological, Periglacial, and Paleoclimatic Evolution
[NASA-CR-194831] p 2088 N94-20382
Hydrological consequences of ponded water on Mars p 2089 N94-20383
Morphologic and morphometric studies of impact craters in the northern plains of Mars p 2089 N94-20384
Evidence for an ice sheet/frozen lake in Utopia Planitia, Mars p 2089 N94-20388
A wet-geology and cold-climate Mars model: Punctuation of a slow dynamic approach to equilibrium p 2090 N94-20389
Possible occurrence and origin of massive ice in Utopia Planitia p 2090 N94-20390
Ice in the northern plains: Relic of a frozen ocean? p 2090 N94-20391
Observed climatic activity pertaining to the evolution of the northern plains p 2090 N94-20392
A model for the origin of Martian polygonal terrain p 2090 N94-20393
The distribution of ground ice on Mars p 2090 N94-20394
A marine sedimentary model for the evolution of the northern plains p 2091 N94-20395
The thumbprint terrain: What will Mars Observer tell us? p 2091 N94-20397
Stratigraphy of the Martian northern plains p 2091 N94-20398
Seismic-triggering history of the catastrophic outflows in the Chryse region of Mars p 2091 N94-20399
A formational model for the polygonal terrains of Mars: Taking a crack at the genesis of the Martian polygons p 2091 N94-20400
Balloon exploration of the northern plains of Mars near and north of the Viking 2 landing site p 2092 N94-20401
Geomorphic evidence for an eolian contribution to the formation of the Martian northern plains p 2092 N94-20402
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Constraints on the rate of discharge and duration of the Mangala Valles flood p 2099 N94-20674
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging p 2101 N94-20685
Eruption history of the Tharsis shield volcanoes, Mars p 2102 N94-20692
Geology of Biblis Patera, Ulysses Patera, and Jovis Tholus, Mars p 2103 N94-20693
Thermal conductivity measurements of particulate materials under Martian conditions p 1685 N94-20703
Geologic mapping of Harmakhis and Reull Valles region, Mars: Evidence for multiple resurfacing and drainage events p 1844 N94-20705
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate p 2108 N94-20723
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
Local topography of Mars and its relationship to surface weathering processes p 2111 N94-20737
Mars: New evidence for origin of some Valles Marineris layered deposits p 2112 N94-20748
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
Extensional history of Mars' Tharsis Region p 2125 N94-20814
Complex structure of the Thaumasia region of Mars p 2125 N94-20815

Large, ancient, compressional structures on Mars
p 2125 N94-20816
Discharge rates in Ma'adim Vallis, Mars
p 2128 N94-20830
The parent magma of the Nakhla (SNC) meteorite: Reconciliation of composition estimates from magmatic inclusions and element partitioning
p 2085 N94-20836
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
A study of carbonates, sulfates, and phosphates using thermal emission spectroscopy p 1686 N94-20868
Spectral analysis of chemisorbed CO2 on Mars analog materials p 2140 N94-20900
Comparison of flank modification on Ascraeus and Arsia Montes volcanoes, Mars p 2140 N94-20903
K, U, and Th behavior in Martian environmental conditions p 2141 N94-20908
Wrinkle ridges, reverse faulting, and the depth penetration of lithospheric stress in lunae planum, Mars
p 2141 N94-20910
Possible flexural signatures around Olympus and Ascraeus Montes, Mars p 2142 N94-20911
Workshop on Early Mars: How Warm and How Wet?, part 1
[NASA-CR-193553] p 2142 N94-21659
Evolution of the global water cycle on Mars: The geological evidence p 2142 N94-21660
Ancient Martian valley genesis and paleoclimatic inference: The present as a key to the past
p 2142 N94-21661
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust
p 2143 N94-21666
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth
p 2143 N94-21667
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668
Fluvial valleys in the heavily cratered terrains of Mars: Evidence for paleoclimatic change?
p 2144 N94-21670
Briny lakes on early Mars? Terrestrial intracrater playas and Martian candidates p 2145 N94-21675
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676
Early Mars was wet but not warm: Erosion, fluvial features, liquid water habitats, and life below freezing
p 2145 N94-21677
Wet inside and out? Constraints on water in the Martian mantle and on outgassed water, based on melt inclusions in SNC meteorites p 2145 N94-21678
Early Mars: The inextricable link between internal and external influences on valley network formation
p 2146 N94-21681
The Martian valley networks: Origin by niveo-fluvial processes p 2146 N94-21682
Mars exploration study workshop 2
[NASA-CP-3243] p 2146 N94-21883
MSATT Workshop on Innovative Instrumentation for the In Situ Study of Atmosphere-Surface Interactions on Mars
[NASA-CR-194584] p 1811 N94-22430
A Backscatter Moessbauer Spectrometer (BaMS) for use on Mars p 1811 N94-22431
Determination of Martian soil mineralogy and water content using the Thermal Analyzer for Planetary Soils (TAPS) p 1812 N94-22433
In situ identification of the Martian surface material and its interaction with the Martian atmosphere using DTA/GC p 1812 N94-22434
Mass spectrometer-pyrolysis experiment for atmospheric and soil sample analysis on the surface of Mars p 1812 N94-22435
Optical luminescence spectroscopy as a probe of the surface mineralogy of Mars p 1813 N94-22437

MARS VOLCANOES

Eruption history of the Tharsis shield volcanoes, Mars
p 2102 N94-20692
Geology of Biblis Patera, Ulysses Patera, and Jovis Tholus, Mars p 2103 N94-20693
Chronology, eruption duration, and atmospheric contribution of Apollinaris Patera, Mars
p 2108 N94-20720
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
Comparison of flank modification on Ascraeus and Arsia Montes volcanoes, Mars p 2140 N94-20903
Possible flexural signatures around Olympus and Ascraeus Montes, Mars p 2142 N94-20911

MARTENSITIC TRANSFORMATION

First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21964

MASERS

Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations
p 1723 N94-20427

MASKING

X ray reflection masks: Manufacturing, characterization and first tests
[BONN-IR-92-31] p 1986 N94-21043

MASKS

Characterization and possible repair of defects in soft x ray projection lithography masks
[DE93-019147] p 1750 N94-20231

MASONRY

Microstructure in mortar: A summary of a new project of research p 1708 N94-21896

MASS DISTRIBUTION

Analysis and design of weight balancing system for laser velocimetry traverse
[AD-A271171] p 1816 N94-20546
Equilibrium models of mass distribution and collisional lifetimes of asteroids p 2086 N94-20877

MASS FLOW

System and method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-1] p 1801 N94-20588
Speed of sound data and related models for mixtures of natural gas constituents
[PB93-200822] p 1966 N94-21447

MASS RATIOS

Proof of stability of the hydrogen molecule
[PB93-221026] p 1977 N94-22271

MASS SPECTRA

Measurement of the B(+) and B(0) lifetimes
[DE93-019906] p 1969 N94-19814
Search for excited quarks in p(-p) collisions at the square root of s = 1.8 TeV
[DE93-019910] p 1975 N94-21840

MASS SPECTROMETERS

The laser and its applications on environment and biotechnology research
[DE94-000376] p 1820 N94-21957
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004

MASS SPECTROSCOPY

Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4
[DE93-018050] p 1689 N94-20182
Multielement analysis of interplanetary dust particles using TOF-SIMS p 2084 N94-20790
Analysis of semi-insulating bulk GaAs using glow discharge mass spectrometry
[AD-A273032] p 1682 N94-21435
On Plasma Edge Spectroscopy and Spectroscopic Studies of Impurity Densities and Impurity Transport
[IPF-92-2] p 1996 N94-21802
Plasma edge spectroscopy p 1996 N94-21803
Spectroscopic studies of impurity densities and impurity transport p 1997 N94-21804
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004

MASS TRANSFER

Parameters affecting hydrogen chloride measurements
[AD-A271326] p 1851 N94-20025
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177
Heat transfer additives for absorption cooling system fluids
[PB93-202521] p 1714 N94-21426

MASSIVE STARS

New production mechanisms for unstable nuclei in stars, supernovae, and the big bang
[DE93-018627] p 2081 N94-21618
The formation of massive stars: A 30 Mo case study
[ISBN-0-315-83944-9] p 2081 N94-22593

MASSIVELY PARALLEL PROCESSORS

Scientific development of a massively parallel ocean climate model
[DE93-019446] p 1855 N94-20219
Fast data parallel polygon rendering
[DE93-040157] p 1929 N94-20279
Massively parallel computation of RCS with finite elements p 1726 N94-20437
Multi-CPU plasma fluid turbulence calculations on a CRAY Y-MP C90
[DE93-015425] p 1801 N94-20562
Multiple-fold clustered processor mesh array
p 1757 N94-21113
A novel VLSI processor architecture for supercomputing arrays p 1758 N94-21115
Analysis of multigrid methods on massively parallel computers: Architectural implications
p 1938 N94-21468
Visualization on massively parallel computers using CM/AVS
[DE93-040151] p 1936 N94-21746
The transition to massively parallel computing within a production environment at a DOE access center
[DE93-019155] p 1936 N94-21828
Scientific computing in the 1990ies: An astronomical perspective p 2057 N94-22440

MATERIALS RECOVERY

Substrate recovery of Mo-Si multilayer coated optics
[DE93-019610] p 1698 N94-19810
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789

MATERIALS SCIENCE

Materials Science and Engineering
[DE93-040497] p 1675 N94-21530
Chemistry and materials science
[DE94-001449] p 2152 N94-21858

MATHEMATICAL LOGIC

Are types needed for natural language?
[PB93-191831] p 1949 N94-19997
Set theory and nominalisation, part 1
[PB93-191807-PT-1] p 1962 N94-20007
Set theory and nominalisation, part 2
[PB93-191815-PT-2] p 1962 N94-20008
Back and forth bisimulations on prime event structures
[RR-888-I-IMAG-124-LIFIA] p 1929 N94-20124
Explanation closure, action closure, and the Sandewall test suite for reasoning about change
[TR-440] p 1907 N94-20522
Proving run-time properties of general programs w.r.t. constructive negation
[CWI-CS-R9245] p 1909 N94-21025
Beta(sub k)-complete problems and greediness
[TR-455] p 1913 N94-21318
Procedural dynamic semantics, verb-phrase ellipsis, and presupposition
[CWI-CS-R9311] p 1914 N94-21495
Reasoning about update logic
[CWI-CS-R9312] p 1914 N94-21496
Changing preferences
[CWI-CS-R9310] p 1915 N94-21551

MATHEMATICAL MODELS

A Kirchhoff approach to seismic modeling and prestack depth migration
[AD-A271010] p 1854 N94-19820
SPICE macromodel for a 1-megawatt power MOSFET switch
[DE93-019415] p 1748 N94-19844
Performance potential of plasma thrusters: Arcjet and Hall thruster modeling
[AD-A271085] p 1667 N94-19847
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917
Set theory and nominalisation, part 1
[PB93-191807-PT-1] p 1962 N94-20007
Set theory and nominalisation, part 2
[PB93-191815-PT-2] p 1962 N94-20008
Absorption heat pump for space applications
[NASA-CR-194693] p 1845 N94-20066
Cavitation modelling p 1668 N94-20079
Statistical object recognition
[AD-A270887] p 1962 N94-20113
Modeling of interactions between biosphere and atmosphere on the global scale
[NASA-CR-193423] p 1837 N94-20205
A breakdown model for the bipolar transistor to be used with circuit simulators
[DE93-019422] p 1750 N94-20218
Computational model of a magnetic modulator for copper lasers
[DE93-019603] p 1815 N94-20223
The CSIRO 9-level atmospheric general circulation model
[CSIRO-TP-26] p 1855 N94-20256
RCS Analysis of Plate Geometries, parts 1 and 2
[NASA-CR-194173] p 1717 N94-20269
High-frequency techniques for RCS prediction of plate geometries p 1717 N94-20270

A physical optics/equivalent currents model for the RCS of trihedral corner reflectors p 1717 N94-20271
Applying the INN model to the MaxClique [DE93-040137] p 1906 N94-20276
Feature-based tolerancing for intelligent inspection process definition [DE93-017984] p 1906 N94-20311
The life cycles of intense cyclonic and anticyclonic circulation systems observed over oceans [NASA-CR-194760] p 1865 N94-20353
Process for the homoepitaxial growth of single-crystal silicon carbide films on silicon carbide wafers [NASA-CASE-LEW-15223-1] p 2017 N94-20381
Seismic-triggering history of the catastrophic outflows in the Chryse region of Mars p 2091 N94-20399
A formational model for the polygonal terrains of Mars: Taking a crack at the genesis of the Martian polygons p 2091 N94-20400
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids p 1724 N94-20431
Retrieval of ice thickness from polarimetric SAR data p 1724 N94-20432
Synergism of active and passive microwave data for estimating bare surface soil moisture p 1727 N94-20444
Relationship of attenuation in a vegetation canopy to physical parameters of the canopy p 1729 N94-20450
Numerical modeling for an electric-field hyperthermia applicator p 1729 N94-20451
Application of the target decomposition theorem to a polarimetric random media model p 1730 N94-20453
Modeling the minimum energy state of the Earth's magnetotail [AD-A267984] p 1856 N94-20485
Theoretical and experimental study of the winding of a thin plastic film: The role of aerodynamic effects [ECL-93-04] p 1703 N94-20599
Hydrostatic/nonhydrostatic comparison with the MERCURE code on orographic flows [ETN-93-94603] p 1866 N94-20600
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690
Magellan vertical polarization radar observations p 1744 N94-20691
Asteroid collisions: Target size effects and resultant velocity distributions p 2063 N94-20729
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Core formation by giant impacts: Conditions for intact melt region formation p 1863 N94-20833
Numerical modeling of impact erosion of atmospheres: Preliminary results p 2131 N94-20847
Recondensation in the early solar system: Physical conditions and source material p 2085 N94-20849
Diffusion-controlled magnesium isotopic fractionation of a single crystal forsterite evaporated from the solid state p 1686 N94-20855
Convex set and linear mixing model p 1844 N94-20888
Study of concentration-dependent dielectric properties of n-type GaAs using variable angle spectroscopic ellipsometry p 2024 N94-21002
Tight comparison bounds for the string prefix-matching problem [CWI-CS-R9250] p 1952 N94-21029
The correlated M/G/1 queue [CWI-BS-R9303] p 1943 N94-21032
Routing of freeway traffic: A discrete-time state space model and routing problems [CWI-BS-R9232] p 1944 N94-21033
Specification and generation of Markov reward models [MEMO-INF-92-60] p 1963 N94-21058
Computation of signal delays in RC networks p 1744 N94-21102
Application of molecular modeling to biological processing [AD-A272612] p 1974 N94-21185
Analysis of the effects of eurasian crustal and upper mantel structure on regional phases using broadband seismic data [AD-A272446] p 1858 N94-21206
An evaluation of artificial neural network modeling for manpower analysis [AD-A273001] p 1945 N94-21269
Forecasting technique of variations of the optical absorptivity of thermal control coatings under different simultaneous radiations p 1664 N94-21399
MINIFOLD: A kernel for a MANIFOLD-like coordination language [CWI-CS-R9252] p 1915 N94-21534
Derivation of a model of the exciter of a brushless synchronous machine [EUT-92-E-258] p 1761 N94-21538
Coupling of smooth particle hydrodynamics with PRONTO [DE93-019080] p 1915 N94-21539
Defect motion as the origin of the 1/f conductance noise in solids [EUT-92-E-259] p 2029 N94-21552
Survey of lift-fan aerodynamic technology [NASA-CR-177615] p 1646 N94-21592
Local uniform grid refinement and brine transport in porous media with inhomogeneities [CWI-NM-R9224] p 1803 N94-21609
Ultrafast gas switching experiments [DE93-019071] p 1762 N94-21634
Some evidence on determinants of fuel economy as a function of driving cycle and test type [DE93-019511] p 1825 N94-21637
Monitoring issues from a modeling perspective p 1868 N94-21640
Fluvial valleys in the heavily cratered terrains of Mars: Evidence for paleoclimatic change? p 2144 N94-21670
Mars atmosphere loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape p 2144 N94-21672
A methodology for quantifying uncertainty in models [DE93-040154] p 1916 N94-21747
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms [DE93-040058] p 1916 N94-21761
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels [DE93-040181] p 1804 N94-21765
Radio and optical emission: Spectral shapes and breaks in GRB [NASA-CR-194763] p 2150 N94-21781
Modeling bristle lift-off in idealized brush seal configurations p 1655 N94-21797
Activities Report of the Institute of Applied Physics [ETN-93-93749] p 1966 N94-21798
Edge plasma experiments on CASTOR tokamak [IPPCZ-332] p 1997 N94-21816
Simulations of diffusion-reaction equations with implications to turbulent combustion modeling [NASA-CR-191536] p 1804 N94-21861
Empirical wind model for the middle and lower atmosphere. Part 2: Local time variations [NASA-TM-104592] p 1870 N94-21862
A quantitative model for interpreting nanometer scale hardness measurements of thin films [DE93-040601] p 2034 N94-22005
Information Technology and Economic Modelling [VTT-SYMP-135] p 2049 N94-22056
Mathematical modelling of economic systems p 2050 N94-22060
AJKA: An econometric macromodel for Finland p 2050 N94-22061
Macromodel of centrally planned economy p 2050 N94-22062
Models of transient processes in centrally planned economy p 2051 N94-22071
Multicriteria optimisation problem in the agricultural modelling p 1844 N94-22073
A model of negotiation in an extensive form game p 1965 N94-22075
APL-technology of computer simulation p 1923 N94-22077
Microdynamic model of reproduction: Taxation and currency issue as regulators of economy p 2053 N94-22084
Use of economic models in Finnish economic policy p 2053 N94-22085
Experiences of the bank of Finland's econometric simulation model p 2053 N94-22086
Full wave numerical model of arbitrarily-shaped proximity coupled microstrip antennas p 1745 N94-22137
Modeling of coaxial-fed microstrip patch antenna by finite difference time domain method p 1745 N94-22138
Formulation for numerical solution of radiation and transmission from arbitrary apertures p 1745 N94-22140
Effect of errors on the phase centre and pointing angle of phased array antennas p 1746 N94-22162
A simplified method for S-parameter calculations of metal septum waveguide filters p 1782 N94-22180
Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised) [PB93-215432] p 1969 N94-22262
The logistic model: The integration of business process redesign and information systems development based on logistic principles [MEMO-INF-92-70] p 2045 N94-22276
A thermodynamic analysis of propagating subcritical cracks with cohesive zones p 1834 N94-22611
Brief summary of the evolution of high-temperature creep-fatigue life prediction models for crack initiation p 1834 N94-22613

MATHEMATICAL PROGRAMMING
MGD1M: A parallel multigrid code with a fast vectorized ILU-relaxation [CWI-NM-R9222] p 1930 N94-21077
Parallelizing a highly vectorized multigrid code with zebra relaxation [CWI-NM-R9225] p 1935 N94-21610

MATHEMATICS
Mathematics B for the study direction VWO: A reconnaissance [REPT-92-80] p 1950 N94-20032

MATRICES (MATHEMATICS)
Segmented operations for sparse matrix computation on vector multiprocessors [AD-A270601] p 1928 N94-19950
Determination of the optimal stochastic upper bound of a Markovian generator [RR-906-I] p 1963 N94-20202
On the numerical stability of quasi-definite systems [DE93-019404] p 1950 N94-20217
Parallel band reduction and tridiagonalization [DE93-019566] p 1951 N94-20221
Numerical ranges and stability estimates [TW-92-10] p 1953 N94-21060
Method for design rotation [AD-A272440] p 1911 N94-21204
A new matrix formulation of classical electrodynamics. Part 3: Wave propagation through a multilayer dielectric medium with planar boundaries [AD-A271610] p 1739 N94-21240
Using parallel banded linear system solvers in generalized eigenvalue problems [NASA-CR-191540] p 1915 N94-21584
The quantum structure of matter grand challenge project: Large-scale 3-D solutions in relativistic quar.tum dynamics [DE94-000328] p 1960 N94-21955
A sharp upper bound for departure from normality [DE93-040457] p 1960 N94-21966
Column reduced rational matrix functions with given null-pole data in the complex plane [PB93-220531] p 1960 N94-22099
Integration of parallel processing structures using a matrix approach p 1784 N94-22192
Registering and resampling images in STSDAS p 1927 N94-22550

MATRIX MATERIALS
Composite materials with improved properties in compression [AD-A272837] p 1675 N94-21176
Thermal stability relationships between PMR-15 resin and its composites [NASA-TM-106285] p 1675 N94-21488

MAXIMA
On multiflow problems [RR-889-M] p 1950 N94-20125

MAXIMUM ENTROPY METHOD
Optimal resolution in maximum entropy image reconstruction from projections with multigrid acceleration p 1955 N94-21465
DECONV-TOOL: An IDL based deconvolution software package p 1927 N94-22542
First MEM task IRMEO in IRAF p 1928 N94-22551

MAXIMUM LIKELIHOOD ESTIMATES
Parameter estimation with cost function of second order in output-error-problem [DLR-FB-92-38] p 1964 N94-21139
DECONV-TOOL: An IDL based deconvolution software package p 1927 N94-22542

MAXWELL EQUATION
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method p 1718 N94-20405
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20406
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids p 1724 N94-20431
Modeling the minimum energy state of the Earth's magnetotail [AD-A267984] p 1856 N94-20485
A new matrix formulation of classical electrodynamics. Part 3: Wave propagation through a multilayer dielectric medium with planar boundaries [AD-A271610] p 1739 N94-21240
Characteristic based methods for the time-domain Maxwell equations [AD-A272973] p 1802 N94-21263
Detailed analysis case studies of trapped plasmas at the Earth's magnetic equator [AD-A272497] p 1858 N94-21432

MEAN SQUARE VALUES
Likelihood analysis of parity violation in the compound nucleus [DE94-000671] p 1977 N94-22572

MEASURING INSTRUMENTS
Charge collectors for the omega upgrade
[DE93-019684] p 1972 N94-20264
Enhanced software for the GT1022 automated gaging system
[DE94-001374] p 1918 N94-21977
Acoustic, fiber optic, and silicon microelectronic microsensors research and development activities at Sandia National Laboratories
[DE93-019075] p 1770 N94-22040
Writing instrument interfaces with xf/tktcl
p 1925 N94-22480

MECHANICAL DRIVES
Experimental investigation of nozzle/plume aerodynamics at hypersonic speeds
[NASA-CR-194628] p 1636 N94-20014
Long range fast tool servo
[AD-A271614] p 1761 N94-21257

MECHANICAL ENGINEERING
Production of NiAl and TiAl intermetallics by mechanical alloying
[VTT-JULK-760] p 1691 N94-20530
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169

MECHANICAL MEASUREMENT
High accuracy die mechanical stress measurement with the ATC04 Assembly Test Chip
[DE93-019435] p 1830 N94-20477

MECHANICAL PROPERTIES
Dynamic, multiaxial impact response of confined and unconfined ceramic rods
[DE93-040057] p 1829 N94-19824
Characterization studies of lower and non-TDI polyurethane encapsulants
[DE93-041129] p 1698 N94-19857
High performance heavy alloys by alloying and process control
[AD-A271129] p 1689 N94-20019
Fundamentals of mechanical behavior in structural intermetallics: A synthesis of atomistic and continuum modeling
[DE93-019166] p 1690 N94-20232
Properties and potential of high-temperature niobium beryllides
[DE93-019169] p 1690 N94-20233
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575
Mechanical properties and reliability of semi-crystalline polymers
[AD-A271591] p 1704 N94-20946
Issues related to mechanical properties of neutron-irradiated ceramics
[DE93-040262] p 1707 N94-21560
Molecular dynamics modeling of the mechanical behavior of metallic multilayers
[DE93-019947] p 1694 N94-21921
Strengthening and toughening in refractory metal alloys
[DE93-019942] p 1695 N94-21986
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008

MECHANICAL SHOCK
U.S. Tag for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock: Minutes of the accredited standards committee on bioacoustics, S3
[AD-A273014] p 1897 N94-21309

MEDICAL ELECTRONICS
Journal of rehebilitation research and development, volume 30, number 1, 1993
[AD-A272956] p 1893 N94-21613

MEDICAL EQUIPMENT
Numerical modeling for an electric-field hyperthermia applicator p 1729 N94-20451

MELT SPINNING
Melt-spin processing of high (Tc) oxide superconductors
[DE94-000696] p 2036 N94-22582

MELTING
Orthopyroxenes as recorders of diogenite petrogenesis: Trace element systematics p 1686 N94-20760
Origin of high-Ti lunar ultramafic glasses
p 1686 N94-20853
Ancient Martian valley genesis and paleoclimatic inference: The present as a key to the past
p 2142 N94-21661
The Martian valley networks: Origin by nivео-fluvial processes p 2146 N94-21682
Modeling of glass fabrication p 1711 N94-21800
The incongruent melting and melt textured solidification process of Bi2Sr2CaCu3O8
[DE93-041123] p 2032 N94-21936
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398

MELTING POINTS
High performance heavy alloys by alloying and process control
[AD-A271129] p 1689 N94-20019
The incongruent melting and melt textured solidification process of Bi2Sr2CaCu3O8
[DE93-041123] p 2032 N94-21936
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024

MELTS (CRYSTAL GROWTH)
Frequency dependent electrical properties of minerals and partial-melts
[DE93-019918] p 2012 N94-19861
Evaporation of a sodium tellurite melt in the jamic low gravity drop shaft p 1713 N94-20605
The incongruent melting and melt textured solidification process of Bi2Sr2CaCu3O8
[DE93-041123] p 2032 N94-21936

MEMBRANE STRUCTURES
Electrochemical synthesis of ultrathin film composite membranes
[AD-A272721] p 1681 N94-21168

MEMBRANES
Lateral distribution of lipids in membranes at high pressure
[AD-A271183] p 1700 N94-20299
High temperature size selective membranes
[DE93-019865] p 1709 N94-21982

MEMORY
Research, Development, Training, and Evaluation (RDTE) support delivery order 1: Computational cognitive models
[AD-A271837] p 1894 N94-20610

MEMORY (COMPUTERS)
A novel method for characterizing the electrical Priorities of lead Zirconate Titanate (PZT) ferroelectric films and memory devices
[AD-A270463] p 2013 N94-19966
A methodology for formal hardware verification, with application to microprocessors
[AD-A270550] p 1898 N94-20085
Mint tutorial and user manual
[TR-452] p 1905 N94-20143
Memory contention in scalable cache-coherent multiprocessors
[TR-448] p 1929 N94-20144
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
DISCERN: A distributed neural network model of script processing and memory p 1941 N94-20255
Optoelectronic associative memory
[NASA-CASE-NPO-18278-1-CU] p 1985 N94-20303
M-dimensional computer memory with M-1 dimensional hyperplane access
[AD-D015960] p 1898 N94-20357
Measuring the effects of thread placement on the Kendall Square KSR1
[DE93-040655] p 1908 N94-20932
Avoiding and tolerating latency in large-scale next-generation shared-memory multiprocessors
p 1753 N94-21081
Test results for SEU and SEL immune memory circuits
p 1754 N94-21087
An ASIC memory buffer controller for a high speed disk system p 1754 N94-21089
A CAM-based LZ data compression IC
p 1759 N94-21129
The effects of block size on the performance of coherent caches in shared-memory multiprocessors
[AD-A272638] p 1899 N94-21177
Fast mutual exclusion, even with contention
[AD-A272947] p 1912 N94-21227
Software coherence in multiprocessor memory systems
[NASA-CR-194696] p 1931 N94-21272
High dimension action spaces in robot skill learning
[TR-458] p 1945 N94-21317
A simple modern correctness condition for a space-based high-performance multiprocessor
p 1766 N94-21718
Detection of feed-through faults in CMOS storage elements p 1766 N94-21721
A novel cache mechanism p 1767 N94-21730
A set-associative, fault-tolerant cache design
p 1768 N94-21731
The quantum structure of matter grand challenge project: Large-scale 3-D solutions in relativistic quantum dynamics
[DE94-000328] p 1960 N94-21955
The design of linear algebra libraries for high performance computers
[DE93-040458] p 1960 N94-21967
Efficient communication primitives on mesh architectures with hardware routing
[DE93-018791] p 1936 N94-22032
Reverse automatic differentiation of modular FORTRAN programs
[DE94-000336] p 1918 N94-22088
Crystal ball gazing p 1925 N94-22477

MENTAL HEALTH
Incongruity, incongruity resolution, and mental states: The measure and modification of situational awareness and control
[NASA-CR-194568] p 1893 N94-20168

MENTAL PERFORMANCE
Development of the UTC-PAB normative database
[AD-A271319] p 1683 N94-20023
Incongruity, incongruity resolution, and mental states: The measure and modification of situational awareness and control
[NASA-CR-194568] p 1893 N94-20168
Cognition and the brain: A continuation of the university research initiative at New York University
[AD-A271872] p 1894 N94-20467
Compatibility evaluation and research on the Computerized Adaptive Screening Test (CAST): User and programmer's guide
[AD-A273112] p 1894 N94-21510

MERCURY CADMIUM TELLURIDES
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835
The quantum efficiency of HgCdTe photodiodes in relation to the direction of illumination and to their geometry p 1735 N94-20512
IR materials producibility
[AD-A273031] p 1987 N94-21321

MERCURY COMPOUNDS
X ray analysis of alpha mercuric iodide crystal structure and processing effects
[DE93-017620] p 2027 N94-21296

MERCURY LAMPS
Process to fabricate thick coplanar microwave electrode structures
[AD-D015913] p 1748 N94-19892

MERCURY TELLURIDES
Characterization of convection related defects in II-VI compound semiconductors
[NASA-CR-194704] p 2030 N94-21778

MERGING ROUTINES
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549

MERIDIONAL FLOW
Empirical wind model for the middle and lower atmosphere. Part 2: Local time variations
[NASA-TM-104592] p 1870 N94-21862

MERRITT ISLAND (FL)
An in-depth analysis and modelling of the Shuttle to MILA S-band telemetry link p 1657 N94-21340

MESAS
Geologic mapping of Harmakhis and Reull Valles region, Mars: Evidence for multiple resurfacing and drainage events p 1844 N94-20705

MESOMETEOROLOGY
Clouds: Their prediction and simulation
[AD-A271161] p 1864 N94-19900
Incorporation and comparative evaluation of a non-convective cloud parameterization scheme in the Naval Research Laboratory west coast mesoscale weather prediction model
[AD-A272417] p 1867 N94-21146
Mesoscale simulations of the November 25-26 and December 5-6 cirrus cases using the RAMS model
p 1878 N94-22331
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study
p 1879 N94-22335

MESONS
Measurement of the B(+) and B(0) lifetimes
[DE93-019906] p 1969 N94-19814
The cross section for the production of b(bar-b) pairs in p(bar p) collisions at the square root of s equals 1.8 TeV
[DE93-019900] p 1972 N94-20225
Recent results on top, bottom and exotic physics at the Tevatron
[DE94-000578] p 1975 N94-21786

Measurement of the B meson and b quark cross-section in (-p)p collisions at the square root of s = 1.8 TeV using the exclusive decays B(+) and B(exp 0) yields J/psiK*(exp 0)
[DE93-019907] p 1975 N94-21806

MESOSCALE PHENOMENA
Clouds: Their prediction and simulation
[AD-A271161] p 1864 N94-19900
Incorporation and comparative evaluation of a non-convective cloud parameterization scheme in the Naval Research Laboratory west coast mesoscale weather prediction model
[AD-A272417] p 1867 N94-21146
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222
Development and tests of a cloud physics parameterization for real-time aviation and public numerical weather forecasting
[PB93-202711] p 1868 N94-21427
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302
Analysis of the GOES 6.7 micrometer channel observations during FIRE 2 p 1875 N94-22316
Three dimensional modeling of cirrus during the 1991 FIRE IFO 2: Detailed process study p 1877 N94-22327
Cirrus cloud development in a mobile upper tropospheric trough: The November 26th FIRE cirrus case study p 1878 N94-22329
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study p 1879 N94-22335
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384

MESOSPHERE
Measurement of mesospheric turbulence in the framework of the metal campaign and development of a sensor for static pressure free measurements of neutral and electron density
[BONN-IR-92-45] p 1857 N94-21149

MESSAGE PROCESSING
ATC/pilot voice communications: A survey of the literature
[DOT/FAA/AM-93/20] p 1738 N94-21201
Using manufacturing message specification for monitor and control at Venus p 1932 N94-21333
Developing a space network interface simulator: The NTS approach p 1933 N94-21343
A self-defining hierarchical data system p 2046 N94-22448
The Keck Task Library (KTL) p 2048 N94-22504

MESSAGES
Ground wave emergency network. Final operational capability. Environmental assessment for south central Montana relay node, site no. RN8C925MT
[AD-A267795] p 1716 N94-19964
The data acquisition system for the Anglo-Australian Observatory 2-degree field project p 2048 N94-22529

METAL AIR BATTERIES
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885

METAL BONDING
Cratering evaluations and results
[DE93-040347] p 1691 N94-20478
Transferable tight-binding parameters: An application to Ni and Ni-Al alloys
[DE94-001044] p 1695 N94-22023
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025
Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000665] p 1697 N94-22571

METAL CLUSTERS
Neutral copper cluster sputtering yields: Ne(+), Ar(+) and Xe(+) bombardment
[DE93-019010] p 1690 N94-20288

METAL COATINGS
Silver lined ceramic vessel
[AD-D015917] p 1700 N94-20057
Field emitter array RF amplifier development project, phase 1, option 1
[AD-A272567] p 1740 N94-21361

METAL FATIGUE
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624
A high temperature fatigue life prediction computer code based on the total strain version of StrainRange Partitioning (SRP) p 1835 N94-22620

METAL FILMS
The Coulomb anomaly in strongly disordered films
[AD-A271095] p 2012 N94-19849
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
Magnetic circular dichroism in x ray absorption and core-level photoemission
[DE93-019381] p 1688 N94-19986
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
The metallic bond for monolayer transition metal layers on transition metal surfaces
[DE93-019060] p 1691 N94-20313
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
Growth, characterization and device development in monocrystalline diamond films
[AD-A272715] p 2026 N94-21190
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024

METAL FLUORIDES
Optical properties of chromium and neodymium in zirconium - barium - lanthanum - aluminum fluoride glass
[AD-A271609] p 1987 N94-21236

METAL HYDRIDES
Current status of environmental, health, and safety issues of nickel metal-hydride batteries for electric vehicles
[DE93-017079] p 1748 N94-19902
High-power gas switch with hydride electrodes
[AD-D015956] p 1751 N94-20354

METAL IONS
Formation of colloidal Ag precipitates in fused silica by MeV ion implantation
[DE93-040268] p 2012 N94-19869
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373
Shattering the myth of the resonantly photo-pumped neon-like titanium laser
[DE93-019624] p 1819 N94-21873
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998
Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides
[DE93-040600] p 1697 N94-22559

METAL MATRIX COMPOSITES
The Seventh International Conference on Composite Structures, volume 25, numbers 1-4
[AD-A269961] p 1672 N94-20031
Metal-glass composite field-emitting arrays
[AD-D015942] p 1673 N94-20064
Strengthening of NiAl matrix composites
[AD-A271491] p 1674 N94-20550
Strength and toughness improvement of silicide intermetallics by nanophase and microphase reinforcements
[AD-A272914] p 1692 N94-21320
Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618

METAL NITRIDES
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973

METAL OXIDE SEMICONDUCTORS
Modeling failure and reliability in new-generation devices
[AD-A271150] p 1748 N94-19910
Simple method to estimate MOS oxide-trap, interface-trap, and border-trap densities
[DE93-041138] p 2032 N94-21939

METAL PARTICLES
Preliminary AEM study of the microstructure and composition of metal particles in ordinary chondrites p 2086 N94-20894

METAL PLATES
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19987
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields
[AD-A272123] p 1831 N94-20572
A simplified method for S-parameter calculations of metal septum waveguide filters p 1782 N94-22180

METAL POWDER
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926
Shock response of porous Al-2 + Fe2O3 powder mixtures
[DE93-018851] p 1688 N94-19944
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394

METAL PROPELLANTS
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments
[NASA-TM-106439] p 1713 N94-21760

METAL SURFACES
Segregation of Si to the surface of Fe-29Ni-17Co alloy
[DE93-040053] p 1687 N94-19864
The metallic bond for monolayer transition metal layers on transition metal surfaces
[DE93-019060] p 1691 N94-20313
In-situ electrochemical surface science
[AD-A265942] p 1680 N94-20330
Surface electrochemistry of metals
[AD-A272913] p 1691 N94-21245
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451
Laser Raman and x ray scattering studies of corrosion films on metals
[DE93-040243] p 1692 N94-21558
Inelastic electron scattering from surfaces
[DE94-001738] p 1977 N94-22049

METAL VAPOR LASERS
Computational model of a magnetic modulator for copper lasers
[DE93-019603] p 1815 N94-20223
High-power copper vapor lasers and their application to precision drilling and cutting
[DE93-019951] p 1819 N94-21844

METAL VAPORS
Impact of copper vapour contamination on argon arcs p 1994 N94-21053

METAL-GAS SYSTEMS
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027

METALLIZING
Adhesive electroless metallization of fluoropolymeric substrates
[AD-A271858] p 1703 N94-20526
Diagnostics and methods for real-time laser microchemistry
[AD-A270871] p 1680 N94-20566
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575

METALLOGRAPHY
Investigation of cracking and erratic behavior of the uranium-titanium alloy
[DE93-018591] p 1688 N94-19957

METALLURGY
The use of backscattered electron imaging mode to assess the effect of fine dispersions on development of superplastic microstructure in Al-Mg alloys
[AD-A272426] p 1691 N94-21258

METALORGANIC CHEMICAL VAPOR DEPOSITION
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Common Themes and Mechanisms of Epitaxial Growth, volume 312 --- Materials Research Society symposium proceedings
[AD-A270513] p 2013 N94-19967
Alumoxanes: Rationalization of black box materials
[AD-A272805] p 1704 N94-21170
The n-p(p(+))-n Al(yGa)(1-y) As-GaAs-In(x)Ga(1-x) as quantum well laser with p(+)-n(+)GaAs-InGaAs tunnel contact on n GaAs
[AD-A271292] p 2030 N94-21805
MOCVD growth and structure of PbTiO3 thin films
[DE93-040230] p 2033 N94-21994

METALS
General introduction to microstructural evolution under cascade damage conditions
[DE93-017443] p 2012 N94-19923
Lewis Cliff 87057: A new metal-rich E3 chondrite with similarities to Mt. Egerton, Shallowater and Happy Canyon p 2086 N94-20901
Utilization of metals to improve the lubrication of ceramic load-bearing devices
[PB93-202448] p 1825 N94-21424
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388

METAMORPHISM (GEOLOGY)
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660

Orthopyroxenes as recorders of diogenite petrogenesis: Major and minor element systematics
p 1684 N94-20670
Lamellar olivine in the Divnoe achondrite: Evidence for high-pressure exsolution? p 1685 N94-20679
Chaunskij: The most highly metamorphosed, shock-modified and metal-rich mesosiderite
p 2082 N94-20681
Post-igneous redistribution of components in eucrites
p 1685 N94-20684
Micrometeorite dynamic pyrometamorphism: Nonstoichiometric clinoenstatite (CLEN)
p 2083 N94-20715
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Post-metamorphic brecciation in type 3 ordinary chondrites p 2083 N94-20749
Petrography of shock features in the 1953 Manson 2-A drill core p 1862 N94-20767
FE-60 and the evolution of eucrites
p 2083 N94-20768
Fine resolution chronology based on initial Sr-87/Sr-86
[CONTRIB-5230(794)] p 1686 N94-20794
Original size of the Vredefort structure, South Africa
p 1863 N94-20825
Shock attenuation at the Slate Islands revisited
p 1863 N94-20887
Chemical composition of new Acapulcoites and Lodranites p 2086 N94-20905

METASTABLE STATE

A microscopic theory of quantum optics and new photon-locked bistable states
[AD-A271250] p 1983 N94-19901
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
Phonons and metastability in compressed nitrogen
[DE93-019913] p 2016 N94-20318
Theoretical investigations of metastability and energy storage in molecular systems
[AD-A271849] p 1973 N94-20612
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800
Reliable interface design for combining asynchronous and synchronous circuits p 1758 N94-21119
Electronically metastable molecules of high symmetry
[AD-A272015] p 1974 N94-21461
Polymeric nitrogen
[DE93-040544] p 1706 N94-21512

METATHESIS

Rotational isomers of Mo(VI) alkylidene complexes and Cis/trans polymer structure: Investigations in ring-opening metathesis polymerization
[AD-A272647] p 1704 N94-21184
Photochemical approaches to conversion of light to electricity or fuel
[DE94-001650] p 1849 N94-22048

METEORITE COLLISIONS

Impact glasses from the ultrafine fraction of lunar soils
p 2097 N94-20662
Global blackout following the K/T Chicxulub impact: Results of impact and atmospheric modeling
p 1854 N94-20698
Impact disturbance of the Venus atmosphere
p 2106 N94-20709
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Chicxulub impact basin: Gravity characteristics and implications for basin morphology and deep structure
p 1862 N94-20757
Chronology of lunar granite 12033,576: Resetting of Rb-Sr and K-Ca isochrons p 2115 N94-20763
Multivariate statistical analysis: Principles and applications to coorbital streams of meteorite falls
p 1964 N94-20881
LREE variability in CM matrices: Another look at meteorite compaction ages p 2086 N94-20884
Geometrical analysis of the microcraters found on LDEF samples p 1666 N94-20890

METEORITE CRATERS

Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Structural evidence for reorientation of Miranda about a paleo-pole p 2098 N94-20671
U-Pb provenance ages of shocked zircons from the K-T boundary, Raton Basin, Colorado p 1685 N94-20701
The Manson impact crater: Estimation of the energy of formation, possible size of the impacting asteroid or comet, and ejecta volume and mass
p 2083 N94-20721
Preliminary estimation of tagamite cooling conditions (Puchezh-Katunki Astrobleme, Russia)
p 2083 N94-20735
Searching for ancient Venus p 2111 N94-20743
Chicxulub impact basin: Gravity characteristics and implications for basin morphology and deep structure
p 1862 N94-20757
Research program on the Manson impact structure, Iowa p 1862 N94-20766
A tectonic resurfacing model for Venus
p 2118 N94-20781
The missing impact craters on Venus
p 2119 N94-20782
Delimitation of terrestrial impact craters by way of pseudotachylytic rock distribution p 1863 N94-20783
Two-polarity magnetization in the Manson impact breccia p 1863 N94-20789
The age of the Pretoria Saltpan impact crater, South Africa p 1863 N94-20798
Parabolic features and the erosion rate on Venus
p 2122 N94-20801
Triton's cratering record and its time of capture
p 2122 N94-20802
Multivariate statistical analysis: Principles and applications to coorbital streams of meteorite falls
p 1964 N94-20881
Shock attenuation at the Slate Islands revisited
p 1863 N94-20887
Geometrical analysis of the microcraters found on LDEF samples p 1666 N94-20890
Age and thermochronology of K-feldspars from the Manson Impact Structure p 1863 N94-20899

METEORITES

Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars
p 2082 N94-20648
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Lunar basalt meteorite EET 87521: Petrology of the clast population p 2083 N94-20752
Molecular equilibria and condensation sequences in carbon rich gases p 2083 N94-20756
Fine resolution chronology based on initial Sr-87/Sr-86
[CONTRIB-5230(794)] p 1686 N94-20794
Ti-bearing oxide minerals in lunar meteorite Y793169 with the VLT affinity p 2084 N94-20812
Sparking young minds with Moon rocks and meteorites p 2039 N94-20819
The parent magma of the Nakhla (SNC) meteorite: Reconciliation of composition estimates from magmatic inclusions and element partitioning
p 2085 N94-20836
On modelling nuclear reactions in meteorites
p 2085 N94-20844
Aluminum-26 activities in meteorites
p 1686 N94-20851
LREE variability in CM matrices: Another look at meteorite compaction ages p 2086 N94-20884
Consortium reports on lunar meteorites Yamato 793169 and Asuka 881757, a new type of mare basalt
p 2086 N94-20893
Wet inside and out? Constraints on water in the Martian mantle and on outgassed water, based on melt inclusions in SNC meteorites p 2145 N94-21678

METEORITIC COMPOSITION

Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
REE and other trace lithophiles in MAC88177, LEW88280 and LEW88763 p 2082 N94-20639
The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640
Carbonaceous xenoliths from the Erevan howardite
p 1684 N94-20642
Igneous rock from Severnyi Kolchim (H3) chondrite: Nebular origin p 2082 N94-20643
Core formation in the Moon: The mystery of the excess depletion of Mo, W and P p 2095 N94-20651
Exposure ages of carbonaceous chondrites, 1
p 2082 N94-20658
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging
p 2082 N94-20659
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon
p 2096 N94-20660
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe
p 2097 N94-20661
Impact glasses from the ultrafine fraction of lunar soils
p 2097 N94-20662
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution
p 2097 N94-20663
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating
p 1684 N94-20667
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Self diffusion of alkaline-Earth in Ca-Mg-aluminosilicate melts: Experimental improvements on the determination of the self-diffusion coefficients p 1684 N94-20669
Orthopyroxenes as recorders of diogenite petrogenesis: Major and minor element systematics
p 1684 N94-20670
Abundance and composition of solar KR in the H3-H6 chondrite ACFER111 p 1684 N94-20676
C/O atomic ratios in micrometer-size crushed grains from Antarctic micrometeorites and two carbonaceous meteorites p 2082 N94-20678
Lamellar olivine in the Divnoe achondrite: Evidence for high-pressure exsolution? p 1685 N94-20679
Opaque-rich lithology in the Divnoe achondrite: Petrology and origin p 2082 N94-20680
Chaunskij: The most highly metamorphosed, shock-modified and metal-rich mesosiderite
p 2082 N94-20681
Post-igneous redistribution of components in eucrites
p 1685 N94-20684
Elevated initial Sr-87/Sr-86 in ordinary chondrite metal
p 1685 N94-20695
Elemental depletions in Antarctic micrometeorites and Arctic cosmic spherules: Comparison and relationships
p 2082 N94-20704
Oxygen isotopic relationships between the LEW85332 carbonaceous chondrite and CR chondrites
p 2083 N94-20708
SCR neon and argon in Kapoeta feldspar: Evidence for an active ancient Sun p 2106 N94-20712
Cosmogenic-radionuclide profiles in Knyahinya: New measurements and models p 2106 N94-20713
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Further analyses of Rio Cuarto impact glass
p 1685 N94-20745
Post-metamorphic brecciation in type 3 ordinary chondrites p 2083 N94-20749
Cathodoluminescence observations of in situ aqueous destruction of chondrules in the Murchison CM chondrite
p 2083 N94-20750
Lunar basalt meteorite EET 87521: Petrology of the clast population p 2083 N94-20752
Orthopyroxenes as recorders of diogenite petrogenesis: Trace element systematics p 1686 N94-20760
The chondrite Mihonoseki: New observed fall
p 2083 N94-20764
FE-60 and the evolution of eucrites
p 2083 N94-20768
Size distributions and aerodynamic equivalence of metal chondrules and silicate chondrules in Acfer 059
p 2084 N94-20773
Fe/Mn in olivine of carbonaceous meteorites
p 2084 N94-20788
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
[CONTRIB-5241(804)] p 2084 N94-20795
Hydrothermal alteration experiments of olivine with varying Fe contents: An attempt to simulate aqueous alteration of the carbonaceous chondrites
p 1686 N94-20810
Ti-bearing oxide minerals in lunar meteorite Y793169 with the VLT affinity p 2084 N94-20812
The U-Th-Pb, Sm-Nd, and Ar-Ar isotopic systematics of lunar meteorite Yamato-793169 p 2084 N94-20834
The parent magma of the Nakhla (SNC) meteorite: Reconciliation of composition estimates from magmatic inclusions and element partitioning
p 2085 N94-20836
Rare Earth elements in individual minerals in Shergottites p 1686 N94-20852
Rhenium-osmium isotope systematics of ordinary chondrites and iron meteorites p 2085 N94-20854
Consortium study of lunar meteorites Yamato-793169 and Asuka-881757: Geochemical evidence of mutual similarity, and dissimilarity versus other mare basalts
p 2085 N94-20857
Equilibrium and fractional crystallization of a primitive Shergottite composition p 2085 N94-20861
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20866

Weathering features and secondary minerals in Antarctic Shergottites ALHA77005 and LEW88516
p 2086 N94-20869
LREE variability in CM matrices: Another look at meteorite compaction ages p 2086 N94-20884
The carbon components in SNC meteorites of feldspathic harzburgite composition
p 2086 N94-20885
Further carbon isotope measurements of LEW 88516
p 2086 N94-20886
Regolith breccia consisting of H and LL chondrite mixture p 2080 N94-20892
Consortium reports on lunar meteorites Yamato 793169 and Asuka 881757, a new type of mare basalt
p 2086 N94-20893
Preliminary AEM study of the microstructure and composition of metal particles in ordinary chondrites
p 2086 N94-20894
Trace element compositions of spinel-rich refractory inclusions from the Murchison meteorite
p 2086 N94-20897
Inter- and intra-crystalline oxygen isotope distribution of fassaites in Allende CAI p 2086 N94-20898
Lewis Cliff 87057: A new metal-rich E3 chondrite with similarities to Mt. Egerton, Shallowater and Happy Canyon p 2086 N94-20901
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite . p 2086 N94-20902
Chemical composition of new Acapulcoites and Lodranites p 2086 N94-20905
Diffuse reflectance spectra of orthopyroxene, olivine, and plagioclase as a function of composition and structure p 2087 N94-20906
Mineralogy of dark clasts in primitive versus differentiated meteorites p 2087 N94-20907
Wet inside and out? Constraints on water in the Martian mantle and on outgassed water, based on melt inclusions in SNC meteorites p 2145 N94-21678

METEORITIC DAMAGE
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface
p 2082 N94-20647
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars
p 2082 N94-20648
Dynamics of large scale impacts on Venus and Earth
p 2098 N94-20666
The missing impact craters on Venus
p 2119 N94-20782
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864
Large floor-fractured craters and isostatic crater modification: Implications for lithospheric thickness on Venus p 2135 N94-20873
Multivariate statistical analysis: Principles and applications to coorbital streams of meteorite falls
p 1964 N94-20881
Geometrical analysis of the microcraters found on LDEF samples p 1666 N94-20890
Meteoroids and debris impact risk assessment on Columbus and Hermes using a realistic geometrical analysis tool p 1662 N94-21388
Combination of on ground experiments and analysis software for the evaluation of material degradation in space (SILEX project) p 1662 N94-21389
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668

METEORITIC DIAMONDS
Micrometeorite pre-solar diamonds from Greenland cryoconite? p 2086 N94-20895

METEORITIC MICROSTRUCTURES
Coagulation of grains in static and collapsing protostellar clouds p 2085 N94-20865
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20866
Preliminary AEM study of the microstructure and composition of metal particles in ordinary chondrites
p 2086 N94-20894
Micrometeorite pre-solar diamonds from Greenland cryoconite? p 2086 N94-20895
Diffuse reflectance spectra of orthopyroxene, olivine, and plagioclase as a function of composition and structure p 2087 N94-20906

METEOROID PROTECTION
Meteoroids and debris impact risk assessment on Columbus and Hermes using a realistic geometrical analysis tool p 1662 N94-21388

METEOROID SHOWERS
High Frequency (HF) and meteor burst communications in a polar environment
[AD-A271604] p 1737 N94-20949

METEOROIDS
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
Meteoroids and debris impact risk assessment on Columbus and Hermes using a realistic geometrical analysis tool p 1662 N94-21388

METEOROLOGICAL CHARTS
An analysis of cloud-cover reporting in the 1977 surface observation database
[AD-A271102] p 1864 N94-19852

METEOROLOGICAL PARAMETERS
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186
Simulated retrieval of land surface parameters using multichannel satellite microwave radiometry
p 1727 N94-20443
Weather tutor 1: Stability basics
[AD-A270758] p 1866 N94-20565
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
A parametric representation of a thunderstorm cell
[AD-A271983] p 1866 N94-20579
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
NOVAM evaluation utilizing electro-optics and meteorological data from KEY-90
[AD-A271722] p 1868 N94-21356
Low-power millimeter-wave radar observations of the atmosphere
[NASA-CR-194738] p 1858 N94-21811
Design document and database specifications for the Naval Interactive Data Analysis System (NIDAS), version 1.0
[NASA-CR-194817] p 2045 N94-21865
The FIRE Cirrus Science Results 1993
[NASA-CP-3238] p 1871 N94-22292
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2
p 1874 N94-22312
Cirrus cloud development in a mobile upper tropospheric trough: The November 26th FIRE cirrus case study
p 1878 N94-22329
Studies in remotely sensed geophysical parameter retrieval and analysis
[NASA-CR-194768] p 1842 N94-22374

METEOROLOGICAL RADAR
Description and availability of airborne Doppler radar data p 1722 N94-20419
Next Generation Weather Radar (NEXRAD) Principal User Processor (PUP) Operational Test and Evaluation (OT/E)
[AD-A273075] p 1868 N94-21519
Microphysical properties of the November 26 cirrus cloud retrieved by Doppler radar/IR radiometer technique
p 1873 N94-22304
Lidar and radar derived cirrus microphysical properties for the 26 November 1991 case study
p 1873 N94-22305
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties
p 1874 N94-22308
Observations of multi-layered clouds using K-band radar p 1874 N94-22311

METEOROLOGICAL SATELLITES
The future of remote sensing from space: Civilian satellite systems and applications
[OTA-ISC-558] p 1837 N94-20209
Comparison of radiation and cloud parameters derived from satellite and aircraft measurements during FIRE 2 cirrus IFO p 1872 N94-22299
Managing an archive of weather satellite images
p 2048 N94-22525

METEOROLOGICAL SERVICES
Next Generation Weather Radar (NEXRAD) Principal User Processor (PUP) Operational Test and Evaluation (OT/E)
[AD-A273075] p 1868 N94-21519
Meteorological analysis of the November 25 FIRE cirrus-2 case: A well-defined ridge-crest cirrus system over Oklahoma p 1877 N94-22328

METEOROLOGY
Worldwide frequency of temperatures at selected altitudes
[AD-A271111] p 1864 N94-19908
Hydrostatic/nonhydrostatic comparison with the MERCURE code on orographic flows
[ETN-93-94603] p 1866 N94-20600
Measurement of mesospheric turbulence in the framework of the metal campaign and development of a sensor for static pressure free measurements of neutral and electron density
[BONN-IR-92-45] p 1857 N94-21149
Analysis of a sandstorm weather process-translation
[AD-A272959] p 1867 N94-21250
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth
p 2143 N94-21667
Role of surface characteristics in urban meteorology and air quality
[DE93-040929] p 1851 N94-21740
Meteorological analysis of the December 4-6 FIRE cirrus-2 case p 1875 N94-22314
Meteorological analysis of the November 25 FIRE cirrus-2 case: A well-defined ridge-crest cirrus system over Oklahoma p 1877 N94-22328

METHANE
Transient studies of low temperature catalysts for methane conversion
[DE93-041232] p 1680 N94-20934
Molten carbonate fuel cell networks: Principles, analysis, and performance
[DE93-019872] p 1846 N94-21527
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258

METHOD OF CHARACTERISTICS
Characteristic based methods for the time-domain Maxwell equations
[AD-A272973] p 1802 N94-21263

METHOD OF MOMENTS
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917
An extended UTD analysis for the scattering and diffraction from cubic polynomial strips
[NASA-CR-194581] p 1716 N94-20139
Polarimetric thermal emission from rough surfaces
p 1727 N94-20441
Comparison of higher order moment spectrum estimation techniques
[AD-A272967] p 1967 N94-21260
A modified moment invariants technique for classification of noisy objects p 1780 N94-22165
Modelling short bent, graded index dielectric slab waveguides
[PB93-215283] p 1742 N94-22349

METHYL ALCOHOL
Fuel processing requirements and techniques for fuel cell propulsion power
[DE93-019516] p 1750 N94-20257
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597] p 1826 N94-22093

METHYL COMPOUNDS
Polymerization of enantiomerically pure 2,3-dicarboalkoxy norbornadienes and 5,6-disubstituted norbornenes by well-characterized molybdenum ROMP catalysts
[AD-A272649] p 1704 N94-21186
Surface science and modeling studies of endothermic fuels catalysis
[AD-A272850] p 1712 N94-21192
The 13C-NMR spectra of poly (4-((2-(acryloyloxy) ethyl) ethyl amino)- 4-nitroazobenzene-co-methyl methacrylate)
[AD-A273016] p 1705 N94-21238

METRIC SPACE
Half-integral flows in a planar graph with four holes
[RR-894-M] p 1951 N94-20302
Modular interval spaces
[PB93-220663] p 1961 N94-22266

METROLOGY
Evaluation of a scanning Hartmann device for single point turning applications
[DE93-019204] p 1821 N94-19891
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584

MICHELSON INTERFEROMETERS
Fiber optic Michelson sensor and arrays with passive elimination of polarization fading and source feedback isolation
[AD-D015944] p 1984 N94-20065
Thermal dilation fiber optical flow sensor
[AD-D015926] p 1797 N94-20094
Validation of the design of a high resolution all-reflection Michelson interferometer for atmospheric spectroscopy
[AD-A272505] p 1987 N94-21410
Mirror velocity sampling errors in a Michelson interferometer
[AD-A273105] p 1809 N94-21508
Michelson Interferometer (MINT)
p 1813 N94-21646

MICROANALYSIS
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904

Microanalysis of iron oxidation state in iron oxides using X Ray Absorption Near Edge Structure (XANES)
p 1686 N94-20808
Micro-ellipsometric measurements of strained layer structures p 2025 N94-21008

MICROBALANCES
Atomic oxygen fluence detector for Bremsat: Scientific and technical description p 1663 N94-21396
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691

MICROCHANNELS
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770

MICROCLIMATOLOGY
Cold-start minidiesel engine development
[AD-A271064] p 1823 N94-20567

MICROCRYSTALS
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615

MICROELECTRONICS
Solder technology in the manufacturing of electronic products
[DE93-018842] p 1699 N94-19960
Automated HMC assembly
[DE93-040841] p 1749 N94-20005
The aerogel mesh contamination collector
[AD-A270537] p 1651 N94-20011
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Method for anisotropic etching in the manufacture of semiconductor devices
[NASA-CASE-MSC-21631-1] p 1993 N94-20491
Materials, Structures, and Devices for High-Speed Electronics
[NASA-CR-193177] p 2019 N94-20971
X ray reflection masks: Manufacturing, characterization and first tests
[BONN-IR-92-31] p 1986 N94-21043
Comparison of single event upset rates for microelectronic memory devices during interplanetary solar particle events p 1754 N94-21085
Single event phenomena: Testing and prediction
p 1763 N94-21696
Self assembly: An approach to terascale integration
[DE93-040104] p 1769 N94-21846
Microtechnology: The key to the technical challenges of the 21st century
[DE94-000403] p 1769 N94-21959
Fluorescent microthermographic imaging
[DE93-040332] p 1810 N94-22000
Acoustic, fiber optic, and silicon microelectronic microsensors research and development activities at Sandia National Laboratories
[DE93-019075] p 1770 N94-22040
Silicon microelectronic field-emissive devices for advanced display technology
[DE94-000397] p 1794 N94-22380

MICROGRAVITY
Stability limits and dynamics of nonaxisymmetric liquid bridges
[NASA-CR-194706] p 1797 N94-20037
Growth of zinc selenide single crystals by physical vapor transport in microgravity
[NASA-CR-194679] p 2017 N94-20346
Evaporation of a sodium tellurite melt in the jamic low gravity drop shaft p 1713 N94-20605
Loads produced by a suited subject performing tool tasks without the use of foot restraints
[NASA-TP-3424] p 1896 N94-20606
Experimental study of void formation during aluminum solidification in reduced gravity
[NASA-TM-106190] p 1692 N94-21604
Strength capabilities and load requirements while performing torquing tasks in zero gravity
[NASA-TP-3433] p 1897 N94-21627
Rewetting of monogroove heat pipe in Space Station radiators
[NASA-CR-194781] p 1804 N94-21820

MICROGRAVITY APPLICATIONS
Cooling apparatus and couplings therefor
[NASA-CASE-ARC-11921-1] p 1800 N94-20371

MICROHARDNESS
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926

MICROMACHINING
Micromachined actuator and sensor capabilities at the Microelectronics Development Laboratory
[DE93-019417] p 1769 N94-21918

MICROMECHANICS
Biotechnology and composite materials
[AD-A264278] p 1673 N94-20327
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575
Thermal stress analysis of composites in the space environment p 1661 N94-21379

MICROMETEORITES
C/O atomic ratios in micrometer-size crushed grains from Antarctic micrometeorites and two carbonaceous meteorites p 2082 N94-20678
Elemental depletions in Antarctic micrometeorites and Arctic cosmic spherules: Comparison and relationships
p 2082 N94-20704
Micrometeorite dynamic pyrometamorphism: Nonstoichiometric clinoenstatite (CLEN)
p 2083 N94-20715
Micrometeorite dynamic pyrometamorphism: Observation of a thermal gradient in iron-nickel sulfide
p 2083 N94-20716
Micrometeorite pre-solar diamonds from Greenland cryoconite? p 2086 N94-20895

MICROMETEOROIDS
Determination of parameters for hypervelocity dust grains encountered in near-Earth space
p 2084 N94-20817
Intact capture of hypervelocity particles on Shuttle
p 2085 N94-20837
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864
Geometrical analysis of the microcraters found on LDEF samples p 1666 N94-20890
On dust emissions from the jovian system
p 2141 N94-20909
Orbital debris and micrometeoroids: LDEF and Mir data p 1659 N94-21368
Combination of on ground experiments and analysis software for the evaluation of material degradation in space (SILEX project) p 1662 N94-21389

MICROMOTORS
Lavet type stepping motors and associated controls
p 1752 N94-20632

MICROPOROSITY
High temperature size selective membranes
[DE93-019865] p 1709 N94-21982

MICROPROCESSORS
A methodology for formal hardware verification, with application to microprocessors
[AD-A270550] p 1698 N94-20085
Mongoose: Creation of a Rad-Hard MIPS R3000
p 1754 N94-21090
Network command processing system overview
p 1935 N94-21351
A 20 MHz CMOS reorder buffer for a superscalar microprocessor p 1764 N94-21700
A mechanized process algebra for verification of device synchronization protocols p 1766 N94-21716
Instruction set commutivity p 1766 N94-21719
IRAF and STSDAS under the new ALPHA architecture
p 2049 N94-22553

MICROSCOPY
Acoustic microscopy and nonlinear effects in pressurized superfluid helium
[AD-A270598] p 1967 N94-19949
Atom probe field ion microscopy characterizations of VVER steels
[DE93-017864] p 1689 N94-20180
Ultrafast scanning microscopy
[DE93-040121] p 1985 N94-20320
Variable angle spectroscopic ellipsometric characterization of surface damage in chemical-mechanical polished GaAs
p 1710 N94-20986
Structure and morphology of Pd overlayers on epitaxial SnO2 films studies with the atomic force microscope
[AD-A271827] p 2028 N94-21458
Magnetic force microscopy/current contrast imaging: A new technique for internal current probing of IC's
[DE93-040754] p 1761 N94-21532
Material optimization for hard x ray Fresnel zone plates
[DE93-019569] p 1990 N94-21837
Center for X-Ray Optics, 1992
[DE94-000726] p 1990 N94-21868

MICROSTRIP ANTENNAS
Two microstrip arrays for interferometric SAR applications p 1722 N94-20421
Bandwidth enhancement of dielectric resonator antennas p 1734 N94-20507
A 10 GHz Y-Ba-Cu-O/GaAs hybrid oscillator proximity coupled to a circular microstrip patch antenna
p 1736 N94-20517
Full wave numerical model of arbitrarily-shaped proximity coupled microstrip antennas p 1745 N94-22137
Modeling of coaxial-fed microstrip patch antenna by finite difference time domain method p 1745 N94-22138
Applications of planar near-field measurements to electromagnetic radiation and interference problems
p 1747 N94-22252

MICROSTRIP DEVICES
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids
p 1724 N94-20431
TlCaBaCuO high Tc superconducting microstrip ring resonators designed for 12 GHz p 1735 N94-20516

MICROSTRIP TRANSMISSION LINES
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method
p 1718 N94-20405
Linearly tapered slot antenna circular array for mobile communications
[NASA-TM-106441] p 1769 N94-21808

MICROSTRUCTURE
General introduction to microstructural evolution under cascade damage conditions
[DE93-017443] p 2012 N94-19923
Particles on surfaces of laser ablated Y1Ba2Cu3O(7-delta) films
[DE93-040269] p 2013 N94-19929
Investigation of cracking and erratic behavior of the uranium-titanium alloy
[DE93-018591] p 1686 N94-19957
Microstructural stability of wrought, laser and electron beam glazed NARloy-Z alloy at elevated temperatures
[NASA-TM-108431] p 1689 N94-20100
Atom probe field ion microscopy characterizations of VVER steels
[DE93-017864] p 1689 N94-20180
Sol-spray preparation, particulate characteristics, and sintering of alumina powders
[DE93-018577] p 1690 N94-20183
Microscopic evaluation of low-temperature embrittlement in type 308 stainless steel welds
[DE93-040266] p 1690 N94-20282
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470
The effects of processing and constituent materials on compressive strength of thick composite laminates
[AD-A271912] p 1673 N94-20490
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575
Microstructure evolution in the presence of constraints and implications on the properties of Mg-Li and Nb-Al constraints
[AD-A272088] p 1674 N94-20623
Regolith breccia consisting of H and LL chondrite mixture p 2080 N94-20892
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013
VASE (variable angle spectroscopic ellipsometry)
p 1687 N94-21014
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications
[AD-A272897] p 1704 N94-21197
The use of backscattered electron imaging mode to assess the effect of fine dispersions on development of superplastic microstructure in Al-Mg alloys
[AD-A272426] p 1691 N94-21258
Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines
[AD-A272998] p 1648 N94-21268
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
Deformation of an alumina-zirconia-silicon carbide-whisker reinforced composite
[DE93-040244] p 1676 N94-21559
High resolution, three dimensional soft x ray imaging
[DE93-018667] p 1989 N94-21630
Surface and subsurface defect detection in Si3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772
Ductile-brittle transition behavior of tungsten under shock loading conditions
[DE93-019945] p 1693 N94-21843
Symposium on Microscopy and Image Analysis of Building Materials
[VTT-SYMP-136] p 1707 N94-21890
Preparation of concrete specimens for microstructural image analysis studies p 1707 N94-21891
A quantitative S.E.M. image analysis of cement paste microstructure p 1708 N94-21894
Determination of pore structure of concrete from thin sections by image analysis p 1708 N94-21895
Microstructure in mortar: A summary of a new project of research p 1708 N94-21896

The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo)
[DE93-041320] p 1694 N94-21943
Dynamic properties of ceramic materials
[DE94-000654] p 1708 N94-21963
Microtextural characterization of annealed and deformed copper
[DE93-040144] p 1695 N94-21990
Benefits of thread rolling process to the stress corrosion cracking and fatigue resistance of high strength fasteners
[DE93-040438] p 1833 N94-22001
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates
[DE93-018786] p 1696 N94-22037
Quantitative analysis of scanning tunneling microscopy images for surface structure determination: Sulfur on Re(0001)
[DE93-019235] p 2034 N94-22041
Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides
[DE93-040600] p 1697 N94-22559
Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000665] p 1697 N94-22571

MICROWAVE ANTENNAS
Space applications of superconducting microwave electronics at NASA Lewis Research Center p 1671 N94-20513
AlGaAs laser diode FM spectrum: Phased array antenna application p 1746 N94-22196
Numerical method for computing the electric field produced by a microwave beam in a stratified medium p 1746 N94-22197

MICROWAVE ATTENUATION
Attenuation of epsilon(sub eff) of coplanar waveguide transmission lines on silicon substrates p 1733 N94-20504

MICROWAVE CIRCUITS
Automated HMC assembly
[DE93-040641] p 1749 N94-20005
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
Quartz/fused silica chip carriers
[NASA-CR-194154] p 2016 N94-20340
Recent activities in printed Antennas at LeRC p 1722 N94-20422
Solid State Technology Branch of NASA Lewis Research Center: Fifth Annual Digest
[NASA-TM-106303] p 1732 N94-20497
An x-band peaked HEMT amplifier p 1732 N94-20498
Coplanar waveguide radial line stub p 1733 N94-20503
Space applications of superconducting microwave electronics at NASA Lewis Research Center p 1671 N94-20513
Ten GHz YBa2Cu3O(7-delta) superconducting ring resonators on NdGaO3 substrates p 1735 N94-20515
Non-destructive semiconductor wafer probing system using laser pulses to generate and detect millimeter-wave signals
[CA-PATENT-APPL-SN-2,020,73] p 1760 N94-21178
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
High temperature superconducting planar circuit structure for high frequency applications
[AD-A273083] p 2028 N94-21521
Characterization and modelling of extremely high frequency enclosures p 1782 N94-22177
Non-linear analysis of the electrical properties of the active circuits of high-frequency oscillators p 1785 N94-22195
MHMIC: Technology for the integration of microwave sub-assemblies p 1785 N94-22199

MICROWAVE COUPLING
Aperture coupling of circular cylindrical dielectric resonator antenna
[ISBN-0-315-60632-0] p 1743 N94-22409

MICROWAVE EMISSION
Radiation from solar flares p 2001 N94-22634

MICROWAVE EQUIPMENT
Automated HMC assembly
[DE93-040641] p 1749 N94-20005
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
Three point lead screw positioning apparatus for a cavity tuning plate
[NASA-CASE-LEW-15216-1] p 1822 N94-20375
TlCaBaCuO high Tc superconducting microstrip ring resonators designed for 12 GHz p 1735 N94-20516

MICROWAVE FILTERS
Manual design technique for broadband passive thin-film attenuators using the Smith chart p 1782 N94-22178

MICROWAVE FREQUENCIES
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435

MICROWAVE IMAGERY
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940

MICROWAVE LANDING SYSTEMS
MLS signal-in-space category 3 landing hazard analysis p 1644 N94-22134
Application of scattering by arrays of cylinders to MLS signal propagation error estimation p 1644 N94-22135
Testing of DME/P equipment performance for complex MLS procedures p 1644 N94-22136
MLS pointing angle error sources and effects p 1644 N94-22154
Developing software to RTCA DO-178A p 1645 N94-22155
A flight test system design for the microwave landing system p 1645 N94-22156

MICROWAVE OSCILLATORS
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
A 10 GHz Y-Ba-Cu-O/GaAs hybrid oscillator proximity coupled to a circular microstrip patch antenna p 1736 N94-20517
Improvement of the performance of IMPATT oscillators through appropriate modification of resonant-cap activity p 1782 N94-22179
Non-linear analysis of the electrical properties of the active circuits of high-frequency oscillators p 1785 N94-22195

MICROWAVE RADIOMETERS
Atmospheric infrared sounder
[NASA-CR-194814] p 1856 N94-20362
Simulated retrieval of land surface parameters using multichannel satellite microwave radiometry p 1727 N94-20443
Polarimetric thermal emission from periodic water surfaces p 1728 N94-20445
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482

MICROWAVE RESONANCE
Improvement of the performance of IMPATT oscillators through appropriate modification of resonant-cap activity p 1782 N94-22179

MICROWAVE SCATTERING
Radar backscatter measurements from simulated sea ice during CRRELEX 1990
[AD-A271034] p 1715 N94-19823
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A271911] p 1882 N94-20489
Presenting the Rain-Sea Interaction Facility
[NASA-RP-1322] p 1884 N94-21628
Application of scattering by arrays of cylinders to MLS signal propagation error estimation p 1644 N94-22135
A simplified method for S-parameter calculations of metal septum waveguide filters p 1782 N94-22180

MICROWAVE SENSORS
Synergism of active and passive microwave data for estimating bare surface soil moisture p 1727 N94-20444

MICROWAVE SPECTRA
On the relationship between spectral domain approach and method of lines p 1794 N94-22254

MICROWAVE SPECTROMETERS
Temperature/pressure and water vapor sounding with microwave spectroscopy p 1812 N94-22436

MICROWAVES
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A271911] p 1882 N94-20489
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
Particle behavior in an ECR plasma etch tool
[DE93-040343] p 1996 N94-21769
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
An assessment of the cost of microwave sintering ceramic tiles for armor applications
[DE94-000978] p 1693 N94-21850

MIDAIR COLLISIONS
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864

MIDDLE ATMOSPHERE
Interactions of free modes, tides, and gravity waves in the middle atmosphere
[REPT-84] p 1855 N94-20155
Empirical wind model for the middle and lower atmosphere. Part 2: Local time variations
[NASA-TM-104592] p 1870 N94-21862

MIE SCATTERING
Multiple scattering effects on the Linear Depolarization Ratio (LDR) measured during CaPE by a Ka-band air-borne radar p 1728 N94-20446
On the theory of morphology-dependent resonances: Shape resonances, width formulas, and graphical representations
[AD-A272279] p 2037 N94-20945

MILITARY AIRCRAFT
Audit report. Navy's aircraft structural life surveillance program data recorders
[AD-A270391] p 1645 N94-20040

MILITARY OPERATIONS
Planning process software: A user guide for the DMCA
[AD-A271252] p 1902 N94-19911
HERMES, a report generator for research on information processing in command posts: The effect of missing information
[IZF-1992-A-28] p 2042 N94-20310
In-flight measurement of aircrew breathing in Navy aircraft
[AD-A271811] p 1896 N94-21154

MILITARY TECHNOLOGY
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912
Tactical laser weapons and other directed-energy weapons
[AD-A267961] p 1816 N94-20484
Documents on the history of aeronautical and space research in Germany, 1900 - 1970
[DLR-MITT-92-08] p 2152 N94-20543
Chemistry and materials science
[DE94-001449] p 2152 N94-21858
Microtechnology: The key to the technical challenges of the 21st century
[DE94-000403] p 1769 N94-21959

MILKY WAY GALAXY
Spatial distribution of near infrared line radiation in galactic nuclei measured with Fabry-Perot spectrometer FAST
[MPE-239] p 2081 N94-21138
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458

MILLIMETER WAVES
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470
An 85 GHz quasioptical gyroklystron experiment
[AD-A272020] p 1752 N94-20931
Low-power millimeter-wave radar observations of the atmosphere
[NASA-CR-194738] p 1858 N94-21811
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940

MILLING (MACHINING)
Focused-ion-beam material removal rates
[AD-A270852] p 1713 N94-19834

MILLING MACHINES
Focused-ion-beam material removal rates
[AD-A270852] p 1713 N94-19834

MIMD (COMPUTERS)
Building brains for bodies
[AD-A270531] p 1939 N94-19875
Parallel band reduction and tridiagonalization
[DE93-019586] p 1951 N94-20221
The design of linear algebra libraries for high performance computers
[DE93-040458] p 1960 N94-21967
Parallelizing a maximum entropy image deconvolution algorithm p 1787 N94-22208

MIMO (CONTROL SYSTEMS)
Design of a state-space controller for an advanced gas turbine engine
[AD-A270859] p 1847 N94-20042
Telerobotic control of a mobile coordinated robotic server, executive summary
[NASA-CR-194685] p 1821 N94-20044

MINERAL DEPOSITS
Dating native gold by noble gas analyses p 1684 N94-20652
C/O atomic ratios in micrometer-size crushed grains from Antarctic micrometeorites and two carbonaceous meteorites p 2082 N94-20678
Mineralogy and cooling history of magnesian lunar granulite 67415 p 2124 N94-20811
A new Antarctic meteorite with chromite, orthopyroxene and metal with reference to a formation model of S asteroids p 2084 N94-20813
Evaluation of lunar rocks and soils for resource utilization: Detailed image analysis of raw materials and beneficiated products p 2126 N94-20820

MINERALOGY
The Koshak section: Evidence for element fractionation and an oxidation event at the K/T boundary p 1862 N94-20641
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe p 2097 N94-20661
Opaque-rich lithology in the Divnoe achondrite: Petrology and origin p 2082 N94-20680
Chaunskij: The most highly metamorphosed, shock-modified and metal-rich mesosiderite p 2082 N94-20681
Post-igneous redistribution of components in eucrites p 1685 N94-20684
Micrometeorite dynamic pyrometamorphism: Observation of a thermal gradient in iron-nickel sulfide p 2083 N94-20716
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate p 2108 N94-20723
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
Combined backscatter Moessbauer spectrometer/x ray fluorescence analyzer (BaMS/XRF) for extraterrestrial surfaces p 1686 N94-20761
The chondrite Mihonoseki: New observed fall p 2083 N94-20784
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800
Mineralogy and cooling history of magnesian lunar granulite 67415 p 2124 N94-20811
Ti-bearing oxide minerals in lunar meteorite Y793169 with the VLT affinity p 2084 N94-20812
A new Antarctic meteorite with chromite, orthopyroxene and metal with reference to a formation model of S asteroids p 2084 N94-20813
Evaluation of lunar rocks and soils for resource utilization: Detailed image analysis of raw materials and beneficiated products p 2126 N94-20820
Cometary interplanetary dust particles? An update on carbon in anhydrous IDPS p 2084 N94-20828
Reverse polarity magnetized melt rocks from the Chicxulub impact structure, Yucatan Peninsula, Mexico p 1863 N94-20843
Origin of high-Ti lunar ultramafic glasses p 1686 N94-20853
Multiplicity of chondrule heating events and the coarsening of chondrule textures p 2085 N94-20860
A study of carbonates, sulfates, and phosphates using thermal emission spectroscopy p 1686 N94-20868
Weathering features and secondary minerals in Antarctic Shergottites ALHA77005 and LEW88516 p 2086 N94-20869
Lewis Cliff 87057: A new metal-rich E3 chondrite with similarities to Mt. Egerton, Shallowater and Happy Canyon p 2086 N94-20901
Mineralogy of dark clasts in primitive versus differentiated meteorites p 2087 N94-20907
A Backscatter Moessbauer Spectrometer (BaMS) for use on Mars p 1811 N94-22431
Determination of Martian soil mineralogy and water content using the Thermal Analyzer for Planetary Soils (TAPS) p 1812 N94-22433
In situ identification of the Martian surface material and its interaction with the Martian atmosphere using DTA/GC p 1812 N94-22434
Optical luminescence spectroscopy as a probe of the surface mineralogy of Mars p 1813 N94-22437

MINERALS
Frequency dependent electrical properties of minerals and partial-melts
[DE93-019918] p 2012 N94-19861
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe p 2097 N94-20661
Characterization of Minnesota lunar simulant for plant growth p 1897 N94-20665
Abundance and composition of solar KR in the H3-H6 chondrite ACFER111 p 1684 N94-20676
Post-igneous redistribution of components in eucrites p 1685 N94-20684
U-Pb provenance ages of shocked zircons from the K-T boundary, Raton Basin, Colorado p 1685 N94-20701
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
Research program on the Manson impact structure, Iowa p 1862 N94-20766
FE-60 and the evolution of eucrites p 2083 N94-20768
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis p 2118 N94-20779
Microanalysis of iron oxidation state in iron oxides using X Ray Absorption Near Edge Structure (XANES) p 1686 N94-20808
Regolith breccia consisting of H and LL chondrite mixture p 2080 N94-20892
Lewis Cliff 87057: A new metal-rich E3 chondrite with similarities to Mt. Egerton, Shallowater and Happy Canyon p 2086 N94-20901
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives
[DE94-000330] p 1694 N94-21945

MINIATURE ELECTRONIC EQUIPMENT
Miniature color display, phase 4
[AD-A272920] p 1760 N94-21221

MINIATURIZATION
Self assembly: An approach to terascale integration
[DE93-040104] p 1769 N94-21846
Microtechnology: The key to the technical challenges of the 21st century
[DE94-000403] p 1769 N94-21959

MINIMUM ENTROPY METHOD
The relaxed state and entropy production due to the electric resistivity and viscosity of plasma p 2010 N94-22696

MIRANDA
Structural evidence for reorientation of Miranda about a paleo-pole p 2098 N94-20671
Triton's cratering record and its time of capture p 2122 N94-20802

MIRRORS
Evaluation of a scanning Hartmann device for single point turning applications
[DE93-019204] p 1821 N94-19891
Circular polarizing mirrors for high power lasers
[AD-A267820] p 1815 N94-19965
Characterization and possible repair of defects in soft x ray projection lithography masks
[DE93-019147] p 1750 N94-20231
Wide-angle imaging system with fiberoptic components providing angle-dependent virtual material stops
[NASA-CASE-NPO-18146-1-CU] p 1986 N94-20345
X ray reflection masks: Manufacturing, characterization and first tests
[BONN-IR-92-31] p 1986 N94-21043
Mirror velocity sampling errors in a Michelson interferometer
[AD-A273105] p 1809 N94-21508
Generation of harmonic radiation using the multi-cavity free-electron laser
[DE94-001261] p 1820 N94-21975
X ray characterization of a three-element condenser system for soft x ray projection lithography
[DE93-019916] p 1990 N94-21985
HST PSF simulation using Tiny Tim p 1926 N94-22498

MIS (SEMICONDUCTORS)
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973
InP MIS structures with diamondlike amorphous carbon films deposited by ion-beam sputtering and from plasma p 1710 N94-20979
Interfacial properties of diamondlike amorphous carbon films on InP: Metal-insulator-semiconductor structures p 1710 N94-20980

MISALIGNMENT
Stability of beam in the Fermilab Main Injector
[DE94-000619] p 1982 N94-21934

MISSILE DEFENSE
Standard atmospheres for engagement modeling
[AD-A272447] p 1858 N94-21207
High-velocity interceptors for boost-phase intercepts
[DE94-001077] p 1965 N94-22403

MISSILE DETECTION
A feasibility study of a parallax-based passive missile approach warning system
[ISBN-0-315-60640-1] p 1743 N94-22410

MISSILE SIGNATURES
Boost-phase discrimination research
[NASA-TM-109347] p 1666 N94-19818

MISSILE TRACKING
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617

MISSILES
Aerospace: Facts and figures, 1992-1993
[AD-A272571] p 1635 N94-21419

MISSION PLANNING
The EXOSAT operational experience
[ESA-STM-248] p 1657 N94-20235
Clementine: An inexpensive mission to the Moon and Geographos p 1652 N94-20765
Mars exploration study workshop 2
[NASA-CP-3243] p 2146 N94-21883
SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486

MIXING
Convex set and linear mixing model p 1844 N94-20888

MIXING CIRCUITS
Quantum noise studies with superconducting tunnel junction mixers
[AD-A270897] p 2012 N94-19697

MIXING LAYERS (FLUIDS)
Turbulence modeling for high speed compressible flows
[NASA-CR-194547] p 1799 N94-20210
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus p 2099 N94-20675
Green Sheet project: Dye sheet evolution
[AD-A272019] p 1883 N94-21443
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531

MIXTURES
Chemical equilibrium in high pressure molecular fluid mixtures
[DE93-040160] p 1786 N94-19829
One- and multi-component theories of mixtures
[DE93-040543] p 1966 N94-21511

MOBILE COMMUNICATION SYSTEMS
Mobile antenna development at JPL p 1731 N94-20457
Mobile terminal antennas for helicopters p 1731 N94-20458
Linearly tapered slot antenna circular array for mobile communications
[NASA-TM-106441] p 1769 N94-21808
A consideration of the integration of terrestrial and satellite mobile systems p 1746 N94-22172
ARQ on fading channels p 1747 N94-22242

MODAL RESPONSE
Modal combination in response spectrum modal dynamic analysis
[DE94-000339] p 1833 N94-21956

MODELS
Rockets: Physical science teacher's guide with activities
[NASA-EP-291] p 1669 N94-20226
Current status: Animal models of nausea p 1889 N94-21915

MODERATORS
Temperature and Doppler coefficients of various space nuclear reactors
[DE94-001388] p 1671 N94-21979

MODFETS
Characteristics of 0.8- and 0.2-microns gate length In(x)Ga(1-x) As/In(0.52)Al(0.48)As/InP (0.53 less than or equal to x less than or equal to 0.70) modulation-doped field-effect transistors at cryogenic temperatures p 1733 N94-20499

Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry p 1796 N94-20985
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987

MODULARITY
A modular design for connectionist parsing p 1941 N94-20252
MAYGEN: A symbolic debugger generation system [AD-A272512] p 1913 N94-21413
Modular interval spaces [PB93-220663] p 1961 N94-22266

MODULATION
Computational model of a magnetic modulator for copper lasers [DE93-019603] p 1815 N94-20223
Stability analysis of unsteady ablation fronts [DE93-019689] p 1819 N94-21839

MODULATION DOPING
Synthesis and properties of mismatched heterojunction/substrate interfaces [AD-A272904] p 1760 N94-21229

MODULATORS
Computational model of a magnetic modulator for copper lasers [DE93-019603] p 1815 N94-20223

MODULES
Research on stable, high-efficiency amorphous silicon multijunction modules [DE93-018220] p 1850 N94-22257

MODULUS OF ELASTICITY
Metastable bcc phase formation in the Nb-Cr system [DE93-018376] p 2012 N94-19926
Adaptation of model parameters of a rail model at measured rail compliances [ILR-MITT-274(1992)] p 1831 N94-21153
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis [NASA-TM-109032] p 1832 N94-21624
Molecular dynamics modeling of the mechanical behavior of metallic multilayers [DE93-019947] p 1694 N94-21921
Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides [DE93-040600] p 1697 N94-22559

MOISTURE
Durability predictions for adhesively bonded joints in humid environments [AD-A271177] p 1830 N94-20001
Thin-film hermeticity: A quantitative analysis of diamondlike carbon using variable angle spectroscopic ellipsometry p 1710 N94-20981

MOISTURE CONTENT
Relationship of attenuation in a vegetation canopy to physical parameters of the canopy p 1729 N94-20450
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
Normalized vertical ice mass flux profiles from vertically pointing 8-mm-wavelength Doppler radar p 1879 N94-22334

MOLDING MATERIALS
Machinable oxide ceramic [AD-D015927] p 1699 N94-20017
Improved ceramic slip casting technique — application to aircraft model fabrication [NASA-CASE-LAR-14471-1] p 1702 N94-20377

MOLECULAR BEAM EPITAXY
Investigation of quantum effects in heterostructures [AD-A270938] p 2011 N94-19817
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material [AD-A271007] p 2012 N94-19635
Common Themes and Mechanisms of Epitaxial Growth, volume 312 — Materials Research Society symposium proceedings [AD-A270513] p 2013 N94-19967
Monocrystalline germanium film on sapphire [AD-D015925] p 2017 N94-20348
Center for the integration of optical computing [AD-A271874] p 1899 N94-20469
Surface treatment of InP and contribution to the optimization of the InP(p)/InP(p) regrown interfaces grown by GSMBE [ECL-92-48] p 2018 N94-20598
Ellipsometric measurements of molecular-beam-epitaxy-grown semiconductor multilayer thicknesses: A comparative study p 1710 N94-20983
In-situ spectroscopic ellipsometry in molecular beam epitaxy p 2024 N94-21005

MOLECULAR BEAMS
Transport in microstructures in the microwave and millimeter-wave regime [AD-A271875] p 2017 N94-20470

MOLECULAR BIOLOGY
High resolution electron crystallography of protein molecules [DE93-040114] p 1884 N94-19826
A complex systems approach to computational molecular biology [DE93-040062] p 1884 N94-19866
Application of molecular modeling to biological processing [AD-A272612] p 1974 N94-21185

MOLECULAR CHAINS
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers [AD-A271128] p 1699 N94-20016
Light scattering studies of an electrorheological fluid [DE93-019419] p 1700 N94-20315
Spatial organization of polymer chains in a crystallizable diblock polyethylene and polystyrene [AD-A271862] p 1702 N94-20463

MOLECULAR CLOUDS
Coagulation of grains in static and collapsing protostellar clouds p 2085 N94-20865
Factor analysis as a tool for spectral line component separation 21cm emission in the direction of L1780 p 1965 N94-22536
Fragmentation of magnetized filamentary interstellar clouds p 2008 N94-22687
Gravitational instability of magnetized filamentary clouds. 1: Helical magnetic fields p 2008 N94-22688
Gravitational instability of magnetized filamentary clouds. 2: Rotation p 2009 N94-22689

MOLECULAR CLUSTERS
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers [DE94-000741] p 1701 N94-20352

MOLECULAR COLLISIONS
Collisions of molecules with clusters: A quasiclassical study [DE93-018614] p 1971 N94-20050
Non-adiabatic effects in low-energy electron-molecule scattering [DE93-040485] p 1976 N94-21968

MOLECULAR DIFFUSION
A database of selected transport coefficients for combustion studies [DE93-041278] p 1678 N94-19889
Model for liquid boron oxide droplet gasification in H/O/C/F combustion environments [AD-A272911] p 1682 N94-21243
Combustion in turbulent jets and buoyant flames [PB93-202372] p 1682 N94-21452
Modeling of outgassing and matrix decomposition in carbon-phenolic composites [NASA-CR-194741] p 1676 N94-21743

MOLECULAR DYNAMICS
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers [DE94-000741] p 1701 N94-20352
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions [AD-A272665] p 1681 N94-21216
Molecular dynamics modeling of the mechanical behavior of metallic multilayers [DE93-019947] p 1694 N94-21921
Transferable tight-binding parameters: An application to Ni and Ni-Al alloys [DE94-001044] p 1695 N94-22023
Microscopic and macroscopic dynamics [DE93-019576] p 1937 N94-22042
Computer simulation of molecular response at a shock front [DE94-001050] p 1977 N94-22396
Smoothed-particle hydrodynamics and nonequilibrium molecular dynamics [DE94-001059] p 1977 N94-22400

MOLECULAR ELECTRONICS
Ab initio potential energy surface for the H + OCS reaction [AD-A270577] p 1698 N94-19947

MOLECULAR INTERACTIONS
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers [DE94-000741] p 1701 N94-20352

MOLECULAR IONS
Collisional processes involving atmospheric gases [AD-A270729] p 1854 N94-19954

MOLECULAR PHYSICS
One- and multi-component theories of mixtures [DE93-040543] p 1966 N94-21511

MOLECULAR RELAXATION
Shock induced condensation in fluids of high molar specific heat: Shock structure and relaxation [MPIS-106/1993] p 1798 N94-20145

MOLECULAR ROTATION
High resolution infrared spectroscopy of cyclobutane: A study of vibrational mode coupling involving large amplitude, low frequency modes [AD-A271987] p 1973 N94-20619

MOLECULAR SPECTROSCOPY
Plasma edge spectroscopy p 1996 N94-21803

MOLECULAR STRUCTURE
Characterization studies of lower and non-TDI polyurethane encapsulants [DE93-041129] p 1698 N94-19857
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides [DE93-017563] p 1678 N94-19924
Light scattering studies of an electrorheological fluid [DE93-019419] p 1700 N94-20315
High energy ionization in liquids: The free ion yield [DE93-040329] p 1973 N94-20324
In-situ electrochemical surface science [AD-A265942] p 1680 N94-20330
Molecular and atomic arrays in nano- and mesoporous materials synthesis [AD-A271500] p 2017 N94-20544
Rotational isomers of Mo(VI) alkylidene complexes and Cis/trans polymer structure: Investigations in ring-opening metathesis polymerization [AD-A272647] p 1704 N94-21184
Polymerization of enantiomerically pure 2,3-dicarboalkoxy norbornadienes and 5,6-disubstituted norbornenes by well-characterized molybdenum ROMP catalysts [AD-A272649] p 1704 N94-21186
Surface electrochemistry of metals [AD-A272913] p 1691 N94-21245
Optically induced birefringence in copolymers and blends containing azobenzene groups [AD-A273085] p 1706 N94-21523
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins [DE94-000935] p 1683 N94-22021
Theoretical research program to study chemical reactions in AOTV bow shock tubes [NASA-CR-194710] p 1804 N94-22027
Non-linear thermal instability of optical thin molecular structures p 2006 N94-22667

MOLECULAR TRAJECTORIES
Collisions of molecules with clusters: A quasiclassical study [DE93-018614] p 1971 N94-20050

MOLECULAR WEIGHT
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1 [AD-A271437] p 2012 N94-19842
Polybenzoxazole via aromatic nucleophilic displacement [NASA-CASE-LAR-14606-1-CU] p 1672 N94-20540

MOLECULES
Electronically metastable molecules of high symmetry [AD-A272015] p 1974 N94-21461

MOLTEN SALT ELECTROLYTES
Molten carbonate fuel cell networks: Principles, analysis, and performance [DE93-019872] p 1846 N94-21527

MOLYBDENUM
Substrate recovery of Mo-Si multilayer coated optics [DE93-019610] p 1698 N94-19810
Core formation in the Moon: The mystery of the excess depletion of Mo, W and P p 2095 N94-20651
Rotational isomers of Mo(VI) alkylidene complexes and Cis/trans polymer structure: Investigations in ring-opening metathesis polymerization [AD-A272647] p 1704 N94-21184
Polymerization of enantiomerically pure 2,3-dicarboalkoxy norbornadienes and 5,6-disubstituted norbornenes by well-characterized molybdenum ROMP catalysts [AD-A272649] p 1704 N94-21186
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding [DE94-001066] p 1696 N94-22025

MOLYBDENUM ALLOYS
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo) [DE93-041320] p 1694 N94-21943
Alloying effects on mechanical and metallurgical properties of NiAl [DE93-040814] p 1694 N94-21948
Strengthening and toughening in refractory metal alloys [DE93-019942] p 1695 N94-21986

MOLYBDENUM COMPOUNDS
Strength and toughness improvement of silicide intermetallics by nanophase and microphase reinforcements
[AD-A272914] p 1692 N94-21320
MOLYBDENUM DISULFIDES
Scanning tunneling microscopy investigations of metal dichalcogenide materials
[AD-A272910] p 2027 N94-21242
MOMENTUM
Longitudinal beam dynamics for heavy ion fusion using WARPrz
[DE93-019154] p 1992 N94-19915
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187
MOMENTUM TRANSFER
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187
Physical chemistry of energetic nitrogen compounds
[AD-A271819] p 1712 N94-20625
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941
MONITORS
An embedded fibre optic for damage growth monitoring in Kevlar composites
[ISBN-0-315-83501-X] p 1677 N94-22589
MONKEYS
Susceptibility of the squirrel monkey to different motion conditions p 1885 N94-21899
Recovery of the vomiting reflex following area postrema ablation in squirrel monkeys p 1886 N94-21904
Motion sickness elicited by passive rotation in squirrel monkeys p 1887 N94-21905
Conditioned taste aversion and motion sickness in cats and squirrel monkeys p 1888 N94-21914
MONOCHROMATIC RADIATION
The coherent backscattering opposition effect p 1991 N94-20648
MONOCHROMATORS
Magnetic circular dichroism in x ray absorption and core-level photoemission
[DE93-019381] p 1688 N94-19986
MONOIDS
On semisimple cocommutative bialgebras
[CWI-AM-R9210] p 1954 N94-21158
MONOMERS
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982
Lateral distribution of lipids in membranes at high pressure
[AD-A271183] p 1700 N94-20299
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021
MONOPOLE ANTENNAS
A broadband V-antenna for pulsed field measurements: Experimental results p 1745 N94-22139
MONOPROPELLANTS
Monopropellant aqueous hydroxyl ammonium nitrate/fuel
[AD-D015922] p 1712 N94-20061
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
MONOPULSE ANTENNAS
Topographic mapping using a monopulse SAR system p 1721 N94-20417
MONOPULSE RADAR
Topographic mapping using a monopulse SAR system p 1721 N94-20417
MONTE CARLO METHOD
Chemical equilibrium in high pressure molecular fluid mixtures
[DE93-040160] p 1796 N94-19829
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4
[DE93-019009] p 1972 N94-20187
The GEM Silicon Tracking System
[DE93-040133] p 2016 N94-20322
A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454
One- and multi-component theories of mixtures
[DE93-040543] p 1966 N94-21511
Interpolative modeling of GaAs FET S-parameter data bases for use in Monte Carlo simulations p 1767 N94-21723
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
A simulation model for probabilistic analysis of Space Shuttle abort modes
[NASA-TM-108432] p 1656 N94-21859
Toward a QCD analysis of jet rates in deep-inelastic Muon-Proton scattering
[DE94-000618] p 1976 N94-21962
A unified Monte Carlo interpretation of particle simulations and applications to nonneutral plasmas
[DE94-001231] p 1997 N94-21973
Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights
[NASA-CR-194709] p 2056 N94-22281
The polarization sensitivity of the liquid xenon imaging telescope p 2056 N94-22282
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385
Algorithmic advances in stochastic programming
[DE94-001160] p 1921 N94-22406
A Monte Carlo study of the Sudbury Neutrino Observatory small test detector experiment
[ISBN-0-315-59056-4] p 1977 N94-22416
Likelihood analysis of parity violation in the compound nucleus
[DE94-000671] p 1977 N94-22572
MOON
The Clementine Mission science return at the Moon and Geographos p 1652 N94-20850
MOORING
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186
MORPHOLOGY
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows
[AD-A271160] p 1678 N94-20000
Morphologic and morphometric studies of impact craters in the northern plains of Mars p 2089 N94-20384
Response of the topography and gravity field on Venus to mantle upwelling beneath a chemical boundary layer p 2117 N94-20775
Contributions of the Clementine mission to our understanding of the processes and history of the Moon p 2119 N94-20784
A classification scheme for the morphology of lava flow fields p 1863 N94-20879
Structure and morphology of Pd overlayers on epitaxial SnO2 films studies with the atomic force microscope
[AD-A271827] p 2028 N94-21458
Growth and morphology of crystals: Theory and observations
[PB93-221166] p 2035 N94-22273
MORTALITY
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930
MOSAICS
Cathodoluminescence observations of in situ aqueous destruction of chondrules in the Murchison CM chondrite p 2083 N94-20750
MOSSBAUER EFFECT
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558
Magnetic properties and Moessbauer analyses of glass from the K-T boundary, Beloc, Haiti p 1685 N94-20753
Combined backscatter Moessbauer spectrometer/x ray fluorescence analyzer (BaMS/XRF) for extraterrestrial surfaces p 1686 N94-20761
MOTION PERCEPTION
The local measurement and global interpretation of 3D motion field generated by several moving objects from range image sequences p 1777 N94-22146
Segmenting the optical flow due to the motion of several rigid objects p 1777 N94-22147
Mobile robot perception in unknown and unstructured dynamic voxel environments
[ISBN-0-315-83951-1] p 1947 N94-22591
MOTION SICKNESS
Self-Motion Perception and Motion Sickness
[NASA-CR-194276] p 1885 N94-21897
Changes in plasma vasopressin during motion sickness in cats p 1885 N94-21898
Susceptibility of the squirrel monkey to different motion conditions p 1885 N94-21899
Relationship of area postrema to three putative measures of motion sickness p 1885 N94-21900
Reassessment of area postrema's role in motion sickness and conditioned taste aversion p 1886 N94-21901
Gamma-aminobutyric acid (GABA) and neuropeptides in neural areas mediating motion-induced emesis p 1886 N94-21902
Motion sickness elicited by passive rotation in squirrel monkeys p 1887 N94-21905
Area postrema ablations in cats: Evidence for separate neural routes for motion- and xylazine-induced CTA and emesis p 1887 N94-21906
Immunocytochemical localization of glutamic acid decarboxylase (GAD) and substance P in neural areas mediating motion-induced emesis: Effects of vagal stimulation on GAD immunoreactivity p 1887 N94-21909
The effects of area postrema lesions and selective vagotomy on motion-induced conditioned taste aversion p 1888 N94-21910
Experimental studies of gastric dysfunction in motion sickness: The effect of gastric and vestibular stimulation on the vagal and splanchnic gastric efferents p 1888 N94-21911
Role of the area postrema in three putative measures of motion sickness in the rat p 1888 N94-21912
Investigating motion sickness using the conditioned taste aversion paradigm p 1888 N94-21913
Conditioned taste aversion and motion sickness in cats and squirrel monkeys p 1888 N94-21914
MOTION SICKNESS DRUGS
Susceptibility of the squirrel monkey to different motion conditions p 1885 N94-21899
MOTION SIMULATION
Strategy for motion of a moving body of quasi-polygonal form within a polygonal space p 1792 N94-22240
MOTOR VEHICLES
The causes of contact noise
[REPT-92-100] p 1822 N94-20157
MSAT
Mobile antenna development at JPL p 1731 N94-20457
Comparison of theoretical and simulated performance results for sloppy-slotted Aloha signaling p 1746 N94-22204
MULTICHANNEL COMMUNICATION
State-space models for multichannel detection
[AD-A270608] p 1715 N94-19816
Simulated retrieval of land surface parameters using multichannel satellite microwave radiometry p 1727 N94-20443
Four-channel HF receiving antenna array simulator
[AD-A271876] p 1732 N94-20471
Recording system using multiplexed inputs to a multichannel recorder
[AD-D015971] p 1808 N94-21278
MULTIGRID METHODS
Multigrid approach to solving the long transportation problem on a regular grid in cost space
[AD-A272323] p 1909 N94-21038
MGD1M: A parallel multigrid code with a fast vectorized ILU-relaxation
[CWI-NM-R9222] p 1930 N94-21077
A multi-level solution algorithm for steady-state Markov chains
[NASA-CR-191558] p 1914 N94-21462
The Sixth Copper Mountain Conference on Multigrid Methods, part 2
[NASA-CP-3224-PT-2] p 1955 N94-21464
Optimal resolution in maximum entropy image reconstruction from projections with multigrid acceleration p 1955 N94-21465
Multilevel methods for transport equations in diffusive regimes p 1955 N94-21467
Analysis of multigrid methods on massively parallel computers: Architectural implications p 1938 N94-21468
Time-accurate Navier-Stokes calculations with multigrid acceleration p 1956 N94-21469
Looking for O(N) Navier-Stokes solutions on non-structured meshes p 1806 N94-21471
The block adaptive multigrid method applied to the solution of the Euler equations p 1641 N94-21472
Multigrid schemes for viscous hypersonic flows p 1641 N94-21473
Layout optimization with algebraic multigrid methods p 1957 N94-21474
A multigrid method for steady Euler equations on unstructured adaptive grids p 1957 N94-21476
An automatic multigrid method for the solution of sparse linear systems p 1957 N94-21478
A multigrid algorithm for the cell-centered finite difference scheme p 1957 N94-21479

A semi-Lagrangian approach to the shallow water equation p 1806 N94-21480
Multigrid solution of the Navier-Stokes equations on highly stretched grids with defect correction p 1806 N94-21481
The multigrid preconditioned conjugate gradient method p 1958 N94-21482
Mapping robust parallel multigrid algorithms to scalable memory architectures p 1922 N94-21483
Unstructured multigrid through agglomeration p 1958 N94-21484
Multigrid properties of upwind-biased data reconstructions p 1806 N94-21485
On the prediction of multigrid efficiency through local mode analysis p 1959 N94-21486
Numerical study of a multigrid method with four smoothing methods for the incompressible Navier-Stokes equations in general coordinates p 1806 N94-21487
Parallelizing a highly vectorized multigrid code with zebra relaxation
[CWI-NM-R9225] p 1935 N94-21610
Numerical multigrid software (MGD5M): A parallel multigrid code with a twisted ILLU-relaxation
[CWI-NM-R9226] p 1916 N94-21611
The 3-D unstructured mesh generation using local transformations p 1919 N94-22356

MULTILAYER INSULATION
Outgassing rate of Reemay Spunbonded Polyester and DuPont Double Aluminized Mylar
[DE93-040015] p 1699 N94-19973

MULTIMEDIA
A concept for implementing hypermedia technology in computer aided workplaces in medicine
[ETN-93-95057] p 1889 N94-20022
Telecommunications services for multimedia data exchange support
[AD-A271704] p 1740 N94-21352
CMIFed: A presentation environment for porta ble hypermedia documents
[CWI-CS-R9305] p 2044 N94-21494
Structured multimedia authoring
[CWI-CS-R9304] p 2044 N94-21535
The Amsterdam hypermedia model: Extending hypertext to support real multimedia
[CWI-CS-R9306] p 2045 N94-21536
Publication of science data on CD-ROM: A guide and example
[NASA-CR-4560] p 1842 N94-21585

MULTIMODE RESONATORS
Stability curves for a thermoacoustic prime mover
[AD-A272607] p 1968 N94-21422

MULTIPATH TRANSMISSION
Robust, high-speed network design for large-scale multiprocessing
[AD-A271003] p 1716 N94-19977
Optical signal processing
[AD-A271036] p 1983 N94-20013

MULTIPHASE FLOW
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351

MULTIPHOTON ABSORPTION
Direct detection of atomic ions from molecular photofragmentation during nonresonant multiphoton ionization of sputtered species
[DE93-040686] p 1976 N94-21951

MULTIPLE ACCESS
Analysis of the TDRS multiple access system for possible use as an attitude control system sensor p 1666 N94-21338
A one-shot access scheme for a multicast switch p 1773 N94-22120

MULTIPLEXING
Recording system using multiplexed inputs to a multichannel recorder
[AD-D015971] p 1808 N94-21278
Wide passband wavelength multi/demultiplexer at 1.3/1.55 micrometers based on etched Fresnel mirror, appendix 8 p 1989 N94-21602
Quadrature biorthogonal modulation p 1747 N94-22232

MULTIPLIERS
Complementary heterojunction FET technology for space application p 1755 N94-21094
Synthesis algorithm of VLSI multipliers for ASIC p 1758 N94-21116
Evaluation of floating-point sum or difference of products in carry-save domain p 1764 N94-21705

MULTIPOLES
A summary of studies of particle stability at RHIC
[DE93-040173] p 1970 N94-19666
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164

MULTIPROCESSING (COMPUTERS)
Segmented operations for sparse matrix computation on vector multiprocessors
[AD-A270601] p 1928 N94-19950
Robust, high-speed network design for large-scale multiprocessing
[AD-A271003] p 1716 N94-19977
Multilist scheduling: A new parallel programming model
[AD-A270549] p 1929 N94-20084
Memory contention in scalable cache-coherent multiprocessors
[TR-448] p 1929 N94-20144
Parallel logic programming systems
[RR-891-I] p 1929 N94-20176
Time warp operating system version 2.7 internals manual
[NASA-CR-194798] p 1899 N94-20549
Measuring the effects of thread placement on the Kendall Square KSR1
[DE93-040655] p 1908 N94-20932
Analysis and evaluation of configuring of graphical systems on multiprocessor architectures
[ETN-93-93618] p 1930 N94-21018
Avoiding and tolerating latency in large-scale next-generation shared-memory multiprocessors p 1753 N94-21081
The effects of block size on the performance of coherent caches in shared-memory multiprocessors
[AD-A272638] p 1899 N94-21177
Scheduling for locality in shared-memory multiprocessors
[AD-A272948] p 1930 N94-21228
Software coherence in multiprocessor memory systems
[NASA-CR-194696] p 1931 N94-21272
Using parallel banded linear system solvers in generalized eigenvalue problems
[NASA-CR-191540] p 1915 N94-21584
A simple modern correctness condition for a space-based high-performance multiprocessor p 1766 N94-21718
Low energy CMOS for space applications p 1768 N94-21735
Using stream interleaving to eliminate the need for interlocks in deeply pipelined processors p 1781 N94-22175
Integration of parallel processing structures using a matrix approach p 1784 N94-22192
Fault tolerance for real-time multiprocessor operating systems p 1788 N94-22216
Distributed input/output processing in data-driven multiprocessors
[DE94-000323] p 1937 N94-22378
The ADAM environment and transputers p 1926 N94-22494
A new programming metaphor for image processing procedures p 1927 N94-22531

MULTIPROGRAMMING
Scheduling for locality in shared-memory multiprocessors
[AD-A272948] p 1930 N94-21228

MULTISENSOR APPLICATIONS
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Multisensor pinhole yawsonde
[AD-A271715] p 1808 N94-20930

MULTISPECTRAL PHOTOGRAPHY
Information extraction for multispectral images using radiation interaction models
[BCRS-90-22] p 1841 N94-21015

MULTISPECTRAL RADAR
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A271911] p 1882 N94-20489

MULTIVARIATE STATISTICAL ANALYSIS
Fast scalar algorithms for multivariate partial correlations and their empirical counterparts
[RR-903-M] p 1905 N94-20201
Multivariate statistical analysis: Principles and applications to coorbital streams of meteorite falls p 1964 N94-20881
Method for design rotation
[AD-A272440] p 1911 N94-21204
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458
SIMBAD quality-control p 2048 N94-22502
Factor analysis as a tool for spectral line component separation 21cm emission in the direction of L1780 p 1965 N94-22536

MUONS
Measurement of the B(+) and B(0) lifetimes
[DE93-019906] p 1969 N94-19814
B production at D0
[DE93-019250] p 1972 N94-20291
Evaluation of the chemical composition of cosmic radiation in energy area of 10(exp 15) eV
[ETN-93-93682] p 2150 N94-21056
Toward a QCD analysis of jet rates in deep-inelastic Muon-Proton scattering
[DE94-000618] p 1976 N94-21962

MURCHISON METEORITE
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging p 2082 N94-20659
Petrography and origin of refractory inclusions from the Murray and Murchison C2 chondrites p 2084 N94-20770
Trace element compositions of spinel-rich refractory inclusions from the Murchison meteorite p 2086 N94-20897

MURRAY METEORITE
Petrography and origin of refractory inclusions from the Murray and Murchison C2 chondrites p 2084 N94-20770

MUSCLES
Cosmos 2229
[NASA-CR-194734] p 1895 N94-20338

MUSCULAR FUNCTION
Cosmos 2229
[NASA-CR-194734] p 1895 N94-20338

MUSCULAR STRENGTH
Maximum team lifting capacity as a function of team size
[AD-A271642] p 1892 N94-21036
Strength capabilities and load requirements while performing torquing tasks in zero gravity
[NASA-TP-3433] p 1897 N94-21627

MYLAR (TRADEMARK)
Outgassing rate of Reemay Spunbonded Polyester and DuPont Double Aluminized Mylar
[DE93-040015] p 1699 N94-19973

N

NAKHLITES
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668

NAMING
Named Venusian craters p 2109 N94-20725

NAPHTHALENE
The thermodynamic properties to 700 K of naphthalene and 2,7-dimethylnaphthalene
[DE93-000160] p 2037 N94-20473

NARROWBAND
Evaluation of a single stage of the LADS filter
[AD-A271101] p 1814 N94-19851
RADCAL: A narrow-band model for radiation calculations in a combustion environment
[PB93-200889] p 1682 N94-21448

NASA PROGRAMS
NASA's Education Program
[NASA-EP-297] p 2038 N94-20129
NASA property: Improving management of government equipment provided to contractors. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-93-191] p 2039 N94-20206
NASA procurement: Planning for pilot test of new procurement procedures is adequate. Report to the Chairman, Committee on Governmental Affairs, US Senate
[GAO/NSIAD-94-67] p 2039 N94-20236
The manager's guide to NASA graphics standards
[NHB-1430.2] p 2042 N94-20308
NASA patent abstracts bibliography: A continuing bibliography. Section 1: Abstracts (supplement 44)
[NASA-SP-7039(44)-SECT-1] p 2043 N94-21254
Network command processing system overview p 1935 N94-21351
Issues in NASA program and project management. Special Report: 1993 conference
[NASA-SP-6101(07)] p 2039 N94-21497
Issues in NASA program and project management
[NASA-SP-6101(06)] p 2040 N94-21499
NASA procurement report, FY 1992
[NASA-TM-109390] p 2040 N94-21623
NASA procurement report, FY 1993
[NASA-TM-109393] p 2040 N94-21625
Summary data on all NASA procurement actions
[NASA-TM-109392] p 2040 N94-21638
NASA SERC digital correlator projects p 1765 N94-21708
Index to 1992 NASA Tech Briefs, volume 16, numbers 1-12
[NASA-TM-109377] p 2053 N94-21736

Index to 1991 NASA Tech Briefs, volume 15, numbers 1-12
[NASA-TM-109376] p 2053 N94-21737
Cumulative index to NASA Tech Briefs, 1986-1990, volumes 10-14
[NASA-TM-109378] p 2054 N94-21738
An overview of the radiation component of the NASA TOGA-COARE experiment p 1881 N94-22344
Johnson Space Center CFD grid generation requirements p 1919 N94-22355
NASA's astrophysics archives at the National Space Science Data Center p 2049 N94-22541

NASA SPACE PROGRAMS
The future of remote sensing from space: Civilian satellite systems and applications
[OTA-ISC-558] p 1837 N94-20209

NATIONAL PARKS
Linear mixing model applied to AVHRR LAC data p 1838 N94-20958

NATURAL GAS
Speed of sound data and related models for mixtures of natural gas constituents
[PB93-200822] p 1968 N94-21447
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452
Current situation in developing petroleum substituting energy (the United Kingdom)
[DE94-714897] p 1713 N94-22091

NATURAL LANGUAGE (COMPUTERS)
Are types needed for natural language?
[PB93-191831] p 1949 N94-19997
Nominalization, prediction and type containment
[PB93-191799] p 1898 N94-20082
Connectionism and Natural Language Processing
[MEMO-INF-92-64] p 1940 N94-20242
A single layer higher order neural net and its application to grammar recognition p 1941 N94-20251
A modular design for connectionist parsing p 1941 N94-20252
Syntactic neural networks for natural language processing p 1941 N94-20254
DISCERN: A distributed neural network model of script processing and memory p 1941 N94-20255
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session)
[AD-A272125] p 1942 N94-20573

NATURAL LANGUAGE PROCESSING
Are types needed for natural language?
[PB93-191831] p 1949 N94-19997
A computational theory of lexical relatedness
[TR-421] p 1904 N94-20067
Causal reconstruction
[AD-A271692] p 1908 N94-20929
Recognizing hesitation phenomena in continuous, spontaneous speech p 1746 N94-22210
Intelligent text retrieval in the NASA astrophysics data system p 2048 N94-22499

NAUSEA
Changes in plasma vasopressin during motion sickness in cats p 1885 N94-21898
Current status: Animal models of nausea p 1889 N94-21915

NAVIER-STOKES EQUATION
Linear and nonlinear PSE for compressible boundary layers
[NASA-CR-191537] p 1797 N94-20033
A comparison of two incompressible Navier-Stokes algorithms for unsteady internal flow
[NASA-TM-108794] p 1798 N94-20104
Head-on collision of drops: A numerical investigation
[NASA-TM-106394] p 1798 N94-20167
Some practical turbulence modeling options for Reynolds-averaged full Navier-Stokes calculations of three-dimensional flows
[NASA-TM-106399] p 1637 N94-20534
Prediction and control of vortex-dominated and vortex-wake flows
[NASA-CR-194722] p 1637 N94-21054
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169
An efficient numerical method for three-dimensional hypersonic flow
[AD-A272506] p 1637 N94-21411
Time-accurate Navier-Stokes calculations with multigrid acceleration p 1956 N94-21469
Looking for O(N) Navier-Stokes solutions on non-structured meshes p 1806 N94-21471
Multigrid solution of the Navier-Stokes equations on highly stretched grids with defect correction p 1806 N94-21481
On the prediction of multigrid efficiency through local mode analysis p 1959 N94-21486
Numerical study of a multigrid method with four smoothing methods for the incompressible Navier-Stokes equations in general coordinates p 1806 N94-21487
A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591
Mixed finite element and finite volume methods
[ISBN-0-315-63035-3] p 1805 N94-22417

NAVIGATION AIDS
Comparison of a distributed Kalman filter versus a centralized Kalman filter with fault detection considerations
[AD-A270713] p 1903 N94-19969

NAVIGATION INSTRUMENTS
Automatic AVHRR image navigation software
[NASA-CR-194602] p 1643 N94-20148
A software architecture for a small autonomous underwater vehicle navigation system
[AD-A272322] p 1643 N94-21037

NAVY
Audit report. Navy's aircraft structural life surveillance program data recorders
[AD-A270391] p 1645 N94-20040

NEAR FIELDS
Probe compensation in cylindrical near-field scanning: A novel simulation methodology p 1718 N94-20404
Massively parallel computation of RCS with finite elements p 1726 N94-20437
Applications of planar near-field measurements to electromagnetic radiation and interference problems p 1747 N94-22252

NEAR INFRARED RADIATION
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging p 2101 N94-20685
Spatial distribution of near infrared line radiation in galactic nuclei measured with Fabry-Perot spectrometer FAST
[MPE-239] p 2081 N94-21138
Deep near-infrared survey of the Southern Sky (DENIS) p 2062 N94-22467

NEAR WAKES
Near wake measurements on a rotor model with Mie-vanes in the Delft open jet tunnel
[PB93-215382] p 1638 N94-22260

NEBULAE
Formation of the low-mass solar nebula p 2109 N94-20728
Diffusive redistribution of water vapor in the solar nebula revisited p 2113 N94-20751
Magnetically controlled solar nebula p 2120 N94-20791
Magnetic reconnection in emission nebulae in clusters of galaxies p 2010 N94-22700

NEGATIVE ELECTRON AFFINITY
Growth, characterization and device development in monocrystalline diamond films
[AD-A272715] p 2026 N94-21190

NEGATIVE FEEDBACK
Temperature and Doppler coefficients of various space nuclear reactors
[DE94-001388] p 1671 N94-21979

NEGATIVE IONS
Optimization and control of a small angle ion source using an adaptive neural network controller
[DE93-040063] p 1946 N94-21845

NEGATIVE RESISTANCE CIRCUITS
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214

NEGATIVE RESISTANCE DEVICES
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214

NEODYMIUM
Optical properties of chromium and neodymium in zirconium - barium - lanthanum - aluminum fluoride glass
[AD-A271609] p 1987 N94-21236

NEODYMIUM COMPOUNDS
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO2
[DE93-040229] p 2033 N94-21993

NEODYMIUM ISOTOPES
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
[CONTRIB-5241(804)] p 2084 N94-20795

NEODYMIUM LASERS
Development of a lidar for integration with the Naval Postgraduate School Infrared Search and Target Designation (NPS-IRSTD) system
[AD-A271847] p 1817 N94-20611
Simulations of spectral broadening by cross-phase modulation (XPM) with chaotic light pulses
[DE93-019623] p 1819 N94-21872
Effect of bandwidth on beam smoothing and frequency conversion at the third harmonic of the Nova laser
[DE93-019917] p 1819 N94-21920

NEON
Helium in interplanetary dust particles p 2082 N94-20653

NEON ISOTOPES
SCR neon and argon in Kapoeta feldspar: Evidence for an active ancient Sun p 2106 N94-20712

NEPHANALYSIS
An analysis of cloud-cover reporting in the 1977 surface observation database
[AD-A271102] p 1864 N94-19852

NEPTUNIUM
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827

NEPTUNIUM COMPOUNDS
Theoretical studies of the structures and electronic properties of U(NH2)(sub 3) and Np(NH2)(sub 3)
[DE94-000768] p 2031 N94-21857

NERVES
The role of axon-Schwann cell interactions in nervous system ionic homeostasis
[AD-A270936] p 1890 N94-20045
Theoretical and numerical examinations of nonlinear parameter dependent advanced differential difference equations
[ETN-93-93681] p 1952 N94-21042
Immunocytochemical localization of glutamic acid decarboxylase (GAD) and substance P in neural areas mediating motion-induced emesis: Effects of vagal stimulation on GAD immunoreactivity p 1887 N94-21909

NERVOUS SYSTEM
The role of axon-Schwann cell interactions in nervous system ionic homeostasis
[AD-A270936] p 1890 N94-20045
The effects of area postrema lesions and selective vagotomy on motion-induced conditioned taste aversion p 1888 N94-21910

NETHERLANDS
Soil temperatures
[KNMI-WR-92-05] p 1865 N94-20309

NETWORK ANALYSIS
SPICE macromodel for a 1-megawatt power MOSFET switch
[DE93-019415] p 1748 N94-19844
High resolution signal processing
[AD-A271181] p 1717 N94-20215
An evaluation of artificial neural network modeling for manpower analysis
[AD-A273001] p 1945 N94-21269
Sorting network for the partial selection problem p 1773 N94-22121
A neural network approach to the maximum flow problem p 1783 N94-22183
Throughput and blocking in circuit-switched interconnection networks p 1784 N94-22189
Neural networks for optimum routing in packet-switched communications networks p 1746 N94-22205

NETWORK CONTROL
Physics Detector Simulation Facility. Phase 2: System software description
[DE93-019745] p 1928 N94-19812
Networks Technology Conference
[NASA-CP-3241] p 1931 N94-21323
The NCC project: A quality management perspective p 1828 N94-21324
Let your fingers do the walking: The projects most invaluable tool p 1922 N94-21325
Software metrics: The key to quality software on the NCC project p 1922 N94-21326
Enhanced networks operations using the X Window System p 1932 N94-21329
The automated ground network system p 1932 N94-21330
Mission Operations Support Area (MOSA) for ground network support p 1932 N94-21331
Space network scheduling benchmark: A proof-of-concept process for technology transfer p 1932 N94-21332
Distributed intelligent control and status networking p 1932 N94-21335
Developing a space network interface simulator: The NTS approach p 1933 N94-21343
A packet switched communications system for GRO p 1744 N94-21345
A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites
[NASA-CR-191200] p 1782 N94-21566

NETWORKS
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549

NEURAL NETS
Metrics for specifying and/or testing neural networks statement of government interest [AD-D015946] p 1938 N94-19843
A complex systems approach to computational molecular biology [DE93-040062] p 1884 N94-19866
Building brains for bodies [AD-A270531] p 1939 N94-19875
Center for neural engineering [AD-A271164] p 1890 N94-20185
Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188
Self-organization via active exploration in robotic applications. Phase 2: Hybrid hardware prototype [NASA-CR-194723] p 1939 N94-20212
Connectionism and Natural Language Processing [MEMO-INF-92-64] p 1940 N94-20242
Representation of spoken words in a self-organizing neural net p 1940 N94-20243
Modeling the human mental lexicon with self-organizing feature maps p 1743 N94-20244
Speech synthesis with artificial neural networks p 1743 N94-20245
Generalization performance of backpropagation learning on a syllabification task p 1940 N94-20246
Hopfield models as neural-network acceptors p 1941 N94-20250
A single layer higher order neural net and its application to grammar recognition p 1941 N94-20251
Syntactic neural networks for natural language processing p 1941 N94-20254
DISCERN: A distributed neural network model of script processing and memory p 1941 N94-20255
Applying the INN model to the MaxClique [DE93-040137] p 1906 N94-20276
Electronic neural network for solving traveling salesman and similar global optimization problems [NASA-CASE-NPO-17807-2-CU] p 1942 N94-20360
Neural network for processing both spatial and temporal data with time based back-propagation [NASA-CASE-MSC-21874-1] p 1942 N94-20366
Retrieval of ice thickness from polarimetric SAR data p 1724 N94-20432
Application of neural network to remote sensing of soil moisture using theoretical polarimetric backscattering coefficients p 1730 N94-20455
Center for the integration of optical computing [AD-A271874] p 1899 N94-20469
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session) [AD-A272125] p 1942 N94-20573
Simulating a user's preferences: Towards automated artificial evolution for computer generated images [AD-A272058] p 1942 N94-20621
Algorithm/architecture study for artificial neural nets [AD-A271820] p 1943 N94-20626
An application of the Cerebellar Model Articulation Controller for a switched reluctance rotor position estimator [AD-A271769] p 1943 N94-20926
Neural network studies [AD-A271593] p 1943 N94-20947
Robust neural classifier circuits using asynchronous design p 1757 N94-21111
An evaluation of artificial neural network modeling for manpower analysis [AD-A273001] p 1945 N94-21269
Application of a back-propagation neural network to isolated-word speech recognition [AD-A272495] p 1945 N94-21430
A mean field neural network for hierarchical module placement p 1766 N94-21720
A comparative robustness evaluation of feedforward neurofilters [NASA-TM-106440] p 1650 N94-21742
Simulated behaviour of large scale SCI rings and tori [DE93-040149] p 1935 N94-21745
Optimization and control of a small angle ion source using an adaptive neural network controller [DE93-040063] p 1946 N94-21845
Estimation of AR signal patterns using competitive neural networks p 1744 N94-22102
Signal classification and noise filtering using artificial neural networks p 1744 N94-22103
Noise filtering using multilayer feedforward neural network p 1770 N94-22104
A neural network for multiresolution edge detection p 1779 N94-22163
Improvement in invariant pattern recognition with neural networks and Fourier-Mellin filters p 1780 N94-22164
A neural M-ary tree method for data compression p 1780 N94-22166
Cascaded recursive artificial neural networks p 1780 N94-22167
On the discovery of approximate arithmetic relations by backpropagation networks p 1782 N94-22181
Logic oriented neural networks p 1782 N94-22182
A neural network approach to the maximum flow problem p 1783 N94-22183
A Hopfield neural net for discrete Fourier transform calculation p 1783 N94-22184
Interference reduction using neural networks p 1783 N94-22186
A pyramid neural network architecture for stereo fusion p 1785 N94-22201
Neural networks for optimum routing in packet-switched communications networks p 1746 N94-22205
Acceleration of backpropagation learning using a parallel DSP machine p 1786 N94-22206
A framework of connectionist network toward speech waveform coding p 1746 N94-22211
Speaker-independent isolated-digit recognition using neural networks and hidden Markov model p 1747 N94-22213
Fuzzy and neural control [NASA-TM-108753] p 1947 N94-22270
A neural network prototyping package within IRAF p 1949 N94-22451
STARBASE: Database software for the automated plate scanner p 1927 N94-22512
General asymmetric neural networks and structure design by genetic algorithms: A learning rule for temporal patterns [DE94-001254] p 1947 N94-22563

NEUROLOGY
Incongruity, incongruity resolution, and mental states: The measure and modification of situational awareness and control [NASA-CR-194568] p 1893 N94-20168
Relationship of area postrema to three putative measures of motion sickness p 1885 N94-21900
The effects of area postrema lesions and selective vagotomy on motion-induced conditioned taste aversion p 1888 N94-21910
Current status: Animal models of nausea p 1889 N94-21915

NEURONS
The role of axon-Schwann cell interactions in nervous system ionic homeostasis [AD-A270936] p 1890 N94-20045
Toward a neurobiological theory of visual attention [AD-A270724] p 1890 N94-20112

NEUROPHYSIOLOGY
The role of axon-Schwann cell interactions in nervous system ionic homeostasis [AD-A270936] p 1890 N94-20045
Toward a neurobiological theory of visual attention [AD-A270724] p 1890 N94-20112
Gamma-aminobutyric acid (GABA) and neuropeptides in neural areas mediating motion-induced emesis p 1886 N94-21902

NEUROTRANSMITTERS
The role of axon-Schwann cell interactions in nervous system ionic homeostasis [AD-A270936] p 1890 N94-20045
Gamma-aminobutyric acid (GABA) and neuropeptides in neural areas mediating motion-induced emesis p 1886 N94-21902
Immunocytochemical localization of glutamic acid decarboxylase (GAD) and substance P in neural areas mediating motion-induced emesis: Effects of vagal stimulation on GAD immunoreactivity p 1887 N94-21909

NEUTRAL ATMOSPHERES
Modeling of the coupled magnetospheric and neutral wind dynamos [NASA-CR-194728] p 1856 N94-20537

NEUTRAL ATOMS
Uncertainty limited atomic position measurement using optical fields [AD-A271013] p 1970 N94-19822

NEUTRAL BEAMS
Fast ion behavior during neutral beam injection in ATF [DE93-040267] p 1992 N94-20058

NEUTRAL GASES
Design aspects and parametric characterisation of a neutral rare gas laser [AD-A271100] p 1814 N94-19850
Electronically metastable molecules of high symmetry [AD-A272015] p 1974 N94-21461

NEUTRINOS
CERN-derived analysis of lunar radiation backgrounds p 2080 N94-20880
A Monte Carlo study of the Sudbury Neutrino Observatory small test detector experiment [ISBN-0-315-59056-4] p 1977 N94-22416
Neutrino emission processes in dense high-temperature plasmas p 2001 N94-22638

NEUTRON DIFFRACTION
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4 [DE93-019009] p 1972 N94-20187
Neutron-scattering studies of Yb-bearing silicate glasses [DE93-019768] p 1700 N94-20265
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys [DE93-040135] p 2015 N94-20275

NEUTRON IRRADIATION
AGB stars as a source of short-lived radioactive nuclei in the solar nebula p 2133 N94-20859
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources [DE93-040280] p 1706 N94-21542
Issues related to mechanical properties of neutron-irradiated ceramics [DE93-040262] p 1707 N94-21560
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates [DE93-018786] p 1696 N94-22037

NEUTRON SCATTERING
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4 [DE93-019009] p 1972 N94-20187
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys [DE93-040135] p 2015 N94-20275
Spectroscopic studies of magnetic transitions in TbPO4 [DE94-001274] p 2035 N94-22565
Inelastic neutron scattering of (gamma)-iron, and the determination of the elastic constants by lattice dynamics [DE94-000694] p 1978 N94-22573

NEUTRON SOURCES
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4 [DE93-019009] p 1972 N94-20187

NEUTRON STARS
Dark matter: Neutron star halo and the nature of gamma-bursts p 2002 N94-22643
Relativistically expanding pair plasmas as bursting sources of cosmic gamma rays p 2003 N94-22646
Gamma ray burst as a result of the explosive instability in the magnetosphere of old neutron star p 2007 N94-22675

NEUTRONS
Neutron and PIMC determination of the longitudinal momentum distribution of HCP, BCC and normal liquid He-4 [DE93-019009] p 1972 N94-20187
SLAC measurement of the neutron spin structure function [DE93-040998] p 1975 N94-21788
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario [DE94-001183] p 2032 N94-21972

NEWTON METHODS
Comparing quasi-Newton methods for solving sparse interface problems [CWI-NM-R9303] p 1959 N94-21576
First MEM task IRMEO in IRAF p 1928 N94-22551

NEWTONIAN FLUIDS
Canonically covariant formulation of Landau's Newtonian superfluid dynamics [PB93-221034] p 1805 N94-22272

NICKEL
Collisions of molecules with clusters: A quasiclassical study [DE93-018614] p 1971 N94-20050
Lightweight battery electrode and method of making it [AD-D015895] p 1749 N94-20120
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona p 1863 N94-20889
Preliminary AEM study of the microstructure and composition of metal particles in ordinary chondrites p 2086 N94-20894
Shattering the myth of the resonantly photo-pumped neon-like titanium laser [DE93-019624] p 1819 N94-21873
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo) [DE93-041320] p 1694 N94-21943
Transferable tight-binding parameters: An application to Ni and Ni-Al alloys [DE94-001044] p 1695 N94-22023

NICKEL ALLOYS
Segregation of Si to the surface of Fe-29Ni-17Co alloy [DE93-040053] p 1687 N94-19864

Current status of environmental, health, and safety issues of nickel metal-hydride batteries for electric vehicles
[DE93-017079] p 1748 N94-19902
Production of NiAl and TiAl intermetallics by mechanical alloying
[VTT-JULK-760] p 1691 N94-20530
Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21762
Molecular dynamics modeling of the mechanical behavior of metallic multilayers
[DE93-019947] p 1694 N94-21921
Ni3Al aluminide alloys
[DE94-000493] p 1694 N94-21933
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948
First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21964
Shape memory metals
[DE94-001373] p 1695 N94-21976
Transferable tight-binding parameters: An application to Ni and Ni-Al alloys
[DE94-001044] p 1695 N94-22023
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates
[DE93-018786] p 1696 N94-22037

NICKEL CADMIUM BATTERIES
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885

NICKEL COATINGS
Lightweight battery electrode and method of making it
[AD-D015895] p 1749 N94-20120

NICKEL HYDROGEN BATTERIES
System performance predictions for Space Station Freedom's electric power system
[NASA-TM-106396] p 1667 N94-20062

NICKEL IRON BATTERIES
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885

NICKEL ISOTOPES
FE-60 and the evolution of eucrites
p 2083 N94-20768
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona
p 1863 N94-20889

NIGHT VISION
Night vision goggle model F4949 preflight adjustment/assessment procedures
[AD-A271079] p 1895 N94-19935

NIOBIUM ALLOYS
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093
Properties and potential of high-temperature niobium beryllides
[DE93-019169] p 1690 N94-20233
Strengthening and toughening in refractory metal alloys
[DE93-019942] p 1695 N94-21986

NIOBIUM CARBIDES
Performance of carbon-based hot frit substrates
[DE94-000509] p 1676 N94-21754

NITRAMINE PROPELLANTS
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181

NITRATE ESTERS
High melting amino aromatic nitrate esters
[AD-D015929] p 1711 N94-19801

NITRATES
Solar proton events from a 180 year depth profile of nitrate concentrations from the central Greenland ice sheet
[AD-A272888] p 2147 N94-21196

NITRIDING
Evaluation of radiation effects in re-oxidized nitrided oxide devices by hot carrier stressing at 77 K
p 1754 N94-21084

NITROBENZENES
Evaluation of pre-extraction analytical holding times for nitroaromatic and nitramine explosives in water
[AD-A271547] p 1712 N94-20927

NITROGEN
Chemical equilibrium in high pressure molecular fluid mixtures
[DE93-040160] p 1796 N94-19829
Phonons and metastability in compressed nitrogen
[DE93-019913] p 2016 N94-20318
Implantation of nitrogen: Effects of hydrogen and implantation energy p 1686 N94-20804
Are the C delta light nitrogen and noble gases located in the same carrier? p 2085 N94-20846
Polymeric nitrogen
[DE93-040544] p 1706 N94-21512

NITROGEN COMPOUNDS
Physical chemistry of energetic nitrogen compounds
[AD-A271819] p 1712 N94-20625

NITROGEN ISOTOPES
A carbon and nitrogen isotope study of carbonaceous vein material in ureilite meteorites p 2083 N94-20726
Requirements for the early atmosphere of Mars from nitrogen isotope ratios p 2144 N94-21669

NITROGEN OXIDES
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies
[DE93-041130] p 1826 N94-21938
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391

NITROGEN PLASMA
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583

NITROMETHANE
Computer simulation of molecular response at a shock front
[DE94-001050] p 1977 N94-22396

NOISE (SOUND)
The causes of contact noise
[REPT-92-100] p 1822 N94-20157

NOISE INTENSITY
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign
p 1725 N94-20434
The relative noise levels of parallel axis gear sets with various contact ratios and gear tooth forms
[NASA-TM-106431] p 1826 N94-21756

NOISE MEASUREMENT
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
Detector noise statistics in the non-linear regime
p 1748 N94-22526

NOISE POLLUTION
Aircraft noise effects on cultural resources: Recommendation and rationale for further research
[PB93-205326] p 1968 N94-22053
Aircraft noise effects on cultural resources: Annotated bibliography
[PB93-205334] p 1969 N94-22054

NOISE PREDICTION
Activities Report of the Institute of Applied Physics
[ETN-93-93749] p 1966 N94-21798
Traffic noise in a roundabout way
p 1966 N94-21799

NOISE REDUCTION
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952
VLSI mixed signal processing system
p 1744 N94-21100
Survey of lift-fan aerodynamic technology
[NASA-CR-177615] p 1646 N94-21592
Active control of wake/blade-row interaction noise through the use of blade surface actuators
[NASA-CR-4556] p 1968 N94-21608
Journal of rehabilitation research and development, volume 30, number 1, 1993
[AD-A272956] p 1893 N94-21613
The relative noise levels of parallel axis gear sets with various contact ratios and gear tooth forms
[NASA-TM-106431] p 1826 N94-21756
Signal classification and noise filtering using artificial neural networks p 1744 N94-22103
Noise filtering using multilayer feedforward neural network p 1770 N94-22104
Sub-band adaptive noise cancelling
p 1774 N94-22125
Applications of a two-dimensional nonlinear filters to image restoration p 1789 N94-22225

NOISE SPECTRA
Study of the utilization of thin oxides in indium phosphides for the realisation of electron components
[ECL-92-38] p 2018 N94-20593
Defect motion as the origin of the 1/f conductance noise in solids
[EUT-92-E-259] p 2029 N94-21552

NOISE TEMPERATURE
Quantum noise studies with superconducting tunnel junction mixers
[AD-A270897] p 2012 N94-19897

NONADIABATIC THEORY
Consequences of chaotic particle motion for the stability of space plasma current sheets p 2001 N94-22636

NONCONDENSABLE GASES
The FY1992 survey on commercialization of Stirling engine utilization equipment
[DE94-707416] p 1849 N94-22029

NONDESTRUCTIVE TESTS
Quantitative evaluation of material composition of composites using x ray energy-dispersive NDE technique
[DE93-041157] p 1672 N94-19888
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
Three-dimensional dynamic thermal imaging of structural flaws by dual-band infrared computed tomography
[DE93-019575] p 1906 N94-20316
Development of improved processing and evaluation methods for high reliability structural ceramics for advanced heat engine applications, phase 1
[DE93-040528] p 1702 N94-20481
Spectroscopic ellipsometry studies of HF treated Si (100) surfaces p 1734 N94-20508
Ellipsometric study of Si(0.5)Ge(0.5)/Si strained-layer superlattices p 1734 N94-20509
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis
p 1710 N94-20984
Thermal diffusivity measurements by photothermal laser beam deflection (PTD): Data analysis using the Levenberg-Marquardt algorithm p 1820 N94-21006
Thermal characterization of thin films by photothermally induced laser beam deflection p 1710 N94-21007
Non-destructive evaluation in manufacturing using spectroscopic ellipsometry p 1828 N94-21012
VASE (variable angle spectroscopic ellipsometry)
p 1687 N94-21014
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
Damage states around fastener holes in thick graphite/epoxy composite laminates
[AD-A272613] p 1675 N94-21504
Surface and subsurface defect detection in Si3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940
Three dimensional ultrasonic imaging
[DE93-040549] p 1968 N94-22003
Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000665] p 1697 N94-22571
An embedded fibre optic for damage growth monitoring in Kevlar composites
[ISBN-0-315-83501-X] p 1677 N94-22589

NONEQUILIBRIUM FLOW
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments)
[AD-A272918] p 1802 N94-21220

NONINTRUSIVE MEASUREMENT
Fundamentals and applications of variable angle spectroscopic ellipsometry p 1687 N94-21011
Measurement of thermal-hydraulic parameters in two-phase flow using flow visualization image analysis
[DE93-006255] p 1805 N94-22269

NONLINEAR EQUATIONS
Dynamical systems and nonlinear partial differential equations
[AD-A271514] p 1951 N94-20545
Two-dimensional nonlinear Schrodinger equations and their properties
[AD-A272184] p 1952 N94-20923
Universality in blow-up for non linear heat equations
[PB93-215465] p 2038 N94-22095
Non-linear analysis of the electrical properties of the active circuits of high-frequency oscillators
p 1785 N94-22195
On the nonlinear instability of thermal structures
p 2006 N94-22668

NONLINEAR FILTERS
A comparative robustness evaluation of feedforward neurofilters
[NASA-TM-106440] p 1650 N94-21742
Applications of a two-dimensional nonlinear filters to image restoration p 1789 N94-22225

NONLINEAR OPTICS
Complex and stereoregular nonlinear optical materials
[AD-A271067] p 1983 N94-19846

Multidimensional solitons in fiber arrays
[DE93-019923] p 1963 N94-19862
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953
Optical switching devices
[AD-D015918] p 1984 N94-20059
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20406
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
Statistical fluctuations in lasers
[DE94-000710] p 1817 N94-20939
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
Azo polymers for optical storage 3: Effect of film thickness on net phase retardation and writing speed
[AD-A272994] p 1705 N94-21267
Photonics and nonlinear optics with molecular materials and polymers
[AD-A271747] p 1988 N94-21457
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505
Optical processing in photorefractive media p 1789 N94-22222

NONLINEAR SYSTEMS
Acoustic microscopy and nonlinear effects in pressurized superfluid helium
[AD-A270598] p 1967 N94-19949
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169
The block adaptive multigrid method applied to the solution of the Euler equations p 1641 N94-21472
High temperature superconducting planar circuit structure for high frequency applications
[AD-A273083] p 2028 N94-21521
Improvements to a method for the geometrically nonlinear analysis of compressively loaded stiffened composite panels
[NASA-CR-194715] p 1832 N94-21814
The spectral world coordinate systems in IRAF/NOAO p 2049 N94-22539
Response statistics of shell structures with geometrical and material nonlinearities, volume 1
[ISBN-0-315-84006-4] p 1833 N94-22590

NONLINEARITY
Nonlinear acoustics: Periodic waveguide, finite-amplitude propagation in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A270530] p 1967 N94-19894
Study of transverse coupled bunch instabilities by using non-linear Taylor maps for the Advanced Light Source (ALS)
[DE93-040287] p 1979 N94-19989
Design of a controllable pitch underwater thruster system
[AD-A271140] p 1821 N94-20021
Emittance measurement and modeling of the ALS 50 MeV LINAC to booster line
[DE93-040116] p 1979 N94-20273
The coherent backscattering opposition effect p 1991 N94-20646
RADCAL: A narrow-band model for radiation calculations in a combustion environment
[PB93-200889] p 1682 N94-21448
A unified Monte Carlo interpretation of particle simulations and applications to nonneutral plasmas
[DE94-001231] p 1997 N94-21973

NONNEWTONIAN FLUIDS
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690

NONTHERMAL RADIATION
Nonthermal planetary radio emissions: Theories and observations p 2001 N94-22635

NORMAL DENSITY FUNCTIONS
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
The missing impact craters on Venus p 2119 N94-20782
Measure fields for function approximation
[AD-A272660] p 1964 N94-21215

NORMALITY
On estimation and testing in Poisson regression models with over-dispersion
[MEMO-1083] p 1963 N94-21076
A sharp upper bound for departure from normality
[DE93-040457] p 1960 N94-21966

NORMALIZING (STATISTICS)
Set theory and nominalisation, part 2
[PB93-191815-PT-2] p 1962 N94-20008

NOSE CONES
Compilation of reinforced carbon-carbon transatlantic abort landing arc jet test results
[NASA-TM-104778] p 1676 N94-21834

NOSES (FOREBODIES)
A theoretical investigation of unsteady separation phenomena related to dynamic stall
[AD-A271865] p 1636 N94-20465

NOVA LASER SYSTEM
Effect of bandwidth on beam smoothing and frequency conversion at the third harmonic of the Nova laser
[DE93-019917] p 1819 N94-21920

NOVAE
Properties of x ray emission from x ray novae p 2007 N94-22676

NOWCASTING
Design document and database specifications for the Naval Interactive Data Analysis System (NIDAS), version 1.0
[NASA-CR-194817] p 2045 N94-21865

NOZZLE DESIGN
Experimental investigation of nozzle/plume aerodynamics at hypersonic speeds
[NASA-CR-194628] p 1636 N94-20014
A tutorial on the aero/thermodynamical design of liquid-propellant rocket engine nozzles p 1668 N94-20074
Shape optimization governed by the Euler equations using an adjoint method
[NASA-CR-191555] p 1950 N94-20092
Development of phased twin flip-flop jets
[NASA-TM-106404] p 1637 N94-20563

NOZZLE EFFICIENCY
Internal performance of a nonaxisymmetric nozzle with a rotating upper flap and a center-pivoted lower flap
[NASA-TP-3385] p 1637 N94-21569

NOZZLE GEOMETRY
A tutorial on the aero/thermodynamical design of liquid-propellant rocket engine nozzles p 1668 N94-20074
Internal performance of a nonaxisymmetric nozzle with a rotating upper flap and a center-pivoted lower flap
[NASA-TP-3385] p 1637 N94-21569

NOZZLE THRUST COEFFICIENTS
A tutorial on the aero/thermodynamical design of liquid-propellant rocket engine nozzles p 1668 N94-20074
Internal performance of a nonaxisymmetric nozzle with a rotating upper flap and a center-pivoted lower flap
[NASA-TP-3385] p 1637 N94-21569

NUCLEAR ASTROPHYSICS
New production mechanisms for unstable nuclei in stars, supernovae, and the big bang
[DE93-018627] p 2081 N94-21618

NUCLEAR BINDING ENERGY
Theoretical research program to study chemical reactions in AOTV bow shock tubes
[NASA-CR-194710] p 1804 N94-22027

NUCLEAR ELECTRIC POWER GENERATION
Technology to prevent greenhouse effect gases
[DE94-707420] p 1851 N94-20116
Current situation of development of petroleum substituting energies (USA)
[DE94-707492] p 1848 N94-22013

NUCLEAR ELECTRIC PROPULSION
Power conditioning system modelling for nuclear electric propulsion
[NASA-CR-191136] p 1846 N94-21179
NEP Early Flight program: System performance and development considerations
[NASA-TM-106415] p 1654 N94-21570
Brayton power conversion system parametric design modelling for nuclear electric propulsion
[NASA-CR-191135] p 1671 N94-21874

NUCLEAR ENGINE FOR ROCKET VEHICLES
Entry velocities at Mars and Earth for short transit times
[AD-A272591] p 1665 N94-21420

NUCLEAR EXPLOSIONS
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647

NUCLEAR FUSION
Longitudinal beam dynamics for heavy ion fusion using WARPrz
[DE93-019154] p 1992 N94-19915
Space-charge dominated beam transport in magnetic quadrupoles with large aperture ratios
[DE93-040443] p 1992 N94-20004
AGB stars as a source of short-lived radioactive nuclei in the solar nebula p 2133 N94-20859
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937
New production mechanisms for unstable nuclei in stars, supernovae, and the big bang
[DE93-018627] p 2081 N94-21618
Fourth International Toki Conference on Plasma Physics and Controlled Nuclear Fusion
[ESA-SP-351] p 2000 N94-22624

NUCLEAR MAGNETIC RESONANCE
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Examination of low level magnetic dipole intensities in the transition nuclei Sm-148, Sm-150, Sm-152 and Sm-154, with inelastic photon scattering at S-DALINAC
[ETN-93-95069] p 1971 N94-20030
Characterization of amorphous material in shocked quartz by NMR spectroscopy
[DE93-019069] p 1679 N94-20307
The 13C-NMR spectra of poly (4-((2-(acryloyloxy) ethyl) ethyl amino)- 4-nitroazobenzene-co-methyl methacrylate)
[AD-A273016] p 1705 N94-21238
Dynamics of adsorbed, swollen block copolymers
[AD-A272013] p 1706 N94-21460
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario
[DE94-001183] p 2032 N94-21972
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007

NUCLEAR PHYSICS
F-spin concept and g-bosons in the interceding boson model
[ETN-93-93607] p 1973 N94-21136
Summary of the Hadronic Weak Interaction session
[DE94-000592] p 1975 N94-21775
Likelihood analysis of parity violation in the compound nucleus
[DE94-000671] p 1977 N94-22572

NUCLEAR POWER PLANTS
Current situation of development of petroleum substituting energies (USA)
[DE94-707492] p 1848 N94-22013

NUCLEAR PROPULSION
Performance assessment of low pressure nuclear thermal propulsion
[NASA-TM-108433] p 1671 N94-21860
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386

NUCLEAR REACTIONS
On modelling nuclear reactions in meteorites p 2085 N94-20844
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744

NUCLEAR REACTORS
Power transmission by laser beam from lunar-synchronous satellite
[NASA-TM-4496] p 1669 N94-20102
Method for remotely powering a device such as a lunar rover
[NASA-CASE-LAR-14789-1] p 1824 N94-20587

NUCLEAR ROCKET ENGINES
SPACE-R Thermionic Space Nuclear Power System: Design and Technology Demonstration Program
[DE93-013969] p 1670 N94-21824

NUCLEAR SPIN
F-spin concept and g-bosons in the interceding boson model
[ETN-93-93607] p 1973 N94-21136

NUCLEAR STRUCTURE
Symmetry-dictated trucation: Solutions of the spherical shell model for heavy nuclei
[DE94-000482] p 1976 N94-21961

NUCLEATION
Shock induced condensation in fluids of high molar specific heat: Shock structure and relaxation
[MPIS-106/1993] p 1798 N94-20145
Kinetics of phase transformations in glass forming systems
[NASA-CR-194270] p 1701 N94-20347
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384

NUCLEI (NUCLEAR PHYSICS)
Examination of low level magnetic dipole intensities in the transition nuclei Sm-148, Sm-150, Sm-152 and Sm-154, with inelastic photon scattering at S-DALINAC
[ETN-93-95069] p 1971 N94-20030
Low p(sub T) phenomena observed in high energy nuclear collisions
[DE94-000825] p 1982 N94-21849
Likelihood analysis of parity violation in the compound nucleus
[DE94-000671] p 1977 N94-22572
NUCLEONS
A relativistic constituent quark model
[DE93-041085] p 1946 N94-21689
SLAC measurement of the neutron spin structure function
[DE93-040998] p 1975 N94-21788
NUCLIDES
Cosmogenic-radionuclide profiles in Knyahinya: New measurements and models p 2106 N94-20713
NULL HYPOTHESIS
State-space models for multichannel detection
[AD-A270608] p 1715 N94-19816
NUMBER THEORY
Semi-stability and heights of cycles
[PB93-215507] p 1961 N94-22377
NUMERICAL ANALYSIS
Numerical solution of differential-algebraic equations with ill-conditioned constraints
[AD-A270934] p 1949 N94-19898
Multi-disciplinary coupling effects for integrated design of propulsion systems
[NASA-TM-106349] p 1830 N94-20170
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351
Numerical methods for singularly perturbed differential equations with applications
[AD-A272112] p 1952 N94-20568
Numerical simulation of lava flows: Applications to the terrestrial planets p 1863 N94-20904
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937
Analytic solutions for optimized ellipsometric measurements of interfaces and surface layers in thin film structures p 2019 N94-20977
Numerical ranges and stability estimates
[TW-92-10] p 1953 N94-21060
Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264
Users manual for the NASA Lewis three-dimensional ice accretion code (LEWICE 3D)
[NASA-TM-105974] p 1642 N94-21590
Numerical method for computing the electric field produced by a microwave beam in a stratified medium p 1746 N94-22197
Performance of a simple circular polarization selective surface p 1746 N94-22198
NUMERICAL CONTROL
The Milling assistant, case-based Reasoning, and machining strategy: A report on the development of automated numerical control programming systems at New Mexico State University
[DE93-041101] p 2029 N94-21690
Performance evaluation of video on ethernet
[DE93-040696] p 1936 N94-21749
Proceedings of the IMOG (Interagency Manufacturing Operations Group) Numerical Systems Group
[DE94-001009] p 1917 N94-21851
Model-based reasoning for power system management using KATE and the SSM/PMAD
[NASA-CR-194716] p 1671 N94-21882
Enhanced software for the GT1022 automated gaging system
[DE94-001374] p 1918 N94-21977
Use of open systems for control, analysis, and data acquisition of the DIII-D tokamak
[DE94-001101] p 1998 N94-22089
Wilbur: A low-cost CCD camera system for MDM Observatory p 1814 N94-22510
NUMERICAL STABILITY
On the numerical stability of quasi-definite systems
[DE93-019404] p 1950 N94-20217
NUMERICAL WEATHER FORECASTING
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
The CSIRO 9-level atmospheric general circulation model
[CSIRO-TP-26] p 1855 N94-20256
Development and tests of a cloud physics parameterization for real-time aviation and public numerical weather forecasting
[PB93-202711] p 1868 N94-21427
A synoptic-scale overview of the TOGA COARE intensive observing period November 1992 to February 1993 based on analyses from US operational global data assimilation systems
[NASA-TM-104593] p 1868 N94-21605
Use of satellite data for validation of operational forecast models and operational analyses p 1861 N94-22291
NUSSELT NUMBER
A parametric study of heat transfer within a planar thermosyphon
[DE93-019546] p 1799 N94-20258

O

OBJECT PROGRAMS
Structural modeling: An application framework and development process for flight simulators
[AD-A271348] p 1650 N94-19880
Mint tutorial and user manual
[TR-452] p 1905 N94-20143
OBJECT-ORIENTED PROGRAMMING
A parallelizing compiler based on partial evaluation
[AD-A270838] p 1898 N94-19832
PREVAIL-DM: A framework-based environment for formal hardware verification
[RR-899] p 1905 N94-20164
Object-oriented DFD models to present the functional and behavioral views
[DE93-040206] p 1906 N94-20280
Design of a computer assisted tool for object oriented acquisition, modeling and simulation of knowledge structure
[ETN-93-94183] p 1910 N94-21152
The Mercury user's manual
[TR-465] p 1913 N94-21316
The three-dimensional Event-Driven Graphics Environment (3D-EDGE) p 1922 N94-21342
Reducing the cognitive workload: Trouble managing power systems
[NASA-TM-106413] p 1714 N94-21564
Termination and confluence of rule execution
[CWI-CS-R9309] p 1916 N94-21587
An evaluation of integration of the trace assertion method with the box structure method for coding in C++
[DE93-040480] p 1918 N94-21924
Database computing in HEP
[NASA-CR-194791] p 1921 N94-22375
An object-oriented data reduction system in Fortran p 2046 N94-22447
A structured data transfer protocol p 2047 N94-22450
C++, objected-oriented programming, and astronomical data models p 2063 N94-22473
Programmability in AIPS++ p 1926 N94-22482
An object-oriented approach for supporting both X and terminal interfaces p 1926 N94-22491
StarView: The object oriented design of the ST DADS user interface p 2049 N94-22548
OBLATE SPHEROIDS
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles p 1721 N94-20416
OBLIQUENESS
The connection between Venus' free obliquity and its CMB oblateness p 2139 N94-20896
OCEAN BOTTOM
On the sources of North Atlantic deep water
[AD-A270854] p 1881 N94-19895
Seafloor characterization/Galapagos propagating rift
[AD-A272001] p 1882 N94-20581
First discovery of the organic materials in deep-sea iron cosmic spherule p 1685 N94-20677
Iridium in sediments containing large abundances of Australasian microtektites from DSDP hole 758B in the Eastern Indian Ocean and from DSDP hole 769A in the Sulu Sea p 2083 N94-20741
Green Sheet project: Dye sheet evolution
[AD-A272019] p 1883 N94-21443
OCEAN CURRENTS
Shipboard ADCP observations during RRS Charles Darwin Cruise 62
[IOS-298-1992] p 1882 N94-20531
Offshore decision support system: ERS-1 pilot project WAVEWATCH
[BCRS-92-09] p 1865 N94-20532
Ocean mapping using satellite radar altimetry
[ETN-93-93470] p 1841 N94-21017
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222
Comparison of satellite-derived velocity fields in the coastal transition zone
[AD-A272565] p 1883 N94-21360
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
Green Sheet project: Dye sheet evolution
[AD-A272019] p 1883 N94-21443
Influence of geoid model uncertainty on the determination of ocean circulation with satellite altimetry
[PB93-219301] p 1842 N94-22097
OCEAN DATA ACQUISITIONS SYSTEMS
Shipboard ADCP observations during RRS Charles Darwin Cruise 62
[IOS-298-1992] p 1882 N94-20531
OCEAN DYNAMICS
Two microstrip arrays for interferometric SAR applications p 1722 N94-20421
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1866 N94-20559
Ocean wave height transformation model using surface roller theory
[AD-A272610] p 1883 N94-21423
OCEAN MODELS
SIMBAT theoretical manual
[AD-A271063] p 1882 N94-19979
The CSIRO 9-level atmospheric general circulation model
[CSIRO-TP-26] p 1855 N94-20256
Processing of climatological data for model initialization
[AD-A271678] p 1865 N94-20487
Seafloor characterization/Galapagos propagating rift
[AD-A272001] p 1882 N94-20581
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222
Ocean wave height transformation model using surface roller theory
[AD-A272610] p 1883 N94-21423
Green Sheet project: Dye sheet evolution
[AD-A272019] p 1883 N94-21443
OCEAN SURFACE
SIMBAT theoretical manual
[AD-A271063] p 1882 N94-19979
ERS-1 and Seasat scatterometer measurements of ocean winds: Model functions and the directional distribution of short waves p 1720 N94-20412
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
Two microstrip arrays for interferometric SAR applications p 1722 N94-20421
Near grazing scattering from non-Gaussian ocean surfaces p 1726 N94-20436
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439
Polarimetric thermal emission from rough surfaces p 1727 N94-20441
Polarimetric thermal emission from periodic water surfaces p 1728 N94-20445
A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A271911] p 1882 N94-20489
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1866 N94-20559
Four-dimensional remote sensing of the marine boundary layer with a digital beamforming radar wind profiler
[AD-A270627] p 1882 N94-20564
Neural network studies
[AD-A271593] p 1943 N94-20947
Models of refraction in the marine atmosphere surface layer
[AD-A271724] p 1858 N94-21357
Airborne surface backscattering strength measurements in the western Atlantic Ocean
[AD-A271737] p 1883 N94-21358
Presenting the Rain-Sea Interaction Facility
[NASA-RP-1322] p 1884 N94-21628
Marine boundary layer model evaluation by using a height gain measurement technique in the interference region p 1777 N94-22145
OCEAN TEMPERATURE
On the sources of North Atlantic deep water
[AD-A270854] p 1881 N94-19895
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222

OCEANOGRAPHIC PARAMETERS
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186

OCEANOGRAPHY
Distribution of turbidity in Australian tropical waters
[AD-A271059] p 1881 N94-19905
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186
Progress In Electromagnetics Research Symposium (PIERS)
[NASA-CR-194629] p 1718 N94-20403
Ocean mapping using satellite radar altimetry
[ETN-93-93470] p 1841 N94-21017
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
Low-cost Unmanned Air Vehicle (UAV) for oceanographic research
[AD-A273103] p 1646 N94-21507
A synoptic-scale overview of the TOGA COARE intensive observing period November 1992 to February 1993 based on analyses from US operational global data assimilation systems
[NASA-TM-104593] p 1868 N94-21605
Influence of geoid model uncertainty on the determination of ocean circulation with satellite altimetry
[PB93-219301] p 1842 N94-22097

OCEANS
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
A survey of the impact on acoustic propagation of warm core ocean eddys
[AD-A272188] p 1883 N94-20925
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222
Simulation of clear-sky outgoing longwave radiation over the oceans using operational analysis
p 1861 N94-22290

OCULOMETERS
Techniques used for the analysis of oculometer eye-scanning data obtained from an air traffic control display
[NASA-CR-191559] p 1643 N94-21629

OFFSHORE ENERGY SOURCES
Computer-aided design system for objects location and reservoir with dispersed resource evolution investigation
p 1923 N94-22064

OHMIC DISSIPATION
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-194728] p 1856 N94-20537
Complementary heterojunction FET technology for space application p 1755 N94-21094
A spheromak ignition experiment reusing Mirror Fusion Test Facility (MFTF) equipment
[DE94-001856] p 2034 N94-22050

OIL RECOVERY
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351

OILS
Biofuels: Project summaries
[DE93-010003] p 1712 N94-19984
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
New technique for oil backstreaming contamination measurements p 1652 N94-20511
Navy GTE seal development activity
p 1655 N94-21794

OLIVINE
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Petrogenesis of Apollo 12 mare basalts. Part 2: An open system model to explain the pigeonite basalt compositions p 1684 N94-20645
Lamellar olivine in the Divnoe achondrite: Evidence for high-pressure exsolution? p 1685 N94-20679
Determining the composition of olivine on asteroidal surfaces p 1686 N94-20805
The x ray microprobe determination of chromium oxidation state in olivine from lunar basalt and kimberlitic diamonds p 1686 N94-20807
Hydrothermal alteration experiments of olivine with varying Fe contents: An attempt to simulate aqueous alteration of the carbonaceous chondrites
p 1686 N94-20810
Measurements of the dielectric properties of simulated comet material as part of the KOSI 10 experiment
p 2085 N94-20641
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite p 2086 N94-20902
Diffuse reflectance spectra of orthopyroxene, olivine, and plagioclase as a function of composition and structure p 2087 N94-20906

OMNIDIRECTIONAL ANTENNAS
Mobile antenna development at JPL
p 1731 N94-20457
Mobile terminal antennas for helicopters
p 1731 N94-20458

ON-LINE PROGRAMMING
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114

ON-LINE SYSTEMS
Recommendations resulting from the SPDS Community-Wide Workshop
[NASA-CR-194684] p 2042 N94-20363
Research in image management and access
[NASA-CR-194797] p 1907 N94-20376
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114
Data management for interdisciplinary field experiments: OTTER project support
[NASA-CR-4559] p 1842 N94-22345
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485
The NSO FTS database program and archive (FTSDBM) p 1926 N94-22506
The EXOSAT database and archive
p 2048 N94-22521
Recommendations for a service framework to access astronomical archives p 2049 N94-22537

ONBOARD DATA PROCESSING
On-board closed-loop congestion control for satellite based packet switching networks
[NASA-TM-106446] p 1656 N94-21581
CREIR: A multiaccess protocol for on-board processing satellite systems p 1780 N94-22168
Timing recovery in the channel processor of a digital group demodulator p 1780 N94-22169
Experiences in airborne computing at NRC for geophysical exploration applications
p 1783 N94-22185

ONE DIMENSIONAL FLOW
Formulation of a next-generation interior ballistic code
[AD-A271539] p 1801 N94-20915

OPACITY
Opacity measurements in shock-generated argon plasmas
[DE94-001057] p 1998 N94-22399
Physical properties of dense astrophysical plasmas
p 2001 N94-22637

OPEN CIRCUIT VOLTAGE
Techniques for reducing error in the calorimetric measurement of low wattage items
[DE93-018472] p 1807 N94-20114

OPERATING COSTS
Spaceplane flight simulation: Project definition
[PB93-211399] p 1651 N94-22094

OPERATING SYSTEMS (COMPUTERS)
A response to Cheriton and Skeen's criticism of casual and totally ordered communication
[AD-A271486] p 1912 N94-21300
Use of open systems for control, analysis, and data acquisition of the DIII-D tokamak
[DE94-001101] p 1998 N94-22089
Fault tolerance for real-time multiprocessor operating systems p 1788 N94-22216

OPERATIONAL AMPLIFIERS
An 18 bit 50 kHz ADC for low earth orbit
p 1764 N94-21702

OPERATIONAL PROBLEMS
Planning process software: A user guide for the DMCA
[AD-A271252] p 1902 N94-19911

OPERATIONS RESEARCH
Controlling multisupplier operations by intelligent EDI
p 1744 N94-22076

OPERATORS (MATHEMATICS)
Explicit results on gl(lambda) and sl(lambda)
[MEMO-1075] p 1953 N94-21072
On the closure properties of #P in the context of PF of #P
[TR-445] p 1955 N94-21456

OPHIUCHI CLOUDS
Pre-main sequence stars in the Chamaeleon cloud and pre-main sequence stars in the Rho Ophiuchi cloud core
[NASA-CR-194713] p 2080 N94-20337

OPTICAL BISTABILITY
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358

OPTICAL COMMUNICATION
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952
Optical signal processing
[AD-A271036] p 1983 N94-20013
Design considerations for a fiber optic communications network for power systems
[DE93-018404] p 1984 N94-20179
Silicon retina for optical tracking systems
p 1755 N94-21098
QPPM receiver for free-space laser communications
[NASA-TM-106424] p 1741 N94-21567

OPTICAL COMPUTERS
Center for the integration of optical computing
[AD-A271874] p 1899 N94-20469
Addition of decimal numbers in optical computing architecture by Walsh coded digits p 1773 N94-22122

OPTICAL CONTROL
Design considerations for a fiber optic communications network for power systems
[DE93-018404] p 1984 N94-20179
A theory for optical wavelength control in short pulse free electron laser oscillators
[AD-A271706] p 1817 N94-21353

OPTICAL CORRECTION PROCEDURE
Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01
[NASA-TM-109344] p 1653 N94-20192
Holographic optical elements correcting the off-axis aberrations of a parabolic mirror
[ISBN-0-315-57581-6] p 1990 N94-22411
HST image restoration: A comparison of pre- and post-servicing mission results p 1925 N94-22478

OPTICAL COUPLING
Effects of stimulated Raman scattering on light beam properties during high-power laser beam long-path propagation
[AD-A273109] p 1818 N94-21509
Integrated optical coupling element on silicon substrate, appendix 2 p 1988 N94-21596

OPTICAL DATA PROCESSING
Optical signal processing
[AD-A271036] p 1983 N94-20013
Optical encoding of imaging data
[AD-D015915] p 1984 N94-20056
Center for the integration of optical computing
[AD-A271874] p 1899 N94-20469
Addition of decimal numbers in optical computing architecture by Walsh coded digits p 1773 N94-22122
Optical processing in photorefractive media
p 1789 N94-22222

OPTICAL DATA STORAGE MATERIALS
Optical processing in photorefractive media
p 1789 N94-22222

OPTICAL DISKS
An ASIC memory buffer controller for a high speed disk system p 1754 N94-21089

OPTICAL EMISSION SPECTROSCOPY
Spectroscopic studies of magnetic transitions in TbPO4
[DE94-001274] p 2035 N94-22565

OPTICAL EQUIPMENT
The aerogel mesh contamination collector
[AD-A270537] p 1651 N94-20011
Feedback controlled optics with wavefront compensation
[NASA-CASE-NPO-18194-1-CU] p 1985 N94-20305
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Dual-beam multiple wavelength light transmittance measurement for particle sizing in rocket motor plumes
[AD-A272491] p 1670 N94-21208
QPPM receiver for free-space laser communications
[NASA-TM-106424] p 1741 N94-21567
The Keck keyword layer p 1925 N94-22460
The optohydraulic servovalve: A novel device for the precise optical control of hydraulic pressure
[ISBN-0-315-83580-X] p 1827 N94-22577

OPTICAL FIBERS
Multidimensional solitons in fiber arrays
[DE93-019923] p 1983 N94-19862
Fiber optic Michelson sensor and arrays with passive elimination of polarization fading and source feedback isolation
[AD-D015944] p 1984 N94-20085
Plasma chemical vapor deposition of halide glasses
[AD-D015933] p 1701 N94-20331
Wide-angle imaging system with fiberoptic components providing angle-dependent virtual material stops
[NASA-CASE-NPO-18146-1-CU] p 1986 N94-20345
Disengagable adapter for an optical fiber connector
[AD-D015959] p 1822 N94-20356
Optical fibers and Fluorosensors having improved power efficiency and methods of producing same
[NASA-CASE-LAR-14525-1-CU] p 1986 N94-20378

Delivery of very high bandwidth with ATM switches and SONET
[DE93-019432] p 1899 N94-20476
Optical fiber sensor having an active core
[NASA-CASE-LAR-14607-1-SB] p 1986 N94-20586
Integrated optical coupling element on silicon substrate, appendix 2 p 1988 N94-21596
Fibre pigtailed silicon based low cost passive optical components, appendix 5 p 1989 N94-21599
A new innovative instrument for space plasma instrumentation
[NASA-CR-194736] p 1666 N94-21780
Simulations of spectral broadening by cross-phase modulation (XPM) with chaotic light pulses
[DE93-019623] p 1819 N94-21872
OTDR strain gauge for smart skins
[DE93-041043] p 1810 N94-21953
The data acquisition system for the Anglo-Australian Observatory 2-degree field project p 2048 N94-22529
Demodulation of a fiber Fabry-Perot strain rosette using white light interferometry
[ISBN-0-315-83427-7] p 1990 N94-22579
Phase demodulation of interferometric fiber-optic sensors
[ISBN-0-315-83425-0] p 1991 N94-22581
An embedded fibre optic for damage growth monitoring in Kevlar composites
[ISBN-0-315-83501-X] p 1677 N94-22589

OPTICAL FLOW (IMAGE ANALYSIS)

Segmenting the optical flow due to the motion of several rigid objects p 1777 N94-22147

OPTICAL HETERODYNING

Coherent lidar design and performance verification
[NASA-CR-193813] p 1816 N94-20341

OPTICAL MATERIALS

Complex and stereoregular nonlinear optical materials
[AD-A271067] p 1983 N94-19846
Optical switching devices
[AD-D015918] p 1984 N94-20059
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262
Optics survivability support, volume 2
[DE93-040310] p 1985 N94-20283
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Materials, Structures, and Devices for High-Speed Electronics
[NASA-CR-193177] p 2019 N94-20971
The 13C-NMR spectra of poly (4-((2-(acryloyloxy) ethyl) ethyl amino)- 4-nitroazobenzene-co-methyl methacrylate)
[AD-A273016] p 1705 N94-21238
IR materials producibility
[AD-A273031] p 1987 N94-21321
Combination of on ground experiments and analysis software for the evaluation of material degradation in space (SILEX project) p 1662 N94-21389
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526

OPTICAL MEASUREMENT

Wavefront sensors for optical diagnostics in fluid mechanics: Application to heated flow, turbulence, and droplet evaporation
[DE93-040060] p 1797 N94-19974
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1866 N94-20559
Optical measurement of built-in and applied electric fields in Al(x)Ga(1-x)As/GaAs heterostructures p 1796 N94-20989
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry p 2022 N94-20992
Long Duration Exposure Facility (LDEF) contamination study
[AD-A272419] p 1658 N94-21147
Precision prism coupling setup applied to measure planar silica films on silicon, appendix 9 p 1989 N94-21603
OTDR strain gauge for smart skins
[DE93-041043] p 1810 N94-21953

OPTICAL MEASURING INSTRUMENTS

Pointing control design for autonomous space vehicle applications
[DE93-019943] p 1657 N94-19863
Wavefront sensors for optical diagnostics in fluid mechanics: Application to heated flow, turbulence, and droplet evaporation
[DE93-040060] p 1797 N94-19974
Thermal dilation fiber optical flow sensor
[AD-D015926] p 1797 N94-20094
Photonic electromagnetic field sensor apparatus
[AD-D015938] p 1717 N94-20333
Photonic electromagnetic field sensor apparatus
[AD-D015939] p 1718 N94-20334
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
Army aircraft fire-detection systems operation and reliability
[AD-A271327] p 1641 N94-20912
Description and assessment of a new Optical Pressure Measurement System (OPMS) demonstrated in the high speed wind tunnel in Goettingen (Germany)
[DLR-FB-92-24] p 1651 N94-21280
CMU very fast range-imaging system
[AD-A272057] p 1761 N94-21282
Models of refraction in the marine atmosphere surface layer
[AD-A271724] p 1858 N94-21357
Integrated optical coupling element on silicon substrate, appendix 2 p 1988 N94-21596

OPTICAL MEMORY (DATA STORAGE)

Optoelectronic associative memory
[NASA-CASE-NPO-18278-1-CU] p 1985 N94-20303
Efficiency of reversible optical storage in azo polymers
[AD-A272923] p 1705 N94-21223
Azo polymers for optical storage 3: Effect of film thickness on net phase retardation and writing speed
[AD-A272994] p 1705 N94-21267

OPTICAL MICROSCOPES

Optical air pore analysis p 1708 N94-21892

OPTICAL PATHS

Photonic electromagnetic field sensor apparatus
[AD-D015938] p 1717 N94-20333
Photonic electromagnetic field sensor apparatus
[AD-D015939] p 1718 N94-20334
Mode transition matrix measuring system
[AD-D015973] p 1987 N94-21279

OPTICAL POLARIZATION

Optically induced rotation diffusion in polymer liquid crystals: Phenomenological theory and experimental verification
[ETN-93-95068] p 2014 N94-20026
Applications of variable angle spectroscopic ellipsometry in semiconductor technology p 2025 N94-21010
An integrated-optic polarization splitter on silicon substrate, appendix 4 p 1989 N94-21598

OPTICAL PROPERTIES

Complex and stereoregular nonlinear optical materials
[AD-A271067] p 1983 N94-19846
Innovative acoustic technique for studying new materials and new developments in solid state physics
[AD-A270540] p 2013 N94-19933
Study of electromagnetic wave scattering from characterized rough surfaces
[AD-A270931] p 1716 N94-19934
Research on defects and transport in amorphous-silicon-based semiconductors
[DE93-017117] p 2013 N94-19939
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186
Optical and transport properties of metallic and semiconductor nanostructures
[AD-A271716] p 2018 N94-20554
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1866 N94-20559
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
Optical effects of space weathering on lunar soils and the role of the finest fraction p 2101 N94-20687
MinMap: An imaging spectrometer for high resolution compositional mapping of the Moon p 1813 N94-20688
Visible-infrared properties of controlled laboratory soils p 1685 N94-20689
Sunphotometer network for monitoring aerosol properties in the Brazilian Amazon p 1839 N94-20961
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
Characterization of an asymmetric triangular multiple quantum well, by variable angle spectroscopic ellipsometry p 2022 N94-20995
Temperature dependence of optical properties of AlAs, studied by in-situ spectroscopic ellipsometry p 2023 N94-20999
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013
VASE (variable angle spectroscopic ellipsometry) p 1687 N94-21014
Obtaining surface optical properties from space-based lidar systems
[AD-A272831] p 1987 N94-21172
Optical properties of chromium and neodymium in zirconium - barium - lanthanum - aluminum fluoride glass
[AD-A271609] p 1987 N94-21236
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A272955] p 2027 N94-21248
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615
Optical properties of cirrus derived from airborne measurements during FIRE IFO 2 p 1872 N94-22297
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308
A numerical technique for the calculation of cloud optical extinction from lidar p 1874 N94-22309
Investigation of the effects of the macrophysical and microphysical properties of cirrus clouds on the retrieval of optical properties: Results for FIRE 2 p 1880 N94-22339

OPTICAL PUMPING

Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298
Generation of intense ultrashort x ray pulses
[DE93-019607] p 1817 N94-21299

OPTICAL RADAR

Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262
Coherent lidar design and performance verification
[NASA-CR-193813] p 1816 N94-20341
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1986 N94-20591
Development of a lidar for integration with the Naval Postgraduate School Infrared Search and Target Designation (NPS-IRSTD) system
[AD-A271847] p 1817 N94-20611
Examinations of a thallium atomic vapor filter for a Raman temperature lidar
[GKSS-92/E/13] p 1857 N94-21044
Obtaining surface optical properties from space-based lidar systems
[AD-A272831] p 1987 N94-21172
NOVAM evaluation utilizing electro-optics and meteorological data from KEY-90
[AD-A271722] p 1868 N94-21356
Green Sheet project: Dye sheet evolution
[AD-A272019] p 1883 N94-21443
The use of lidar for the evaluation of traffic-related urban pollution
[DE94-000704] p 1852 N94-22017
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals p 1871 N94-22295
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Lidar and radar derived cirrus microphysical properties for the 26 November 1991 case study p 1873 N94-22305
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308
A numerical technique for the calculation of cloud optical extinction from lidar p 1874 N94-22309
Observations of multi-layered clouds using K-band radar p 1874 N94-22311
Comparison of cloud boundaries measured with 8.6 mm radar and 10.6 micrometer lidar p 1875 N94-22317
CO2 lidar observations of Mount Pinatubo debris: FIRE 2 and longer-term measurements p 1876 N94-22323

OPTICAL RANGE FINDERS

The conceptual design of a short-range distance sensor p 1774 N94-22129
A feasibility study of a parallax-based passive missile approach warning system
[ISBN-0-315-60640-1] p 1743 N94-22410

OPTICAL REFLECTION

OTDR strain gauge for smart skins
[DE93-041043] p 1810 N94-21953
Chromaticity analysis of LANDSAT multispectral scanner and thematic mapper imagery of Chilko Lake, British Columbia, using a theoretical optical water quality model
[ISBN-0-315-63832-X] p 1843 N94-22422

OPTICAL RESONATORS
Novel N x N integrated channel waveguide optical crossbars for large scale high speed non-blocking data switching
[AD-A272065] p 1986 N94-20922
OPTICAL SCANNERS
Evaluation of a scanning Hartmann device for single point turning applications
[DE93-019204] p 1821 N94-19891
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1986 N94-20591
Surface acquisition through virtual milling p 1920 N94-22372
OPTICAL SWITCHING
Stochastic differential equations and numerical simulation for pedestrians
[DE93-040651] p 1949 N94-20006
Optical signal processing
[AD-A271036] p 1983 N94-20013
Optical switching devices
[AD-D015918] p 1984 N94-20059
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20406
Center for the integration of optical computing
[AD-A271874] p 1899 N94-20469
Novel N x N integrated channel waveguide optical crossbars for large scale high speed non-blocking data switching
[AD-A272065] p 1986 N94-20922
Non-destructive semiconductor wafer probing system using laser pulses to generate and detect millimeter-wave signals
[CA-PATENT-APPL-SN-2,020,73] p 1760 N94-21178
Mode transition matrix measuring system
[AD-D015973] p 1987 N94-21279
OPTICAL THICKNESS
Variable wavelength, variable angle ellipsometry including a sensitivities correlation test p 1710 N94-20978
Study of InGaAs-based modulation doped field effect transistor structures using variable-angle spectroscopic ellipsometry p 1796 N94-21001
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296
Optical properties of cirrus derived from airborne measurements during FIRE IFO 2 p 1872 N94-22297
Development of methods for inferring cloud thickness and cloud-base height from satellite radiance data p 1872 N94-22301
A numerical technique for the calculation of cloud optical extinction from lidar p 1874 N94-22309
Ground-based passive remote sensing during FIRE IFO 2 p 1844 N94-22319
OPTICAL TRACKING
Visual tracking
[AD-A271686] p 1943 N94-20920
Silicon retina for optical tracking systems p 1755 N94-21098
OPTICAL WAVEGUIDES
Novel N x N integrated channel waveguide optical crossbars for large scale high speed non-blocking data switching
[AD-A272065] p 1986 N94-20922
Optical amplification and threshold behavior on InGaAs/InGaAsP multiquantum well structures
[ETN-93-94181] p 2026 N94-21151
Optical integrated structures and circuits on silicon
[VTT-PUBS-106] p 1988 N94-21594
A novel semiconductor process for optoelectronic applications on silicon substrate p 1988 N94-21595
Bidirectional method for optical channel waveguide attenuation measurement by detectors integrated on the wafer, appendix 3 p 1988 N94-21597
An integrated-optic polarization splitter on silicon substrate, appendix 4 p 1989 N94-21598
Fibre pigtailed silicon based low cost passive optical components, appendix 5 p 1989 N94-21599
Birefringence control and dispersion characteristics of silicon oxynitride optical waveguides, appendix 6 p 1989 N94-21600
Refractive index behaviour of phosphorus-doped planar silica waveguides, appendix 7 p 1989 N94-21601
Time-laplace-transform-domain analysis of wave propagation in planar waveguides
[PB93-215226] p 1960 N94-22096
Architectures of the free space optical interconnects p 1789 N94-22220
Balanced arrow Mach-Zehnder interferometer p 1789 N94-22221
Modelling short bent, graded index dielectric slab waveguides
[PB93-215283] p 1742 N94-22349
OPTIMAL CONTROL
Acceleration-augmented LQG control of an active magnetic bearing p 1757 N94-21112
On the estimation algorithm used in adaptive performance optimization of turbofan engines
[NASA-TM-4551] p 1649 N94-21879
Control of multiple robot manipulators with optimal force distribution p 1794 N94-22255
Optimal control of the tip of a flexible arm p 1794 N94-22256
OPTIMIZATION
A comparison of data-parallel algorithms for connected components
[AD-A270551] p 1902 N94-19918
On multiflow problems
[RR-889-M] p 1950 N94-20125
A design optimization procedure for epicyclic gears
[MATHS-REPT-A-188] p 1822 N94-20146
Determination of the optimal stochastic upper bound of a Markovian generator
[RR-906-I] p 1963 N94-20202
Applying the INN model to the MaxClique
[DE93-040137] p 1906 N94-20276
An investigation into the integration of meter-level range and millimeter-level phase data using a multimode stimulation for optimal filter estimation software package
[AD-A267955] p 1751 N94-20483
Design structuring and allocation optimization (Destination) prototype level 1 user's manual
[AD-A272115] p 1929 N94-20571
Optimization of a satellite localization and message sending system
[ETN-93-94448] p 1737 N94-20592
Routing of freeway traffic: A discrete-time state space model and routing problems
[CWI-BS-R9232] p 1944 N94-21033
On the core-structure of minimum cost spanning tree games
[MEMO-1085] p 1953 N94-21047
On the optimality of FCFS for networks of multi-server queues
[CWI-BS-R9235] p 1944 N94-21160
Optimization of static traffic allocation policies
[CWI-BS-R9302] p 1930 N94-21161
Optimization of fixed time polling schemes
[CWI-BS-R9237] p 1945 N94-21233
Optimal repairman assignment in two maintenance models which are equivalent to routing models with early decisions
[CWI-BS-R9301] p 1930 N94-21234
Selectivity: Reductions, nondeterminism, and function classes
[TR-469] p 1912 N94-21273
A mean field neural network for hierarchical module placement p 1766 N94-21720
Multicriteria optimisation problem in the agricultural modelling p 1844 N94-22073
The combinatorial algorithms for large scale discrete optimization problems p 1923 N94-22079
Improvements on the design of optimum SAW filters with the Remez Exchange Algorithm p 1773 N94-22123
Neural networks for optimum routing in packet-switched communications networks p 1746 N94-22205
Some best rate 1/p and rate (p-1)/p systematic quasi-cyclic codes over GF(3) and GF(4) p 1792 N94-22243
OPTOELECTRONIC DEVICES
Optoelectronic associative memory
[NASA-CASE-NPO-18278-1-CU] p 1985 N94-20303
System for solving Boolean equations using optical lookup tables
[AD-D015962] p 1951 N94-20358
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
Surface treatment of InP and contribution to the optimization of the InP(p)/InP(p) regrown interfaces grown by GSMBE
[ECL-92-48] p 2018 N94-20598
Temperature dependence of optical properties of AlAs, studied by in-situ spectroscopic ellipsometry p 2023 N94-20999
Non-destructive semiconductor wafer probing system using laser pulses to generate and detect millimeter-wave signals
[CA-PATENT-APPL-SN-2,020,73] p 1760 N94-21178
Optical integrated structures and circuits on silicon
[VTT-PUBS-106] p 1988 N94-21594
A novel semiconductor process for optoelectronic applications on silicon substrate p 1988 N94-21595
Bidirectional method for optical channel waveguide attenuation measurement by detectors integrated on the wafer, appendix 3 p 1988 N94-21597
The conceptual design of a short-range distance sensor p 1774 N94-22129
Charge integrating optical position sensor p 1778 N94-22152
ORBIT CALCULATION
A new procedure for orbit determination based on three lines of sight: Angles only
[AD-A272937] p 1652 N94-21224
ORBIT TRANSFER VEHICLES
Evaluation of externally heated pulsed MPD thruster cathodes
[NASA-CR-191090] p 1670 N94-21565
Theoretical research program to study chemical reactions in AOTV bow shock tubes
[NASA-CR-194710] p 1804 N94-22027
ORBITAL ASSEMBLY
An expert system executive for automated assembly of large space truss structures
[NASA-TM-4487] p 1939 N94-20089
ORBITAL MANEUVERS
Effects of thrust vector control on the performance of the aerobang orbital plane change maneuver
[AD-A272532] p 1646 N94-21418
ORBITAL MECHANICS
Inclined orbits and interference to stationary service and to stationary service by satellite p 1653 N94-22188
ORBITAL POSITION ESTIMATION
Using the USCCS for sub microsecond spacecraft clock calibration p 1813 N94-21346
ORBITAL SERVICING
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1821 N94-20126
ORBITAL VELOCITY
Variety in planetary systems p 2086 N94-20871
Entry velocities at Mars and Earth for short transit times
[AD-A272591] p 1665 N94-21420
ORDER-DISORDER TRANSFORMATIONS
The Coulomb anomaly in strongly disordered films
[AD-A271095] p 2012 N94-19849
Effect of exciton localization and delocalization on magnetic-field-dependent photoluminescence linewidths in semiconductors
[DE93-018860] p 1748 N94-19884
ORGANIC COMPOUNDS
Surface electrochemistry of metals
[AD-A272913] p 1691 N94-21245
Laser driven hydrodynamic instability experiments
[DE93-040550] p 1818 N94-21547
Surface acoustic wave sensing of VOC's in harsh chemical environments
[DE93-040721] p 1968 N94-21751
ORGANIC MATERIALS
First discovery of the organic materials in deep-sea iron cosmic spherule p 1685 N94-20677
A study of the induction heating of organic composites
[AD-A272657] p 1675 N94-21187
ORGANIC SEMICONDUCTORS
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
ORGANIC SUPERCONDUCTORS
Fermiology and De Haas-Van Alphen effect of beta-(ET)2IBr2
[DE93-019523] p 2011 N94-19807
ORGANIZATIONS
A FET-switched induction accelerator cell
[DE93-019604] p 1769 N94-21838
ORGANOMETALLIC COMPOUNDS
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982
Catalytic hydrogenation of carbon monoxide
[DE94-000881] p 1678 N94-20103
Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold
[DE93-041126] p 1694 N94-21937
Low temperature absorption spectra and ground state electronic structure of tetrakis(2,6-di-tert-butylphenoxide)uranium(IV)
[DE94-000774] p 2035 N94-22387
ORGANOMETALLIC POLYMERS
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373
ORGUEIL METEORITE
Recondensation in the early solar system: Physical conditions and source material p 2085 N94-20849
OROGRAPHY
Hydrostatic/nonhydrostatic comparison with the MERCURE code on orographic flows
[ETN-93-94603] p 1866 N94-20600
ORTHOGONAL FUNCTIONS
Orthogonal pairs and zeros of Sobolev-type orthogonal polynomials
[REPT-92-46] p 1953 N94-21059

Orthogonalization method for determination of boundary layer receptivity coefficients
[ISBN-0-315-83426-9] p 1805 N94-22580

ORTHOGONALITY
Orthogonal pairs and zeros of Sobolev-type orthogonal polynomials
[REPT-92-46] p 1953 N94-21059

ORTHOGRAPHY
Generalization performance of backpropagation learning on a syllabification task p 1940 N94-20246

OSCILLATING FLOW
Heat exchanger with oscillating flow
[NASA-CASE-LAR-14033-2] p 1800 N94-20495
Development of phased twin flip-flop jets
[NASA-TM-106404] p 1637 N94-20563

OSCILLATIONS
Suppression of relaxation oscillations in flashpumped, two-micron tunable solid state lasers
[AD-D015928] p 1814 N94-19800
A synoptic-scale overview of the TOGA COARE intensive observing period November 1992 to February 1993 based on analyses from US operational global data assimilation systems
[NASA-TM-104593] p 1868 N94-21605
Active damping of oscillations in a long compliant manipulator link
[DE93-018878] p 1826 N94-22038

OSCILLATOR STRENGTHS
Spectral characterization of lithographic sources
[DE93-019941] p 1997 N94-21848

OSCILLATORS
A theory for optical wavelength control in short pulse free electron laser oscillators
[AD-A271706] p 1817 N94-21353

OSMIUM ISOTOPES
Rhenium-osmium isotope systematics of ordinary chondrites and iron meteorites p 2085 N94-20854

OUTGASSING
Outgassing rate of Reemay Spunbonded Polyester and DuPont Double Aluminized Mylar
[DE93-040015] p 1699 N94-19973
Space environmental effects on polymer matrix composites: The UTIAS/LDEF experiment p 1660 N94-21373
Materials evaluation at ESA/ESTEC p 1662 N94-21386
Wet inside and out? Constraints on water in the Martian mantle and on outgassed water, based on melt inclusions in SNC meteorites p 2145 N94-21678
Modeling of outgassing and matrix decomposition in carbon-phenolic composites
[NASA-CR-194741] p 1676 N94-21743
Outgassing data for selecting spacecraft materials
[NASA-RP-1124-REV-3] p 1676 N94-21889

OVER-THE-HORIZON RADAR
New algorithm of ground track processing in high-frequency skywave over-the-horizon-B radar
[AD-A267821] p 1717 N94-20207

OVERVOLTAGE
Ultrafast gas switching experiments
[DE93-019071] p 1762 N94-21634

OXALIC ACID
Improvement of the stability of the process for synthesizing chemically prepared varistor powder
[DE94-000345] p 1763 N94-21654

OXIDATION
Oxidation-reduction induced roughening of platinum (111) surface
[DE93-017408] p 1687 N94-19922
Fuel processing requirements and techniques for fuel cell propulsion power
[DE93-019516] p 1750 N94-20257
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 1734 N94-20510
The Koshak section: Evidence for element fractionation and an oxidation event at the K/T boundary p 1862 N94-20641
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20866
Transient studies of low temperature catalysts for methane conversion
[DE93-041232] p 1680 N94-20934
Chemical reaction fouling model for single-phase heat transfer
[DE93-019556] p 1802 N94-20942
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009
Space environmental effects on polymer matrix composites: The UTIAS/LDEF experiment p 1660 N94-21373
Some results of the oxidation investigation of copper and silver samples flown on LDEF p 1660 N94-21375
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride
[DE93-041307] p 1706 N94-21516
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691
Fundamental studies of stress distributions and stress relaxation in oxide scales on high temperature alloys
[DE94-001444] p 1693 N94-21854
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998
Surface modification of Ti3Al for improved oxidation resistance
[DE93-018297] p 1696 N94-22034
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258

OXIDATION RESISTANCE
Polyimides containing amide and perfluoroisopropylidene connecting groups
[NASA-CASE-LAR-14608-1] p 1702 N94-20374
Oxidation resistant protective coating system for gas turbine components and process for penetration thereof
[CA-PATENT-1,294,155] p 1704 N94-21143
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948
Surface modification of Ti3Al for improved oxidation resistance
[DE93-018297] p 1696 N94-22034

OXIDATION-REDUCTION REACTIONS
Oxidation-reduction induced roughening of platinum (111) surface
[DE93-017408] p 1687 N94-19922
Production of O2 on the Moon: A lab-top demonstration of ilmenite reduction with hydrogen p 2126 N94-20821
Development of an electrochemical hydrogen separator
[DE93-019877] p 1683 N94-21984

OXIDE FILMS
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope
[AD-A272251] p 2018 N94-20575
Study of the utilization of thin oxides in indium phosphides for the realisation of electron components
[ECL-92-38] p 2018 N94-20593
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191
A quantitative model for interpreting nanometer scale hardness measurements of thin films
[DE93-040601] p 2034 N94-22005

OXIDES
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging p 2082 N94-20659
Further analyses of Rio Cuarto impact glass p 1685 N94-20745
Dielectric function of InGaAs in the visible p 2023 N94-21000
Evaluation of radiation effects in re-oxidized nitrided oxide devices by hot carrier stressing at 77 K p 1754 N94-21084
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
Fundamental studies of stress distributions and stress relaxation in oxide scales on high temperature alloys
[DE94-001444] p 1693 N94-21854
Simple method to estimate MOS oxide-trap, interface-trap, and border-trap densities
[DE93-041138] p 2032 N94-21939
Melt-spin processing of high (Tc) oxide superconductors
[DE94-000696] p 2036 N94-22582

OXIDIZERS
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Cryogenic propellant rocket engine problems p 1668 N94-20076
Dynamics of face seals for high speed turbomachinery p 1655 N94-21796

OXYGEN
Chemical equilibrium in high pressure molecular fluid mixtures
[DE93-040160] p 1796 N94-19829
Encounters of H and D atoms with O2 in water: Relative diffusion and reaction rates
[DE93-018587] p 1970 N94-19956
High-temperature, high-pressure oxygen metering valve
[NASA-CASE-MSC-21823-1] p 1824 N94-20589
C/O atomic ratios in micrometer-size crushed grains from Antarctic micrometeorites and two carbonaceous meteorites p 2082 N94-20678
C-O volatiles in Apollo 15 and Apollo 17 picritic glasses p 1685 N94-20727
Durability of thermal control and environmental protective materials for the SSRMS in simulated LEO environment p 1663 N94-21392
Fast oxygen atom studies related to low Earth orbit activities p 1663 N94-21395
Atomic oxygen fluence detector for Bremsat: Scientific and technical description p 1663 N94-21396
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments
[NASA-TM-106439] p 1713 N94-21760
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998

OXYGEN ATOMS
Method for anisotropic etching in the manufacture of semiconductor devices
[NASA-CASE-MSC-21631-1] p 1993 N94-20491
Combination of on ground experiments and analysis software for the evaluation of material degradation in space (SILEX project) p 1662 N94-21389
German space experiments on Spacelab D-2 and Eureca-1 to investigate atomic oxygen interaction with materials p 1662 N94-21390
The International Telecommunications Satellite (INTELSAT) Solar Array Coupon (ISAC) atomic oxgyen flight experiment: Techniques, results and summary p 1662 N94-21391
Atomic oxygen interaction with spacecraft materials: Relationship between orbital and ground-based testing for materials certification p 1663 N94-21393
Evaluation of plasma-deposited protective coatings for spacecraft applications p 1663 N94-21394

OXYGEN COMPOUNDS
The multicomponent lineshape of the anharmonic A(1)(TO) phonon in PbTiO3
[DE93-018995] p 1970 N94-19971

OXYGEN IONS
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768

OXYGEN ISOTOPES
Oxygen isotopic relationships between the LEW85332 carbonaceous chondrite and CR chondrites p 2083 N94-20708
Inter- and intra-crystalline oxygen isotope distribution of fassaites in Allende CAI p 2086 N94-20898

OXYGEN PRODUCTION
Production of O2 on the Moon: A lab-top demonstration of ilmenite reduction with hydrogen p 2126 N94-20821

OXYGEN SUPPLY EQUIPMENT
In-flight measurement of aircrew breathing in Navy aircraft
[AD-A271811] p 1898 N94-21154

OXYNITRIDES
Birefringence control and dispersion characteristics of silicon oxynitride optical waveguides, appendix 6 p 1989 N94-21600

OZONE
Intrusion of stratospheric ozone in the troposphere through tropopause folding and cold air droplets
[REPT-87] p 1851 N94-20154
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
Stratospheric Aerosol and Gas Experiment (SAGE 3) p 1869 N94-21644
The young Sun and photochemistry of the primitive Martian atmosphere p 2145 N94-21679
Studies in remotely sensed geophysical parameter retrieval and analysis
[NASA-CR-194768] p 1842 N94-22374
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas
[DE94-000617] p 1820 N94-22585

P

P BAND
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429

P WAVES
Analysis of the effects of eurasian crustal and upper mantel structure on regional phases using broadband seismic data
[AD-A272446] p 1858 N94-21206
P-I-N JUNCTIONS
Polarized-light reflection mode p-i-n modulators with GaAs/AlGaAs multiple quantum well active layers: Design and simulation p 2023 N94-20996
P-N JUNCTIONS
Some experiences of solving 1-D semiconductor device equations on a matrix coprocessor by a domain decomposition method
[CWI-NM-R9304] p 1935 N94-21492
PACIFIC ISLANDS
Schools of the Pacific rainfall climate experiment p 1881 N94-20699
PACIFIC OCEAN
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1866 N94-20559
PACKET SWITCHING
A distributed reinforcement learning scheme for network routing
[AD-A270600] p 1938 N94-19845
Reduction of network cost and wiring in Ranade's butterfly routing
[CWI-CS-R9243] p 1930 N94-21023
A packet switched communications system for GRO p 1744 N94-21345
Tandem queues with deterministic service times
[CWI-BS-R9238] p 1946 N94-21577
On-board closed-loop congestion control for satellite based packet switching networks
[NASA-TM-106446] p 1656 N94-21581
IAS telecommunication infrastructure and value added network services provided by IASNET p 1744 N94-22069
A shared buffer memory switch with maximum queue and minimum allocation p 1773 N94-22119
A one-shot access scheme for a multicast switch p 1773 N94-22120
Sorting network for the partial selection problem p 1773 N94-22121
Throughput, blocking, and interference in packet radio networks p 1746 N94-22190
Buffer allocation in an ATM switch with output buffer and speed constraints p 1746 N94-22203
PACKET TRANSMISSION
Application guide for universal source encoding for space
[NASA-TP-3441] p 1741 N94-21783
A packet based, data driven telemetry system for autonomous experimental sub-orbital spacecraft
[DE94-000399] p 1657 N94-21980
CREIR: A multiaccess protocol for on-board processing satellite systems p 1780 N94-22168
PACKETS (COMMUNICATION)
A packet switched communications system for GRO p 1744 N94-21345
On-board closed-loop congestion control for satellite based packet switching networks
[NASA-TM-106446] p 1656 N94-21581
A one-shot access scheme for a multicast switch p 1773 N94-22120
Sorting network for the partial selection problem p 1773 N94-22121
Buffer allocation in an ATM switch with output buffer and speed constraints p 1746 N94-22203
PADE APPROXIMATION
Rational trigonometric approximations using Fourier series partial sums
[NASA-CR-191535] p 1959 N94-21568
The accuracy-through-order and the equivalence properties in the algebraic approximant
[DE93-040188] p 1960 N94-21946
PAINTS
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1822 N94-20127
Thermal control coatings p 1664 N94-21400
Evaluation of electroconductivity of two surface paints for spacecraft
[AD-A273063] p 1706 N94-21437
PALEOCLIMATOLOGY
Workshop on Early Mars: How Warm and How Wet?, part 1
[NASA-CR-193553] p 2142 N94-21659
Ancient Martian valley genesis and paleoclimatic inference: The present as a key to the past p 2142 N94-21661
Early Mars was wet but not warm: Erosion, fluvial features, liquid water habitats, and life below freezing p 2145 N94-21677
The Martian valley networks: Origin by nivео-fluvial processes p 2146 N94-21682
PALEOMAGNETISM
Frequency dependent electrical properties of minerals and partial-melts
[DE93-019918] p 2012 N94-19861
Two-polarity magnetization in the Manson impact breccia p 1863 N94-20789
PALEONTOLOGY
Structural evidence for reorientation of Miranda about a paleo-pole p 2098 N94-20671
PALLADIUM
The metallic bond for monolayer transition metal layers on transition metal surfaces
[DE93-019060] p 1691 N94-20313
Structure and morphology of Pd overlayers on epitaxial SnO2 films studies with the atomic force microscope
[AD-A271827] p 2028 N94-21458
PALLADIUM ALLOYS
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335
Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21762
First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21964
Temperature dependence of magnetic order in single-crystalline UPdSn
[DE93-040153] p 2033 N94-21991
PANEL METHOD (FLUID DYNAMICS)
Users manual for the NASA Lewis three-dimensional ice accretion code (LEWICE 3D)
[NASA-TM-105974] p 1642 N94-21590
PAPERS
STELAR: An experiment in the electronic distribution of astronomical literature p 2049 N94-22544
PARA HYDROGEN
Theoretical phase diagrams for solid H(sub 2)
[DE94-001049] p 1684 N94-22395
PARABOLIC DIFFERENTIAL EQUATIONS
Linear and nonlinear PSE for compressible boundary layers
[NASA-CR-191537] p 1797 N94-20033
Adaptive grids for quasilinear parabolic systems in one space dimension
[ETN-93-93611] p 1954 N94-21137
Interface reflection of spherical acoustic waves in the first- and second-order rational parabolic approximations and their artifacts
[PB93-215424] p 1969 N94-22261
PARABOLOID MIRRORS
Long range fast tool servo
[AD-A271614] p 1761 N94-21257
Holographic optical elements correcting the off-axis aberrations of a parabolic mirror
[ISBN-0-315-57581-6] p 1990 N94-22411
PARADOXES
Believing in the basis of the evidence
[TR-438] p 2039 N94-20364
PARALLEL COMPUTERS
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers
[DE94-000741] p 1701 N94-20352
Measuring the effects of thread placement on the Kendall Square KSR1
[DE93-040655] p 1908 N94-20932
MGD1M: A parallel multigrid code with a fast vectorized ILU-relaxation
[CWI-NM-R9222] p 1930 N94-21077
Comparing quasi-Newton methods for solving sparse interface problems
[CWI-NM-R9303] p 1959 N94-21576
Parallelizing a highly vectorized multigrid code with zebra relaxation
[CWI-NM-R9225] p 1935 N94-21610
Numerical multigrid software (MGD5M): A parallel multigrid code with a twisted ILLU-relaxation
[CWI-NM-R9226] p 1916 N94-21611
Simulated behaviour of large scale SCI rings and tori
[DE93-040149] p 1935 N94-21745
Visualization on massively parallel computers using CM/AVS
[DE93-040151] p 1936 N94-21746
Physics Detector Simulation Facility (PDSF) architecture/utilization
[DE93-019744] p 1936 N94-21919
Scientific computing in the 1990ies: An astronomical perspective p 2057 N94-22440
PARALLEL PLATES
Method for controlling protein crystallization
[NASA-CASE-MFS-28668-1] p 2017 N94-20528
PARALLEL PROCESSING (COMPUTERS)
A parallelizing compiler based on partial evaluation
[AD-A270838] p 1898 N94-19832
Exploiting the parallelism exposed by partial evaluation
[AD-A270678] p 1928 N94-19877
A comparison of data-parallel algorithms for connected components
[AD-A270551] p 1902 N94-19918
Implementation of a portable nested data-parallel language
[AD-A270524] p 1902 N94-19932
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
High resolution signal processing
[AD-A271181] p 1717 N94-20215
Scientific development of a massively parallel ocean climate model
[DE93-019446] p 1855 N94-20219
Parallel band reduction and tridiagonalization
[DE93-019566] p 1951 N94-20221
Fast data parallel polygon rendering
[DE93-040157] p 1929 N94-20279
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers
[DE94-000741] p 1701 N94-20352
Massively parallel computation of RCS with finite elements p 1726 N94-20437
Time warp operating system version 2.7 internals manual
[NASA-CR-194798] p 1899 N94-20549
Design structuring and allocation optimization (Destination) prototype level 1 user's manual
[AD-A272115] p 1929 N94-20571
Algorithm/architecture study for artificial neural nets
[AD-A271820] p 1943 N94-20626
Analysis and evaluation of configuring of graphical systems on multiprocessor architectures
[ETN-93-93618] p 1930 N94-21018
A novel VLSI processor architecture for supercomputing arrays p 1758 N94-21115
Scheduling for locality in shared-memory multiprocessors
[AD-A272948] p 1930 N94-21228
Optimal repairman assignment in two maintenance models which are equivalent to routing models with early decisions
[CWI-BS-R9301] p 1930 N94-21234
The Mercury user's manual
[TR-465] p 1913 N94-21316
Analysis of multigrid methods on massively parallel computers: Architectural implications p 1938 N94-21468
Mapping robust parallel multigrid algorithms to scalable memory architectures p 1922 N94-21483
MINIFOLD: A kernel for a MANIFOLD-like coordination language
[CWI-CS-R9252] p 1915 N94-21534
A data distributed, parallel algorithm for ray-traced volume rendering
[DE93-040150] p 1935 N94-21622
Simulated behaviour of large scale SCI rings and tori
[DE93-040149] p 1935 N94-21745
Visualization on massively parallel computers using CM/AVS
[DE93-040151] p 1936 N94-21746
The transition to massively parallel computing within a production environment at a DOE access center
[DE93-019155] p 1936 N94-21828
Evaluation of DEC's GIGAswitch for distributed parallel computing
[DE94-001356] p 1936 N94-21853
Physics Detector Simulation Facility (PDSF) architecture/utilization
[DE93-019744] p 1936 N94-21919
The design of linear algebra libraries for high performance computers
[DE93-040458] p 1960 N94-21967
Impact of partitioning on parallel discrete event simulation of logic circuits p 1772 N94-22115
VLSI design of a bit serial parallel processing 4 extender chip for M-path convolutional decoding p 1775 N94-22132
VLSI design of a parallel video output interface p 1778 N94-22153
The Schur Berlekamp-Massey algorithm is parallelizable p 1784 N94-22191
Integration of parallel processing structures using a matrix approach p 1784 N94-22192
Acceleration of backpropagation learning using a parallel DSP machine p 1786 N94-22206
Image convolution using the Myrias SPS-2 parallel computer p 1786 N94-22207
Parallelizing a maximum entropy image deconvolution algorithm p 1787 N94-22208
Distributed input/output processing in data-driven multiprocessors
[DE94-000323] p 1937 N94-22378

Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385
Scientific computing in the 1990ies: An astronomical perspective p 2057 N94-22440
Seeing the forest for the trees: Networked workstations as a parallel processing computer p 1938 N94-22454

PARALLEL PROGRAMMING
Multilist scheduling: A new parallel programming model
[AD-A270549] p 1929 N94-20084
Mint tutorial and user manual
[TR-452] p 1905 N94-20143
Parallel logic programming systems
[RR-891-I] p 1929 N94-20176
Scheduling for locality in shared-memory multiprocessors
[AD-A272948] p 1930 N94-21228
Behavioural semantics of parallel functional programming languages
[MEMO-INF-92-66] p 1913 N94-21313
Butcher-Kuntzmann methods for nonstiff problems on parallel computers
[CWI-NM-R9305] p 1935 N94-21493
MINIFOLD: A kernel for a MANIFOLD-like coordination language
[CWI-CS-R9252] p 1915 N94-21534
Using parallel banded linear system solvers in generalized eigenvalue problems
[NASA-CR-191540] p 1915 N94-21584
A simple modern correctness condition for a space-based high-performance multiprocessor p 1766 N94-21718
Image convolution using the Myrias SPS-2 parallel computer p 1786 N94-22207
Parallelizing a maximum entropy image deconvolution algorithm p 1787 N94-22208
Parallel functional programming in SISAL: Fictions, facts, and future
[DE93-040486] p 1937 N94-22558

PARAMETER IDENTIFICATION
Literature review of the errors-in-variables approach to the problem of system identification
[AD-A271098] p 1949 N94-19907
Parameter estimation with cost function of second order in output-error-problem
[DLR-FB-92-38] p 1964 N94-21139
A project on parameter identification in reaction kinetics
[CWI-NM-R9301] p 1682 N94-21574

PARAMETERIZATION
Adaptation of model parameters of a rail model at measured rail compliances
[ILR-MITT-274(1992)] p 1831 N94-21153
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384

PARASITIC ELEMENTS (ANTENNAS)
Bandwidth enhancement of dielectric resonator antennas p 1734 N94-20507

PARITY
Links between N-modular redundancy and the theory of error-correcting codes p 1765 N94-21713
Likelihood analysis of parity violation in the compound nucleus
[DE94-000671] p 1977 N94-22572

PARSING ALGORITHMS
Neural data oriented parsing p 1940 N94-20248
A modular design for connectionist parsing p 1941 N94-20252

PARTIAL DIFFERENTIAL EQUATIONS
Stochastic differential equations and numerical simulation for pedestrians
[DE93-040651] p 1949 N94-20006
Linear and nonlinear PSE for compressible boundary layers
[NASA-CR-191537] p 1797 N94-20033
Dynamical systems and nonlinear partial differential equations
[AD-A271514] p 1951 N94-20545
Symmetries and conservation laws of the system: u(x)=vw(x), v(y)=uw(y), uv+w(xx)+w(yy)=0
[MEMO-1084] p 1953 N94-21046
MGD1M: A parallel multigrid code with a fast vectorized ILU-relaxation
[CWI-NM-R9222] p 1930 N94-21077
Interactive simulation package for coupled bending and torsional vibrations in flexible robot arms
[MEMO-1089] p 1944 N94-21140
A multi-level solution algorithm for steady-state Markov chains
[NASA-CR-191558] p 1914 N94-21462
MGGHAT: Elliptic PDE software with adaptive refinement, multigrid and high order finite elements p 1956 N94-21470
An automatic multigrid method for the solution of sparse linear systems p 1957 N94-21478
A semi-Lagrangian approach to the shallow water equation p 1806 N94-21480
A note on singularities caused by the hydrodynamic dispersion tensor
[CWI-NM-R9302] p 1803 N94-21575
Parallelizing a highly vectorized multigrid code with zebra relaxation
[CWI-NM-R9225] p 1935 N94-21610
Numerical multigrid software (MGD5M): A parallel multigrid code with a twisted ILLU-relaxation
[CWI-NM-R9226] p 1916 N94-21611
Universality in blow-up for non linear heat equations
[PB93-215465] p 2038 N94-22095

PARTIAL PRESSURE
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998

PARTICLE ACCELERATION
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958
Particle acceleration in a filamentary current sheet model p 2004 N94-22659
Prompt high-energy particle acceleration during two current loops collision p 2005 N94-22661
Plasma structure in a plasma flow along a magnetic mirror field p 2005 N94-22664
Mean elemental composition and He-3 enrichments in solar energetic particles p 2006 N94-22670
Acceleration of solar-flare particles as viewed from their chemical composition p 2006 N94-22672
Particle acceleration on the Alfven surface of a plasma ejecting axisymmetric rotator p 2008 N94-22681

PARTICLE ACCELERATOR TARGETS
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297
A high-intensity He-jet production source for radioactive beams
[DE93-040247] p 1981 N94-21767
SLAC measurement of the neutron spin structure function
[DE93-040998] p 1975 N94-21788
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941

PARTICLE ACCELERATORS
Top search at the TEVATRON
[DE93-019392] p 1978 N94-19988
Heavy ion fusion injector experiments
[DE93-019188] p 1993 N94-20234
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289
B production at D0
[DE93-019250] p 1972 N94-20291
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943
Parton-parton elastic scattering and rapidity gaps at Tevatron energies
[DE93-041024] p 1974 N94-21515
Multibunch beam break-up in detuned structures
[DE93-041056] p 1981 N94-21686
Simulation and compensation of multibunch energy variation in NLC
[DE93-041057] p 1981 N94-21687
Search for excited quarks in p(-p) collisions at the square root of s = 1.8 TeV
[DE93-019910] p 1975 N94-21840
The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV
[DE93-019903] p 1976 N94-21847

PARTICLE BEAMS
Space-charge dominated beam transport in magnetic quadrupoles with large aperture ratios
[DE93-040443] p 1992 N94-20004
Heavy ion fusion injector experiments
[DE93-019188] p 1993 N94-20234
Tactical laser weapons and other directed-energy weapons
[AD-A267961] p 1816 N94-20484
Plasma lens experiments at the Final Focus Test Beam
[DE93-041081] p 1981 N94-21688
SLD results from the study of polarized Z(sup 0) produced at the SLC
[DE93-041020] p 1982 N94-21952

PARTICLE COLLISIONS
Simulating supersymmetry with ISAJET 7.0/ISASUSY 1.0
[DE93-018266] p 1969 N94-19804
A search for new gauge bosons in (bar p)p collisions at square root of s equals 1.8 TeV in the dielectron decay mode
[DE93-019901] p 1969 N94-19813
Measurements of atomic interactions and frequency stability with a cryogenic hydrogen maser
[AD-A271132] p 1814 N94-19853
Collisional processes involving atmospheric gases
[AD-A270729] p 1854 N94-19954
A study of events with the highest total transverse energy in CDF
[DE93-019904] p 1978 N94-19972
Top search at the TEVATRON
[DE93-019392] p 1978 N94-19988
New relativistic S-matrix results for scattering -- beyond the usual anomalous factors/beyond impulse approximation
[DE93-019148] p 1971 N94-20096
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
The cross section for the production of b(bar-b) pairs in p(bar p) collisions at the square root of s equals 1.8 TeV
[DE93-019900] p 1972 N94-20225
Detection of traveling ionospheric disturbances induced by atmospheric gravity waves using the global positioning system p 1723 N94-20425
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937
Parton-parton elastic scattering and rapidity gaps at Tevatron energies
[DE93-041024] p 1974 N94-21515
Single and double ionization of helium by high-energy photon impact
[DE94-000381] p 1975 N94-21785
Measurement of the B meson and b quark cross-section in (-p)p collisions at the square root of s = 1.8 TeV using the exclusive decays B(+) and B(exp 0) yields J/psiK*(exp 0)
[DE93-019907] p 1975 N94-21806
Search for excited quarks in p(-p) collisions at the square root of s = 1.8 TeV
[DE93-019910] p 1975 N94-21840
The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV
[DE93-019903] p 1976 N94-21847
Low p(sub T) phenomena observed in high energy nuclear collisions
[DE94-000825] p 1982 N94-21849
Recent Fermilab results on hadroproduction of heavy flavors
[DE94-000595] p 1976 N94-21867

PARTICLE DENSITY (CONCENTRATION)
A field-based technique for the longitudinal profiling of ultrarelativistic electron or positron bunches down to lengths of less than or equal to 10 microns
[DE93-040954] p 1978 N94-19873
Searching for high baryon density at the AGS with ARC
[DE93-041155] p 1975 N94-21693

PARTICLE DIFFUSION
Radial diffusion of toroidally trapped particles induced by lower hybrid and fast waves
[IPPCZ-327] p 1996 N94-21593

PARTICLE EMISSION
Electrostatic charging and secondary effects in materials submitted to radiation in space p 1661 N94-21383

PARTICLE ENERGY
Edge plasma experiments on CASTOR tokamak
[IPPCZ-332] p 1997 N94-21816

PARTICLE IMAGE VELOCIMETRY
Fluid dynamic mechanisms and interactions within separated flows
[AD-A271037] p 1797 N94-19978
Particle image velocimetry
[DE93-040657] p 1804 N94-21748

PARTICLE INTERACTIONS
Simulating supersymmetry with ISAJET 7.0/ISASUSY 1.0
[DE93-018266] p 1969 N94-19804
A study of events with the highest total transverse energy in CDF
[DE93-019904] p 1978 N94-19972
Recent Fermilab results on hadroproduction of heavy flavors
[DE94-000595] p 1976 N94-21867

PARTICLE MOTION
Aperture determination of RHIC92 from randomly generated initial coordinates
[DE93-040174] p 1978 N94-19945

PARTICLE PRECIPITATION
Importance of aggregation and small ice crystals in cirrus clouds, based on observations and an ice particle growth model p 1879 N94-22336
PARTICLE PRODUCTION
Simulating supersymmetry with ISAJET 7.0/ISASUSY 1.0
[DE93-018266] p 1969 N94-19804
A search for new gauge bosons in (bar p)p collisions at square root of s equals 1.8 TeV in the dielectron decay mode
[DE93-019901] p 1969 N94-19813
The two-jet differential cross-section at CDF
[DE93-019905] p 1978 N94-19983
The cross section for the production of b(bar-b) pairs in p(bar p) collisions at the square root of s equals 1.8 TeV
[DE93-019900] p 1972 N94-20225
B production at D0
[DE93-019250] p 1972 N94-20291
Search for excited quarks in p(-p) collisions at the square root of s = 1.8 TeV
[DE93-019910] p 1975 N94-21840
The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV
[DE93-019903] p 1976 N94-21847
Recent Fermilab results on hadroproduction of heavy flavors
[DE94-000595] p 1976 N94-21867
SLD results from the study of polarized Z(sup 0) produced at the SLC
[DE93-041020] p 1982 N94-21952
Toward a QCD analysis of jet rates in deep-inelastic Muon-Proton scattering
[DE94-000618] p 1976 N94-21962
Production, collection and utilization of very long-lived heavy charged leptons
[DE93-040867] p 1977 N94-22009
Time evolution of the quark-gluon plasma
[DE94-000804] p 1998 N94-22389
PARTICLE SIZE DISTRIBUTION
Sol-spray preparation, particulate characteristics, and sintering of alumina powders
[DE93-018577] p 1690 N94-20183
Zinc and titanium smoke: Chemical composition and physical characteristics
[FOA-C-40277-4.9] p 1680 N94-20552
Thermal conductivity measurements of particulate materials under Martian conditions p 1685 N94-20703
Coagulation of grains in static and collapsing protostellar clouds p 2085 N94-20865
Holographic measurements of ice crystals in cirrus clouds during International Cirrus Experiment ICE
[GKSS-92/E/14] p 1866 N94-21052
A documentation of icing relevant cloud physical parameters on horizontal soundings of stratiform clouds (continuation)
[DLR-MITT-92-10] p 1871 N94-22280
Spectral variation of scattering and absorption by cirrus p 1876 N94-22321
Importance of aggregation and small ice crystals in cirrus clouds, based on observations and an ice particle growth model p 1879 N94-22336
PARTICLE SPIN
A conceptual design for the STAR endcap electromagnetic calorimeter
[DE93-040801] p 1807 N94-19990
PARTICLE THEORY
Aperture determination of RHIC92 from randomly generated initial coordinates
[DE93-040174] p 1978 N94-19945
High energy physics program at Texas A/M University
[DE93-041089] p 1980 N94-20933
Recent results on top, bottom and exotic physics at the Tevatron
[DE94-000578] p 1975 N94-21786
PARTICLE TRACKS
A summary of studies of particle stability at RHIC
[DE93-040173] p 1970 N94-19868
High energy ionization in liquids: The free ion yield
[DE93-040329] p 1973 N94-20324
LREE variability in CM matrices: Another look at meteorite compaction ages p 2086 N94-20884
PARTICLE TRAJECTORIES
Modeling of particle dispersion in a stationary isotropic homogeneous turbulence by large scale numerical simulation
[ETN-93-94604] p 1801 N94-20601
Surface path lines in plane Stokes flow driven by capillarity
[DE93-041277] p 1803 N94-21651
Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974
Particle acceleration in a filamentary current sheet model p 2004 N94-22659
Current loop coalescence studied by 3-D electromagnetic particle code p 2005 N94-22660
PARTICULATES
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows
[AD-A271160] p 1678 N94-20000
Sol-spray preparation, particulate characteristics, and sintering of alumina powders
[DE93-018577] p 1690 N94-20183
Spiral fluid separator
[NASA-CASE-MFS-28658-1] p 1800 N94-20361
The coherent backscattering opposition effect p 1991 N94-20646
Thermal conductivity measurements of particulate materials under Martian conditions p 1685 N94-20703
PARTITIONS (MATHEMATICS)
Algorithms for Markov decision chains with partial information
[PB93-220085] p 1918 N94-22098
Impact of partitioning on parallel discrete event simulation of logic circuits p 1772 N94-22115
PARTONS
Direct photon results from CDF
[DE93-019908] p 1980 N94-20317
Parton-parton elastic scattering and rapidity gaps at Tevatron energies
[DE93-041024] p 1974 N94-21515
The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV
[DE93-019903] p 1976 N94-21847
PASCAL (PROGRAMMING LANGUAGE)
A comprehensive software engineering educational experience
[AD-A270583] p 1905 N94-20109
PASSENGER AIRCRAFT
Radiometry in commercial aircraft
[GSF-41/91] p 1892 N94-21141
PASSENGERS
Evaluation of head injury criteria
[NIAR-93-2] p 1890 N94-20190
Passenger terminal simulation model
[ISBN-0-315-61113-8] p 1652 N94-22423
PASSIVITY
ALE project
[AD-A271080] p 2014 N94-19980
The use of x ray techniques in the in situ study of corrosion
[DE93-019845] p 1690 N94-20301
PATENT POLICY
NASA patent abstracts bibliography: A continuing bibliography. Section 1: Abstracts (supplement 44)
[NASA-SP-7039(44)-SECT-1] p 2043 N94-21254
PATENTS
The official gazette of the United States Patent and Trademark Office, vol. 1145, no. 4
[PB93-202240] p 2044 N94-21449
PATHS
Neural networks for optimum routing in packet-switched communications networks p 1746 N94-22205
PATTERN METHOD (FORECASTING)
Predicting lightning events in the KSC area: A feasibility study using single station data
[AD-A271440] p 1864 N94-20088
PATTERN RECOGNITION
Recognizing 3-D objects using 2-D images
[AD-A271005] p 1983 N94-19819
Representation and recognition with algebraic invariants and geometric constraint models
[AD-A271395] p 1949 N94-19838
Robust and efficient 3D recognition by alignment
[AD-A270639] p 1904 N94-20041
Statistical object recognition
[AD-A270887] p 1962 N94-20113
New algorithm of ground track processing in high-frequency skywave over-the-horizon-B radar
[AD-A267821] p 1717 N94-20207
Generalization performance of backpropagation learning on a syllabification task p 1940 N94-20246
Multivariate statistical analysis: Principles and applications to coorbital streams of meteorite falls p 1964 N94-20881
Recognition by prototypes
[AD-A271687] p 1943 N94-20921
Efficient comparison based string matching
[CWI-CS-R9249] p 1909 N94-21028
Tight comparison bounds for the string prefix-matching problem
[CWI-CS-R9250] p 1952 N94-21029
Data and model-driven selection using parallel-line groups
[AD-A271702] p 1913 N94-21365
Mathematical theory of thermodynamics of computation
[CWI-CS-R9251] p 2038 N94-21533
Determining the 3-D structure and motion of objects using a scanning laser range sensor
[NASA-CR-194745] p 1818 N94-21817
Improvement in invariant pattern recognition with neural networks and Fourier-Mellin filters p 1780 N94-22164
A modified moment invariants technique for classification of noisy objects p 1780 N94-22165
Interference reduction using neural networks p 1783 N94-22186
An insensitive algorithm for template matching with correlation p 1793 N94-22249
STAR-1 SAR road extraction using texture analysis and mathematical morphology
[ISBN-0-315-83255-X] p 1843 N94-22429
A neural network prototyping package within IRAF p 1949 N94-22451
PATTERNS
Spatial patterns in semiconductor lasers
[DE93-040056] p 1814 N94-19865
PAYLOADS
Database of proposed payloads and instruments for SEI missions p 1811 N94-22432
PEAKS (LANDFORMS)
Morphologic classes of impact basins on Venus p 2137 N94-20883
PECULIAR STARS
What is normal among the A-type stars?
[ISBN-0-315-83947-3] p 2081 N94-22592
PEEK
Creep damage of carbon fiber reinforced PEEK
[ISBN-0-315-58962-0] p 1677 N94-22420
PENETRATION
Determination of parameters for hypervelocity dust grains encountered in near-Earth space p 2084 N94-20817
PEPTIDES
Enhancement of wound healing by biosynthetic growth factor
[AD-A272517] p 1892 N94-21415
Gamma-aminobutyric acid (GABA) and neuropeptides in neural areas mediating motion-induced emesis p 1886 N94-21902
PERCOLATION
Computerized simulations with cellular automates for cloud formation
[GKSS-92/E/22] p 1867 N94-21312
PERFLUORO COMPOUNDS
Polyimides containing amide and perfluoroisopropylidene connecting groups
[NASA-CASE-LAR-14808-1] p 1702 N94-20374
PERFORATING
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864
PERFORMANCE PREDICTION
System performance predictions for Space Station Freedom's electric power system
[NASA-TM-106396] p 1667 N94-20062
Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570
Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264
Problem reporting management system performance simulation p 1931 N94-21328
Compatibility evaluation and research on the Computerized Adaptive Screening Test (CAST): User and programmer's guide
[AD-A273112] p 1894 N94-21510
PERFORMANCE TESTS
TCP performance analysis for wide area networks
[DE94-000449] p 1928 N94-19858
Night vision goggle model F4949 preflight adjustment/assessment procedures
[AD-A271079] p 1895 N94-19935
Efficient chip signature checking for diagnosing boundary scan systems
[RR-901-I] p 1749 N94-20166
Multiport solid-state imager characterization at variable pixel rates
[DE93-018366] p 1808 N94-20287
Performance evaluation of the JPL TOPSAR system: An across-track interferometric SAR system for topographic mapping p 1732 N94-20461
The One-Day Workshop on Batteries, Stepping Motors, and Electronic Clock Displays
[ETN-93-94632] p 1752 N94-20628
Battery tests p 1752 N94-20631
LCD display tests p 1752 N94-20635
Development and demonstration of a personal monitoring system for exposure to hydrogen fluoride
[DE93-041273] p 1891 N94-20935
Operational test and evaluation of electronic combat systems
[AD-A273093] p 1847 N94-21500

Mirror velocity sampling errors in a Michelson interferometer
[AD-A273105] p 1809 N94-21508
Performance evaluation of video on ethernet
[DE93-040696] p 1936 N94-21749
Surface acoustic wave sensing of VOC's in harsh chemical environments
[DE93-040721] p 1968 N94-21751

PERIDOTITE
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
Primary differentiation in the early Earth: Nd and Sr isotopic evidence from diamondiferous eclogites for both old depleted and old enriched mantle, Yakutia, Siberia p 1862 N94-20776
The carbon components in SNC meteorites of feldspathic harzburgite composition p 2086 N94-20885

PERIODIC FUNCTIONS
Stoermer-Cowell and related methods for the numerical solution of second order periodic initial value problems for ODE's 2: Numerical characteristics of the methods
[MEMO-1082] p 1953 N94-21075

PERIODIC VARIATIONS
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A272685] p 1857 N94-21189

PERMAFROST
Calderas produced by hydromagmatic eruptions through permafrost in northwest Alaska p 2089 N94-20385
Possible occurrence and origin of massive ice in Utopia Planitia p 2090 N94-20390
Cryoplanation terraces of interior and western Alaska p 2091 N94-20396
A formational model for the polygonal terrains of Mars: Taking a crack at the genesis of the Martian polygons p 2091 N94-20400
Interferometric detection of freeze-thaw displacements of Alaskan permafrost using ERS-1 data p 1732 N94-20460

PERMANENT MAGNETS
Measurement and correction of magnetic fields in pulsed slotted-tube microwigglers
[DE93-040100] p 1815 N94-20272
Variable-field permanent magnet dipole
[DE94-000800] p 1820 N94-22020

PERMEABILITY
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408

PERMITTIVITY
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408
Relating ground truth collection to model sensitivity p 1719 N94-20409
The effect of dissipative inhomogeneous medium on the statistics of the wave intensity p 1726 N94-20440
The Brewster angle effect in SAR polarimetry p 1731 N94-20456

PEROVSKITES
Ten GHz YBa2Cu3O(7-delta) superconducting ring resonators on NdGaO3 substrates p 1735 N94-20515

PERSONAL COMPUTERS
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
Probability of detection calculations using MATLAB
[AD-A271958] p 1736 N94-20578
Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264
Application development in a PC/LAN environment p 1923 N94-22067
Crystal ball gazing p 1925 N94-22477
PCIPS 2.0: Powerful multiprofile image processing implemented on PCs p 1927 N94-22532

PERSONNEL
Activities of National Inst. for Aviation Research
[NIAR-93-16] p 2151 N94-20150

PERSONNEL DEVELOPMENT
Center for neural engineering
[AD-A271164] p 1890 N94-20185
NCCDS configuration management process improvement p 1931 N94-21327
Information and decision structure in a Japanese type of management with respect to QCC and just-in-time systems p 2046 N94-22063

PERSONNEL MANAGEMENT
Factors associated with continuance commitment to FAA matrix teams
[DOT/FAA/AM-93/18] p 2040 N94-21626

PERSONNEL SELECTION
Psychometric developments related to tests and selection
[AD-A272971] p 1894 N94-21262
Compatibility evaluation and research on the Computerized Adaptive Screening Test (CAST): User and programmer's guide
[AD-A273112] p 1894 N94-21510

PERTURBATION
Longitudinal instability of an induction linac with acceleration
[DE93-019249] p 1980 N94-20290
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531
Universality in blow-up for non linear heat equations
[PB93-215465] p 2038 N94-22095
Effects of magnetic field perturbations in the ATF torsatron
[DE94-000474] p 1999 N94-22568

PERTURBATION THEORY
Stability of the face-centered-cubic phase of heavy rare gas solids
[DE93-019949] p 1679 N94-20319
A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454
Theoretical particle physics
[DE94-000538] p 1973 N94-20938
A formulation of quantum statistical mechanics based on the Feynman path centroid density 1: Equilibrium properties
[AD-A272809] p 2037 N94-21171
One- and multi-component theories of mixtures
[DE93-040543] p 1966 N94-21511
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385
Turbulization of free shear flows: 3D perturbations p 2000 N94-22626
Time variation of MHD accretion onto a black hole p 2009 N94-22692
Spiral Alfven instability in accretion disks p 2010 N94-22698

PESTICIDES
Compatibility and efficacy of biocides qualified under military specification MIL-S-53021
[AD-A271496] p 1712 N94-20551

PETN
Crystal orientation dependence of elastic precursor strength in pentaerythritol tetranitrate
[DE93-018340] p 2034 N94-22035

PETRI NETS
Interval timed coloured petri nets and their analysis
[PB93-191732] p 1903 N94-19992
Total order assumption
[PB93-191740] p 1903 N94-19993
Dependability and performability analysis
[NASA-CR-191565] p 1965 N94-21463
System level modelling using Petri nets and VHDL p 1772 N94-22113
Modeling and analysis of secure communication protocols using Petri net formalism p 1784 N94-22194
How to handle 6GBytes a night and not get swamped p 2058 N94-22444

PETROGRAPHY
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
Petrography of shock features in the 1953 Manson 2-A drill core p 1862 N94-20767
Petrography and origin of refractory inclusions from the Murray and Murchison C2 chondrites p 2084 N94-20770
Evaluation of lunar rocks and soils for resource utilization: Detailed image analysis of raw materials and beneficiated products p 2126 N94-20820

PETROLOGY
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
REE and other trace lithophiles in MAC88177, LEW88280 and LEW88763 p 2082 N94-20639
The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Petrogenesis of Apollo 12 mare basalts. Part 2: An open system model to explain the pigeonite basalt compositions p 1684 N94-20645
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution p 2097 N94-20663
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Orthopyroxenes as recorders of diogenite petrogenesis: Major and minor element systematics p 1684 N94-20670
Opaque-rich lithology in the Divnoe achondrite: Petrology and origin p 2082 N94-20680
U-Pb isotopic ages and characteristics of ancient (greater than 4.0 Ga) lunar highland rocks p 2104 N94-20700
Oxygen isotopic relationships between the LEW85332 carbonaceous chondrite and CR chondrites p 2083 N94-20708
Micrometeorite dynamic pyrometamorphism: Nonstoichiometric clinoenstatite (CLEN) p 2083 N94-20715
Lunar basalt meteorite EET 87521: Petrology of the clast population p 2083 N94-20752
Orthopyroxenes as recorders of diogenite petrogenesis: Trace element systematics p 1686 N94-20760
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis p 2118 N94-20779
Petrology and geochemistry of VLT glasses from double drive tube 79001/2 p 1687 N94-20870
Lewis Cliff 87057: A new metal-rich E3 chondrite with similarities to Mt. Egerton, Shallowater and Happy Canyon p 2086 N94-20901
Chemical composition of new Acapulcoites and Lodranites p 2086 N94-20905

PH
Analog/digital pH meter system I.C. p 1764 N94-21701

PHARMACOLOGY
Physiologically based pharmacokinetic modelling of percutaneously absorbed dibromomethane utilizing multiple dermal sub-compartments
[AD-A271106] p 1889 N94-19981

PHASE CONTROL
Phase screens for the control of the focal irradiance of the Nova laser
[DE94-001067] p 1820 N94-22401

PHASE DEMODULATORS
Phase demodulation of interferometric fiber-optic sensors
[ISBN-0-315-83425-0] p 1991 N94-22581

PHASE DIAGRAMS
Theoretical phase diagrams for solid H(sub 2)
[DE94-001049] p 1684 N94-22395
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398

PHASE ERROR
Array Simulations Platform (ASP) predicts NASA Data Link Module (NDLM) performance p 1744 N94-21348
Effect of errors on the phase centre and pointing angle of phased array antennas p 1746 N94-22162

PHASE MODULATION
Material optimization for hard x ray Fresnel zone plates
[DE93-019569] p 1990 N94-21837
Effect of bandwidth on beam smoothing and frequency conversion at the third harmonic of the Nova laser
[DE93-019917] p 1819 N94-21920

PHASE SHIFT
Topographic slope from the SAR interferometric phase gradient p 1731 N94-20459
Four-channel HF receiving antenna array simulator
[AD-A271876] p 1732 N94-20471
Space applications of superconducting microwave electronics at NASA Lewis Research Center p 1671 N94-20513
The coherent backscattering opposition effect p 1991 N94-20646

PHASE SHIFT KEYING
Capacity comparison between direct sequence PSK and MFSK spread spectrum systems in CDMA applications p 1747 N94-22224

PHASE STABILITY (MATERIALS)
Stability of the face-centered-cubic phase of heavy rare gas solids
[DE93-019949] p 1679 N94-20319
Sintering silicon nitride
[NASA-CASE-LEW-15489-1] p 1703 N94-20529

PHASE TRANSFORMATIONS
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827

Problems related to conservation laws: Phase transitions and viscoelasticity
[AD-A271429] p 1696 N94-19640
General introduction to microstructural evolution under cascade damage conditions
[DE93-017443] p 2012 N94-19923
Kinetics of phase transformations in glass forming systems
[NASA-CR-194270] p 1701 N94-20347
The effect of fluctuations on the electrical transport behavior in YBa2Cu3O(7-x) p 1736 N94-20519
Thermal expansion of electronic highly correlated materials
[ETN-93-93605] p 2026 N94-21135
Examinations of composition and deformation behavior of intermetallic phases on the basis of Fe3(AlSi)
[GKSS-92/E/16] p 1692 N94-21311
Static ultra-high pressure study of lanthanide and actinide metals using a diamond-anvil cell
[DE94-000369] p 1693 N94-21656
Temperature dependence of magnetic order in single-crystalline UPdSn
[DE93-040153] p 2033 N94-21991
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388

PHASE VELOCITY
Azo polymers for optical storage 3: Effect of film thickness on net phase retardation and writing speed
[AD-A272094] p 1705 N94-21267

PHASED ARRAYS
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
Quartz/fused silica chip carriers
[NASA-CR-194154] p 2016 N94-20340
Optical beam forming techniques for phased array antennas p 1727 N94-20442
Phased array antenna with couplers in spatial filter arrangement
[CA-PATENT-1,296,098] p 1737 N94-21031
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
Effect of errors on the phase centre and pointing angle of phased array antennas p 1746 N94-22162
AlGaAs laser diode FM spectrum: Phased array antenna application p 1746 N94-22196

PHENOLS
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947

PHONEMES
Speech synthesis with artificial neural networks p 1743 N94-20245

PHONONS
The multicomponent lineshape of the anharmonic A(1)(TO) phonon in PbTiO3
[DE93-018995] p 1970 N94-19971
Phonons and metastability in compressed nitrogen
[DE93-019913] p 2016 N94-20318
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A272955] p 2027 N94-21248
Inelastic neutron scattering of (gamma)-iron, and the determination of the elastic constants by lattice dynamics
[DE94-000694] p 1978 N94-22573

PHOSGENE
Infrared absorption spectroscopy of the weakly bonded CO-Cl2 complex
[AD-A271757] p 2027 N94-21304

PHOSPHATES
Transient studies of low temperature catalysts for methane conversion
[DE93-041232] p 1680 N94-20934
Spectroscopic studies of magnetic transitions in TbPO4
[DE94-001274] p 2035 N94-22565

PHOSPHIDES
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953

PHOSPHINES
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982

PHOSPHORUS
Core formation in the Moon: The mystery of the excess depletion of Mo, W and P p 2095 N94-20651
Polymeric nitrogen
[DE93-040544] p 1706 N94-21512
Refractive index behaviour of phosphorus-doped planar silica waveguides, appendix 7 p 1989 N94-21601

PHOTOABSORPTION
Photoabsorption and Compton scattering in ionization of helium at high photon energies
[DE94-000380] p 1974 N94-21658
Single and double ionization of helium by high-energy photon impact
[DE94-000381] p 1975 N94-21785
The effect of Compton scattering on the double to single ionization ratio in helium
[DE94-000884] p 1827 N94-22390

PHOTOCATHODES
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos
[DE93-040141] p 1816 N94-20277
CsI and some new photocathodes
[DE93-019387] p 1750 N94-20314
Electron quantum yields from a barium photocathode illuminated with polarized light
[DE93-019232] p 1980 N94-20475
SLD results from the study of polarized Z(sup 0) produced at the SLC
[DE93-041020] p 1982 N94-21952

PHOTOCHEMICAL REACTIONS
Laboratory studies of low temperature rate coefficients: The atmospheric chemistry of the outer planets
[NASA-CR-193485] p 1972 N94-20130
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526
Requirements for the early atmosphere of Mars from nitrogen isotope ratios p 2144 N94-21669
Mars atmosphere loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape p 2144 N94-21672
Possible solutions to the problem of channel formation on early Mars p 2144 N94-21673
The young Sun and photochemistry of the primitive Martian atmosphere p 2145 N94-21679
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21969
Photochemical approaches to conversion of light to electricity or fuel
[DE94-001650] p 1849 N94-22048
Development of advanced cloud parameterizations to examine air quality, cloud properties, and cloud-radiation feedback in mesoscale models
[DE93-041164] p 1853 N94-22384
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas
[DE94-000817] p 1820 N94-22585

PHOTOCONDUCTIVITY
Process to fabricate thick coplanar microwave electrode structures
[AD-D015913] p 1748 N94-19892
Photoconductive Semiconductor Switches for pulsed power applications
[DE93-019411] p 1750 N94-20294
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528

PHOTOCONDUCTORS
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528

PHOTODIODES
The quantum efficiency of HgCdTe photodiodes in relation to the direction of illumination and to their geometry p 1735 N94-20512

PHOTODISSOCIATION
Ionization of H2(+) in intense laser fields
[DE93-019160] p 1818 N94-21829
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas
[DE94-000817] p 1820 N94-22585

PHOTOELECTRIC EMISSION
Magnetic circular dichroism in x ray absorption and core-level photoemission
[DE93-019381] p 1688 N94-19986
Development of a numerical simulation model for a-Si:H solar cells and application to the analysis of experimentally obtained spectral characteristics
[ETN-93-95061] p 1846 N94-20151
Electron quantum yields from a barium photocathode illuminated with polarized light
[DE93-019232] p 1980 N94-20475
Photoemission and the electronic properties of heavy fermions: Limitations of the Kondo model
[DE93-040191] p 1974 N94-21553
Photoelectron holography of platinum (111)
[DE93-040856] p 1810 N94-21950

PHOTOELECTRON SPECTROSCOPY
ALE project
[AD-A271080] p 2014 N94-19980
Photoelectron spectroscopy at model boundary surfaces of energy converter semiconductors/electrolyte contacts: Adsorption, coadsorption, and triadsorption of Br2, Na, and H2O on Van der Waals surfaces of metal chalocogenide semiconductors
[ETN-93-95063] p 2015 N94-20152
Applications and source development for high-repetition rate x ray lasers
[DE93-019547] p 1815 N94-20259
Temperature dependence of 4f PES features and hole occupancy in ytterbium heavy fermions
[DE93-040131] p 1691 N94-20321
Study of the utilization of thin oxides in indium phosphides for the realisation of electron components
[ECL-92-38] p 2018 N94-20593
Alumoxanes: Rationalization of black box materials
[AD-A272805] p 1704 N94-21170
Diffraction and holography of photoelectrons and fluorescent x rays
[DE93-019240] p 1808 N94-21441
Photoemission and the electronic properties of heavy fermions: Limitations of the Kondo model
[DE93-040191] p 1974 N94-21553

PHOTOELECTRONS
Ionospheric photoelectrons measured at geosynchronous orbit
[AD-A272431] p 1857 N94-21202
Diffraction and holography of photoelectrons and fluorescent x rays
[DE93-019240] p 1808 N94-21441
Photoelectron holography of platinum (111)
[DE93-040856] p 1810 N94-21950
A Monte Carlo study of the Sudbury Neutrino Observatory small test detector experiment
[ISBN-0-315-59056-4] p 1977 N94-22416

PHOTOEXCITATION
Photochemical approaches to conversion of light to electricity or fuel
[DE94-001650] p 1849 N94-22048

PHOTOGEOLOGY
Preliminary results from Mariner 10: High resolution images of the Moon p 2107 N94-20719
Photogeological analysis of Europan tectonic features p 2129 N94-20838

PHOTOGRAMMETRY
Robust photo-topography by fusing shape-from-shading and stereo
[NASA-CR-194697] p 1806 N94-19920
Discharge rates in Ma'adim Vallis, Mars p 2128 N94-20830

PHOTOGRAPHIC TRACKING
Trajectory computations for an improved cinetheodolite tracking system p 1791 N94-22236

PHOTOGRAPHS
A comparison of some of the most current methods of image compression
[AD-A271841] p 1907 N94-20525
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-51
[NASA-TM-109189] p 1656 N94-21884
SkiCAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546

PHOTOGRAPHY
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213

PHOTOINTERPRETATION
Evaluation of C-band SAR data from SAREX 1992: Tapajos study site p 1839 N94-20964

PHOTOIONIZATION
Angular distributions of high-order ATI
[DE93-019125] p 1972 N94-20230
Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298
Generation of intense ultrashort x ray pulses
[DE93-019607] p 1817 N94-21299
Photoabsorption and Compton scattering in ionization of helium at high photon energies
[DE94-000380] p 1974 N94-21658
Single and double ionization of helium by high-energy photon impact
[DE94-000381] p 1975 N94-21785
Ionization of H2(+) in intense laser fields
[DE93-019160] p 1818 N94-21829
Direct detection of atomic ions from molecular photofragmentation during nonresonant multiphoton ionization of sputtered species
[DE93-040886] p 1976 N94-21951

The effect of Compton scattering on the double to single ionization ratio in helium
[DE94-000884] p 1827 N94-22390
PHOTOLITHOGRAPHY
X ray reflection masks: Manufacturing, characterization and first tests
[BONN-IR-92-31] p 1986 N94-21043
Examination for optimization of synchrotron radiation spectrum for the x ray depth lithography
[BONN-IR-92-32] p 1987 N94-21148
PHOTOLUMINESCENCE
Effect of exciton localization and delocalization on magnetic-field-dependent photoluminescence linewidths in semiconductors
[DE93-018860] p 1748 N94-19884
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
Dephasing processes in III-V semiconductors
[AD-A271677] p 2028 N94-21362
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Implantation of carbon in GaAs and compensating native defects
[DE93-040122] p 2030 N94-21763
PHOTOLYSIS
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982
PHOTOMAGNETIC EFFECTS
Photo- and thermal-induced antiferromagnetic interlayer coupling in Fe/(Fe-Si) superlattices
[DE93-040822] p 2031 N94-21930
PHOTOMETERS
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Silicon retina for optical tracking systems p 1755 N94-21098
Bidirectional method for optical channel waveguide attenuation measurement by detectors integrated on the wafer, appendix 3 p 1988 N94-21597
PHOTOMETRY
Sunphotometer network for monitoring aerosol properties in the Brazilian Amazon p 1839 N94-20961
PHOTCAL: The IRAF photometric calibration package p 1925 N94-22465
MOSAIC: Software for creating mosaics from collections of images p 1927 N94-22543
PHOTOMULTIPLIER TUBES
A Monte Carlo study of the Sudbury Neutrino Observatory small test detector experiment
[ISBN-0-315-59056-4] p 1977 N94-22416
PHOTON BEAMS
Target motion detecting impulse Doppler radar system
[AD-D015898] p 1717 N94-20198
PHOTON-ELECTRON INTERACTION
Photoabsorption and Compton scattering in ionization of helium at high photon energies
[DE94-000380] p 1974 N94-21658
Single and double ionization of helium by high-energy photon impact
[DE94-000381] p 1975 N94-21785
PHOTONICS
Photonics and nonlinear optics with molecular materials and polymers
[AD-A271747] p 1988 N94-21457
PHOTONS
Target motion detecting impulse Doppler radar system
[AD-D015898] p 1717 N94-20198
Direct photon results from CDF
[DE93-019908] p 1980 N94-20317
Material optimization for hard x ray Fresnel zone plates
[DE93-019589] p 1990 N94-21837
Search for excited quarks in p(-p) collisions at the square root of s = 1.8 TeV
[DE93-019910] p 1975 N94-21840
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941
Detector noise statistics in the non-linear regime p 1748 N94-22526
PHOTONUCLEAR REACTIONS
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941
PHOTOPRODUCTION
Direct photon results from CDF
[DE93-019908] p 1980 N94-20317
Proceedings of the 1993 DOE/NREL Hydrogen Program Review
[DE93-018207] p 1847 N94-21616
PHOTORECEPTORS
Nature's crucible: Manufacturing optical nonlinearities for high resolution, high sensitivity encoding in the compound eye of the fly, Musca domestica p 1755 N94-21095
PHOTOSPHERE
Solar imaging vector magnetograph
[NASA-CR-194729] p 1810 N94-21876
Large-scale structure of the solar plasma corona: An analysis of Yohkoh SXT images p 2004 N94-22657
PHOTOVOLTAIC CELLS
System performance predictions for Space Station Freedom's electric power system
[NASA-TM-106396] p 1667 N94-20062
Fabrication of stable large-area thin-film CdTe photovoltaic modules
[DE93-018204] p 1845 N94-20095
Self-deploying photovoltaic power system
[NASA-CASE-LEW-15308-1] p 1846 N94-20196
Building integrated photovoltaic systems analysis
[DE93-018208] p 1846 N94-21298
Annual Report, Materials Science Branch, FY 1992
[DE94-000204] p 1849 N94-22015
PHOTOVOLTAIC CONVERSION
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Growth mechanisms and characterization of hydrogenated amorphous-silicon-alloy films
[DE93-018202] p 1699 N94-20047
Power transmission by laser beam from lunar-synchronous satellite
[NASA-TM-4496] p 1669 N94-20102
Building integrated photovoltaic systems analysis
[DE93-018208] p 1846 N94-21298
Stable, high-efficiency amorphous-silicon solar cells with low hydrogen content
[DE93-018214] p 1848 N94-21826
Thin-film CdTe and CuInSe2 photovoltaic technologies
[DE93-018217] p 1848 N94-21827
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043
Photochemical approaches to conversion of light to electricity or fuel
[DE94-001650] p 1849 N94-22048
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE93-018220] p 1850 N94-22257
PHTHALATES
Growth and morphology of crystals: Theory and observations
[PB93-221166] p 2035 N94-22273
PHYSICAL CHEMISTRY
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690
PHYSICAL EXAMINATIONS
Analysis of health status from preliminary physical examination of flight academy applicants
[AD-A267759] p 1889 N94-19962
PHYSICAL EXERCISE
Physiological correlates of stress-induced decrements in human perceptual performance
[DOT/FAA/AM-93/19] p 1893 N94-20081
PHYSICAL FITNESS
Maximum team lifting capacity as a function of team size
[AD-A271642] p 1892 N94-21036
PHYSICAL OPTICS
Study of electromagnetic wave scattering from characterized rough surfaces
[AD-A270931] p 1716 N94-19934
RCS Analysis of Plate Geometries, parts 1 and 2
[NASA-CR-194173] p 1717 N94-20269
High-frequency techniques for RCS prediction of plate geometries p 1717 N94-20270
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20408
An optically-assisted 3-D cellular array machine
[AD-A272683] p 1987 N94-21163
PHYSICAL WORK
Apparatus and method for measuring subject work rate on an exercise device
[NASA-CASE-MSC-21752-1] p 1895 N94-20194
PHYSIOLOGICAL EFFECTS
Cosmos 2229
[NASA-CR-194734] p 1895 N94-20338
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
Studies of neural and cognitive function in subjects exposed to the marine-air interface, phases 1 and 2
[AD-A272282] p 1891 N94-20624
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165
Physiological efficacy of a lightweight ambient air cooling unit for various applications
[AD-A272952] p 1896 N94-21247
PHYSIOLOGICAL RESPONSES
Human responses to exercise-heat stress
[AD-A272581] p 1892 N94-21209
PHYSIOLOGY
Physiologically based pharmacokinetic modelling of percutaneously absorbed dibromomethane utilizing multiple dermal sub-compartments
[AD-A271106] p 1889 N94-19981
Physiological correlates of stress-induced decrements in human perceptual performance
[DOT/FAA/AM-93/19] p 1893 N94-20081
Wind chill: The temperature feeling caused by the wind velocity
[KNMI-TR-103A] p 1890 N94-20238
Studies of neural and cognitive function in subjects exposed to the marine-air interface, phases 1 and 2
[AD-A272282] p 1891 N94-20624
PICOSECOND PULSES
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas
[DE94-000817] p 1820 N94-22585
PIEZOELECTRIC GAGES
Free flight experiment with a laminar wing glove p 1639 N94-22600
PIEZOELECTRICITY
Proceedings of the 8th International Symposium on Applications of Ferroelectrics
[AD-A270679] p 1749 N94-20012
Application of change detection to dynamic contact sensing
[AD-A270523] p 1939 N94-20105
Actively controlled shaft seals for aerospace applications
[NASA-CR-194759] p 1823 N94-20538
PIEZORESISTIVE TRANSDUCERS
High accuracy die mechanical stress measurement with the ATC04 Assembly Test Chip
[DE93-019435] p 1830 N94-20477
PILOT PERFORMANCE
Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20627
Modelling decision-making by pilots
[NASA-CR-194767] p 2040 N94-21821
PILOT TRAINING
Modelling decision-making by pilots
[NASA-CR-194767] p 2040 N94-21821
Public-sector aviation issues: Graduate research award papers, 1991-1992
[PB93-206258] p 1642 N94-22055
PILOTLESS AIRCRAFT
Low-cost, dual-use platforms for environmental sensing, phase 1
[AD-A272951] p 1646 N94-21246
PILOTS
ATC/pilot voice communications: A survey of the literature
[DOT/FAA/AM-93/20] p 1738 N94-21201
PINCH EFFECT
Research on plasma-puff initiation of high Coulomb transfer switches
[NASA-CR-194371] p 1994 N94-21289
Plasma-puff initiation of high Coulomb transfer switches p 1994 N94-21290
Characteristics of plasma-puff trigger for a inverse-pinch plasma switch p 1995 N94-21291
Characteristics of switching plasma in an inverse-pinch switch p 1995 N94-21292
Comparative study of INPIStron and spark gap p 1995 N94-21293
PINHOLES
Multisensor pinhole yawsonde
[AD-A271715] p 1808 N94-20930
PINNING
Relaxation of hysteresis loop in a single crystal of YBa2Cu4O8
[DE93-019519] p 2029 N94-21649
PIONS
Evaluation of the chemical composition of cosmic radiation in energy area of 10(exp 15) eV
[ETN-93-93682] p 2150 N94-21056
Qualitative and quantitative aspects of the QCD theory of elastic form factors
[DE93-040864] p 2038 N94-21513
Low p(sub T) phenomena observed in high energy nuclear collisions
[DE94-000825] p 1962 N94-21849

PIPELINING (COMPUTERS)
Avoiding and tolerating latency in large-scale next-generation shared-memory multiprocessors p 1753 N94-21081
Instruction set commutivity p 1766 N94-21719
Using stream interleaving to eliminate the need for interlocks in deeply pipelined processors p 1781 N94-22175

PIPES (TUBES)
Evaluation of the fabricability of advanced iron aluminide-clad austenitic stainless steel tubing [DE93-040598] p 1693 N94-21771
Fabrication of whisker-toughened alumina tubes [DE94-001012] p 1677 N94-22022

PISTONS
The flow of gas across the piston-segments-cylinder interface [ECL-92-40] p 1824 N94-20594
Vapor-delivered lubrication of steel-steel and steel-ceramic systems [PB93-202364] p 1825 N94-21451

PITCH
Segmentation and frequency domain ML pitch estimation of speech signals p 1747 N94-22212

PITOT TUBES
Free flight experiment with a laminar wing glove p 1639 N94-22600
Riblet boundary layer measurements of an A-310 fuselage with Pitot combs p 1640 N94-22605

PIVOTS
Bladder operated robotic joint [NASA-CASE-MFS-28682-1] p 1701 N94-20359

PIXELS
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
Objective determination of image end-members in spectral mixture analysis p 1686 N94-20831
Convex set and linear mixing model p 1844 N94-20888
Nature's crucible: Manufacturing optical nonlinearities for high resolution, high sensitivity encoding in the compound eye of the fly, Musca domestica p 1755 N94-21095

PLAINS
Workshop on the Martian Northern Plains: Sedimentological, Periglacial, and Paleoclimatic Evolution [NASA-CR-194831] p 2088 N94-20382
The fate of water deposited in the low-lying northern plains p 2089 N94-20387
Stratigraphy of the Martian northern plains p 2091 N94-20398
Geomorphic evidence for an eolian contribution to the formation of the Martian northern plains p 2092 N94-20402
Mars: New evidence for origin of some Vallies Marineris layered deposits p 2112 N94-20748

PLANAR STRUCTURES
High temperature superconducting planar circuit structure for high frequency applications [AD-A273083] p 2028 N94-21521
Geometric optimization [DE93-040152] p 1917 N94-21764
Time-laplace-transform-domain analysis of wave propagation in planar waveguides [PB93-215226] p 1960 N94-22096

PLANE WAVES
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408
The effect of dissipative inhomogeneous medium on the statistics of the wave intensity p 1726 N94-20440
Signal processing in the linear statistical model [AD-A272114] p 1736 N94-20570

PLANETARY ATMOSPHERES
Laboratory studies of low temperature rate coefficients: The atmospheric chemistry of the outer planets [NASA-CR-193485] p 1972 N94-20130
Remote sounding of tropospheric minor constituents [NASA-CR-194265] p 1855 N94-20132
Dynamics of large scale impacts on Venus and Earth p 2098 N94-20666
Low-energy ion implantation: Large mass fractionation of argon p 1685 N94-20697
Numerical modeling of impact erosion of atmospheres: Preliminary results p 2131 N94-20847
Core formation, wet early mantle, and H2O degassing on early Mars p 2145 N94-21674

PLANETARY BASES
Mars exploration study workshop 2 [NASA-CP-3243] p 2146 N94-21883

PLANETARY BOUNDARY LAYER
Temperature/pressure and water vapor sounding with microwave spectroscopy p 1812 N94-22436

PLANETARY COMPOSITION
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z [NASA-CR-193149] p 2092 N94-20636
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
Fine resolution chronology based on initial Sr-87/Sr-86 [CONTRIB-5230(794)] p 1686 N94-20794
Discovery Venera surface: Atmosphere geochemistry experiments mission concept p 2123 N94-20806
The x ray microprobe determination of chromium oxidation state in olivine from lunar basalt and kimberlitic diamonds p 1686 N94-20807
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
A study of carbonates, sulfates, and phosphates using thermal emission spectroscopy p 1686 N94-20868
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668
In situ identification of the Martian surface material and its interaction with the Martian atmosphere using DTA/GC p 1812 N94-22434

PLANETARY CORES
Expectations for the Martian core magnetic field p 2120 N94-20792
Core formation by giant impacts: Conditions for intact melt region formation p 1863 N94-20833
The connection between Venus' free obliquity and its CMB oblateness p 2139 N94-20896
Core formation, wet early mantle, and H2O degassing on early Mars p 2145 N94-21674

PLANETARY CRATERS
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z [NASA-CR-193149] p 2092 N94-20636
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Venus magmatic and tectonic evolution p 2101 N94-20683
Crater destruction on the Venusian highlands by tectonic processes p 2103 N94-20696
Kalkkop crater, Eastern Cape: A new impact crater in South Africa p 1862 N94-20714
The Manson impact crater: Estimation of the energy of formation, possible size of the impacting asteroid or comet, and ejecta volume and mass p 2083 N94-20721
Named Venusian craters p 2109 N94-20725
Venus' impact-crater database: Update to approximately 98 percent of the planet's surface p 2110 N94-20736
Searching for ancient Venus p 2111 N94-20743
The missing impact craters on Venus p 2119 N94-20782
Impact basins on Venus and some interplanetary comparisons p 2119 N94-20785
Parabolic features and the erosion rate on Venus p 2122 N94-20801
Discovery Venera surface: Atmosphere geochemistry experiments mission concept p 2123 N94-20806
Original size of the Vredefort structure, South Africa p 1863 N94-20825
Origin of the Vredefort structure, South Africa: Impact model p 1863 N94-20826
Core formation by giant impacts: Conditions for intact melt region formation p 1863 N94-20833
Is there uniformitarian or catastrophic tectonics on Venus? p 2129 N94-20839
Geology of Galileo Regio quadrangle, Ganymede p 2130 N94-20842
Elevation and igneous crater modification on Venus: Implications for magmatic volatile content p 2135 N94-20872
Large floor-fractured craters and isostatic crater modification: Implications for lithospheric thickness on Venus p 2135 N94-20873
Evolution of the global water cycle on Mars: The geological evidence p 2142 N94-21660
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667

PLANETARY CRUSTS
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus p 2099 N94-20675
Ridge belt-related scarps and troughs: Compressional crustal bending on Venus p 2106 N94-20711
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
Response of the topography and gravity field on Venus to mantle upwelling beneath a chemical boundary layer p 2117 N94-20775
Differentiation of magma oceans and the thickness of the depleted layer on Venus p 2118 N94-20780
Impact basins on Venus and some interplanetary comparisons p 2119 N94-20785
The parent magma of the Nakhla (SNC) meteorite: Reconciliation of composition estimates from magmatic inclusions and element partitioning p 2085 N94-20836
Morphologic classes of impact basins on Venus p 2137 N94-20883
Wrinkle ridges, reverse faulting, and the depth penetration of lithospheric stress in lunae planum, Mars p 2141 N94-20910
Possible flexural signatures around Olympus and Ascraeus Montes, Mars p 2142 N94-20911
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666

PLANETARY EVOLUTION
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z [NASA-CR-193149] p 2092 N94-20636
Dynamics of large scale impacts on Venus and Earth p 2098 N94-20666
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus p 2099 N94-20675
Venus magmatic and tectonic evolution p 2101 N94-20683
Low-energy ion implantation: Large mass fractionation of argon p 1685 N94-20697
Diffusive redistribution of water vapor in the solar nebula revisited p 2113 N94-20751
Recondensation in the early solar system: Physical conditions and source material p 2085 N94-20849
Variety in planetary systems p 2086 N94-20871
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667

PLANETARY GEOLOGY
Workshop on the Martian Northern Plains: Sedimentological, Periglacial, and Paleoclimatic Evolution [NASA-CR-194831] p 2088 N94-20382
A wet-geology and cold-climate Mars model: Punctuation of a slow dynamic approach to equilibrium p 2090 N94-20389
Possible occurrence and origin of massive ice in Utopia Planitia p 2090 N94-20390
Observed climatic activity pertaining to the evolution of the northern plains p 2090 N94-20392
The thumbprint terrain: What will Mars Observer tell us? p 2091 N94-20397
Stratigraphy of the Martian northern plains p 2091 N94-20398
Balloon exploration of the northern plains of Mars near and north of the Viking 2 landing site p 2092 N94-20401
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z [NASA-CR-193149] p 2092 N94-20636
SO2 on Venus: IUE, HST and ground-based measurements, and the active volcanism connection p 2092 N94-20637
The Koshak section: Evidence for element fractionation and an oxidation event at the K/T boundary p 1862 N94-20641
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Dynamics of large scale impacts on Venus and Earth p 2098 N94-20666
Structural evidence for reorientation of Miranda about a paleo-pole p 2098 N94-20671
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Thermal and rheological controls on magma migration in dikes: Examples from the east rift zone of Kilauea volcano, Hawaii p 1862 N94-20673

Constraints on the rate of discharge and duration of the Mangala Valles flood p 2099 N94-20674
Venus magmatic and tectonic evolution p 2101 N94-20683
Eruption history of the Tharsis shield volcanoes, Mars p 2102 N94-20692
Geology of Biblis Patera, Ulysses Patera, and Jovis Tholus, Mars p 2103 N94-20693
Crater destruction on the Venusian highlands by tectonic processes p 2103 N94-20696
Geologic mapping of Harmakhis and Reull Valles region, Mars: Evidence for multiple resurfacing and drainage events p 1844 N94-20705
Some deformation trends and topographic characteristics of tesserae on Venus p 2105 N94-20706
Studying Venus using a GIS database p 2105 N94-20707
Chocolate tablet aspects of cytherean Meshkenet Tessera p 2106 N94-20710
Ridge belt-related scarps and troughs: Compressional crustal bending on Venus p 2106 N94-20711
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Mars: New evidence for origin of some Valles Marineris layered deposits p 2112 N94-20748
Rifting at Devana Chasma, Venus: Structure and estimation of the effective thickness of the elastic lithosphere p 2113 N94-20754
Volcanic rises on Venus: Geology, formation, and sequence of evolution p 2113 N94-20755
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
GMM-1: A 50 degree and order gravitational field model for Mars p 2117 N94-20774
Differentiation of magma oceans and the thickness of the depleted layer on Venus p 2118 N94-20780
Impact basins on Venus and some interplanetary comparisons p 2119 N94-20785
Discovery Venera surface: Atmosphere geochemistry experiments mission concept p 2123 N94-20806
Extensional history of Mars' Tharsis Region p 2125 N94-20814
Complex structure of the Thaumasia region of Mars p 2125 N94-20815
Large, ancient, compressional structures on Mars p 2125 N94-20816
Tumuli and tubes: Teaching scientific techniques p 2039 N94-20818
Magellan Mission p 1652 N94-20829
Discharge rates in Ma'adim Vallis, Mars p 2128 N94-20830
Complex ridged terrain-related ridge belts on Venus: Global distribution and classification p 2129 N94-20835
Is there uniformitarian or catastrophic tectonics on Venus? p 2129 N94-20839
Geology of Galileo Regio quadrangle, Ganymede p 2130 N94-20842
Spectral analysis of chemisorbed CO2 on Mars analog materials p 2140 N94-20900
Comparison of flank modification on Ascraeus and Arsia Montes volcanoes, Mars p 2140 N94-20903
Evolution of the global water cycle on Mars: The geological evidence p 2142 N94-21660
Ancient Martian valley genesis and paleoclimatic inference: The present as a key to the past p 2142 N94-21661
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668
Fluvial valleys in the heavily cratered terrains of Mars: Evidence for paleoclimatic change? p 2144 N94-21670
Early Mars: The inextricable link between internal and external influences on valley network formation p 2146 N94-21681
The Martian valley networks: Origin by niveo-fluvial processes p 2146 N94-21682
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States [DE93-040604] p 1859 N94-22006
MSATT Workshop on Innovative Instrumentation for the In Situ Study of Atmosphere-Surface Interactions on Mars [NASA-CR-194584] p 1811 N94-22430
A Backscatter Moessbauer Spectrometer (BaMS) for use on Mars p 1811 N94-22431
Optical luminescence spectroscopy as a probe of the surface mineralogy of Mars p 1813 N94-22437

PLANETARY GRAVITATION
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Magellan at Venus: Summary of science findings p 2110 N94-20734
Venus gravity: New Magellan low altitude data p 2117 N94-20772
Variety in planetary systems p 2086 N94-20871

PLANETARY IONOSPHERES
Nonthermal planetary radio emissions: Theories and observations p 2001 N94-22635

PLANETARY MAGNETIC FIELDS
Expectations for the Martian core magnetic field p 2120 N94-20792

PLANETARY MAGNETOSPHERES
Nonthermal planetary radio emissions: Theories and observations p 2001 N94-22635

PLANETARY MANTLES
Differentiation of magma oceans and the thickness of the depleted layer on Venus p 2118 N94-20780
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
The connection between Venus' free obliquity and its CMB oblateness p 2139 N94-20896
Wrinkle ridges, reverse faulting, and the depth penetration of lithospheric stress in lunae planum, Mars p 2141 N94-20910
Wet inside and out? Constraints on water in the Martian mantle and on outgassed water, based on melt inclusions in SNC meteorites p 2145 N94-21678

PLANETARY MAPPING
Stratigraphy of the Martian northern plains p 2091 N94-20398
Balloon exploration of the northern plains of Mars near and north of the Viking 2 landing site p 2092 N94-20401
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
MinMap: An imaging spectrometer for high resolution compositional mapping of the Moon p 1813 N94-20688
Geologic mapping of Harmakhis and Reull Valles region, Mars: Evidence for multiple resurfacing and drainage events p 1844 N94-20705
Chronology, eruption duration, and atmospheric contribution of Apollinaris Patera, Mars p 2108 N94-20720
Earth-based measurement of lunar topography using delayed radar interferometry p 2119 N94-20787
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
Complex structure of the Thaumasia region of Mars p 2125 N94-20815
Comparison of flank modification on Ascraeus and Arsia Montes volcanoes, Mars p 2140 N94-20903

PLANETARY METEOROLOGY
Observed climatic activity pertaining to the evolution of the northern plains p 2090 N94-20392

PLANETARY NEBULAE
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
AGB stars as a source of short-lived radioactive nuclei in the solar nebula p 2133 N94-20859

PLANETARY QUAKES
Seismic-triggering history of the catastrophic outflows in the Chryse region of Mars p 2091 N94-20399

PLANETARY ROTATION
The connection between Venus' free obliquity and its CMB oblateness p 2139 N94-20896

PLANETARY STRUCTURE
Differentiation of magma oceans and the thickness of the depleted layer on Venus p 2118 N94-20780
Large, ancient, compressional structures on Mars p 2125 N94-20816
Wet inside and out? Constraints on water in the Martian mantle and on outgassed water, based on melt inclusions in SNC meteorites p 2145 N94-21678

PLANETARY SURFACES
Advances in spaceborne radar remote sensing p 1723 N94-20424
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z [NASA-CR-193149] p 2092 N94-20636
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Goniospectrometric properties of a white standard p 1684 N94-20664
Dynamics of large scale impacts on Venus and Earth p 2098 N94-20666
Comparative hypsometric analysis of both Earth and Venus topographic distributions p 2108 N94-20722
The Clementine Mission science return at the Moon and Geographos p 1652 N94-20850

PLANETARY SYSTEMS
Variety in planetary systems p 2086 N94-20871

PLANETARY TEMPERATURE
Mars and the early Sun p 2146 N94-21683

PLANETARY WAVES
Interactions of free modes, tides, and gravity waves in the middle atmosphere [REPT-84] p 1855 N94-20155

PLANNING
Graphical interactive planning of robotic applications with support of integrated simulation [ETN-93-93793] p 1944 N94-21057
Multicriteria optimisation problem in the agricultural modelling p 1844 N94-22073

PLANTS (BOTANY)
Health effects of global warming: Problems in assessment [DE93-040323] p 1850 N94-19930

PLASMA ACCELERATION
Magnetic insulation of secondary electrons in plasma source ion implantation [DE93-040106] p 1997 N94-21988

PLASMA ARC WELDING
Impact of copper vapour contamination on argon arcs p 1994 N94-21053

PLASMA COMPOSITION
Transient thermal analysis of cryocondensation pump for JET [DE93-040372] p 1992 N94-20003

PLASMA CONDUCTIVITY
The relaxed state and entropy production due to the electric resistivity and viscosity of plasma p 2010 N94-22696

PLASMA CONTROL
Effect of limiter end loss in finite Larmor radius theory [DE93-040913] p 1992 N94-19887
Fast ion behavior during neutral beam injection in ATF [DE93-040267] p 1992 N94-20058
Beta-limiting instabilities in D3-D discharges with large bootstrap current [DE93-015476] p 1993 N94-20326
Shear flow generation by Reynolds stress and suppression of resistive g-modes [DE93-040911] p 1995 N94-21514
Parametric instabilities in picosecond time scales [DE94-000384] p 1966 N94-21958
Fusion Plasma Theory. Task 1: Magnetic confinement fusion plasma theory [DE94-000778] p 1998 N94-22019
Enhanced confinement regimes and control technology in the DIII-D tokamak [DE93-019004] p 1998 N94-22039
A spheromak ignition experiment reusing Mirror Fusion Test Facility (MFTF) equipment [DE94-001856] p 2034 N94-22050
A two-dimensional kinetic model of the scrape-off layer [DE94-001235] p 1999 N94-22562
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas [DE94-001304] p 1999 N94-22566
Effects of magnetic field perturbations in the ATF torsatron [DE94-000474] p 1999 N94-22568
Physics of transport phenomena in magnetic confinement plasmas p 2000 N94-22628

PLASMA CURRENTS
Radiation of plasma wave wings through an electrodynamic tether satellite system with any sharp angle geometry [REPT-85] p 1993 N94-20156
Beta-limiting instabilities in D3-D discharges with large bootstrap current [DE93-015476] p 1993 N94-20326
Plasma heating in toroidal systems p 2000 N94-22629
Consequences of chaotic particle motion for the stability of space plasma current sheets p 2001 N94-22636
Current loop coalescence studied by 3-D electromagnetic particle code p 2005 N94-22660
Formation of fast magnetosonic shock waves during two current loops collision in solar flare p 2005 N94-22662
Dynamics of physical state during two current loops collision p 2005 N94-22663

PLASMA DENSITY
Measurement of mesospheric turbulence in the framework of the metal campaign and development of a sensor for static pressure free measurements of neutral and electron density
[BONN-IR-92-45] p 1857 N94-21149
On effects of a local plasma density growth due to ponderomotive forces at fast wave launching in tokamaks
[IPPCZ-328] p 1996 N94-21571
Enhanced confinement regimes and control technology in the DIII-D tokamak
[DE93-019004] p 1998 N94-22039
Effects of magnetic field perturbations in the ATF torsatron
[DE94-000474] p 1999 N94-22568
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583
Non-equilibrium ionization in an M class solar flare p 2004 N94-22653
Plasma structure in a plasma flow along a magnetic mirror field p 2005 N94-22664
On the nonlinear instability of thermal structures p 2006 N94-22668

PLASMA DIAGNOSTICS
Parametric variations of ion transport in TFTR
[DE93-012653] p 1991 N94-19883
Optical diagnostic instrument for monitoring etch uniformity during plasma etching of polysilicon in a chlorine-helium plasma
[DE93-019582] p 1993 N94-20261
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297
Laser diagnostics of RF hydrogen plasma reactors: Application to the processing of III-V materials
[AD-A272659] p 1994 N94-21214
A new innovative instrument for space plasma instrumentation
[NASA-CR-194736] p 1666 N94-21780
On Plasma Edge Spectroscopy and Spectroscopic Studies of Impurity Densities and Impurity Transport
[IPF-92-2] p 1996 N94-21802
Plasma edge spectroscopy p 1996 N94-21803
Spectroscopic studies of impurity densities and impurity transport p 1997 N94-21804
Fusion Plasma Theory. Task 1: Magnetic confinement fusion plasma theory
[DE94-000778] p 1998 N94-22019

PLASMA DIFFUSION
Parametric variations of ion transport in TFTR
[DE93-012653] p 1991 N94-19883
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas
[DE94-001304] p 1999 N94-22566
Double diffusion convection in a rotating spherical shell p 2006 N94-22666

PLASMA DYNAMICS
Performance potential of plasma thrusters: Arcjet and Hall thruster modeling
[AD-A271085] p 1667 N94-19847
Neoclassical kinetic theory near an X-point: Plateau regime
[DE93-019825] p 1951 N94-20224
Comparative study of INPIStron and spark gap p 1995 N94-21293
INPIStron switched pulsed power for dense plasma pinches p 1995 N94-21294
Evaluation of externally heated pulsed MPD thruster cathodes
[NASA-CR-191090] p 1670 N94-21565
MHD relaxation in magnetic loops p 2004 N94-22658

PLASMA ENGINES
Performance potential of plasma thrusters: Arcjet and Hall thruster modeling
[AD-A271085] p 1667 N94-19847

PLASMA ETCHING
Optical diagnostic instrument for monitoring etch uniformity during plasma etching of polysilicon in a chlorine-helium plasma
[DE93-019582] p 1993 N94-20261
Particle behavior in an ECR plasma etch tool
[DE93-040343] p 1996 N94-21769

PLASMA FOCUS
Research on plasma-puff initiation of high Coulomb transfer switches
[NASA-CR-194371] p 1994 N94-21289
Plasma-puff initiation of high Coulomb transfer switches p 1994 N94-21290
Characteristics of plasma-puff trigger for a inverse-pinch plasma switch p 1995 N94-21291
INPIStron switched pulsed power for dense plasma pinches p 1995 N94-21294
Plasma lens experiments at the Final Focus Test Beam
[DE93-041081] p 1981 N94-21688

PLASMA FREQUENCIES
Theory of leaked auroral kilometric radiation p 2003 N94-22649

PLASMA GENERATORS
A dc Penning surface-plasma source
[DE93-040126] p 1997 N94-21989

PLASMA HEATING
Fusion plasma theory grant. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE94-000779] p 1994 N94-20940
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522
The TST: A small steady-state tokamak for integrated divertor testing
[DE94-001016] p 1998 N94-22045
Opacity measurements in shock-generated argon plasmas
[DE94-001057] p 1998 N94-22399
Plasma heating in toroidal systems p 2000 N94-22629

PLASMA INTERACTION EXPERIMENT
The angular velocity spread of REB induced by magnetic field discontinuity
[IPPCZ-331] p 1996 N94-21573

PLASMA INTERACTIONS
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-194728] p 1856 N94-20537
TROPIX plasma interactions group report
[NASA-CR-191149] p 1666 N94-21864
Consequences of plasma-maser in plasma astrophysics p 2006 N94-22669

PLASMA JETS
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
Impact of copper vapour contamination on argon arcs p 1994 N94-21053
Numerical simulation of magnetic reconnection associated with emerging flux in the solar atmosphere p 2004 N94-22654
X ray jets in the solar corona: Observations with Yohkoh Soft X Ray Telescope p 2004 N94-22655
Three-dimensional simulations of cosmic jets employing the smoothed particle hydrodynamics technique p 2008 N94-22685
Helical kink instability of jets from young stellar objects p 2008 N94-22686

PLASMA LAYERS
Three-wave resonant interaction in a thin layer
[AD-A272331] p 1994 N94-21039
A moving finite element model of the tokamak scrapeoff layer
[DE94-000673] p 1997 N94-21965
A two-dimensional kinetic model of the scrape-off layer
[DE94-001235] p 1999 N94-22562
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas
[DE94-001304] p 1999 N94-22566
Electron temperature gradient driven instability in the tokamak boundary plasma
[DE94-001307] p 1999 N94-22596

PLASMA PHYSICS
Laser propagation in underdense plasmas: Scaling arguments
[DE93-040439] p 1816 N94-20480
Fusion plasma theory grant. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE94-000779] p 1994 N94-20940
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546
Fusion Plasma Theory. Task 1: Magnetic confinement fusion plasma theory
[DE94-000778] p 1998 N94-22019
Continuum damping of ideal toroidal Alfven eigenmodes
[DE94-001233] p 1998 N94-22560
Theory and simulation of plasma sheath waves
[DE94-001305] p 1999 N94-22567
Fourth International Toki Conference on Plasma Physics and Controlled Nuclear Fusion
[ESA-SP-351] p 2000 N94-22624
Driven reconnection and self-organization p 2000 N94-22625
Physics of transport phenomena in magnetic confinement plasmas p 2000 N94-22626
Jets associated with active galactic nuclei p 2000 N94-22631
Physical properties of dense astrophysical plasmas p 2001 N94-22637

PLASMA PINCH
Research on plasma-puff initiation of high Coulomb transfer switches
[NASA-CR-194371] p 1994 N94-21289
Plasma-puff initiation of high Coulomb transfer switches p 1994 N94-21290
Characteristics of plasma-puff trigger for a inverse-pinch plasma switch p 1995 N94-21291
Characteristics of switching plasma in an inverse-pinch switch p 1995 N94-21292
Comparative study of INPIStron and spark gap p 1995 N94-21293
INPIStron switched pulsed power for dense plasma pinches p 1995 N94-21294
The relaxed state and entropy production due to the electric resistivity and viscosity of plasma p 2010 N94-22696

PLASMA POTENTIALS
Plasma structure in a plasma flow along a magnetic mirror field p 2005 N94-22664

PLASMA PROPULSION
Evaluation of externally heated pulsed MPD thruster cathodes
[NASA-CR-191090] p 1670 N94-21565

PLASMA RESONANCE
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-001234] p 1998 N94-22561

PLASMA SHEATHS
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937
Magnetic insulation of secondary electrons in plasma source ion implantation
[DE93-040106] p 1997 N94-21988
Theory and simulation of plasma sheath waves
[DE94-001305] p 1999 N94-22567
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583

PLASMA SLABS
Three-wave resonant interaction in a thin layer
[AD-A272331] p 1994 N94-21039
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas
[DE94-001304] p 1999 N94-22566
Theory and simulation of plasma sheath waves
[DE94-001305] p 1999 N94-22567

PLASMA SPRAYING
Turntable mechanism
[NASA-CASE-MFS-28522-1] p 1823 N94-20380
Method of fabricating a rocket engine combustion chamber
[NASA-CASE-MFS-28569-1] p 1703 N94-20541
Surface modification for corrosion resistance
[DE93-017419] p 1693 N94-21825

PLASMA TEMPERATURE
Plasma heating in toroidal systems p 2000 N94-22629
On the nonlinear instability of thermal structures p 2006 N94-22668

PLASMA TURBULENCE
Multi-CPU plasma fluid turbulence calculations on a CRAY Y-MP C90
[DE93-015425] p 1801 N94-20562
Shear flow generation by Reynolds stress and suppression of resistive g-modes
[DE93-040911] p 1995 N94-21514
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas
[DE94-001304] p 1999 N94-22566
Dynamo driven by weak plasma turbulence: The effect of differential rotation p 2005 N94-22665
The onset and spectra of a magnetized Langmuir turbulence p 2006 N94-22673

PLASMA WAVES
A study of Saturn's E-ring particles using the Voyager 1 plasma wave instrument
[NASA-CR-194694] p 2088 N94-20048
Radiation of plasma wave wings through an electrodynamic tether satellite system with any sharp angle geometry
[REPT-85] p 1993 N94-20156
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-001234] p 1998 N94-22561
Theory and simulation of plasma sheath waves
[DE94-001305] p 1999 N94-22567

PLASMA-ELECTROMAGNETIC INTERACTION
Radiation of plasma wave wings through an electrodynamic tether satellite system with any sharp angle geometry
[REPT-85] p 1993 N94-20156
Three-wave resonant interaction in a thin layer
[AD-A272331] p 1994 N94-21039
Solar wind-magnetosphere interaction as simulated by a 3D, EM particle code p 2007 N94-22674
PLASMA-PARTICLE INTERACTIONS
Current loop coalescence studied by 3-D electromagnetic particle code p 2005 N94-22660
Dynamics of physical state during two current loops collision p 2005 N94-22663
Consequences of plasma-maser in plasma astrophysics p 2006 N94-22669
PLASMAPAUSE
Detailed analysis case studies of trapped plasmas at the Earth's magnetic equator
[AD-A272497] p 1858 N94-21432
PLASMAS (PHYSICS)
Plasma chemical vapor deposition of halide glasses
[AD-D015933] p 1701 N94-20331
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647
Engineering design, fabrication, installation, operation, and maintenance services in support of research on laser plasma physics
[AD-A272249] p 1994 N94-20943
Three-wave resonant interaction in a thin layer
[AD-A272331] p 1994 N94-21039
Characteristics of switching plasma in an inverse-pinch switch p 1995 N94-21292
Radial diffusion of toroidally trapped particles induced by lower hybrid and fast waves
[IPPCZ-327] p 1996 N94-21593
Results from long conduction time plasma opening switch experiments at Sandia National Laboratories
[DE93-019063] p 1762 N94-21632
Particle behavior in an ECR plasma etch tool
[DE93-040343] p 1996 N94-21769
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
Edge plasma experiments on CASTOR tokamak
[IPPCZ-332] p 1997 N94-21816
Time evolution of the quark-gluon plasma
[DE94-000804] p 1998 N94-22389
A two-dimensional kinetic model of the scrape-off layer
[DE94-001235] p 1999 N94-22562
PLASMASPHERE
Ionospheric photoelectrons measured at geosynchronous orbit
[AD-A272431] p 1857 N94-21202
PLASMONS
Formation of colloidal Ag precipitates in fused silica by MeV ion implantation
[DE93-040268] p 2012 N94-19869
PLASTIC DEFORMATION
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
PLASTIC PROPERTIES
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
Development of bioelastic material for aspects of wound repair
[AD-A272000] p 1892 N94-21503
PLASTICS
Mold bolt and means for achieving close tolerances between bolts and bolt holes
[NASA-CASE-MFS-28720-1] p 1823 N94-20379
PLATE THEORY
Improvements to a method for the geometrically nonlinear analysis of compressively loaded stiffened composite panels
[NASA-CR-194715] p 1832 N94-21814
PLATES (STRUCTURAL MEMBERS)
Three point lead screw positioning apparatus for a cavity tuning plate
[NASA-CASE-LEW-15216-1] p 1822 N94-20375
PLATES (TECTONICS)
Seafloor characterization/Galapagos propagating rift
[AD-A272001] p 1882 N94-20581
Response of the topography and gravity field on Venus to mantle upwelling beneath a chemical boundary layer p 2117 N94-20775
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006
PLATING
Process to fabricate thick coplanar microwave electrode structures
[AD-D015913] p 1748 N94-19892
PLATINUM
Oxidation-reduction induced roughening of platinum (111) surface
[DE93-017408] p 1687 N94-19922
Guanidine based vehicle/binders for use with oxides, metals, and ceramics
[NASA-CASE-LEW-15314-1] p 1700 N94-20195
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1684 N94-21944
Photoelectron holography of platinum (111)
[DE93-040856] p 1810 N94-21950
PLATINUM ALLOYS
Surface science and modeling studies of endothermic fuels catalysis
[AD-A272850] p 1712 N94-21192
Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21762
PLAYAS
Briny lakes on early Mars? Terrestrial intracrater playas and Martian candidates p 2145 N94-21675
PLOTTERS
Post-experimental plots for high speed data acquisition program
[DE94-000956] p 1918 N94-22011
PLOTTING
The IDL astronomy user's library p 2048 N94-22500
PLUGS
Disengagable adapter for an optical fiber connector
[AD-D015959] p 1822 N94-20356
PLUMES
Experimental investigation of nozzle/plume aerodynamics at hypersonic speeds
[NASA-CR-194628] p 1636 N94-20014
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617
Are Plinian type eruptions possible on Venus? p 2123 N94-20803
Iterative electromagnetic Born inversion applied to earth conductivity imaging
[DE93-040668] p 1859 N94-21928
PLUTONIUM
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049
PLUTONIUM 238
Calorimeter measurements of low wattage items
[DE93-018473] p 1807 N94-20115
POINT DEFECTS
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997
POINT SOURCES
Localization from near-source quasi-static electromagnetic fields
[DE93-040390] p 1732 N94-20479
SkICAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546
POINT SPREAD FUNCTIONS
Telescope image modelling software in STSDAS p 1926 N94-22483
Deconvolution of Hubble Space Telescope images using simulated point spread functions p 2048 N94-22497
SPECFOCUS: An IRAF task for focusing spectrographs p 1965 N94-22540
POINTING CONTROL SYSTEMS
Pointing control design for autonomous space vehicle applications
[DE93-019943] p 1657 N94-19863
POISONS
Air transport of samples containing chemical warfare agents
[FFI-93/6005] p 1851 N94-21455
POISSON DENSITY FUNCTIONS
On estimation and testing in Poisson regression models with over-dispersion
[MEMO-1063] p 1963 N94-21078
Trends in software reliability modeling p 1788 N94-22214
POISSON EQUATION
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000853] p 1805 N94-22386
POISSON RATIO
Molecular dynamics modeling of the mechanical behavior of metallic multilayers
[DE93-019947] p 1694 N94-21921
POLAR CAPS
Balloon exploration of the northern plains of Mars near and north of the Viking 2 landing site p 2092 N94-20401
Geology of the southern hemisphere of Triton: No polar cap p 2111 N94-20739
POLAR COORDINATES
Polar processing project
[AD-A271583] p 1739 N94-21235
POLAR REGIONS
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data p 2101 N94-20686
Linear structures on the small inner satellites of Saturn p 2121 N94-20797
POLAR WANDERING (GEOLOGY)
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
POLARIMETERS
Earth observing scanning polarimeter p 1844 N94-21645
The polarization sensitivity of the liquid xenon imaging telescope p 2056 N94-22282
POLARIMETRY
A general rough-surface inversion algorithm: Theory and application to SAR data p 1719 N94-20407
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
Advances in spaceborne radar remote sensing p 1723 N94-20424
Polarimetric backscattering from sea ice p 1723 N94-20426
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Retrieval of ice thickness from polarimetric SAR data p 1724 N94-20432
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434
Polarimetric thermal emission from rough surfaces p 1727 N94-20441
Polarimetric thermal emission from periodic water surfaces p 1728 N94-20445
Symmetry in polarimetric remote sensing p 1729 N94-20449
Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters p 1729 N94-20452
Application of the target decomposition theorem to a polarimetric random media model p 1730 N94-20453
A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454
Application of neural network to remote sensing of soil moisture using theoretical polarimetric backscattering coefficients p 1730 N94-20455
The Brewster angle effect in SAR polarimetry p 1731 N94-20456
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A271911] p 1882 N94-20489
Magellan vertical polarization radar observations p 1744 N94-20691
Earth observing scanning polarimeter p 1844 N94-21645
POLARITONS
Dephasing processes in III-V semiconductors
[AD-A271677] p 2028 N94-21362
POLARITY
Observation of reflected waves on the SABRE positive polarity inductive adder MITL
[DE93-019413] p 1980 N94-20295
Two-polarity magnetization in the Manson impact breccia p 1863 N94-20789
Reverse polarity magnetized melt rocks from the Chicxulub impact structure, Yucatan Peninsula, Mexico p 1863 N94-20843
POLARIZATION (CHARGE SEPARATION)
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924
Charge collectors for the omega upgrade
[DE93-019684] p 1972 N94-20264

POLARIZATION (WAVES)
Fiber optic Michelson sensor and arrays with passive elimination of polarization fading and source feedback isolation
[AD-D015944] p 1984 N94-20065
The polarization sensitivity of the liquid xenon imaging telescope p 2056 N94-22262
POLARIZED ELECTROMAGNETIC RADIATION
Magellan vertical polarization radar observations p 1744 N94-20691
POLARIZED LIGHT
Circular polarizing mirrors for high power lasers
[AD-A267820] p 1815 N94-19965
Photonic electromagnetic field sensor apparatus
[AD-D015938] p 1717 N94-20333
Photonic electromagnetic field sensor apparatus
[AD-D015939] p 1718 N94-20334
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles p 1721 N94-20416
Electron quantum yields from a barium photocathode illuminated with polarized light
[DE93-019232] p 1960 N94-20475
Polarized-light reflection mode p-i-n modulators with GaAs/AlGaAs multiple quantum well active layers: Design and simulation p 2023 N94-20996
Non-destructive evaluation in manufacturing using spectroscopic ellipsometry p 1828 N94-21012
Efficiency of reversible optical storage in azo polymers
[AD-A272923] p 1705 N94-21223
POLARIZED RADIATION
The coherent backscattering opposition effect p 1991 N94-20646
POLARIZERS
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
Miniature color display, phase 4
[AD-A272920] p 1760 N94-21221
POLARONS
Spin-polaron theory of high-(Tc) superconductivity. 1: Spin polarons and high (Tc) pairing
[DE93-019196] p 2014 N94-20002
POLICIES
Use of economic models in Finnish economic policy p 2053 N94-22085
Electronic publishing and intelligent information retrieval p 2047 N94-22479
POLISHING
Variable angle spectroscopic ellipsometric characterization of surface damage in chemical-mechanical polished GaAs p 1710 N94-20986
POLLUTION CONTROL
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885
Alternative refrigerants and refrigeration cycles for domestic refrigerators
[DE93-040481] p 1714 N94-20099
Survey on evaluation of energy technology contributing to preservation of the global environment. 2
[DE94-714884] p 1853 N94-22051
Investigations on trends in global environment adaptive industrial technologies
[DE94-714886] p 1853 N94-22258
POLLUTION MONITORING
Manual of DRANC (release 1.1): A computer program for the Dutch risk assessment of new chemical substances
[PB93-194827] p 1851 N94-19998
The use of lidar for the evaluation of traffic-related urban pollution
[DE94-000704] p 1852 N94-22017
POLLUTION TRANSPORT
Analysis of wind observation from towers in the period 1977-1991
[KNMI-TR-148] p 1865 N94-20239
An economic analysis of transboundary air pollution between Finland and the Soviet Union
[ETLA-DISCUSSION-PAPER-335] p 1854 N94-22072
POLOIDAL FLUX
Neoclassical kinetic theory near an X-point: Plateau regime
[DE93-019825] p 1951 N94-20224
POLYAMIDE RESINS
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526
POLYATOMIC MOLECULES
Ab initio potential energy surface for the H + OCS reaction
[AD-A270577] p 1696 N94-19947
POLYCARBONATES
Techniques for producing free-standing thin films on frames
[DE93-041144] p 1708 N94-21954
POLYCARBOSILANES
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers
[AD-A271128] p 1699 N94-20016
POLYCRYSTALS
Neutral copper cluster sputtering yields: Ne(+), Ar(+) and Xe(+) bombardment
[DE93-019010] p 1690 N94-20288
Temperature-dependent ion beam mixing
[DE93-040281] p 2033 N94-21999
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025
POLYESTERS
Outgassing rate of Reemay Spunbonded Polyester and DuPont Double Aluminized Mylar
[DE93-040015] p 1699 N94-19973
POLYETHYLENES
Polymer gels as precursors to high-performance materials
[AD-A270937] p 1699 N94-20046
Spatial organization of polymer chains in a crystallizable diblock polyethylene and polystyrene
[AD-A271862] p 1702 N94-20463
Development and demonstration of a personal monitoring system for exposure to hydrogen fluoride
[DE93-041273] p 1891 N94-20935
Mechanical properties and reliability of semi-crystalline polymers
[AD-A271591] p 1704 N94-20946
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021
POLYGONS
Fast data parallel polygon rendering
[DE93-040157] p 1929 N94-20279
A model for the origin of Martian polygonal terrain p 2090 N94-20393
A formational model for the polygonal terrains of Mars: Taking a crack at the genesis of the Martian polygons p 2091 N94-20400
Geometric optimization
[DE93-040152] p 1917 N94-21764
An algorithm for the interference detection among polygonal surfaces p 1791 N94-22239
Strategy for motion of a moving body of quasi-polygonal form within a polygonal space p 1792 N94-22240
POLYIMIDE RESINS
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373
POLYIMIDES
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373
Polyimides containing amide and perfluoroisopropylidene connecting groups
[NASA-CASE-LAR-14608-1] p 1702 N94-20374
Simulated space environmental effects on some experimental high performance polymers p 1662 N94-21385
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526
POLYMER CHEMISTRY
The modification of polymer surfaces and the fabrication of submicron-scale functionalized structures by deep-UV and electron beam lithography
[AD-A265956] p 1700 N94-20328
POLYMER MATRIX COMPOSITES
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
Composite materials with improved properties in compression
[AD-A272837] p 1675 N94-21176
Space environmental effects on polymer matrix composites: The UTIAS/LDEF experiment p 1660 N94-21373
Thermal stress analysis of composites in the space environment p 1661 N94-21379
Computational Methods for Failure Analysis and Life Prediction
[NASA-CP-3230] p 1833 N94-22606
Projections on structures and material strength in the computational context p 1834 N94-22610
An overview of computational simulation methods for composite structures failure and life analysis p 1835 N94-22617
POLYMERIC FILMS
Phthalonitrile prepolymer as high temperature sizing material for composite fibers
[AD-D015912] p 1672 N94-20010
Theoretical and experimental study of the winding of a thin plastic film: The role of aerodynamic effects
[ECL-93-04] p 1703 N94-20599
Electrochemical synthesis of ultrathin film composite membranes
[AD-A272721] p 1681 N94-21168
POLYMERIZATION
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers
[AD-A271128] p 1699 N94-20016
Rotational isomers of Mo(VI) alkylidene complexes and Cis/trans polymer structure: Investigations in ring-opening metathesis polymerization
[AD-A272647] p 1704 N94-21184
Polymerization of enantiomerically pure 2,3-dicarboalkoxy norbornadienes and 5,6-disubstituted norbornenes by well-characterized molybdenum ROMP catalysts
[AD-A272649] p 1704 N94-21186
Techniques for producing free-standing thin films on frames
[DE93-041144] p 1708 N94-21954
Photochemical approaches to conversion of light to electricity or fuel
[DE94-001650] p 1849 N94-22048
POLYMERS
Aragatz project samples experiment/MAPOL (polymer materials) experiment: Postflight expert evaluation p 1660 N94-21376
Simulated space environmental effects on some experimental high performance polymers p 1662 N94-21385
Polymeric nitrogen
[DE93-040544] p 1706 N94-21512
Modeling of polymer electrolyte fuel cell systems
[DE93-041187] p 1847 N94-21774
POLYMETHYL METHACRYLATE
Millimeter-wave imaging of composite materials
[DE93-041160] p 1677 N94-21940
POLYMORPHISM
Are types needed for natural language?
[PB93-191831] p 1949 N94-19997
System at the cross-roads of functional and logic programming
[PB93-191823] p 1928 N94-20009
Nominalization, prediction and type containment
[PB93-191799] p 1898 N94-20082
POLYNOMIALS
Affine and non-affine blossoms
[RR-913-M] p 1950 N94-20200
Polynomial interpolation of real functions 1: Interpolation in an interval
[AD-A272330] p 1951 N94-20527
Graph minors: Structure theory and algorithms
[AD-A271851] p 1952 N94-20613
Orthogonal pairs and zeros of Sobolev-type orthogonal polynomials
[REPT-92-46] p 1953 N94-21059
Explicit results on gl(lambda) and sl(lambda)
[MEMO-1075] p 1953 N94-21072
Hilbert 90 for polynomial matrices
[CWI-AM-R9211] p 1954 N94-21159
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164
Computing solutions uniquely collapses the polynomial hierarchy
[TR-467] p 1954 N94-21314
Toward a new method of decoding algebraic codes using Groebner bases
[AD-A273089] p 1959 N94-21524
Operational equations for the five-point rectangle
[DE94-000366] p 1959 N94-21655
A mean field neural network for hierarchical module placement p 1766 N94-21720
The accuracy-through-order and the equivalence properties in the algebraic approximant
[DE93-040188] p 1960 N94-21948
Column reduced rational matrix functions with given null-pole data in the complex plane
[PB93-220531] p 1960 N94-22099
POLYPEPTIDES
Development of bioelastic material for aspects of wound repair
[AD-A267832] p 1673 N94-20208
POLYPROPYLENE
Development and demonstration of a personal monitoring system for exposure to hydrogen fluoride
[DE93-041273] p 1891 N94-20935

POLYSTYRENE
Expanded polystyrene protective barricade full-scale fire exposure test
[AD-A271450] p 1698 N94-19938
Spatial organization of polymer chains in a crystallizable diblock polyethylene and polystyrene
[AD-A271862] p 1702 N94-20463
POLYTOPES
Determining the distance to the perfect matching polytope of a bipartite graph
[RR-895-M] p 1950 N94-20161
POLYURETHANE RESINS
Characterization studies of lower and non-TDI polyurethane encapsulants
[DE93-041129] p 1698 N94-19857
Graphite/polyurethane flexible composites: Mechanical and vibration damping properties
[AD-A271608] p 1674 N94-20950
POMERONS
Parton-parton elastic scattering and rapidity gaps at Tevatron energies
[DE93-041024] p 1974 N94-21515
PONDEROMOTIVE FORCES
On effects of a local plasma density growth due to ponderomotive forces at fast wave launching in tokamaks
[IPPCZ-328] p 1996 N94-21571
POPULATIONS
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458
POROSITY
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers
[DE94-000741] p 1701 N94-20352
Dynamic response of multiphase porous media
[AD-A272915] p 1831 N94-21219
Fabrication of porous ceramics by freeze-casting/freeze-drying
[PB93-202513] p 1705 N94-21425
Symposium on Microscopy and Image Analysis of Building Materials
[VTT-SYMP-136] p 1707 N94-21890
Optical air pore analysis p 1708 N94-21892
Determination of pore structure of concrete from thin sections by image analysis p 1708 N94-21895
Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022
POROUS MATERIALS
Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927
Shock response of porous Al-2 + Fe2O3 powder mixtures
[DE93-018851] p 1688 N94-19944
Silver lined ceramic vessel
[AD-D015917] p 1700 N94-20057
Antipodal fragment velocities for porous and weak targets at catastrophic impacts p 1836 N94-20891
Two-dimensional finite element analysis of porous media at multikilobar stress levels
[AD-A271540] p 1831 N94-20916
Dynamic response of multiphase porous media
[AD-A272915] p 1831 N94-21219
Fabrication of porous ceramics by freeze-casting/freeze-drying
[PB93-202513] p 1705 N94-21425
A note on singularities caused by the hydrodynamic dispersion tensor
[CWI-NM-R9302] p 1803 N94-21575
Local uniform grid refinement and brine transport in porous media with inhomogeneities
[CWI-NM-R9224] p 1803 N94-21609
PORTABLE EQUIPMENT
Downlink acquisition and tracking procedures for the ASCAMP satellite communications terminal
[AD-A272912] p 1739 N94-21244
Physiological efficacy of a lightweight ambient air cooling unit for various applications
[AD-A272952] p 1896 N94-21247
POSITION (LOCATION)
Localization from near-source quasi-static electromagnetic fields
[DE93-040390] p 1732 N94-20479
Optimization of a satellite localization and message sending system
[ETN-93-94448] p 1737 N94-20592
Characterization of the Marquez Dome buried impact crater using gravity and magnetic data
p 1863 N94-20882
POSITION ERRORS
Silicon retina for optical tracking systems
p 1755 N94-21098
A motion extraction method for synthetic aperture radars
[DLR-FB-92-31] p 1742 N94-22279
POSITION SENSING
Rotary encoding device using polygonal mirror with diffraction gratings on each facet
[NASA-CASE-GSC-13543-1] p 1985 N94-20240
Silicon retina for optical tracking systems
p 1755 N94-21098
A 3-D vision method for estimating workspace occupancy of a power-line maintenance robot
p 1770 N94-22105
Sensor integration and data fusion for object localization in robotic workcells p 1774 N94-22130
Charge integrating optical position sensor
p 1778 N94-22152
An approach to the estimation of ground structure and aircraft motion from aerial image sequences
p 1789 N94-22226
Wideband source location in two-dimensional array processing p 1747 N94-22250
Mobile robot perception in unknown and unstructured dynamic voxel environments
[ISBN-0-315-83951-1] p 1947 N94-22591
POSITIONING
The data acquisition system for the Anglo-Australian Observatory 2-degree field project p 2048 N94-22529
POSITIONING DEVICES (MACHINERY)
Counter-balanced, multiple cable construction crane
[NASA-CASE-LAR-14565-1-CU] p 1822 N94-20369
Three point lead screw positioning apparatus for a cavity tuning plate
[NASA-CASE-LEW-15216-1] p 1822 N94-20375
Turntable mechanism
[NASA-CASE-MFS-28522-1] p 1823 N94-20380
POSITIVE IONS
Low emittance 0.8A K(+) ion source for the LBL Induction Linac System Experiment (ILSE)
[DE93-019237] p 1981 N94-21439
POSITRON ANNIHILATION
Positron annihilation study of Sr Doping in La(2-x)Sr(x)CuO4
[DE94-000307] p 2036 N94-22594
POSITRONIUM
Proof of stability of the hydrogen molecule
[PB93-221026] p 1977 N94-22271
POSTFLIGHT ANALYSIS
Conversion of LDEF experiment M0003 sample observation database to MS-DOS formats
[AD-A272945] p 1681 N94-21226
POSTLAUNCH REPORTS
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-51
[NASA-TM-109189] p 1658 N94-21884
POTABLE WATER
Atmospheric moisture collection device
[AD-D015935] p 1865 N94-20332
POTASSIUM
K, U, and Th behavior in Martian environmental conditions p 2141 N94-20908
Low emittance 0.8A K(+) ion source for the LBL Induction Linac System Experiment (ILSE)
[DE93-019237] p 1981 N94-21439
POTENTIAL ENERGY
Ab initio potential energy surface for the H + OCS reaction
[AD-A270577] p 1698 N94-19947
Computed potential energy surfaces for chemical reactions
[NASA-CR-194600] p 1679 N94-20169
POTENTIAL FLOW
Modelling stalled airfoils
[ISBN-0-315-59525-6] p 1639 N94-22382
POWDER (PARTICLES)
Sol-spray preparation, particulate characteristics, and sintering of alumina powders
[DE93-018577] p 1690 N94-20183
Improvement of the stability of the process for synthesizing chemically prepared varistor powder
[DE94-000345] p 1763 N94-21654
Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold
[DE93-041126] p 1694 N94-21937
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives
[DE94-000330] p 1694 N94-21945
Characteristics of shock-compressed configuration of Ti and Si powder mixtures
[DE93-018857] p 1713 N94-22033
POWDERED ALUMINUM
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments
[NASA-TM-106439] p 1713 N94-21760
POWER AMPLIFIERS
Laser amplifier developments at Mercury
[DE93-040103] p 1814 N94-19867
Method for remotely powering a device such as a lunar rover
[NASA-CASE-LAR-14789-1] p 1824 N94-20587
Heterojunction bipolar transistor technology for data acquisition and communication p 1763 N94-21697
POWER CONDITIONING
Power conditioning system modelling for nuclear electric propulsion
[NASA-CR-191136] p 1846 N94-21179
POWER EFFICIENCY
Optical fiber sensor having an active core
[NASA-CASE-LAR-14607-1-SB] p 1986 N94-20586
Mixed voltage VLSI design p 1756 N94-21104
POWER FACTOR CONTROLLERS
Technical manual PCDU MT 254
[FFI-92/7020] p 1751 N94-20553
POWER GAIN
Recent activities in printed Antennas at LeRC
p 1722 N94-20422
POWER PLANTS
Design considerations for a fiber optic communications network for power systems
[DE93-018404] p 1984 N94-20179
POWER SPECTRA
Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570
A motion extraction method for synthetic aperture radars
[DLR-FB-92-31] p 1742 N94-22279
Time variations of x rays from black hole candidates: Canonical time variations in high and low intensity states
p 2009 N94-22690
POWER SUPPLY CIRCUITS
Control and readout of the extraction septum of AmPS
[DIGEL-1993-2] p 1979 N94-20117
POWERED LIFT AIRCRAFT
Survey of lift-fan aerodynamic technology
[NASA-CR-177615] p 1646 N94-21592
PRANDTL NUMBER
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459
PRASEODYMIUM COMPOUNDS
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb)
[DE93-040227] p 2033 N94-21992
PRE-MAIN SEQUENCE STARS
Pre-main sequence stars in the Chamaeleon cloud and pre-main sequence stars in the Rho Ophiuchi cloud core
[NASA-CR-194713] p 2080 N94-20337
The circumstellar environments of intermediate mass main sequence stars
[NASA-CR-189311] p 2055 N94-21498
The formation of massive stars: A 30 Mo case study
[ISBN-0-315-83944-9] p 2081 N94-22593
PREAMPLIFIERS
New preamplifiers for the SEM scanner
[DIGEL-1993-3] p 1979 N94-20118
Bundle profile monitor for AmPS
[DIGEL-1992-8] p 1979 N94-20123
PRECIPITATES
Formation of colloidal Ag precipitates in fused silica by MeV ion implantation
[DE93-040268] p 2012 N94-19869
Microstructural stability of wrought, laser and electron beam glazed NARloy-Z alloy at elevated temperatures
[NASA-TM-108431] p 1689 N94-20100
PRECIPITATION (METEOROLOGY)
Snow cover measurements and areal assessment of precipitation and soil moisture
[WMO-749] p 1841 N94-21068
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
A documentation of icing relevant cloud physical parameters on horizontal soundings of stratiform clouds (continuation)
[DLR-MITT-92-10] p 1871 N94-22280
PRECIPITATION HARDENING
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948
PRECISION
Evaluation of a scanning Hartmann device for single point turning applications
[DE93-019204] p 1821 N94-19891
Calorimeter measurements of low wattage items
[DE93-018473] p 1807 N94-20115
PRECONDITIONING
Butcher-Kuntzmann methods for nonstiff problems on parallel computers
[CWI-NM-R9305] p 1935 N94-21493
PREDICTION ANALYSIS TECHNIQUES
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917

Statistical analysis of a reciprocal translocations data base
[RR-900-I] p 1963 N94-20165
Offshore decision support system: ERS-1 pilot project WAVEWATCH
[BCRS-92-09] p 1865 N94-20532
The flow of gas across the piston-segments-cylinder interface
[ECL-92-40] p 1824 N94-20594
Psychometric developments related to tests and selection
[AD-A272971] p 1894 N94-21262
Columbus PMP Critical Technologies Program: Approach for materials life time prediction p 1664 N94-21402
Survey of lift-fan aerodynamic technology
[NASA-CR-177615] p 1646 N94-21592
Brief summary of the evolution of high-temperature creep-fatigue life prediction models for crack initiation p 1834 N94-22613
Life prediction systems for critical rotating components p 1835 N94-22615
Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618
A high temperature fatigue life prediction computer code based on the total strain version of StrainRange Partitioning (SRP) p 1835 N94-22620

PREDICTIONS
Psychometric developments related to tests and selection
[AD-A272971] p 1894 N94-21262
Mathcad computer applications predicting antenna parameters from antenna physical dimensions and ground characteristics
[AD-A272987] p 1740 N94-21264
Predicting scheduling success p 1932 N94-21334
The program system for the diagnostics of strains and fracture prediction of solids p 1836 N94-22065
NASA Langley developments in response calculations needed for failure and life prediction p 1836 N94-22621

PREDICTOR-CORRECTOR METHODS
Stoermer-Cowell and related methods for the numerical solution of second order periodic initial value problems for ODE's 2: Numerical characteristics of the methods
[MEMO-1082] p 1953 N94-21075
Users manual for the NASA Lewis three-dimensional ice accretion code (LEWICE 3D)
[NASA-TM-105974] p 1642 N94-21590
Extended range modified gradient technique for profile inversion (extended version of report Et/Em-1992-8)
[PB93-215242] p 1742 N94-22346
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386

PRELAUNCH SUMMARIES
Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01
[NASA-TM-109344] p 1653 N94-20192

PREMIXED FLAMES
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111

PREPARATION
Preparation of concrete specimens for microstructural image analysis studies p 1707 N94-21891

PREPOLYMERS
Phthalonitrile prepolymer as high temperature sizing material for composite fibers
[AD-D015912] p 1672 N94-20010

PREPREGS
Phthalonitrile prepolymer as high temperature sizing material for composite fibers
[AD-D015912] p 1672 N94-20010

PREPROCESSING
Segmented operations for sparse matrix computation on vector multiprocessors
[AD-A270601] p 1928 N94-19950
An optically-assisted 3-D cellular array machine
[AD-A272683] p 1987 N94-21163

PRESSURE BREATHING
In-flight measurement of aircrew breathing in Navy aircraft
[AD-A271811] p 1896 N94-21154

PRESSURE BROADENING
The young Sun and photochemistry of the primitive Martian atmosphere p 2145 N94-21679

PRESSURE DEPENDENCE
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987
High oxygen pressure synthesis of new copper oxide superconductors
[DE93-040278] p 2033 N94-21998
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398

PRESSURE DISTRIBUTION
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408
A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591
Modelling stalled airfoils
[ISBN-0-315-59525-6] p 1639 N94-22382

PRESSURE EFFECTS
Electron reactions in nonpolar liquids: Pressure effects
[DE93-040328] p 1970 N94-19931
Lamellar olivine in the Divnoe achondrite: Evidence for high-pressure exsolution? p 1685 N94-20679
Pressure versus drag effects on crater size p 1862 N94-20742
Adhesive bonded joint with improved cyclic fatigue life for alumina-ceramic cylinders and hemispheres: Fourth generation housings
[AD-A273061] p 1831 N94-21310
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398

PRESSURE GRADIENTS
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459

PRESSURE ICE
Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations p 1723 N94-20427

PRESSURE MEASUREMENT
Shock response of porous Al-2 + Fe2O3 powder mixtures
[DE93-018851] p 1668 N94-19944
Description and assessment of a new Optical Pressure Measurement System (OPMS) demonstrated in the high speed wind tunnel in Goettingen (Germany)
[DLR-FB-92-24] p 1651 N94-21280
Measurement Technology for Flight Tests
[ILR-MITT-256(1991)] p 1639 N94-22597
Free flight experiment with a laminar wing glove p 1639 N94-22600
Riblet boundary layer measurements of an A-310 fuselage with Pitot combs p 1640 N94-22605

PRESSURE OSCILLATIONS
Stability curves for a thermoacoustic prime mover
[AD-A272607] p 1968 N94-21422
Shear flow generation by Reynolds stress and suppression of resistive g-modes
[DE93-040911] p 1995 N94-21514

PRESSURE RATIO
Internal performance of a nonaxisymmetric nozzle with a rotating upper flap and a center-pivoted lower flap
[NASA-TP-3385] p 1637 N94-21569

PRESSURE REGULATORS
A novel scheme to handle highly pulsed loads with a standard helium refrigerator
[DE93-019617] p 1799 N94-20263

PRESSURE SENSORS
Description and assessment of a new Optical Pressure Measurement System (OPMS) demonstrated in the high speed wind tunnel in Goettingen (Germany)
[DLR-FB-92-24] p 1651 N94-21280
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391

PRESSURE SUITS
System test results of the Advanced Technology Anti-G Suit (ATAGS)
[AD-A271535] p 1896 N94-20914

PRESSURE VESSELS
Atom probe field ion microscopy characterizations of VVER steels
[DE93-017864] p 1689 N94-20180

PRESSURIZED WATER REACTORS
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4
[DE93-018050] p 1689 N94-20182

PRESTRESSING
Process and apparatus for the release of a prestress initially applied to a mechanism such as a bearing on board a space vehicle
[CA-PATENT-APPL-SN-2,020,90] p 1824 N94-21142

PRETREATMENT
Monocrystalline germanium film on sapphire
[AD-D015925] p 2017 N94-20348

PRINTED CIRCUITS
Solder technology in the manufacturing of electronic products
[DE93-018842] p 1699 N94-19960
A comparative study between shielded and open coplanar waveguide discontinuities p 1733 N94-20501
Computer-Aided Test Equipment Graphics System (CATEGS)
[DE94-000383] p 1915 N94-21561
Process characterization and control of hand-soldered printed wiring assemblies
[DE93-041290] p 1763 N94-21652

PRINTING
Electronic publishing and intelligent information retrieval p 2047 N94-22479

PRISMS
Precision prism coupling setup applied to measure planar silica films on silicon, appendix 9 p 1989 N94-21603

PROBABILITY DENSITY FUNCTIONS
Quantification of uncertainties in the performance of smart composite structures
[NASA-TM-106335] p 1830 N94-20171
Interpolative modeling of GaAs FET S-parameter data bases for use in Monte Carlo simulations p 1767 N94-21723
Evaluation of a nonlinear method for the enhancement of tonal signal detection
[NASA-CR-191562] p 1968 N94-21741

PROBABILITY DISTRIBUTION FUNCTIONS
Current directions in the vulnerability/lethality process structure
[AD-A272836] p 1964 N94-21175
Detailed analysis case studies of trapped plasmas at the Earth's magnetic equator
[AD-A272497] p 1858 N94-21432
Mobile robot perception in unknown and unstructured dynamic voxel environments
[ISBN-0-315-83951-1] p 1947 N94-22591

PROBABILITY THEORY
Some topics in regenerative steady-state simulation
[AD-A271145] p 1902 N94-19855
Worldwide frequency of temperatures at selected altitudes
[AD-A271111] p 1864 N94-19908
SIMBAT theoretical manual
[AD-A271063] p 1882 N94-19979
Multi-disciplinary coupling effects for integrated design of propulsion systems
[NASA-TM-106349] p 1830 N94-20170
Quantification of uncertainties in the performance of smart composite structures
[NASA-TM-106335] p 1830 N94-20171
Electronic neural network for solving traveling salesman and similar global optimization problems
[NASA-CASE-NPO-17807-2-CU] p 1942 N94-20360
Believing in the basis of the evidence
[TR-438] p 2039 N94-20364
The effect of dissipative inhomogeneous medium on the statistics of the wave intensity p 1726 N94-20440
Development and testing of a reliability performance index for modular robotic systems
[AD-A271901] p 1942 N94-20488
The quantum efficiency of HgCdTe photodiodes in relation to the direction of illumination and to their geometry p 1735 N94-20512
Closure properties of stochastic languages
[TR-441] p 1907 N94-20521
Explanation closure, action closure, and the Sandewall test suite for reasoning about change
[TR-440] p 1907 N94-20522
Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570
Probability of detection calculations using MATLAB
[AD-A271958] p 1736 N94-20578
Current directions in the vulnerability/lethality process structure
[AD-A272836] p 1964 N94-21175
Space-efficient deterministic simulation of probabilistic automata
[TR-463] p 1900 N94-21281
Threshold computation and cryptographic security
[TR-461] p 1912 N94-21285
Promises and fault-tolerant database access
[TR-447] p 2043 N94-21287
Computing with Bayesian multi-networks
[AD-A273106] p 1914 N94-21501
A methodology for quantifying uncertainty in models
[DE93-040154] p 1916 N94-21747
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
A simulation model for probabilistic analysis of Space Shuttle abort modes
[NASA-TM-108432] p 1656 N94-21859

PROBES
Numerical modeling of fringing fields and their use for complex permittivity measurements at high frequencies
[AD-A270478] p 1966 N94-19917

PROBLEM SOLVING
Electronic neural network for solving traveling salesman and similar global optimization problems
[NASA-CASE-NPO-17807-2-CU] p 1942 N94-20360
Neural network studies
[AD-A271593] p 1943 N94-20947
An NP set with no co-DP sparse subset
[TR-475] p 1954 N94-21199
The combinatorial algorithms for large scale discrete optimization problems p 1923 N94-22079
On the discovery of approximate arithmetic relations by backpropagation networks p 1782 N94-22181
PROCEDURES
Air transport of samples containing chemical warfare agents
[FFI-93/6005] p 1851 N94-21455
PROCESS CONTROL (INDUSTRY)
Process characterization and control of hand-soldered printed wiring assemblies
[DE93-041290] p 1763 N94-21652
Improvement of the stability of the process for synthesizing chemically prepared varistor powder
[DE94-000345] p 1763 N94-21654
Application of the structures query language of APROS for specification of industrial processes p 1923 N94-22078
PROCUREMENT
Audit report. Navy's aircraft structural life surveillance program data recorders
[AD-A270391] p 1645 N94-20040
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20468
NASA procurement report, FY 1993
[NASA-TM-109393] p 2040 N94-21625
PROCUREMENT MANAGEMENT
Activities of National Inst. for Aviation Research
[NIAR-93-16] p 2151 N94-20150
NASA procurement: Planning for pilot test of new procurement procedures is adequate. Report to the Chairman, Committee on Governmental Affairs, US Senate
[GAO/NSIAD-94-67] p 2039 N94-20236
Implementing Electronic Data Interchange (EDI) with small business suppliers in the pre-award acquisition process
[AD-A271767] p 1945 N94-21305
Operational test and evaluation of electronic combat systems
[AD-A273093] p 1647 N94-21500
NASA procurement report, FY 1992
[NASA-TM-109390] p 2040 N94-21623
Summary data on all NASA procurement actions
[NASA-TM-109392] p 2040 N94-21638
PRODUCT DEVELOPMENT
Activities Report of the Institute of Applied Physics
[ETN-93-93749] p 1966 N94-21798
Electronic locking system p 1796 N94-21801
PRODUCTION COSTS
A novel VLSI processor architecture for supercomputing arrays p 1758 N94-21115
Self assembly: An approach to terascale integration
[DE93-040104] p 1769 N94-21846
An assessment of the cost of microwave sintering ceramic tiles for armor applications
[DE94-000978] p 1693 N94-21850
Investigation on construction of the database system for research and development of the global environment industry technology
[DE94-714890] p 1853 N94-22090
PRODUCTION ENGINEERING
Feature-based tolerancing for intelligent inspection process definition
[DE93-017984] p 1906 N94-20311
Modeling of glass fabrication p 1711 N94-21800
Microdynamic model of reproduction: Taxation and currency issue as regulators of economy p 2053 N94-22084
PROGRAM VERIFICATION (COMPUTERS)
Model checking, abstraction, and compositional verification
[AD-A270552] p 1902 N94-19919
Set based analysis of ML programs
[AD-A270597] p 1902 N94-19948
A methodology for formal hardware verification, with application to microprocessors
[AD-A270550] p 1898 N94-20085
PREVAIL-DM: A framework-based environment for formal hardware verification
[RR-899] p 1905 N94-20164
Test and evaluation: DOD has been slow in improving testing of software-intensive systems
[AD-A271541] p 1908 N94-20917
An assessment of the statistical and editorial output of text analysis programs
[AD-A272185] p 2042 N94-20924
Synthesis algorithm of VLSI multipliers for ASIC p 1758 N94-21116
Automated synthesis and verification of configurable DRAM blocks for ASIC's p 1759 N94-21123
The readiness growth model: A quantitative analysis of software risk
[AD-A272383] p 1910 N94-21144
Two visually meaningful correlation measures for comparing calculated and measured response histories
[AD-A273044] p 1964 N94-21322
MAYGEN: A symbolic debugger generation system
[AD-A272512] p 1913 N94-21413
Tests of logic spaces: A new strategy for certifying the accuracy of programs p 1772 N94-22116
Modeling software systems for data flow testing p 1772 N94-22117
Formal methods in the design of critical software systems p 1779 N94-22158
SPPTOOLS: Programming tools for the IRAF SPP language p 1925 N94-22474
Verification of the PROS timing analysis package p 1926 N94-22508
PROGRAMMERS
Security evaluation of Unix networks
[AD-A273076] p 1945 N94-21520
SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486
PROGRAMMING (SCHEDULING)
Scheduling for locality in shared-memory multiprocessors
[AD-A272948] p 1930 N94-21228
PROGRAMMING ENVIRONMENTS
A proposed research program in information processing
[NASA-CR-194271] p 2041 N94-20134
Advanced software development workstation: Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
[NASA-CR-193643] p 1930 N94-21065
An investigation into the state of the practice of CASE tool integration
[AD-A272441] p 1912 N94-21205
The transition to massively parallel computing within a production environment at a DOE access center
[DE93-019155] p 1936 N94-21828
Development of the FITS tools package for multiple software environments p 1927 N94-22516
IRAF in the nineties p 2048 N94-22535
PROGRAMMING LANGUAGES
A comparison of data-parallel algorithms for connected components
[AD-A270551] p 1902 N94-19918
Implementation of a portable nested data-parallel language
[AD-A270524] p 1902 N94-19932
Set based analysis of ML programs
[AD-A270597] p 1902 N94-19948
Programming logic for F omega
[PB93-191781] p 1928 N94-19996
Nominalization, prediction and type containment
[PB93-191799] p 1898 N94-20082
Closure properties of stochastic languages
[TR-441] p 1907 N94-20521
GWB: Manual for the Grammar WorkBench version 1.5
[TR-92-14] p 1909 N94-21061
A simplified token bus protocol specified using LOTOS
[TR-92-15] p 1910 N94-21062
Advanced software development workstation: Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
[NASA-CR-193643] p 1930 N94-21065
MINIFOLD: A kernel for a MANIFOLD-like coordination language
[CWI-CS-R9252] p 1915 N94-21534
Changing preferences
[CWI-CS-R9310] p 1915 N94-21551
SPPTOOLS: Programming tools for the IRAF SPP language p 1925 N94-22474
The IDL astronomy user's library p 2048 N94-22500
DECONV-TOOL: An IDL based deconvolution software package p 1927 N94-22542
Parallel functional programming in SISAL: Fictions, facts, and future
[DE93-040486] p 1937 N94-22558
PROJECT MANAGEMENT
Networks Technology Conference
[NASA-CP-3241] p 1931 N94-21323
The NCC project: A quality management perspective p 1828 N94-21324
Let your fingers do the walking: The projects most invaluable tool p 1922 N94-21325
NCCDS configuration management process improvement p 1931 N94-21327
The automated ground network system p 1932 N94-21330
Issues in NASA program and project management. Special Report: 1993 conference
[NASA-SP-6101(07)] p 2039 N94-21497
Issues in NASA program and project management
[NASA-SP-6101(06)] p 2040 N94-21499
Factors associated with continuance commitment to FAA matrix teams
[DOT/FAA/AM-93/18] p 2040 N94-21626
PROJECTILE CRATERING
The Manson impact crater: Estimation of the energy of formation, possible size of the impacting asteroid or comet, and ejecta volume and mass p 2083 N94-20721
Pressure versus drag effects on crater size p 1862 N94-20742
Impactor control of central peak and peak-ring formation p 1862 N94-20744
Delimitation of terrestrial impact craters by way of pseudotachylytic rock distribution p 1863 N94-20783
Parabolic features and the erosion rate on Venus p 2122 N94-20801
Triton's cratering record and its time of capture p 2122 N94-20802
Hypervelocity impact
[AD-A272957] p 1831 N94-21249
PROJECTILES
Absolute total and one and two electron transfer cross sections for Ar(8+) on Ar as a function of energy
[DE93-040283] p 1970 N94-19870
Numerical modeling of impact erosion of atmospheres: Preliminary results p 2131 N94-20847
Geometrical analysis of the microcraters found on LDEF samples p 1666 N94-20890
Antipodal fragment velocities for porous and weak targets at catastrophic impacts p 1836 N94-20891
Multisensor pinhole yawsonde
[AD-A271715] p 1808 N94-20930
PROJECTION
On geometric and algebraic aspects of 3D affine and projective structures from perspective 2D views
[AD-A270520] p 1983 N94-19968
PROJECTIVE GEOMETRY
On geometric and algebraic aspects of 3D affine and projective structures from perspective 2D views
[AD-A270520] p 1983 N94-19968
PROJECTORS
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1651 N94-20108
PROLATE SPHEROIDS
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles p 1721 N94-20416
PROLOG (PROGRAMMING LANGUAGE)
Proving run-time properties of general programs w.r.t. constructive negation
[CWI-CS-R9245] p 1909 N94-21025
A declarative approach for first-order built-in's of PROLOG
[CWI-CS-R9246] p 1909 N94-21026
PROPAGATION VELOCITY
A Kirchhoff approach to seismic modeling and prestack depth migration
[AD-A271010] p 1854 N94-19820
PROPELLANT CHEMISTRY
A proposed methodology for combustion toxicology testing of combined halon replacement agent/jet fuel interaction
[AD-A272695] p 1681 N94-21165
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
PROPELLANT COMBUSTION
Investigation of flame driving and flow turning in axial solid rocket instabilities
[AD-A271066] p 1667 N94-20015
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
Electronically metastable molecules of high symmetry
[AD-A272015] p 1974 N94-21461
PROPELLANTS
Electronically metastable molecules of high symmetry
[AD-A272015] p 1974 N94-21461
PROPIONIC ACID
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947
PROPORTIONAL CONTROL
Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188
PROPORTIONAL COUNTERS
The laser and its applications on environment and biotechnology research
[DE94-000376] p 1820 N94-21957
VETA x ray data acquisition and control system p 2047 N94-22455

SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486
An x ray archive on your desk: The Einstein CD-ROM's p 2048 N94-22519
PROPORTIONAL LIMIT
Crystal orientation dependence of elastic precursor strength in pentaerythritol tetranitrate [DE93-018340] p 2034 N94-22035
PROPULSION
Multi-disciplinary coupling effects for integrated design of propulsion systems [NASA-TM-106349] p 1830 N94-20170
Modeling of polymer electrolyte fuel cell systems [DE93-041187] p 1847 N94-21774
PROPULSION SYSTEM CONFIGURATIONS
Initiation and modification of reaction by energy addition: Kinetic and transport phenomena [AD-A271315] p 1797 N94-19936
Thrust expansion engine [AD-D015896] p 1669 N94-20121
Entry velocities at Mars and Earth for short transit times [AD-A272591] p 1665 N94-21420
Thrust augmentation options for the Beta 2 two-stage-to-orbit vehicle [NASA-TM-106448] p 1648 N94-21563
Modeling of polymer electrolyte fuel cell systems [DE93-041187] p 1847 N94-21774
Navy GTE seal development activity p 1655 N94-21794
Specialized data analysis for the Space Shuttle Main Engine and diagnostic evaluation of advanced propulsion system components [NASA-CR-194720] p 1656 N94-21813
Brayton power conversion system parametric design modelling for nuclear electric propulsion [NASA-CR-191135] p 1671 N94-21874
On the estimation algorithm used in adaptive performance optimization of turbofan engines [NASA-TM-4551] p 1649 N94-21879
Grid generation requirements at Marshall Space Flight Center p 1919 N94-22354
PROPULSION SYSTEM PERFORMANCE
Initiation and modification of reaction by energy addition: Kinetic and transport phenomena [AD-A271315] p 1797 N94-19936
Multi-disciplinary coupling effects for integrated design of propulsion systems [NASA-TM-106349] p 1830 N94-20170
Formulation of a next-generation interior ballistic code [AD-A271539] p 1801 N94-20915
Entry velocities at Mars and Earth for short transit times [AD-A272591] p 1665 N94-21420
Options for thrust augmentation for the Beta 2 two-stage-to-orbit launch vehicle [NASA-TM-106418] p 1649 N94-21759
Modeling of polymer electrolyte fuel cell systems [DE93-041187] p 1847 N94-21774
Navy GTE seal development activity p 1655 N94-21794
Specialized data analysis for the Space Shuttle Main Engine and diagnostic evaluation of advanced propulsion system components [NASA-CR-194720] p 1656 N94-21813
Brayton power conversion system parametric design modelling for nuclear electric propulsion [NASA-CR-191135] p 1671 N94-21874
On the estimation algorithm used in adaptive performance optimization of turbofan engines [NASA-TM-4551] p 1649 N94-21879
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies [DE93-041130] p 1826 N94-21938
PROPULSIVE EFFICIENCY
Thrust augmentation options for the Beta 2 two-stage-to-orbit vehicle [NASA-TM-106448] p 1648 N94-21563
PROSTHETIC DEVICES
Automatic locking orthotic knee device [NASA-CASE-MFS-28633-1] p 1896 N94-20493
PROTEASE
Enhancement of wound healing by biosynthetic growth factor [AD-A272517] p 1892 N94-21415
PROTECTIVE CLOTHING
Cold-start minidiesel engine development [AD-A271064] p 1823 N94-20567
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 383) [NASA-SP-7011(383)] p 1892 N94-21288
PROTECTIVE COATINGS
Thin-film hermeticity: A quantitative analysis of diamondlike carbon using variable angle spectroscopic ellipsometry p 1710 N94-20981
Oxidation resistant protective coating system for gas turbine components and process for penetration thereof [CA-PATENT-1,294,155] p 1704 N94-21143
Fifth International Symposium on Materials in a Space Environment [ISBN-2-85-428293-0] p 1659 N94-21367
Aragatz project samples experiment/MAPOL (polymer materials) experiment: Postflight expert evaluation p 1660 N94-21376
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377
Evaluation of plasma-deposited protective coatings for spacecraft applications p 1663 N94-21394
Forecasting technique of variations of the optical absorptivity of thermal control coatings under different simultaneous radiations p 1664 N94-21399
Thermal control coatings p 1664 N94-21400
Study of space factors effect on materials for spacecraft external surfaces in NPO Energia programs p 1664 N94-21401
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride [DE93-041307] p 1706 N94-21516
Performance of carbon-based hot frit substrates [DE94-000509] p 1676 N94-21754
Surface modification for corrosion resistance [DE93-017419] p 1693 N94-21825
Surface modification of Ti3Al for improved oxidation resistance [DE93-018297] p 1696 N94-22034
PROTEIN CRYSTAL GROWTH
Method for controlling protein crystallization [NASA-CASE-MFS-28688-1] p 2017 N94-20528
PROTEIN SYNTHESIS
A complex systems approach to computational molecular biology [DE93-040062] p 1884 N94-19866
PROTEINS
High resolution electron crystallography of protein molecules [DE93-040114] p 1884 N94-19826
Quinoa: An emerging new crop with potential for CELSS [NASA-TP-3422] p 1895 N94-20137
PROTOCOL (COMPUTERS)
TCP performance analysis for wide area networks [DE94-000449] p 1928 N94-19858
Robust, high-speed network design for large-scale multiprocessing [AD-A271003] p 1716 N94-19977
Total order assumption [PB93-191740] p 1903 N94-19993
Design considerations for a fiber optic communications network for power systems [DE93-018404] p 1984 N94-20179
Distributed Virtual System (DIVIRS) project [NASA-CR-194360] p 1905 N94-20228
Understanding Open Systems Interconnection (OSI) [AD-A271877] p 1929 N94-20472
Standard ML signatures for a protocol stack [AD-A272060] p 1908 N94-20622
A semi-Markov model of a home network access protocol [MEMO-INF-92-71] p 1909 N94-21045
A simplified token bus protocol specified using LOTOS [TR-92-15] p 1910 N94-21062
Government Open Systems Interconnection Profile (GOSIP) transition strategy [AD-A273005] p 1740 N94-21308
Using manufacturing message specification for monitor and control at Venus p 1932 N94-21333
Distributed intelligent control and status networking p 1932 N94-21335
A packet switched communications system for GRO p 1744 N94-21345
A lower bound on wait-free counting [CWI-CS-R9307] p 1915 N94-21537
Uniform self-stabilizing leader election. Part 1: Complete graph protocols [CWI-CS-R9308-PT-1] p 1935 N94-21549
A mechanized process algebra for verification of device synchronization protocols p 1766 N94-21716
Performance evaluation of video on ethernet [DE93-040696] p 1936 N94-21749
IAS telecommunication infrastructure and value added network services provided by IASNET p 1744 N94-22069
The conformance testing methodology to CTRON (communication and central TRON) extended OS p 1772 N94-22118
CREIR: A multiaccess protocol for on-board processing satellite systems p 1780 N94-22168
Throughput, blocking, and interference in packet radio networks p 1746 N94-22190
Specification and formal verification of the safety criterion in the alternating bit protocol p 1784 N94-22193
Modeling and analysis of secure communication protocols using Petri net formalism p 1784 N94-22194
File transfer performance in LAN interconnection through a satellite channel p 1746 N94-22209
Everything you might want to know about the Internet but are afraid to ask! [DE93-041118] p 2046 N94-22413
A structured data transfer protocol p 2047 N94-22450
The HEASARC graphical user interface p 1926 N94-22487
A generic archive protocol and an implementation p 2047 N94-22493
The Keck Task Library (KTL) p 2048 N94-22504
PROTON BEAMS
A high-intensity He-jet production source for radioactive beams [DE93-040247] p 1981 N94-21767
PROTON IRRADIATION
On modelling nuclear reactions in meteorites p 2085 N94-20844
Proton radiation testing of an 18 bit A/D converter p 1755 N94-21096
PROTONS
A study of events with the highest total transverse energy in CDF [DE93-019904] p 1978 N94-19972
The cross section for the production of b(bar-b) pairs in p(bar p) collisions at the square root of s equals 1.8 TeV [DE93-019900] p 1972 N94-20225
STRV RADMON: An integrated high-energy particle detector p 1666 N94-21086
SLAC measurement of the neutron spin structure function [DE93-040998] p 1975 N94-21788
Toward a QCD analysis of jet rates in deep-inelastic Muon-Proton scattering [DE94-000618] p 1976 N94-21962
PROTOPLANETS
Diffusive redistribution of water vapor in the solar nebula revisited p 2113 N94-20751
FE-60 and the evolution of eucrites p 2083 N94-20768
Volatile loss from accreting icy protoplanets p 2084 N94-20793
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB) [CONTRIB-5241(804)] p 2084 N94-20795
Triton's cratering record and its time of capture p 2122 N94-20802
Recondensation in the early solar system: Physical conditions and source material p 2085 N94-20849
PROTOSTARS
Helical kink instability of jets from young stellar objects p 2008 N94-22686
PROVING
Stochastic optimization by simulation: Convergence proofs for the G1/G/1 queue in steady-state [AD-A271141] p 1962 N94-19999
Formal hardware verification in Maple p 1771 N94-22112
Formal verification of an ALU p 1772 N94-22114
Tests of logic spaces: A new strategy for certifying the accuracy of programs p 1772 N94-22116
Modeling software systems for data flow testing p 1772 N94-22117
The conformance testing methodology to CTRON (communication and central TRON) extended OS p 1772 N94-22118
Satellite validation of GCM-simulated annual cycle of the Earth radiation budget and cloud forcing p 1860 N94-22287
Use of satellite data for validation of operational forecast models and operational analyses p 1861 N94-22291
PSYCHOLINGUISTICS
Modeling the human mental lexicon with self-organizing feature maps p 1743 N94-20244
An exploration of clause boundary effects in SRN representations p 1937 N94-20253
PSYCHOLOGICAL EFFECTS
Incongruity, incongruity resolution, and mental states: The measure and modification of situational awareness and control [NASA-CR-194568] p 1893 N94-20168
PSYCHOLOGICAL FACTORS
Incongruity, incongruity resolution, and mental states: The measure and modification of situational awareness and control [NASA-CR-194568] p 1893 N94-20168

PSYCHOLOGICAL TESTS
A description of psychological type at the Defense Systems Management College, 1993 edition
[AD-A271612] p 1894 N94-21237
Psychometric developments related to tests and selection
[AD-A272971] p 1894 N94-21262
Extracting information from wrong answers in computerized adaptive testing
[AD-A272832] p 1894 N94-21434
PSYCHOMETRICS
Development of the UTC-PAB normative database
[AD-A271319] p 1893 N94-20023
A description of psychological type at the Defense Systems Management College, 1993 edition
[AD-A271612] p 1894 N94-21237
Psychometric developments related to tests and selection
[AD-A272971] p 1894 N94-21262
Extracting information from wrong answers in computerized adaptive testing
[AD-A272832] p 1894 N94-21434
PSYCHOMOTOR PERFORMANCE
Development of the UTC-PAB normative database
[AD-A271319] p 1893 N94-20023
PUBLIC HEALTH
Health effects of global warming: Problems in assessment
[DE93-040323] p 1850 N94-19930
PULSAR MAGNETOSPHERES
Particle acceleration on the Alfven surface of a plasma ejecting axisymmetric rotator p 2008 N94-22681
PULSARS
High-energy astrophysics: A theoretical analysis of thermal radiation from neutron stars
[NASA-CR-194808] p 2055 N94-20952
Verification of the PROS timing analysis package p 1926 N94-22508
Gamma ray burst as a result of the explosive instability in the magnetosphere of old neutron star p 2007 N94-22675
Structure of accretion plasmas of x ray binary pulsars in MHD turbulence p 2007 N94-22679
VHE gamma ray generation by radio pulsars p 2007 N94-22680
PULSE CODE MODULATION
An adaptive, lossless data compression algorithm and VLSI implementations p 1753 N94-21080
Image detection using edge extraction algorithms
[AD-A272439] p 1911 N94-21203
PULSE COMMUNICATION
Nonlinear acoustics: Periodic waveguide, finite-amplitude propagation in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A270530] p 1967 N94-19894
PULSE COMPRESSION
Applications of correlator chips in radio science p 1763 N94-21695
PULSE DOPPLER RADAR
Description and availability of airborne Doppler radar data p 1722 N94-20419
CFAR processing for airborne pulse-Doppler radars p 1745 N94-22142
Space-based radar for moving target detection p 1745 N94-22143
PULSE DURATION
Effects of stimulated Raman scattering on light beam properties during high-power laser beam long-path propagation
[AD-A273109] p 1818 N94-21509
PULSE GENERATORS
Characterization of electromagnetic fields in an extended chamber at the Short Pulse Experimental Electron Device (SPEED) simulator
[AD-A265955] p 1717 N94-20329
Compact lightweight CO2 laser for SDIO application
[AD-A273010] p 1817 N94-21284
Results from long conduction time plasma opening switch experiments at Sandia National Laboratories
[DE93-019063] p 1762 N94-21632
Ultrafast gas switching experiments
[DE93-019071] p 1762 N94-21634
A FET-switched induction accelerator cell
[DE93-019604] p 1769 N94-21838
PULSE RADAR
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Real-time step frequency radar
[ISBN-0-315-83588-5] p 1743 N94-22576
PULSED LASER DEPOSITION
Particles on surfaces of laser ablated Y1Ba2Cu3O(7-delta) films
[DE93-040269] p 2013 N94-19929
PULSED LASERS
PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943
Applications and source development for high-repetition rate x ray lasers
[DE93-019547] p 1815 N94-20259
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462
Low-altitude cross-wind velocity measurements using pulsed visible fringe-type laser anemometry
[ISL-CO-216/92] p 1866 N94-20557
A theory for optical wavelength control in short pulse free electron laser oscillators
[AD-A271706] p 1817 N94-21353
Simulations of spectral broadening by cross-phase modulation (XPM) with chaotic light pulses
[DE93-019623] p 1819 N94-21872
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958
PULSED RADIATION
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439
PURIFICATION
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982
PYRAMIDS
A pyramid neural network architecture for stereo fusion p 1785 N94-22201
PYRENES
Synthesis and catalytic properties of metal and semiconductor nanoclusters
[DE93-019418] p 2028 N94-21541
PYRIDINES
Dynamics of adsorbed, swollen block copolymers
[AD-A272013] p 1706 N94-21460
PYRITES
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
PYROELECTRICITY
Proceedings of the 8th International Symposium on Applications of Ferroelectrics
[AD-A270679] p 1749 N94-20012
PYROLYSIS
Direct aromatization of methane
[DE93-040631] p 1678 N94-19890
Are the C delta light nitrogen and noble gases located in the same carrier? p 2085 N94-20846
High temperature size selective membranes
[DE93-019865] p 1709 N94-21982
Mass spectrometer-pyrolysis experiment for atmospheric and soil sample analysis on the surface of Mars p 1812 N94-22435
PYROLYTIC GRAPHITE
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG)
[DE93-040546] p 1709 N94-21970
PYROXENES
Petrogenesis of Apollo 12 mare basalts. Part 1: Multiple melts and fractional crystallization to explain olivine and ilmenite basalt compositions p 1684 N94-20644
Petrogenesis of Apollo 12 mare basalts. Part 2: An open system model to explain the pigeonite basalt compositions p 1684 N94-20645
Orthopyroxenes as recorders of diogenite petrogenesis: Major and minor element systematics p 1684 N94-20670
Post-igneous redistribution of components in eucrites p 1685 N94-20684
Primary differentiation in the early Earth: Nd and Sr isotopic evidence from diamondiferous eclogites for both old depleted and old enriched mantle, Yakutia, Siberia p 1862 N94-20776
The U-Th-Pb, Sm-Nd, and Ar-Ar isotopic systematics of lunar meteorite Yamato-793169 p 2084 N94-20834
Rare Earth elements in individual minerals in Shergottites p 1686 N94-20852
Diffuse reflectance spectra of orthopyroxene, olivine, and plagioclase as a function of composition and structure p 2087 N94-20906

Q

Q SWITCHED LASERS
Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262
QUADRANTS
Some practicable applications of quadtree data structures/representation in astronomy p 1927 N94-22515
QUADRATURE AMPLITUDE MODULATION
Coded 64QAM using a binary convolutional code p 1747 N94-22223
QUADRATURE PHASE SHIFT KEYING
Advanced coding and modulation schemes for TDRSS p 1744 N94-21350
The influence of lowpass filtering and the effects of fading on the group demodulation of QPSK signals p 1746 N94-22170
Quadrature biorthogonal modulation p 1747 N94-22232
QUADRATURES
Use of switched capacitor filters to implement the discrete wavelet transform p 1755 N94-21097
QUADRUPOLES
Space-charge dominated beam transport in magnetic quadrupoles with large aperture ratios
[DE93-040443] p 1992 N94-20004
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289
Study of possible energy upgrade for the ALS and modeling of the real lattice for the diagnosis of lattice problems
[DE93-040286] p 2016 N94-20323
Simulation studies of space-charge-dominated beam transport in large aperture ratio quadrupoles
[DE93-019238] p 1961 N94-21440
QUALIFICATIONS
Qualifying codes under software quality assurance: Two examples as guidelines for codes that are existing or under development
[DE93-040452] p 1904 N94-20097
QUALITY CONTROL
Qualifying codes under software quality assurance: Two examples as guidelines for codes that are existing or under development
[DE93-040452] p 1904 N94-20097
Using electronic data interchange to report product quality
[AD-A271843] p 1828 N94-20488
Correct CMOS IC defect models for quality testing p 1755 N94-21093
Software metrics: The key to quality software on the NCC project p 1922 N94-21326
Factors associated with continuance commitment to FAA matrix teams
[DOT/FAA/AM-93/18] p 2040 N94-21626
Process characterization and control of hand-soldered printed wiring assemblies
[DE93-041290] p 1763 N94-21652
Information and decision structure in a Japanese type of management with respect to QCC and just-in-time systems p 2045 N94-22063
Formal methods in the design of critical software systems p 1779 N94-22158
A robust quality control system for GPS navigation and kinematic positioning
[ISBN-0-315-83148-0] p 1644 N94-22427
Quality control of EUVE databases p 2047 N94-22490
SIMBAD quality-control p 2048 N94-22502
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549
QUANTITATIVE ANALYSIS
Quantitative evaluation of material composition of composites using x ray energy-dispersive NDE technique
[DE93-041157] p 1672 N94-19888
Thin-film hermeticity: A quantitative analysis of diamondlike carbon using variable angle spectroscopic ellipsometry p 1710 N94-20981
Temperature dependence of optical properties of AlAs, studied by in-situ spectroscopic ellipsometry p 2023 N94-20999
The readiness growth model: A quantitative analysis of software risk
[AD-A272383] p 1910 N94-21144
Quantitative analysis of scanning tunneling microscopy images for surface structure determination: Sulfur on Re(0001)
[DE93-019235] p 2034 N94-22041
QUANTUM CHEMISTRY
Ab initio potential energy surface for the H + OCS reaction
[AD-A270577] p 1698 N94-19947
QUANTUM CHROMODYNAMICS
A study of events with the highest total transverse energy in CDF
[DE93-019904] p 1978 N94-19972
The two-jet differential cross-section at CDF
[DE93-019905] p 1978 N94-19983
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
The cross section for the production of b(bar-b) pairs in p(bar p) collisions at the square root of s equals 1.8 TeV
[DE93-019900] p 1972 N94-20225

Theoretical particle physics
[DE94-000538] p 1973 N94-20938
Qualitative and quantitative aspects of the QCD theory of elastic form factors
[DE93-040864] p 2036 N94-21513
Hadronic molecules and scattering amplitudes from the nonrelativistic quark model
[DE94-000377] p 1974 N94-21657
Measurement of the inclusive jet cross section in p(bar-p) collisions at CDF
[DE94-000581] p 1982 N94-21866
New perspectives in quantum chromodynamics
[DE93-041021] p 2038 N94-21935
Toward a QCD analysis of jet rates in deep-inelastic Muon-Proton scattering
[DE94-000618] p 1976 N94-21962

QUANTUM EFFICIENCY
Cal and some new photocathodes
[DE93-019387] p 1750 N94-20314
The quantum efficiency of HgCdTe photodiodes in relation to the direction of illumination and to their geometry p 1735 N94-20512
Stable, high-efficiency amorphous-silicon solar cells with low hydrogen content
[DE93-015214] p 1848 N94-21826

QUANTUM ELECTRODYNAMICS
Dynamics of vortices in superconductors
[DE93-019535] p 2011 N94-19808

QUANTUM ELECTRONICS
Optical and transport properties of metallic and semiconductor nanostructures
[AD-A271716] p 2018 N94-20554
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A272955] p 2027 N94-21248

QUANTUM MECHANICS
On the theory of morphology-dependent resonances: Shape resonances, width formulas, and graphical representations
[AD-A272279] p 2037 N94-20945
A formulation of quantum statistical mechanics based on the Feynman path centroid density 2 dynamical properties
[AD-A272698] p 2037 N94-21166
A formulation of quantum statistical mechanics based on the Feynman path centroid density 1: Equilibrium properties
[AD-A272809] p 2037 N94-21171
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A272955] p 2027 N94-21248
The quantum structure of matter grand challenge project: Large-scale 3-D solutions in relativistic quantum dynamics
[DE94-000328] p 1960 N94-21955
On the correspondence limit of relativistic quantum mechanics
[DE93-040939] p 2038 N94-21971
Restoring locality with faster-than-light velocities
[DE93-040926] p 2038 N94-22010
Proof of stability of the hydrogen molecule
[PB93-221026] p 1977 N94-22271

QUANTUM OPTICS
A microscopic theory of quantum optics and new photon-locked bistable states
[AD-A271250] p 1983 N94-19901

QUANTUM THEORY
F-spin concept and g-bosons in the interceding boson model
[ETN-93-93607] p 1973 N94-21136
A formulation of quantum statistical mechanics based on the Feynman path centroid density 2 dynamical properties
[AD-A272698] p 2037 N94-21166
Restoring locality with faster-than-light velocities
[DE93-040926] p 2038 N94-22010
Non commutative geometry and physics
[PB93-215499] p 1961 N94-22264

QUANTUM WELL LASERS
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
The n-p(p(+))-n Al(yGa)(1-y) As-GaAs-In(x)Ga(1-x) as quantum well laser with p(+)-n(+)GaAs-InGaAs tunnel contact on n GaAs
[AD-A271292] p 2030 N94-21805

QUANTUM WELLS
Investigation of quantum effects in heterostructures
[AD-A270938] p 2011 N94-19817
Theory of energy-assisted epitaxy: theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835
Common Themes and Mechanisms of Epitaxial Growth, volume 312 — Materials Research Society symposium proceedings
[AD-A270513] p 2013 N94-19967
Center for the integration of optical computing
[AD-A271874] p 1899 N94-20469
An x-band peeled HEMT amplifier
p 1732 N94-20498
Optical and transport properties of metallic and semiconductor nanostructures
[AD-A271716] p 2018 N94-20554
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
Materials, Structures, and Devices for High-Speed Electronics
[NASA-CR-193177] p 2019 N94-20971
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry
p 2022 N94-20992
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
Characterization of an asymmetric triangular multiple quantum well, by variable angle spectroscopic ellipsometry p 2022 N94-20995
Polarized-light reflection mode p-i-n modulators with GaAs/AlGaAs multiple quantum well active layers: Design and simulation p 2023 N94-20996
Optical amplification and threshold behavior on InGaAs/InGaAsP multiquantum well structures
[ETN-93-94181] p 2026 N94-21151
Syntheais and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229

QUARK MODELS
Hadronic molecules and scattering amplitudes from the nonrelativistic quark model
[DE94-000377] p 1974 N94-21657
A relativistic constituent quark model
[DE93-041085] p 1946 N94-21689

QUARKS
Top search at the TEVATRON
[DE93-019392] p 1978 N94-19988
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
Measurement of the strange quark distribution function in W(+) charm quark events
[DE93-018267] p 1973 N94-20474
Theoretical particle physics
[DE94-000538] p 1973 N94-20938
Recent results on top, bottom and exotic physics at the Tevatron
[DE94-000578] p 1975 N94-21786
Measurement of the B meson and b quark cross-section in (-p)p collisions at the square root of s = 1.8 TeV using the exclusive decays B(+) and B(exp 0) yields J/psiK*(exp 0)
[DE93-019907] p 1975 N94-21806
Search for excited quarks in p(-p) collisions at the square root of s = 1.8 TeV
[DE93-019910] p 1975 N94-21840
New perspectives in quantum chromodynamics
[DE93-041021] p 2038 N94-21935
Time evolution of the quark-gluon plasma
[DE94-000804] p 1998 N94-22389

QUARTZ
Characterization of amorphous material in shocked quartz by NMR spectroscopy
[DE93-019069] p 1679 N94-20307
Shock attenuation at the Slate Islands revisited
p 1863 N94-20887

QUARTZ CRYSTALS
Atomic oxygen fluence detector for Bremsat: Scientific and technical description p 1663 N94-21396
Application of an electrochemical quartz crystal microbalance to the study of electrocatalytic films
[DE93-041124] p 2029 N94-21691

QUASARS
Automated investigation of quasars at a galactic latitude of -45 deg
[ISBN-0-315-57576-X] p 2056 N94-22415
Adaptive filtering of Echelle spectra of distant Quasars
p 2072 N94-22520

QUERY LANGUAGES
Application of the structures query language of APROS for specification of industrial processes
p 1923 N94-22078
Intelligent text retrieval in the NASA astrophysics data system p 2048 N94-22499

QUEUEING THEORY
Stochastic optimization by simulation: Numerical experiments with M/M/1 queue in steady-state
[AD-A271143] p 1949 N94-19854
Large deviations behavior of counting processes and their inverses
[AD-A271142] p 1939 N94-19909
Memory contention in scalable cache-coherent multiprocessors
[TR-448] p 1929 N94-20144
Time warp operating system version 2.7 internals manual
[NASA-CR-194798] p 1899 N94-20549
The correlated M/G/1 queue
[CWI-BS-R9303] p 1943 N94-21032
On the optimality of FCFS for networks of multi-server queues
[CWI-BS-R9235] p 1944 N94-21160
Optimization of static traffic allocation policies
[CWI-BS-R9302] p 1930 N94-21161
N parallel queueing systems with server breakdown and repair
[CWI-BS-R9236] p 1944 N94-21232
Optimization of fixed time polling schemes
[CWI-BS-R9237] p 1945 N94-21233
Tandem queues with deterministic service times
[CWI-BS-R9238] p 1946 N94-21577
Algorithms for Markov decision chains with partial information
[PB93-220085] p 1918 N94-22098

R

RABBITS
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462

RADAR ANTENNAS
Probe compensation in cylindrical near-field scanning: A novel simulation methodology p 1718 N94-20404
Two microstrip arrays for interferometric SAR applications p 1722 N94-20421
Target angular motion and its effects on simulated SSAR ship images p 1745 N94-22161

RADAR CORNER REFLECTORS
RCS Analysis of Plate Geometries, parts 1 and 2
[NASA-CR-194173] p 1717 N94-20269
A physical optics/equivalent currents model for the RCS of trihedral corner reflectors p 1717 N94-20271
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign
p 1725 N94-20434

RADAR CROSS SECTIONS
RCS Analysis of Plate Geometries, parts 1 and 2
[NASA-CR-194173] p 1717 N94-20269
High-frequency techniques for RCS prediction of plate geometries p 1717 N94-20270
A physical optics/equivalent currents model for the RCS of trihedral corner reflectors p 1717 N94-20271
Massively parallel computation of RCS with finite elements p 1726 N94-20437
RCS of ships and aircraft at HF frequencies
p 1745 N94-22128

RADAR DATA
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
Determination of noise equivalent sigma(0) using highly correlated repeat-pass SAR images
p 1720 N94-20411
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data
p 1724 N94-20428
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430
Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters
p 1729 N94-20452
NAVSPASUR sensor system digital signal processing receiver. Volume 1: Hardware and software overview
[AD-A272899] p 1738 N94-21198
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218
Interpretation of Ground Penetrating Radar data at the Hanford Site, Richland, Washington
[DE93-040409] p 1743 N94-22557

RADAR DETECTION
Target motion detecting impulse Doppler radar system
[AD-D015898] p 1717 N94-20198
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Probability of detection calculations using MATLAB
[AD-A271958] p 1736 N94-20578

RADAR ECHOES
Magellan vertical polarization radar observations
p 1744 N94-20691

RADAR GEOLOGY
Interpretation of Ground Penetrating Radar data at the Hanford Site, Richland, Washington
[DE93-040409] p 1743 N94-22557

RADAR IMAGERY
Determination of noise equivalent sigma(0) using highly correlated repeat-pass SAR images p 1720 N94-20411
Topographic mapping using a monopulse SAR system p 1721 N94-20417
Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations p 1723 N94-20427
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A271911] p 1882 N94-20489
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
Magellan at Venus: Summary of science findings p 2110 N94-20734
Magellan Mission p 1652 N94-20829
Neural network studies
[AD-A271593] p 1943 N94-20947
Evaluation of C-band SAR data from SAREX 1992: Tapajos study site p 1839 N94-20964
An overview of synthetic aperture radar signal processing techniques p 1745 N94-22159
Target angular motion and its effects on simulated SSAR ship images p 1745 N94-22161
Radar imaging of moving targets p 1747 N94-22238
STAR-1 SAR road extraction using texture analysis and mathematical morphology
[ISBN-0-315-83255-X] p 1843 N94-22429
RADAR MAPS
Performance evaluation of the JPL TOPSAR system: An across-track interferometric SAR system for topographic mapping p 1732 N94-20461
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
RADAR MEASUREMENT
Radar backscatter measurements from simulated sea ice during CRRELEX 1990
[AD-A271034] p 1715 N94-19823
Multiple scattering effects on the Linear Depolarization Ratio (LDR) measured during CaPE by a Ka-band air-borne radar p 1728 N94-20446
Application of the target decomposition theorem to a polarimetric random media model p 1730 N94-20453
Magellan at Venus: Summary of science findings p 2110 N94-20734
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
Obtaining surface optical properties from space-based lidar systems
[AD-A272831] p 1987 N94-21172
Lidar and radar derived cirrus microphysical properties for the 26 November 1991 case study p 1873 N94-22305
Dynamical characteristics of cirrus clouds from aircraft and radar measurements p 1878 N94-22332
RADAR RANGE
Development of a lidar for integration with the Naval Postgraduate School Infrared Search and Target Designation (NPS-IRSTD) system
[AD-A271847] p 1817 N94-20611
RADAR REFLECTORS
All-weather precision landing system for aircraft in remote areas
[AD-D015924] p 1643 N94-20197
RADAR SCATTERING
Classification of simple vegetation types using POLSAR image data p 1722 N94-20420
Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations p 1723 N94-20427
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435
Massively parallel computation of RCS with finite elements p 1726 N94-20437
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439
Application of the target decomposition theorem to a polarimetric random media model p 1730 N94-20453
Magellan vertical polarization radar observations p 1744 N94-20691
Low-power millimeter-wave radar observations of the atmosphere
[NASA-CR-194738] p 1858 N94-21811
RCS of ships and aircraft at HF frequencies p 1745 N94-22128
RADAR SIGNATURES
Polarimetric backscattering from sea ice p 1723 N94-20426
Use of the Weiss-Weinstein bound to compare the direction-finding performance of sparse arrays
[AD-A272582] p 1738 N94-21210
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308
RADAR TARGETS
Target motion detecting impulse Doppler radar system
[AD-D015898] p 1717 N94-20198
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Calculation of a diffracted electric field with the aid of the Method of Equivalent Currents (MEC) p 1745 N94-22127
RCS of ships and aircraft at HF frequencies p 1745 N94-22128
RADAR TRACKING
New algorithm of ground track processing in high-frequency skywave over-the-horizon-B radar
[AD-A267821] p 1717 N94-20207
Probability of detection calculations using MATLAB
[AD-A271958] p 1736 N94-20578
Magellan vertical polarization radar observations p 1744 N94-20691
GMM-1: A 50 degree and order gravitational field model for Mars p 2117 N94-20774
NAVSPASUR sensor system digital signal processing receiver. Volume 1: Hardware and software overview
[AD-A272899] p 1738 N94-21198
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218
Radar imaging of moving targets p 1747 N94-22238
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
RADIAL DISTRIBUTION
Optical diagnostic instrument for monitoring etch uniformity during plasma etching of polysilicon in a chlorine-helium plasma
[DE93-019582] p 1993 N94-20261
C2, CN and dust in Comet Wilson (1987VII) p 2083 N94-20746
Shock attenuation at the Slate Islands revisited p 1863 N94-20887
Impact of copper vapour contamination on argon arcs p 1994 N94-21053
RADIAL FLOW
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
RADIAL VELOCITY
The IRAF radial velocity analysis package p 1925 N94-22475
RADIANCE
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617
Goniospectrometric properties of a white standard p 1684 N94-20664
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging p 2101 N94-20685
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations
[NASA-CR-194802] p 1837 N94-20951
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2 p 1872 N94-22298
Development of methods for inferring cloud thickness and cloud-base height from satellite radiance data p 1872 N94-22301
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312
Spectral emissivity of cirrus clouds p 1876 N94-22322
Calibration of radiation codes in climate models: Comparison of calculations with observations from the SPECtral Radiation Experiment (SPECTRE) p 1879 N94-22337
SSH-2 measurements of cirrus at 18-28 micrometers from the King Air during FIRE 2 p 1880 N94-22338
Investigation of the effects of the macrophysical and microphysical properties of cirrus clouds on the retrieval of optical properties: Results for FIRE 2 p 1880 N94-22339
RADIANT COOLING
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1822 N94-20127
RADIANT FLUX DENSITY
RADCAL: A narrow-band model for radiation calculations in a combustion environment
[PB93-200889] p 1682 N94-21448
Miyun 232 MHz survey 1: Fields centered at: alpha:00(h)41(m), delta:41 deg 12 min and alpha: 07(h)00(m),delta:35 deg 00 min p 2080 N94-22554
RADIANT HEATING
Wavefront sensors for optical diagnostics in fluid mechanics: Application to heated flow, turbulence, and droplet evaporation
[DE93-040060] p 1797 N94-19974
The young Sun and photochemistry of the primitive Martian atmosphere p 2145 N94-21679
RADIATION
Radiation and scattering from printed antennas on cylindrically conformal platforms
[NASA-CR-194703] p 1741 N94-21885
RADIATION ABSORPTION
Optics survivability support, volume 2
[DE93-040310] p 1985 N94-20283
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
The quantum efficiency of HgCdTe photodiodes in relation to the direction of illumination and to their geometry p 1735 N94-20512
Examination for optimization of synchrotron radiation spectrum for the x ray depth lithography
[BONN-IR-92-32] p 1987 N94-21148
RADIATION CHEMISTRY
Chemistry and materials science
[DE94-001449] p 2152 N94-21858
RADIATION COUNTERS
Thermal information regarding the cooldown and operation of liquid argon calorimeters
[DE93-019391] p 1807 N94-19967
The GEM Silicon Tracking System
[DE93-040133] p 2016 N94-20322
STRV RADMON: An integrated high-energy particle detector p 1666 N94-21086
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights
[NASA-CR-194709] p 2056 N94-22281
RADIATION DAMAGE
General introduction to microstructural evolution under cascade damage conditions
[DE93-017443] p 2012 N94-19923
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008
RADIATION DETECTORS
The NRL LACE program
[AD-A270861] p 1657 N94-19896
Top search at the TEVATRON
[DE93-019392] p 1978 N94-19988
B production at D0
[DE93-019250] p 1972 N94-20291
STRV RADMON: An integrated high-energy particle detector p 1666 N94-21086
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528
The lepton charge asymmetry in the decay of W bosons produced in p(bar p) collisions at (radical)s = 1.8 TeV
[DE93-019903] p 1976 N94-21847
VETA x ray data acquisition and control system p 2047 N94-22455
RADIATION DISTRIBUTION
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974
RADIATION DOSAGE
Focused-ion-beam material removal rates
[AD-A270852] p 1713 N94-19834
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
Radiometry in commercial aircraft
[GSF-41/91] p 1892 N94-21141
Spaceflight Radiation Health program at the Lyndon B. Johnson Space Center
[NASA-TM-104782] p 1893 N94-21863
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008

RADIATION EFFECTS
General introduction to microstructural evolution under cascade damage conditions
[DE93-017443] p 2012 N94-19923
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4
[DE93-018050] p 1689 N94-20182
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262
Optics survivability support, volume 2
[DE93-040310] p 1985 N94-20283
High energy ionization in liquids: The free ion yield
[DE93-040329] p 1973 N94-20324
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
The Fifth NASA Symposium on VLSI Design
[NASA-CR-194644] p 1753 N94-21079
Rad-hard computer elements for space applications p 1753 N94-21082
Design of CMOS logic gates for TID radiation p 1754 N94-21083
Evaluation of radiation effects in re-oxidized nitrided oxide devices by hot carrier stressing at 77 K p 1754 N94-21084
Space qualified high speed Reed Solomon encoder p 1754 N94-21088
Proton radiation testing of an 18 bit A/D converter p 1755 N94-21096
Automated radiation hard ASIC design tool p 1759 N94-21126
Simulated space environmental effects on some experimental high performance polymers p 1662 N94-21385
Evaluation of electroconductivity of two surface paints for spacecraft
[AD-A273063] p 1706 N94-21437
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
Temperature-dependent ion beam mixing
[DE93-040281] p 2033 N94-21999
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates
[DE93-018786] p 1696 N94-22037
Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides
[DE93-040600] p 1697 N94-22559

RADIATION HARDENING
CMOS gate array characterization procedures
[AD-A269943] p 2014 N94-20029
Optics survivability support, volume 1
[DE93-019616] p 1985 N94-20262
Mongoose: Creation of a Rad-Hard MIPS R3000 p 1754 N94-21090
Fully-depleted silicon-on-sapphire and its application to advanced VLSI design p 1765 N94-21709
Design and test of field programmable gate arrays in space applications p 1765 N94-21710

RADIATION HAZARDS
VLF Harold E. Holt RADHAZ measurements
[AD-A272018] p 1737 N94-20620
Magnetic insulation of secondary electrons in plasma source ion implantation
[DE93-040106] p 1997 N94-21988

RADIATION MEASUREMENT
Thermal infrared remote sensing and Kirchhoff's law: 1. Laboratory measurements p 1685 N94-20733
Areally averaged estimates of surface heat flux from ARM field studies
[DE93-018569] p 1859 N94-22036
Applications of planar near-field measurements to electromagnetic radiation and interference problems p 1747 N94-22252
Proceedings of the Workshop on New Generation of Radiation Budget Measurements From Space and Their Use in Climate Modelling and Diagnostic Studies
[MPIM-90] p 1860 N94-22283
Satellite measurements of radiation budget parameters p 1860 N94-22284
Optical properties of cirrus derived from airborne measurements during FIRE IFO 2 p 1872 N94-22297
Ground-based passive remote sensing during FIRE IFO 2 p 1844 N94-22319

RADIATION SHIELDING
Transient thermal analysis of cryocondensation pump for JET
[DE93-040372] p 1992 N94-20003
Shielding from space radiations
[NASA-CR-194683] p 1895 N94-20063
Improved approximate formulas for flux from cylindrical and rectangular sources
[DE93-011390] p 1742 N94-22268

RADIATION SPECTRA
The NRL LACE program
[AD-A270861] p 1657 N94-19896
Diffuse reflectance spectra of orthopyroxene, olivine, and plagioclase as a function of composition and structure p 2087 N94-20906
Examination for optimization of synchrotron radiation spectrum for the x ray depth lithography
[BONN-IR-92-32] p 1987 N94-21148

RADIATION THERAPY
Numerical modeling for an electric-field hyperthermia applicator p 1729 N94-20451

RADIATION TOLERANCE
A method of measuring the thermoradiative properties of ceramic materials in a space environment p 1665 N94-21405
Single crystal diamond films
[AD-A266759] p 2028 N94-21517
Issues related to mechanical properties of neutron-irradiated ceramics
[DE93-040262] p 1707 N94-21560
Spaceflight Radiation Health program at the Lyndon B. Johnson Space Center
[NASA-TM-104782] p 1893 N94-21863

RADIATIVE HEAT TRANSFER
RADCAL: A narrow-band model for radiation calculations in a combustion environment
[PB93-200889] p 1682 N94-21448

RADIATIVE TRANSFER
Relating ground truth collection to model sensitivity p 1719 N94-20409
Simulated retrieval of land surface parameters using multichannel satellite microwave radiometry p 1727 N94-20443
Second order distorted born approximation for backscattering from a layer of discrete random medium p 1728 N94-20448
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
A retrieval error analysis technique for passive infrared atmospheric sounders
[AD-A272618] p 1867 N94-21212
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals p 1871 N94-22295
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296
Lidar and radar derived cirrus microphysical properties for the 26 November 1991 case study p 1873 N94-22305
Comparisons of downwelling radiation to model predictions based on groundbased measurements during FIRE 1991 p 1876 N94-22320
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study p 1879 N94-22335
Investigation of the effects of the macrophysical and microphysical properties of cirrus clouds on the retrieval of optical properties: Results for FIRE 2 p 1880 N94-22339
Extinction efficiencies from DDA calculations solved for finite circular cylinders and disks p 1880 N94-22340
Remote sensing estimates of cirrus particle size for tropical and midlatitude cirrus: Hexagonal crystals and ice spheres p 1880 N94-22342
An overview of the radiation component of the NASA TOGA-COARE experiment p 1881 N94-22344

RADICALS
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982
Physical chemistry of energetic nitrogen compounds
[AD-A271819] p 1712 N94-20625
Polymerization of enantiomerically pure 2,3-dicarboalkoxy norbornadienes and 5,6-disubstituted norbornenes by well-characterized molybdenum ROMP catalysts
[AD-A272649] p 1704 N94-21186

RADIO ALTIMETERS
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435

RADIO ASTRONOMY
Berne (Switzerland) solar observations: Data for April 1991 - August 1992
[REPT-59] p 2147 N94-21150
Applications of correlator chips in radio science p 1763 N94-21695
NASA SERC digital correlator projects p 1765 N94-21708
A 1 GHz sample rate, 256-channel, 1-bit quantization, CMOS, digital correlator chip p 1768 N94-21732
Circumstellar environments of Be stars at infra-red and radio wavelengths
[ISBN-0-315-83135-9] p 2081 N94-22426
Programmability in AIPS++ p 1926 N94-22482
Preliminary results of observations of solar flares with Nobeyama Radioheliograph p 2001 N94-22633

RADIO AURORAS
Preliminary results of observations of solar flares with Nobeyama Radioheliograph p 2001 N94-22633

RADIO BURSTS
Electron acceleration in and radio emission from SN1987A p 2007 N94-22677

RADIO COMMUNICATION
Ground wave emergency network. Final operational capability. Environmental assessment for south central Montana relay node, site no. RN8C925MT
[AD-A267795] p 1716 N94-19964
Four-channel HF receiving antenna array simulator
[AD-A271876] p 1732 N94-20471
High Frequency (HF) and meteor burst communications in a polar environment
[AD-A271604] p 1737 N94-20949
ATC/pilot voice communications: A survey of the literature
[DOT/FAA/AM-93/20] p 1738 N94-21201
Inclined orbits and interference to stationary service and to stationary service by satellite p 1653 N94-22188

RADIO DIRECTION FINDERS
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951

RADIO EMISSION
Radio and optical emission: Spectral shapes and breaks in GRB
[NASA-CR-194763] p 2150 N94-21781
Circumstellar environments of Be stars at infra-red and radio wavelengths
[ISBN-0-315-83135-9] p 2081 N94-22426
Radiation from solar flares p 2001 N94-22634
Nonthermal planetary radio emissions: Theories and observations p 2001 N94-22635
Electron acceleration in and radio emission from SN1987A p 2007 N94-22677
Langmuir microstructures and pulsar radio emission p 2007 N94-22678

RADIO EQUIPMENT
Optical signal processing
[AD-A271036] p 1983 N94-20013

RADIO FREQUENCIES
Study of coupled-bunch collective effects in the PEP-2 B-Factory
[DE93-040117] p 1979 N94-20274
Field emitter array RF amplifier development project, phase 1, option 1
[AD-A272567] p 1740 N94-21361
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
Simulation and compensation of multibunch energy variation in NLC
[DE93-041057] p 1981 N94-21687
Particle behavior in an ECR plasma etch tool
[DE93-040343] p 1996 N94-21769
The preservation of low emittance flat beams
[DE93-040964] p 1981 N94-21773
Verification of frequency scaling laws for capacitive rf discharges using two-dimensional simulations
[DE94-001306] p 1999 N94-22595

RADIO FREQUENCY HEATING
Numerical modeling for an electric-field hyperthermia applicator p 1729 N94-20451
Fusion plasma theory grant. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE94-000779] p 1994 N94-20940

RADIO FREQUENCY INTERFERENCE
The Composite Analytic and Simulation Package or RFI (CASPR) on a coded channel p 1744 N94-21339
The Automated Conflict Resolution System (ACRS) p 1744 N94-21341
Advanced coding and modulation schemes for TDRSS p 1744 N94-21350
Interference reduction using neural networks p 1783 N94-22186
Inclined orbits and interference to stationary service and to stationary service by satellite p 1653 N94-22188
Throughput, blocking, and interference in packet radio networks p 1746 N94-22190

RADIO GALAXIES
Radio galaxies and their environment
[DE93-040851] p 2150 N94-22397
CCD surface photometry of galaxies p 2058 N94-22445

RADIO JETS (ASTRONOMY)
Jets associated with active galactic nuclei
p 2000 N94-22631
RADIO NAVIGATION
FM interference in radio navigation receivers
p 1645 N94-22219
A robust quality control system for GPS navigation and kinematic positioning
[ISBN-0-315-83148-0] p 1644 N94-22427
RADIO RECEIVERS
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912
NHK Science and Technical Research Laboratories
p 2151 N94-20342
Digital receiver for on-board FM/FSK-FM/BPSK demodulation p 1744 N94-21091
RADIO RELAY SYSTEMS
Visibility considerations in frequency sharing with low Earth orbit satellites p 1746 N94-22187
RADIO SIGNALS
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951
Four-channel HF receiving antenna array simulator
[AD-A271876] p 1732 N94-20471
The VLBA correlator: Real-time in the distributed era
p 2049 N94-22547
RADIO TELEMETRY
An in-depth analysis and modelling of the Shuttle to MILA S-band telemetry link p 1657 N94-21340
RADIO TELESCOPES
Miyun 232 MHz survey 1: Fields centered at: alpha:00(h)41(m), delta:41 deg 12 min and alpha: 07(h)00(m),delta:35 deg 00 min p 2080 N94-22554
RADIO TRANSMISSION
High Frequency (HF) and meteor burst communications in a polar environment
[AD-A271604] p 1737 N94-20949
Throughput, blocking, and interference in packet radio networks p 1746 N94-22190
RADIO TRANSMITTERS
Spread spectrum random access networks
[AD-A272280] p 1737 N94-20585
VLF Harold E. Holt RADHAZ measurements
[AD-A272018] p 1737 N94-20620
ELF communications system ecological monitoring program
[AD-A272507] p 1740 N94-21412
RADIO WAVE REFRACTION
Marine boundary layer model evaluation by using a height gain measurement technique in the interference region p 1777 N94-22145
RADIO WAVES
VLF Harold E. Holt RADHAZ measurements
[AD-A272018] p 1737 N94-20620
RADIOACTIVE AGE DETERMINATION
Dating native gold by noble gas analyses
p 1684 N94-20652
Exposure ages of carbonaceous chondrites, 1
p 2082 N94-20658
LREE variability in CM matrices: Another look at meteorite compaction ages p 2086 N94-20884
RADIOACTIVE DECAY
Simulating supersymmetry with ISAJET 7.0/ISASUSY 1.0
[DE93-018266] p 1969 N94-19804
A search for new gauge bosons in (bar p)p collisions at square root of s equals 1.8 TeV in the dielectron decay mode
[DE93-019901] p 1969 N94-19813
Measurement of the B(+) and B(0) lifetimes
[DE93-019906] p 1969 N94-19814
B production at D0
[DE93-019250] p 1972 N94-20291
Measurement of the B meson and b quark cross-section in (-p)p collisions at the square root of s = 1.8 TeV using the exclusive decays B(+) and B(exp 0) yields J/psiK*(exp 0)
[DE93-019907] p 1975 N94-21806
RADIOACTIVE ISOTOPES
Dating native gold by noble gas analyses
p 1684 N94-20652
Exposure ages of carbonaceous chondrites, 1
p 2082 N94-20658
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778
AGB stars as a source of short-lived radioactive nuclei in the solar nebula p 2133 N94-20859
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021
RADIOACTIVE WASTES
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761
Interpretation of Ground Penetrating Radar data at the Hanford Site, Richland, Washington
[DE93-040409] p 1743 N94-22557
RADIOACTIVITY
A high-intensity He-jet production source for radioactive beams
[DE93-040247] p 1981 N94-21767
Gamma ray spectrometry of LDEF samples: Results of 1992 analyses
[DE94-001177] p 1684 N94-22046
RADIOBIOLOGY
Extra-corporeal blood access, sensing, and radiation methods and apparatuses
[NASA-CASE-MSC-21775-1] p 1890 N94-20372
RADIOGENIC MATERIALS
Dating native gold by noble gas analyses
p 1684 N94-20652
Geochronology and petrogenesis of the western highlands alkali suite: Radiogenic isotopic evidence from Apollo 14 p 2118 N94-20778
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis
p 2118 N94-20779
RADIOGRAPHY
PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943
Experimental and numerical studies of high-velocity impact fragmentation
[DE93-040205] p 1832 N94-21557
RADIOMETERS
Low power, CMOS digital autocorrelator spectrometer for spaceborne applications p 1666 N94-21733
Satellite measurements of radiation budget parameters p 1860 N94-22284
ScaRaB and its subsystems p 1860 N94-22285
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296
RADIOMETRIC CORRECTION
Topographic mapping using a monopulse SAR system
p 1721 N94-20417
RADIOMETRIC RESOLUTION
A motion extraction method for synthetic aperture radars
[DLR-FB-92-31] p 1742 N94-22279
RADOMES
Radome having integral heating and impedance matching elements
[CA-PATENT-APPL-SN-2,026,85] p 1738 N94-21049
RAIL TRANSPORTATION
Adaptation of model parameters of a rail model at measured rail compliances
[ILR-MITT-274(1992)] p 1831 N94-21153
RAIN
Modeling of interactions between biosphere and atmosphere on the global scale
[NASA-CR-193423] p 1837 N94-20205
Schools of the Pacific rainfall climate experiment
p 1881 N94-20699
A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites
[NASA-CR-191200] p 1762 N94-21566
Presenting the Rain-Sea Interaction Facility
[NASA-RP-1322] p 1884 N94-21628
Evolution of the global water cycle on Mars: The geological evidence p 2142 N94-21660
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
Observations of multi-layered clouds using K-band radar p 1874 N94-22311
RAIN FORESTS
Change detection on land use and rainforest cover at Paragominas region, Brazilian Amazon
p 1838 N94-20957
Evaluation of C-band SAR data from SAREX 1992: Tapajos study site p 1839 N94-20964
RAINDROPS
A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites
[NASA-CR-191200] p 1762 N94-21566
RAMAN SPECTRA
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924
The multicomponent lineshape of the anharmonic A(1)(TO) phonon in PbTiO3
[DE93-018995] p 1970 N94-19971
Phonons and metastability in compressed nitrogen
[DE93-019913] p 2016 N94-20318
Examinations of a thallium atomic vapor filter for a Raman temperature lidar
[GKSS-92/E/13] p 1857 N94-21044
Effects of stimulated Raman scattering on light beam properties during high-power laser beam long-path propagation
[AD-A273109] p 1818 N94-21509
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958
RAMAN SPECTROSCOPY
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Materials Science and Engineering
[DE93-040497] p 1675 N94-21530
Laser Raman and x ray scattering studies of corrosion films on metals
[DE93-040243] p 1692 N94-21558
Femtosecond dynamics in hydrogen-bonded solvents
[DE93-019937] p 1683 N94-21842
RANDOM ACCESS
M-dimensional computer memory with M-1 dimensional hyperplane access
[AD-D015960] p 1898 N94-20357
Spread spectrum random access networks
[AD-A272280] p 1737 N94-20585
RANDOM ACCESS MEMORY
Proceedings of the 8th International Symposium on Applications of Ferroelectrics
[AD-A270679] p 1749 N94-20012
M-dimensional computer memory with M-1 dimensional hyperplane access
[AD-D015960] p 1898 N94-20357
Light update notification mechanism for shared data structures
[AD-D015967] p 2043 N94-21276
A DRAM compiler algorithm for high performance VLSI embedded memories p 1767 N94-21729
RANDOM NOISE
Noise filtering using multilayer feedforward neural network p 1770 N94-22104
Applications of a two-dimensional nonlinear filters to image restoration p 1789 N94-22225
RANDOM NUMBERS
Stochastic optimization by simulation: Convergence proofs for the G1/G/1 queue in steady-state
[AD-A271141] p 1962 N94-19999
On a proposed symbolic dynamics for the Henon map
[AD-A272514] p 1955 N94-21359
RANDOM VARIABLES
A methodology for quantifying uncertainty in models
[DE93-040154] p 1916 N94-21747
RANGE FINDERS
CMU very fast range-imaging system
[AD-A272057] p 1761 N94-21282
RANGEFINDING
Development of a lidar for integration with the Naval Postgraduate School Infrared Search and Target Designation (NPS-IRSTD) system
[AD-A271847] p 1817 N94-20611
CMU very fast range-imaging system
[AD-A272057] p 1761 N94-21282
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
A feasibility study of a parallax-based passive missile approach warning system
[ISBN-0-315-60640-1] p 1743 N94-22410
RAPID QUENCHING (METALLURGY)
Investigation of cracking and erratic behavior of the uranium-titanium alloy
[DE93-018591] p 1688 N94-19957
RARE EARTH COMPOUNDS
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications
[AD-A272897] p 1704 N94-21197
RARE EARTH ELEMENTS
Rare Earth elements in individual minerals in Shergottites p 1686 N94-20652
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20666
LREE variability in CM matrices: Another look at meteorite compaction ages p 2086 N94-20884
Static ultra-high pressure study of lanthanide and actinide metals using a diamond-anvil cell
[DE94-000369] p 1693 N94-21656
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388
RARE GASES
Design aspects and parametric characterisation of a neutral rare gas laser
[AD-A271100] p 1814 N94-19850
Stability of the face-centered-cubic phase of heavy rare gas solids
[DE93-019949] p 1679 N94-20319
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
Dating native gold by noble gas analyses
p 1684 N94-20652
A carbon and nitrogen isotope study of carbonaceous vein material in ureilite meteorites p 2083 N94-20726

The chondrite Mihonoseki: New observed fall p 2083 N94-20764
Are the C delta light nitrogen and noble gases located in the same carrier? p 2085 N94-20846
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875
Evolution of the Martian atmosphere p 2146 N94-21680
The laser and its applications on environment and biotechnology research [DE94-000376] p 1820 N94-21957

RASTER SCANNING
Three dimensional ultrasonic imaging [DE93-040549] p 1968 N94-22003

RATIOMETERS
The laser and its applications on environment and biotechnology research [DE94-000376] p 1820 N94-21957

RATIONAL FUNCTIONS
Rational trigonometric approximations using Fourier series partial sums [NASA-CR-191535] p 1959 N94-21568
Column reduced rational matrix functions with given null-pole data in the complex plane [PB93-220531] p 1960 N94-22099

RATS
Relationship of area postrema to three putative measures of motion sickness p 1865 N94-21900
Conditioned taste aversion induced by motion is prevented by selective vagotomy in the rat p 1887 N94-21908
Experimental studies of gastric dysfunction in motion sickness: The effect of gastric and vestibular stimulation on the vagal and splanchnic gastric efferents p 1888 N94-21911
Role of the area postrema in three putative measures of motion sickness in the rat p 1888 N94-21912

RAWINSONDES
Overview of microphysical and state parameter measurements from FIRE 2 p 1871 N94-22293
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar p 1874 N94-22310
Meteorological analysis of the December 4-6 FIRE cirrus-2 case p 1875 N94-22314
Meteorological analysis of the November 25 FIRE cirrus-2 case: A well-defined ridge-crest cirrus system over Oklahoma p 1877 N94-22328

RAY TRACING
A general purpose ionospheric ray tracing procedure [AD-A271058] p 1854 N94-19860
Feedback controlled optics with wavefront compensation [NASA-CASE-NPO-18194-1-CU] p 1985 N94-20305
Validation of the design of a high resolution all-reflection Michelson interferometer for atmospheric spectroscopy [AD-A272505] p 1987 N94-21410
A data distributed, parallel algorithm for ray-traced volume rendering [DE93-040150] p 1935 N94-21622
Telescope image modelling software in STSDAS p 1926 N94-22483

RAYLEIGH DISTRIBUTION
Ocean wave height transformation model using surface roller theory [AD-A272610] p 1883 N94-21423

RAYLEIGH NUMBER
A parametric study of heat transfer within a planar thermosyphon [DE93-019546] p 1799 N94-20258
Expectations for the Martian core magnetic field p 2120 N94-20792

RAYLEIGH SCATTERING
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows [AD-A271160] p 1678 N94-20000
New relativistic S-matrix results for scattering – beyond the usual anomalous factors/beyond impulse approximation [DE93-019148] p 1971 N94-20096
Multiple scattering effects on the Linear Depolarization Ratio (LDR) measured during CaPE by a Ka-band air-borne radar p 1728 N94-20446
RADCAL: A narrow-band model for radiation calculations in a combustion environment [PB93-200689] p 1662 N94-21448
Laser guide star adaptive optics: Present and future [DE93-016642] p 1989 N94-21619

RC CIRCUITS
Computation of signal delays in RC networks p 1744 N94-21102

RDX
Evaluation of pre-extraction analytical holding times for nitroaromatic and nitramine explosives in water [AD-A271547] p 1712 N94-20927
Chemistry of the burning surface [AD-A272725] p 1681 N94-21181

REACTING FLOW
Development of a technique to determine the morphology and dynamics of agglomerates in chemically reacting flows [AD-A271160] p 1678 N94-20000
Reaction zone models for vortex simulation of turbulent combustion [AD-A272723] p 1681 N94-21213
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments) [AD-A272918] p 1802 N94-21220
Instantaneous velocity field imaging instrument for supersonic reacting flows [NASA-CR-191162] p 1809 N94-21607
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct [NASA-TM-106435] p 1649 N94-21758
Simulations of diffusion-reaction equations with implications to turbulent combustion modeling [NASA-CR-191536] p 1804 N94-21861

REACTION KINETICS
Materials processing and manufacturing technologies for Diamond Substrate MultiChip Modules (DSMCM) [AD-A271011] p 2011 N94-19821
Segregation of Si to the surface of Fe-29Ni-17Co alloy [DE93-040053] p 1687 N94-19864
Initiation and modification of reaction by energy addition: Kinetic and transport phenomena [AD-A271315] p 1797 N94-19936
Ab initio potential energy surface for the H + OCS reaction [AD-A270577] p 1698 N94-19947
Encounters of H and D atoms with O2 in water: Relative diffusion and reaction rates [DE93-018587] p 1970 N94-19956
Common Themes and Mechanisms of Epitaxial Growth, volume 312 — Materials Research Society symposium proceedings [AD-A270513] p 2013 N94-19967
High performance heavy alloys by alloying and process control [AD-A271129] p 1689 N94-20019
Laboratory studies of low temperature rate coefficients: The atmospheric chemistry of the outer planets [NASA-CR-193485] p 1972 N94-20130
Computed potential energy surfaces for chemical reactions [NASA-CR-194600] p 1679 N94-20169
Surface science and modeling studies of endothermic fuels catalysis [AD-A272850] p 1712 N94-21192
Reaction zone models for vortex simulation of turbulent combustion [AD-A272723] p 1681 N94-21213
Electronically metastable molecules of high symmetry [AD-A272015] p 1974 N94-21461
A project on parameter identification in reaction kinetics [CWI-NM-R9301] p 1682 N94-21574
Modeling of outgassing and matrix decomposition in carbon-phenolic composites [NASA-CR-194741] p 1676 N94-21743
Simulations of diffusion-reaction equations with implications to turbulent combustion modeling [NASA-CR-191536] p 1804 N94-21861

REACTIVITY
Application of the reactive flux formalism to study water hydrogen bond dynamics [AD-A271824] p 1680 N94-20560
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973
Surface electrochemistry of metals [AD-A272913] p 1691 N94-21245
Melt-spin processing of high (Tc) oxide superconductors [DE94-000696] p 2038 N94-22582

REACTOR CORES
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4 [DE93-018050] p 1689 N94-20182

REACTOR DESIGN
In-situ spectroscopic ellipsometry in molecular beam epitaxy p 2024 N94-21005
Materials processing and manufacturing technologies for diamond substrate multichip modules [AD-A271484] p 2027 N94-21319
SPACE-R Thermionic Space Nuclear Power System: Design and Technology Demonstration Program [DE93-013969] p 1670 N94-21824
A spheromak ignition experiment reusing Mirror Fusion Test Facility (MFTF) equipment [DE94-001856] p 2034 N94-22050

REACTOR MATERIALS
Silver lined ceramic vessel [AD-D015917] p 1700 N94-20057
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4 [DE93-018050] p 1689 N94-20182
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources [DE93-040280] p 1706 N94-21542
Issues related to mechanical properties of neutron-irradiated ceramics [DE93-040262] p 1707 N94-21560
SPACE-R Thermionic Space Nuclear Power System: Design and Technology Demonstration Program [DE93-013969] p 1670 N94-21824

READ-ONLY MEMORY DEVICES
A high speed CMOS A/D converter p 1767 N94-21726

REAL GASES
An efficient numerical method for three-dimensional hypersonic flow [AD-A272506] p 1637 N94-21411

REAL TIME OPERATION
A software architecture for the construction and management of real-time virtual worlds [AD-A271465] p 1904 N94-20091
Simulated real-time intercomparison of hydrological models [WMO-779] p 1867 N94-21070
An optically-assisted 3-D cellular array machine [AD-A272683] p 1987 N94-21163
A formulation of quantum statistical mechanics based on the Feynman path centroid density 2 dynamical properties [AD-A272698] p 2037 N94-21166
Fault tolerant real-time systems [AD-A272878] p 1899 N94-21195
Real-time fault tolerant computer systems [AD-A272909] p 1899 N94-21230
Developing a space network interface simulator: The NTS approach p 1933 N94-21343
Analysis of multigrid methods on massively parallel computers: Architectural implications p 1938 N94-21468
A VLSI implementation of DCT using pass transistor technology p 1767 N94-21725
A real time correlator architecture using distributed arithmetic principles p 1768 N94-21734
Particle image velocimetry [DE93-040657] p 1804 N94-21748
Optimization and control of a small angle ion source using an adaptive neural network controller [DE93-040063] p 1946 N94-21845
The Board on Earth sciences and resources [DE94-000745] p 1859 N94-22018
A neural network approach to the maximum flow problem p 1783 N94-22183
A Hopfield neural net for discrete Fourier transform calculation p 1783 N94-22184
A real-time infrared image processing testbed p 1790 N94-22227
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts [NASA-TM-108245] p 2057 N94-22438
How to handle 6GBytes a night and not get swamped p 2058 N94-22444
VETA x ray data acquisition and control system p 2047 N94-22455
The data acquisition system for the Anglo-Australian Observatory 2-degree field project p 2048 N94-22529
The VLBA correlator: Real-time in the distributed era p 2049 N94-22547
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552

RECEIVERS
An investigation into the integration of meter-level range and millimeter-level phase data using a multimode stimulation for optimal filter estimation software package [AD-A267955] p 1751 N94-20483
Spread spectrum random access networks [AD-A272280] p 1737 N94-20585
QPPM receiver for free-space laser communications [NASA-TM-106424] p 1741 N94-21567
Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised) [PB93-215432] p 1969 N94-22262
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552

RECEPTION DIVERSITY
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408

RECOGNITION
On geometric and algebraic aspects of 3D affine and projective structures from perspective 2D views
[AD-A270520] p 1983 N94-19968
Sensor integration and data fusion for object localization in robotic workcells p 1774 N94-22130
RECORDS MANAGEMENT
Project Records Information System (PRIS): User's manual
[DE94-001548] p 2045 N94-22047
RECRYSTALLIZATION
Fragments of ancient lunar crust: Ferroan noritic anorthosites from the descartes region of the Moon p 2096 N94-20660
Post-igneous redistribution of components in eucrites p 1685 N94-20684
Fine resolution chronology based on initial Sr-87/Sr-86
[CONTRIB-5230(794)] p 1686 N94-20794
RECTANGLES
Operational equations for the five-point rectangle
[DE94-000366] p 1959 N94-21655
RECTANGULAR PLATES
High-frequency techniques for RCS prediction of plate geometries p 1717 N94-20270
RECTANGULAR WAVEGUIDES
Formulation for numerical solution of radiation and transmission from arbitrary apertures p 1745 N94-22140
RECURSIVE FUNCTIONS
Efficient and correct translation of strict applicative programming languages
[ETN-93-95056] p 1903 N94-20020
Cascaded recursive artificial neural networks p 1780 N94-22167
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457
RECYCLING
Current status of environmental, health, and safety issues of nickel metal-hydride batteries for electric vehicles
[DE93-017079] p 1748 N94-19902
Resonantly pumped, erbium-doped, GSGG, 2.8 micron, solid state laser with energy recycling and high slope efficiency
[AD-D015920] p 1815 N94-20060
RED SHIFT
Radio galaxies and their environment
[DE93-040851] p 2150 N94-22397
Visualizing the universe, part 2 p 2063 N94-22472
REDUCTION (CHEMISTRY)
Catalytic hydrogenation of carbon monoxide
[DE94-000881] p 1678 N94-20103
REDUNDANCY
Real-time fault tolerant computer systems
[AD-A272909] p 1899 N94-21230
Links between N-modular redundancy and the theory of error-correcting codes p 1765 N94-21713
REED-SOLOMON CODES
Arithmetic in large GF(2(exp n)) p 1760 N94-21131
The Composite Analytic and Simulation Package or RFI (CASPR) on a coded channel p 1744 N94-21339
Advanced coding and modulation schemes for TDRSS p 1744 N94-21350
Schematic driven layout of Reed Solomon encoders p 1766 N94-21722
Performance of RS codes in lognormally shadowed Rician channels p 1792 N94-22244
REENTRY SHIELDING
Compilation of reinforced carbon-carbon transatlantic abort landing arc jet test results
[NASA-TM-104778] p 1676 N94-21834
REENTRY TRAJECTORIES
Effects of thrust vector control on the performance of the aerobang orbital plane change maneuver
[AD-A272532] p 1646 N94-21418
REENTRY VEHICLES
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 1658 N94-20590
Reentry vehicle adaptive telemetry
[DE94-001168] p 1656 N94-21852
REFERENCE SYSTEMS
The Keck keyword layer p 1925 N94-22460
REFLECTANCE
High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805
An expert system shell for inferring vegetation characteristics
[NASA-CR-189318] p 1837 N94-20284
A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454
The coherent backscattering opposition effect p 1991 N94-20646
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800
A new Antarctic meteorite with chromite, orthopyroxene and metal with reference to a formation model of S asteroids p 2084 N94-20813
Objective determination of image end-members in spectral mixture analysis p 1686 N94-20831
Diffuse reflectance spectra of orthopyroxene, olivine, and plagioclase as a function of composition and structure p 2087 N94-20906
X ray reflection masks: Manufacturing, characterization and first tests
[BONN-IR-92-31] p 1986 N94-21043
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
Forecasting technique of variations of the optical absorptivity of thermal control coatings under different simultaneous radiations p 1664 N94-21399
Role of surface characteristics in urban meteorology and air quality
[DE93-040929] p 1851 N94-21740
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG)
[DE93-040546] p 1709 N94-21970
X ray characterization of a three-element condenser system for soft x ray projection lithography
[DE93-019916] p 1990 N94-21985
A motion extraction method for synthetic aperture radars
[DLR-FB-92-31] p 1742 N94-22279
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296
Estimation of cirrus cloud particle fallspeeds from vertically pointing Doppler radar p 1879 N94-22333
Surface-induced brightness temperature variations and their effects on detecting thin cirrus clouds using IR emission channels in the 8-12 micrometer region p 1880 N94-22341
Remote sensing estimates of cirrus particle size for tropical and midlatitude cirrus: Hexagonal crystals and ice spheres p 1880 N94-22342
REFLECTED WAVES
Observation of reflected waves on the SABRE positive polarity inductive adder MITL
[DE93-019413] p 1960 N94-20295
System and method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-1] p 1801 N94-20588
The coherent backscattering opposition effect p 1991 N94-20646
REFLECTING TELESCOPES
Holographic optical elements correcting the off-axis aberrations of a parabolic mirror
[ISBN-0-315-57581-6] p 1990 N94-22411
REFLECTION
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
The Brewster angle effect in SAR polarimetry p 1731 N94-20456
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings
[DE93-040547] p 1990 N94-22002
REFLECTOMETERS
Center for X-Ray Optics, 1992
[DE94-000726] p 1990 N94-21868
REFLECTOR ANTENNAS
Multi-band reflector antenna with double-ring element frequency selective subreflector p 1728 N94-20447
Mobile terminal antennas for helicopters p 1731 N94-20458
A compact, portable EHF/SHF antenna for advanced SCAMP
[AD-A272614] p 1739 N94-21211
Performance of a simple circular polarization selective surface p 1746 N94-22198
REFLECTORS
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1822 N94-20127
Goniospectrometric properties of a white standard p 1684 N94-20664
X ray characterization of a three-element condenser system for soft x ray projection lithography
[DE93-019916] p 1990 N94-21985
REFLEXES
Area postrema ablations in cats: Evidence for separate neural routes for motion- and xylazine-induced CTA and emesis p 1887 N94-21906
Role of the area postrema in three putative measures of motion sickness in the rat p 1888 N94-21912
REFRACTION
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Optical fibers and Fluorosensors having improved power efficiency and methods of producing same
[NASA-CASE-LAR-14525-1-CU] p 1986 N94-20378
REFRACTIVITY
Refractive index structure in the lower atmosphere
[AD-A270935] p 1854 N94-19899
Variable wavelength, variable angle ellipsometry including a sensitivities correlation test p 1710 N94-20978
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
Refractive index behaviour of phosphorus-doped planar silica waveguides, appendix 7 p 1989 N94-21601
Precision prism coupling setup applied to measure planar silica films on silicon, appendix 9 p 1989 N94-21603
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG)
[DE93-040546] p 1709 N94-21970
Extended range modified gradient technique for profile inversion (extended version of report Et/Em-1992-8)
[PB93-215242] p 1742 N94-22346
REFRACTORIES
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20657
REFRACTORY COATINGS
Performance of carbon-based hot frit substrates
[DE94-000509] p 1676 N94-21754
Compilation of reinforced carbon-carbon transatlantic abort landing arc jet test results
[NASA-TM-104778] p 1676 N94-21834
REFRACTORY MATERIALS
Phthalonitrile prepolymer as high temperature sizing material for composite fibers
[AD-D015912] p 1672 N94-20010
Development of improved processing and evaluation methods for high reliability structural ceramics for advanced heat engine applications, phase 1
[DE93-040528] p 1702 N94-20481
Petrography and origin of refractory inclusions from the Murray and Murchison C2 chondrites p 2084 N94-20770
Trace element compositions of spinel-rich refractory inclusions from the Murchison meteorite p 2086 N94-20897
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526
REFRACTORY METAL ALLOYS
Strengthening and toughening in refractory metal alloys
[DE93-019942] p 1695 N94-21966
REFRACTORY METALS
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093
REFRIGERANTS
Absorption heat pump for space applications
[NASA-CR-194693] p 1845 N94-20066
Alternative refrigerants and refrigeration cycles for domestic refrigerators
[DE93-040481] p 1714 N94-20099
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
The laser and its applications on environment and biotechnology research
[DE94-000376] p 1820 N94-21957
REFRIGERATING
Alternative refrigerants and refrigeration cycles for domestic refrigerators
[DE93-040481] p 1714 N94-20099
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
A novel scheme to handle highly pulsed loads with a standard helium refrigerator
[DE93-019617] p 1799 N94-20263
REFRIGERATORS
Alternative refrigerants and refrigeration cycles for domestic refrigerators
[DE93-040481] p 1714 N94-20099
A novel scheme to handle highly pulsed loads with a standard helium refrigerator
[DE93-019617] p 1799 N94-20263
REGENERATION (ENGINEERING)
Performance calculations and research direction for a water enhanced regenerative gas turbine cycle
[DE93-019666] p 1826 N94-21983
REGENERATORS
A low cost alternative to high performance PCM bit synchronizers p 1813 N94-21347

Performance calculations and research direction for a water enhanced regenerative gas turbine cycle
[DE93-019866] p 1826 N94-21983

REGIONAL PLANNING

The 7th Brazilian Remote Sensing Symposium, volume 1 p 1838 N94-20953

Application of SPOT to GIS/LIS in land capability evaluation for regional planning of JAICO semi-arid region of Piaui, Brazil p 1838 N94-20955

REGISTERS (COMPUTERS)

A 20 MHz CMOS reorder buffer for a superscalar microprocessor p 1764 N94-21700

REGOLITH

The distribution of ground ice on Mars p 2090 N94-20394

The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640

The coherent backscattering opposition effect p 1991 N94-20646

Characterization of Minnesota lunar simulant for plant growth p 1897 N94-20665

Abundance and composition of solar KR in the H3-H6 chondrite ACFER111 p 1684 N94-20676

Evaluation of lunar rocks and soils for resource utilization: Detailed image analysis of raw materials and beneficiated products p 2126 N94-20820

Regolith breccia consisting of H and LL chondrite mixture p 2080 N94-20892

Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663

Early Mars: The inextricable link between internal and external influences on valley network formation p 2146 N94-21681

Determination of Martian soil mineralogy and water content using the Thermal Analyzer for Planetary Soils (TAPS) p 1812 N94-22433

REGRESSION ANALYSIS

Statistical analysis of a reciprocal translocations data base
[RR-900-I] p 1963 N94-20165

Thermal diffusivity measurements by photothermal laser beam deflection (PTD): Data analysis using the Levenberg-Marquardt algorithm p 1820 N94-21006

On estimation and testing in Poisson regression models with over-dispersion
[MEMO-1083] p 1963 N94-21076

An evaluation of artificial neural network modeling for manpower analysis
[AD-A273001] p 1945 N94-21269

The European Southern Observatory-MIDAS table file system p 2048 N94-22518

REGULARITY

Large deviations behavior of counting processes and their inverses
[AD-A271142] p 1939 N94-19909

REGULATORS

Optimal control of the tip of a flexible arm p 1794 N94-22256

REINFORCED PLASTICS

A study of the structural stability of an unbalanced sandwich composite configuration
[AD-A272496] p 1675 N94-21431

Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542

Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008

REINFORCEMENT (STRUCTURES)

Thermally activated retainer means utilizing shape memory alloy
[NASA-CASE-MSC-21793-1] p 1654 N94-20304

REINFORCING FIBERS

Biotechnology and composite materials
[AD-A264278] p 1673 N94-20327

Fiber reinforced thermosetting resin composition with coated fibers for improved toughness
[CA-PATENT-1,306,320] p 1674 N94-21040

Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542

Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008

REINFORCING MATERIALS

Strength and toughness improvement of silicide intermetallics by nanophase and microphase reinforcements
[AD-A272914] p 1692 N94-21320

RELATIVISTIC EFFECTS

The quantum structure of matter grand challenge project: Large-scale 3-D solutions in relativistic quantum dynamics
[DE94-000328] p 1960 N94-21955

RELATIVISTIC ELECTRON BEAMS

The angular velocity spread of REB induced by magnetic field discontinuity
[IPPCZ-331] p 1996 N94-21573

Acceleration of solar-flare particles as viewed from their chemical composition p 2006 N94-22672

RELATIVISTIC PARTICLES

A field-based technique for the longitudinal profiling of ultrarelativistic electron or positron bunches down to lengths of less than or equal to 10 microns
[DE93-040954] p 1978 N94-19873

Relativistic shock spectra: A prediction
[NASA-CR-194764] p 2150 N94-21782

On the correspondence limit of relativistic quantum mechanics
[DE93-040939] p 2038 N94-21971

VHE gamma ray generation by radio pulsars p 2007 N94-22680

RELATIVISTIC PLASMAS

General relativistic winds in a black hole magnetosphere p 2002 N94-22644

Relativistically expanding pair plasmas as bursting sources of cosmic gamma rays p 2003 N94-22646

Langmuir microstructures and pulsar radio emission p 2007 N94-22678

Asymptotic structure of magnetically driven MHD wind p 2008 N94-22682

RELATIVISTIC THEORY

Relativistic calculations of the superheavy nucleus (sup 298)114
[KVI-969] p 1971 N94-20119

Relativistic shock spectra: A prediction
[NASA-CR-194764] p 2150 N94-21782

On the correspondence limit of relativistic quantum mechanics
[DE93-040939] p 2038 N94-21971

RELATIVISTIC VELOCITY

Restoring locality with faster-than-light velocities
[DE93-040926] p 2038 N94-22010

RELAXATION METHOD (MATHEMATICS)

Optimal convolution SOR acceleration of waveform relaxation with application to semiconductor device simulation p 1922 N94-21475

A multigrid method for steady Euler equations on unstructured adaptive grids p 1957 N94-21476

Multigrid solution of the Navier-Stokes equations on highly stretched grids with defect correction p 1806 N94-21481

Mapping robust parallel multigrid algorithms to scalable memory architectures p 1922 N94-21483

Parallelizing a highly vectorized multigrid code with zebra relaxation
[CWI-NM-R9225] p 1935 N94-21610

Numerical multigrid software (MGD5M): A parallel multigrid code with a twisted ILLU-relaxation
[CWI-NM-R9226] p 1916 N94-21611

RELIABILITY

Development and testing of a reliability performance index for modular robotic systems
[AD-A271901] p 1942 N94-20488

Lithium batteries: Future batteries p 1752 N94-20630

Army aircraft fire-detection systems operation and reliability
[AD-A271327] p 1641 N94-20912

Automated synthesis and verification of configurable DRAM blocks for ASIC's p 1759 N94-21123

N parallel queueing systems with server breakdown and repair
[CWI-BS-R9236] p 1944 N94-21232

RELIABILITY ANALYSIS

Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053

Development and testing of a reliability performance index for modular robotic systems
[AD-A271901] p 1942 N94-20488

Trends in software reliability modeling p 1788 N94-22214

Recent advances in computational structural reliability analysis methods p 1828 N94-22616

Time-dependent reliability analysis of ceramic engine components p 1828 N94-22619

RELIABILITY ENGINEERING

Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053

Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373

RELIEF MAPS

Topographic mapping using a monopulse SAR system p 1721 N94-20417

Topographic slope from the SAR interferometric phase gradient p 1731 N94-20459

Chronology, eruption duration, and atmospheric contribution of Apollinaris Patera, Mars p 2108 N94-20720

Linear structures on the small inner satellites of Saturn p 2121 N94-20797

Detecting topographical regions in digital terrain maps
[AD-A272889] p 1841 N94-21453

REMANENCE

Reverse polarity magnetized melt rocks from the Chicxulub impact structure, Yucatan Peninsula, Mexico p 1863 N94-20843

REMOTE CONTROL

Digital wireless control system
[DE93-040211] p 1714 N94-19946

Teleoperation with virtual force feedback
[DE93-019406] p 1942 N94-20293

Control vane guidance for a ducted-fan unmanned air vehicle
[AD-A271957] p 1645 N94-20561

Automating the control of robotic systems in unstructured environments
[DE93-040753] p 1946 N94-21929

REMOTE HANDLING

Automating the control of robotic systems in unstructured environments
[DE93-040753] p 1946 N94-21929

REMOTE SENSING

Radar backscatter measurements from simulated sea ice during CRRELEX 1990
[AD-A271034] p 1715 N94-19823

Ionospheric tomography using the FORTE satellite
[DE93-018545] p 1854 N94-19955

Global and regional comparative performance of linear and nonlinear satellite multichannel sea surface temperature algorithms
[AD-A270475] p 1837 N94-20028

Remote sounding of tropospheric minor constituents
[NASA-CR-194265] p 1855 N94-20132

Dynamics Explorer 2: Continued FPI and NACS instrument data analysis and associated scientific activity at the University of Michigan
[NASA-CR-194689] p 1657 N94-20173

The future of remote sensing from space: Civilian satellite systems and applications
[OTA-ISC-558] p 1837 N94-20209

An expert system shell for inferring vegetation characteristics
[NASA-CR-189318] p 1837 N94-20284

Milankovitch insulation forcing and cyclic formation of large-scale glacial, fluvial, and eolian landforms in central Alaska p 2089 N94-20386

Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415

Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418

Advances in spaceborne radar remote sensing p 1723 N94-20424

Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations p 1723 N94-20427

On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428

Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429

Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430

Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433

Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434

C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435

Near grazing scattering from non-Gaussian ocean surfaces p 1726 N94-20438

Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439

Polarimetric thermal emission from rough surfaces p 1727 N94-20441

Simulated retrieval of land surface parameters using multichannel satellite microwave radiometry p 1727 N94-20443

Symmetry in polarimetric remote sensing p 1729 N94-20449

Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters p 1729 N94-20452

A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454

Application of neural network to remote sensing of soil moisture using theoretical polarimetric backscattering coefficients p 1730 N94-20455
Four-dimensional remote sensing of the marine boundary layer with a digital beamforming radar wind profiler
[AD-A270627] p 1882 N94-20564
The application of spaceborne synthetic aperture radar in the maritime environment
[DRA-TM(AWE)-91013] p 1737 N94-20596
Goniospectrometric properties of a white standard p 1684 N94-20664
Visible-infrared properties of controlled laboratory soils p 1685 N94-20689
Thermal infrared remote sensing and Kirchhoff's law: 1. Laboratory measurements p 1685 N94-20733
Convex set and linear mixing model p 1844 N94-20888
The 7th Brazilian Remote Sensing Symposium, volume 1 p 1838 N94-20953
The use of satellite images in Amazonian archaeology: A case study in the Upper Rio Negro Basin p 1838 N94-20954
Application of SPOT to GIS/LIS in land capability evaluation for regional planning of JAICO semi-arid region of Piaui, Brazil p 1838 N94-20955
The 7th Brazilian Remote Sensing Symposium, volume 2 p 1838 N94-20956
The 7th Brazilian Remote Sensing Symposium, volume 3 p 1839 N94-20960
Sunphotometer network for monitoring aerosol properties in the Brazilian Amazon p 1839 N94-20961
On the origin and evolution of circular forms observed in remote sensing images of the Rio de Janeiro State, Brazil p 1839 N94-20963
Evaluation of C-band SAR data from SAREX 1992: Tapajos study site p 1839 N94-20964
The 7th Brazilian Remote Sensing Symposium, volume4 p 1840 N94-20965
SIMA: An integrated environmental monitoring system p 1840 N94-20967
The development of remote sensing in Brazil and Canada: Comparative case studies p 1840 N94-20968
Rapid estimates of crop production using remote sensing: European experience p 1840 N94-20969
Using NDVI/AVHRR data for crop monitoring and forecasting in South Italy p 1841 N94-20970
Mobility of salt domes
[BCRS-92-08] p 1857 N94-21016
Ocean mapping using satellite radar altimetry
[ETN-93-93470] p 1841 N94-21017
Snow cover measurements and areal assessment of precipitation and soil moisture
[WMO-749] p 1841 N94-21068
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
Obtaining surface optical properties from space-based lidar systems
[AD-A272831] p 1987 N94-21172
Data format standards for civilian remote sensing satellites
[PB93-192920] p 1841 N94-21446
Earth observing scanning polarimeter p 1844 N94-21645
Orbit and sampling requirements: TRMM experience p 1870 N94-21647
Multiorder etalon sounder (MOES) development and test for balloon experiment
[NASA-CR-194730] p 1859 N94-22026
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Microphysical properties of the November 26 cirrus cloud retrieved by Doppler radar/IR radiometer technique p 1873 N94-22304
CIMSS FIRE research activities p 1873 N94-22307
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312
Cloud boundaries during FIRE 2 p 1876 N94-22318
Ground-based passive remote sensing during FIRE IFO 2 p 1844 N94-22319
Surface-induced brightness temperature variations and their effects on detecting thin cirrus clouds using IR emission channels in the 8-12 micrometer region p 1880 N94-22341
Remote sensing estimates of cirrus particle size for tropical and midlatitude cirrus: Hexagonal crystals and ice spheres p 1880 N94-22342
Studies in remotely sensed geophysical parameter retrieval and analysis
[NASA-CR-194768] p 1842 N94-22374
Chromaticity analysis of LANDSAT multispectral scanner and thematic mapper imagery of Chilko Lake, British Columbia, using a theoretical optical water quality model
[ISBN-0-315-63832-X] p 1843 N94-22422

REMOTE SENSORS
Advances in spaceborne radar remote sensing p 1723 N94-20424
Predicting LANDSAT MSS endmember signatures from corresponding higher resolution TM fraction images p 1839 N94-20962
Observations of multi-layered clouds using K-band radar p 1874 N94-22311

REMOTELY PILOTED VEHICLES
Control vane guidance for a ducted-fan unmanned air vehicle
[AD-A271957] p 1645 N94-20561
Design, fabrication and test of a vertical attitude takeoff and landing unmanned air vehicle
[AD-A273003] p 1646 N94-21283
Low-cost Unmanned Air Vehicle (UAV) for oceanographic research
[AD-A273103] p 1646 N94-21507
Data link development for the archytas vertical takeoff and landing transitional flight unmanned aerial vehicle
[AD-A272499] p 1646 N94-21548

REMOVAL
Focused-ion-beam material removal rates
[AD-A270852] p 1713 N94-19834

REPORTS
Listing of approved recurring information requirements
[AD-A271673] p 2042 N94-20919

REPRESENTATIONS
Representation of spoken words in a self-organizing neural net p 1940 N94-20243
Representation of idioms in connectionist models p 1940 N94-20247
A connectionist representation for phrase structures p 1941 N94-20249
An exploration of clause boundary effects in SRN representations p 1937 N94-20253

REPUBLIC OF SOUTH AFRICA
The age of the Pretoria Saltpan impact crater, South Africa p 1863 N94-20798

REQUIREMENTS
Reference manual for a Requirements Specification Language (RSL), version 2.0
[NASA-CR-191460] p 1898 N94-20039
Listing of approved recurring information requirements
[AD-A271673] p 2042 N94-20919

RESEARCH AIRCRAFT
Experiments with a fluid deicing system for cleaning laminar wings p 1640 N94-22601

RESEARCH AND DEVELOPMENT
NASA's Education Program
[NASA-EP-297] p 2038 N94-20129
Documents on the history of aeronautical and space research in Germany, 1900 - 1970
[DLR-MITT-92-08] p 2152 N94-20543
High energy physics program at Texas A/M University
[DE93-041089] p 1960 N94-20933
Aerospace: Facts and figures, 1992-1993
[AD-A272571] p 1635 N94-21419
Index to 1992 NASA Tech Briefs, volume 16, numbers 1-12
[NASA-TM-109377] p 2053 N94-21736
Index to 1991 NASA Tech Briefs, volume 15, numbers 1-12
[NASA-TM-109376] p 2053 N94-21737
Cumulative index to NASA Tech Briefs, 1986-1990, volumes 10-14
[NASA-TM-109378] p 2054 N94-21738
Application development in a PC/LAN environment p 1923 N94-22067
NASA Propulsion Engineering Research Center, volume 1
[NASA-CR-194721-VOL-1] p 1671 N94-22428

RESEARCH FACILITIES
Activities of National Inst. for Aviation Research
[NIAR-93-16] p 2151 N94-20150
Center for neural engineering
[AD-A271164] p 1890 N94-20185
National Synchrotron Light Source user's manual: Guide to the VUV and x ray beamlines
[DE93-019564] p 2015 N94-20260
The National High Magnetic Field Laboratory, a user facility in support of research in high magnetic fields
[DE93-040145] p 1714 N94-20278
Hypervelocity impact studies at CEG: Experimental and numerical capabilities p 1684 N94-21397
A FET-switched induction accelerator cell
[DE93-019604] p 1789 N94-21838
Chemistry and materials science
[DE94-001449] p 2152 N94-21858

RESEARCH MANAGEMENT
Neural network studies
[AD-A271593] p 1943 N94-20947

RESERVOIRS
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351
Current situation in developing petroleum substituting energy (the United Kingdom)
[DE94-714897] p 1713 N94-22091

RESIDUAL GAS
Outgassing rate of Reemay Spunbonded Polyester and DuPont Double Aluminized Mylar
[DE93-040015] p 1699 N94-19973
Residual atmosphere in the FRECOPA experiment and degassing of materials p 1660 N94-21374

RESIDUAL STRESS
Strengthening of NiAl matrix composites
[AD-A271491] p 1674 N94-20550
Benefits of thread rolling process to the stress corrosion cracking and fatigue resistance of high strength fasteners
[DE93-040438] p 1833 N94-22001
Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618

RESIDUES
Low-latency digital frequency synthesizer using the residue number system p 1759 N94-21121

RESINS
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021

RESISTANCE HEATING
A spheromak ignition experiment reusing Mirror Fusion Test Facility (MFTF) equipment
[DE94-001856] p 2034 N94-22050

RESOLUTION
A guide to resolving disputes over contractor delay entitlements
[AD-A272022] p 2039 N94-21444

RESONANCE
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
On the theory of morphology-dependent resonances: Shape resonances, width formulas, and graphical representations
[AD-A272279] p 2037 N94-20945
Three-wave resonant interaction in a thin layer
[AD-A272331] p 1994 N94-21039
Search for excited quarks in p(-p) collisions at the square root of s = 1.8 TeV
[DE93-019910] p 1975 N94-21840
Low p(sub T) phenomena observed in high energy nuclear collisions
[DE94-000825] p 1982 N94-21849

RESONANCE SCATTERING
On the theory of morphology-dependent resonances: Shape resonances, width formulas, and graphical representations
[AD-A272279] p 2037 N94-20945

RESONANT FREQUENCIES
Measuring liquid properties with smooth and textured-surface resonators
[DE93-019433] p 1749 N94-20054
Coplanar waveguide radial line stub p 1733 N94-20503
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
A vibration model for centrifugal contactors
[DE93-040645] p 1833 N94-21927
Improvement of the performance of IMPATT oscillators through appropriate modification of resonant-cap activity p 1782 N94-22179
Study of TE(1-delta) mode in open dielectric resonators by a finite difference time domain method p 1747 N94-22253
Aperture coupling of circular cylindrical dielectric resonator antenna
[ISBN-0-315-60632-0] p 1743 N94-22409

RESONANT TUNNELING
Investigation of quantum effects in heterostructures
[AD-A270938] p 2011 N94-19817
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470

RESONANT VIBRATION
On the theory of morphology-dependent resonances: Shape resonances, width formulas, and graphical representations
[AD-A272279] p 2037 N94-20945

RESONATORS
Measuring liquid properties with smooth and textured-surface resonators
[DE93-019433] p 1749 N94-20054
TlCaBaCuO high Tc superconducting microstrip ring resonators designed for 12 GHz p 1735 N94-20516
Study of TE(1-delta) mode in open dielectric resonators by a finite difference time domain method p 1747 N94-22253
RESOURCE ALLOCATION
Optimal repairman assignment in two maintenance models which are equivalent to routing models with early decisions
[CWI-BS-R9301] p 1930 N94-21234
Generating and evaluating alternate schedules p 1933 N94-21336
Computer-aided design system for objects location and reservoir with dispersed resource evolution investigation p 1923 N94-22064
RESPONSE TIME (COMPUTERS)
A conceptual database design and performance analysis of the MILSATCOM requirements database
[AD-A272672] p 1658 N94-21217
RESTORATION
Restoration of HST images with missing data p 2057 N94-22439
HST image restoration: A comparison of pre- and post-servicing mission results p 1925 N94-22478
First MEM task IRMEO in IRAF p 1928 N94-22551
RETARDING
Magnetic insulation of secondary electrons in plasma source ion implantation
[DE93-040106] p 1997 N94-21988
REUSABLE HEAT SHIELDING
Thermally activated retainer means utilizing shape memory alloy
[NASA-CASE-MSC-21793-1] p 1654 N94-20304
REVERSE ENGINEERING
A proposal for reverse engineering CASE tools to support new software development
[DE93-040207] p 1906 N94-20281
REYNOLDS STRESS
Shear flow generation by Reynolds stress and suppression of resistive g-modes
[DE93-040911] p 1995 N94-21514
New results on the realizability of Reynolds stress turbulence closures
[NASA-CR-191548] p 1804 N94-21875
RHENIUM
Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold
[DE93-041126] p 1694 N94-21937
RHENIUM COMPOUNDS
Photochemical approaches to conversion of light to electricity or fuel
[DE94-001650] p 1849 N94-22048
RHEOLOGY
Microscopic modeling of tribological and interfacial phenomena
[AD-A271864] p 1823 N94-20464
Thermal and rheological controls on magma migration in dikes: Examples from the east rift zone of Kilauea volcano, Hawaii p 1862 N94-20673
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690
RHODIUM ALLOYS
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987
RHYOLITE
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
RIBLETS
Measurement Technology for Flight Tests
[ILR-MITT-256(1991)] p 1639 N94-22597
Riblet boundary layer measurements of an A-310 fuselage with Pitot combs p 1640 N94-22605
RIEMANN MANIFOLD
Vanishing theorem on arithmetic surfaces
[PB93-215461] p 1961 N94-22263
Non commutative geometry and physics
[PB93-215499] p 1961 N94-22264
RIGID STRUCTURES
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
RIMS
Characterization of the Marquez Dome buried impact crater using gravity and magnetic data p 1863 N94-20882
RING STRUCTURES
Morphologic classes of impact basins on Venus p 2137 N94-20883
RINGS
The IRAF Fabry-Perot analysis package: Ring fitting p 2048 N94-22527
RISK
Manual of DRANC (release 1.1): A computer program for the Dutch risk assessment of new chemical substances
[PB93-194827] p 1851 N94-19998
Meteoroids and debris impact risk assessment on Columbus and Hermes using a realistic geometrical analysis tool p 1662 N94-21388
MLS signal-in-space category 3 landing hazard analysis p 1644 N94-22134
ROADS
Traffic noise in a roundabout way p 1966 N94-21799
STAR-1 SAR road extraction using texture analysis and mathematical morphology
[ISBN-0-315-83255-X] p 1843 N94-22429
ROBOT ARMS
Research in lightweight elastic robotic arms
[AD-A270846] p 1821 N94-19833
Interactive simulation package for coupled bending and torsional vibrations in flexible robot arms
[MEMO-1089] p 1944 N94-21140
Optimal control of the tip of a flexible arm p 1794 N94-22256
ROBOT CONTROL
Research in lightweight elastic robotic arms
[AD-A270846] p 1821 N94-19833
Robot skill learning and the effects of basis function choice
[TR-437] p 1939 N94-20135
Self-organization via active exploration in robotic applications. Phase 2: Hybrid hardware prototype
[NASA-CR-194723] p 1939 N94-20212
Climbing robot — caterpillar design
[NASA-CASE-GSC-13442-1] p 1823 N94-20494
Internal camera calibration using rotation and geometric shapes
[AD-A272718] p 1808 N94-21167
Automating the control of robotic systems in unstructured environments
[DE93-040753] p 1946 N94-21929
An adaptive control to enable a robot to follow Cartesian trajectories p 1790 N94-22229
A robust adaptive control design for flexible joint manipulators p 1790 N94-22230
An algorithm for the interference detection among polygonal surfaces p 1791 N94-22239
Analytical representation of working articulation space of a plane manipulator in an encumbered environment p 1792 N94-22241
Control of multiple robot manipulators with optimal force distribution p 1794 N94-22255
Optimal control of the tip of a flexible arm p 1794 N94-22256
Robot link and contact surface dynamic interaction: An experimental study of contact instability
[ISBN-0-315-83439-0] p 1827 N94-22578
ROBOT DYNAMICS
Robot skill learning and the effects of basis function choice
[TR-437] p 1939 N94-20135
Climbing robot — caterpillar design
[NASA-CASE-GSC-13442-1] p 1823 N94-20494
Model-based automatic generation of grasping regions
[NASA-TM-104785] p 1946 N94-21550
An adaptive control to enable a robot to follow Cartesian trajectories p 1790 N94-22229
ROBOT SENSORS
Head-centered orientation strategies in animate vision
[TR-442] p 1894 N94-20520
Sensor integration and data fusion for object localization in robotic workcells p 1774 N94-22130
Ultrasonic sensor vision in robotics p 1775 N94-22131
ROBOTICS
Research in lightweight elastic robotic arms
[AD-A270846] p 1821 N94-19833
Robot skill learning and the effects of basis function choice
[TR-437] p 1939 N94-20135
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Self-organization via active exploration in robotic applications. Phase 2: Hybrid hardware prototype
[NASA-CR-194723] p 1939 N94-20212
Bladder operated robotic joint
[NASA-CASE-MFS-28682-1] p 1701 N94-20359
Development and testing of a reliability performance index for modular robotic systems
[AD-A271901] p 1942 N94-20488
Head-centered orientation strategies in animate vision
[TR-442] p 1894 N94-20520
Visual tracking
[AD-A271686] p 1943 N94-20920
Graphical interactive planning of robotic applications with support of integrated simulation
[ETN-93-93793] p 1944 N94-21057
Simulation of tripod gaits for a hexapod underwater walking machine
[AD-A271719] p 1945 N94-21355
NEP Early Flight program: System performance and development considerations
[NASA-TM-106415] p 1654 N94-21570
Robotic concepts for operation in barren terrain
[DE93-040539] p 1946 N94-21925
Automating the control of robotic systems in unstructured environments
[DE93-040753] p 1946 N94-21929
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101
Optimal object modelling for an active-vision system p 1771 N94-22107
Ultrasonic sensor vision in robotics p 1775 N94-22131
Dynamic analyses of flexible robotic manipulators
[ISBN-0-315-59251-6] p 1827 N94-22421
Mobile robot perception in unknown and unstructured dynamic voxel environments
[ISBN-0-315-83951-1] p 1947 N94-22591
ROBOTS
Robot skill learning and the effects of basis function choice
[TR-437] p 1939 N94-20135
Climbing robot — caterpillar design
[NASA-CASE-GSC-13442-1] p 1823 N94-20494
Internal camera calibration using rotation and geometric shapes
[AD-A272718] p 1808 N94-21167
High dimension action spaces in robot skill learning
[TR-458] p 1945 N94-21317
Simulation of tripod gaits for a hexapod underwater walking machine
[AD-A271719] p 1945 N94-21355
Low energy CMOS for space applications p 1768 N94-21735
Determining the 3-D structure and motion of objects using a scanning laser range sensor
[NASA-CR-194745] p 1818 N94-21817
Robotic concepts for operation in barren terrain
[DE93-040539] p 1946 N94-21925
Sensor integration and data fusion for object localization in robotic workcells p 1774 N94-22130
An adaptive control to enable a robot to follow Cartesian trajectories p 1790 N94-22229
Control of multiple robot manipulators with optimal force distribution p 1794 N94-22255
Optimal control of the tip of a flexible arm p 1794 N94-22256
Robot link and contact surface dynamic interaction: An experimental study of contact instability
[ISBN-0-315-83439-0] p 1827 N94-22578
Mobile robot perception in unknown and unstructured dynamic voxel environments
[ISBN-0-315-83951-1] p 1947 N94-22591
ROBUSTNESS (MATHEMATICS)
Asymptotics of the GLRT for the disorder problem in diffusion processes
[INRIA-RR-1735] p 1951 N94-20227
Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids p 1724 N94-20431
Numerical study of a multigrid method with four smoothing methods for the incompressible Navier-Stokes equations in general coordinates p 1806 N94-21487
A comparative robustness evaluation of feedforward neurofilters
[NASA-TM-106440] p 1650 N94-21742
A robust adaptive control design for flexible joint manipulators p 1790 N94-22230
Robust unstructured grid generation with VGRID p 1919 N94-22359
An advancing-front Delaunay-triangulation algorithm designed for robustness p 1920 N94-22362
A robust quality control system for GPS navigation and kinematic positioning
[ISBN-0-315-83148-0] p 1644 N94-22427
ROCK INTRUSIONS
Thermal and rheological controls on magma migration in dikes: Examples from the east rift zone of Kilauea volcano, Hawaii p 1862 N94-20673
ROCKET ENGINE DESIGN
Future technical directions p 1668 N94-20072
The Vulcain cryogenic engine p 1668 N94-20077
Dynamics of face seals for high speed turbomachinery p 1655 N94-21796

ROCKET ENGINES
Spacecraft Propulsion
[VKI-LS-1993-01] p 1667 N94-20068
Cryogenic propellant rocket engine problems
p 1666 N94-20076
Liquid fuel injection elements for rocket engines
[NASA-CASE-MFS-28547-1] p 1669 N94-20370
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617
Dynamics of face seals for high speed turbomachinery
p 1655 N94-21796
ROCKET EXHAUST
The NRL LACE program
[AD-A270861] p 1657 N94-19896
Parameters affecting hydrogen chloride measurements
[AD-A271326] p 1851 N94-20025
Dual-beam multiple wavelength light transmittance measurement for particle sizing in rocket motor plumes
[AD-A272491] p 1670 N94-21208
ROCKET NOZZLES
A tutorial on the aero/thermodynamical design of liquid-propellant rocket engine nozzles
p 1668 N94-20074
ROCKET OXIDIZERS
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
ROCKET THRUST
Liquid rocket propulsion. Theory p 1667 N94-20069
Space Shuttle Main Engine. Overview
p 1667 N94-20070
ROCKET VEHICLES
Rockets: Physical science teacher's guide with activities
[NASA-EP-291] p 1669 N94-20226
ROCKS
Thermal conductivity measurements of particulate materials under Martian conditions p 1685 N94-20703
Reverse polarity magnetized melt rocks from the Chicxulub impact structure, Yucatan Peninsula, Mexico
p 1863 N94-20843
Dynamic response of multiphase porous media
[AD-A272915] p 1831 N94-21219
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006
RODS
Dynamic, multiaxial impact response of confined and unconfined ceramic rods
[DE93-040057] p 1829 N94-19824
ROLLING CONTACT LOADS
The causes of contact noise
[REPT-92-100] p 1822 N94-20157
ROOM TEMPERATURE
Static ultra-high pressure study of lanthanide and actinide metals using a diamond-anvil cell
[DE94-000369] p 1693 N94-21656
Test results of two high temperature superconducting sample coils
[DE94-000496] p 2035 N94-22570
ROOT-MEAN-SQUARE ERRORS
Orbit and sampling requirements: TRMM experience
p 1870 N94-21647
ROSAT MISSION
A deep x ray survey in the Lockman hole and the soft x ray log N - log S
[NASA-CR-194698] p 2054 N94-20174
X ray archeology in the Coma cluster
[NASA-CR-194799] p 2054 N94-20175
The x ray halo of Cen X-3
[NASA-CR-189309] p 2055 N94-21295
ROSAT implementation of a proposed multi-mission x ray data format p 2047 N94-22462
ROSAT data analysis with EXSAS
p 2080 N94-22555
Results from ROSAT p 2000 N94-22630
ROTARY WING AIRCRAFT
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[DOT/FAA/RD-93/22] p 1642 N94-20051
Rotorcraft noise: Status and recent developments
[NASA-CR-194761] p 1967 N94-20523
ROTARY WINGS
An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight
[AD-A270201] p 1636 N94-20486
Rotorcraft noise: Status and recent developments
[NASA-CR-194761] p 1967 N94-20523
The modern rotor aerodynamic limits survey: A report and data survey
[NASA-TM-4446] p 1635 N94-21490
ROTATING GENERATORS
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-194728] p 1856 N94-20537
ROTATING PLASMAS
Finite Larmor radius flute mode theory with end loss
[DE93-040914] p 1991 N94-19872
Neoclassical kinetic theory near an X-point: Plateau regime
[DE93-019825] p 1951 N94-20224
Gravitational instability of magnetized filamentary clouds. 2: Rotation p 2009 N94-22689
ROTATING SHAFTS
Rotary encoding device using polygonal mirror with diffraction gratings on each facet
[NASA-CASE-GSC-13543-1] p 1985 N94-20240
Shaft mount for data coupler system
[NASA-CASE-LAR-13805-1] p 1822 N94-20365
ROTATING SPHERES
Double diffusion convection in a rotating spherical shell p 2006 N94-22666
ROTATION
Turntable mechanism
[NASA-CASE-MFS-28522-1] p 1823 N94-20380
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment
[AD-A272851] p 1802 N94-21193
Method for design rotation
[AD-A272440] p 1911 N94-21204
Relationship of area postrema to three putative measures of motion sickness p 1885 N94-21900
Motion sickness elicited by passive rotation in squirrel monkeys p 1887 N94-21905
Gravitational instability of magnetized filamentary clouds. 2: Rotation p 2009 N94-22689
ROTATIONAL STATES
High resolution infrared spectroscopy of formamide and deuterated formamide in a molecular beam
[AD-A271986] p 1973 N94-20618
ROTOR AERODYNAMICS
The fluid mechanics of vortex cutting by a blade
[AD-A270932] p 1636 N94-20043
An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight
[AD-A270201] p 1636 N94-20486
ROTOR BLADES
The fluid mechanics of vortex cutting by a blade
[AD-A270932] p 1636 N94-20043
ROTOR BLADES (TURBOMACHINERY)
Near wake measurements on a rotor model with Mie-vanes in the Delft open jet tunnel
[PB93-215382] p 1638 N94-22260
ROTORS
System and method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-1] p 1801 N94-20588
An application of the Cerebellar Model Articulation Controller for a switched reluctance rotor position estimator
[AD-A271769] p 1943 N94-20926
Brush seal bristle flexure and hard-rub characteristics
p 1654 N94-21791
Operation of a test bed axial-gap brushless dc rotor with a superconducting stator
[DE93-019167] p 1769 N94-21830
ROUTES
A distributed reinforcement learning scheme for network routing
[AD-A270600] p 1938 N94-19845
Next Generation Weather Radar (NEXRAD) Principal User Processor (PUP) Operational Test and Evaluation (OT/E)
[AD-A273075] p 1868 N94-21519
ROVING VEHICLES
Robotic concepts for operation in barren terrain
[DE93-040539] p 1946 N94-21925
RUBBER
Stress-induced cracking of fluorocarbon rubber MTL-0002 after exposure to DS-2
[AD-A271753] p 1705 N94-21302
The simulation of action of some space environment factors on Teflon and on rubber materials
p 1661 N94-21380
RUBIDIUM COMPOUNDS
Fullerene derivatives and fullerene superconductors
[DE93-019568] p 2031 N94-21871
RUN TIME (COMPUTERS)
Proving run-time properties of general programs w.r.t. constructive negation
[CWI-CS-R9245] p 1909 N94-21025
RUNGE-KUTTA METHOD
Adaptive grids for quasilinear parabolic systems in one space dimension
[ETN-93-93611] p 1954 N94-21137
Butcher-Kuntzmann methods for nonstiff problems on parallel computers
[CWI-NM-R9305] p 1935 N94-21493
Users manual for the NASA Lewis three-dimensional ice accretion code (LEWICE 3D)
[NASA-TM-105974] p 1642 N94-21590
Modelling short bent, graded index dielectric slab waveguides
[PB93-215283] p 1742 N94-22349
RUNWAYS
Notes on Antarctic aviation
[AD-A273018] p 1651 N94-21239
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277
Parallel runway requirement analysis study. Volume 2: Simulation manual
[NASA-CR-191549-VOL-2] p 1644 N94-22278
RUPTURING
Head-on collision of drops: A numerical investigation
[NASA-TM-106394] p 1798 N94-20167
RUTHENIUM
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982
RUTHENIUM ALLOYS
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987
RUTILE
Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927

S

S MATRIX THEORY
New relativistic S-matrix results for scattering -- beyond the usual anomalous factors/beyond impulse approximation
[DE93-019148] p 1971 N94-20096
SADDLE POINTS
Ab initio potential energy surface for the H + OCS reaction
[AD-A270577] p 1698 N94-19947
SAFETY
Current status of environmental, health, and safety issues of nickel metal-hydride batteries for electric vehicles
[DE93-017079] p 1748 N94-19902
Female security as a general mobility condition
[ISBN-3-79-831536-1] p 2039 N94-20153
The FY1992 survey on commercialization of Stirling engine utilization equipment
[DE94-707416] p 1849 N94-22029
SAFETY DEVICES
Evaluation of head injury criteria
[NIAR-93-2] p 1890 N94-20190
SAGE SATELLITE
Stratospheric Aerosol and Gas Experiment (SAGE 3)
p 1869 N94-21644
SALINITY
On the sources of North Atlantic deep water
[AD-A270854] p 1861 N94-19895
Briny lakes on early Mars? Terrestrial intracrater playas and Martian candidates p 2145 N94-21675
SALT BEDS
Mobility of salt domes
[BCRS-92-08] p 1857 N94-21016
SAMARIUM ISOTOPES
Examination of low level magnetic dipole intensities in the transition nuclei Sm-148, Sm-150, Sm-152 and Sm-154, with inelastic photon scattering at S-DALINAC
[ETN-93-95069] p 1971 N94-20030
The Sm-(146,147)-Nd-(142,143) formation interval for the lunar mantle and implications for lunar evolution
p 2097 N94-20663
Magnesian anorthosites from the western highlands of the Moon: Isotope geochemistry and petrogenesis
p 2118 N94-20779
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB)
[CONTRIB-5241(804)] p 2084 N94-20795
SAMPLED DATA SYSTEMS
An 18 bit 50 kHz ADC for low earth orbit
p 1764 N94-21702
SAMPLERS
Passive Cryogenic Sampler
[DE94-000918] p 1811 N94-22392
SAMPLING
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049
Development and demonstration of a personal monitoring system for exposure to hydrogen fluoride
[DE93-041273] p 1891 N94-20935
Green Sheet project: Dye sheet evolution
[AD-A272019] p 1883 N94-21443
Orbit and sampling requirements: TRMM experience
p 1870 N94-21647

SANDS
Analysis of a sandstorm weather process-translation
[AD-A272959] p 1867 N94-21250
SANDWICH STRUCTURES
A study of the structural stability of an unbalanced sandwich composite configuration
[AD-A272496] p 1675 N94-21431
SAS
SkiCAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546
SATELLITE ALTIMETRY
Scattering by Venus' surface p 2117 N94-20771
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
Ocean mapping using satellite radar altimetry
[ETN-93-93470] p 1841 N94-21017
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222
Comparison of satellite-derived velocity fields in the coastal transition zone
[AD-A272565] p 1883 N94-21360
Influence of geoid model uncertainty on the determination of ocean circulation with satellite altimetry
[PB93-219301] p 1842 N94-22097
SATELLITE ATTITUDE CONTROL
Method of orienting a synchronous satellite
[CA-PATENT-1,305,772] p 1658 N94-21041
SATELLITE COMMUNICATION
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952
Optimization of a satellite localization and message sending system
[ETN-93-94448] p 1737 N94-20592
A compact, portable EHF/SHF antenna for advanced SCAMP
[AD-A272614] p 1739 N94-21211
Mission Operations Support Area (MOSA) for ground network support p 1932 N94-21331
Space network scheduling benchmark: A proof-of-concept process for technology transfer p 1932 N94-21332
The Automated Conflict Resolution System (ACRS) p 1744 N94-21341
Satellite Communication Hardware Emulation System (SCHES) p 1744 N94-21344
Military satellite communications decision support system requirements analysis and user interface design
[AD-A273047] p 1740 N94-21436
A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites
[NASA-CR-191200] p 1762 N94-21566
CREIR: A multiaccess protocol for on-board processing satellite systems p 1780 N94-22168
Timing recovery in the channel processor of a digital group demodulator p 1780 N94-22169
TDMA satellite communication systems for ISDN services p 1746 N94-22171
A consideration of the integration of terrestrial and satellite mobile systems p 1746 N94-22172
Visibility considerations in frequency sharing with low Earth orbit satellites p 1746 N94-22187
Inclined orbits and interference to stationary service and to stationary service by satellite p 1653 N94-22188
File transfer performance in LAN interconnection through a satellite channel p 1746 N94-22209
SATELLITE CONFIGURATIONS
The EXOSAT operational experience
[ESA-STM-248] p 1657 N94-20235
SATELLITE CONTROL
Analysis of the TDRS multiple access system for possible use as an attitude control system sensor p 1666 N94-21338
SATELLITE IMAGERY
The analysis of global cloud and radiation data for the study of cloud-climate interactions
[NASA-CR-193388] p 1865 N94-20535
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1866 N94-20559
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
The 7th Brazilian Remote Sensing Symposium, volume 1 p 1838 N94-20953
The use of satellite images in Amazonian archaeology: A case study in the Upper Rio Negro Basin p 1838 N94-20954
Change detection on land use and rainforest cover at Paragominas region, Brazilian Amazon p 1838 N94-20957
Linear mixing model applied to AVHRR LAC data p 1838 N94-20958
The 7th Brazilian Remote Sensing Symposium, volume 3 p 1839 N94-20960
Predicting LANDSAT MSS endmember signatures from corresponding higher resolution TM fraction images p 1839 N94-20962
Evaluation of C-band SAR data from SAREX 1992: Tapajos study site p 1839 N94-20964
Comparison of radiation and cloud parameters derived from satellite and aircraft measurements during FIRE 2 cirrus IFO p 1872 N94-22299
Managing an archive of weather satellite images p 2048 N94-22525
SATELLITE INSTRUMENTS
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952
The EXOSAT operational experience
[ESA-STM-248] p 1657 N94-20235
Comparison of radiation and cloud parameters derived from satellite and aircraft measurements during FIRE 2 cirrus IFO p 1872 N94-22299
SATELLITE NETWORKS
The NCC project: A quality management perspective p 1828 N94-21324
Software metrics: The key to quality software on the NCC project p 1922 N94-21326
The Test Analysis Retrieval System (TARS): Meeting the challenges of the network's test processes p 1933 N94-21337
On-board closed-loop congestion control for satellite based packet switching networks
[NASA-TM-106446] p 1656 N94-21581
Visibility considerations in frequency sharing with low Earth orbit satellites p 1746 N94-22187
SATELLITE OBSERVATION
Ionospheric tomography using the FORTE satellite
[DE93-018545] p 1854 N94-19955
Global and regional comparative performance of linear and nonlinear satellite multichannel sea surface temperature algorithms
[AD-A270475] p 1837 N94-20028
The future of remote sensing from space: Civilian satellite systems and applications
[OTA-ISC-558] p 1837 N94-20209
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Interferometric detection of freeze-thaw displacements of Alaskan permafrost using ERS-1 data p 1732 N94-20460
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
The analysis of global cloud and radiation data for the study of cloud-climate interactions
[NASA-CR-193388] p 1865 N94-20535
Comparison of satellite-derived velocity fields in the coastal transition zone
[AD-A272565] p 1883 N94-21360
Long-Term Monitoring of Global Climate Forcings and Feedbacks
[NASA-CP-3234] p 1868 N94-21639
Climsat rationale p 1869 N94-21643
Stratospheric Aerosol and Gas Experiment (SAGE 3) p 1869 N94-21644
Earth observing scanning polarimeter p 1844 N94-21645
Orbit and sampling requirements: TRMM experience p 1870 N94-21647
Satellite orbit and data sampling requirements p 1870 N94-21648
Urban applications of satellite remote sensing and GIS analysis
[PB93-202174] p 1842 N94-21855
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
Proceedings of the Workshop on New Generation of Radiation Budget Measurements From Space and Their Use in Climate Modelling and Diagnostic Studies
[MPIM-90] p 1860 N94-22283
Satellite measurements of radiation budget parameters p 1860 N94-22284
ScaRaB and its subsystems p 1860 N94-22285
Use of satellite data for validation of the ECHAM models p 1861 N94-22289
Simulation of clear-sky outgoing longwave radiation over the oceans using operational analysis p 1861 N94-22290
Use of satellite data for validation of operational forecast models and operational analyses p 1861 N94-22291
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
CIMSS FIRE research activities p 1873 N94-22307
Automated cloud classification with a fuzzy logic expert system p 1875 N94-22313
SATELLITE ORBITS
Satellite orbit and data sampling requirements p 1870 N94-21648
Estimability of polar motion using range observations to satellites
[PB93-219319] p 1842 N94-22265
SATELLITE ORIENTATION
Method of orienting a synchronous satellite
[CA-PATENT-1,305,772] p 1658 N94-21041
SATELLITE POWER TRANSMISSION
Power transmission by laser beam from lunar-synchronous satellite
[NASA-TM-4496] p 1669 N94-20102
Method for remotely powering a device such as a lunar rover
[NASA-CASE-LAR-14789-1] p 1824 N94-20587
SATELLITE SOUNDING
Remote sensing of multilevel clouds during FIRE IFO 2 p 1844 N94-22303
Comparison of cloud microphysical parameters derived from surface and satellite measurements during FIRE phase 2 p 1873 N94-22306
Atmospheric parameterization schemes for satellite cloud property retrieval during FIRE IFO 2 p 1874 N94-22312
SATELLITE SURFACES
Diapirs and cantaloupes: Layering and overturn of Triton's crust p 2111 N94-20738
Geology of Galileo Regio quadrangle, Ganymede p 2130 N94-20842
SATELLITE TRACKING
Downlink acquisition and tracking procedures for the ASCAMP satellite communications terminal
[AD-A272912] p 1739 N94-21244
Mathematician Wang Ju
[AD-A267882] p 1912 N94-21255
Enhanced networks operations using the X Window System p 1932 N94-21329
SATELLITE TRANSMISSION
NHK Science and Technical Research Laboratories p 2151 N94-20342
Advanced coding and modulation schemes for TDRSS p 1744 N94-21350
Network command processing system overview p 1935 N94-21351
Comparison of theoretical and simulated performance results for sloppy-slotted Aloha signaling p 1746 N94-22204
SATELLITE-BORNE INSTRUMENTS
Atomic oxygen fluence detector for Bremsat: Scientific and technical description p 1663 N94-21396
Single event phenomena: Testing and prediction p 1763 N94-21696
Low power, CMOS digital autocorrelator spectrometer for spaceborne applications p 1666 N94-21733
ScaRaB and its subsystems p 1860 N94-22285
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485
The application of artificial intelligence to astronomical scheduling problems p 1949 N94-22492
SATELLITE-BORNE RADAR
Ocean mapping using satellite radar altimetry
[ETN-93-93470] p 1841 N94-21017
SATURN RINGS
A study of Saturn's E-ring particles using the Voyager 1 plasma wave instrument
[NASA-CR-194694] p 2088 N94-20048
SATURN SATELLITES
Linear structures on the small inner satellites of Saturn p 2121 N94-20797
SCALE MODELS
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
Structural similitude and design of scaled down laminated models
[NASA-CR-194687] p 1673 N94-20172
Improved ceramic slip casting technique — application to aircraft model fabrication
[NASA-CASE-LAR-14471-1] p 1702 N94-20377
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
SCALING LAWS
Structural similitude and design of scaled down laminated models
[NASA-CR-194687] p 1673 N94-20172
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864

Verification of frequency scaling laws for capacitive rf discharges using two-dimensional simulations
[DE94-001306] p 1999 N94-22595

SCANDIUM
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827

SCANDIUM COMPOUNDS
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335

SCANDIUM OXIDES
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191

SCANNERS
Three dimensional ultrasonic imaging
[DE93-040549] p 1968 N94-22003

SCANNING ELECTRON MICROSCOPY
Asbestos characterization using scanning electron microscopy/light element x ray spectrometry
[AD-A271611] p 1681 N94-21241
The use of backscattered electron imaging mode to assess the effect of fine dispersions on development of superplastic microstructure in Al-Mg alloys
[AD-A272426] p 1691 N94-21258
Some experiments on using backscattered electron and energy dispersive x ray imaging in determination of portland cement clinker phase composition p 1708 N94-21893
A quantitative S.E.M. image analysis of cement paste microstructure p 1708 N94-21894

SCANNING TUNNELING MICROSCOPY
Scanning tunneling microscopy investigations of metal dichalcogenide materials
[AD-A272910] p 2027 N94-21242
Quantitative analysis of scanning tunneling microscopy images for surface structure determination: Sulfur on Re(0001)
[DE93-019235] p 2034 N94-22041

SCATTERING
A new conformal absorbing boundary condition for finite element meshes and parallelization of FEMATS
[NASA-CR-194740] p 1950 N94-20034
A comparative study of an ABC and an artificial absorber for truncating finite element meshes
[NASA-CR-194275] p 1716 N94-20160
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
The effect of dissipative inhomogeneous medium on the statistics of the wave intensity p 1726 N94-20440
A theoretical and numerical study of polarimetric scattering and emission from random rough surfaces with anisotropic directional spectrum p 1730 N94-20454
Single and double ionization of helium by high-energy photon impact
[DE94-000381] p 1975 N94-21785
Radiation and scattering from printed antennas on cylindrically conformal platforms
[NASA-CR-194703] p 1741 N94-21885
Scattering by cavity-backed antennas on a circular cylinder p 1741 N94-21886

SCATTERING AMPLITUDE
Hadronic molecules and scattering amplitudes from the nonrelativistic quark model
[DE94-000377] p 1974 N94-21657

SCATTERING COEFFICIENTS
Symmetry in polarimetric remote sensing p 1729 N94-20449
Application of neural network to remote sensing of soil moisture using theoretical polarimetric backscattering coefficients p 1730 N94-20455
A simplified method for S-parameter calculations of metal septum waveguide filters p 1782 N94-22180

SCATTERING CROSS SECTIONS
New relativistic S-matrix results for scattering -- beyond the usual anomalous factors/beyond impulse approximation
[DE93-019148] p 1971 N94-20096
Near grazing scattering from non-Gaussian ocean surfaces p 1726 N94-20438
Parton-parton elastic scattering and rapidity gaps at Tevatron energies
[DE93-041024] p 1974 N94-21515
Inelastic electron scattering from surfaces
[DE94-001738] p 1977 N94-22049

SCATTERING FUNCTIONS
Analytical evaluation of a surface integral expressing the coupling between interior and exterior volumes in a FE-IE approach p 1722 N94-20423
Scattering by Venus' surface p 2117 N94-20771
Documentation for PCDIST, a FORTRAN subroutine to calculate Pollack-Cuzzi scattering
[AD-A273070] p 1988 N94-21491

SCATTEROMETERS
Probe compensation in cylindrical near-field scanning: A novel simulation methodology p 1718 N94-20404
ERS-1 and Seasat scatterometer measurements of ocean winds: Model functions and the directional distribution of short waves p 1720 N94-20412
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430

SCHEDULES
Predicting scheduling success p 1932 N94-21334
Generating and evaluating alternate schedules p 1933 N94-21336

SCHEDULING
Exploiting the parallelism exposed by partial evaluation
[AD-A270678] p 1928 N94-19877
Multilist scheduling: A new parallel programming model
[AD-A270549] p 1929 N94-20084
Fault tolerant real-time systems
[AD-A272878] p 1899 N94-21195
Space network scheduling benchmark: A proof-of-concept process for technology transfer p 1932 N94-21332
Predicting scheduling success p 1932 N94-21334
Generating and evaluating alternate schedules p 1933 N94-21336
The Automated Conflict Resolution System (ACRS) p 1744 N94-21341
Heuristic-based scheduling algorithm for high level synthesis p 1764 N94-21704
A statistical-based scheduling algorithm in automated data path synthesis p 1764 N94-21706
Instruction set commutivity p 1766 N94-21719
The EUVE proposal database and scheduling system p 2047 N94-22459
SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486
The application of artificial intelligence to astronomical scheduling problems p 1949 N94-22492

SCHMIDT NUMBER
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452

SCHOOLS
Schools of the Pacific rainfall climate experiment p 1881 N94-20699
Sparking young minds with Moon rocks and meteorites p 2039 N94-20819

SCHOTTKY DIODES
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Study of the utilization of thin oxides in indium phosphides for the realisation of electron components
[ECL-92-38] p 2018 N94-20593

SCHREIBERSITE
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20667

SCHROEDINGER EQUATION
Two-dimensional nonlinear Schrodinger equations and their properties
[AD-A272184] p 1952 N94-20923
Ionization of H2(+) in intense laser fields
[DE93-019160] p 1818 N94-21829
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385

SCIENTIFIC SATELLITES
Data analysis support for the SPREE instruments on the TSS-1 shuttle flight
[AD-A272445] p 1654 N94-21429

SCIENTIFIC VISUALIZATION
Fast data parallel polygon rendering
[DE93-040157] p 1929 N94-20279
A data distributed, parallel algorithm for ray-traced volume rendering
[DE93-040150] p 1935 N94-21622
Geometric optimization
[DE93-040152] p 1917 N94-21764
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461
The IDL astronomy user's library p 2048 N94-22500
GRO/EGRET data analysis software: An integrated system of custom and commercial software using standard interfaces p 1926 N94-22501
SKYMAP: Exploring the Universe in software p 1927 N94-22511
The European Southern Observatory-MIDAS table file system p 2048 N94-22518

SCINTILLATION
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A272685] p 1857 N94-21189
Temperature dependence of CsI(Tl) gamma ray excited scintillation characteristics
[DE94-000836] p 2034 N94-22028

SCORING
Extracting information from wrong answers in computerized adaptive testing
[AD-A272632] p 1894 N94-21434

SCREWS
Three point lead screw positioning apparatus for a cavity tuning plate
[NASA-CASE-LEW-15216-1] p 1822 N94-20375
Self locking set screw
[AD-D015969] p 1824 N94-21277

SEA BREEZE
Predicting lightning events in the KSC area: A feasibility study using single station data
[AD-A271440] p 1864 N94-20088
The sea breeze convergence zone and its relationship to fair weather electricity in east central Florida
[AD-A268511] p 1868 N94-21502

SEA ICE
Radar backscatter measurements from simulated sea ice during CRRELEX 1990
[AD-A271034] p 1715 N94-19823
Polarimetric backscattering from sea ice p 1723 N94-20426
Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations p 1723 N94-20427
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20428
Retrieval of ice thickness from polarimetric SAR data p 1724 N94-20432
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435

SEA SURFACE TEMPERATURE
Global and regional comparative performance of linear and nonlinear satellite multichannel sea surface temperature algorithms
[AD-A270475] p 1837 N94-20028
Use of satellite data for validation of the ECHAM models p 1861 N94-22289

SEA WATER
The application of spaceborne synthetic aperture radar in the maritime environment
[DRA-TM(AWE)-91013] p 1737 N94-20596

SEALS (STOPPERS)
Actively controlled shaft seals for aerospace applications
[NASA-CR-194759] p 1823 N94-20538
The 1992 Seals Flow Code Development Workshop
[NASA-CP-10124] p 1654 N94-21790
Navy GTE seal development activity p 1655 N94-21794
Dynamics of face seals for high speed turbomachinery p 1655 N94-21796

SEARCH RADAR
Development of a lidar for integration with the Naval Postgraduate School Infrared Search and Target Designation (NPS-IRSTD) system
[AD-A271847] p 1817 N94-20611

SEASAT SATELLITES
ERS-1 and Seasat scatterometer measurements of ocean winds: Model functions and the directional distribution of short waves p 1720 N94-20412
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433

SEATS
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189

SECONDARY EMISSION
New preamplifiers for the SEM scanner
[DIGEL-1993-3] p 1979 N94-20118
Effect of geostationary environment constituents on secondary electron emission rates p 1661 N94-21382

SECONDARY FLOW
Measurement and prediction of the flow through an annular turbine cascade
[AD-A272530] p 1803 N94-21417

SECURITY
Security evaluation of Unix networks
[AD-A273076] p 1945 N94-21520
Initial laboratory evaluation of color video cameras, phase 2
[DE93-040201] p 1809 N94-21556

SEDIMENTS
Workshop on the Martian Northern Plains: Sedimentological, Periglacial, and Paleoclimatic Evolution
[NASA-CR-194831] p 2088 N94-20382
A model for the origin of Martian polygonal terrain p 2090 N94-20393
Iridium in sediments containing large abundances of Australasian microtektites from DSDP hole 758B in the Eastern Indian Ocean and from DSDP hole 769A in the Sulu Sea p 2083 N94-20741
Mars: New evidence for origin of some Valles Marineris layered deposits p 2112 N94-20748
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676

SEGMENTS
Segmented operations for sparse matrix computation on vector multiprocessors
[AD-A270601] p 1928 N94-19950
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 1669 N94-20496

SEISMIC ENERGY
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090

SEISMIC WAVES
A Kirchhoff approach to seismic modeling and prestack depth migration
[AD-A271010] p 1854 N94-19820
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090
Inversion of gravity and bathymetry in oceanic regions for long-wavelength variations in upper mantle temperature and composition
[NASA-CR-192272] p 1882 N94-20131
Analysis of the effects of eurasian crustal and upper mantel structure on regional phases using broadband seismic data
[AD-A272446] p 1858 N94-21206
The Board on Earth sciences and resources
[DE94-000745] p 1859 N94-22018
Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised)
[PB93-215432] p 1969 N94-22262

SEISMOLOGY
A Kirchhoff approach to seismic modeling and prestack depth migration
[AD-A271010] p 1854 N94-19820
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090
Seafloor characterization/Galapagos propagating rift
[AD-A272001] p 1882 N94-20581
Modal combination in response spectrum modal dynamic analysis
[DE94-000339] p 1833 N94-21956
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006
The Board on Earth sciences and resources
[DE94-000745] p 1859 N94-22018

SELECTION
On the selection of indices in relational databases
[MEMO-INF-92-72] p 2043 N94-21071
Columbus: Materials for 30 years habitability in space p 1662 N94-21387

SELECTIVE DISSEMINATION OF INFORMATION
Security management of electronic data interchange
[AD-A272962] p 1899 N94-21252
Data management for interdisciplinary field experiments: OTTER project support
[NASA-CR-4559] p 1842 N94-22345

SELECTIVE SURFACES
Performance of a simple circular polarization selective surface p 1746 N94-22198

SELECTIVITY
Selectivity: Reductions, nondeterminism, and function classes
[TR-469] p 1912 N94-21273

SELENOLOGY
Contributions of the Clementine mission to our understanding of the processes and history of the Moon p 2119 N94-20784

SELF CONSISTENT FIELDS
An introduction to GUGA in the COLUMBUS Program System
[DE93-018994] p 1902 N94-19928
Theoretical studies of the structures and electronic properties of U(NH2)(sub 3) and Np(NH2)(sub 3)
[DE94-000768] p 2031 N94-21857
Asymptotic structure of magnetically driven MHD wind p 2008 N94-22682

SELF ERECTING DEVICES
Self-deploying photovoltaic power system
[NASA-CASE-LEW-15308-1] p 1846 N94-20196

SELF FOCUSING
Two-dimensional nonlinear Schrodinger equations and their properties
[AD-A272184] p 1952 N94-20923

SELF ORGANIZING SYSTEMS
Self-organization via active exploration in robotic applications. Phase 2: Hybrid hardware prototype
[NASA-CR-194723] p 1939 N94-20212
Representation of spoken words in a self-organizing neural net p 1940 N94-20243
Modeling the human mental lexicon with self-organizing feature maps p 1743 N94-20244
Retrieval of ice thickness from polarimetric SAR data p 1724 N94-20432
A framework of connectionist network toward speech waveform coding p 1746 N94-22211
Speaker-independent isolated-digit recognition using neural networks and hidden Markov model p 1747 N94-22213

SEMANTICS
Set based analysis of ML programs
[AD-A270597] p 1902 N94-19948
Total order assumption
[PB93-191740] p 1903 N94-19993
Bottom-up abstract interpretation of logic programs
[PB93-191773] p 1928 N94-19995
Programming logic for F omega
[PB93-191781] p 1928 N94-19996
Back and forth bisimulations on prime event structures
[RR-888-I-IMAG-124-LIFIA] p 1929 N94-20124
Causal reconstruction
[AD-A271692] p 1908 N94-20929
A declarative approach for first-order built-in's of PROLOG
[CWI-CS-R9246] p 1909 N94-21026
COCOLOG: A conditional observer and controller logic for finite machines
[INRIA-RR-1714] p 1910 N94-21063
Behavioural semantics of parallel functional programming languages
[MEMO-INF-92-66] p 1913 N94-21313
Procedural dynamic semantics, verb-phrase ellipsis, and presupposition
[CWI-CS-R9311] p 1914 N94-21495
MINIFOLD: A kernel for a MANIFOLD-like coordination language
[CWI-CS-R9252] p 1915 N94-21534
Fortran for the nineties p 1926 N94-22481

SEMICONDUCTOR DEVICES
Method for anisotropic etching in the manufacture of semiconductor devices
[NASA-CASE-MSC-21631-1] p 1993 N94-20491
Variable angle of incidence spectroscopic ellipsometric study of semiconductor multilayer structures p 2020 N94-20982
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A272955] p 2027 N94-21248
Some experiences of solving 1-D semiconductor device equations on a matrix coprocessor by a domain decomposition method
[CWI-NM-R9304] p 1935 N94-21492
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528
Defect motion as the origin of the 1/f conductance noise in solids
[EUT-92-E-259] p 2029 N94-21552
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
Particle behavior in an ECR plasma etch tool
[DE93-040343] p 1996 N94-21769

SEMICONDUCTOR DIODES
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043

SEMICONDUCTOR LASERS
Spatial patterns in semiconductor lasers
[DE93-040056] p 1814 N94-19865
First results on InGaAsP separate confinement heterostructure diode lasers
[AD-A270849] p 1815 N94-19878
A full-color, high-resolution laser projector for a flight simulator visual display
[AD-A270578] p 1851 N94-20108
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Optical amplification and threshold behavior on InGaAs/InGaAsP multiquantum well structures
[ETN-93-94181] p 2026 N94-21151

SEMICONDUCTORS (MATERIALS)
Investigation of quantum effects in heterostructures
[AD-A270938] p 2011 N94-19817
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835
Effect of exciton localization and delocalization on magnetic-field-dependent photoluminescence linewidths in semiconductors
[DE93-018860] p 1748 N94-19884
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Research on defects and transport in amorphous-silicon-based semiconductors
[DE93-017117] p 2013 N94-19939
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953
ALE project
[AD-A271080] p 2014 N94-19980
Study of mechanisms for long wavelength Schottky-barrier infrared detectors
[AD-A270538] p 1971 N94-20083
Development of a numerical simulation model for a-Si:H solar cells and application to the analysis of experimentally obtained spectral characteristics
[ETN-93-95061] p 1846 N94-20151
Photoelectron spectroscopy at model boundary surfaces of energy converter semiconductors/electrolyte contacts: Adsorption, coadsorption, and triadsorption of Br2, Na, and H2O on Van der Waals surfaces of metal chalocogenide semiconductors
[ETN-93-95063] p 2015 N94-20152
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Photoconductive Semiconductor Switches for pulsed power applications
[DE93-019411] p 1750 N94-20294
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312
Optical and transport properties of metallic and semiconductor nanostructures
[AD-A271716] p 2018 N94-20554
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Materials, Structures, and Devices for High-Speed Electronics
[NASA-CR-193177] p 2019 N94-20971
Ellipsometric measurements of molecular-beam-epitaxy-grown semiconductor multilayer thicknesses: A comparative study p 1710 N94-20983
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis p 1710 N94-20984
Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry p 1796 N94-20985
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Optical measurement of built-in and applied electric fields in Al(x)Ga(1-x)As/GaAs heterostructures p 1796 N94-20989
Characterization of an asymmetric triangular multiple quantum well, by variable angle spectroscopic ellipsometry p 2022 N94-20995
Polarized-light reflection mode p-i-n modulators with GaAs/AlGaAs multiple quantum well active layers: Design and simulation p 2023 N94-20996
In-situ spectroscopic ellipsometry in molecular beam epitaxy p 2024 N94-21005
Applications of variable angle spectroscopic ellipsometry in semiconductor technology p 2025 N94-21010
Fundamentals and applications of variable angle spectroscopic ellipsometry p 1687 N94-21011
Non-destructive evaluation in manufacturing using spectroscopic ellipsometry p 1828 N94-21012
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013
Laser diagnostics of RF hydrogen plasma reactors: Application to the processing of III-V materials
[AD-A272659] p 1994 N94-21214

Dephasing processes in III-V semiconductors
[AD-A271677] p 2028 N94-21362
Analysis of semi-insulating bulk GaAs using glow discharge mass spectrometry
[AD-A273032] p 1682 N94-21435
Semiconductors A(III)B(VI): Translation
[AD-A273064] p 2028 N94-21438
Single crystal diamond films
[AD-A266759] p 2028 N94-21517
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528
Synthesis and catalytic properties of metal and semiconductor nanoclusters
[DE93-019418] p 2028 N94-21541
Heterojunction bipolar transistor technology for data acquisition and communication p 1763 N94-21697
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
Characterization of convection related defects in II-VI compound semiconductors
[NASA-CR-194704] p 2030 N94-21778
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922
Lattice damage during ion implantation of semiconductors
[DE94-000335] p 2034 N94-22016

SENSITIVITY
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004

SENSORIMOTOR PERFORMANCE
Gamma-aminobutyric acid (GABA) and neuropeptides in neural areas mediating motion-induced emesis p 1886 N94-21902

SENSORS
Optical fibers and Fluorosensors having improved power efficiency and methods of producing same
[NASA-CASE-LAR-14525-1-CU] p 1986 N94-20378

SENSORY DISCRIMINATION
Segment-based acoustic models for continuous speech recognition
[AD-A271483] p 1736 N94-20547

SENSORY STIMULATION
Susceptibility of the squirrel monkey to different motion conditions p 1885 N94-21899

SENTENCES
Neural data oriented parsing p 1940 N94-20248
A connectionist representation for phrase structures p 1941 N94-20249

SEPARATED FLOW
Fluid dynamic mechanisms and interactions within separated flows
[AD-A271037] p 1797 N94-19978
A theoretical investigation of unsteady separation phenomena related to dynamic stall
[AD-A271865] p 1636 N94-20465
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169
Modelling stalled airfoils
[ISBN-0-315-59525-6] p 1639 N94-22382

SEPARATORS
Spiral fluid separator
[NASA-CASE-MFS-28658-1] p 1800 N94-20361
Development of an electrochemical hydrogen separator
[DE93-019877] p 1683 N94-21984

SEPTUM
A simplified method for S-parameter calculations of metal septum waveguide filters p 1782 N94-22180

SEQUENCING
Model checking, abstraction, and compositional verification
[AD-A270552] p 1902 N94-19919
Total order assumption
[PB93-191740] p 1903 N94-19993
A methodology for formal hardware verification, with application to microprocessors
[AD-A270550] p 1898 N94-20085
High-speed Viterbi decoding with overlapping code sequences p 1760 N94-21130
On the decomposition of synchronous state mechines using sequence invariant state machines p 1764 N94-21703
A shared buffer memory switch with maximum queue and minimum allocation p 1773 N94-22119
A one-shot access scheme for a multicast switch p 1773 N94-22120

SERIES EXPANSION
Asymptotic analysis: Basic concepts and definitions
[DE94-001000] p 1961 N94-22393

SERVICE LIFE
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906
Photoconductive Semiconductor Switches for pulsed power applications
[DE93-019411] p 1750 N94-20294
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
Ceramic Technology Project
[DE94-001011] p 1707 N94-21822
Life prediction systems for critical rotating components p 1835 N94-22615

SERVICES
Passenger terminal level of service measurement: A utility theoretic approach
[ISBN-0-315-59037-8] p 1651 N94-22418

SERVOCONTROL
The optohydraulic servovalve: A novel device for the precise optical control of hydraulic pressure
[ISBN-0-315-83580-X] p 1827 N94-22577

SERVOMECHANISMS
Long range fast tool servo
[AD-A271614] p 1761 N94-21257
The optohydraulic servovalve: A novel device for the precise optical control of hydraulic pressure
[ISBN-0-315-83580-X] p 1827 N94-22577

SET THEORY
Set based analysis of ML programs
[AD-A270597] p 1902 N94-19948
Set theory and nominalisation, part 1
[PB93-191807-PT-1] p 1962 N94-20007
Set theory and nominalisation, part 2
[PB93-191815-PT-2] p 1962 N94-20008
Nominalization, prediction and type containment
[PB93-191799] p 1898 N94-20082
On multiflow problems
[RR-889-M] p 1950 N94-20125
Totally strong and strong graphs
[RR-902-I] p 1951 N94-20237
Half-integral flows in a planar graph with four holes
[RR-894-M] p 1951 N94-20302
Convex set and linear mixing model p 1844 N94-20888
The communication complexity of set intersection problems
[MEMO-1077] p 1738 N94-21073
The Robinson-Schensted and Schuetzenberger algorithms. Part 2: Geometric interpretations
[CWI-AM-R9209-PT-2] p 1911 N94-21157
An NP set with no co-DP sparse subset
[TR-475] p 1954 N94-21199
Advice from nonadaptive queries to NP
[TR-470] p 1911 N94-21200
Selectivity: Reductions, nondeterminism, and function classes
[TR-469] p 1912 N94-21273
Threshold computation and cryptographic security
[TR-461] p 1912 N94-21285
On the topological size of p-m-complete degrees
[TR-459] p 1965 N94-21286
Promises and fault-tolerant database access
[TR-447] p 2043 N94-21287
On the closure properties of #P in the context of PF of #P
[TR-445] p 1955 N94-21456
Modular interval spaces
[PB93-220663] p 1961 N94-22266

SEYFERT GALAXIES
Spatial distribution of near infrared line radiation in galactic nuclei measured with Fabry-Perot spectrometer FAST
[MPE-239] p 2081 N94-21138

SHAFTS (MACHINE ELEMENTS)
Actively controlled shaft seals for aerospace applications
[NASA-CR-194759] p 1823 N94-20538
Acceleration-augmented LQG control of an active magnetic bearing p 1757 N94-21112
Compliant seal development p 1655 N94-21795
Modeling bristle lift-off in idealized brush seal configurations p 1655 N94-21797

SHALLOW WATER
A survey of the impact on acoustic propagation of warm core ocean eddys
[AD-A272188] p 1883 N94-20925

SHAPE MEMORY ALLOYS
Process and apparatus for the release of a prestress initially applied to a mechanism such as a bearing on board a space vehicle
[CA-PATENT-APPL-SN-2,020,90] p 1824 N94-21142
Shape memory metals
[DE94-001373] p 1695 N94-21976

SHAPED CHARGES
PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943

SHAPES
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
Linear structures on the small inner satellites of Saturn p 2121 N94-20797

SHATTER CONES
Shock attenuation at the Slate Islands revisited p 1863 N94-20887

SHEAR
Light scattering studies of an electrorheological fluid
[DE93-019419] p 1700 N94-20315

SHEAR FLOW
Development of phased twin flip-flop jets
[NASA-TM-106404] p 1637 N94-20563
An analysis of pool surface deformation due to a plunging liquid jet
[AD-A272970] p 1802 N94-21261
Shear flow generation by Reynolds stress and suppression of resistive g-modes
[DE93-040911] p 1995 N94-21514
Coupling of smooth particle hydrodynamics with PRONTO
[DE93-019080] p 1915 N94-21539
New results on the realizability of Reynolds stress turbulence closures
[NASA-CR-191548] p 1804 N94-21875

SHEAR PROPERTIES
Frequency and temperature dependence of high damping elastomers
[DE93-019539] p 1697 N94-19809
Shear flow generation by Reynolds stress and suppression of resistive g-modes
[DE93-040911] p 1995 N94-21514

SHEAR STRENGTH
Coupling of smooth particle hydrodynamics with PRONTO
[DE93-019080] p 1915 N94-21539

SHEAR STRESS
Principles and applications of oil film interferometry for measuring wall friction fields in air flows
[ETN-93-95062] p 1798 N94-20147
Crystal orientation dependence of elastic precursor strength in pentaerythritol tetranitrate
[DE93-018340] p 2034 N94-22035

SHELLS (STRUCTURAL FORMS)
Response statistics of shell structures with geometrical and material nonlinearities, volume 1
[ISBN-0-315-84006-4] p 1833 N94-22590

SHERGOTTITES
Rare Earth elements in individual minerals in Shergottites p 1686 N94-20852
Equilibrium and fractional crystallization of a primitive Shergottite composition p 2085 N94-20861
Weathering features and secondary minerals in Antarctic Shergottites ALHA77005 and LEW88516 p 2086 N94-20869
The carbon components in SNC meteorites of feldspathic harzburgite composition p 2086 N94-20885
Further carbon isotope measurements of LEW 88516 p 2086 N94-20886
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668

SHOCK FRONTS
Shock induced condensation in fluids of high molar specific heat: Shock structure and relaxation
[MPIS-106/1993] p 1798 N94-20145
Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298
Original size of the Vredefort structure, South Africa p 1863 N94-20825
Computer simulation of molecular response at a shock front
[DE94-001050] p 1977 N94-22396

SHOCK HEATING
Boost-phase discrimination research
[NASA-TM-109347] p 1666 N94-19818
Reverse polarity magnetized melt rocks from the Chicxulub impact structure, Yucatan Peninsula, Mexico p 1863 N94-20843
Opacity measurements in shock-generated argon plasmas
[DE94-001057] p 1998 N94-22399

SHOCK LAYERS
Experimental study of a shock accelerated thin gas layer
[DE93-018354] p 1799 N94-20286

SHOCK LOADS
An equation of state for shock in homogeneous materials and comparison to shock data
[AD-A271436] p 1829 N94-19881

Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927
Shock response of porous Al-2 + Fe2O3 powder mixtures
[DE93-018851] p 1688 N94-19944
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
Characterization of amorphous material in shocked quartz by NMR spectroscopy
[DE93-019069] p 1679 N94-20307
Shock attenuation at the Slate Islands revisited
p 1863 N94-20887
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546
Ductile-brittle transition behavior of tungsten under shock loading conditions
[DE93-019945] p 1693 N94-21843
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931
Characteristics of shock-compressed configuration of Ti and Si powder mixtures
[DE93-018857] p 1713 N94-22033
Crystal orientation dependence of elastic precursor strength in pentaerythritol tetranitrate
[DE93-018340] p 2034 N94-22035

SHOCK RESISTANCE
Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022

SHOCK SPECTRA
Relativistic shock spectra: A prediction
[NASA-CR-194764] p 2150 N94-21782

SHOCK TESTS
Hydrodynamic compressibility of high-strength ceramics
[DE93-019424] p 1698 N94-19903

SHOCK TUNNELS
Experimental investigation of nozzle/plume aerodynamics at hypersonic speeds
[NASA-CR-194628] p 1636 N94-20014

SHOCK WAVE INTERACTION
Shock wave interactions with exothermic mixtures
[AD-A271149] p 1829 N94-19836
Experimental study of a shock accelerated thin gas layer
[DE93-018354] p 1799 N94-20286
The 2D and 3D hypersonic flows with unstructured meshes p 1920 N94-22365

SHOCK WAVE PROPAGATION
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298

SHOCK WAVES
Shock wave interactions with exothermic mixtures
[AD-A271149] p 1829 N94-19836
An equation of state for shock in homogeneous materials and comparison to shock data
[AD-A271436] p 1829 N94-19881
Unlike-pair interactions at high pressure and high temperature
[DE93-019948] p 1796 N94-19916
Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927
Shock response of porous Al-2 + Fe2O3 powder mixtures
[DE93-018851] p 1688 N94-19944
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090
Shape optimization governed by the Euler equations using an adjoint method
[NASA-CR-191555] p 1950 N94-20092
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars
p 2082 N94-20648
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546
Physics of magnetospheric boundary layers
[NASA-CR-194725] p 1858 N94-21836
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
Computer simulation of molecular response at a shock front
[DE94-001050] p 1977 N94-22396
Transonic flow calculations: Integral method
[ISBN-0-315-83538-9] p 1639 N94-22586
Formation of fast magnetosonic shock waves during two current loops collision in solar flare
p 2005 N94-22662
Magnetic superbubbles in the galactic disk and halo
p 2009 N94-22694
Shock formation in magnetohydrodynamical accretion onto a black hole p 2010 N94-22699

SHORELINES
A marine sedimentary model for the evolution of the northern plains p 2091 N94-20395

SHORT WAVE RADIATION
The use of ERBE data for climate studies
p 1860 N94-22286

SIBERIA
Primary differentiation in the early Earth: Nd and Sr isotopic evidence from diamondiferous eclogites for both old depleted and old enriched mantle, Yakutia, Siberia
p 1862 N94-20776

SICKNESSES
Self-Motion Perception and Motion Sickness
[NASA-CR-194276] p 1885 N94-21897

SIDELOBE REDUCTION
Improvements on the design of optimum SAW filters with the Remez Exchange Algorithm
p 1773 N94-22123

SIDESLIP
Utilization of lasers for air data measurements
p 1640 N94-22603

SIGNAL ANALYSIS
Use of switched capacitor filters to implement the discrete wavelet transform p 1755 N94-21097
Estimation of AR signal patterns using competitive neural networks p 1744 N94-22102
Signal classification and noise filtering using artificial neural networks p 1744 N94-22103
Segmentation and frequency domain ML pitch estimation of speech signals p 1747 N94-22212
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457
Verification of the PROS timing analysis package
p 1926 N94-22508

SIGNAL DETECTION
State-space models for multichannel detection
[AD-A270608] p 1715 N94-19816
Statistical fluctuations in lasers
[DE94-000710] p 1817 N94-20939
Evaluation of a nonlinear method for the enhancement of tonal signal detection
[NASA-CR-191562] p 1968 N94-21741
Asynchronous detection of SSB-SC data signals
p 1747 N94-22217

SIGNAL DETECTORS
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
Surface acoustic wave sensing of VOC's in harsh chemical environments
[DE93-040721] p 1968 N94-21751

SIGNAL DISTORTION
Use of switched capacitor filters to implement the discrete wavelet transform p 1755 N94-21097

SIGNAL ENCODING
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
Schematic driven layout of Reed Solomon encoders
p 1766 N94-21722
Encoding and decoding quasi-spherical signal sets
p 1747 N94-22233

SIGNAL FADING
The influence of lowpass filtering and the effects of fading on the group demodulation of QPSK signals
p 1746 N94-22170
ARQ on fading channels p 1747 N94-22242
Performance of RS codes in lognormally shadowed Rician channels p 1792 N94-22244

SIGNAL PROCESSING
A pipelined superconducting digital processor
[DE93-040852] p 1898 N94-19886
Literature review of the errors-in-variables approach to the problem of system identification
[AD-A271098] p 1949 N94-19907
Optical signal processing
[AD-A271036] p 1983 N94-20013
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090
Application of change detection to dynamic contact sensing
[AD-A270523] p 1939 N94-20105
Center for neural engineering
[AD-A271164] p 1890 N94-20185
High resolution signal processing
[AD-A271181] p 1717 N94-20215
Topographic slope from the SAR interferometric phase gradient p 1731 N94-20459
Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570
An inverse DWT for nonorthogonal wavelets
[AD-A272064] p 1737 N94-20582
The Fifth NASA Symposium on VLSI Design
[NASA-CR-194644] p 1753 N94-21079
Adaptive analog video signal conditioner
p 1744 N94-21099
VLSI mixed signal processing system
p 1744 N94-21100
Using crosscorrelation techniques to determine the impulse response of linear systems
p 1759 N94-21122
NAVSPASUR sensor system digital signal processing receiver. Volume 1: Hardware and software overview
[AD-A272899] p 1738 N94-21198
Use of the Weiss-Weinstein bound to compare the direction-finding performance of sparse arrays
[AD-A272582] p 1738 N94-21210
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218
Polar processing project
[AD-A271583] p 1739 N94-21235
Comparison of higher order moment spectrum estimation techniques
[AD-A272967] p 1967 N94-21260
QPPM receiver for free-space laser communications
[NASA-TM-106424] p 1741 N94-21567
Applications of correlator chips in radio science
p 1763 N94-21695
A real time correlator architecture using distributed arithmetic principles p 1768 N94-21734
A comparative robustness evaluation of feedforward neurofilters
[NASA-TM-106440] p 1650 N94-21742
Surface acoustic wave sensing of VOC's in harsh chemical environments
[DE93-040721] p 1968 N94-21751
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101
Estimation of AR signal patterns using competitive neural networks p 1744 N94-22102
Signal classification and noise filtering using artificial neural networks p 1744 N94-22103
VLSI architectures for the new (T,L) algorithm
p 1745 N94-22110
Design of a floating point convolution processor
p 1775 N94-22133
CFAR processing for airborne pulse-Doppler radars
p 1745 N94-22142
Space-based radar for moving target detection
p 1745 N94-22143
A digital demodulation scheme for use in a high dynamic range radar system p 1745 N94-22144
An overview of synthetic aperture radar signal processing techniques p 1745 N94-22159
Timing recovery in the channel processor of a digital group demodulator p 1780 N94-22169
Interference reduction using neural networks
p 1783 N94-22186
Acceleration of backpropagation learning using a parallel DSP machine p 1786 N94-22206
Speaker-independent isolated-digit recognition using neural networks and hidden Markov model
p 1747 N94-22213
Asynchronous detection of SSB-SC data signals
p 1747 N94-22217
Encoding and decoding quasi-spherical signal sets
p 1747 N94-22233
The application of sample vector selection to adaptive nulling: Performance comparison for techniques combining Gram-Schmidt orthogonalization with averaging
p 1747 N94-22234
A four-band infrared data acquisition facility for signal processing development p 1791 N94-22235
An adaptive method for group delay compensation using switched capacitor filters p 1793 N94-22248
Wideband source location in two-dimensional array processing p 1747 N94-22250
On coefficient quantization and computational roundoff effects in frequency interpolation filter banks
p 1793 N94-22251
A feasibility study of a parallax-based passive missile approach warning system
[ISBN-0-315-60640-1] p 1743 N94-22410
A multiresolution wavelet representation in two or more dimensions p 1925 N94-22456
CCD data acquisition systems at Lick and Keck Observatories p 2047 N94-22495
The VLBA correlator: Real-time in the distributed era
p 2049 N94-22547

SIGNAL TO NOISE RATIOS
Determination of noise equivalent sigma(0) using highly correlated repeat-pass SAR images p 1720 N94-20411
Use of the Weiss-Weinstein bound to compare the direction-finding performance of sparse arrays [AD-A272582] p 1738 N94-21210
A low cost alternative to high performance PCM bit synchronizers p 1813 N94-21347
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
Evaluation of a nonlinear method for the enhancement of tonal signal detection [NASA-CR-191562] p 1968 N94-21741
The application of sample vector selection to adaptive nulling: Performance comparison for techniques combining Gram-Schmidt orthogonalization with averaging p 1747 N94-22234

SIGNAL TRANSMISSION
Metrics for specifying and/or testing neural networks statement of government interest [AD-D015946] p 1938 N94-19843
Trellis coded multi-orthogonal modulation p 1747 N94-22231
Quadrature biorthogonal modulation p 1747 N94-22232

SIGNATURE ANALYSIS
Efficient chip signature checking for diagnosing boundary scan systems [RR-901-I] p 1749 N94-20166
Progress in interpreting CO2 lidar signatures to obtain cirrus microphysical and optical properties p 1874 N94-22308

SIGNATURES
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439
Standard ML signatures for a protocol stack [AD-A272060] p 1908 N94-20622

SILANES
Adhesive electroless metallization of fluoropolymeric substrates [AD-A271858] p 1703 N94-20526
Composite materials with improved properties in compression [AD-A272837] p 1675 N94-21176

SILICA GLASS
Formation of colloidal Ag precipitates in fused silica by MeV ion implantation [DE93-040268] p 2012 N94-19869

SILICATES
Neutron-scattering studies of Yb-bearing silicate glasses [DE93-019768] p 1700 N94-20265
The Sm-Nd systematics of silicate inclusions in iron meteorites: Results from Caddo (IAB) [CONTRIB-5241(804)] p 2084 N94-20795
Hydrothermal alteration experiments of olivine with varying Fe contents: An attempt to simulate aqueous alteration of the carbonaceous chondrites p 1686 N94-20810

SILICIDES
Photo- and thermal-induced antiferromagnetic interlayer coupling in Fe/(Fe-Si) superlattices [DE93-040822] p 2031 N94-21930
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo) [DE93-041320] p 1694 N94-21943

SILICON
Substrate recovery of Mo-Si multilayer coated optics [DE93-019610] p 1698 N94-19810
Segregation of Si to the surface of Fe-29Ni-17Co alloy [DE93-040053] p 1687 N94-19864
Photoconductive Semiconductor Switches for pulsed power applications [DE93-019411] p 1750 N94-20294
Attenuation of epsilon(sub eff) of coplanar waveguide transmission lines on silicon substrates p 1733 N94-20504
Spectroscopic ellipsometry studies of HF treated Si (100) surfaces p 1734 N94-20508
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009
Optical integrated structures and circuits on silicon [VTT-PUBS-106] p 1988 N94-21594
A novel semiconductor process for optoelectronic applications on silicon substrate p 1988 N94-21595
Integrated optical coupling element on silicon substrate, appendix 2 p 1988 N94-21596
Fibre pigtailed silicon based low cost passive optical components, appendix 5 p 1989 N94-21599
Localization of pellicle-induced open contacts using charge-induced voltage alteration [DE93-019407] p 1762 N94-21636
Micromachined actuator and sensor capabilities at the Microelectronics Development Laboratory [DE93-019417] p 1769 N94-21918
Acoustic, fiber optic, and silicon microelectronic microsensors research and development activities at Sandia National Laboratories [DE93-019075] p 1770 N94-22040
Silicon microelectronic field-emissive devices for advanced display technology [DE94-000397] p 1794 N94-22380

SILICON ALLOYS
Research on defects and transport in amorphous-silicon-based semiconductors [DE93-017117] p 2013 N94-19939
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition [DE93-017083] p 2029 N94-21615
Stable, high-efficiency amorphous-silicon solar cells with low hydrogen content [DE93-018214] p 1848 N94-21826

SILICON CARBIDES
Hydrodynamic compressibility of high-strength ceramics [DE93-019424] p 1698 N94-19903
Process for the homoepitaxial growth of single-crystal silicon carbide films on silicon carbide wafers [NASA-CASE-LEW-15223-1] p 2017 N94-20381
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride [DE93-041307] p 1706 N94-21516
Fabrication of whisker-toughened alumina tubes [DE94-001012] p 1677 N94-22022

SILICON COMPOUNDS
Ellipsometric study of Si(0.5)Ge(0.5)/Si strained-layer superlattices p 1734 N94-20509
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 1734 N94-20510
Characteristics of shock-compressed configuration of Ti and Si powder mixtures [DE93-018857] p 1713 N94-22033

SILICON DIOXIDE
Quartz/fused silica chip carriers [NASA-CR-194154] p 2016 N94-20340
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
Analytic solutions for optimized ellipsometric measurements of interfaces and surface layers in thin film structures p 2019 N94-20977
Alumoxanes: Rationalization of black box materials [AD-A272805] p 1704 N94-21170
Dynamics of adsorbed, swollen block copolymers [AD-A272013] p 1706 N94-21460
Precision prism coupling setup applied to measure planar silica films on silicon, appendix 9 p 1989 N94-21603

SILICON FILMS
Analytic solutions for optimized ellipsometric measurements of interfaces and surface layers in thin film structures p 2019 N94-20977
Refractive index behaviour of phosphorus-doped planar silica waveguides, appendix 7 p 1989 N94-21601
Precision prism coupling setup applied to measure planar silica films on silicon, appendix 9 p 1989 N94-21603

SILICON ISOTOPES
Direct images of thermal disorder in Cl-Si and H-O-Si chemisorption bond on Si(100) [AD-A272386] p 1680 N94-21145

SILICON NITRIDES
Sintering silicon nitride [NASA-CASE-LEW-15489-1] p 1703 N94-20529
Ellipsometric studies of sputtered silicon nitride on n-GaAs p 1709 N94-20972
Multiple-wavelength angle-of-incidence ellipsometry: Application to silicon nitride-gallium arsenide structures p 2019 N94-20974
Structural and chemical analysis of a silicon nitride film on GaAs by null ellipsometry p 1709 N94-20975
Microstructural modeling and toughening of Si3N4 ceramics for high temperature engine applications [AD-A272897] p 1704 N94-21197
Review of corrosion behavior of ceramic heat exchanger materals: Corrosion characteristics of silicon carbide and silicon nitride [DE93-041307] p 1706 N94-21516
A novel semiconductor process for optoelectronic applications on silicon substrate p 1988 N94-21595
Electron holography applied to the study of ceramic materials [DE94-000329] p 1707 N94-21653
Surface and subsurface defect detection in Si3N4 components by laser scattering [DE93-040829] p 1832 N94-21772
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives [DE94-000330] p 1694 N94-21945

SILICON OXIDES
Neutron-scattering studies of Yb-bearing silicate glasses [DE93-019768] p 1700 N94-20265
Light scattering studies of an electrorheological fluid [DE93-019419] p 1700 N94-20315
Structural and chemical analysis of a silicon nitride film on GaAs by null ellipsometry p 1709 N94-20975
Properties of E-beam interactive oxide films for nanometer scale structures [AD-A272848] p 1675 N94-21191
Shock compression of low-density foams [DE93-040545] p 1707 N94-21546
Refractive index behaviour of phosphorus-doped planar silica waveguides, appendix 7 p 1989 N94-21601

SILICON POLYMERS
Optical diagnostic instrument for monitoring etch uniformity during plasma etching of polysilicon in a chlorine-helium plasma [DE93-019582] p 1993 N94-20261
Particle behavior in an ECR plasma etch tool [DE93-040343] p 1996 N94-21769

SILICON RADIATION DETECTORS
The GEM Silicon Tracking System [DE93-040133] p 2016 N94-20322

SILICONES
Laser driven hydrodynamic instability experiments [DE93-040550] p 1818 N94-21547

SILVER
The proximity effect in ultrathin granular Pb films [AD-A271094] p 2012 N94-19848
Formation of colloidal Ag precipitates in fused silica by MeV ion implantation [DE93-040268] p 2012 N94-19869
Silver lined ceramic vessel [AD-D015917] p 1700 N94-20057
Some results of the oxidation investigation of copper and silver samples flown on LDEF p 1660 N94-21375

SILVER OXIDES
Silver oxide batteries: Recent improvements and developments p 1752 N94-20629

SIMD (COMPUTERS)
Fast data parallel polygon rendering [DE93-040157] p 1929 N94-20279

SIMILARITY THEOREM
Structural similitude and design of scaled down laminated models [NASA-CR-194687] p 1673 N94-20172

SIMULATION
Evaluation of a scanning Hartmann device for single point turning applications [DE93-019204] p 1821 N94-19891
Study of regional climate change [DE93-018926] p 1850 N94-19941
A comparative study of an ABC and an artificial absorber for truncating finite element meshes [NASA-CR-194275] p 1716 N94-20160
SPH modelling of energy partitioning during impacts on Venus p 2124 N94-20809
Atmospheric breakup of a small comet in the Earth's atmosphere p 2084 N94-20824
Synoptic observations of near surface processes of an insolated ice-dust body under space conditions: The case of KOSI 9 and 10 p 2084 N94-20827
Application of a back-propagation neural network to isolated-word speech recognition [AD-A272495] p 1945 N94-21430

SIMULATORS
A breakdown model for the bipolar transistor to be used with circuit simulators [DE93-019422] p 1750 N94-20218

SINE SERIES
Operational equations for the five-point rectangle [DE94-000366] p 1959 N94-21655

SINGLE CRYSTALS
Oxidation-reduction induced roughening of platinum (111) surface [DE93-017408] p 1687 N94-19922
The multicomponent lineshape of the anharmonic A(1)(TO) phonon in PbTiO3 [DE93-018995] p 1970 N94-19971
Growth of zinc selenide single crystals by physical vapor transport in microgravity [NASA-CR-194679] p 2017 N94-20346
Monocrystalline germanium film on sapphire [AD-D015925] p 2017 N94-20348
Process for the homoepitaxial growth of single-crystal silicon carbide films on silicon carbide wafers [NASA-CASE-LEW-15223-1] p 2017 N94-20381
Interfacial properties of diamondlike amorphous carbon films on InP: Metal-insulator-semiconductor structures p 1710 N94-20980

Growth, characterization and device development in monocrystalline diamond films
[AD-A272715] p 2026 N94-21190
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Single crystal diamond films
[AD-A266759] p 2028 N94-21517
Relaxation of hysteresis loop in a single crystal of YBa2Cu4O8
[DE93-019519] p 2029 N94-21649
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
Techniques for producing free-standing thin films on frames
[DE93-041144] p 1708 N94-21954
Temperature dependence of magnetic order in single-crystalline UPdSn
[DE93-040153] p 2033 N94-21991
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997
Temperature-dependent ion beam mixing
[DE93-040281] p 2033 N94-21999
Quantitative analysis of scanning tunneling microscopy images for surface structure determination: Sulfur on Re(0001)
[DE93-019235] p 2034 N94-22041
Inelastic neutron scattering of (gamma)-iron, and the determination of the elastic constants by lattice dynamics
[DE94-000694] p 1978 N94-22573

SINGLE EVENT UPSETS
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Comparison of single event upset rates for microelectronic memory devices during interplanetary solar particle events p 1754 N94-21085
STRV RADMON: An integrated high-energy particle detector p 1666 N94-21086
Test results for SEU and SEL immune memory circuits p 1754 N94-21087
Complementary heterojunction FET technology for space application p 1755 N94-21094
Design methods for fault-tolerant finite state machines p 1758 N94-21120
Single event phenomena: Testing and prediction p 1763 N94-21696
Defect-sensitivity analysis of an SEU immune CMOS logic family p 1765 N94-21711

SINGLE SIDEBAND TRANSMISSION
Asynchronous detection of SSB-SC data signals p 1747 N94-22217

SINGULAR INTEGRAL EQUATIONS
Hypersingular integrals at a corner
[DE94-000340] p 1961 N94-22379

SINGULARITY (MATHEMATICS)
Classical and generalized solutions of time-dependent linear differential algebraic equations
[AD-A272834] p 1954 N94-21173

SINTERING
Sol-spray preparation, particulate characteristics, and sintering of alumina powders
[DE93-018577] p 1690 N94-20183
Sintering silicon nitride
[NASA-CASE-LEW-15489-1] p 1703 N94-20529
An assessment of the cost of microwave sintering ceramic tiles for armor applications
[DE94-000978] p 1693 N94-21850
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives
[DE94-000330] p 1694 N94-21945
Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022

SIS (SEMICONDUCTORS)
Layered thin-edged field-emitter device
[AD-D015932] p 1751 N94-20350

SIS (SUPERCONDUCTORS)
Quantum noise studies with superconducting tunnel junction mixers
[AD-A270897] p 2012 N94-19897
Layered thin-edged field-emitter device
[AD-D015932] p 1751 N94-20350

SITE SELECTION
Ground wave emergency network. Final operational capability. Environmental assessment for south central Montana relay node, site no. RN8C925MT
[AD-A267795] p 1716 N94-19964

SIZE DISTRIBUTION
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles p 1721 N94-20416
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Distribution of small volcanic cones on the surface of Venus by size and elevation: Implications for differential deposition of volcanic features p 2110 N94-20731
Size distributions and aerodynamic equivalence of metal chondrules and silicate chondrules in Acfer 059 p 2084 N94-20773
Triton's cratering record and its time of capture p 2122 N94-20802

SKIN (ANATOMY)
Physiologically based pharmacokinetic modelling of percutaneously absorbed dibromomethane utilizing multiple dermal sub-compartments
[AD-A271106] p 1889 N94-19981
Enhancement of wound healing by biosynthetic growth factor
[AD-A272517] p 1892 N94-21415

SKIN FRICTION
Principles and applications of oil film interferometry for measuring wall friction fields in air flows
[ETN-93-95062] p 1798 N94-20147

SKIN TEMPERATURE (BIOLOGY)
Physiological efficacy of a lightweight ambient air cooling unit for various applications
[AD-A272952] p 1896 N94-21247

SKY SURVEYS (ASTRONOMY)
A deep x ray survey in the Lockman hole and the soft x ray log N - log S
[NASA-CR-194698] p 2054 N94-20174
Optical and Gamma Ray Space Observations
[NASA-TM-109389] p 2149 N94-20602
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts
[NASA-TM-108245] p 2057 N94-22438
Deep near-infrared survey of the Southern Sky (DENIS) p 2062 N94-22467
The extreme ultraviolet explorer archive p 2047 N94-22468
Visualizing the universe, part 2 p 2063 N94-22472
Visualizing the universe, part 1 p 2064 N94-22476
Data indexing techniques for the EUVE all-sky survey p 2048 N94-22503
Guide star catalogue data retrieval software 2 p 1927 N94-22533
SkICAT: A cataloging and analysis tool for wide field imaging surveys p 2049 N94-22546
Miyun 232 MHz survey 1: Fields centered at: alpha:00(h)41(m), delta:41 deg 12 min and alpha: 07(h)00(m),delta:35 deg 00 min p 2080 N94-22554
ROSAT data analysis with EXSAS p 2080 N94-22555
Results from ROSAT p 2000 N94-22630
Compton Gamma Ray Observatory highlights of the sky survey p 2002 N94-22642

SLABS
Time-lapiace-transform-domain analysis of wave propagation in planar waveguides
[PB93-215226] p 1960 N94-22096

SLEEP
Physiological correlates of stress-induced decrements in human perceptual performance
[DOT/FAA/AM-93/19] p 1893 N94-20081

SLIDING FRICTION
Microscopic modeling of tribological and interfacial phenomena
[AD-A271864] p 1823 N94-20464
In-vacuo slip testing of materials for SSRMS friction brakes p 1661 N94-21381
Detailed study of oxidation/wear mechanism in lox turbopump bearings
[NASA-TM-108434] p 1825 N94-21580

SLIP CASTING
Improved ceramic slip casting technique — application to aircraft model fabrication
[NASA-CASE-LAR-14471-1] p 1702 N94-20377
Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022

SLOPES
Resonantly pumped, erbium-doped, GSGG, 2.8 micron, solid state laser with energy recycling and high slope efficiency
[AD-D015920] p 1815 N94-20060
Topographic slope from the SAR interferometric phase gradient p 1731 N94-20459
Comparison of flank modification on Ascraeus and Arsia Montes volcanoes, Mars p 2140 N94-20903

SLOT ANTENNAS
Recent activities in printed Antennas at LeRC p 1722 N94-20422
Linearly tapered slot antenna with dielectric superstrate p 1734 N94-20505
Slot-coupled patch antenna with coplanar waveguide feed p 1734 N94-20506
Linearly tapered slot antenna circular array for mobile communications
[NASA-TM-106441] p 1769 N94-21808

SLOTS
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method p 1718 N94-20405
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels
[DE93-040181] p 1804 N94-21765

SLURRIES
Fabrication of porous ceramics by freeze-casting/freeze-drying
[PB93-202513] p 1705 N94-21425

SMART STRUCTURES
Quantification of uncertainties in the performance of smart composite structures
[NASA-TM-106335] p 1830 N94-20171

SMITH CHART
Manual design technique for broadband passive thin-film attenuators using the Smith chart p 1782 N94-22178

SMOKE
Zinc and titanium smoke: Chemical composition and physical characteristics
[FOA-C-40277-4.9] p 1680 N94-20552

SMOKE DETECTORS
Army aircraft fire-detection systems operation and reliability
[AD-A271327] p 1641 N94-20912

SMOOTHING
Numerical study of a multigrid method with four smoothing methods for the incompressible Navier-Stokes equations in general coordinates p 1806 N94-21487
A lower bound on wait-free counting
[CWI-CS-R9307] p 1915 N94-21537

SNOW
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
The Martian valley networks: Origin by niveo-fluvial processes p 2146 N94-21682
Observations of multi-layered clouds using K-band radar p 1874 N94-22311

SNOW COVER
Snow cover measurements and areal assessment of precipitation and soil moisture
[WMO-749] p 1841 N94-21068

SOAPS
Guanidine based vehicle/binders for use with oxides, metals, and ceramics
[NASA-CASE-LEW-15314-1] p 1700 N94-20195

SOBOLEV SPACE
Orthogonal pairs and zeros of Sobolev-type orthogonal polynomials
[REPT-92-46] p 1953 N94-21059

SOCIAL FACTORS
Soviet society informatization: The USSR state program p 2046 N94-22058
Microdynamic model of reproduction: Taxation and currency issue as regulators of economy p 2053 N94-22084

SOCIOLOGY
Female security as a general mobility condition
[ISBN-3-79-831536-1] p 2039 N94-20153

SODIUM
Laser guide star adaptive optics: Present and future
[DE93-018642] p 1989 N94-21619

SODIUM CHLORIDES
Swelling equilibria for cationic 2-hydroxyethyl methacrylate (HEMA)-based hydrogels
[DE94-000728] p 1707 N94-21856

SODIUM COMPOUNDS
Neutron-scattering studies of Yb-bearing silicate glasses
[DE93-019768] p 1700 N94-20265
Evaporation of a sodium tellurite melt in the jamic low gravity drop shaft p 1713 N94-20605

SODIUM HYDROXIDES
Improvement of the stability of the process for synthesizing chemically prepared varistor powder
[DE94-000345] p 1763 N94-21654

SODIUM SULFUR BATTERIES
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885

SOFTWARE ENGINEERING
Qualifying codes under software quality assurance: Two examples as guidelines for codes that are existing or under development
[DE93-040452] p 1904 N94-20097
Data and Analysis Center for Software
[AD-A270571] p 2041 N94-20106
A comprehensive software engineering educational experience
[AD-A270583] p 1905 N94-20109
A proposed research program in information processing
[NASA-CR-194271] p 2041 N94-20134
A proposal for reverse engineering CASE tools to support new software development
[DE93-040207] p 1906 N94-20281
Probability of detection calculations using MATLAB
[AD-A271958] p 1736 N94-20578
Advanced software development workstation: Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
[NASA-CR-193643] p 1930 N94-21065
Design of a computer assisted tool for object oriented acquisition, modeling and simulation of knowledge structure
[ETN-93-94183] p 1910 N94-21152
A practical software engineering curriculum: A pilot study
[AD-A272781] p 1911 N94-21183
An investigation into the state of the practice of CASE tool integration
[AD-A272441] p 1912 N94-21205
Development and operations of the Astrophysics Data System
[NASA-CR-194691] p 2043 N94-21270
The NCC project: A quality management perspective
p 1828 N94-21324
Let your fingers do the walking: The projects most invaluable tool p 1922 N94-21325
Software metrics: The key to quality software on the NCC project p 1922 N94-21326
Network command processing system overview
p 1935 N94-21351
MAYGEN: A symbolic debugger generation system
[AD-A272512] p 1913 N94-21413
Conversion and maintenance of Co-oP for Windows
[AD-A272513] p 1914 N94-21414
An evaluation of integration of the trace assertion method with the box structure method for coding in C++
[DE93-040480] p 1918 N94-21924
The Soviet software market: Current state and aspects of development p 1923 N94-22066
Application development in a PC/LAN environment
p 1923 N94-22067
Industry standards: Key to distributed computing
p 1938 N94-22070
Developing software to RTCA DO-178A
p 1645 N94-22155
The why, what, and how of Ada software development
p 1779 N94-22157
A software environment for the exploitation of the MAR image sensor p 1785 N94-22200
Trends in software reliability modeling
p 1788 N94-22214
Second Annual Conference on Astronomical Data Analysis Software and Systems. Abstracts
[NASA-TM-108245] p 2057 N94-22438
Scientific computing in the 1990ies: An astronomical perspective p 2057 N94-22440
Fortran for the nineties p 1926 N94-22481
Programmability in AIPS++ p 1926 N94-22482
GammaCore: The Compton Observatory research environment p 2048 N94-22509
XPI: The Xanadu Parameter Interface
p 1927 N94-22513
The ISO SWS on-line system p 1927 N94-22522
Khoros software specification format and interoperability p 1927 N94-22523
The evolution of the FIGARO data reduction system
p 2048 N94-22528

SOFTWARE RELIABILITY
Qualifying codes under software quality assurance: Two examples as guidelines for codes that are existing or under development
[DE93-040452] p 1904 N94-20097
Test and evaluation: DOD has been slow in improving testing of software-intensive systems
[AD-A271541] p 1908 N94-20917
An assessment of the statistical and editorial output of text analysis programs
[AD-A272185] p 2042 N94-20924
Fault tolerant real-time systems
[AD-A272878] p 1899 N94-21195
Real-time fault tolerant computer systems
[AD-A272909] p 1899 N94-21230
Using stream interleaving to eliminate the need for interlocks in deeply pipelined processors
p 1781 N94-22175
Trends in software reliability modeling
p 1788 N94-22214

SOFTWARE REUSE
Advanced software development workstation: Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
[NASA-CR-193643] p 1930 N94-21065

SOFTWARE TOOLS
SISSY: An example of a multi-threaded, networked, object-oriented databased application
[DE93-019742] p 2041 N94-19811
Reference manual for a Requirements Specification Language (RSL), version 2.0
[NASA-CR-191460] p 1898 N94-20039
PREVAIL-DM: A framework-based environment for formal hardware verification
[RR-899] p 1905 N94-20164
Advanced software development workstation: Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
[NASA-CR-193643] p 1930 N94-21065
Experiments on technology mapping using different cell libraries p 1758 N94-21118
Design of a computer assisted tool for object oriented acquisition, modeling and simulation of knowledge structure
[ETN-93-94183] p 1910 N94-21152
An investigation into the state of the practice of CASE tool integration
[AD-A272441] p 1912 N94-21205
Integration opportunities for computer models, methods, and GIS used in Corps planning studies
[AD-A271714] p 2044 N94-21354
Combination of on ground experiments and analysis software for the evaluation of material degradation in space (SILEX project) p 1662 N94-21389
Security evaluation of Unix networks
[AD-A273076] p 1945 N94-21520
Computer-Aided Test Equipment Graphics System (CATEGS)
[DE94-000383] p 1915 N94-21561
Analog/digital pH meter system I.C.
p 1764 N94-21701
Heuristic-based scheduling algorithm for high level synthesis p 1764 N94-21704
Model-based reasoning for power system management using KATE and the SSM/PMAD
[NASA-CR-194716] p 1671 N94-21882
Automated analysis tools for reducing spacecraft telemetry data
[DE94-000400] p 1657 N94-21981
Three original programmes for managers
p 1923 N94-22083
Method and software for decision making in public problems p 1923 N94-22087
Formal hardware verification in Maple
p 1771 N94-22112
Software systems used for unstructured grid generation at NASA Langley p 1918 N94-22351
NASA-Ames Research Center unstructured technology development p 1919 N94-22352
New IRAF stellar photometry software
p 1925 N94-22464
SPPTOOLS: Programming tools for the IRAF SPP language p 1925 N94-22474
FITS data conversion efforts at the Compton Observatory Science Support Center
p 1926 N94-22488
The IDL astronomy user's library
p 2048 N94-22500
GRO/EGRET data analysis software: An integrated system of custom and commercial software using standard interfaces p 1926 N94-22501
XPI: The Xanadu Parameter Interface
p 1927 N94-22513
Development of the FITS tools package for multiple software environments p 1927 N94-22516
Managing an archive of weather satellite images
p 2048 N94-22525
Tools for the IDL widget set within the X-windows environment p 1927 N94-22538
DECONV-TOOL: An IDL based deconvolution software package p 1927 N94-22542
The STARLINK software collection
p 1927 N94-22545

SOI (SEMICONDUCTORS)
Fully-depleted silicon-on-sapphire and its application to advanced VLSI design p 1765 N94-21709

SOIL MAPPING
Analysis of hyper-spectral AVIRIS image data over a mixed-conifer forest in Maine p 1838 N94-20959

SOIL MOISTURE
Synergism of active and passive microwave data for estimating bare surface soil moisture
p 1727 N94-20444
Application of neural network to remote sensing of soil moisture using theoretical polarimetric backscattering coefficients p 1730 N94-20455
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations
[NASA-CR-194802] p 1837 N94-20951
Snow cover measurements and areal assessment of precipitation and soil moisture
[WMO-749] p 1841 N94-21068
Areally averaged estimates of surface heat flux from ARM field studies
[DE93-018569] p 1859 N94-22036

SOIL SCIENCE
Soil temperatures
[KNMI-WR-92-05] p 1865 N94-20309
Visible-infrared properties of controlled laboratory soils
p 1685 N94-20689

SOILS
A general rough-surface inversion algorithm: Theory and application to SAR data p 1719 N94-20407
Visible-infrared properties of controlled laboratory soils
p 1685 N94-20689
Thermal infrared remote sensing and Kirchhoff's law: 1. Laboratory measurements p 1685 N94-20733
Determination of Martian soil mineralogy and water content using the Thermal Analyzer for Planetary Soils (TAPS) p 1812 N94-22433
Mass spectrometer-pyrolysis experiment for atmospheric and soil sample analysis on the surface of Mars p 1812 N94-22435

SOL-GEL PROCESSES
Preparation and properties of sol-gel derived PZT thin films for decoupling capacitor applications
[DE93-018853] p 2013 N94-19961
Photonics and nonlinear optics with molecular materials and polymers
[AD-A271747] p 1988 N94-21457

SOLAR ACTIVITY
Solar proton events from a 180 year depth profile of nitrate concentrations from the central Greenland ice sheet
[AD-A272888] p 2147 N94-21196
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522
Determination of coronal magnetic fields from vector magnetograms
[NASA-CR-194744] p 2147 N94-21877

SOLAR ACTIVITY EFFECTS
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549

SOLAR ARRAYS
Fabrication of stable large-area thin-film CdTe photovoltaic modules
[DE93-018204] p 1845 N94-20095
Self-deploying photovoltaic power system
[NASA-CASE-LEW-15308-1] p 1846 N94-20196

SOLAR ATMOSPHERE
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522
Solar imaging vector magnetograph
[NASA-CR-194729] p 1810 N94-21876

SOLAR BLANKETS
Self-deploying photovoltaic power system
[NASA-CASE-LEW-15308-1] p 1846 N94-20196

SOLAR CELLS
High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Development of a numerical simulation model for a-Si:H solar cells and application to the analysis of experimentally obtained spectral characteristics
[ETN-93-95061] p 1846 N94-20151
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1847 N94-21614
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617
Stable, high-efficiency amorphous-silicon solar cells with low hydrogen content
[DE93-018214] p 1848 N94-21826
Thin-film CdTe and CuInSe2 photovoltaic technologies
[DE93-018217] p 1848 N94-21827
Annual Report, Materials Science Branch, FY 1992
[DE94-000204] p 1849 N94-22015

Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE93-016220] p 1850 N94-22257

SOLAR COLLECTORS
Fluid absorption solar energy receiver
[NASA-CR-194688] p 1846 N94-20229

SOLAR CORONA
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522
Determination of coronal magnetic fields from vector magnetograms
[NASA-CR-194744] p 2147 N94-21877
Highlights of Yohkoh results p 2001 N94-22632
X ray jets in the solar corona: Observations with Yohkoh Soft X Ray Telescope p 2004 N94-22655
Large-scale structure of the solar plasma corona: An analysis of Yohkoh SXT images p 2004 N94-22657
MHD relaxation in magnetic loops p 2004 N94-22658

SOLAR CORPUSCULAR RADIATION
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875
Comparison of single event upset rates for microelectronic memory devices during interplanetary solar particle events p 1754 N94-21085
Mean elemental composition and He-3 enrichments in solar energetic particles p 2006 N94-22670

SOLAR DYNAMIC POWER SYSTEMS
Fluid absorption solar energy receiver
[NASA-CR-194688] p 1846 N94-20229

SOLAR ENERGY
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043

SOLAR ENERGY CONVERSION
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Fluid absorption solar energy receiver
[NASA-CR-194688] p 1846 N94-20229
Proceedings of the 1993 DOE/NREL Hydrogen Program Review
[DE93-018207] p 1847 N94-21616

SOLAR FLARES
Comparison of single event upset rates for microelectronic memory devices during interplanetary solar particle events p 1754 N94-21085
Berne (Switzerland) solar observations: Data for April 1991 - August 1992
[REPT-59] p 2147 N94-21150
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194726] p 2147 N94-21815
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194727] p 2147 N94-21832
Solar imaging vector magnetograph
[NASA-CR-194729] p 1810 N94-21876
Highlights of Yohkoh results p 2001 N94-22632
Preliminary results of observations of solar flares with Nobeyama Radioheliograph p 2001 N94-22633
Radiation from solar flares p 2001 N94-22634
Energy release at Alfvenic fronts in solar flares p 2003 N94-22652
Non-equilibrium ionization in an M class solar flare p 2004 N94-22653
Numerical simulation of magnetic reconnection associated with emerging flux in the solar atmosphere p 2004 N94-22654
Yohkoh Gamma ray Spectral Observations (YGSO) p 2004 N94-22656
Large-scale structure of the solar plasma corona: An analysis of Yohkoh SXT images p 2004 N94-22657
MHD relaxation in magnetic loops p 2004 N94-22658
Current loop coalescence studied by 3-D electromagnetic particle code p 2005 N94-22660
Formation of fast magnetosonic shock waves during two current loops collision in solar flare p 2005 N94-22662
Acceleration of solar-flare particles as viewed from their chemical composition p 2006 N94-22672

SOLAR FLUX
Berne (Switzerland) solar observations: Data for April 1991 - August 1992
[REPT-59] p 2147 N94-21150
Requirements for the early atmosphere of Mars from nitrogen isotope ratios p 2144 N94-21669
Mars and the early Sun p 2146 N94-21683
Comparisons of downwelling radiation to model predictions based on groundbased measurements during FIRE 1991 p 1876 N94-22320

SOLAR GENERATORS
Investigation on the chemically fixing technique of carbon dioxide utilizing solar energy
[DE94-714886] p 1849 N94-22043
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092

SOLAR INSTRUMENTS
Concept report: Experimental vector magnetograph (EXVM) operational configuration balloon flight assembly
[NASA-CR-194702] p 1638 N94-21776
Solar imaging vector magnetograph
[NASA-CR-194729] p 1810 N94-21876

SOLAR MAGNETIC FIELD
Concept report: Experimental vector magnetograph (EXVM) operational configuration balloon flight assembly
[NASA-CR-194702] p 1638 N94-21776
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194726] p 2147 N94-21815
Solar imaging vector magnetograph
[NASA-CR-194729] p 1810 N94-21876
Determination of coronal magnetic fields from vector magnetograms
[NASA-CR-194744] p 2147 N94-21877
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552

SOLAR OBSERVATORIES
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549
Highlights of Yohkoh results p 2001 N94-22632
Yohkoh Gamma ray Spectral Observations (YGSO) p 2004 N94-22656

SOLAR OSCILLATIONS
Tests of a simple data merging algorithm for the GONG project p 1927 N94-22549

SOLAR PHYSICS
Development, refinement, and testing of a short term solar flare prediction algorithm
[NASA-CR-194727] p 2147 N94-21832
Determination of coronal magnetic fields from vector magnetograms
[NASA-CR-194744] p 2147 N94-21877

SOLAR PLANETARY INTERACTIONS
Mars and the early Sun p 2146 N94-21683

SOLAR PROTONS
Solar proton events from a 180 year depth profile of nitrate concentrations from the central Greenland ice sheet
[AD-A272888] p 2147 N94-21196
Acceleration of solar-flare particles as viewed from their chemical composition p 2006 N94-22672

SOLAR RADIATION
SCR neon and argon in Kapoeta feldspar: Evidence for an active ancient Sun p 2106 N94-20712
The simulation of action of some space environment factors on Teflon and on rubber materials p 1661 N94-21380
The energy performance of prototype holographic glazings
[DE93-040451] p 1809 N94-21545
The young Sun and photochemistry of the primitive Martian atmosphere p 2145 N94-21679
Evolution of the Martian atmosphere p 2146 N94-21680
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092
The use of ERBE data for climate studies p 1860 N94-22286

SOLAR RADIO EMISSION
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952

SOLAR REFLECTORS
High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805

SOLAR SENSORS
Multisensor pinhole yawsonde
[AD-A271715] p 1808 N94-20930

SOLAR SIMULATORS
Solar simulator for solar dynamic space power system testing
[NASA-TM-106393] p 1984 N94-20140

SOLAR SPECTRA
Berne (Switzerland) solar observations: Data for April 1991 - August 1992
[REPT-59] p 2147 N94-21150

SOLAR SYSTEM EVOLUTION
FE-60 and the evolution of eucrites p 2083 N94-20768
Variety in planetary systems p 2086 N94-20871

SOLAR WIND
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-194728] p 1856 N94-20537
A long-term change of the AR/KR/XE fractionation in the solar corpuscular radiation p 2136 N94-20875
High resolution studies of the structure of the solar atmosphere
[AD-A273084] p 2147 N94-21522
Implications of Viking dayside auroral measurements
[ISBN-0-315-83273-8] p 1861 N94-22575
Laboratory relations between the solar wind dynamic pressure and the magnetospheric structures of the Earth and comets p 2003 N94-22647
Laboratory structure of the heliopause p 2003 N94-22648
Compressible MHD turbulence in the interplanetary medium p 2003 N94-22650
Tangential stress due to Kelvin-Helmholtz instability at the magnetospheric boundary p 2003 N94-22651
Solar wind-magnetosphere interaction as simulated by a 3D, EM particle code p 2007 N94-22674

SOLDERED JOINTS
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
Process characterization and control of hand-soldered printed wiring assemblies
[DE93-041290] p 1763 N94-21652

SOLDERING
Solder technology in the manufacturing of electronic products
[DE93-018842] p 1699 N94-19960
Process characterization and control of hand-soldered printed wiring assemblies
[DE93-041290] p 1763 N94-21652

SOLDERS
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
Solder technology in the manufacturing of electronic products
[DE93-018842] p 1699 N94-19960

SOLENOIDS
Performance of the high brightness linac for the Advanced Free Electron Laser Initiative at Los Alamos
[DE93-040141] p 1816 N94-20277

SOLID CRYOGENS
Energy storage and conversion in solid hydrogen
[AD-A271439] p 1845 N94-20086

SOLID ELECTRODES
Surface electrochemistry of metals
[AD-A272913] p 1691 N94-21245

SOLID ELECTROLYTES
Modeling of polymer electrolyte fuel cell systems
[DE93-041187] p 1847 N94-21774
The electrochemical performance of thin-electrolyte solid oxide fuel cells
[DE93-041184] p 1848 N94-21942
Survey on chemical engineering technologies for the global environmental protection
[DE94-714887] p 1852 N94-22044

SOLID MECHANICS
The program system for the diagnostics of strains and fracture prediction of solids p 1836 N94-22065

SOLID PHASES
Cooling apparatus and couplings therefor
[NASA-CASE-ARC-11921-1] p 1800 N94-20371
Some experiments on using backscattered electron and energy dispersive x ray imaging in determination of portland cement clinker phase composition p 1708 N94-21893

SOLID PROPELLANT COMBUSTION
Detailed structure study of an H2/N2O/Ar flame employing molecular beam mass spectrometry, laser spectroscopy, and modeling
[AD-A270720] p 1679 N94-20111

SOLID PROPELLANT ROCKET ENGINES
Investigation of flame driving and flow turning in axial solid rocket instabilities
[AD-A271066] p 1667 N94-20015

SOLID ROCKET PROPELLANTS
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181

SOLID SOLUTIONS
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926

SOLID STATE
Shock wave interactions with exothermic mixtures
[AD-A271149] p 1829 N94-19836
An equation of state for shock in homogeneous materials and comparison to shock data
[AD-A271436] p 1829 N94-19881
Solid State Technology Branch of NASA Lewis Research Center: Fifth Annual Digest
[NASA-TM-106303] p 1732 N94-20497

High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
SOLID STATE DEVICES
Multiport solid-state imager characterization at variable pixel rates
[DE93-018366] p 1808 N94-20287
Compositional diversity of the lunar North Pole: Preliminary analyses of Galileo SSI data
p 2101 N94-20686
Compact lightweight CO2 laser for SDIO application
[AD-A273010] p 1817 N94-21284
SOLID STATE LASERS
Suppression of relaxation oscillations in flashpumped, two-micron tunable solid state lasers
[AD-D015928] p 1814 N94-19800
Resonantly pumped, erbium-doped, GSGG, 2.8 micron, solid state laser with energy recycling and high slope efficiency
[AD-D015920] p 1815 N94-20060
Simulations of spectral broadening by cross-phase modulation (XPM) with chaotic light pulses
[DE93-019623] p 1819 N94-21872
SOLID STATE PHYSICS
Spin-polaron theory of high-T(c) superconductivity. 3: Gap function and critical temperature
[DE93-019198] p 2030 N94-21831
SOLID WASTES
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569
SOLID-SOLID INTERFACES
Surface treatment of InP and contribution to the optimization of the InP(p)/InP(p) regrown interfaces grown by GSMBE
[ECL-92-48] p 2018 N94-20598
SOLIDIFICATION
Microstructure evolution in the presence of constraints and implications on the properties of Mg-Li and Nb-Al constraints
[AD-A272088] p 1674 N94-20623
The incongruent melting and melt textured solidification process of Bi2Sr2CaCu3O8
[DE93-041123] p 2032 N94-21936
SOLIDIFIED GASES
Stability of the face-centered-cubic phase of heavy rare gas solids
[DE93-019949] p 1679 N94-20319
Theoretical phase diagrams for solid H(sub 2)
[DE94-001049] p 1684 N94-22395
SOLIDS
Thermal diffusivity measurements by photothermal laser beam deflection (PTD): Data analysis using the Levenberg-Marquardt algorithm p 1820 N94-21006
SOLITARY WAVES
Multidimensional solitons in fiber arrays
[DE93-019923] p 1983 N94-19862
Spatial patterns in semiconductor lasers
[DE93-040056] p 1814 N94-19865
Two-dimensional nonlinear Schrodinger equations and their properties
[AD-A272184] p 1952 N94-20923
The onset and spectra of a magnetized Langmuir turbulence p 2006 N94-22673
SOLUBILITY
High performance heavy alloys by alloying and process control
[AD-A271129] p 1689 N94-20019
The use of x ray techniques in the in situ study of corrosion
[DE93-019845] p 1690 N94-20301
Cathode materials for the molten carbonate fuel cell
[DE93-019515] p 1848 N94-21870
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947
SOLUTES
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947
SOLVATION
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947
SOLVENTS
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers
[AD-A271128] p 1699 N94-20016
Integral equation calculation of solvent activation free energies for electron and proton transfer reactions
[AD-A272665] p 1681 N94-21216
Dynamics of adsorbed, swollen block copolymers
[AD-A272013] p 1706 N94-21460
Techniques for the flux growth of optical materials: Growth of beta-barium borate
[AD-A272717] p 2028 N94-21505
Femtosecond dynamics in hydrogen-bonded solvents
[DE93-019937] p 1683 N94-21842
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947
SOOT
Dual-beam multiple wavelength light transmittance measurement for particle sizing in rocket motor plumes
[AD-A272491] p 1670 N94-21208
SORBENTS
A calcium oxide sorbent process for bulk separation of carbon dioxide
[DE93-019288] p 1847 N94-21540
SOS (SEMICONDUCTORS)
Single-event upset testing of the performance semiconductor 1750A CMOS/SOS chip set
[AD-A271158] p 2015 N94-20184
Fully-depleted silicon-on-sapphire and its application to advanced VLSI design p 1765 N94-21709
SOUND AMPLIFICATION
Journal of rehabilitation research and development, volume 30, number 1, 1993
[AD-A272956] p 1893 N94-21613
SOUND DETECTING AND RANGING
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
SOUND GENERATORS
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
SOUND PRESSURE
Stability curves for a thermoacoustic prime mover
[AD-A272607] p 1968 N94-21422
Computation of the sound generated by isotropic turbulence
[NASA-CR-191543] p 1804 N94-21880
SOUND PROPAGATION
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
SOUND TRANSMISSION
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
SOUND WAVES
Nonlinear acoustics: Periodic waveguide, finite-amplitude propagation in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A270530] p 1967 N94-19894
Acoustic radiation damping of flat rectangular plates subjected to subsonic flows
[NASA-TM-109382] p 1967 N94-20211
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
A survey of the impact on acoustic propagation of warm core ocean eddys
[AD-A272188] p 1883 N94-20925
Comparison of higher order moment spectrum estimation techniques
[AD-A272967] p 1967 N94-21260
Approximation to sound radiation and scattering by simply supported layered cylinder
[AD-A272964] p 1967 N94-21306
Speed of sound data and related models for mixtures of natural gas constituents
[PB93-200822] p 1968 N94-21447
Surface acoustic wave sensing of VOC's in harsh chemical environments
[DE93-040721] p 1968 N94-21751
Three dimensional ultrasonic imaging
[DE93-040549] p 1968 N94-22003
Acoustic, fiber optic, and silicon microelectronic microsensors research and development activities at Sandia National Laboratories
[DE93-019075] p 1770 N94-22040
Interface reflection of spherical acoustic waves in the first- and second-order rational parabolic approximations and their artifacts
[PB93-215424] p 1969 N94-22261
Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised)
[PB93-215432] p 1969 N94-22262
Enhanced absorption of p-modes on sunspot and plage regions p 2006 N94-22671
SOURCE PROGRAMS
A parallelizing compiler based on partial evaluation
[AD-A270838] p 1898 N94-19832
Application guide for universal source encoding for space
[NASA-TP-3441] p 1741 N94-21783
SOUTHERN SKY
Deep near-infrared survey of the Southern Sky (DENIS) p 2062 N94-22467
SPACE BASED RADAR
Space-based radar for moving target detection
p 1745 N94-22143
SPACE CHARGE
Space-charge dominated beam transport in magnetic quadrupoles with large aperture ratios
[DE93-040443] p 1992 N94-20004
Simulation studies of space-charge-dominated beam transport in large aperture ratio quadrupoles
[DE93-019238] p 1981 N94-21440
Evaluation of externally heated pulsed MPD thruster cathodes
[NASA-CR-191090] p 1670 N94-21565
SPACE COMMUNICATION
A compact, portable EHF/SHF antenna for advanced SCAMP
[AD-A272614] p 1739 N94-21211
Mission Operations Support Area (MOSA) for ground network support p 1932 N94-21331
Using manufacturing message specification for monitor and control at Venus p 1932 N94-21333
Predicting scheduling success p 1932 N94-21334
Generating and evaluating alternate schedules
p 1933 N94-21336
The Test Analysis Retrieval System (TARS): Meeting the challenges of the network's test processes
p 1933 N94-21337
SPACE DEBRIS
Space Station trash removal system
[NASA-CASE-MSC-21723-1] p 1657 N94-20367
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields
[AD-A272123] p 1831 N94-20572
Determination of parameters for hypervelocity dust grains encountered in near-Earth space
p 2084 N94-20817
A fresh look at crater scaling laws for normal and oblique hypervelocity impacts p 1666 N94-20864
Orbital debris and micrometeoroids: LDEF and Mir data p 1659 N94-21368
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377
Meteoroids and debris impact risk assessment on Columbus and Hermes using a realistic geometrical analysis tool p 1662 N94-21388
SPACE ENVIRONMENT SIMULATION
Apparatus for simulating an exoatmospheric structure
[NASA-CASE-MSC-21975-1] p 1653 N94-20339
New technique for oil backstreaming contamination measurements p 1652 N94-20511
Fifth International Symposium on Materials in a Space Environment
[ISBN-2-85-428293-0] p 1659 N94-21367
Flight and laboratory testing of materials in low Earth orbit p 1659 N94-21369
Complex-2: Low Earth orbital environment simulation facility for materials durability evaluation
p 1653 N94-21370
The simulation of action of some space environment factors on Teflon and on rubber materials
p 1661 N94-21380
Effect of geostationary environment constituents on secondary electron emission rates p 1661 N94-21382
Simulated space environmental effects on some experimental high performance polymers
p 1662 N94-21385
Durability of thermal control and environmental protective materials for the SSRMS in simulated LEO environment p 1663 N94-21392
Atomic oxygen interaction with spacecraft materials: Relationship between orbital and ground-based testing for materials certification p 1663 N94-21393
Fast oxygen atom studies related to low Earth orbit activities p 1663 N94-21395
SPACE EXPLORATION
Low energy CMOS for space applications
p 1768 N94-21735
Mars exploration study workshop 2
[NASA-CP-3243] p 2146 N94-21883
Robotic concepts for operation in barren terrain
[DE93-040539] p 1946 N94-21925
SPACE FLIGHT
Cosmos 2229
[NASA-CR-194734] p 1895 N94-20338
SPACE MAINTENANCE
Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01
[NASA-TM-109344] p 1653 N94-20192
EVA tools and equipment reference book
[NASA-TM-109350] p 1897 N94-21812
SPACE MISSIONS
Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01
[NASA-TM-109344] p 1653 N94-20192

NEP Early Flight program: System performance and development considerations
[NASA-TM-106415] p 1654 N94-21570
A generic archive protocol and an implementation p 2047 N94-22493

SPACE NAVIGATION
Pointing control design for autonomous space vehicle applications
[DE93-019943] p 1657 N94-19863

SPACE PERCEPTION
Why stereo vision is not always about 3D reconstruction
[AD-A270522] p 1939 N94-19893

SPACE PLASMAS
A study of Saturn's E-ring particles using the Voyager 1 plasma wave instrument
[NASA-CR-194694] p 2068 N94-20048
Ionospheric photoelectrons measured at geosynchronous orbit
[AD-A272431] p 1857 N94-21202
A new innovative instrument for space plasma instrumentation
[NASA-CR-194736] p 1666 N94-21780
Circumstellar environments of Be stars at infra-red and radio wavelengths
[ISBN-0-315-83135-9] p 2081 N94-22426
Consequences of chaotic particle motion for the stability of space plasma current sheets p 2001 N94-22636
Physical properties of dense astrophysical plasmas p 2001 N94-22637
Thermal properties and radiation processes in astrophysical plasmas p 2002 N94-22640
Pair plasmas in the galactic center region and in Nova Muscae p 2009 N94-22691

SPACE PLATFORMS
Obtaining surface optical properties from space-based lidar systems
[AD-A272831] p 1967 N94-21172

SPACE POWER REACTORS
Preliminary SP-100/Stirling heat exchanger designs
[NASA-TM-106444] p 1670 N94-21809
SPACE-R Thermionic Space Nuclear Power System: Design and Technology Demonstration Program
[DE93-013969] p 1670 N94-21824
Temperature and Doppler coefficients of various space nuclear reactors
[DE94-001368] p 1671 N94-21979

SPACE PROCESSING
Melt-spin processing of high (Tc) oxide superconductors
[DE94-000696] p 2036 N94-22582

SPACE PROGRAMS
Aerospace: Facts and figures, 1992-1993
[AD-A272571] p 1635 N94-21419

SPACE SHUTTLE BOOSTERS
Parameters affecting hydrogen chloride measurements
[AD-A271326] p 1851 N94-20025

SPACE SHUTTLE MAIN ENGINE
Space Shuttle Main Engine. Overview p 1667 N94-20070
Rocketdyne turbomachinery p 1667 N94-20071
Future technical directions p 1668 N94-20072
Entry velocities at Mars and Earth for short transit times
[AD-A272591] p 1665 N94-21420
Detailed study of oxidation/wear mechanism in lox turbopump bearings
[NASA-TM-108434] p 1825 N94-21580

SPACE SHUTTLE ORBITERS
Compilation of reinforced carbon-carbon transatlantic abort landing arc jet test results
[NASA-TM-104778] p 1676 N94-21634

SPACE SHUTTLE PAYLOADS
Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01
[NASA-TM-109344] p 1653 N94-20192

SPACE SHUTTLES
Future technical directions p 1668 N94-20072
Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01
[NASA-TM-109344] p 1653 N94-20192

SPACE SIMULATORS
Measurements of the dielectric properties of simulated comet material as part of the KOSI 10 experiment p 2085 N94-20841

SPACE STATION FREEDOM
System performance predictions for Space Station Freedom's electric power system
[NASA-TM-106396] p 1667 N94-20062
The International Telecommunications Satellite (INTELSAT) Solar Array Coupon (ISAC) atomic oxgyen flight experiment: Techniques, results and summary p 1662 N94-21391

SPACE STATION POWER SUPPLIES
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377

SPACE STATION STRUCTURES
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1821 N94-20126

SPACE STATIONS
Space Station trash removal system
[NASA-CASE-MSC-21723-1] p 1657 N94-20367
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields
[AD-A272123] p 1831 N94-20572
Rewetting of monogroove heat pipe in Space Station radiators
[NASA-CR-194781] p 1804 N94-21820

SPACE SURVEILLANCE (GROUND BASED)
NAVSPASUR sensor system digital signal processing receiver. Volume 1: Hardware and software overview
[AD-A272899] p 1738 N94-21198
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218

SPACE TOOLS
EVA tools and equipment reference book
[NASA-TM-109350] p 1897 N94-21812

SPACE TRANSPORTATION
NASA Propulsion Engineering Research Center, volume 1
[NASA-CR-194721-VOL-1] p 1671 N94-22428

SPACE TRANSPORTATION SYSTEM
A simulation model for probabilistic analysis of Space Shuttle abort modes
[NASA-TM-108432] p 1656 N94-21859
Johnson Space Center CFD grid generation requirements p 1919 N94-22355

SPACE TRANSPORTATION SYSTEM FLIGHTS
Space Shuttle Mission STS-61: Hubble Space Telescope servicing mission-01
[NASA-TM-109344] p 1653 N94-20192
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-51
[NASA-TM-109189] p 1656 N94-21884

SPACE-TIME FUNCTIONS
Interface reflection of spherical acoustic waves in the first- and second-order rational parabolic approximations and their artifacts
[PB93-215424] p 1969 N94-22261
Non commutative geometry and physics
[PB93-215499] p 1961 N94-22264
Canonically covariant formulation of Landau's Newtonian superfluid dynamics
[PB93-221034] p 1805 N94-22272

SPACEBORNE ASTRONOMY
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485
SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486
Quality control of EUVE databases p 2047 N94-22490
The application of artificial intelligence to astronomical scheduling problems p 1949 N94-22492

SPACEBORNE EXPERIMENTS
Stability limits and dynamics of nonaxisymmetric liquid bridges
[NASA-CR-194706] p 1797 N94-20037
Conversion of LDEF experiment M0003 sample observation database to MS-DOS formats
[AD-A272945] p 1681 N94-21226
Flight and laboratory testing of materials in low Earth orbit p 1659 N94-21369
German space experiments on Spacelab D-2 and Eureca-1 to investigate atomic oxygen interaction with materials p 1662 N94-21390
The International Telecommunications Satellite (INTELSAT) Solar Array Coupon (ISAC) atomic oxgyen flight experiment: Techniques, results and summary p 1662 N94-21391

SPACEBORNE PHOTOGRAPHY
The application of spaceborne synthetic aperture radar in the maritime environment
[DRA-TM(AWE)-91013] p 1737 N94-20596

SPACEBORNE TELESCOPES
UIT support observations archive p 2048 N94-22534

SPACECRAFT ANTENNAS
Magellan vertical polarization radar observations p 1744 N94-20691

SPACECRAFT CHARGING
Effect of geostationary environment constituents on secondary electron emission rates p 1661 N94-21382
Electrostatic charging and secondary effects in materials submitted to radiation in space p 1661 N94-21383
TROPIX plasma interactions group report
[NASA-CR-191149] p 1666 N94-21864

SPACECRAFT COMPONENTS
Clementine: An inexpensive mission to the Moon and Geographos p 1652 N94-20765
Process and apparatus for the release of a prestress initially applied to a mechanism such as a bearing on board a space vehicle
[CA-PATENT-APPL-SN-2,020,90] p 1824 N94-21142

SPACECRAFT CONSTRUCTION MATERIALS
Fifth International Symposium on Materials in a Space Environment
[ISBN-2-85-428293-0] p 1659 N94-21367
Flight and laboratory testing of materials in low Earth orbit p 1659 N94-21369
Complex-2: Low Earth orbital environment simulation facility for materials durability evaluation p 1653 N94-21370
Results of the post flight analyses on system materials for the LDEF-FRECOPA experiment p 1659 N94-21371
Integrity and testing concerns of thermostructural materials p 1661 N94-21384
Materials evaluation at ESA/ESTEC p 1662 N94-21386
Columbus: Materials for 30 years habitability in space p 1662 N94-21387
The International Telecommunications Satellite (INTELSAT) Solar Array Coupon (ISAC) atomic oxgyen flight experiment: Techniques, results and summary p 1662 N94-21391
Durability of thermal control and environmental protective materials for the SSRMS in simulated LEO environment p 1663 N94-21392
Atomic oxygen interaction with spacecraft materials: Relationship between orbital and ground-based testing for materials certification p 1663 N94-21393
Evaluation of plasma-deposited protective coatings for spacecraft applications p 1663 N94-21394
Fast oxygen atom studies related to low Earth orbit activities p 1663 N94-21395
Thermostructural material composites for space applications p 1664 N94-21398
Thermal control coatings p 1664 N94-21400
Study of space factors effect on materials for spacecraft external surfaces in NPO Energia programs p 1664 N94-21401
Columbus PMP Critical Technologies Program: Approach for materials life time prediction p 1664 N94-21402
R and D to HOPE airframe p 1665 N94-21406
Material properties and behavior during simulated atmospheric reentry p 1665 N94-21408
Outgassing data for selecting spacecraft materials
[NASA-RP-1124-REV-3] p 1676 N94-21889

SPACECRAFT CONTAMINATION
Measured space environmental effects to LDEF during retrieval p 1659 N94-21372
Residual atmosphere in the FRECOPA experiment and degassing of materials p 1660 N94-21374

SPACECRAFT CONTROL
Pointing control design for autonomous space vehicle applications
[DE93-019943] p 1657 N94-19863
Network command processing system overview p 1935 N94-21351

SPACECRAFT DESIGN
Power conditioning system modelling for nuclear electric propulsion
[NASA-CR-191136] p 1846 N94-21179
TROPIX plasma interactions group report
[NASA-CR-191149] p 1666 N94-21864

SPACECRAFT ELECTRONIC EQUIPMENT
Mongoose: Creation of a Rad-Hard MIPS R3000 p 1754 N94-21090

SPACECRAFT ENVIRONMENTS
Cosmos 2229
[NASA-CR-194734] p 1895 N94-20338
Toxicity of thermal degradation in a manned space environment p 1664 N94-21403

SPACECRAFT INSTRUMENTS
A packet switched communications system for GRO p 1744 N94-21345
Database of proposed payloads and instruments for SEI missions p 1811 N94-22432

SPACECRAFT LANDING
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 1658 N94-20590

SPACECRAFT LAUNCHING
Process and apparatus for the release of a prestress initially applied to a mechanism such as a bearing on board a space vehicle
[CA-PATENT-APPL-SN-2,020,90] p 1824 N94-21142
Specialized data analysis for the Space Shuttle Main Engine and diagnostic evaluation of advanced propulsion system components
[NASA-CR-194720] p 1656 N94-21813
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-51
[NASA-TM-109189] p 1656 N94-21884

Spaceplane flight simulation: Project definition
[PB93-211399] p 1651 N94-22094

SPACECRAFT POWER SUPPLIES
Solar simulator for solar dynamic space power system testing
[NASA-TM-106393] p 1984 N94-20140
Power standard
[ESA-PSS-02-10-VOL-1-ISSUE-] p 1669 N94-20241
Model-based reasoning for power system management using KATE and the SSM/PMAD
[NASA-CR-194716] p 1671 N94-21882

SPACECRAFT PROPULSION
Spacecraft Propulsion
[VKI-LS-1993-01] p 1667 N94-20068
Space Shuttle Main Engine. Overview
p 1667 N94-20070
Rocketdyne turbomachinery p 1667 N94-20071
Turbine design p 1668 N94-20075
Cryogenic propellant rocket engine problems
p 1668 N94-20076
Advanced transportation system studies, technical area 3. Alternate propulsion subsystem concepts: J-2S restart study
[NASA-CR-193874] p 1670 N94-21271
NEP Early Flight program: System performance and development considerations
[NASA-TM-106415] p 1654 N94-21570
Specialized data analysis for the Space Shuttle Main Engine and diagnostic evaluation of advanced propulsion system components
[NASA-CR-194720] p 1656 N94-21813

SPACECRAFT RADIATORS
Rewetting of monogroove heat pipe in Space Station radiators
[NASA-CR-194781] p 1804 N94-21820

SPACECRAFT SHIELDING
Thermally activated retainer means utilizing shape memory alloy
[NASA-CASE-MSC-21793-1] p 1654 N94-20304
Numerical simulations of hypervelocity impact experiments involving single Whipple bumper shields
[AD-A272123] p 1831 N94-20572
Hypervelocity impact
[AD-A272957] p 1831 N94-21249
Meteoroids and debris impact risk assessment on Columbus and Hermes using a realistic geometrical analysis tool p 1662 N94-21388

SPACECRAFT STRUCTURES
Apparatus for simulating an exoatmospheric structure
[NASA-CASE-MSC-21975-1] p 1653 N94-20339

SPACECRAFT TRACKING
NAVSPASUR sensor system digital signal processing receiver. Volume 1: Hardware and software overview
[AD-A272899] p 1738 N94-21198
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218

SPACECREWS
Spaceflight Radiation Health program at the Lyndon B. Johnson Space Center
[NASA-TM-104782] p 1893 N94-21863

SPACELAB
German space experiments on Spacelab D-2 and Eureca-1 to investigate atomic oxygen interaction with materials p 1662 N94-21390

SPARK GAPS
High-power gas switch with hydride electrodes
[AD-D015956] p 1751 N94-20354
Comparative study of INPIStron and spark gap
p 1995 N94-21293

SPATIAL DEPENDENCIES
Some practicable applications of quadtree data structures/representation in astronomy
p 1927 N94-22515

SPATIAL DISTRIBUTION
Spatial patterns in semiconductor lasers
[DE93-040056] p 1814 N94-19865
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1885 N94-20482
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1866 N94-20559
Seafloor characterization/Galapagos propagating rift
[AD-A272001] p 1882 N94-20581

SPATIAL FILTERING
Optical signal processing
[AD-A271036] p 1983 N94-20013
Phased array antenna with couplers in spatial filter arrangement
[CA-PATENT-1,296,098] p 1737 N94-21031
Scale-space filtering and threshold hierarchy for image segmentation p 1777 N94-22149
Spatial region filtering in IRAF/PROS
p 1927 N94-22524

SPATIAL RESOLUTION
Uncertainty limited atomic position measurement using optical fields
[AD-A271013] p 1970 N94-19822
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
Ultrafast scanning microscopy
[DE93-040121] p 1985 N94-20320
Transport in microstructures in the microwave and millimeter-wave regime
[AD-A271875] p 2017 N94-20470
GMM-1: A 50 degree and order gravitational field model for Mars p 2117 N94-20774
Earth-based measurement of lunar topography using delayed radar interferometry p 2119 N94-20787
Linear mixing model applied to AVHRR LAC data
p 1838 N94-20958
Micro-ellipsometric measurements of strained layer structures p 2025 N94-21008
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar
p 1874 N94-22310

SPECIFIC HEAT
Shock induced condensation in fluids of high molar specific heat: Shock structure and relaxation
[MPIS-106/1993] p 1798 N94-20145
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335
Specific heat of YBa2Cu3O7
[DE93-040640] p 2031 N94-21926
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987

SPECIFIC IMPULSE
Energy storage and conversion in solid hydrogen
[AD-A271439] p 1845 N94-20086
Optimization and performance analysis of a supersonic conical-flow waverider for a deck-launched intercept mission
[AD-A272498] p 1648 N94-21433
Powdered aluminum and oxygen rocket propellants: Subscale combustion experiments
[NASA-TM-106439] p 1713 N94-21760
Performance assessment of low pressure nuclear thermal propulsion
[NASA-TM-108433] p 1671 N94-21860

SPECIFICATIONS
Reference manual for a Requirements Specification Language (RSL), version 2.0
[NASA-CR-191460] p 1898 N94-20039
Specification and generation of Markov reward models
[MEMO-INF-92-60] p 1963 N94-21058
A simplified token bus protocol specified using LOTOS
[TR-92-15] p 1910 N94-21062
Application of the structures query language of APROS for specification of industrial processes
p 1923 N94-22078
Space Generic Open Avionics Architecture (SGOAA) standard specification
[NASA-CR-188269] p 1666 N94-22275

SPECTRA
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG)
[DE93-040546] p 1709 N94-21970

SPECTRAL EMISSION
Thermal infrared remote sensing and Kirchhoff's law: 1. Laboratory measurements p 1685 N94-20733
Spectral emissivity of cirrus clouds
p 1876 N94-22322

SPECTRAL ENERGY DISTRIBUTION
Comparison of higher order moment spectrum estimation techniques
[AD-A272967] p 1967 N94-21260

SPECTRAL LINE WIDTH
Effect of exciton localization and delocalization on magnetic-field-dependent photoluminescence linewidths in semiconductors
[DE93-018860] p 1748 N94-19884
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988

SPECTRAL METHODS
On the relationship between spectral domain approach and method of lines p 1794 N94-22254

SPECTRAL REFLECTANCE
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
Optical effects of space weathering on lunar soils and the role of the finest fraction p 2101 N94-20687
Comparison of visible and near-infrared reflectance spectra of CM2 carbonaceous chondrites and primitive asteroids p 2085 N94-20848
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1
p 2136 N94-20876
In-situ spectroscopic ellipsometry for real time semiconductor growth monitor p 2024 N94-21003

SPECTRAL RESOLUTION
MinMap: An imaging spectrometer for high resolution compositional mapping of the Moon
p 1813 N94-20688
Analysis of hyper-spectral AVIRIS image data over a mixed-conifer forest in Maine p 1838 N94-20959
Michelson Interferometer (MINT)
p 1813 N94-21646
Multiorder etalon sounder (MOES) development and test for balloon experiment
[NASA-CR-194730] p 1859 N94-22026
Cirrus cloud retrievals from HIS observations during FIRE 2 p 1875 N94-22315
Adaptive filtering of Echelle spectra of distant Quasars
p 2072 N94-22520

SPECTRAL SENSITIVITY
On coefficient quantization and computational roundoff effects in frequency interpolation filter banks
p 1793 N94-22251

SPECTRAL SIGNATURES
A study of carbonates, sulfates, and phosphates using thermal emission spectroscopy p 1686 N94-20868
Predicting LANDSAT MSS endmember signatures from corresponding higher resolution TM fraction images
p 1839 N94-20962

SPECTROGRAMS
Comparison of higher order moment spectrum estimation techniques
[AD-A272967] p 1967 N94-21260
The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446

SPECTROGRAPHS
Writing instrument interfaces with xf/tktcl
p 1925 N94-22480
SPECFOCUS: An IRAF task for focusing spectrographs p 1965 N94-22540

SPECTROHELIOGRAPHS
Berne (Switzerland) solar observations: Data for April 1991 - August 1992
[REPT-59] p 2147 N94-21150
Preliminary results of observations of solar flares with Nobeyama Radioheliograph p 2001 N94-22633

SPECTROMETERS
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
Wavelength dispersive analysis with the synchrotron x ray fluorescence microprobe p 1685 N94-20717
Combined backscatter Moessbauer spectrometer/x ray fluorescence analyzer (BaMS/XRF) for extraterrestrial surfaces p 1686 N94-20761
Mirror velocity sampling errors in a Michelson interferometer
[AD-A273105] p 1809 N94-21508
Applications of correlator chips in radio science
p 1763 N94-21695
A 1 GHz sample rate, 256-channel, 1-bit quantization, CMOS, digital correlator chip p 1768 N94-21732
Low power, CMOS digital autocorrelator spectrometer for spaceborne applications p 1666 N94-21733
A Backscatter Moessbauer Spectrometer (BaMS) for use on Mars p 1811 N94-22431

SPECTROPHOTOMETRY
Comparison of visible and near-infrared reflectance spectra of CM2 carbonaceous chondrites and primitive asteroids p 2085 N94-20848

SPECTRORADIOMETERS
Intercomparison of MAS, AVIRIS, and HIS data from FIRE cirrus 2 p 1872 N94-22298

SPECTROSCOPIC ANALYSIS
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924
Microscopic origins of metastable effects in a-Si:H and deep defect characterization in a-Si,Ge:H alloys
[DE93-018205] p 1688 N94-19985
Magnetic properties and Moessbauer analyses of glass from the K-T boundary, Beloc, Haiti
p 1685 N94-20753
Multielement analysis of interplanetary dust particles using TOF-SIMS p 2084 N94-20790

Ellipsometric measurements of molecular-beam-epitaxy-grown semiconductor multilayer thicknesses: A comparative study p 1710 N94-20983
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis p 1710 N94-20984
Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry p 1796 N94-20985
Variable angle spectroscopic ellipsometric characterization of surface damage in chemical-mechanical polished GaAs p 1710 N94-20986
Variable angle of incidence spectroscopic ellipsometric measurement of the Franz-Keldysh effect in MODFET structures p 2021 N94-20987
Ellipsometric analysis of built-in electric fields in semiconductor heterostructures p 1796 N94-20988
Optical measurement of built-in and applied electric fields in Al(x)Ga(1-x)As/GaAs heterostructures p 1796 N94-20989
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry p 2022 N94-20992
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
Characterization of an asymmetric triangular multiple quantum well, by variable angle spectroscopic ellipsometry p 2022 N94-20995
GaAs(100) surface modifications at elevated temperatures, studied by in-situ spectroscopic ellipsometry p 2023 N94-20997
Ellipsometric study of GaAs(100) surface changes induced at elevated temperatures p 2023 N94-20998
Asbestos characterization using scanning electron microscopy/light element x ray spectrometry
[AD-A271611] p 1681 N94-21241
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768
Gamma ray spectrometry of LDEF samples: Results of 1992 analyses
[DE94-001177] p 1684 N94-22046
Low temperature absorption spectra and ground state electronic structure of tetrakis(2,6-di-tert-butylphenoxide)uranium(IV)
[DE94-000774] p 2035 N94-22367

SPECTROSCOPY
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953
Development of a numerical simulation model for a-Si:H solar cells and application to the analysis of experimentally obtained spectral characteristics
[ETN-93-95061] p 1846 N94-20151
Time-of-flight heavy ion backscattering spectrometry
[DE93-019067] p 1973 N94-20306
Characterization of amorphous material in shocked quartz by NMR spectroscopy
[DE93-019069] p 1679 N94-20307
Spectroscopic ellipsometry studies of HF treated Si (100) surfaces p 1734 N94-20508
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 1734 N94-20510
Thin-film hermeticity: A quantitative analysis of diamondlike carbon using variable angle spectroscopic ellipsometry p 1710 N94-20981
Variable angle of incidence spectroscopic ellipsometric study of semiconductor multilayer structures p 2020 N94-20982
Dielectric function of InGaAs in the visible p 2023 N94-21000
Study of InGaAs-based modulation doped field effect transistor structures using variable-angle spectroscopic ellipsometry p 1796 N94-21001
Study of concentration-dependent dielectric properties of n-type GaAs using variable angle spectroscopic ellipsometry p 2024 N94-21002
In-situ spectroscopic ellipsometry for real time semiconductor growth monitor p 2024 N94-21003
Real-time analysis of in-situ spectroscopic ellipsometric data during MBE growth of III-V semiconductors p 2024 N94-21004
In-situ spectroscopic ellipsometry in molecular beam epitaxy p 2024 N94-21005
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009
Applications of variable angle spectroscopic ellipsometry in semiconductor technology p 2025 N94-21010
Fundamentals and applications of variable angle spectroscopic ellipsometry p 1687 N94-21011
Non-destructive evaluation in manufacturing using spectroscopic ellipsometry p 1828 N94-21012
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013
VASE (variable angle spectroscopic ellipsometry) p 1687 N94-21014
Validation of the design of a high resolution all-reflection Michelson interferometer for atmospheric spectroscopy
[AD-A272505] p 1987 N94-21410
Electronically metastable molecules of high symmetry
[AD-A272015] p 1974 N94-21461
Optical luminescence spectroscopy as a probe of the surface mineralogy of Mars p 1813 N94-22437
The spectral world coordinate systems in IRAF/NOAO p 2049 N94-22539

SPECTRUM ANALYSIS
A study of Saturn's E-ring particles using the Voyager 1 plasma wave instrument
[NASA-CR-194694] p 2088 N94-20048
High resolution signal processing
[AD-A271181] p 1717 N94-20215
Temperature dependence of 4f PES features and hole occupancy in ytterbium heavy fermions
[DE93-040131] p 1691 N94-20321
Characterization of electromagnetic fields in an extended chamber at the Short Pulse Experimental Electron Device (SPEED) simulator
[AD-A265955] p 1717 N94-20329
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
Visible-infrared properties of controlled laboratory soils p 1685 N94-20689
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800
Determining the composition of olivine on asteroidal surfaces p 1686 N94-20805
Objective determination of image end-members in spectral mixture analysis p 1686 N94-20831
Multispectral studies of selected crater- and basin-filling lunar Maria from Galilec Earth-Moon encounter 1 p 2136 N94-20876
Spectral analysis of chemisorbed CO2 on Mars analog materials p 2140 N94-20900
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
Characterization of an asymmetric triangular multiple quantum well, by variable angle spectroscopic ellipsometry p 2022 N94-20995
Comparative study of INPIStron and spark gap p 1995 N94-21293
RADCAL: A narrow-band model for radiation calculations in a combustion environment
[PB93-200889] p 1682 N94-21448
Defect motion as the origin of the 1/f conductance noise in solids
[EUT-92-E-259] p 2029 N94-21552
Radiation driven winds of hot stars: Some remarks on stationary models and spectrum synthesis in time-dependent simulations
[NASA-CR-194691] p 2081 N94-21578
Evaluation of a nonlinear method for the enhancement of tonal signal detection
[NASA-CR-191562] p 1968 N94-21741
On Plasma Edge Spectroscopy and Spectroscopic Studies of Impurity Densities and Impurity Transport
[IPF-92-2] p 1996 N94-21802
Plasma edge spectroscopy p 1996 N94-21803
Spectroscopic studies of impurity densities and impurity transport p 1997 N94-21804
Modal combination in response spectrum modal dynamic analysis
[DE94-000339] p 1833 N94-21956
Spectral variation of scattering and absorption by cirrus p 1876 N94-22321
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485
Interactive Spectral Analysis and Computation (ISAAC) p 1926 N94-22505
An x ray archive on your desk: The Einstein CD-ROM's p 2048 N94-22519
SPECFOCUS: An IRAF task for focusing spectrographs p 1965 N94-22540
What is normal among the A-type stars?
[ISBN-0-315-83947-3] p 2081 N94-22592

SPEECH
Segmentation and frequency domain ML pitch estimation of speech signals p 1747 N94-22212

SPEECH RECOGNITION
Representation of spoken words in a self-organizing neural net p 1940 N94-20243
Modeling the human mental lexicon with self-organizing feature maps p 1743 N94-20244
Segment-based acoustic models for continuous speech recognition
[AD-A271483] p 1736 N94-20547
Application of a back-propagation neural network to isolated-word speech recognition
[AD-A272495] p 1945 N94-21430
Recognizing hesitation phenomena in continuous, spontaneous speech p 1746 N94-22210
A framework of connectionist network toward speech waveform coding p 1748 N94-22211
Segmentation and frequency domain ML pitch estimation of speech signals p 1747 N94-22212
Speaker-independent isolated-digit recognition using neural networks and hidden Markov model p 1747 N94-22213
On coefficient quantization and computational roundoff effects in frequency interpolation filter banks p 1793 N94-22251

SPHERES
Intensity and polarization of light scattered by size distributions of randomly oriented nonspherical particles p 1721 N94-20416

SPHERICAL SHELLS
Symmetry-dictated trucation: Solutions of the spherical shell model for heavy nuclei
[DE94-000482] p 1976 N94-21961
Double diffusion convection in a rotating spherical shell p 2006 N94-22666

SPHERICAL TANKS
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177

SPHERICAL WAVES
Initiation and modification of reaction by energy addition: Kinetic and transport phenomena
[AD-A271315] p 1797 N94-19936
Interface reflection of spherical acoustic waves in the first- and second-order rational parabolic approximations and their artifacts
[PB93-215424] p 1969 N94-22261

SPHEROIDS
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona p 1863 N94-20889

SPHEROMAKS
A spheromak ignition experiment reusing Mirror Fusion Test Facility (MFTF) equipment
[DE94-001856] p 2034 N94-22050

SPHERULES
First discovery of the organic materials in deep-sea iron cosmic spherule p 1685 N94-20677
Elemental depletions in Antarctic micrometeorites and Arctic cosmic spherules: Comparison and relationships p 2082 N94-20704
Research program on the Manson impact structure, Iowa p 1862 N94-20766

SPIKING
Suppression of relaxation oscillations in flashpumped, two-micron tunable solid state lasers
[AD-D015928] p 1814 N94-19800

SPIN DYNAMICS
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario
[DE94-001183] p 2032 N94-21972

SPIN EXCHANGE
Measurements of atomic interactions and frequency stability with a cryogenic hydrogen maser
[AD-A271132] p 1814 N94-19853
Encounters of H and D atoms with O2 in water: Relative diffusion and reaction rates
[DE93-018587] p 1970 N94-19956

SPIN GLASS
Study of (+-)J Ising spin glasses via multicanonical ensemble
[DE93-018269] p 2016 N94-20285
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335

SPIN STABILIZATION
Apparatus for simulating an exoatmospheric structure
[NASA-CASE-MSC-21975-1] p 1653 N94-20339

SPIN-LATTICE RELAXATION
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007

SPINEL
Trace element compositions of spinel-rich refractory inclusions from the Murchison meteorite p 2086 N94-20897
SPIRAL GALAXIES
Visualizing the universe, part 2 p 2063 N94-22472
Generation and maintenance of bisymmetric spiral magnetic fields in disk galaxies in differential rotation p 2010 N94-22695
Magnetic fields in spiral galaxies p 2010 N94-22697
SPIRALS (CONCENTRATORS)
Spiral fluid separator
[NASA-CASE-MFS-28656-1] p 1800 N94-20361
SPLASHING
Improvement of helicopter attitude stability by active control of the conventional swash plate
[NASA-CR-194786] p 1650 N94-20524
SPLINE FUNCTIONS
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
Affine and non-affine blossoms
[RR-913-M] p 1950 N94-20200
A geometrical process for three dimensional osteotomy planning
[ETN-93-93602] p 1892 N94-21134
Higher order Bezier circles
[NASA-CR-177633] p 1897 N94-21784
Achieving high data reduction with integral cubic B-splines
[NASA-CR-177628] p 1966 N94-21881
The quantum structure of matter grand challenge project: Large-scale 3-D solutions in relativistic quantum dynamics
[DE94-000328] p 1960 N94-21955
SPLINES
On the spline-based wavelet differentiation matrix
[NASA-CR-191557] p 1950 N94-20087
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1821 N94-20126
An extended UTD analysis for the scattering and diffraction from cubic polynomial strips
[NASA-CR-194581] p 1716 N94-20139
Unstructured surface grid generation p 1920 N94-22366
SPORADIC E LAYER
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951
High Frequency (HF) and meteor burst communications in a polar environment
[AD-A271604] p 1737 N94-20949
SPRAYERS
Particle dispersion in turbulent sprays
[AD-A271314] p 1796 N94-19913
Aircraft cabin water spray disbenefits study
[NASA-CR-194750] p 1642 N94-21818
SPREAD SPECTRUM TRANSMISSION
Spread spectrum random access networks
[AD-A272280] p 1737 N94-20585
Capacity comparison between direct sequence PSK and MFSK spread spectrum systems in CDMA applications p 1747 N94-22224
SPRINGS (ELASTIC)
Shape memory metals
[DE94-001373] p 1695 N94-21976
SPUTTERING
Neutral copper cluster sputtering yields: Ne(+), Ar(+) and Xe(+) bombardment
[DE93-019010] p 1690 N94-20288
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers
[DE94-000741] p 1701 N94-20352
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558
Ellipsometric studies of sputtered silicon nitride on n-GaAs p 1709 N94-20972
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973
InP MIS structures with diamondlike amorphous carbon films deposited by ion-beam sputtering and from plasma p 1710 N94-20979
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1847 N94-21614
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617
Mars atmosphere loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape p 2144 N94-21672
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944
Direct detection of atomic ions from molecular photofragmentation during nonresonant multiphoton ionization of sputtered species
[DE93-040886] p 1976 N94-21951
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394
STABILITY
A summary of studies of particle stability at RHIC
[DE93-040173] p 1970 N94-19868
Study of transverse coupled bunch instabilities by using non-linear Taylor maps for the Advanced Light Source (ALS)
[DE93-040287] p 1979 N94-19969
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20600
Numerical ranges and stability estimates
[TW-92-10] p 1953 N94-21060
Stability analysis of unsteady ablation fronts
[DE93-019689] p 1819 N94-21839
Proof of stability of the hydrogen molecule
[PB93-221026] p 1977 N94-22271
STABILITY AUGMENTATION
Design, fabrication and test of a vertical attitude takeoff and landing unmanned air vehicle
[AD-A273003] p 1646 N94-21283
STABILITY TESTS
Stability analysis of unsteady ablation fronts
[DE93-019689] p 1819 N94-21839
STABILIZERS (FLUID DYNAMICS)
Apparatus and method for improving spin recovery on aircraft
[NASA-CASE-LAR-14747-1] p 1650 N94-20556
STAINLESS STEELS
Thermocapillary and arc phenomena in stainless steel welds
[DE94-000518] p 1821 N94-19859
Microscopic evaluation of low-temperature embrittlement in type 308 stainless steel welds
[DE93-040266] p 1690 N94-20282
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394
STANDARD DEVIATION
Performance evaluation of the JPL TOPSAR system: An across-track interferometric SAR system for topographic mapping p 1732 N94-20461
DECONV-TOOL: An IDL based deconvolution software package p 1927 N94-22542
STANDARDIZATION
The manager's guide to NASA graphics standards
[NHB-1430.2] p 2042 N94-20308
The electronics technology policy of the NLR Informatics Division: The NLR electronics CAE infrastructure
[NLR-TP-91001-U] p 1753 N94-21067
Government Open Systems Interconnection Profile (GOSIP) transition strategy
[AD-A273005] p 1740 N94-21308
Data format standards for civilian remote sensing satellites
[PB93-192920] p 1841 N94-21446
Operational test and evaluation of electronic combat systems
[AD-A273093] p 1647 N94-21500
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092
STANDARDS
Power standard
[ESA-PSS-02-10-VOL-1-ISSUE-] p 1669 N94-20241
Goniospectrometric properties of a white standard p 1684 N94-20664
Named Venusian craters p 2109 N94-20725
U.S. Tag for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock: Minutes of the accredited standards committee on bioacoustics, S3
[AD-A273014] p 1897 N94-21309
Space Generic Open Avionics Architecture (SGOAA) standard specification
[NASA-CR-188269] p 1666 N94-22275
NASA data exchange standards for computational fluid dynamics p 1920 N94-22371
Electronic publishing and intelligent information retrieval p 2047 N94-22479
Fortran for the nineties p 1926 N94-22481
STAR CLUSTERS
The distribution of dark matter in the A2256 cluster
[NASA-CR-194699] p 2055 N94-21579
STAR DISTRIBUTION
The distribution of dark matter in the A2256 cluster
[NASA-CR-194699] p 2055 N94-21579
Extracting galactic structure parameters from multivariated density estimation p 1964 N94-22458
STAR FORMATION
Formation of the low-mass solar nebula p 2109 N94-20728
The formation of massive stars: A 30 Mo case study
[ISBN-0-315-83944-9] p 2081 N94-22593
Magnetohydrodynamic phenomena in star-forming processes and their environment p 2010 N94-22701
STAR TRACKERS
Charge integrating optical position sensor p 1778 N94-22152
STATE ESTIMATION
Comparison of a distributed Kalman filter versus a centralized Kalman filter with fault detection considerations
[AD-A270713] p 1903 N94-19969
STATIC LOADS
Time-dependent reliability analysis of ceramic engine components p 1828 N94-22619
STATIC THRUST
Internal performance of a nonaxisymmetric nozzle with a rotating upper flap and a center-pivoted lower flap
[NASA-TP-3385] p 1637 N94-21569
STATISTICAL ANALYSIS
Stochastic optimization by simulation: Convergence proofs for the G1/G/1 queue in steady-state
[AD-A271141] p 1962 N94-19999
VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110
Statistical object recognition
[AD-A270887] p 1962 N94-20113
Neural data oriented parsing p 1940 N94-20248
Retrieval of ice thickness from polarimetric SAR data p 1724 N94-20432
Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570
Functional statistical data analysis and modeling
[AD-A271520] p 1963 N94-20913
Performance management systems: A statistical analysis
[AD-A272989] p 2043 N94-21266
Some evidence on determinants of fuel economy as a function of driving cycle and test type
[DE93-019511] p 1825 N94-21637
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664
A statistical-based scheduling algorithm in automated data path synthesis p 1764 N94-21706
Applications of a two-dimensional nonlinear filters to image restoration p 1789 N94-22225
GRO/EGRET data analysis software: An integrated system of custom and commercial software using standard interfaces p 1926 N94-22501
Detector noise statistics in the non-linear regime p 1748 N94-22526
STATISTICAL DISTRIBUTIONS
High resolution signal processing
[AD-A271181] p 1717 N94-20215
A formulation of quantum statistical mechanics based on the Feynman path centroid density 1: Equilibrium properties
[AD-A272809] p 2037 N94-21171
Data compression by using wavelet transforms and vector quantization
[AD-A272763] p 1738 N94-21182
Paired comparison models with time-varying parameters
[AD-A272016] p 1964 N94-21442
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457
STATISTICAL MECHANICS
A formulation of quantum statistical mechanics based on the Feynman path centroid density 2 dynamical properties
[AD-A272698] p 2037 N94-21166
A formulation of quantum statistical mechanics based on the Feynman path centroid density 1: Equilibrium properties
[AD-A272809] p 2037 N94-21171
One- and multi-component theories of mixtures
[DE93-040543] p 1966 N94-21511
STATISTICAL TESTS
The European Southern Observatory-MIDAS table file system p 2048 N94-22518
STATORS
Operation of a test bed axial-gap brushless dc rotor with a superconducting stator
[DE93-019167] p 1769 N94-21830

STDN (NETWORK)
Developing a space network interface simulator: The NTS approach p 1933 N94-21343
STEADY STATE
Stochastic optimization by simulation: Numerical experiments with M/M/1 queue in steady-state [AD-A271143] p 1949 N94-19854
Some topics in regenerative steady-state simulation [AD-A271145] p 1902 N94-19855
Design of a controllable pitch underwater thruster system [AD-A271140] p 1821 N94-20021
Stability curves for a thermoacoustic prime mover [AD-A272607] p 1968 N94-21422
Stability of an uncooled segment of a high-temperature superconductor [DE94-000476] p 2032 N94-21932
The TST: A small steady-state tokamak for integrated divertor testing [DE94-001016] p 1998 N94-22045
STEELS
PVDF gauge characterization of hypervelocity-impact-generated debris clouds [DE93-018831] p 1829 N94-19943
Atom probe field ion microscopy characterizations of VVER steels [DE93-017864] p 1689 N94-20180
Lubricated wear of steel-ceramic and ceramic-ceramic systems [PB93-202356] p 1825 N94-21450
STEERING
Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188
STEFAN-BOLTZMANN LAW
Examination for optimization of synchrotron radiation spectrum for the x ray depth lithography [BONN-IR-92-32] p 1987 N94-21148
STELLAR ATMOSPHERES
Molecular equilibria and condensation sequences in carbon rich gases p 2083 N94-20756
STELLAR COMPOSITION
What is normal among the A-type stars? [ISBN-0-315-83947-3] p 2081 N94-22592
STELLAR ENVELOPES
The circumstellar environments of intermediate mass main sequence stars [NASA-CR-189311] p 2055 N94-21498
Circumstellar environments of Be stars at infra-red and radio wavelengths [ISBN-0-315-83135-9] p 2081 N94-22426
STELLAR EVOLUTION
Formation of the low-mass solar nebula p 2109 N94-20728
Variety in planetary systems p 2066 N94-20871
The circumstellar environments of intermediate mass main sequence stars [NASA-CR-189311] p 2055 N94-21498
New production mechanisms for unstable nuclei in stars, supernovae, and the big bang [DE93-018627] p 2081 N94-21618
Physical properties of dense astrophysical plasmas p 2001 N94-22637
Neutrino emission processes in dense high-temperature plasmas p 2001 N94-22638
STELLAR LUMINOSITY
Pre-main sequence stars in the Chamaeleon cloud and pre-main sequence stars in the Rho Ophiuchi cloud core [NASA-CR-194713] p 2080 N94-20337
STELLAR MAGNETIC FIELDS
Shock formation in magnetohydrodynamical accretion onto a black hole p 2010 N94-22699
Magnetohydrodynamic phenomena in star-forming processes and their environment p 2010 N94-22701
STELLAR MAGNETOSPHERES
General relativistic winds in a black hole magnetosphere p 2002 N94-22644
STELLAR MASS
Formation of the low-mass solar nebula p 2109 N94-20728
AGB stars as a source of short-lived radioactive nuclei in the solar nebula p 2133 N94-20859
The distribution of dark matter in the A2256 cluster [NASA-CR-194699] p 2055 N94-21579
Mars and the early Sun p 2146 N94-21683
STELLAR MASS ACCRETION
VVNRS: Variable phenomena in VV Cephei [NASA-CR-194731] p 2056 N94-21835
The formation of massive stars: A 30 Mo case study [ISBN-0-315-83944-9] p 2081 N94-22593
Time variation of MHD accretion onto a black hole p 2009 N94-22692
Accretion of a hot plasma onto the central black hole: Fokker-Planck formulation p 2009 N94-22693
Shock formation in magnetohydrodynamical accretion onto a black hole p 2010 N94-22699
STELLAR MASS EJECTION
Helical kink instability of jets from young stellar objects p 2008 N94-22686
STELLAR MODELS
High-energy astrophysics: A theoretical analysis of thermal radiation from neutron stars [NASA-CR-194808] p 2055 N94-20952
Mars and the early Sun p 2146 N94-21683
The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446
The formation of massive stars: A 30 Mo case study [ISBN-0-315-83944-9] p 2081 N94-22593
Magnetohydrodynamic phenomena in star-forming processes and their environment p 2010 N94-22701
STELLAR PHYSICS
New production mechanisms for unstable nuclei in stars, supernovae, and the big bang [DE93-018627] p 2081 N94-21618
VVNRS: Variable phenomena in VV Cephei [NASA-CR-194731] p 2056 N94-21835
The formation of massive stars: A 30 Mo case study [ISBN-0-315-83944-9] p 2081 N94-22593
STELLAR RADIATION
Factor analysis as a tool for spectral line component separation 21cm emission in the direction of L1780 p 1965 N94-22536
Properties of x ray emission from x ray novae p 2007 N94-22676
Time variations of x rays from black hole candidates: Canonical time variations in high and low intensity states p 2009 N94-22690
STELLAR ROTATION
Dynamo driven by weak plasma turbulence: The effect of differential rotation p 2005 N94-22665
Particle acceleration on the Alfven surface of a plasma ejecting axisymmetric rotator p 2008 N94-22681
Shock formation in magnetohydrodynamical accretion onto a black hole p 2010 N94-22699
STELLAR SPECTRA
The circumstellar environments of intermediate mass main sequence stars [NASA-CR-189311] p 2055 N94-21498
Circumstellar environments of Be stars at infra-red and radio wavelengths [ISBN-0-315-83135-9] p 2081 N94-22426
The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485
What is normal among the A-type stars? [ISBN-0-315-83947-3] p 2081 N94-22592
STELLAR SPECTROPHOTOMETRY
New IRAF stellar photometry software p 1925 N94-22464
STELLAR STRUCTURE
Physical properties of dense astrophysical plasmas p 2001 N94-22637
STELLAR WINDS
Radiation driven winds of hot stars: Some remarks on stationary models and spectrum synthesis in time-dependent simulations [NASA-CR-194691] p 2081 N94-21578
Asymptotic structure of magnetically driven MHD wind p 2008 N94-22682
Hydrodynamical winds from an accretion disk p 2008 N94-22683
MHD flows from compact objects: Effects on magnetic field configurations p 2008 N94-22684
Magnetic fields in spiral galaxies p 2010 N94-22697
STELLARATORS
Fast ion behavior during neutral beam injection in ATF [DE93-040267] p 1992 N94-20058
Effects of magnetic field perturbations in the ATF torsatron [DE94-000474] p 1999 N94-22568
STEPPING MOTORS
The One-Day Workshop on Batteries, Stepping Motors, and Electronic Clock Displays [ETN-93-94632] p 1752 N94-20628
Lavet type stepping motors and associated controls p 1752 N94-20632
Test device for Lavet motors p 1752 N94-20633
STEREOPHOTOGRAPHY
Robust photo-topography by fusing shape-from-shading and stereo [NASA-CR-194697] p 1806 N94-19920
The High Resolution Stereo Camera (HRSC) for the Lunar Scout 1 Mission p 1813 N94-20650
STEREOSCOPIC VISION
Why stereo vision is not always about 3D reconstruction [AD-A270522] p 1939 N94-19893
Robust photo-topography by fusing shape-from-shading and stereo [NASA-CR-194697] p 1806 N94-19920
A pyramid neural network architecture for stereo fusion p 1785 N94-22201
STEREOSCOPY
The 3-D Moons: The Voyager stereo atlas of the outer solar system p 2111 N94-20740
STEROIDS
Changes in plasma vasopressin during motion sickness in cats p 1885 N94-21898
STIFFENING
Improvements to a method for the geometrically nonlinear analysis of compressively loaded stiffened composite panels [NASA-CR-194715] p 1832 N94-21814
STIFFNESS
Frequency and temperature dependence of high damping elastomers [DE93-019539] p 1697 N94-19809
Compression strength of composite primary structural components [NASA-CR-194561] p 1830 N94-20159
Graphite/polyurethane flexible composites: Mechanical and vibration damping properties [AD-A271608] p 1674 N94-20950
A vibration model for centrifugal contactors [DE93-040645] p 1833 N94-21927
STIFFNESS MATRIX
Approximation to sound radiation and scattering by simply supported layered cylinder [AD-A272964] p 1967 N94-21306
Response statistics of shell structures with geometrical and material nonlinearities, volume 1 [ISBN-0-315-84006-4] p 1833 N94-22590
STIMULATION
Recovery of the vomiting reflex following area postrema ablation in squirrel monkeys p 1886 N94-21904
Motion sickness elicited by passive rotation in squirrel monkeys p 1887 N94-21905
Immunocytochemical localization of glutamic acid decarboxylase (GAD) and substance P in neural areas mediating motion-induced emesis: Effects of vagal stimulation on GAD immunoreactivity p 1887 N94-21909
Experimental studies of gastric dysfunction in motion sickness: The effect of gastric and vestibular stimulation on the vagal and splanchnic gastric efferents p 1888 N94-21911
STIRLING CYCLE
Preliminary SP-100/Stirling heat exchanger designs [NASA-TM-106444] p 1670 N94-21809
STIRLING ENGINES
The FY1992 survey on commercialization of Stirling engine utilization equipment [DE94-707416] p 1849 N94-22029
STOCHASTIC PROCESSES
Stochastic optimization by simulation: Numerical experiments with M/M/1 queue in steady-state [AD-A271143] p 1949 N94-19854
Robust, high-speed network design for large-scale multiprocessing [AD-A271003] p 1716 N94-19977
SIMBAT theoretical manual [AD-A271063] p 1882 N94-19979
Stochastic optimization by simulation: Convergence proofs for the G1/G/1 queue in steady-state [AD-A271141] p 1962 N94-19999
Stochastic differential equations and numerical simulation for pedestrians [DE93-040651] p 1949 N94-20006
Asymptotics of the GLRT for the disorder problem in diffusion processes [INRIA-RR-1735] p 1951 N94-20227
A general rough-surface inversion algorithm: Theory and application to SAR data p 1719 N94-20407
Closure properties of stochastic languages [TR-441] p 1907 N94-20521
Segment-based acoustic models for continuous speech recognition [AD-A271483] p 1736 N94-20547
The Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session) [AD-A272125] p 1942 N94-20573
Space-efficient deterministic simulation of probabilistic automata [TR-483] p 1900 N94-21281
Dependability and performability analysis [NASA-CR-191565] p 1965 N94-21483
Simulated behaviour of large scale SCI rings and tori [DE93-040149] p 1935 N94-21745
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms [DE93-040058] p 1916 N94-21761
Algorithmic advances in stochastic programming [DE94-001160] p 1921 N94-22406
Experiments with recursive estimation in astronomical image processing p 2047 N94-22457

STOKES FLOW
Surface path lines in plane Stokes flow driven by capillarity
[DE93-041277] p 1803 N94-21651
Mixed finite element and finite volume methods
[ISBN-0-315-63035-3] p 1805 N94-22417
STOMACH
Detection of emetic activity in the cat by monitoring venous pressure and audio signals
p 1886 N94-21903
The effects of area postrema lesions and selective vagotomy on motion-induced conditioned taste aversion
p 1888 N94-21910
STONY-IRON METEORITES
A new Antarctic meteorite with chromite, orthopyroxene and metal with reference to a formation model of S asteroids p 2084 N94-20813
Chemical zoning and diffusion of Ca, Al, Mn, and Cr in olivine of springwater pallasite p 2086 N94-20902
STORABLE PROPELLANTS
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906
STORAGE BATTERIES
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation
[DE94-714901] p 1850 N94-22092
STORAGE RINGS (PARTICLE ACCELERATORS)
Control and readout of the extraction septum of AmPS
[DIGEL-1993-2] p 1979 N94-20117
New preamplifiers for the SEM scanner
[DIGEL-1993-3] p 1979 N94-20118
Bundle profile monitor for AmPS
[DIGEL-1992-8] p 1979 N94-20123
Study of coupled-bunch collective effects in the PEP-2 B-Factory
[DE93-040117] p 1979 N94-20274
Measurement and computation of the higher order modes of the ALS 500 MHz accelerating cavities
[DE93-019256] p 1980 N94-20292
Energy and luminosity limits of hadron supercolliders
[DE93-019248] p 1980 N94-20300
Power supply and controller for the Sextupole magnet of AmPS
[DIGEL-1992-3] p 1753 N94-21064
Survey and alignment analysis for the ALS storage ring using computer spreadsheets
[DE93-019254] p 1917 N94-21917
Studies of the deuteron at high energy and momentum transfer
[DE93-041162] p 1976 N94-21941
STORAGE STABILITY
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906
Evaluation of pre-extraction analytical holding times for nitroaromatic and nitramine explosives in water
[AD-A271547] p 1712 N94-20927
STORAGE TANKS
Pressurization and expulsion of a flightweight liquid hydrogen tank
[NASA-TM-106427] p 1799 N94-20177
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
STOVL AIRCRAFT
Survey of lift-fan aerodynamic technology
[NASA-CR-177615] p 1646 N94-21592
STRAIN DISTRIBUTION
Characteristics of 0.8- and 0.2-microns gate length In(x)Ga(1-x) As/In(0.52)Al(0.48)As/InP (0.53 less than or equal to x less than or equal to 0.70) modulation-doped field-effect transistors at cryogenic temperatures
p 1733 N94-20499
Wrinkle ridges, reverse faulting, and the depth penetration of lithospheric stress in lunae planum, Mars
p 2141 N94-20910
STRAIN GAGES
PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943
Apparatus and method for measuring subject work rate on an exercise device
[NASA-CASE-MSC-21752-1] p 1895 N94-20194
High accuracy die mechanical stress measurement with the ATC04 Assembly Test Chip
[DE93-019435] p 1830 N94-20477
OTDR strain gauge for smart skins
[DE93-041043] p 1810 N94-21953
Demodulation of a fiber Fabry-Perot strain rosette using white light interferometry
[ISBN-0-315-83427-7] p 1990 N94-22579
Phase demodulation of interferometric fiber-optic sensors
[ISBN-0-315-83425-0] p 1991 N94-22581
STRAIN HARDENING
Two-dimensional finite element analysis of porous media at multikilobar stress levels
[AD-A271540] p 1831 N94-20916
STRAIN MEASUREMENT
OTDR strain gauge for smart skins
[DE93-041043] p 1810 N94-21953
Phase demodulation of interferometric fiber-optic sensors
[ISBN-0-315-83425-0] p 1991 N94-22581
STRAIN RATE
Coupling of smooth particle hydrodynamics with PRONTO
[DE93-019080] p 1915 N94-21539
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo)
[DE93-041320] p 1694 N94-21943
STRANGENESS
Measurement of the strange quark distribution function in W(+) charm quark events
[DE93-018267] p 1973 N94-20474
STRATA
On the sources of North Atlantic deep water
[AD-A270854] p 1881 N94-19895
STRATIFIED FLOW
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
STRATIGRAPHY
Stratigraphy of the Martian northern plains
p 2091 N94-20398
The Koshak section: Evidence for element fractionation and an oxidation event at the K/T boundary
p 1862 N94-20641
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Diapirs and cantaloupes: Layering and overturn of Triton's crust p 2111 N94-20738
Geology of the southern hemisphere of Triton: No polar cap p 2111 N94-20739
Iridium in sediments containing large abundances of Australasian microtektites from DSDP hole 758B in the Eastern Indian Ocean and from DSDP hole 769A in the Sulu Sea p 2083 N94-20741
Research program on the Manson impact structure, Iowa p 1862 N94-20766
STRATOCUMULUS CLOUDS
Clouds: Their prediction and simulation
[AD-A271161] p 1864 N94-19900
The analysis of global cloud and radiation data for the study of cloud-climate interactions
[NASA-CR-193388] p 1865 N94-20535
The FIRE Cirrus Science Results 1993
[NASA-CP-3238] p 1871 N94-22292
STRATOSPHERE
Intrusion of stratospheric ozone in the troposphere through tropopause folding and cold air droplets
[REPT-87] p 1851 N94-20154
Stratospheric Aerosol and Gas Experiment (SAGE 3)
p 1869 N94-21644
The 5-6 December 1991 FIRE IFO 2 jet stream cirrus case study: The influence of volcanic aerosols
p 1877 N94-22326
STRATUS CLOUDS
A documentation of icing relevant cloud physical parameters on horizontal soundings of stratiform clouds (continuation)
[DLR-MITT-92-10] p 1871 N94-22280
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar
p 1874 N94-22310
STREAK CAMERAS
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297
STRESS (PHYSIOLOGY)
Physiological correlates of stress-induced decrements in human perceptual performance
[DOT/FAA/AM-93/19] p 1893 N94-20081
Studies of neural and cognitive function in subjects exposed to the marine-air interface, phases 1 and 2
[AD-A272282] p 1891 N94-20624
Human responses to exercise-heat stress
[AD-A272581] p 1892 N94-21209
STRESS ANALYSIS
Finite element mesh generation and analysis of solder joints for fatigue life predictions
[AD-A271329] p 1829 N94-19937
Audit report. Navy's aircraft structural life surveillance program data recorders
[AD-A270391] p 1645 N94-20040
A design optimization procedure for epicyclic gears
[MATHS-REPT-A-188] p 1822 N94-20146
Biaxial flexural testing of a carbon fiber reinforced epoxy composite
[AD-A271956] p 1674 N94-20577
Preliminary SP-100/Stirling heat exchanger designs
[NASA-TM-106444] p 1670 N94-21809
A finite element formulation and adaptive solution approach for large-scale thermomechanical problems with complex contact conditions
[DE93-019605] p 1960 N94-21996
Modeling of failure and response to laminated composites subjected to in-plane loads
p 1834 N94-22612
Life prediction systems for critical rotating components
p 1835 N94-22615
STRESS CORROSION
Benefits of thread rolling process to the stress corrosion cracking and fatigue resistance of high strength fasteners
[DE93-040438] p 1833 N94-22001
STRESS CORROSION CRACKING
Benefits of thread rolling process to the stress corrosion cracking and fatigue resistance of high strength fasteners
[DE93-040438] p 1833 N94-22001
STRESS DISTRIBUTION
Fundamental studies of stress distributions and stress relaxation in oxide scales on high temperature alloys
[DE94-001444] p 1693 N94-21854
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006
STRESS MEASUREMENT
Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927
High accuracy die mechanical stress measurement with the ATC04 Assembly Test Chip
[DE93-019435] p 1830 N94-20477
STRESS RELAXATION
Synthesis and properties of mismatched heterojunction/substrate interfaces
[AD-A272904] p 1760 N94-21229
Fundamental studies of stress distributions and stress relaxation in oxide scales on high temperature alloys
[DE94-001444] p 1693 N94-21854
STRESS RELIEVING
Process and apparatus for the release of a prestress initially applied to a mechanism such as a bearing on board a space vehicle
[CA-PATENT-APPL-SN-2,020,90] p 1824 N94-21142
STRESS WAVES
Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927
Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729
STRESS-STRAIN DIAGRAMS
Development of bioelastic material for aspects of wound repair
[AD-A267832] p 1673 N94-20208
STRESS-STRAIN RELATIONSHIPS
Two-dimensional finite element analysis of porous media at multikilobar stress levels
[AD-A271540] p 1831 N94-20916
Dynamic response of multiphase porous media
[AD-A272915] p 1831 N94-21219
Coupling of smooth particle hydrodynamics with the finite element method
[DE93-019081] p 1805 N94-22556
Life assessment of structural components using inelastic finite element analyses p 1834 N94-22614
STRESS-STRAIN-TIME RELATIONS
Brief summary of the evolution of high-temperature creep-fatigue life prediction models for crack initiation
p 1834 N94-22613
STRINGS
Tight comparison bounds for the string prefix-matching problem
[CWI-CS-R9250] p 1952 N94-21029
STRONTIUM
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021
STRONTIUM ISOTOPES
Elevated initial Sr-87/Sr-86 in ordinary chondrite metal
p 1685 N94-20695
STRONTIUM TITANATES
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3
[AD-A271756] p 2027 N94-21303
STRUCTURAL ANALYSIS
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924

The p-version of the finite element method in incremental elasto-plastic analysis
[NASA-CR-194707] p 1830 N94-20036
Total systems design analysis of high performance structures
[NASA-TP-3432] p 1653 N94-20141
Compression strength of composite primary structural components
[NASA-CR-194561] p 1830 N94-20159
Quantification of uncertainties in the performance of smart composite structures
[NASA-TM-106335] p 1830 N94-20171
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Complex structure of the Thaumasia region of Mars
p 2125 N94-20815
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
Adhesive bonded joint with improved cyclic fatigue life for alumina-ceramic cylinders and hemispheres: Fourth generation housings
[AD-A273061] p 1831 N94-21310
Modeling of outgassing and matrix decomposition in carbon-phenolic composites
[NASA-CR-194741] p 1676 N94-21743
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777
Nonlinear aerodynamics and the design of wing tips
[NASA-CR-194732] p 1638 N94-21833
Symposium on Microscopy and Image Analysis of Building Materials
[VTT-SYMP-136] p 1707 N94-21890
Microstructure in mortar: A summary of a new project of research p 1708 N94-21896
The program system for the diagnostics of strains and fracture prediction of solids p 1836 N94-22065
Life assessment of structural components using inelastic finite element analyses p 1834 N94-22614
Recent advances in computational structural reliability analysis methods p 1828 N94-22616
An overview of computational simulation methods for composite structures failure and life analysis
p 1835 N94-22617

STRUCTURAL BASINS
Evidence for an ice sheet/frozen lake in Utopia Planitia, Mars p 2089 N94-20388
Possible occurrence and origin of massive ice in Utopia Planitia p 2090 N94-20390
Ice in the northern plains: Relic of a frozen ocean?
p 2090 N94-20391
A marine sedimentary model for the evolution of the northern plains p 2091 N94-20395
Seismic-triggering history of the catastrophic outflows in the Chryse region of Mars p 2091 N94-20399
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
Geologic mapping of Harmakhis and Reull Valles region, Mars: Evidence for multiple resurfacing and drainage events p 1844 N94-20705
Chicxulub impact basin: Gravity characteristics and implications for basin morphology and deep structure
p 1862 N94-20757
Impact basins on Venus and some interplanetary comparisons p 2119 N94-20785
Geology and deposits of the Serenitatis basin
p 2119 N94-20786
Origin of the Vredefort structure, South Africa: Impact model p 1863 N94-20826
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1
p 2136 N94-20876
Morphologic classes of impact basins on Venus
p 2137 N94-20883

STRUCTURAL DESIGN
Total systems design analysis of high performance structures
[NASA-TP-3432] p 1653 N94-20141
Structural similitude and design of scaled down laminated models
[NASA-CR-194687] p 1673 N94-20172
Design, fabrication and test of a vertical attitude takeoff and landing unmanned air vehicle
[AD-A273003] p 1646 N94-21263
Life assessment of structural components using inelastic finite element analyses p 1834 N94-22614
Recent advances in computational structural reliability analysis methods p 1828 N94-22616

STRUCTURAL FAILURE
Structural crashworthiness and failure
[AD-A270429] p 1828 N94-19815
Delamination, durability, and damage tolerance of laminated composite materials p 1678 N94-22622

STRUCTURAL PROPERTIES (GEOLOGY)
Evidence for an ice sheet/frozen lake in Utopia Planitia, Mars p 2089 N94-20388
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Gravity investigation of the Manson impact structure, Iowa p 2082 N94-20694
Studying Venus using a GIS database
p 2105 N94-20707
Diapirs and cantaloupes: Layering and overturn of Triton's crust p 2111 N94-20738
Geology of the southern hemisphere of Triton: No polar cap p 2111 N94-20739
The 3-D Moons: The Voyager stereo atlas of the outer solar system p 2111 N94-20740
Large, ancient, compressional structures on Mars
p 2125 N94-20816
Original size of the Vredefort structure, South Africa
p 1863 N94-20825
Origin of the Vredefort structure, South Africa: Impact model p 1863 N94-20826
Distribution and geologic history of materials excavated by the lunar crater Bullialdus p 2128 N94-20832
Geology of Galileo Regio quadrangle, Ganymede
p 2130 N94-20842

STRUCTURAL RELIABILITY
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
Recent advances in computational structural reliability analysis methods p 1828 N94-22616

STRUCTURAL STABILITY
A study of the structural stability of an unbalanced sandwich composite configuration
[AD-A272496] p 1675 N94-21431
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766

STRUCTURAL STRAIN
Structural similitude and design of scaled down laminated models
[NASA-CR-194687] p 1673 N94-20172

STRUCTURAL VIBRATION
Adaptation of model parameters of a rail model at measured rail compliances
[ILR-MITT-274(1992)] p 1831 N94-21153
The modern rotor aerodynamic limits survey: A report and data survey
[NASA-TM-4446] p 1635 N94-21490
Probabilistic assessment of composite structures
[NASA-TM-106368] p 1832 N94-21757
Aircraft noise effects on cultural resources: Recommendation and rationale for further research
[PB93-205326] p 1968 N94-22053
Aircraft noise effects on cultural resources: Annotated bibliography
[PB93-205334] p 1969 N94-22054
System identification of the Daisy large space structure emulator
[ISBN-0-315-83533-8] p 1653 N94-22588

STRUCTURAL WEIGHT
Nonlinear aerodynamics and the design of wing tips
[NASA-CR-194732] p 1638 N94-21833

STRUCTURED PROGRAMMING
Implementation of a portable nested data-parallel language
[AD-A270524] p 1902 N94-19932
A conceptual database design and performance analysis of the MILSATCOM requirements database
[AD-A272672] p 1658 N94-21217
Structured multimedia authoring
[CWI-CS-R9304] p 2044 N94-21535

STUDENTS
A comprehensive software engineering educational experience
[AD-A270583] p 1905 N94-20109
A description of psychological type at the Defense Systems Management College, 1993 edition
[AD-A271612] p 1894 N94-21237

STYRENES
Dynamics of adsorbed, swollen block copolymers
[AD-A272013] p 1706 N94-21460

SUBARCTIC REGIONS
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186

SUBDUCTION (GEOLOGY)
Subduction on the margins of coronae on Venus: Evidence from radiothermal emissivity measurements
p 2107 N94-20718
Parga and Hecate Chasmata, Venus: Structure, volcanism and models of formation
p 2121 N94-20796
Photogeological analysis of Europan tectonic features
p 2129 N94-20838

SUBLIMATION
The distribution of ground ice on Mars
p 2090 N94-20394

SUBMILLIMETER WAVES
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912

SUBREFLECTORS
Multi-band reflector antenna with double-ring element frequency selective subreflector p 1728 N94-20447

SUBROUTINE LIBRARIES (COMPUTERS)
An object-oriented data reduction system in Fortran
p 2046 N94-22447
The IDL astronomy user's library
p 2048 N94-22500
The Keck Task Library (KTL) p 2048 N94-22504
Development of the FITS tools package for multiple software environments p 1927 N94-22516
The STARLINK software collection
p 1927 N94-22545

SUBROUTINES
Power conditioning system modelling for nuclear electric propulsion
[NASA-CR-191136] p 1846 N94-21179
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218
The three-dimensional Event-Driven Graphics Environment (3D-EDGE) p 1922 N94-21342
Documentation for PCDIST, a FORTRAN subroutine to calculate Pollack-Cuzzi scattering
[AD-A273070] p 1988 N94-21491
An object-oriented data reduction system in Fortran
p 2046 N94-22447

SUBSONIC AIRCRAFT
Nonlinear and progressive failure aspects of transport composite fuselage damage tolerance
p 1834 N94-22609

SUBSONIC FLOW
Fluid dynamic mechanisms and interactions within separated flows
[AD-A271037] p 1797 N94-19978
Acoustic radiation damping of flat rectangular plates subjected to subsonic flows
[NASA-TM-109382] p 1967 N94-20211
A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591

SUBSTRATES
Substrate recovery of Mo-Si multilayer coated optics
[DE93-019610] p 1698 N94-19810
Quartz/fused silica chip carriers
[NASA-CR-194154] p 2016 N94-20340
Adhesive electroless metallization of fluoropolymeric substrates
[AD-A271858] p 1703 N94-20526
Thin film compositional analysis using null or fixed wavelength ellipsometry p 1709 N94-20976
Analytic solutions for optimized ellipsometric measurements of interfaces and surface layers in thin film structures p 2019 N94-20977
Growth, characterization and device development in monocrystalline diamond films
[AD-A272715] p 2026 N94-21190
Analysis of semi-insulating bulk GaAs using glow discharge mass spectrometry
[AD-A273032] p 1682 N94-21435
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
The n-p(p(+))-n Al(yGa)(1-y) As-GaAs-In(x)Ga(1-x) as quantum well laser with p(+)-n(+)GaAs-InGaAs tunnel contact on n GaAs
[AD-A271292] p 2030 N94-21805
MOCVD growth and structure of PbTiO3 thin films
[DE93-040230] p 2033 N94-21994
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024

SULFATES
Impact-induced devolatilization of CaSO4 anhydrite and implications for K-T extinctions: Preliminary results
p 2085 N94-20840
Effect of copper sulphate on the rate of afferent discharge in the gastric branch of the vagus nerve in the rat p 1887 N94-21907
Experimental studies of gastric dysfunction in motion sickness: The effect of gastric and vestibular stimulation on the vagal and splanchnic gastric efferents
p 1888 N94-21911

SULFIDATION
Surface modification for corrosion resistance
[DE93-017419] p 1693 N94-21825

SULFIDES
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
Lewis Cliff 87057: A new metal-rich E3 chondrite with similarities to Mt. Egerton, Shallowater and Happy Canyon p 2086 N94-20901
SULFUR
Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold
[DE93-041126] p 1694 N94-21937
SULFUR DIOXIDES
SO2 on Venus: IUE, HST and ground-based measurements, and the active volcanism connection p 2092 N94-20637
SULFURIC ACID
A comparison of sulfuric acid/boric acid anodize and chromic acid anodize processes
[AD-A271933] p 1703 N94-20614
Global blackout following the K/T Chicxulub impact: Results of impact and atmospheric modeling p 1854 N94-20698
Examination of the observed synoptic scale cirrus cloud environment: The December 3-6 FIRE cirrus case study p 1877 N94-22325
SUN
Mars and the early Sun p 2146 N94-21683
SUNSPOTS
Mars and the early Sun p 2146 N94-21683
Large-scale structure of the solar plasma corona: An analysis of Yohkoh SXT images p 2004 N94-22657
Enhanced absorption of p-modes on sunspot and plage regions p 2006 N94-22671
SUPERCHARGERS
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391
SUPERCOMPUTERS
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
The transition to massively parallel computing within a production environment at a DOE access center
[DE93-019155] p 1936 N94-21828
Introduction to the LaRC central scientific computing complex
[NASA-TM-104092-REV-1] p 1900 N94-22100
Seeing the forest for the trees: Networked workstations as a parallel processing computer p 1938 N94-22454
SUPERCONDUCTING CAVITY RESONATORS
Space applications of superconducting microwave electronics at NASA Lewis Research Center p 1671 N94-20513
Ten GHz YBa2Cu3O(7-delta) superconducting ring resonators on NdGaO3 substrates p 1735 N94-20515
SUPERCONDUCTING DEVICES
A pipelined superconducting digital processor
[DE93-040852] p 1898 N94-19886
Quantum noise studies with superconducting tunnel junction mixers
[AD-A270897] p 2012 N94-19897
SUPERCONDUCTING FILMS
Particles on surfaces of laser ablated Y1Ba2Cu3O(7-delta) films
[DE93-040269] p 2013 N94-19929
Superconducting property measurements in tape geometry
[DE93-018943] p 2014 N94-19970
Ten GHz YBa2Cu3O(7-delta) superconducting ring resonators on NdGaO3 substrates p 1735 N94-20515
A 10 GHz Y-Ba-Cu-O/GaAs hybrid oscillator proximity coupled to a circular microstrip patch antenna p 1736 N94-20517
Microwave properties and characterization of co-evaporated BSCCO thin films p 1709 N94-20518
The effect of fluctuations on the electrical transport behavior in YBa2Cu3O(7-x) p 1736 N94-20519
Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176
SUPERCONDUCTING MAGNETS
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
The 13th International Conference on Magnetically Levitated Systems and Linear Drives MAGLEV 1993
[DE93-040381] p 1825 N94-21544
Operation of a test bed axial-gap brushless dc rotor with a superconducting stator
[DE93-019167] p 1769 N94-21830
Stability of an uncooled segment of a high-temperature superconductor
[DE94-000476] p 2032 N94-21932
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008
SUPERCONDUCTING SUPER COLLIDER
Energy and luminosity limits of hadron supercolliders
[DE93-019248] p 1980 N94-20300
SUPERCONDUCTIVITY
Dynamics of vortices in superconductors
[DE93-019535] p 2011 N94-19808
Spin-polaron theory of high-(Tc) superconductivity. 1: Spin polarons and high (Tc) pairing
[DE93-019196] p 2014 N94-20002
Machinable oxide ceramic
[AD-D015927] p 1699 N94-20017
Solid State Technology Branch of NASA Lewis Research Center: Fifth Annual Digest
[NASA-TM-106303] p 1732 N94-20497
Space applications of superconducting microwave electronics at NASA Lewis Research Center p 1671 N94-20513
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558
Local structure and superconductivity in La(2-x)Ba(x)CuO4 for x=0.125 and x=0.15
[DE93-040193] p 2029 N94-21555
Local structure in oxygen-doped La2CuO(4+delta)
[DE93-040248] p 2030 N94-21768
Spin-polaron theory of high-T(c) superconductivity. 3: Gap function and critical temperature
[DE93-019198] p 2030 N94-21831
Fullerene derivatives and fullerene superconductors
[DE93-019568] p 2031 N94-21871
Specific heat of YBa2Cu3O7
[DE93-040640] p 2031 N94-21926
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario
[DE94-001183] p 2032 N94-21972
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007
SUPERCONDUCTORS
Dynamics of vortices in superconductors
[DE93-019535] p 2011 N94-19808
The proximity effect in ultrathin granular Pb films
[AD-A271094] p 2012 N94-19848
Fullerene derivatives and fullerene superconductors
[DE93-019568] p 2031 N94-21871
SUPERFLUIDITY
Acoustic microscopy and nonlinear effects in pressurized superfluid helium
[AD-A270598] p 1967 N94-19949
Canonically covariant formulation of Landau's Newtonian superfluid dynamics
[PB93-221034] p 1805 N94-22272
SUPERGIANT STARS
VVNRS: Variable phenomena in VV Cephei
[NASA-CR-194731] p 2056 N94-21835
SUPERHETERODYNE RECEIVERS
FM interference in radio navigation receivers p 1645 N94-22219
SUPERHIGH FREQUENCIES
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433
Mobile antenna development at JPL p 1731 N94-20457
An in-depth analysis and modelling of the Shuttle to MILA S-band telemetry link p 1657 N94-21340
Heterojunction bipolar transistor technology for data acquisition and communication p 1763 N94-21697
Radio wave propagation studies along an Earth-space satellite link
[ISBN-0-315-60627-4] p 1742 N94-22408
SUPERLATTICES
Investigation of quantum effects in heterostructures
[AD-A270938] p 2011 N94-19817
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835
Ellipsometric study of Si(0.5)Ge(0.5)/Si strained-layer superlattices p 1734 N94-20509
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 1734 N94-20510
Materials, Structures, and Devices for High-Speed Electronics
[NASA-CR-193177] p 2019 N94-20971
Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry p 1796 N94-20985
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry p 2022 N94-20992
Superlattice optical properties measured by variable angle spectroscopic ellipsometry p 2022 N94-20993
GaAs/AlGaAs superlattice characterization by variable angle spectroscopic ellipsometry p 2022 N94-20994
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
Photo- and thermal-induced antiferromagnetic interlayer coupling in Fe/(Fe-Si) superlattices
[DE93-040822] p 2031 N94-21930
Orientationally independent antiferromagnetic coupling in epitaxial Fe/Cr (211) and (100) superlattices
[DE94-001270] p 2035 N94-22564
SUPERNOVA 1987A
Electron acceleration in and radio emission from SN1987A p 2007 N94-22677
SUPERNOVAE
New production mechanisms for unstable nuclei in stars, supernovae, and the big bang
[DE93-018627] p 2081 N94-21618
SUPERPLASTICITY
The use of backscattered electron imaging mode to assess the effect of fine dispersions on development of superplastic microstructure in Al-Mg alloys
[AD-A272426] p 1691 N94-21258
Materials Science and Engineering
[DE93-040497] p 1675 N94-21530
The effect of microstructural evolution on superplasticity in Ni3Si(V, Mo)
[DE93-041320] p 1694 N94-21943
SUPERSONIC COMBUSTION
Instantaneous velocity field imaging instrument for supersonic reacting flows
[NASA-CR-191162] p 1809 N94-21607
SUPERSONIC COMBUSTION RAMJET ENGINES
Optimization and performance analysis of a supersonic conical-flow waverider for a deck-launched intercept mission
[AD-A272498] p 1648 N94-21433
SUPERSONIC FLOW
Fluid dynamic mechanisms and interactions within separated flows
[AD-A271037] p 1797 N94-19978
Instantaneous velocity field imaging instrument for supersonic reacting flows
[NASA-CR-191162] p 1809 N94-21607
Three-dimensional simulations of cosmic jets employing the smoothed particle hydrodynamics technique p 2008 N94-22685
SUPERSONIC JET FLOW
Instability modes excited by natural screech tones in a supersonic rectangular jet
[NASA-TM-106409] p 1638 N94-22274
SUPERSONIC SPEED
Options for thrust augmentation for the Beta 2 two-stage-to-orbit launch vehicle
[NASA-TM-106418] p 1649 N94-21759
SUPERSONIC TRANSPORTS
Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188
SUPERSYMMETRY
Simulating supersymmetry with ISAJET 7.0/ISASUSY 1.0
[DE93-018266] p 1969 N94-19804
On the twisted N=2 superconformal structure in 2d gravity coupled to matter
[DE93-628627] p 2037 N94-20178
Theoretical particle physics
[DE94-000538] p 1973 N94-20938
SUPPORT SYSTEMS
Military satellite communications decision support system requirements analysis and user interface design
[AD-A273047] p 1740 N94-21436
A comparison of IDEF1X and NIAM ISDM
[DE93-040899] p 1921 N94-22383
SUPPORTS
Shaft mount for data coupler system
[NASA-CASE-LAR-13805-1] p 1822 N94-20365
SURFACE ACOUSTIC WAVE DEVICES
Improvements on the design of optimum SAW filters with the Remez Exchange Algorithm p 1773 N94-22123
SURFACE DEFECTS
Surface and subsurface defect detection in Si3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772
SURFACE DISTORTION
Principles and applications of oil film interferometry for measuring wall friction fields in air flows
[ETN-93-95062] p 1798 N94-20147
SURFACE EMITTING LASERS
Spatial patterns in semiconductor lasers
[DE93-040056] p 1814 N94-19865

SURFACE ENERGY
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations [NASA-CR-194802] p 1837 N94-20951
Role of surface characteristics in urban meteorology and air quality [DE93-040929] p 1851 N94-21740
SURFACE FINISHING
Oxidation resistant protective coating system for gas turbine components and process for penetration thereof [CA-PATENT-1,294,155] p 1704 N94-21143
Laser driven hydrodynamic instability experiments [DE93-040550] p 1818 N94-21547
Experiments with a fluid deicing system for cleaning laminar wings p 1640 N94-22601
SURFACE LAYERS
Polarimetric thermal emission from periodic water surfaces p 1728 N94-20445
A theoretical investigation of unsteady separation phenomena related to dynamic stall [AD-A271865] p 1636 N94-20485
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 1734 N94-20510
Analytic solutions for optimized ellipsometric measurements of interfaces and surface layers in thin film structures p 2019 N94-20977
Laser Raman and x ray scattering studies of corrosion films on metals [DE93-040243] p 1692 N94-21558
SURFACE NAVIGATION
Robotic concepts for operation in barren terrain [DE93-040539] p 1946 N94-21925
SURFACE PROPERTIES
Surface science at the solid liquid interface [AD-A271422] p 1678 N94-19839
Formation of colloidal Ag precipitates in fused silica by MeV ion implantation [DE93-040268] p 2012 N94-19869
Particles on surfaces of laser ablated Y1Ba2Cu3O(7-delta) films [DE93-040269] p 2013 N94-19929
The metallic bond for monolayer transition metal layers on transition metal surfaces [DE93-019060] p 1691 N94-20313
Direct imaging of the surface microstructure of dielectric materials using an atomic force microscope [AD-A272251] p 2018 N94-20575
Distribution of small volcanic cones on the surface of Venus by size and elevation: Implications for differential deposition of volcanic features p 2110 N94-20731
Variable angle spectroscopic ellipsometric characterization of surface damage in chemical-mechanical polished GaAs p 1710 N94-20986
GaAs(100) surface modifications at elevated temperatures, studied by in-situ spectroscopic ellipsometry p 2023 N94-20997
Ellipsometric study of GaAs(100) surface changes induced at elevated temperatures p 2023 N94-20998
Obtaining surface optical properties from space-based lidar systems [AD-A272831] p 1967 N94-21172
An analysis of pool surface deformation due to a plunging liquid jet [AD-A272970] p 1802 N94-21261
A method of measuring the thermoradiative properties of ceramic materials in a space environment p 1665 N94-21405
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667
Role of surface characteristics in urban meteorology and air quality [DE93-040929] p 1851 N94-21740
Surface and subsurface defect detection in Si3N4 components by laser scattering [DE93-040829] p 1832 N94-21772
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario [DE94-001183] p 2032 N94-21972
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings [DE93-040547] p 1990 N94-22002
Areally averaged estimates of surface heat flux from ARM field studies [DE93-018569] p 1859 N94-22036
Quantitative analysis of scanning tunneling microscopy images for surface structure determination: Sulfur on Fe(0001) [DE93-019235] p 2034 N94-22041
Surface-induced brightness temperature variations and their effects on detecting thin cirrus clouds using IR emission channels in the 8-12 micrometer region p 1880 N94-22341
SURFACE REACTIONS
Materials processing and manufacturing technologies for Diamond Substrate MultiChip Modules (DSMCM) [AD-A271011] p 2011 N94-19821
Segregation of Si to the surface of Fe-29Ni-17Co alloy [DE93-040053] p 1687 N94-19864
Oxidation-reduction induced roughening of platinum (111) surface [DE93-017408] p 1687 N94-19922
The modification of polymer surfaces and the fabrication of submicron-scale functionalized structures by deep-UV and electron beam lithography [AD-A265956] p 1700 N94-20328
In-situ electrochemical surface science [AD-A265942] p 1680 N94-20330
Surface science and modeling studies of endothermic fuels catalysis [AD-A272850] p 1712 N94-21192
Model for liquid boron oxide droplet gasification in H/O/C/F combustion environments [AD-A272911] p 1682 N94-21243
Fast oxygen atom studies related to low Earth orbit activities p 1663 N94-21395
Vapor-delivered lubrication of steel-steel and steel-ceramic systems [PB93-202364] p 1825 N94-21451
Sulfur-bonded thiophenes in organometallic rhenium complexes and adsorption of isocyanides on gold [DE93-041126] p 1694 N94-21937
SURFACE ROUGHNESS
Substrate recovery of Mo-Si multilayer coated optics [DE93-019610] p 1698 N94-19810
Radar backscatter measurements from simulated sea ice during CRRELEX 1990 [AD-A271034] p 1715 N94-19823
Oxidation-reduction induced roughening of platinum (111) surface [DE93-017408] p 1687 N94-19922
Study of electromagnetic wave scattering from characterized rough surfaces [AD-A270931] p 1716 N94-19934
Growth mechanisms and characterization of hydrogenated amorphous-silicon-alloy films [DE93-018202] p 1699 N94-20047
Measuring liquid properties with smooth and textured-surface resonators [DE93-019433] p 1749 N94-20054
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439
Synergism of active and passive microwave data for estimating bare surface soil moisture p 1727 N94-20444
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging p 2101 N94-20685
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
Non-destructive evaluation in manufacturing using spectroscopic ellipsometry p 1826 N94-21012
In-situ and ex-situ ellipsometric characterization for semiconductor technology p 2026 N94-21013
VASE (variable angle spectroscopic ellipsometry) p 1687 N94-21014
Flow transition with 2-D roughness elements in a 3-D channel p 1806 N94-21466
Role of surface characteristics in urban meteorology and air quality [DE93-040929] p 1851 N94-21740
Experiments with a fluid deicing system for cleaning laminar wings p 1640 N94-22601
SURFACE ROUGHNESS EFFECTS
Polarimetric thermal emission from rough surfaces p 1727 N94-20441
Symmetry in polarimetric remote sensing p 1729 N94-20449
SURFACE TEMPERATURE
Soil temperatures [KNMI-WR-92-05] p 1865 N94-20309
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations [NASA-CR-194802] p 1837 N94-20951
High-energy astrophysics: A theoretical analysis of thermal radiation from neutron stars [NASA-CR-194808] p 2055 N94-20952
GaAs(100) surface modifications at elevated temperatures, studied by in-situ spectroscopic ellipsometry p 2023 N94-20997
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
A model for the evolution of CO2 on Mars p 2144 N94-21671
Early Mars: The inextricable link between internal and external influences on valley network formation p 2146 N94-21681
Fluorescent microthermographic imaging [DE93-040332] p 1810 N94-22000
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings [DE93-040547] p 1990 N94-22002
SURFACE TREATMENT
Substrate recovery of Mo-Si multilayer coated optics [DE93-019610] p 1698 N94-19810
The modification of polymer surfaces and the fabrication of submicron-scale functionalized structures by deep-UV and electron beam lithography [AD-A265956] p 1700 N94-20328
Surface treatment of InP and contribution to the optimization of the InP(p)/InP(p) regrown interfaces grown by GSMBE [ECL-92-48] p 2018 N94-20598
A comparison of sulfuric acid/boric acid anodize and chromic acid anodize processes [AD-A271933] p 1703 N94-20614
Spectroscopic ellipsometric characterization of Si/Si(1-x)Ge(x) strained-layer superlattices p 2025 N94-21009
Surface modification for corrosion resistance [DE93-017419] p 1693 N94-21825
SURFACE WATER
Ice in the northern plains: Relic of a frozen ocean? p 2090 N94-20391
Evolution of the global water cycle on Mars: The geological evidence p 2142 N94-21660
The evolution of the early Martian climate and the initial emplacement of crustal H2O p 2143 N94-21665
SURFACE WAVES
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413
Ocean wave height transformation model using surface roller theory [AD-A272610] p 1883 N94-21423
Theory and simulation of plasma sheath waves [DE94-001305] p 1999 N94-22567
SURFACTANTS
Thrust expansion engine [AD-D015896] p 1669 N94-20121
Non-ionic surfactants in the treatment of third degree burns [AD-A271582] p 1891 N94-21035
Synthesis and catalytic properties of metal and semiconductor nanoclusters [DE93-019418] p 2028 N94-21541
SURGERY
A geometrical process for three dimensional osteotomy planning [ETN-93-93602] p 1892 N94-21134
SURVEILLANCE
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations [DOT/FAA/RD-93/22] p 1642 N94-20051
SURVEILLANCE RADAR
State-space models for multichannel detection [AD-A270608] p 1715 N94-19816
The application of spaceborne synthetic aperture radar in the maritime environment [DRA-TM(AWE)-91013] p 1737 N94-20596
SURVEYS
Relating ground truth collection to model sensitivity p 1719 N94-20409
Performance management systems: A statistical analysis [AD-A272989] p 2043 N94-21266
Implementing Electronic Data Interchange (EDI) with small business suppliers in the pre-award acquisition process [AD-A271767] p 1945 N94-21305
Survey and alignment analysis for the ALS storage ring using computer spreadsheets [DE93-019254] p 1917 N94-21917
Current situation in developing petroleum substituting energy (the United Kingdom) [DE94-714897] p 1713 N94-22091
Surveys on specific patterns of facility intallation of photovoltaic power generating technologies for international cooperation [DE94-714901] p 1850 N94-22092
SWELLING
Swelling equilibria for cationic 2-hydroxyethyl methacrylate (HEMA)-based hydrogels [DE94-000728] p 1707 N94-21856
SWEPT FORWARD WINGS
Experimental study on interference aerodynamics of close-coupled canard configuration [AD-A267760] p 1636 N94-19963
SWEPT WINGS
Surface hot film measurements at ATTAS laminar glove p 1639 N94-22598

SWITCHES
Photoconductive Semiconductor Switches for pulsed power applications
[DE93-019411] p 1750 N94-20294
Optically controlled current filamentation in GaAs photoconductive semiconductor switches
[DE93-019427] p 2016 N94-20296
High current density contacts for photoconductive semiconductor switches
[DE93-018837] p 1750 N94-20312
High-power gas switch with hydride electrodes
[AD-D015956] p 1751 N94-20354
Two dimensional simulation of the electric arc behavior in a cut-off device
[ECL-92-41] p 1751 N94-20595
Results from long conduction time plasma opening switch experiments at Sandia National Laboratories
[DE93-019063] p 1762 N94-21632
Ultrafast gas switching experiments
[DE93-019071] p 1762 N94-21634
SWITCHING
Delivery of very high bandwidth with ATM switches and SONET
[DE93-019432] p 1899 N94-20476
An application of the Cerebellar Model Articulation Controller for a switched reluctance rotor position estimator
[AD-A271769] p 1943 N94-20926
Low-latency digital frequency synthesizer using the residue number system p 1759 N94-21121
Optimization of fixed time polling schemes
[CWI-BS-R9237] p 1945 N94-21233
Research on plasma-puff initiation of high Coulomb transfer switches
[NASA-CR-194371] p 1994 N94-21289
Plasma-puff initiation of high Coulomb transfer switches p 1994 N94-21290
Characteristics of plasma-puff trigger for a inverse-pinch plasma switch p 1995 N94-21291
Characteristics of switching plasma in an inverse-pinch switch p 1995 N94-21292
Comparative study of INPIStron and spark gap p 1995 N94-21293
INPIStron switched pulsed power for dense plasma pinches p 1995 N94-21294
Ultrafast gas switching experiments
[DE93-019071] p 1762 N94-21634
Evaluation of DEC's GIGAswitch for distributed parallel computing
[DE94-001356] p 1936 N94-21853
SWITCHING CIRCUITS
SPICE macromodel for a 1-megawatt power MOSFET switch
[DE93-019415] p 1748 N94-19844
Computational model of a magnetic modulator for copper lasers
[DE93-019603] p 1815 N94-20223
Photoconductive Semiconductor Switches for pulsed power applications
[DE93-019411] p 1750 N94-20294
Novel N x N integrated channel waveguide optical crossbars for large scale high speed non-blocking data switching
[AD-A272065] p 1986 N94-20922
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
A FET-switched induction accelerator cell
[DE93-019604] p 1769 N94-21838
A shared buffer memory switch with maximum queue and minimum allocation p 1773 N94-22119
An adaptive method for group delay compensation using switched capacitor filters p 1793 N94-22248
SWITCHING THEORY
Throughput and blocking in circuit-switched interconnection networks p 1784 N94-22189
Buffer allocation in an ATM switch with output buffer and speed constraints p 1746 N94-22203
SYLLABLES
Generalization performance of backpropagation learning on a syllabification task p 1940 N94-20246
SYMBOLS
Links between N-modular redundancy and the theory of error-correcting codes p 1765 N94-21713
SYMMETRY
Symmetry in polarimetric remote sensing p 1729 N94-20449
High resolution infrared spectroscopy of cyclobutane: A study of vibrational mode coupling involving large amplitude, low frequency modes
[AD-A271987] p 1973 N94-20619
Symmetries and conservation laws of the system: u(x)=vw(x), v(y)=uw(y), uv+w(xx)+w(yy)=0
[MEMO-1084] p 1953 N94-21046
Electronically metastable molecules of high symmetry
[AD-A272015] p 1974 N94-21461
Lattice gauge theory: Present status
[DE93-041154] p 2038 N94-21692
Symmetry-dictated trucation: Solutions of the spherical shell model for heavy nuclei
[DE94-000482] p 1976 N94-21961
SYNCHROCYCLOTRONS
On modelling nuclear reactions in meteorites p 2085 N94-20844
SYNCHRONISM
Structural modeling: An application framework and development process for flight simulators
[AD-A271348] p 1650 N94-19880
Time warp operating system version 2.7 internals manual
[NASA-CR-194798] p 1899 N94-20549
Avoiding and tolerating latency in large-scale next-generation shared-memory multiprocessors p 1753 N94-21081
Reliable interface design for combining asynchronous and synchronous circuits p 1758 N94-21119
Partition algebraic design of asynchronous sequential circuits p 1759 N94-21125
Structured multimedia authoring
[CWI-CS-R9304] p 2044 N94-21535
The Amsterdam hypermedia model: Extending hypertext to support real multimedia
[CWI-CS-R9306] p 2045 N94-21536
A mechanized process algebra for verification of device synchronization protocols p 1766 N94-21716
SYNCHRONOUS MOTORS
Flow and heat transfer model for a rotating cryogenic motor
[DE94-001151] p 1794 N94-22405
SYNCHROTRON RADIATION
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Examination for optimization of synchrotron radiation spectrum for the x ray depth lithography
[BONN-IR-92-32] p 1967 N94-21148
Radio and optical emission: Spectral shapes and breaks in GRB
[NASA-CR-194763] p 2150 N94-21781
Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974
SYNCHROTRONS
A summary of studies of particle stability at RHIC
[DE93-040173] p 1970 N94-19868
ALE project
[AD-A271080] p 2014 N94-19960
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Jet shapes in hadron and electron colliders
[DE93-019386] p 1979 N94-20216
The cross section for the production of b(bar-b) pairs in p(bar p) collisions at the square root of s equals 1.8 TeV
[DE93-019900] p 1972 N94-20225
National Synchrotron Light Source user's manual: Guide to the VUV and x ray beamlines
[DE93-019564] p 2015 N94-20260
Energy and luminosity limits of hadron supercolliders
[DE93-019248] p 1980 N94-20300
Wavelength dispersive analysis with the synchrotron x ray fluorescence microprobe p 1685 N94-20717
Infrared FEL photochemistry: Multiple-photon dissociation of freon gas
[DE94-000817] p 1820 N94-22585
SYNOPTIC METEOROLOGY
The life cycles of intense cyclonic and anticyclonic circulation systems observed over oceans
[NASA-CR-194760] p 1865 N94-20353
A synoptic-scale overview of the TOGA COARE intensive observing period November 1992 to February 1993 based on analyses from US operational global data assimilation systems
[NASA-TM-104593] p 1868 N94-21605
A documentation of icing relevant cloud physical parameters on horizontal soundings of stratiform clouds (continuation)
[DLR-MITT-92-10] p 1871 N94-22280
Examination of the observed synoptic scale cirrus cloud environment: The December 3-6 FIRE cirrus case study p 1877 N94-22325
Cirrus cloud development in a mobile upper tropospheric trough: The November 26th FIRE cirrus case study p 1878 N94-22329
SYNTAX
Representation of idioms in connectionist models p 1940 N94-20247
Hopfield models as neural-network acceptors p 1941 N94-20250
Syntactic neural networks for natural language processing p 1941 N94-20254
COCOLOG: A conditional observer and controller logic for finite machines
[INRIA-RR-1714] p 1910 N94-21063
Recognizing hesitation phenomena in continuous, spontaneous speech p 1746 N94-22210
Fortran for the nineties p 1926 N94-22481
SYNTHESIS (CHEMISTRY)
Synthesis and structural characterization of new light molecular weight inorganic oxidizers and relative derivatives, volume 1
[AD-A271437] p 2012 N94-19842
Electrochemical synthesis of ultrathin film composite membranes
[AD-A272721] p 1681 N94-21168
Development of bioelastic material for aspects of wound repair
[AD-A272000] p 1892 N94-21503
Synthesis and catalytic properties of metal and semiconductor nanoclusters
[DE93-019418] p 2028 N94-21541
SYNTHETIC APERTURE RADAR
Modifications to the three-component classification algorithm for SAR data p 1719 N94-20410
Determination of noise equivalent sigma(0) using highly correlated repeat-pass SAR images p 1720 N94-20411
Topographic mapping using a monopulse SAR system p 1721 N94-20417
Classification of simple vegetation types using POLSAR image data p 1722 N94-20420
Two microstrip arrays for interferometric SAR applications p 1722 N94-20421
Observation of pressure ridges in SAR images of sea ice: Scattering theory and comparison with observations p 1723 N94-20427
On evaluating the accuracy of SAR sea-ice classification using multifrequency polarimetric AIRSAR data p 1724 N94-20426
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430
Retrieval of ice thickness from polarimetric SAR data p 1724 N94-20432
Radar backscattering from snow facies of the Greenland ice sheet: Results from the AIRSAR 1991 campaign p 1725 N94-20434
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435
Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters p 1729 N94-20452
The Brewster angle effect in SAR polarimetry p 1731 N94-20456
Topographic slope from the SAR interferometric phase gradient p 1731 N94-20459
Interferometric detection of freeze-thaw displacements of Alaskan permafrost using ERS-1 data p 1732 N94-20460
Performance evaluation of the JPL TOPSAR system: An across-track interferometric SAR system for topographic mapping p 1732 N94-20461
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A271911] p 1882 N94-20489
The application of spaceborne synthetic aperture radar in the maritime environment
[DRA-TM(AWE)-91013] p 1737 N94-20596
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
Magellan vertical polarization radar observations p 1744 N94-20691
Magellan Mission p 1652 N94-20829
Massachusetts Institute of Technology Lincoln Laboratory Journal volume 6, number 1, Spring 1993
[AD-A272273] p 1737 N94-20944
Neural network studies
[AD-A271593] p 1943 N94-20947
The 7th Brazilian Remote Sensing Symposium, volume 3 p 1839 N94-20960
Evaluation of C-band SAR data from SAREX 1992: Tapajos study site p 1839 N94-20964
An overview of synthetic aperture radar signal processing techniques p 1745 N94-22159
Target angular motion and its effects on simulated SSAR ship images p 1745 N94-22161
A motion extraction method for synthetic aperture radars
[DLR-FB-92-31] p 1742 N94-22279
STAR-1 SAR road extraction using texture analysis and mathematical morphology
[ISBN-0-315-83255-X] p 1843 N94-22429

SYSTEM FAILURES
Development and testing of a reliability performance index for modular robotic systems
[AD-A271901] p 1942 N94-20488
Real-time fault tolerant computer systems
[AD-A272909] p 1899 N94-21230
Reducing the cognitive workload: Trouble managing power systems
[NASA-TM-106413] p 1714 N94-21564
SYSTEM IDENTIFICATION
Literature review of the errors-in-variables approach to the problem of system identification
[AD-A271098] p 1949 N94-19907
SYSTEMS ANALYSIS
SISSY: An example of a multi-threaded, networked, object-oriented databased application
[DE93-019742] p 2041 N94-19811
Interval timed coloured petri nets and their analysis
[PB93-191732] p 1903 N94-19992
System performance predictions for Space Station Freedom's electric power system
[NASA-TM-106396] p 1667 N94-20062
Multi-disciplinary coupling effects for integrated design of propulsion systems
[NASA-TM-106349] p 1830 N94-20170
Test and evaluation: DOD has been slow in improving testing of software-intensive systems
[AD-A271541] p 1908 N94-20917
Specification and generation of Markov reward models
[MEMO-INF-92-60] p 1963 N94-21058
N parallel queueing systems with server breakdown and repair
[CWI-BS-R9236] p 1944 N94-21232
Building integrated photovoltaic systems analysis
[DE93-018208] p 1846 N94-21298
Physics Detector Simulation Facility (PDSF) architecture/utilization
[DE93-019744] p 1936 N94-21919
Mathematical modelling of economic systems
p 2050 N94-22060
Macromodel of centrally planned economy
p 2050 N94-22062
Mesoscale simulations of the November 25-26 and December 5-6 cirrus cases using the RAMS model
p 1878 N94-22331
SYSTEMS COMPATIBILITY
The conformance testing methodology to CTRON (communication and central TRON) extended OS
p 1772 N94-22118
SYSTEMS ENGINEERING
Model checking, abstraction, and compositional verification
[AD-A270552] p 1902 N94-19919
Total systems design analysis of high performance structures
[NASA-TP-3432] p 1653 N94-20141
Design considerations for a fiber optic communications network for power systems
[DE93-018404] p 1984 N94-20179
Design structuring and allocation optimization (Destination) prototype level 1 user's manual
[AD-A272115] p 1929 N94-20571
Let your fingers do the walking: The projects most invaluable tool p 1922 N94-21325
Canadian Conference on Electrical and Computer Engineering, volumes 1 and 2
[ISBN-0-9694170-2-0] p 1770 N94-22101
ScaRaB and its subsystems p 1860 N94-22285
SYSTEMS INTEGRATION
SISSY: An example of a multi-threaded, networked, object-oriented databased application
[DE93-019742] p 2041 N94-19811
A modular design for connectionist parsing
p 1941 N94-20252
Space Generic Open Avionics Architecture (SGOAA) standard specification
[NASA-CR-188269] p 1666 N94-22275
SYSTEMS MANAGEMENT
Distributed Virtual System (DIVIRS) project
[NASA-CR-194360] p 1905 N94-20228
Government Open Systems Interconnection Profile (GOSIP) transition strategy
[AD-A273005] p 1740 N94-21308
Intervention strategies for the management of human error
[NASA-CR-4547] p 1642 N94-22373
SYSTEMS SIMULATION
Model checking, abstraction, and compositional verification
[AD-A270552] p 1902 N94-19919
Back and forth bisimulations on prime event structures
[RR-888-I-IMAG-124-LIFIA] p 1929 N94-20124
Multi-disciplinary coupling effects for integrated design of propulsion systems
[NASA-TM-106349] p 1830 N94-20170
SYSTOLIC ARRAYS
The Fifth NASA Symposium on VLSI Design
[NASA-CR-194644] p 1753 N94-21079
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114
Bit-systolic arithmetic arrays using dynamic differential gallium arsenide circuits p 1767 N94-21724
A 1 GHz sample rate, 256-channel, 1-bit quantization, CMOS, digital correlator chip p 1768 N94-21732
Design of a floating point convolution processor
p 1775 N94-22133

T

T TAURI STARS
Pre-main sequence stars in the Chamaeleon cloud and pre-main sequence stars in the Rho Ophiuchi cloud core
[NASA-CR-194713] p 2080 N94-20337
TABLES (DATA)
Evaluation of RDBMS packages for use in astronomy
p 2048 N94-22514
The European Southern Observatory-MIDAS table file system p 2048 N94-22518
TACTILE DISCRIMINATION
Application of change detection to dynamic contact sensing
[AD-A270523] p 1939 N94-20105
TACTILE SENSORS (ROBOTICS)
Application of change detection to dynamic contact sensing
[AD-A270523] p 1939 N94-20105
TAIL ASSEMBLIES
Apparatus and method for improving spin recovery on aircraft
[NASA-CASE-LAR-14747-1] p 1650 N94-20556
TALKING
Recognizing hesitation phenomena in continuous, spontaneous speech p 1746 N94-22210
TANTALUM
The metallic bond for monolayer transition metal layers on transition metal surfaces
[DE93-019060] p 1691 N94-20313
Gamma ray spectrometry of LDEF samples: Results of 1992 analyses
[DE94-001177] p 1684 N94-22046
TANTALUM CARBIDES
Performance of carbon-based hot frit substrates
[DE94-000509] p 1676 N94-21754
TANTALUM COMPOUNDS
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
TANTALUM OXIDES
A quantitative model for interpreting nanometer scale hardness measurements of thin films
[DE93-040601] p 2034 N94-22005
TAPE RECORDERS
Recording system using multiplexed inputs to a multichannel recorder
[AD-D015971] p 1808 N94-21278
TARGET ACQUISITION
Target motion detecting impulse Doppler radar system
[AD-D015898] p 1717 N94-20198
Probability of detection calculations using MATLAB
[AD-A271958] p 1736 N94-20578
Development of a lidar for integration with the Naval Postgraduate School Infrared Search and Target Designation (NPS-IRSTD) system
[AD-A271847] p 1817 N94-20611
Current directions in the vulnerability/lethality process structure
[AD-A272836] p 1964 N94-21175
NAVSPASUR sensor system digital signal processing receiver. Volume 2: Function and capabilities of hardware and software components
[AD-A272900] p 1739 N94-21218
TARGET DRONE AIRCRAFT
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
TARGET RECOGNITION
Recognition by prototypes
[AD-A271687] p 1943 N94-20921
Massachusetts Institute of Technology Lincoln Laboratory Journal volume 6, number 1, Spring 1993
[AD-A272273] p 1737 N94-20944
Improvement in invariant pattern recognition with neural networks and Fourier-Mellin filters p 1780 N94-22164
A modified moment invariants technique for classification of noisy objects p 1780 N94-22165
Signal processing and target discrimination algorithms for a rosette scan tracker p 1747 N94-22237
Radar imaging of moving targets
p 1747 N94-22238
TARGETS
Facilities for in situ ion beam studies in transmission electron microscopes
[DE93-019567] p 1979 N94-20222
Geometrical analysis of the microcraters found on LDEF samples p 1666 N94-20890
Antipodal fragment velocities for porous and weak targets at catastrophic impacts p 1836 N94-20891
TASKS
Development of the UTC-PAB normative database
[AD-A271319] p 1893 N94-20023
Multilist scheduling: A new parallel programming model
[AD-A270549] p 1929 N94-20084
TASTE
Reassessment of area postrema's role in motion sickness and conditioned taste aversion
p 1886 N94-21901
Recovery of the vomiting reflex following area postrema ablation in squirrel monkeys p 1886 N94-21904
Conditioned taste aversion induced by motion is prevented by selective vagotomy in the rat
p 1887 N94-21908
The effects of area postrema lesions and selective vagotomy on motion-induced conditioned taste aversion
p 1888 N94-21910
Role of the area postrema in three putative measures of motion sickness in the rat p 1888 N94-21912
Investigating motion sickness using the conditioned taste aversion paradigm p 1888 N94-21913
Conditioned taste aversion and motion sickness in cats and squirrel monkeys p 1888 N94-21914
TAXIING
A study of parallel pier finger airport terminal configuration
[ISBN-0-315-83128-6] p 1652 N94-22425
TDR SATELLITES
The NCC project: A quality management perspective
p 1828 N94-21324
Software metrics: The key to quality software on the NCC project p 1922 N94-21326
Problem reporting management system performance simulation p 1931 N94-21328
Enhanced networks operations using the X Window System p 1932 N94-21329
Space network scheduling benchmark: A proof-of-concept process for technology transfer
p 1932 N94-21332
Analysis of the TDRS multiple access system for possible use as an attitude control system sensor
p 1666 N94-21338
The Automated Conflict Resolution System (ACRS)
p 1744 N94-21341
Satellite Communication Hardware Emulation System (SCHES) p 1744 N94-21344
Using the USCCS for sub microsecond spacecraft clock calibration p 1813 N94-21346
Advanced coding and modulation schemes for TDRSS
p 1744 N94-21350
TEAMS
Factors associated with continuance commitment to FAA matrix teams
[DOT/FAA/AM-93/18] p 2040 N94-21626
TEARING MODES (PLASMAS)
Effects of magnetic field perturbations in the ATF torsatron
[DE94-000474] p 1999 N94-22568
TECHNICAL WRITING
An assessment of the statistical and editorial output of text analysis programs
[AD-A272185] p 2042 N94-20924
TECHNOLOGY ASSESSMENT
Statement of David E. Baldwin, Associate Director for Energy, Lawrence Livermore National Laboratory and John C. Crawford, Vice President, Sandia National Laboratories, California, to the Subcommittee on Research and Development of the Committee on Environment and Public Works, US Senate, Washington, DC, 22 March 1993
[DE93-017991] p 1844 N94-19803
Data format standards for civilian remote sensing satellites
[PB93-192920] p 1841 N94-21446
NEP Early Flight program: System performance and development considerations
[NASA-TM-106415] p 1654 N94-21570
Survey of lift-fan aerodynamic technology
[NASA-CR-177615] p 1646 N94-21592
Thin-film CdTe and CuInSe2 photovoltaic technologies
[DE93-018217] p 1848 N94-21827
Microtechnology: The key to the technical challenges of the 21st century
[DE94-000403] p 1769 N94-21959
Survey on evaluation of energy technology contributing to preservation of the global environment. 2
[DE94-714884] p 1853 N94-22051

Study on possibility of developing energy integration technology
[DE94-714903] p 1849 N94-22052
Manufacturing and information technology p 2046 N94-22082
Spaceplane flight simulation: Project definition
[PB93-211399] p 1651 N94-22094

TECHNOLOGY TRANSFER
The development of remote sensing in Brazil and Canada: Comparative case studies p 1840 N94-20968
Networks Technology Conference
[NASA-CP-3241] p 1931 N94-21323
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562
Index to 1992 NASA Tech Briefs, volume 16, numbers 1-12
[NASA-TM-109377] p 2053 N94-21736
Index to 1991 NASA Tech Briefs, volume 15, numbers 1-12
[NASA-TM-109376] p 2053 N94-21737
Cumulative index to NASA Tech Briefs, 1986-1990, volumes 10-14
[NASA-TM-109378] p 2054 N94-21738
Spinoff, 1992
[NASA-NP-201] p 2054 N94-21739
Microtechnology: The key to the technical challenges of the 21st century
[DE94-000403] p 1769 N94-21959

TECHNOLOGY UTILIZATION
Space applications of superconducting microwave electronics at NASA Lewis Research Center p 1671 N94-20513
Lithium batteries: Future batteries p 1752 N94-20630
Rad-hard computer elements for space applications p 1753 N94-21082
Conversion of LDEF experiment M0003 sample observation database to MS-DOS formats
[AD-A272945] p 1681 N94-21226
Index to 1992 NASA Tech Briefs, volume 16, numbers 1-12
[NASA-TM-109377] p 2053 N94-21736
Index to 1991 NASA Tech Briefs, volume 15, numbers 1-12
[NASA-TM-109376] p 2053 N94-21737
Cumulative index to NASA Tech Briefs, 1986-1990, volumes 10-14
[NASA-TM-109378] p 2054 N94-21738
Spinoff, 1992
[NASA-NP-201] p 2054 N94-21739
Acoustic, fiber optic, and silicon microelectronic microsensors research and development activities at Sandia National Laboratories
[DE93-019075] p 1770 N94-22040

TECTONICS
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Venus magmatic and tectonic evolution p 2101 N94-20683
Crater destruction on the Venusian highlands by tectonic processes p 2103 N94-20696
Strength and deformation properties of basaltic lava flows on planetary surfaces p 1862 N94-20747
Volcanic rises on Venus: Geology, formation, and sequence of evolution p 2113 N94-20755
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
Response of the topography and gravity field on Venus to mantle upwelling beneath a chemical boundary layer p 2117 N94-20775
A tectonic resurfacing model for Venus p 2118 N94-20781
Delimitation of terrestrial impact craters by way of pseudotachylytic rock distribution p 1863 N94-20783
Parga and Hecate Chasmata, Venus: Structure, volcanism and models of formation p 2121 N94-20796
Extensional history of Mars' Tharsis Region p 2125 N94-20814
Complex structure of the Thaumasia region of Mars p 2125 N94-20815
Photogeological analysis of Europan tectonic features p 2129 N94-20838
Is there uniformitarian or catastrophic tectonics on Venus? p 2129 N94-20839
Wrinkle ridges, reverse faulting, and the depth penetration of lithospheric stress in lunae planum, Mars p 2141 N94-20910
On the origin and evolution of circular forms observed in remote sensing images of the Rio de Janeiro State, Brazil p 1839 N94-20963
Mobility of salt domes
[BCRS-92-08] p 1857 N94-21016
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006

TEFLON (TRADEMARK)
Interleaved bismaleimide composites
[AD-A272233] p 1674 N94-20574
The simulation of action of some space environment factors on Teflon and on rubber materials p 1661 N94-21380

TEKTITES
Modelling the gravity and magnetic field anomalies of the Chicxulub crater p 1862 N94-20668
Iridium in sediments containing large abundances of Australasian microtektites from DSDP hole 758B in the Eastern Indian Ocean and from DSDP hole 769A in the Sulu Sea p 2083 N94-20741
Further analyses of Rio Cuarto impact glass p 1685 N94-20745
Magnetic properties and Moessbauer analyses of glass from the K-T boundary, Beloc, Haiti p 1685 N94-20753

TELECOMMUNICATION
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[DOT/FAA/RD-93/22] p 1642 N94-20051
Optimization of fixed time polling schemes
[CWI-BS-R9237] p 1945 N94-21233
Networks Technology Conference
[NASA-CP-3241] p 1931 N94-21323
Telecommunications services for multimedia data exchange support
[AD-A271704] p 1740 N94-21352
IAS telecommunication infrastructure and value added network services provided by IASNET p 1744 N94-22069
Everything you might want to know about the Internet but are afraid to ask!
[DE93-041118] p 2046 N94-22413

TELECONFERENCING
Performance evaluation of video on ethernet
[DE93-040696] p 1936 N94-21749

TELEMETRY
The EXOSAT operational experience
[ESA-STM-248] p 1657 N94-20235
SIMA: An integrated environmental monitoring system p 1840 N94-20967
Mission Operations Support Area (MOSA) for ground network support p 1932 N94-21331
An in-depth analysis and modelling of the Shuttle to MILA S-band telemetry link p 1657 N94-21340
Developing a space network interface simulator: The NTS approach p 1933 N94-21343
Concept report: Experimental vector magnetograph (EXVM) operational configuration balloon flight assembly
[NASA-CR-194702] p 1638 N94-21776
Reentry vehicle adaptive telemetry
[DE94-001168] p 1656 N94-21852
A packet based, data driven telemetry system for autonomous experimental sub-orbital spacecraft
[DE94-000399] p 1657 N94-21980
Automated analysis tools for reducing spacecraft telemetry data
[DE94-000400] p 1657 N94-21981

TELEOPERATORS
Teleoperation with virtual force feedback
[DE93-019406] p 1942 N94-20293

TELEPHONES
Conversion of the proprietary ROLM (tm) inter-node link from multimode to singlemode operation p 1744 N94-21349

TELEROBOTICS
Telerobotic control of a mobile coordinated robotic server, executive summary
[NASA-CR-194685] p 1821 N94-20044

TELESCOPES
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1986 N94-20591
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21526
Laser guide star adaptive optics: Present and future
[DE93-018642] p 1989 N94-21619
Archiving data from ground-based telescopes p 2046 N94-22442
Programmability in AIPS++ p 1926 N94-22482
Telescope image modelling software in STSDAS p 1926 N94-22483
The University of Hawaii Institute for Astronomy CCD camera control system p 1828 N94-22489
The ADAM environment and transputers p 1926 N94-22494
The VLBA correlator: Real-time in the distributed era p 2049 N94-22547
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552

TELEVISION CAMERAS
Initial laboratory evaluation of color video cameras, phase 2
[DE93-040201] p 1809 N94-21556

TELEVISION TRANSMISSION
NHK Science and Technical Research Laboratories p 2151 N94-20342

TELLURIDES
Evaporation of a sodium tellurite melt in the jamic low gravity drop shaft p 1713 N94-20605

TEMPERATE REGIONS
Are tropical cirrus brighter than mid-latitude cirrus? p 1881 N94-22343

TEMPERATURE CONTROL
Materials processing and manufacturing technologies for diamond substrate multichip modules
[AD-A271484] p 2027 N94-21319
SPACE-R Thermionic Space Nuclear Power System: Design and Technology Demonstration Program
[DE93-013969] p 1670 N94-21824

TEMPERATURE DEPENDENCE
Frequency and temperature dependence of high damping elastomers
[DE93-019539] p 1697 N94-19809
Temperature dependence of 4f PES features and hole occupancy in ytterbium heavy fermions
[DE93-040131] p 1691 N94-20321
High energy ionization in liquids: The free ion yield
[DE93-040329] p 1973 N94-20324
Ten GHz YBa2Cu3O(7-delta) superconducting ring resonators on NdGaO3 substrates p 1735 N94-20515
Stability of an uncooled segment of a high-temperature superconductor
[DE94-000476] p 2032 N94-21932
Investigation of moisture-induced embrittlement of iron aluminides
[DE93-040841] p 1695 N94-21949
Temperature dependence of magnetic order in single-crystalline UPdSn
[DE93-040153] p 2033 N94-21991
Temperature-dependent ion beam mixing
[DE93-040281] p 2033 N94-21999
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings
[DE93-040547] p 1990 N94-22002
Temperature dependence of CsI(Tl) gamma ray excited scintillation characteristics
[DE94-000836] p 2034 N94-22028
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates
[DE93-018786] p 1696 N94-22037
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398
Test results of two high temperature superconducting sample coils
[DE94-000496] p 2035 N94-22570
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584

TEMPERATURE DISTRIBUTION
Three-dimensional dynamic thermal imaging of structural flaws by dual-band infrared computed tomography
[DE93-019575] p 1906 N94-20316
Comparison of mixing calculations for reacting and non-reacting flows in a cylindrical duct
[NASA-TM-106435] p 1649 N94-21758

TEMPERATURE EFFECTS
Parametric variations of ion transport in TFTR
[DE93-012653] p 1991 N94-19883
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
Energy storage and conversion in solid hydrogen
[AD-A271439] p 1845 N94-20086
Strengthening of NiAl matrix composites
[AD-A271491] p 1674 N94-20550
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20667
Further analyses of Rio Cuarto impact glass p 1685 N94-20745
A classification scheme for the morphology of lava flow fields p 1863 N94-20879
Chemical reaction fouling model for single-phase heat transfer
[DE93-019556] p 1802 N94-20942
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
Ellipsometric study of GaAs(100) surface changes induced at elevated temperatures p 2023 N94-20998
Human responses to exercise-heat stress
[AD-A272581] p 1892 N94-21209
Description and assessment of a new Optical Pressure Measurement System (OPMS) demonstrated in the high speed wind tunnel in Goettingen (Germany)
[DLR-FB-92-24] p 1651 N94-21280

A quantitative S.E.M. image analysis of cement paste microstructure p 1708 N94-21894
Photo- and thermal-induced antiferromagnetic interlayer coupling in Fe/(Fe-Si) superlattices
[DE93-040822] p 2031 N94-21930
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398
Projections on structures and material strength in the computational context p 1834 N94-22610

TEMPERATURE GRADIENTS
The distribution of ground ice on Mars p 2090 N94-20394
Stability curves for a thermoacoustic prime mover
[AD-A272607] p 1968 N94-21422
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-001234] p 1998 N94-22561
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas
[DE94-001304] p 1999 N94-22566
Electron temperature gradient driven instability in the tokamak boundary plasma
[DE94-001307] p 1999 N94-22596

TEMPERATURE MEASUREMENT
Global and regional comparative performance of linear and nonlinear satellite multichannel sea surface temperature algorithms
[AD-A270475] p 1837 N94-20028
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
Fluorescent microthermographic imaging
[DE93-040332] p 1810 N94-22000
Shock temperature measurements of iron to 350 GPa
[DE94-001058] p 1695 N94-22024
Overview of microphysical and state parameter measurements from FIRE 2 p 1871 N94-22293
Alloying studies in U(1-x)Th(x)Pd2Al3 (0 (le) x (le) 1)
[DE94-000807] p 2036 N94-22584
Measurement Technology for Flight Tests
[ILR-MITT-256(1991)] p 1639 N94-22597
Surface hot film measurements at ATTAS laminar glove p 1639 N94-22598
Testing of a multisensor hot film technique in wind tunnel and free flight p 1639 N94-22599

TEMPERATURE PROFILES
Thermal characterization of thin films by photothermally induced laser beam deflection p 1710 N94-21007
Impact of copper vapour contamination on argon arcs p 1994 N94-21053
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459

TEMPERATURE SENSORS
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
Army aircraft fire-detection systems operation and reliability
[AD-A271327] p 1641 N94-20912

TEMPLATES
An insensitive algorithm for template matching with correlation p 1793 N94-22249

TEMPORAL DISTRIBUTION
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482

TEMPORAL RESOLUTION
Ultrafast scanning microscopy
[DE93-040121] p 1985 N94-20320
Measurement of thermal-hydraulic parameters in two-phase flow using flow visualization image analysis
[DE93-006255] p 1805 N94-22269

TENSILE PROPERTIES
Rapid heating tensile testing update: 304L stainless steel
[DE93-018770] p 1688 N94-19942
Investigation of cracking and erratic behavior of the uranium-titanium alloy
[DE93-018591] p 1688 N94-19957
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions
[AD-A272658] p 1691 N94-21188
Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines
[AD-A272998] p 1648 N94-21268
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542

TENSILE STRENGTH
Strength and deformation properties of basaltic lava flows on planetary surfaces p 1862 N94-20747
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008

TENSILE TESTS
Rapid heating tensile testing update: 304L stainless steel
[DE93-018770] p 1688 N94-19942
Stress-induced cracking of fluorocarbon rubber MTL-0002 after exposure to DS-2
[AD-A271753] p 1705 N94-21302
Tensile and shear fracture behavior of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040280] p 1706 N94-21542
Results of the second Round Robin on opening-load measurement conducted by ASTM Task Group E24.04.04 on crack closure measurement and analysis
[NASA-TM-109032] p 1832 N94-21624
Tensile strength of fiber reinforced plastics at 77K irradiated by various radiation sources
[DE93-040826] p 1709 N94-22008
Nonlinear and progressive failure aspects of transport composite fuselage damage tolerance p 1834 N94-22609

TERBIUM COMPOUNDS
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb)
[DE93-040227] p 2033 N94-21992
Spectroscopic studies of magnetic transitions in TbPO4
[DE94-001274] p 2035 N94-22565

TERMINAL BALLISTICS
Impactor control of central peak and peak-ring formation p 1862 N94-20744
Hypervelocity impact
[AD-A272957] p 1831 N94-21249

TERMINAL FACILITIES
Passenger terminal level of service measurement: A utility theoretic approach
[ISBN-0-315-59037-8] p 1651 N94-22418
Passenger terminal simulation model
[ISBN-0-315-61113-8] p 1652 N94-22423
A study of parallel pier finger airport terminal configuration
[ISBN-0-315-83128-6] p 1652 N94-22425

TERMINOLOGY
Qualifying codes under software quality assurance: Two examples as guidelines for codes that are existing or under development
[DE93-040452] p 1904 N94-20097
Understanding Open Systems Interconnection (OSI)
[AD-A271877] p 1929 N94-20472
The Keck keyword layer p 1925 N94-22460

TERNARY ALLOYS
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335
In-situ spectroscopic ellipsometry in molecular beam epitaxy p 2024 N94-21005
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates
[DE93-018786] p 1696 N94-22037

TERRACES (LANDFORMS)
Milankovitch insulation forcing and cyclic formation of large-scale glacial, fluvial, and eolian landforms in central Alaska p 2089 N94-20386
Cryoplanation terraces of interior and western Alaska p 2091 N94-20396

TERRAIN
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
A wet-geology and cold-climate Mars model: Punctuation of a slow dynamic approach to equilibrium p 2090 N94-20389
Possible occurrence and origin of massive ice in Utopia Planitia p 2090 N94-20390
A model for the origin of Martian polygonal terrain p 2090 N94-20393
The thumbprint terrain: What will Mars Observer tell us? p 2091 N94-20397
A formational model for the polygonal terrains of Mars: Taking a crack at the genesis of the Martian polygons p 2091 N94-20400
Balloon exploration of the northern plains of Mars near and north of the Viking 2 landing site p 2092 N94-20401
Geomorphic evidence for an eolian contribution to the formation of the Martian northern plains p 2092 N94-20402
Topographic mapping using a monopulse SAR system p 1721 N94-20417
Diapirs and cantaloupes: Layering and overturn of Triton's crust p 2111 N94-20738
Geology of the southern hemisphere of Triton: No polar cap p 2111 N94-20739
Complex ridged terrain-related ridge belts on Venus: Global distribution and classification p 2129 N94-20835
Early Mars: A regional assessment of denudation chronology p 2145 N94-21676
Role of surface characteristics in urban meteorology and air quality
[DE93-040929] p 1851 N94-21740

TERRAIN ANALYSIS
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
Detecting topographical regions in digital terrain maps
[AD-A272889] p 1841 N94-21453

TERRESTRIAL PLANETS
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Numerical simulation of lava flows: Applications to the terrestrial planets p 1863 N94-20904

TEST CHAMBERS
Measurement of thermal-hydraulic parameters in two-phase flow using flow visualization image analysis
[DE93-006255] p 1805 N94-22269

TEST FACILITIES
High temperature simulation chambers. Physico-chemical and thermal effect of atmospheric reentry on ceramic materials p 1653 N94-21404
Material properties and behavior during simulated atmospheric reentry p 1665 N94-21408

TEST STANDS
Optimization and control of a small angle ion source using an adaptive neural network controller
[DE93-040063] p 1946 N94-21845
A real-time infrared image processing testbed p 1790 N94-22227

TETHERED SATELLITES
Radiation of plasma wave wings through an electrodynamic tether satellite system with any sharp angle geometry
[REPT-85] p 1993 N94-20156
Data analysis support for the SPREE instruments on the TSS-1 shuttle flight
[AD-A272445] p 1654 N94-21429

TETHERING
Data analysis support for the SPREE instruments on the TSS-1 shuttle flight
[AD-A272445] p 1654 N94-21429

TETRAHEDRONS
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 1658 N94-20590
Dynamic mesh adaption for triangular and tetrahedral grids p 1920 N94-22363

TEXTS
Speech synthesis with artificial neural networks p 1743 N94-20245
An assessment of the statistical and editorial output of text analysis programs
[AD-A272185] p 2042 N94-20924
CMIFed: A presentation environment for porta ble hypermedia documents
[CWI-CS-R9305] p 2044 N94-21494
The Amsterdam hypermedia model: Extending hypertext to support real multimedia
[CWI-CS-R9306] p 2045 N94-21536

TEXTURES
Multiplicity of chondrule heating events and the coarsening of chondrule textures p 2085 N94-20860

THALLIUM
Superconductivity Technology Program for Electric Power Systems: Proceedings
[DE93-040074] p 2011 N94-19825

THALLIUM COMPOUNDS
Theory of energy-assisted epitaxy; theory of ordered semiconductor alloys: In(1-x)Tl(x)Sb as a long-wave infrared material
[AD-A271007] p 2012 N94-19835
TlCaBaCuO high Tc superconducting microstrip ring resonators designed for 12 GHz p 1735 N94-20516

THEMATIC MAPPERS (LANDSAT)
Linear mixing model applied to AVHRR LAC data p 1838 N94-20958
The 7th Brazilian Remote Sensing Symposium, volume 3 p 1839 N94-20960
Evaluation of C-band SAR data from SAREX 1992: Tapajos study site p 1839 N94-20964

Information extraction for multispectral images using radiation interaction models
[BCRS-90-22] p 1841 N94-21015
Chromaticity analysis of LANDSAT multispectral scanner and thematic mapper imagery of Chilko Lake, British Columbia, using a theoretical optical water quality model
[ISBN-0-315-63832-X] p 1843 N94-22422
THEMATIC MAPPING
Classification of simple vegetation types using POLSAR image data p 1722 N94-20420
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
THEOREM PROVING
COCOLOG: A conditional observer and controller logic for finite machines
[INRIA-RR-1714] p 1910 N94-21063
Partition algebraic design of asynchronous sequential circuits p 1759 N94-21125
The Robinson-Schensted and Schuetzenberger algorithms. Part 1: New combinatorial proofs
[CWI-AM-R9208-PT-1] p 1911 N94-21156
On semisimple cocommutative bialgebras
[CWI-AM-R9210] p 1954 N94-21158
Hilbert 90 for polynomial matrices
[CWI-AM-R9211] p 1954 N94-21159
An NP set with no co-DP sparse subset
[TR-475] p 1954 N94-21199
A mechanized process algebra for verification of device synchronization protocols p 1766 N94-21716
HDL to verification logic translator p 1766 N94-21717
Semi-stability and heights of cycles
[PB93-215507] p 1961 N94-22377
THEOREMS
Symmetries and conservation laws of the system: $u(x)=vw(x)$, $v(y)=uw(y)$, $uv+w(xx)+w(yy)=0$
[MEMO-1084] p 1953 N94-21046
Hilbert 90 for polynomial matrices
[CWI-AM-R9211] p 1954 N94-21159
Instruction set commutivity p 1766 N94-21719
THEORETICAL PHYSICS
Energy and luminosity limits of hadron supercolliders
[DE93-019248] p 1980 N94-20300
High energy physics program at Texas A/M University
[DE93-041089] p 1980 N94-20933
Theoretical particle physics
[DE94-000538] p 1973 N94-20938
Non commutative geometry and physics
[PB93-215499] p 1961 N94-22264
THERMAL ANALYSIS
Transient thermal analysis of cryocondensation pump for JET
[DE93-040372] p 1992 N94-20003
Three-dimensional dynamic thermal imaging of structural flaws by dual-band infrared computed tomography
[DE93-019575] p 1906 N94-20316
Kinetics of phase transformations in glass forming systems
[NASA-CR-194270] p 1701 N94-20347
A study of the induction heating of organic composites
[AD-A272657] p 1675 N94-21187
Estimating the rotation rate of mesoscale ocean rings from satellite altimetry
[AD-A272922] p 1883 N94-21222
Thermal stress analysis of composites in the space environment p 1661 N94-21379
Concept report: Experimental vector magnetograph (EXVM) operational configuration balloon flight assembly
[NASA-CR-194702] p 1638 N94-21776
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777
Preliminary SP-100/Stirling heat exchanger designs
[NASA-TM-106444] p 1670 N94-21809
A finite element formulation and adaptive solution approach for large-scale thermomechanical problems with complex contact conditions
[DE93-019605] p 1960 N94-21996
In situ identification of the Martian surface material and its interaction with the Martian atmosphere using DTA/GC p 1812 N94-22434
THERMAL BOUNDARY LAYER
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
THERMAL CONDUCTIVITY
A database of selected transport coefficients for combustion studies
[DE93-041278] p 1678 N94-19889
A parametric study of heat transfer within a planar thermosyphon
[DE93-019546] p 1799 N94-20258
Thermal conductivity measurements of particulate materials under Martian conditions p 1685 N94-20703
Thermal diffusivity measurements by photothermal laser beam deflection (PTD): Data analysis using the Levenberg-Marquardt algorithm p 1820 N94-21006
THERMAL CONTROL COATINGS
Calibration of a calorimeter for measuring the performance of thermal control surfaces p 1660 N94-21378
THERMAL CYCLING TESTS
Investigation of austenitic alloys for advanced heat recovery and hot gas cleanup systems
[DE93-017863] p 1687 N94-19802
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377
Materials evaluation at ESA/ESTEC p 1662 N94-21386
Durability of thermal control and environmental protective materials for the SSRMS in simulated LEO environment p 1663 N94-21392
A method of measuring the thermoradiative properties of ceramic materials in a space environment p 1665 N94-21405
Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618
THERMAL DECOMPOSITION
ALE project
[AD-A271080] p 2014 N94-19980
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
THERMAL DEGRADATION
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906
Toxicity of thermal degradation in a manned space environment p 1684 N94-21403
THERMAL DIFFUSION
Hydrogen isotope separation experience at the Savannah River Site
[DE93-019832] p 1679 N94-20266
THERMAL DIFFUSIVITY
Thermal diffusivity measurements by photothermal laser beam deflection (PTD): Data analysis using the Levenberg-Marquardt algorithm p 1820 N94-21006
Thermal characterization of thin films by photothermally induced laser beam deflection p 1710 N94-21007
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings
[DE93-040547] p 1990 N94-22002
THERMAL EMISSION
Polarimetric thermal emission from rough surfaces p 1727 N94-20441
Polarimetric thermal emission from periodic water surfaces p 1728 N94-20445
A study of carbonates, sulfates, and phosphates using thermal emission spectroscopy p 1686 N94-20868
Michelson Interferometer (MINT) p 1813 N94-21646
THERMAL ENERGY
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-194728] p 1856 N94-20537
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
THERMAL EXPANSION
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
A process for preparing an assembly of an article and a soluble polyimide which resists dimensional change, delamination, and debonding when exposed to changes in temperature
[NASA-CASE-LAR-14763-1] p 1702 N94-20373
Thermal expansion of electronic highly correlated materials
[ETN-93-93605] p 2026 N94-21135
Space environmental effects on polymer matrix composites: The UTIAS/LDEF experiment p 1660 N94-21373
Integrity and testing concerns of thermostructural materials p 1661 N94-21384
High temperature size selective membranes
[DE93-019865] p 1709 N94-21982
Magnetism in CeRu2Ge2 and CeRh2Ge2 and its pressure dependence
[DE93-040061] p 2032 N94-21987
Dynamics of surface thermal expansion and diffusivity using two-color reflection transient gratings
[DE93-040547] p 1990 N94-22002
THERMAL FATIGUE
Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618
THERMAL MAPPING
Degradation sequence of young lunar craters from orbital infrared survey p 2136 N94-20874
Fluorescent microthermographic imaging
[DE93-040332] p 1810 N94-22000
THERMAL PLASMAS
On one numerical approach to Stefan problem
[IPPCZ-330] p 1996 N94-21572
THERMAL PROTECTION
Materials evaluation at ESA/ESTEC p 1662 N94-21386
Durability of thermal control and environmental protective materials for the SSRMS in simulated LEO environment p 1663 N94-21392
Forecasting technique of variations of the optical absorptivity of thermal control coatings under different simultaneous radiations p 1664 N94-21399
Thermal control coatings p 1664 N94-21400
A method of measuring the thermoradiative properties of ceramic materials in a space environment p 1665 N94-21405
R and D to HOPE airframe p 1665 N94-21406
Material properties and behavior during simulated atmospheric reentry p 1665 N94-21408
Compilation of reinforced carbon-carbon transatlantic abort landing arc jet test results
[NASA-TM-104778] p 1676 N94-21834
THERMAL RADIATION
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
Thermal infrared remote sensing and Kirchhoff's law: 1. Laboratory measurements p 1685 N94-20733
High-energy astrophysics: A theoretical analysis of thermal radiation from neutron stars
[NASA-CR-194808] p 2055 N94-20952
THERMAL SHOCK
Euhedral metallic-Fe-Ni grains in extraterrestrial samples p 1697 N94-20724
Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022
THERMAL SIMULATION
High temperature simulation chambers. Physico-chemical and thermal effect of atmospheric reentry on ceramic materials p 1653 N94-21404
THERMAL STABILITY
Further examinations on the thermodynamic stability of the Mie-Gruneisen equation of state
[AD-A270526] p 2037 N94-19831
Microstructural stability of wrought, laser and electron beam glazed NARloy-Z alloy at elevated temperatures
[NASA-TM-108431] p 1689 N94-20100
N,N'-bis(4,4,4-trinitro butyryl) hydrazine
[AD-D015897] p 1712 N94-20122
Polyimides containing amide and perfluoroisopropylidene connecting groups
[NASA-CASE-LAR-14608-1] p 1702 N94-20374
High temperature stability of amorphous Ta(x)Cu(1-x) diffusion barriers on GaAs p 2022 N94-20990
Amorphous Ta-rich Ta-Cu films as diffusion barriers between Au and GaAs p 1710 N94-20991
Stability curves for a thermoacoustic prime mover
[AD-A272607] p 1968 N94-21422
Thermal stability relationships between PMR-15 resin and its composites
[NASA-TM-106285] p 1675 N94-21488
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526
Fullerene derivatives and fullerene superconductors
[DE93-019568] p 2031 N94-21871
Balanced arrow Mach-Zehnder interferometer p 1789 N94-22221
Non-linear thermal instability of optical thin molecular structures p 2006 N94-22667
On the nonlinear instability of thermal structures p 2006 N94-22668
THERMAL STRESSES
Strengthening of NiAl matrix composites
[AD-A271491] p 1674 N94-20550
Thermal stress analysis of composites in the space environment p 1661 N94-21379
Improvements to a method for the geometrically nonlinear analysis of compressively loaded stiffened composite panels
[NASA-CR-194715] p 1832 N94-21814
A finite element formulation and adaptive solution approach for large-scale thermomechanical problems with complex contact conditions
[DE93-019605] p 1960 N94-21996
Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618
THERMAL VACUUM TESTS
Calibration of a calorimeter for measuring the performance of thermal control surfaces p 1660 N94-21378
THERMIONIC DIODES
Observation of reflected waves on the SABRE positive polarity inductive adder MITL
[DE93-019413] p 1980 N94-20295

THERMISTORS
Advanced far infrared detectors
[DE93-040289] p 1988 N94-21528
THERMOCHEMISTRY
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
THERMODYNAMIC CYCLES
Alternative refrigerants and refrigeration cycles for domestic refrigerators
[DE93-040481] p 1714 N94-20099
Hydrogen isotope separation experience at the Savannah River Site
[DE93-019832] p 1679 N94-20266
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies
[DE93-041130] p 1826 N94-21938
Performance calculations and research direction for a water enhanced regenerative gas turbine cycle
[DE93-019866] p 1826 N94-21983
THERMODYNAMIC EFFICIENCY
Advanced Turbine Systems (ATS). Phase 1: System scoping and feasibility studies
[DE93-041130] p 1826 N94-21938
Performance calculations and research direction for a water enhanced regenerative gas turbine cycle
[DE93-019866] p 1826 N94-21983
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391
THERMODYNAMIC EQUILIBRIUM
Modeling the minimum energy state of the Earth's magnetotail
[AD-A267984] p 1856 N94-20485
THERMODYNAMIC PROPERTIES
Complex and stereoregular nonlinear optical materials
[AD-A271067] p 1983 N94-19846
Technology to prevent greenhouse effect gases
[DE94-707421] p 1850 N94-19976
Absorption heat pump for space applications
[NASA-CR-194693] p 1845 N94-20066
Catalytic hydrogenation of carbon monoxide
[DE94-000881] p 1678 N94-20103
The thermodynamic properties to 700 K of naphthalene and 2,7-dimethylnaphthalene
[DE93-000160] p 2037 N94-20473
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
Analysis of cost: CVD diamond deposition
[AD-A271980] p 2018 N94-20616
Recondensation in the early solar system: Physical conditions and source material p 2085 N94-20849
Direct images of thermal disorder in the Cl-Si and H-O-Si chemisorption bond on Si(100)
[AD-A272386] p 1680 N94-21145
Chemistry of the burning surface
[AD-A272725] p 1681 N94-21181
Recent developments in aromatic azo polymers research
[AD-A272966] p 1705 N94-21259
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
THERMODYNAMICS
Further examinations on the thermodynamic stability of the Mie-Gruneisen equation of state
[AD-A270526] p 2037 N94-19831
CTH: A software family for multi-dimensional shock physics analysis
[DE93-019428] p 1904 N94-20052
A parametric study of heat transfer within a planar thermosyphon
[DE93-019546] p 1799 N94-20258
Mathematical theory of thermodynamics of computation
[CWI-CS-R9251] p 2038 N94-21533
A thermodynamic theory of dynamic fragmentation
[DE93-019066] p 1833 N94-21916
Universality in blow-up for non linear heat equations
[PB93-215465] p 2038 N94-22095
A thermodynamic analysis of propagating subcritical cracks with cohesive zones p 1834 N94-22611
THERMOGRAPHY
Three-dimensional dynamic thermal imaging of structural flaws by dual-band infrared computed tomography
[DE93-019575] p 1906 N94-20316
Fluorescent microthermographic imaging
[DE93-040332] p 1810 N94-22000
THERMOGRAVIMETRY
Ageing studies on a composite propellant containing a new organo-copper burn rate catalyst
[AD-A271060] p 1711 N94-19906
THERMOLUMINESCENCE
Temperature dependence of CsI(Tl) gamma ray excited scintillation characteristics
[DE94-000836] p 2034 N94-22028
THERMOMECHANICAL TREATMENT
Effects of processing history on the creep strength of Nb-1Zr
[DE93-015905] p 1689 N94-20093
The use of backscattered electron imaging mode to assess the effect of fine dispersions on development of superplastic microstructure in Al-Mg alloys
[AD-A272426] p 1691 N94-21258
Examinations of composition and deformation behavior of intermetallic phases on the basis of Fe3(AlSi)
[GKSS-92/E/16] p 1692 N94-21311
THERMOPHYSICAL PROPERTIES
Initial development of a high-pressure crystal growth facility: Center director's discretionary fund
[NASA-TM-108430] p 2030 N94-21807
THERMOPLASTIC RESINS
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers
[AD-A271128] p 1699 N94-20016
Graphite/polyurethane flexible composites: Mechanical and vibration damping properties
[AD-A271608] p 1674 N94-20950
A study of the induction heating of organic composites
[AD-A272657] p 1675 N94-21187
THERMOPLASTICITY
Chain propagation/step propagation polymerization chemistry. The preparation of solvent resistant well phase-separated thermoplastic elastomers
[AD-A271128] p 1699 N94-20016
A study of the induction heating of organic composites
[AD-A272657] p 1675 N94-21187
THERMOREGULATION
Human responses to exercise-heat stress
[AD-A272581] p 1892 N94-21209
THERMOSETTING RESINS
Fiber reinforced thermosetting resin composition with coated fibers for improved toughness
[CA-PATENT-1,306,320] p 1674 N94-21040
THERMOSIPHONS
A parametric study of heat transfer within a planar thermosyphon
[DE93-019546] p 1799 N94-20258
THERMOSPHERE
Validation of the design of a high resolution all-reflection Michelson interferometer for atmospheric spectroscopy
[AD-A272505] p 1987 N94-21410
Empirical wind model for the middle and lower atmosphere. Part 2: Local time variations
[NASA-TM-104592] p 1870 N94-21862
THESES
Influence of geoid model uncertainty on the determination of ocean circulation with satellite altimetry
[PB93-219301] p 1842 N94-22097
THICKNESS
Quantitative evaluation of material composition of composites using x ray energy-dispersive NDE technique
[DE93-041157] p 1672 N94-19888
Retrieval of ice thickness from polarimetric SAR data p 1724 N94-20432
Differentiation of magma oceans and the thickness of the depleted layer on Venus p 2118 N94-20780
Ellipsometric measurements of molecular-beam-epitaxy-grown semiconductor multilayer thicknesses: A comparative study p 1710 N94-20983
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis p 1710 N94-20984
Enhanced software for the GT1022 automated gaging system
[DE94-001374] p 1918 N94-21977
THIN FILMS
The proximity effect in ultrathin granular Pb films
[AD-A271094] p 2012 N94-19848
Development of high-efficiency CdTe solar cells
[DE93-018206] p 1845 N94-19925
Preparation and properties of sol-gel derived PZT thin films for decoupling capacitor applications
[DE93-018853] p 2013 N94-19961
A novel method for characterizing the electrical Priorities of lead Zirconate Titanate (PZT) ferroelectric films and memory devices
[AD-A270463] p 2013 N94-19966
Proceedings of the 8th International Symposium on Applications of Ferroelectrics
[AD-A270679] p 1749 N94-20012
Fabrication of stable large-area thin-film CdTe photovoltaic modules
[DE93-018204] p 1845 N94-20095
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
Atom probe field ion microscopy characterizations of VVER steels
[DE93-017864] p 1689 N94-20180
Layered thin-edged field-emitter device
[AD-D015932] p 1751 N94-20350
Polyimides containing amide and perfluoroisopropylidene connecting groups
[NASA-CASE-LAR-14608-1] p 1702 N94-20374
Microwave properties and characterization of co-evaporated BSCCO thin films p 1709 N94-20518
The effect of fluctuations on the electrical transport behavior in YBa2Cu3O(7-x) p 1736 N94-20519
Development of fundamental understanding of friction and wear mechanisms by atomic-scale tribological studies of ceramic materials and multilayered thin films
[AD-A271485] p 1703 N94-20548
Study of the utilization of thin oxides in indium phosphides for the realisation of electron components
[ECL-92-38] p 2018 N94-20593
Ellipsometric studies of sputtered silicon nitride on n-GaAs p 1709 N94-20972
Multiple-wavelength angle-of-incidence ellipsometry: Application to silicon nitride-gallium arsenide structures p 2019 N94-20974
Thin film compositional analysis using null or fixed wavelength ellipsometry p 1709 N94-20976
Thin-film hermeticity: A quantitative analysis of diamondlike carbon using variable angle spectroscopic ellipsometry p 1710 N94-20981
Thermal characterization of thin films by photothermally induced laser beam deflection p 1710 N94-21007
Fundamentals and applications of variable angle spectroscopic ellipsometry p 1687 N94-21011
Electrochemical synthesis of ultrathin film composite membranes
[AD-A272721] p 1681 N94-21168
Alumoxanes: Rationalization of black box materials
[AD-A272805] p 1704 N94-21170
Efficiency of reversible optical storage in azo polymers
[AD-A272923] p 1705 N94-21223
Field emitter array RF amplifier development project, phase 1, option 1
[AD-A272567] p 1740 N94-21361
Intelligent processing of ferroelectric thin films
[AD-A272518] p 1705 N94-21416
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1847 N94-21614
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617
High power, electron-beam induced switching in diamond
[DE93-040535] p 1768 N94-21770
Stable, high-efficiency amorphous-silicon solar cells with low hydrogen content
[DE93-018214] p 1848 N94-21826
Thin-film CdTe and CuInSe2 photovoltaic technologies
[DE93-018217] p 1848 N94-21827
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944
Techniques for producing free-standing thin films on frames
[DE93-041144] p 1708 N94-21954
MOCVD growth and structure of PbTiO3 thin films
[DE93-040230] p 2033 N94-21994
Interactions of slow H, H2, and H3 with thin foils
[DE93-040263] p 1976 N94-21995
A quantitative model for interpreting nanometer scale hardness measurements of thin films
[DE93-040601] p 2034 N94-22005
Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE93-018220] p 1850 N94-22257
Silicon microelectronic field-emissive devices for advanced display technology
[DE94-000397] p 1794 N94-22380
THORIUM
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827

K, U, and Th behavior in Martian environmental conditions p 2141 N94-20908

THREADS

Self locking set screw
[AD-D015969] p 1824 N94-21277

Benefits of thread rolling process to the stress corrosion cracking and fatigue resistance of high strength fasteners
[DE93-040438] p 1833 N94-22001

THREE DIMENSIONAL BODIES

Recognizing 3-D objects using 2-D images
[AD-A271005] p 1983 N94-19819

Robust and efficient 3D recognition by alignment
[AD-A270839] p 1904 N94-20041

Recognition by prototypes
[AD-A271687] p 1943 N94-20921

The local measurement and global interpretation of 3D motion field generated by several moving objects from range image sequences p 1777 N94-22146

THREE DIMENSIONAL BOUNDARY LAYER

Numerical investigation of laminar-turbulent transition in two- and three-dimensional boundary layers
[DLR-FB-92-36] p 1800 N94-20533

THREE DIMENSIONAL FLOW

Three dimensional unsteady flow calculations in radial components p 1669 N94-20080

Some practical turbulence modeling options for Reynolds-averaged full Navier-Stokes calculations of three-dimensional flows
[NASA-TM-106399] p 1637 N94-20534

Finite element numerical simulation of three dimensional turbulent flows with dispersion: Eulerian and Lagrangian approaches
[ECL-92-42] p 1801 N94-20597

An efficient numerical method for three-dimensional hypersonic flow
[AD-A272506] p 1637 N94-21411

Users manual for the NASA Lewis three-dimensional ice accretion code (LEWICE 3D)
[NASA-TM-105974] p 1642 N94-21590

Three-dimensional unstructured grid method applied to turbomachinery p 1919 N94-22360

The 3D Euler solutions using automated Cartesian grid generation p 1920 N94-22367

THREE DIMENSIONAL MODELS

Three dimensional modeling of cirrus during the 1991 FIRE IFO 2: Detailed process study p 1877 N94-22327

Robust unstructured grid generation with VGRID p 1919 N94-22359

Current loop coalescence studied by 3-D electromagnetic particle code p 2005 N94-22660

Solar wind-magnetosphere interaction as simulated by a 3D, EM particle code p 2007 N94-22674

THREE DIMENSIONAL MOTION

Visual tracking
[AD-A271686] p 1943 N94-20920

A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591

The local measurement and global interpretation of 3D motion field generated by several moving objects from range image sequences p 1777 N94-22146

THRESHOLD CURRENTS

First results on InGaAsP separate confinement heterostructure diode lasers
[AD-A270849] p 1815 N94-19878

Optical amplification and threshold behavior on InGaAs/InGaAsP multiquantum well structures
[ETN-93-94181] p 2026 N94-21151

THRESHOLD LOGIC

Threshold computation and cryptographic security
[TR-443] p 1907 N94-20536

THRESHOLD VOLTAGE

Evaluation of radiation effects in re-oxidized nitrided oxide devices by hot carrier stressing at 77 K p 1754 N94-21084

Low energy CMOS for space applications p 1768 N94-21735

THRUST AUGMENTATION

Thrust augmentation options for the Beta 2 two-stage-to-orbit vehicle
[NASA-TM-106448] p 1648 N94-21563

Options for thrust augmentation for the Beta 2 two-stage-to-orbit launch vehicle
[NASA-TM-106418] p 1649 N94-21759

THRUST VECTOR CONTROL

Effects of thrust vector control on the performance of the aerobang orbital plane change maneuver
[AD-A272532] p 1646 N94-21418

Internal performance of a nonaxisymmetric nozzle with a rotating upper flap and a center-pivoted lower flap
[NASA-TP-3385] p 1637 N94-21569

THRUSTORS

Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 1669 N94-20496

THUNDERSTORMS

Multiple scattering effects on the Linear Depolarization Ratio (LDR) measured during CaPE by a Ka-band air-borne radar p 1728 N94-20446

Localization from near-source quasi-static electromagnetic fields
[DE93-040390] p 1732 N94-20479

A parametric representation of a thunderstorm cell
[AD-A271983] p 1866 N94-20579

THYRATRONS

Computational model of a magnetic modulator for copper lasers
[DE93-019603] p 1815 N94-20223

THYRISTORS

Some experiences of solving 1-D semiconductor device equations on a matrix coprocessor by a domain decomposition method
[CWI-NM-R9304] p 1935 N94-21492

TILES

Thermally activated retainer means utilizing shape memory alloy
[NASA-CASE-MSC-21793-1] p 1654 N94-20304

An assessment of the cost of microwave sintering ceramic tiles for armor applications
[DE94-000978] p 1693 N94-21850

TIME

Paired comparison models with time-varying parameters
[AD-A272016] p 1964 N94-21442

Tandem queues with deterministic service times
[CWI-BS-R9238] p 1946 N94-21577

TIME DEPENDENCE

Neural network for processing both spatial and temporal data with time based back-propagation
[NASA-CASE-MSC-21874-1] p 1942 N94-20366

Classical and generalized solutions of time-dependent linear differential algebraic equations
[AD-A272834] p 1954 N94-21173

Finite difference methods for time-dependent, linear differential algebraic equations
[AD-A272835] p 1954 N94-21174

Characteristic based methods for the time-domain Maxwell equations
[AD-A272973] p 1802 N94-21263

Time-accurate Navier-Stokes calculations with multigrid acceleration p 1956 N94-21469

Surface path lines in plane Stokes flow driven by capillarity
[DE93-041277] p 1803 N94-21651

Monte Carlo calculation of multi-electron effects on synchrotron radiation
[DE94-001259] p 1982 N94-21974

Time-dependent reliability analysis of ceramic engine components p 1828 N94-22619

TIME DIVISION MULTIPLE ACCESS

A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites
[NASA-CR-191200] p 1762 N94-21566

TDMA satellite communication systems for ISDN services p 1746 N94-22171

TIME FUNCTIONS

A formulation of quantum statistical mechanics based on the Feynman path centroid density 2 dynamical properties
[AD-A272698] p 2037 N94-21166

TIME MARCHING

Time-domain analysis of planar microstrip devices using a generalized Yee-algorithm based on unstructured grids p 1724 N94-20431

Approximate methods for N-component solute transport and ion-exchange
[CWI-NM-R9223] p 1910 N94-21078

TIME MEASUREMENT

Using the USCCS for sub microsecond spacecraft clock calibration p 1813 N94-21346

Verification of the PROS timing analysis package p 1926 N94-22508

An x ray archive on your desk: The Einstein CD-ROM's p 2048 N94-22519

TIME OF FLIGHT SPECTROMETERS

Time-of-flight heavy ion backscattering spectrometry
[DE93-019067] p 1973 N94-20306

Multielement analysis of interplanetary dust particles using TOF-SIMS p 2084 N94-20790

TIME SERIES ANALYSIS

State-space models for multichannel detection
[AD-A270608] p 1715 N94-19816

SIMBAT theoretical manual
[AD-A271063] p 1882 N94-19979

Partial empirical autocorrelation of a vectorial chronological series
[RR-896-M] p 1963 N94-20162

Studies of Greenland using the SEASAT scatterometer p 1725 N94-20433

Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570

Functional statistical data analysis and modeling
[AD-A271520] p 1983 N94-20913

Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531

Registering and resampling images in STSDAS p 1927 N94-22550

TIME SIGNALS

Recording system using multiplexed inputs to a multichannel recorder
[AD-D015971] p 1808 N94-21278

Using the USCCS for sub microsecond spacecraft clock calibration p 1813 N94-21346

TIMING DEVICES

The One-Day Workshop on Batteries, Stepping Motors, and Electronic Clock Displays
[ETN-93-94632] p 1752 N94-20628

Verification of the PROS timing analysis package p 1926 N94-22508

TIN ALLOYS

Magnetic instability of Kondo insulators
[DE93-040064] p 1768 N94-21782

Temperature dependence of magnetic order in single-crystalline UPdSn
[DE93-040153] p 2033 N94-21991

TIN OXIDES

Corrosion inhibition in high temperature environment
[AD-D015910] p 1698 N94-19830

Structure and morphology of Pd overlayers on epitaxial SnO2 films studies with the atomic force microscope
[AD-A271827] p 2028 N94-21458

TIP SPEED

Near wake measurements on a rotor model with Mie-vanes in the Delft open jet tunnel
[PB93-215382] p 1638 N94-22260

TITAN

Laboratory studies of low temperature rate coefficients: The atmospheric chemistry of the outer planets
[NASA-CR-193485] p 1972 N94-20130

TITANATES

MOCVD growth and structure of PbTiO3 thin films
[DE93-040230] p 2033 N94-21994

TITANIUM

Origin of the Apollo 15 very low Ti green glass. A perspective from the compositional diversity in the very low Ti glasses p 1665 N94-20759

Shattering the myth of the resonantly photo-pumped neon-like titanium laser
[DE93-019624] p 1819 N94-21873

Analysis of thermal mechanical fatigue in titanium matrix composites p 1835 N94-22618

TITANIUM ALLOYS

On the experimental determination of low order structure factors in TiAl by energy filtered convergent beam electron diffraction
[DE93-019521] p 1667 N94-19806

Investigation of cracking and erratic behavior of the uranium-titanium alloy
[DE93-018591] p 1688 N94-19957

Production of NiAl and TiAl intermetallics by mechanical alloying
[VTT-JULK-760] p 1691 N94-20530

First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21984

Shape memory metals
[DE94-001373] p 1695 N94-21976

Interfacial reactions between titanium and borate glass
[DE93-012847] p 1683 N94-22031

Surface modification of Ti3Al for improved oxidation resistance
[DE93-018297] p 1696 N94-22034

Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides
[DE93-040600] p 1697 N94-22559

TITANIUM BORIDES

Hydrodynamic compressibility of high-strength ceramics
[DE93-019424] p 1698 N94-19903

Interfacial reactions between titanium and borate glass
[DE93-012847] p 1683 N94-22031

TITANIUM CHLORIDES

Zinc and titanium smoke: Chemical composition and physical characteristics
[FOA-C-40277-4.9] p 1680 N94-20552

TITANIUM COMPOUNDS

Applicability and performance benefits of XD (Tradename) titanium aluminides to expendable gas turbine engines
[AD-A272998] p 1648 N94-21268

Characteristics of shock-compressed configuration of Ti and Si powder mixtures
[DE93-018857] p 1713 N94-22033

TITANIUM OXIDES
Ti-bearing oxide minerals in lunar meteorite Y793169 with the VLT affinity p 2084 N94-20812
Petrology and geochemistry of VLT glasses from double drive tube 79001/2 p 1687 N94-20870
Investigation of the effect of various oxide and fluoride additives on the microstructure, electronic properties, and phase shifting ability of Ba(1-x)Sr(x)TiO3 [AD-A271756] p 2027 N94-21303

TOKAMAK DEVICES
Transient thermal analysis of cryocondensation pump for JET [DE93-040372] p 1992 N94-20003
Theoretical and numerical studies in magnetic fusion [DE94-000536] p 1993 N94-20937
Fusion plasma theory grant. Task 3: Auxiliary radiofrequency heating of tokamaks [DE94-000779] p 1994 N94-20940
Shear flow generation by Reynolds stress and suppression of resistive g-modes [DE93-040911] p 1995 N94-21514
On effects of a local plasma density growth due to ponderomotive forces at fast wave launching in tokamaks [IPPCZ-328] p 1996 N94-21571
On the stability of shear-Alfven vortices [DE93-040912] p 1996 N94-21752
Edge plasma experiments on CASTOR tokamak [IPPCZ-332] p 1997 N94-21816
A moving finite element model of the tokamak scrapeoff layer [DE94-000673] p 1997 N94-21965
Fusion Plasma Theory. Task 1: Magnetic confinement fusion plasma theory [DE94-000778] p 1998 N94-22019
Enhanced confinement regimes and control technology in the DIII-D tokamak [DE93-019004] p 1998 N94-22039
The TST: A small steady-state tokamak for integrated divertor testing [DE94-001016] p 1998 N94-22045
Use of open systems for control, analysis, and data acquisition of the DIII-D tokamak [DE94-001101] p 1998 N94-22089
Continuum damping of ideal toroidal Alfven eigenmodes [DE94-001233] p 1998 N94-22560
A two-dimensional kinetic model of the scrape-off layer [DE94-001235] p 1999 N94-22562
Fluid simulations of Delta T(sub e)-driven turbulence and transport in boundary plasmas [DE94-001304] p 1999 N94-22566
Effects of magnetic field perturbations in the ATF torsatron [DE94-000474] p 1999 N94-22568
Electron temperature gradient driven instability in the tokamak boundary plasma [DE94-001307] p 1999 N94-22596
MHD instabilities of fusion oriented plasmas p 2000 N94-22627

TOLERANCES (MECHANICS)
Feature-based tolerancing for intelligent inspection process definition [DE93-017984] p 1906 N94-20311
Mold bolt and means for achieving close tolerances between bolts and bolt holes [NASA-CASE-MFS-28720-1] p 1823 N94-20379

TOMOGRAPHY
Ionospheric tomography using the FORTE satellite [DE93-018545] p 1854 N94-19955
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20406
High resolution, three dimensional soft x ray imaging [DE93-018667] p 1989 N94-21630

TOOLS
Loads produced by a suited subject performing tool tasks without the use of foot restraints [NASA-TP-3424] p 1896 N94-20606
Strength capabilities and load requirements while performing torquing tasks in zero gravity [NASA-TP-3433] p 1897 N94-21627

TOPOGRAPHY
Robust photo-topography by fusing shape-from-shading and stereo [NASA-CR-194697] p 1806 N94-19920
Topographic mapping using a monopulse SAR system p 1721 N94-20417
Polarimetric backscattering from sea ice p 1723 N94-20426
Topographic slope from the SAR interferometric phase gradient p 1731 N94-20459
Interferometric detection of freeze-thaw displacements of Alaskan permafrost using ERS-1 data p 1732 N94-20460
Performance evaluation of the JPL TOPSAR system: An across-track interferometric SAR system for topographic mapping p 1732 N94-20461
Seafloor characterization/Galapagos propagating rift [AD-A272001] p 1882 N94-20581
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Some deformation trends and topographic characteristics of tesserae on Venus p 2105 N94-20706
Chronology, eruption duration, and atmospheric contribution of Apollinaris Patera, Mars p 2108 N94-20720
Comparative hypsometric analysis of both Earth and Venus topographic distributions p 2108 N94-20722
Distribution of small volcanic cones on the surface of Venus by size and elevation: Implications for differential deposition of volcanic features p 2110 N94-20731
Local topography of Mars and its relationship to surface weathering processes p 2111 N94-20737
The 3-D Moons: The Voyager stereo atlas of the outer solar system p 2111 N94-20740
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
Response of the topography and gravity field on Venus to mantle upwelling beneath a chemical boundary layer p 2117 N94-20775
Contributions of the Clementine mission to our understanding of the processes and history of the Moon p 2119 N94-20784
Magellan Mission p 1652 N94-20829
Is there uniformitarian or catastrophic tectonics on Venus? p 2129 N94-20839
Possible flexural signatures around Olympus and Ascraeus Montes, Mars p 2142 N94-20911
Ocean mapping using satellite radar altimetry [ETN-93-93470] p 1841 N94-21017
Detecting topographical regions in digital terrain maps [AD-A272889] p 1841 N94-21453
Role of surface characteristics in urban meteorology and air quality [DE93-040929] p 1851 N94-21740

TOPOLOGY
On the topological size of p-m-complete degrees [TR-459] p 1965 N94-21286
Superpatch [NASA-CR-177627] p 1914 N94-21489
Mars: Noachian hydrology by its statistics and topology p 2143 N94-21664
IAS telecommunication infrastructure and value added network services provided by IASNET p 1744 N94-22069
Vanishing theorem on arithmetic surfaces [PB93-215481] p 1961 N94-22263
Non commutative geometry and physics [PB93-215499] p 1961 N94-22264
Semi-stability and heights of cycles [PB93-215507] p 1961 N94-22377

TOROIDAL PLASMAS
Transient thermal analysis of cryocondensation pump for JET [DE93-040372] p 1992 N94-20003
Continuum damping of ideal toroidal Alfven eigenmodes [DE94-001233] p 1998 N94-22560
Kinetic resonance damping rate of the toroidal ion temperature gradient mode [DE94-001234] p 1998 N94-22561
Effects of magnetic field perturbations in the ATF torsatron [DE94-000474] p 1999 N94-22568
MHD instabilities of fusion oriented plasmas p 2000 N94-22627
Physics of transport phenomena in magnetic confinement plasmas p 2000 N94-22628
Dynamo driven by weak plasma turbulence: The effect of differential rotation p 2005 N94-22665

TORQUE
FSR based force torque transducer design [AD-A271337] p 1650 N94-19879
Loads produced by a suited subject performing tool tasks without the use of foot restraints [NASA-TP-3424] p 1896 N94-20606
Strength capabilities and load requirements while performing torquing tasks in zero gravity [NASA-TP-3433] p 1897 N94-21627

TORSION
Torsion spring powered missile wing deployment system [CA-PATENT-1,306,384] p 1645 N94-21051

TORSIONAL VIBRATION
Interactive simulation package for coupled bending and torsional vibrations in flexible robot arms [MEMO-1089] p 1944 N94-21140

TOTAL QUALITY MANAGEMENT
The NCC project: A quality management perspective p 1828 N94-21324
NCCDS configuration management process improvement p 1931 N94-21327
Problem reporting management system performance simulation p 1931 N94-21328
The automated ground network system p 1932 N94-21330

TOUGHNESS
Properties and potential of high-temperature niobium beryllides [DE93-019169] p 1690 N94-20233
Weldalite (tm) 049 (Al 2095-T8): Anisotropy effects at cryogenic conditions [AD-A272658] p 1691 N94-21188

TOXICITY
Manual of DRANC (release 1.1): A computer program for the Dutch risk assessment of new chemical substances [PB93-194827] p 1851 N94-19998
Toxicity of thermal degradation in a manned space environment p 1684 N94-21403

TRACE ELEMENTS
Remote sounding of tropospheric minor constituents [NASA-CR-194265] p 1855 N94-20132
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe p 2097 N94-20661
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20667
Orthopyroxenes as recorders of diogenite petrogenesis: Major and minor element systematics p 1684 N94-20670
Origin of the Apollo 15 very low Ti green glass. A perspective from the compositional diversity in the very low Ti glasses p 1685 N94-20759
Orthopyroxenes as recorders of diogenite petrogenesis: Trace element systematics p 1686 N94-20760
The formation of FeO-rich pyroxene and enstatite in unequilibrated enstatite chondrites: A petrologic-trace element (SIMS) study p 2086 N94-20866
Trace element compositions of spinel-rich refractory inclusions from the Murchison meteorite p 2086 N94-20897
Global emissions and models of photochemically active compounds [DE93-040490] p 1852 N94-21969

TRACKING (POSITION)
A summary of studies of particle stability at RHIC [DE93-040173] p 1970 N94-19868
Aviation safety research at the National Institute for Aviation Research, Wichita State University [NIAR-93-4] p 1641 N94-20189
A flight test system design for the microwave landing system p 1645 N94-22156

TRACKING STATIONS
Enhanced networks operations using the X Window System p 1932 N94-21329
The automated ground network system p 1932 N94-21330
An in-depth analysis and modelling of the Shuttle to MILA S-band telemetry link p 1657 N94-21340

TRAFFIC
Traffic noise in a roundabout way p 1966 N94-21799

TRAFFIC CONTROL
Routing of freeway traffic: A discrete-time state space model and routing problems [CWI-BS-R9232] p 1944 N94-21033

TRAINING ANALYSIS
Modelling decision-making by pilots [NASA-CR-194767] p 2040 N94-21821

TRAINING DEVICES
Weather tutor 1: Stability basics [AD-A270758] p 1866 N94-20565
Sparking young minds with Moon rocks and meteorites p 2039 N94-20819

TRAINING EVALUATION
Mathematics B for the study direction VWO: A reconnaissance [REPT-92-80] p 1950 N94-20032

TRAJECTORIES
Development and testing of a reliability performance index for modular robotic systems [AD-A271901] p 1942 N94-20488

TRAJECTORY ANALYSIS
Trajectory computations for an improved cinetheodolite tracking system p 1791 N94-22236

TRAJECTORY PLANNING
Robot skill learning and the effects of basis function choice [TR-437] p 1939 N94-20135

Development and evaluation of a profile negotiation process for integrating aircraft and air traffic control automation
[NASA-TM-4360] p 1643 N94-21606
An adaptive control to enable a robot to follow Cartesian trajectories p 1790 N94-22229
An algorithm for the interference detection among polygonal surfaces p 1791 N94-22239
Strategy for motion of a moving body of quasi-polygonal form within a polygonal space p 1792 N94-22240
Analytical representation of working articulation space of a plane manipulator in an encumbered environment p 1792 N94-22241

TRANSDUCERS
FSR based force torque transducer design
[AD-A271337] p 1650 N94-19879
Three dimensional ultrasonic imaging
[DE93-040549] p 1968 N94-22003

TRANSFER FUNCTIONS
A theory for optical wavelength control in short pulse free electron laser oscillators
[AD-A271706] p 1817 N94-21353
Stochastic simulation for imaging spatial uncertainty: Comparison and evaluation of available algorithms
[DE93-040058] p 1916 N94-21761

TRANSFORMATIONS (MATHEMATICS)
Speech synthesis with artificial neural networks p 1743 N94-20245
Causal reconstruction
[AD-A271692] p 1908 N94-20929
Use of switched capacitor filters to implement the discrete wavelet transform p 1755 N94-21097
Classical and generalized solutions of time-dependent linear differential algebraic equations
[AD-A272834] p 1954 N94-21173
Data compression by using wavelet transforms and vector quantization
[AD-A272763] p 1738 N94-21182
Model-based automatic generation of grasping regions
[NASA-TM-104785] p 1946 N94-21550
Reduction of blocking effects for the JPEG baseline image compression standard p 1765 N94-21714
An in-place and in-order algorithm for the discrete cosine transform p 1771 N94-22111
The 3-D unstructured mesh generation using local transformations p 1919 N94-22356
Efficient transfer of images over networks p 1748 N94-22517

TRANSFORMERS
Computational model of a magnetic modulator for copper lasers
[DE93-019603] p 1815 N94-20223

TRANSIENT RESPONSE
Dynamic, multiaxial impact response of confined and unconfined ceramic rods
[DE93-040057] p 1829 N94-19824

TRANSISTOR AMPLIFIERS
Field emitter array RF amplifier development project, phase 1, option 1
[AD-A272567] p 1740 N94-21361

TRANSISTOR CIRCUITS
Delay analysis of combinations of pass transistors and classical logic gates p 1756 N94-21103
Design and implementation of GaAs HBT circuits with ACME p 1758 N94-21117
Fully-depleted silicon-on-sapphire and its application to advanced VLSI design p 1765 N94-21709
Interpolative modeling of GaAs FET S-parameter data bases for use in Monte Carlo simulations p 1767 N94-21723
A VLSI implementation of DCT using pass transistor technology p 1767 N94-21725
On fast carry select adders p 1767 N94-21728
Non-linear analysis of the electrical properties of the active circuits of high-frequency oscillators p 1785 N94-22195

TRANSISTOR LOGIC
Power optimization in logic isomers p 1756 N94-21101
Delay analysis of combinations of pass transistors and classical logic gates p 1756 N94-21103

TRANSISTORS
Characterization of multilayer GaAs/AlGaAs transistor structures by variable angle spectroscopic ellipsometry p 1796 N94-20985
Localization of pellicle-induced open contacts using charge-induced voltage alteration
[DE93-019407] p 1762 N94-21636
HDL to verification logic translator p 1766 N94-21717
A VLSI implementation of DCT using pass transistor technology p 1767 N94-21725
A high speed CMOS A/D converter p 1767 N94-21726
On fast carry select adders p 1767 N94-21728
Low energy CMOS for space applications p 1768 N94-21735
Self assembly: An approach to terascale integration
[DE93-040104] p 1769 N94-21846
Simple method to estimate MOS oxide-trap, interface-trap, and border-trap densities
[DE93-041138] p 2032 N94-21939

TRANSIT TIME
Entry velocities at Mars and Earth for short transit times
[AD-A272591] p 1665 N94-21420

TRANSITION FLIGHT
Data link development for the archytas vertical takeoff and landing transitional flight unmanned aerial vehicle
[AD-A272499] p 1646 N94-21548

TRANSITION FLOW
Flow transition with 2-D roughness elements in a 3-D channel p 1806 N94-21466

TRANSITION METALS
Photochemically induced transformations of transition complexes
[AD-A271112] p 2014 N94-19982
The metallic bond for monolayer transition metal layers on transition metal surfaces
[DE93-019060] p 1691 N94-20313
Wavelength dispersive analysis with the synchrotron x ray fluorescence microprobe p 1685 N94-20717
Theoretical studies of structural phase transitions in actinide metals
[DE94-000796] p 1696 N94-22388
First-principles pressure-temperature phase diagrams in metals
[DE94-001056] p 1696 N94-22398

TRANSITION POINTS
Ductile-brittle transition behavior of tungsten under shock loading conditions
[DE93-019945] p 1693 N94-21843

TRANSITION PROBABILITIES
Theoretical investigations of metastability and energy storage in molecular systems
[AD-A271849] p 1973 N94-20612

TRANSITION TEMPERATURE
Development of bioelastic material for aspects of wound repair
[AD-A267832] p 1673 N94-20208
Spin-polaron theory of high-T(c) superconductivity. 3: Gap function and critical temperature
[DE93-019198] p 2030 N94-21831
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario
[DE94-001183] p 2032 N94-21972
NMR studies of oxygen-doped La2CuO(4+delta)
[DE93-040756] p 2034 N94-22007
Thin-film fabrication of Pb-doped BiSrCaCuO superconductor p 1781 N94-22176

TRANSLATING
Efficient and correct translation of strict applicative programming languages
[ETN-93-95056] p 1903 N94-20020
System level modelling using Petri nets and VHDL p 1772 N94-22113

TRANSMISSION
Spread spectrum random access networks
[AD-A272280] p 1737 N94-20585

TRANSMISSION EFFICIENCY
Specification and formal verification of the safety criterion in the alternating bit protocol p 1784 N94-22193
Efficient transfer of images over networks p 1748 N94-22517

TRANSMISSION ELECTRON MICROSCOPY
Facilities for in situ ion beam studies in transmission electron microscopes
[DE93-019567] p 1979 N94-20222
Comparative thickness measurements of heterojunction layers by ellipsometric, RBS, and XTEM analysis p 1710 N94-20984
Measurement of superlattice optical properties by variable angle spectroscopic ellipsometry p 2022 N94-20992
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Electron holography applied to the study of ceramic materials
[DE94-000329] p 1707 N94-21653
Transmission electron microscopy study of thick copper-304 stainless steel multilayers
[DE94-001045] p 1696 N94-22394

TRANSMISSION LINES
Robust, high-speed network design for large-scale multiprocessing
[AD-A271003] p 1716 N94-19977
Interinjection-locked quasioptical power combiners and phased arrays
[AD-A271178] p 2015 N94-20214
Observation of reflected waves on the SABRE positive polarity inductive adder MITL
[DE93-019413] p 1960 N94-20295
Analysis of microstrip dipoles and slots transversely coupled to a microstrip line using the FDTD method p 1718 N94-20405
Solid State Technology Branch of NASA Lewis Research Center: Fifth Annual Digest
[NASA-TM-106303] p 1732 N94-20497
Attenuation of epsilon(sub eff) of coplanar waveguide transmission lines on silicon substrates p 1733 N94-20504
High temperature superconducting planar circuit structure for high frequency applications
[AD-A273083] p 2028 N94-21521
Manual design technique for broadband passive thin-film attenuators using the Smith chart p 1782 N94-22178
Electromagnetic interference and shielding: An introduction (revised version of 1991-23)
[PB93-215275] p 1742 N94-22348

TRANSMITTANCE
Dual-beam multiple wavelength light transmittance measurement for particle sizing in rocket motor plumes
[AD-A272491] p 1670 N94-21208

TRANSMITTER RECEIVERS
Automated HMC assembly
[DE93-040641] p 1749 N94-20005

TRANSMITTERS
Photoconductive Semiconductor Switches for pulsed power applications
[DE93-019411] p 1750 N94-20294
Spread spectrum random access networks
[AD-A272280] p 1737 N94-20585
Conversion of the proprietary ROLM (tm) inter-node link from multimode to singlemode operation p 1744 N94-21349

TRANSMUTATION
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744

TRANSONIC FLOW
Transonic flow calculations: Integral method
[ISBN-0-315-83538-9] p 1639 N94-22586
Experiments with a fluid deicing system for cleaning laminar wings p 1640 N94-22601

TRANSONIC SPEED
Options for thrust augmentation for the Beta 2 two-stage-to-orbit launch vehicle
[NASA-TM-106418] p 1649 N94-21759

TRANSPARENCE
Variable wavelength, variable angle ellipsometry including a sensitivities correlation test p 1710 N94-20978
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526

TRANSPORT PROPERTIES
Boost-phase discrimination research
[NASA-TM-109347] p 1666 N94-19818
Parametric variations of ion transport in TFTR
[DE93-012653] p 1991 N94-19883
A database of selected transport coefficients for combustion studies
[DE93-041278] p 1678 N94-19889
Computed potential energy surfaces for chemical reactions
[NASA-CR-194600] p 1679 N94-20169
Growth of zinc selenide single crystals by physical vapor transport in microgravity
[NASA-CR-194679] p 2017 N94-20346
Optical and transport properties of metallic and semiconductor nanostructures
[AD-A271716] p 2018 N94-20554
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments)
[AD-A272918] p 1802 N94-21220
IR materials producibility
[AD-A273031] p 1987 N94-21321
Dephasing processes in III-V semiconductors
[AD-A271677] p 2028 N94-21362
Local uniform grid refinement and brine transport in porous media with inhomogeneities
[CWI-NM-R9224] p 1803 N94-21609
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615

TRANSPORT THEORY
Shielding from space radiations
[NASA-CR-194663] p 1895 N94-20063
Neoclassical kinetic theory near an X-point: Plateau regime
[DE93-019825] p 1951 N94-20224

TRANSPORTATION
Multigrid approach to solving the long transportation problem on a regular grid in cost space
[AD-A272323] p 1909 N94-21038

The 13th International Conference on Magnetically Levitated Systems and Linear Drives MAGLEV 1993
[DE93-040381] p 1825 N94-21544
TRANSPORTATION ENERGY
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562
TRANSPUTERS
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
The ADAM environment and transputers
p 1926 N94-22494
TRANSVERSE LOADS
Improvements to a method for the geometrically nonlinear analysis of compressively loaded stiffened composite panels
[NASA-CR-194715] p 1832 N94-21814
TRAPPED PARTICLES
Research on defects and transport in amorphous-silicon-based semiconductors
[DE93-017117] p 2013 N94-19939
Energy storage and conversion in solid hydrogen
[AD-A271439] p 1845 N94-20086
Ionospheric photoelectrons measured at geosynchronous orbit
[AD-A272431] p 1857 N94-21202
Detailed analysis case studies of trapped plasmas at the Earth's magnetic equator
[AD-A272497] p 1858 N94-21432
Radial diffusion of toroidally trapped particles induced by lower hybrid and fast waves
[IPPCZ-327] p 1996 N94-21593
TRAPPING
Evaluation of a diffusion/trapping model for hydrogen ingress in high-strength alloys
[AD-A271328] p 1689 N94-20027
TRAPS
Simple method to estimate MOS oxide-trap, interface-trap, and border-trap densities
[DE93-041138] p 2032 N94-21939
TRAVELING IONOSPHERIC DISTURBANCES
Detection of traveling ionospheric disturbances induced by atmospheric gravity waves using the global positioning system p 1723 N94-20425
TRAVELING SALESMAN PROBLEM
Electronic neural network for solving traveling salesman and similar global optimization problems
[NASA-CASE-NPO-17807-2-CU] p 1942 N94-20360
TRAVELING WAVE AMPLIFIERS
A laboratory system for the investigation of rain fade compensation techniques for Ka-band satellites
[NASA-CR-191200] p 1762 N94-21566
TRAVELING WAVES
High Speed/High Frequency Optoelectronics
[AD-A271985] p 1751 N94-20580
Simulation of traveling-wave output structures for high power RF tubes
[DE93-041005] p 1763 N94-21685
TRAYS
Long Duration Exposure Facility (LDEF) contamination study
[AD-A272419] p 1658 N94-21147
TREADMILLS
Apparatus and method for measuring subject work rate on an exercise device
[NASA-CASE-MSC-21752-1] p 1895 N94-20194
TREES (MATHEMATICS)
Totally strong and strong graphs
[RR-902-I] p 1951 N94-20237
Graph minors: Structure theory and algorithms
[AD-A271851] p 1952 N94-20613
The combinatorics of reconstructing evolutionary trees
[CWI-BS-R9233] p 1963 N94-21022
On the core-structure of minimum cost spanning tree games
[MEMO-1085] p 1953 N94-21047
Fourier calculus on evolutionary trees
[CWI-BS-R9234] p 1954 N94-21231
A neural M-ary tree method for data compression
p 1780 N94-22166
TREES (PLANTS)
Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters
p 1729 N94-20452
TRELLIS CODING
Advanced coding and modulation schemes for TDRSS
p 1744 N94-21350
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
Coded 64QAM using a binary convolutional code
p 1747 N94-22223
Trellis coded multi-orthogonal modulation
p 1747 N94-22231
TRENDS
Industry standards: Key to distributed computing
p 1938 N94-22070
Current situation in developing petroleum substituting energy (the United Kingdom)
[DE94-714897] p 1713 N94-22091
Investigations on trends in global environment adaptive industrial technologies
[DE94-714888] p 1853 N94-22258
TRIANGULATION
Geometric optimization
[DE93-040152] p 1917 N94-21764
Hierarchical surface triangulation of range data
p 1771 N94-22108
Unstructured surface grid generation
p 1920 N94-22366
Computational geometry issues p 1920 N94-22370
Surface acquisition through virtual milling
p 1920 N94-22372
TRIATOMIC MOLECULES
Electronically metastable molecules of high symmetry
[AD-A272015] p 1974 N94-21461
TRIBOLOGY
Microscopic modeling of tribological and interfacial phenomena
[AD-A271864] p 1823 N94-20464
Development of fundamental understanding of friction and wear mechanisms by atomic-scale tribological studies of ceramic materials and multilayered thin films
[AD-A271485] p 1703 N94-20548
Utilization of metals to improve the lubrication of ceramic load-bearing devices
[PB93-202448] p 1825 N94-21424
Integrity testing of brush seal in a T-700 engine
p 1654 N94-21792
TRIGGER CIRCUITS
Results from long conduction time plasma opening switch experiments at Sandia National Laboratories
[DE93-019063] p 1762 N94-21632
TRIGONOMETRIC FUNCTIONS
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164
Rational trigonometric approximations using Fourier series partial sums
[NASA-CR-191535] p 1959 N94-21568
TRINITRO COMPOUNDS
N,N'-bis(4,4,4-trinitro butyryl) hydrazine
[AD-D015897] p 1712 N94-20122
TRINITROTOLUENE
Evaluation of pre-extraction analytical holding times for nitroaromatic and nitramine explosives in water
[AD-A271547] p 1712 N94-20927
TRIODES
Silicon microelectronic field-emissive devices for advanced display technology
[DE94-000397] p 1794 N94-22380
TRIPODS
Simulation of tripod gaits for a hexapod underwater walking machine
[AD-A271719] p 1945 N94-21355
TRITIUM
Hydrogen isotope separation experience at the Savannah River Site
[DE93-019832] p 1679 N94-20266
TRITON
Diapirs and cantaloupes: Layering and overturn of Triton's crust p 2111 N94-20738
Geology of the southern hemisphere of Triton: No polar cap p 2111 N94-20739
TROPICAL METEOROLOGY
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
TROPICAL REGIONS
Orbit and sampling requirements: TRMM experience
p 1870 N94-21647
Are tropical cirrus brighter than mid-latitude cirrus?
p 1881 N94-22343
TROPICAL STORMS
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
Large-scale circulation regimes and tropical cyclone characteristics over the western pacific ocean
[AD-A273004] p 1867 N94-21307
TROPOPAUSE
Intrusion of stratospheric ozone in the troposphere through tropopause folding and cold air droplets
[REPT-87] p 1851 N94-20154
TROPOSPHERE
Tropospheric chemistry of natural hydrocarbons, aldehydes, and peroxy radicals: Their connections to sulfuric acid production and climate effects
[DE93-019525] p 1855 N94-20220
Spatial and temporal variations of satellite microwave measurements of latent heat release in tropic cyclones due to environmental forcing obtained from a numerical model
[AD-A267947] p 1865 N94-20482
Earth observing scanning polarimeter
p 1844 N94-21645
Michelson Interferometer (MINT)
p 1813 N94-21646
Global emissions and models of photochemically active compounds
[DE93-040490] p 1852 N94-21969
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar
p 1874 N94-22310
Analysis of the GOES 6.7 micrometer channel observations during FIRE 2 p 1875 N94-22316
Examination of the observed synoptic scale cirrus cloud environment: The December 3-6 FIRE cirrus case study
p 1877 N94-22325
The 5-6 December 1991 FIRE IFO 2 jet stream cirrus case study: The influence of volcanic aerosols
p 1877 N94-22326
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study
p 1879 N94-22335
TROUGHS
Possible flexural signatures around Olympus and Ascraeus Montes, Mars p 2142 N94-20911
TUBES
Spiral fluid separator
[NASA-CASE-MFS-28658-1] p 1800 N94-20361
TUMORS
Calculation and optimization of electromagnetic fields in a patient by local hyperthermia utilization
[ETN-93-95059] p 1889 N94-20024
TUNABLE LASERS
Suppression of relaxation oscillations in flashpumped, two-micron tunable solid state lasers
[AD-D015928] p 1814 N94-19800
Initial performance of Los Alamos advanced free electron laser
[DE93-040158] p 1814 N94-19828
Evaluation of a single stage of the LADS filter
[AD-A271101] p 1814 N94-19851
Tunable laser frequency stabilizing system
[AD-D015904] p 1815 N94-20055
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
TUNGSTEN
Core formation in the Moon: The mystery of the excess depletion of Mo, W and P p 2095 N94-20651
Electron emission from nanometer-size metallic clusters: Electronic states and structural stability of supported Au clusters
[DE93-040184] p 1975 N94-21766
Ductile-brittle transition behavior of tungsten under shock loading conditions
[DE93-019945] p 1693 N94-21843
TUNGSTEN ALLOYS
Strengthening and toughening in refractory metal alloys
[DE93-019942] p 1695 N94-21986
TUNING
A summary of studies of particle stability at RHIC
[DE93-040173] p 1970 N94-19868
Novel N x N integrated channel waveguide optical crossbars for large scale high speed non-blocking data switching
[AD-A272065] p 1986 N94-20922
Multibunch beam break-up in detuned structures
[DE93-041056] p 1981 N94-21686
TUNNEL JUNCTIONS
Quantum noise studies with superconducting tunnel junction mixers
[AD-A270897] p 2012 N94-19897
The n-p(p(+))-n Al(yGa)(1-y) As-GaAs-In(x)Ga(1-x) as quantum well laser with p(+)-n(+)GaAs-InGaAs tunnel contact on n GaAs
[AD-A271292] p 2030 N94-21805
Energy-resolving x ray detectors with charge amplification due to multiple quasiparticle tunneling
[DE93-019506] p 2031 N94-21869
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE93-018220] p 1850 N94-22257
TURBIDITY
Distribution of turbidity in Australian tropical waters
[AD-A271059] p 1881 N94-19905

TURBINE BLADES
Turbine design p 1668 N94-20075
Oxidation resistant protective coating system for gas turbine components and process for penetration thereof
[CA-PATENT-1,294,155] p 1704 N94-21143
Integrity testing of brush seal in a T-700 engine p 1654 N94-21792
Recent advances in computational structural reliability analysis methods p 1828 N94-22616

TURBINE ENGINES
Integrity testing of brush seal in a T-700 engine p 1654 N94-21792
Modeling bristle lift-off in idealized brush seal configurations p 1655 N94-21797

TURBINE PUMPS
Rocketdyne turbomachinery p 1667 N94-20071
Turbine design p 1668 N94-20075
Distributed loss model: Application to a spatial turbopump inducer p 1668 N94-20078
Actively controlled shaft seals for aerospace applications
[NASA-CR-194759] p 1823 N94-20538
Detailed study of oxidation/wear mechanism in lox turbopump bearings
[NASA-TM-108434] p 1825 N94-21580
The 1992 Seals Flow Code Development Workshop
[NASA-CP-10124] p 1654 N94-21790
Dynamics of face seals for high speed turbomachinery p 1655 N94-21796

TURBINES
Turbine design p 1668 N94-20075
Measurement and prediction of the flow through an annular turbine cascade
[AD-A272530] p 1803 N94-21417

TURBOCOMPRESSORS
Experimental evaluation of oxygen-enriched air and emulsified fuels in a six-cylinder diesel engine
[DE94-000907] p 1811 N94-22391

TURBOFAN ENGINES
On the estimation algorithm used in adaptive performance optimization of turbofan engines
[NASA-TM-4551] p 1649 N94-21879

TURBOMACHINE BLADES
Blade row interaction effects on flutter and forced response
[NASA-TM-106438] p 1649 N94-21586

TURBOMACHINERY
Dynamics of face seals for high speed turbomachinery p 1655 N94-21796
Three-dimensional unstructured grid method applied to turbomachinery p 1919 N94-22360

TURBULENCE
Particle dispersion in turbulent sprays
[AD-A271314] p 1796 N94-19913
Wavefront sensors for optical diagnostics in fluid mechanics: Application to heated flow, turbulence, and droplet evaporation
[DE93-040060] p 1797 N94-19974
Some practical turbulence modeling options for Reynolds-averaged full Navier-Stokes calculations of three-dimensional flows
[NASA-TM-106399] p 1637 N94-20534
Magnetically controlled solar nebula p 2120 N94-20791
Long-range laser imaging
[AD-A273020] p 1817 N94-21253
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531
Turbulization of free shear flows: 3D perturbations p 2000 N94-22626

TURBULENCE EFFECTS
Coherent lidar design and performance verification
[NASA-CR-193813] p 1816 N94-20341

TURBULENCE MODELS
Turbulence modeling for high speed compressible flows
[NASA-CR-194547] p 1799 N94-20210
Some practical turbulence modeling options for Reynolds-averaged full Navier-Stokes calculations of three-dimensional flows
[NASA-TM-106399] p 1637 N94-20534
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1
[NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2
[NASA-CR-189192-VOL-2] p 1648 N94-21583
New results on the realizability of Reynolds stress turbulence closures
[NASA-CR-191548] p 1804 N94-21875

TURBULENT BOUNDARY LAYER
The effect of transverse curvature on the fluctuating wall pressure and structure of boundary layer turbulence
[AD-A271868] p 1800 N94-20466
Some practical turbulence modeling options for Reynolds-averaged full Navier-Stokes calculations of three-dimensional flows
[NASA-TM-106399] p 1637 N94-20534
Investigation of the physics of the turbulent boundary layer focusing on vortex structures
[AD-A272879] p 1802 N94-21155
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459

TURBULENT COMBUSTION
Reaction zone models for vortex simulation of turbulent combustion
[AD-A272723] p 1681 N94-21213
Simulations of diffusion-reaction equations with implications to turbulent combustion modeling
[NASA-CR-191536] p 1804 N94-21861

TURBULENT DIFFUSION
Simulations of diffusion-reaction equations with implications to turbulent combustion modeling
[NASA-CR-191536] p 1804 N94-21861

TURBULENT FLOW
Particle dispersion in turbulent sprays
[AD-A271314] p 1796 N94-19913
Wavefront sensors for optical diagnostics in fluid mechanics: Application to heated flow, turbulence, and droplet evaporation
[DE93-040060] p 1797 N94-19974
The effect of transverse curvature on the fluctuating wall pressure and structure of boundary layer turbulence
[AD-A271868] p 1800 N94-20466
Some practical turbulence modeling options for Reynolds-averaged full Navier-Stokes calculations of three-dimensional flows
[NASA-TM-106399] p 1637 N94-20534
Two-point laser Doppler velocimetry measurements of length-turbulent scales
[ECL-92-12] p 1801 N94-20542
Four-dimensional remote sensing of the marine boundary layer with a digital beamforming radar wind profiler
[AD-A270627] p 1882 N94-20564
Finite element numerical simulation of three dimensional turbulent flows with dispersion: Eulerian and Lagrangian approaches
[ECL-92-42] p 1801 N94-20597
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459
Shear flow generation by Reynolds stress and suppression of resistive g-modes
[DE93-040911] p 1995 N94-21514
Consequences of plasma-maser in plasma astrophysics p 2006 N94-22669

TURBULENT JETS
Particle dispersion in turbulent sprays
[AD-A271314] p 1796 N94-19913
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452
Flow interaction experiment. Volume 1: Aerothermal modeling, phase 1
[NASA-CR-189192-VOL-1] p 1648 N94-21582
Flow interaction experiment. Volume 2: Aerothermalmodeling, phase 2
[NASA-CR-189192-VOL-2] p 1648 N94-21583

TURBULENT MIXING
Turbulence modeling for high speed compressible flows
[NASA-CR-194547] p 1799 N94-20210
Simulations of diffusion-reaction equations with implications to turbulent combustion modeling
[NASA-CR-191536] p 1804 N94-21861

TURBULENT WAKES
Prediction and control of vortex-dominated and vortex-wake flows
[NASA-CR-194722] p 1637 N94-21054

TURING MACHINES
Threshold computation and cryptographic security
[TR-443] p 1907 N94-20536
COCOLOG: A conditional observer and controller logic for finite machines
[INRIA-RR-1714] p 1910 N94-21063
Design methods for fault-tolerant finite state machines p 1758 N94-21120
Advice from nonadaptive queries to NP
[TR-470] p 1911 N94-21200
Space-efficient deterministic simulation of probabilistic automata
[TR-463] p 1900 N94-21281
Threshold computation and cryptographic security
[TR-461] p 1912 N94-21285
Promises and fault-tolerant database access
[TR-447] p 2043 N94-21287
Beta(sub k)-complete problems and greediness
[TR-455] p 1913 N94-21316
On the closure properties of #P in the context of PF of #P
[TR-445] p 1955 N94-21456

TWO DIMENSIONAL BOUNDARY LAYER
Numerical investigation of laminar-turbulent transition in two- and three-dimensional boundary layers
[DLR-FB-92-36] p 1800 N94-20533

TWO DIMENSIONAL FLOW
Formulation of a next-generation interior ballistic code
[AD-A271539] p 1801 N94-20915
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386

TWO DIMENSIONAL MODELS
Two-dimensional particle-in-cell simulation on transputer arrays
[DE93-017977] p 1972 N94-20181
Investigation of the effects of the macrophysical and microphysical properties of cirrus clouds on the retrieval of optical properties: Results for FIRE 2 p 1880 N94-22339
Robust unstructured grid generation with VGRID p 1919 N94-22359
A two-dimensional kinetic model of the scrape-off layer
[DE94-001235] p 1999 N94-22562
Verification of frequency scaling laws for capacitive rf discharges using two-dimensional simulations
[DE94-001306] p 1999 N94-22595

TWO FLUID MODELS
Measurement of thermal-hydraulic parameters in two-phase flow using flow visualization image analysis
[DE93-006255] p 1805 N94-22269

TWO PHASE FLOW
Formulation of a next-generation interior ballistic code
[AD-A271539] p 1801 N94-20915
Measurement of thermal-hydraulic parameters in two-phase flow using flow visualization image analysis
[DE93-006255] p 1805 N94-22269

U

U.S.S.R.
Soviet society informatization: The USSR state program p 2046 N94-22058
The Soviet software market: Current state and aspects of development p 1923 N94-22066
Models of transient processes in centrally planned economy p 2051 N94-22071

U-2 AIRCRAFT
Bi-directional reflectance and other radiation parameters of cirrus from ER-2 observations p 1871 N94-22296

UH-60A HELICOPTER
The modern rotor aerodynamic limits survey: A report and data survey
[NASA-TM-4446] p 1635 N94-21490

ULLAGE
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355

ULTRAHIGH FREQUENCIES
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Mapping of taiga forest units using AIRSAR data and/or optical data, and retrieval of forest parameters p 1729 N94-20452
Mobile antenna development at JPL p 1731 N94-20457
Mobile terminal antennas for helicopters p 1731 N94-20458
An in-depth analysis and modelling of the Shuttle to MILA S-band telemetry link p 1657 N94-21340

ULTRAHIGH VACUUM
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558
GaAs(100) surface modifications at elevated temperatures, studied by in-situ spectroscopic ellipsometry p 2023 N94-20997
Ellipsometric study of GaAs(100) surface changes induced at elevated temperatures p 2023 N94-20998
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding
[DE94-001066] p 1696 N94-22025

ULTRASONIC SCANNERS
Ultrasonic sensor vision in robotics p 1775 N94-22131

ULTRASONIC TESTS
Three dimensional ultrasonic imaging
[DE93-040549] p 1968 N94-22003
Cold starting an alcohol-fueled engine with ultrasonic fuel atomization
[PB93-206597] p 1826 N94-22093

Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000665] p 1697 N94-22571
ULTRAVIOLET ASTRONOMY
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
VVNRS: Variable phenomena in VV Cephei
[NASA-CR-194731] p 2056 N94-21835
UIT support observations archive
p 2048 N94-22534
ULTRAVIOLET DETECTORS
UVPI imaging from the LACE satellite: The Starbird rocket plume
[AD-A271981] p 1658 N94-20617
ULTRAVIOLET FILTERS
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
ULTRAVIOLET LASERS
Ocular damage induced by ultrashort laser pulses
[AD-A271859] p 1890 N94-20462
Optical metrology of magnetically trapped hydrogen
[AD-A272110] p 1680 N94-20584
Demonstration of ultraviolet lasing with a low energy electron beam
[DE93-040192] p 1818 N94-21554
ULTRAVIOLET RADIATION
The modification of polymer surfaces and the fabrication of submicron-scale functionalized structures by deep-UV and electron beam lithography
[AD-A265956] p 1700 N94-20328
The implications of the LDEF results on Space Station Freedom power system materials p 1660 N94-21377
The simulation of action of some space environment factors on Teflon and on rubber materials
p 1661 N94-21380
Simulated space environmental effects on some experimental high performance polymers
p 1662 N94-21385
A carbon dioxide/methane greenhouse atmosphere on early Mars p 2142 N94-21662
UNDERGROUND EXPLOSIONS
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090
UNDERWATER ACOUSTICS
A survey of the impact on acoustic propagation of warm core ocean eddys
[AD-A272188] p 1883 N94-20925
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
Transient acoustic wave modeling: Higher-order WKBJ asymptotics and symbolical manipulation (revised)
[PB93-215432] p 1969 N94-22262
UNDERWATER COMMUNICATION
Oceanic in situ Fraunhofer-line characteristics: Fraunhofer-line underwater experiment (FLUX)
[AD-A270659] p 1881 N94-19952
UNDERWATER VEHICLES
Design of a controllable pitch underwater thruster system
[AD-A271140] p 1821 N94-20021
A software architecture for a small autonomous underwater vehicle navigation system
[AD-A272322] p 1643 N94-21037
Simulation of tripod gaits for a hexapod underwater walking machine
[AD-A271719] p 1945 N94-21355
UNITED KINGDOM
Current situation in developing petroleum substituting energy (the United Kingdom)
[DE94-714897] p 1713 N94-22091
UNITED STATES
Biofuels: Project summaries
[DE93-010003] p 1712 N94-19984
Post-Palbozoic crustal responses to the contemporary stress field in the eastern United States
[DE93-040604] p 1859 N94-22006
UNIVERSE
Visualizing the universe, part 1 p 2064 N94-22476
UNIVERSITIES
A comprehensive software engineering educational experience
[AD-A270583] p 1905 N94-20109
Schools of the Pacific rainfall climate experiment
p 1881 N94-20699
UNIX (OPERATING SYSTEM)
Lightweight recoverable virtual memory
[AD-A270576] p 1898 N94-20107
Security evaluation of Unix networks
[AD-A273076] p 1945 N94-21520
Database activity in the Italian Astronet: DIRA 2
p 2047 N94-22452
VETA x ray data acquisition and control system
p 2047 N94-22455
Writing instrument interfaces with xf/tktcl
p 1925 N94-22480
The University of Hawaii Institute for Astronomy CCD camera control system p 1828 N94-22489
The ADAM environment and transputers
p 1926 N94-22494
CCD data acquisition systems at Lick and Keck Observatories p 2047 N94-22495
UNSTEADY AERODYNAMICS
Blade row interaction effects on flutter and forced response
[NASA-TM-106438] p 1649 N94-21586
UNSTEADY FLOW
Transient thermal analysis of cryocondensation pump for JET
[DE93-040372] p 1992 N94-20003
Three dimensional unsteady flow calculations in radial components p 1669 N94-20080
Rotorwash wind sensor evaluation
[AD-A268987] p 1807 N94-20203
System and method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-1] p 1801 N94-20588
Computational and analytical methods in nonlinear fluid dynamics
[AD-A272722] p 1802 N94-21169
An efficient numerical method for three-dimensional hypersonic flow
[AD-A272506] p 1637 N94-21411
Active control of wake/blade-row interaction noise through the use of blade surface actuators
[NASA-CR-4556] p 1968 N94-21608
Local uniform grid refinement and brine transport in porous media with inhomogeneities
[CWI-NM-R9224] p 1803 N94-21609
Time-dependent grid adaptation for meshes of triangles and tetrahedra p 1920 N94-22369
UPWIND SCHEMES (MATHEMATICS)
Order of accuracy of QUICK and related convection-diffusion schemes
[NASA-TM-106402] p 1959 N94-21588
URANIUM
Crystallographic phase transitions in actinide metals as a function of pressure
[DE93-040138] p 2011 N94-19827
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049
K, U, and Th behavior in Martian environmental conditions p 2141 N94-20908
URANIUM ALLOYS
Investigation of cracking and erratic behavior of the uranium-titanium alloy
[DE93-018591] p 1688 N94-19957
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275
Non-fermi liquid and spin-glass behavior of the Sc(1-x)U(x)Pd3 system
[DE93-040134] p 2016 N94-20335
Temperature dependence of magnetic order in single-crystalline UPdSn
[DE93-040153] p 2033 N94-21991
URANIUM COMPOUNDS
Theoretical studies of the structures and electronic properties of U(NH2)(sub 3) and Np(NH2)(sub 3)
[DE94-000768] p 2031 N94-21857
Low temperature absorption spectra and ground state electronic structure of tetrakis(2,6-di-tert-butylphenoxide)uranium(IV)
[DE94-000774] p 2035 N94-22387
URANIUM ISOTOPES
U-Pb isotopic ages and characteristics of ancient (greater than 4.0 Ga) lunar highland rocks
p 2104 N94-20700
U-Pb provenance ages of shocked zircons from the K-T boundary, Raton Basin, Colorado p 1685 N94-20701
U-Pb isotopic systematics of ferroan anorthosite 60025 p 1685 N94-20702
URANIUM 238
A high-intensity He-jet production source for radioactive beams
[DE93-040247] p 1981 N94-21767
URANUS (PLANET)
Structural evidence for reorientation of Miranda about a paleo-pole p 2098 N94-20671
URBAN DEVELOPMENT
Urban applications of satellite remote sensing and GIS analysis
[PB93-202174] p 1842 N94-21855
URBAN PLANNING
Urban applications of satellite remote sensing and GIS analysis
[PB93-202174] p 1842 N94-21855
URBAN TRANSPORTATION
Electromechanical battery research and development at the Lawrence Livermore National Laboratory
[DE93-019159] p 1762 N94-21620
UREILITES
A carbon and nitrogen isotope study of carbonaceous vein material in ureilite meteorites p 2083 N94-20726
USER MANUALS (COMPUTER PROGRAMS)
Planning process software: A user guide for the DMCA
[AD-A271252] p 1902 N94-19911
SIMBAT theoretical manual
[AD-A271063] p 1882 N94-19979
The best of GYMNOS: A users guide
[DE93-041275] p 1992 N94-19991
Manual of DRANC (release 1.1): A computer program for the Dutch risk assessment of new chemical substances
[PB93-194827] p 1851 N94-19998
Mint tutorial and user manual
[TR-452] p 1905 N94-20143
Time warp operating system version 2.7 internals manual
[NASA-CR-194798] p 1899 N94-20549
Design structuring and allocation optimization (Destination) prototype level 1 user's manual
[AD-A272115] p 1929 N94-20571
GWB: Manual for the Grammar WorkBench version 1.5
[TR-92-14] p 1909 N94-21061
The Mercury user's manual
[TR-465] p 1913 N94-21316
The term processor Kimwitu manual and cookbook
[MEMO-INF-92-67] p 1914 N94-21454
Development of BEM for ceramic composites
[NASA-CR-194718] p 1676 N94-21777
User manual for EXCALIBUR: A FE-BI numerical laboratory for cavity-backed antennas in a circular cylinder, version 1.2 p 1741 N94-21888
Parallel runway requirement analysis study. Volume 2: Simulation manual
[NASA-CR-191549-VOL-2] p 1644 N94-22278
F2D users manual: A two-dimensional compressible gas flow code
[DE94-000653] p 1805 N94-22386
USER REQUIREMENTS
Research in image management and access
[NASA-CR-194797] p 1907 N94-20376
PEGASUS, electronic bulletin board system user's guide
[AD-A271679] p 2044 N94-21363
Software systems used for unstructured grid generation at NASA Langley p 1918 N94-22351
UTILITIES
Wind energy: Program overview, FY 1992
[DE93-000056] p 1845 N94-19921

V

V/STOL AIRCRAFT
Some VTOL head-up display drive-law problems and solutions
[NASA-TM-104027] p 1635 N94-20035
VACANCIES (CRYSTAL DEFECTS)
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO2
[DE93-040229] p 2033 N94-21993
VACUUM
Evaporation in equilibrium, in vacuum, and in hydrogen gas p 1684 N94-20638
Outgassing data for selecting spacecraft materials
[NASA-RP-1124-REV-3] p 1676 N94-21889
VACUUM APPARATUS
Turntable mechanism
[NASA-CASE-MFS-28522-1] p 1823 N94-20380
VACUUM CHAMBERS
Characterization of electromagnetic fields in an extended chamber at the Short Pulse Experimental Electron Device (SPEED) simulator
[AD-A265955] p 1717 N94-20329
New technique for oil backstreaming contamination measurements p 1652 N94-20511
GaAs(100) surface modifications at elevated temperatures, studied by in-situ spectroscopic ellipsometry p 2023 N94-20997
Ellipsometric study of GaAs(100) surface changes induced at elevated temperatures p 2023 N94-20998
Initial operation of a large-scale plasma source ion implantation experiment
[DE94-000805] p 2036 N94-22583
VACUUM DEPOSITION
Fabrication and evaluation of superconducting and semiconducting materials
[AD-A271645] p 2018 N94-20558

VACUUM EFFECTS
Surface science at the solid liquid interface
[AD-A271422] p 1678 N94-19839
VACUUM TESTS
Solar simulator for solar dynamic space power system testing
[NASA-TM-106393] p 1984 N94-20140
In-vacuo slip testing of materials for SSRMS friction brakes p 1661 N94-21381
VALENCE
The x ray microprobe determination of chromium oxidation state in olivine from lunar basalt and kimberlitic diamonds p 1686 N94-20807
Microanalysis of iron oxidation state in iron oxides using X Ray Absorption Near Edge Structure (XANES) p 1686 N94-20808
VALIDITY
Handbook. Volume 3: Digital systems validation book plan
[DOT/FAA/CT-93/16-VOL-3] p 1647 N94-20053
VALLEYS
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Evolution of the global water cycle on Mars: The geological evidence p 2142 N94-21660
Ancient Martian valley genesis and paleoclimatic inference: The present as a key to the past p 2142 N94-21661
Early Mars: The inextricable link between internal and external influences on valley network formation p 2146 N94-21681
The Martian valley networks: Origin by niveo-fluvial processes p 2146 N94-21682
VALUE ENGINEERING
Optimization of a satellite localization and message sending system
[ETN-93-94448] p 1737 N94-20592
VALVES
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451
VAN DER WAALS FORCES
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
One- and multi-component theories of mixtures
[DE93-040543] p 1966 N94-21511
VANADIUM
Transient studies of low temperature catalysts for methane conversion
[DE93-041232] p 1680 N94-20934
VAPOR DEPOSITION
Fabrication of stable large-area thin-film CdTe photovoltaic modules
[DE93-018204] p 1845 N94-20095
Plasma chemical vapor deposition of halide glasses
[AD-D015933] p 1701 N94-20331
Growth of zinc selenide single crystals by physical vapor transport in microgravity
[NASA-CR-194679] p 2017 N94-20346
Monocrystalline germanium film on sapphire
[AD-D015925] p 2017 N94-20348
Volatile CVD precursors based on copper alkoxides and mixed group 2A-copper alkoxides
[AD-D015930] p 1701 N94-20349
Analysis of cost: CVD diamond deposition
[AD-A271980] p 2018 N94-20616
Growth, characterization and device development in monocrystalline diamond films
[AD-A273097] p 2028 N94-21506
Fundamental studies of defect generation in amorphous silicon alloys grown by remote plasma-enhanced chemical-vapor deposition
[DE93-017083] p 2029 N94-21615
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617
Surface modification for corrosion resistance
[DE93-017419] p 1693 N94-21825
Techniques for producing free-standing thin films on frames
[DE93-041144] p 1708 N94-21954
VAPOR PHASES
Parameters affecting hydrogen chloride measurements
[AD-A271326] p 1851 N94-20025
Volatile loss from accreting icy protoplanets p 2084 N94-20793
Recondensation in the early solar system: Physical conditions and source material p 2085 N94-20849
Utilization of metals to improve the lubrication of ceramic load-bearing devices
[PB93-202448] p 1825 N94-21424
Lubricated wear of steel-ceramic and ceramic-ceramic systems
[PB93-202356] p 1825 N94-21450
Combustion in turbulent jets and buoyant flames
[PB93-202372] p 1682 N94-21452
Effect of powder characteristics on gas-pressure sintering of Si3N4 with rare earth additives
[DE94-000330] p 1694 N94-21945
VAPOR PRESSURE
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
VAPORIZING
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647
Stable Ni isotopes and Be-10 and Al-26 in metallic spheroids from Meteor Crater, Arizona p 1863 N94-20889
Liquid-phase circulation and mixing in multicomponent droplets vaporizing in a laminar convective environment
[AD-A272851] p 1802 N94-21193
VAPORS
Image detection using edge extraction algorithms
[AD-A272439] p 1911 N94-21203
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments)
[AD-A272918] p 1802 N94-21220
Atmospheric sampling glow discharge ionization and triple quadrupole tandem mass spectrometry for explosives vapor detection
[DE93-040593] p 1852 N94-22004
VARACTOR DIODES
Millimeter wave imaging technology
[AD-A271257] p 1715 N94-19912
Non-linear analysis of the electrical properties of the active circuits of high-frequency oscillators p 1785 N94-22195
VARIABILITY
Large-scale circulation regimes and tropical cyclone characteristics over the western pacific ocean
[AD-A273004] p 1867 N94-21307
VARIABLE CYCLE ENGINES
Options for thrust augmentation for the Beta 2 two-stage-to-orbit launch vehicle
[NASA-TM-106418] p 1649 N94-21759
VARIABLE PITCH PROPELLERS
Design of a controllable pitch underwater thruster system
[AD-A271140] p 1821 N94-20021
VARIANCE (STATISTICS)
Linear programming for standard and nonstandard Markovian control problems. A survey
[PB93-191948] p 1963 N94-21066
Parameter estimation with cost function of second order in output-error-problem
[DLR-FB-92-38] p 1964 N94-21139
VARIATIONAL PRINCIPLES
Proof of stability of the hydrogen molecule
[PB93-221026] p 1977 N94-22271
VARIATIONS
Paired comparison models with time-varying parameters
[AD-A272016] p 1964 N94-21442
Surface-induced brightness temperature variations and their effects on detecting thin cirrus clouds using IR emission channels in the 8-12 micrometer region p 1880 N94-22341
VARIOMETERS
Concept report: Experimental vector magnetograph (EXVM) operational configuration balloon flight assembly
[NASA-CR-194702] p 1638 N94-21776
VARISTORS
Improvement of the stability of the process for synthesizing chemically prepared varistor powder
[DE94-000345] p 1763 N94-21654
VARNISHES
Thermal control coatings p 1664 N94-21400
VATOL AIRCRAFT
Design, fabrication and test of a vertical attitude takeoff and landing unmanned air vehicle
[AD-A273003] p 1646 N94-21283
VAX COMPUTERS
Telescope image modelling software in STSDAS p 1926 N94-22483
The evolution of the FIGARO data reduction system p 2048 N94-22528
VECTOR PROCESSING (COMPUTERS)
MGD1M: A parallel multigrid code with a fast vectorized ILU-relaxation
[CWI-NM-R9222] p 1930 N94-21077
Parallelizing a highly vectorized multigrid code with zebra relaxation
[CWI-NM-R9225] p 1935 N94-21610
Numerical multigrid software (MGD5M): A parallel multigrid code with a twisted ILLU-relaxation
[CWI-NM-R9226] p 1916 N94-21611
A low-cost vector processor boosting compute-intensive image processing operations p 1925 N94-22441
VECTOR QUANTIZATION
Low bit rate coding of Earth science images
[NASA-CR-193729] p 2041 N94-20158
Data compression by using wavelet transforms and vector quantization
[AD-A272763] p 1738 N94-21182
Some extensions of the k-means algorithm for image segmentation and pattern classification
[AD-A271691] p 1913 N94-21364
Hierarchical multirate vector quantization for image coding p 1781 N94-22174
VECTORS (MATHEMATICS)
Segmented operations for sparse matrix computation on vector multiprocessors
[AD-A270601] p 1928 N94-19950
The quantum structure of matter grand challenge project: Large-scale 3-D solutions in relativistic quantum dynamics
[DE94-000328] p 1960 N94-21955
VEGETATION
Modeling of interactions between biosphere and atmosphere on the global scale
[NASA-CR-193423] p 1837 N94-20205
An expert system shell for inferring vegetation characteristics
[NASA-CR-189318] p 1837 N94-20284
Classification of simple vegetation types using POLSAR image data p 1722 N94-20420
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 1724 N94-20429
Direction angle sensitivity of agricultural field backscatter with AIRSAR data p 1724 N94-20430
Measurement of evapotranspiration with combined reflective and thermal infrared radiance observations
[NASA-CR-194802] p 1837 N94-20951
VEGETATION GROWTH
Characterization of Minnesota lunar simulant for plant growth p 1897 N94-20665
VEGETATIVE INDEX
Change detection on land use and rainforest cover at Paragominas region, Brazilian Amazon p 1838 N94-20957
Linear mixing model applied to AVHRR LAC data p 1838 N94-20958
Analysis of hyper-spectral AVIRIS image data over a mixed-conifer forest in Maine p 1838 N94-20959
The 7th Brazilian Remote Sensing Symposium, volume4 p 1840 N94-20965
Using NDVI/AVHRR data for crop monitoring and forecasting in South Italy p 1841 N94-20970
VEINS
A carbon and nitrogen isotope study of carbonaceous vein material in ureilite meteorites p 2083 N94-20726
VELOCITY
Antipodal fragment velocities for porous and weak targets at catastrophic impacts p 1836 N94-20891
VELOCITY DISTRIBUTION
Electrode array electromagnetic velocimeter
[AD-D015950] p 1806 N94-19882
Experimental and computational results from a large low-speed centrifugal impeller
[NASA-TM-106421] p 1636 N94-20136
Kinetic theory of runaway air-breakdown
[DE93-040731] p 1750 N94-20325
An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight
[AD-A270201] p 1636 N94-20486
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Comparison of satellite-derived velocity fields in the coastal transition zone
[AD-A272565] p 1883 N94-21360
Low Reynolds-number turbulent boundary layers
[AD-A272011] p 1803 N94-21459
A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591
Direct detection of atomic ions from molecular photofragmentation during nonresonant multiphoton ionization of sputtered species
[DE93-040886] p 1976 N94-21951
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552
VELOCITY ERRORS
Mirror velocity sampling errors in a Michelson interferometer
[AD-A273105] p 1809 N94-21508
VELOCITY MEASUREMENT
Electrode array electromagnetic velocimeter
[AD-D015950] p 1806 N94-19882
Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927

PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943
Coherent lidar design and performance verification
[NASA-CR-193613] p 1816 N94-20341
An experimental investigation of the drag mechanisms of a helicopter rotor in hovering flight
[AD-A270201] p 1636 N94-20486
Shipboard ADCP observations during RRS Charles Darwin Cruise 62
[IOS-298-1992] p 1882 N94-20531
Two-point laser Doppler velocimetry measurements of length-turbulent scales
[ECL-92-12] p 1801 N94-20542
Low-altitude cross-wind velocity measurements using pulsed visible fringe-type laser anemometry
[ISL-CO-216/92] p 1866 N94-20557
Shock compression of low-density foams
[DE93-040545] p 1707 N94-21546
Instantaneous velocity field imaging instrument for supersonic reacting flows
[NASA-CR-191162] p 1809 N94-21607
Particle image velocimetry
[DE93-040657] p 1804 N94-21748
Near wake measurements on a rotor model with Mie-vanes in the Delft open jet tunnel
[PB93-215382] p 1638 N94-22260
Breaking Kelvin-Helmholtz waves and cloud-top entrainment as revealed by K-band Doppler radar
p 1874 N94-22310
Utilization of lasers for air data measurements
p 1640 N94-22603
Hot wire anemometry: A versatile instrumentation used for predevelopment studies and flight testing of the Do-328 aircraft p 1640 N94-22604

VENUS (PLANET)
SO2 on Venus: IUE, HST and ground-based measurements, and the active volcanism connection
p 2092 N94-20637
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Dynamics of large scale impacts on Venus and Earth
p 2098 N94-20666
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus
p 2099 N94-20675
Venus magmatic and tectonic evolution
p 2101 N94-20683
Studying Venus using a GIS database
p 2105 N94-20707
Subduction on the margins of coronae on Venus: Evidence from radiothermal emissivity measurements
p 2107 N94-20718
Comparative hypsometric analysis of both Earth and Venus topographic distributions p 2108 N94-20722
Named Venusian craters p 2109 N94-20725
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Magellan at Venus: Summary of science findings
p 2110 N94-20734
Venus' impact-crater database: Update to approximately 98 percent of the planet's surface p 2110 N94-20736
Searching for ancient Venus p 2111 N94-20743
Rifting at Devana Chasma, Venus: Structure and estimation of the effective thickness of the elastic lithosphere p 2113 N94-20754
Volcanic rises on Venus: Geology, formation, and sequence of evolution p 2113 N94-20755
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
Venus gravity: New Magellan low altitude data
p 2117 N94-20772
Response of the topography and gravity field on Venus to mantle upwelling beneath a chemical boundary layer
p 2117 N94-20775
Differentiation of magma oceans and the thickness of the depleted layer on Venus p 2118 N94-20780
A tectonic resurfacing model for Venus
p 2118 N94-20781
The missing impact craters on Venus
p 2119 N94-20782
Impact basins on Venus and some interplanetary comparisons p 2119 N94-20785
Parga and Hecate Chasmata, Venus: Structure, volcanism and models of formation
p 2121 N94-20796
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800
Parabolic features and the erosion rate on Venus
p 2122 N94-20801
SPH modelling of energy partitioning during impacts on Venus p 2124 N94-20809
Elevation and igneous crater modification on Venus: Implications for magmatic volatile content
p 2135 N94-20872
Large floor-fractured craters and isostatic crater modification: Implications for lithospheric thickness on Venus p 2135 N94-20873
Morphologic classes of impact basins on Venus
p 2137 N94-20883
The connection between Venus' free obliquity and its CMB oblateness p 2139 N94-20896

VENUS ATMOSPHERE
Impact disturbance of the Venus atmosphere
p 2106 N94-20709
Searching for ancient Venus p 2111 N94-20743
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800
Parabolic features and the erosion rate on Venus
p 2122 N94-20801
Are Plinian type eruptions possible on Venus?
p 2123 N94-20803
Discovery Venera surface: Atmosphere geochemistry experiments mission concept p 2123 N94-20806
SPH modelling of energy partitioning during impacts on Venus p 2124 N94-20809

VENUS SURFACE
SO2 on Venus: IUE, HST and ground-based measurements, and the active volcanism connection
p 2092 N94-20637
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Magellan vertical polarization radar observations
p 1744 N94-20691
Crater destruction on the Venusian highlands by tectonic processes p 2103 N94-20696
Some deformation trends and topographic characteristics of tesserae on Venus
p 2105 N94-20706
Studying Venus using a GIS database
p 2105 N94-20707
Impact disturbance of the Venus atmosphere
p 2106 N94-20709
Chocolate tablet aspects of cytherean Meshkenet Tessera p 2106 N94-20710
Ridge belt-related scarps and troughs: Compressional crustal bending on Venus p 2106 N94-20711
Comparative hypsometric analysis of both Earth and Venus topographic distributions p 2108 N94-20722
Named Venusian craters p 2109 N94-20725
Distribution of small volcanic cones on the surface of Venus by size and elevation: Implications for differential deposition of volcanic features p 2110 N94-20731
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Venus' impact-crater database: Update to approximately 98 percent of the planet's surface p 2110 N94-20736
Searching for ancient Venus p 2111 N94-20743
Rifting at Devana Chasma, Venus: Structure and estimation of the effective thickness of the elastic lithosphere p 2113 N94-20754
Volcanic rises on Venus: Geology, formation, and sequence of evolution p 2113 N94-20755
Geoid, topography, and convection-driven crustal deformation on Venus p 2116 N94-20769
Scattering by Venus' surface p 2117 N94-20771
A tectonic resurfacing model for Venus
p 2118 N94-20781
The missing impact craters on Venus
p 2119 N94-20782
Impact basins on Venus and some interplanetary comparisons p 2119 N94-20785
Earth-based measurement of lunar topography using delayed radar interferometry p 2119 N94-20787
The stability of oxyamphiboles: Existence of Ferric-bearing minerals under the reducing conditions on the surface of Venus p 2122 N94-20800
Discovery Venera surface: Atmosphere geochemistry experiments mission concept p 2123 N94-20806
SPH modelling of energy partitioning during impacts on Venus p 2124 N94-20809
Magellan Mission p 1652 N94-20829
Complex ridged terrain-related ridge belts on Venus: Global distribution and classification
p 2129 N94-20835
Is there uniformitarian or catastrophic tectonics on Venus? p 2129 N94-20839
Arcuate and circular structures in the Tharsis region: Evidence of coronae on Mars p 2134 N94-20863
Geology and radiophysical properties of the Venera and Vega landing sites p 2135 N94-20867
Elevation and igneous crater modification on Venus: Implications for magmatic volatile content
p 2135 N94-20872
Large floor-fractured craters and isostatic crater modification: Implications for lithospheric thickness on Venus p 2135 N94-20873
Morphologic classes of impact basins on Venus
p 2137 N94-20883

VERBAL COMMUNICATION
ATC/pilot voice communications: A survey of the literature
[DOT/FAA/AM-93/20] p 1738 N94-21201

VERTICAL DISTRIBUTION
Meso-Beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-194627] p 1864 N94-20138
Wrinkle ridges, reverse faulting, and the depth penetration of lithospheric stress in lunae planum, Mars
p 2141 N94-20910

VERTICAL FLIGHT
Optimal flight guidance for aircraft in windshear
[CA-PATENT-1,307,573] p 1650 N94-21050

VERTICAL LANDING
Design, fabrication and test of a vertical attitude takeoff and landing unmanned air vehicle
[AD-A273003] p 1646 N94-21283
Data link development for the archytas vertical takeoff and landing transitional flight unmanned aerial vehicle
[AD-A272499] p 1646 N94-21548

VERTICAL MOTION SIMULATORS
Some VTOL head-up display drive-law problems and solutions
[NASA-TM-104027] p 1635 N94-20035

VERTICAL TAKEOFF AIRCRAFT
Design, fabrication and test of a vertical attitude takeoff and landing unmanned air vehicle
[AD-A273003] p 1646 N94-21283
Data link development for the archytas vertical takeoff and landing transitional flight unmanned aerial vehicle
[AD-A272499] p 1646 N94-21548

VERY HIGH FREQUENCIES
Sporadic-E observations during LoVHF transionospheric direction finder measurements
[AD-A270619] p 1716 N94-19951

VERY LARGE SCALE INTEGRATION
VLSI design for reliability-current density
[AD-A270719] p 1749 N94-20110
The Fifth NASA Symposium on VLSI Design
[NASA-CR-194644] p 1753 N94-21079
An adaptive, lossless data compression algorithm and VLSI implementations p 1753 N94-21080
Space qualified high speed Reed Solomon encoder
p 1754 N94-21088
High performance MPEG-audio decoder IC
p 1744 N94-21092
VLSI mixed signal processing system
p 1744 N94-21100
Power optimization in logic isomers
p 1756 N94-21101
Computation of signal delays in RC networks
p 1744 N94-21102
Delay analysis of combinations of pass transistors and classical logic gates p 1756 N94-21103
Mixed voltage VLSI design p 1756 N94-21104
Bridging faults in BiCMOS circuits
p 1756 N94-21105
Test pattern generation for ILA sequential circuits
p 1757 N94-21107
Testing self-timed circuits using scan paths
p 1757 N94-21109
Detection of CMOS bridging faults using minimal stuck-at fault test sets p 1757 N94-21110
Robust neural classifier circuits using asynchronous design p 1757 N94-21111
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114
A novel VLSI processor architecture for supercomputing arrays p 1758 N94-21115

Synthesis algorithm of VLSI multipliers for ASIC
p 1758 N94-21116
Design and implementation of GaAs HBT circuits with ACME p 1758 N94-21117
Reliable interface design for combining asynchronous and synchronous circuits p 1758 N94-21119
Design methods for fault-tolerant finite state machines
p 1758 N94-21120
A unified approach to VLSI layout automation and algorithm mapping on processor arrays
p 1759 N94-21127
A fixed/variable bit-rate data compression architecture
p 1759 N94-21128
High-speed Viterbi decoding with overlapping code sequences p 1760 N94-21130
A cost-effective methodology for the design of massively-parallel VLSI functional units
p 1760 N94-21132
Behavioral model simulation studies of an image compressor p 1760 N94-21133
Polar processing project
[AD-A271583] p 1739 N94-21235
VLSI design for reliability-hot carrier effects
[AD-A271586] p 1761 N94-21256
CMU very fast range-imaging system
[AD-A272057] p 1761 N94-21282
The 1992 4th NASA SERC Symposium on VLSI Design
[NASA-CR-194591] p 1763 N94-21694
Applications of correlator chips in radio science
p 1763 N94-21695
Single event phenomena: Testing and prediction
p 1763 N94-21696
A 20 MHz CMOS reorder buffer for a superscalar microprocessor p 1764 N94-21700
Analog/digital pH meter system I.C.
p 1764 N94-21701
On the decomposition of synchronous state machines using sequence invariant state machines
p 1764 N94-21703
Heuristic-based scheduling algorithm for high level synthesis p 1764 N94-21704
NASA SERC digital correlator projects
p 1765 N94-21708
Fully-depleted silicon-on-sapphire and its application to advanced VLSI design p 1765 N94-21709
Defect-sensitivity analysis of an SEU immune CMOS logic family p 1765 N94-21711
A novel visual hardware behavioral language
p 1765 N94-21715
HDL to verification logic translator
p 1766 N94-21717
A simple modern correctness condition for a space-based high-performance multiprocessor
p 1766 N94-21718
A mean field neural network for hierarchical module placement p 1766 N94-21720
Schematic driven layout of Reed Solomon encoders
p 1766 N94-21722
Bit-systolic arithmetic arrays using dynamic differential gallium arsenide circuits p 1767 N94-21724
A VLSI implementation of DCT using pass transistor technology p 1767 N94-21725
A DRAM compiler algorithm for high performance VLSI embedded memories p 1767 N94-21729
Low power, CMOS digital autocorrelator spectrometer for spaceborne applications p 1666 N94-21733
A real time correlator architecture using distributed arithmetic principles p 1768 N94-21734
Low energy CMOS for space applications
p 1768 N94-21735
Self assembly: An approach to terascale integration
[DE93-040104] p 1769 N94-21846
The distributed CAD system for LSI/VLSI design
p 1923 N94-22068
VLSI architectures for the new (T,L) algorithm
p 1745 N94-22110
VLSI design of a bit serial parallel processing 4 extender chip for M-path convolutional decoding
p 1775 N94-22132
VLSI design of a parallel video output interface
p 1778 N94-22153
Architectures of the free space optical interconnects
p 1789 N94-22220
The VLBA correlator: Real-time in the distributed era
p 2049 N94-22547

VERY LONG BASELINE ARRAY (VLBA)
The VLBA correlator: Real-time in the distributed era
p 2049 N94-22547

VERY LOW FREQUENCIES
VLF Harold E. Holt RADHAZ measurements
[AD-A272018] p 1737 N94-20620

VIBRATION
U.S. Tag for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock: Minutes of the accredited standards committee on bioacoustics, S3
[AD-A273014] p 1897 N94-21309
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
A vibration model for centrifugal contactors
[DE93-040645] p 1833 N94-21927
Modal combination in response spectrum modal dynamic analysis
[DE94-000339] p 1833 N94-21956

VIBRATION DAMPING
Study of transverse coupled bunch instabilities by using non-linear Taylor maps for the Advanced Light Source (ALS)
[DE93-040287] p 1979 N94-19989
Graphite/polyurethane flexible composites: Mechanical and vibration damping properties
[AD-A271608] p 1674 N94-20950

VIBRATION ISOLATORS
Diagnostics and methods for real-time laser microchemistry
[AD-A270871] p 1680 N94-20566

VIBRATION MODE
System identification of the Daisy large space structure emulator
[ISBN-0-315-83533-8] p 1653 N94-22588

VIBRATION TESTS
The effect of delamination on the dynamic response of composite laminates as measured by embedded fiber optic Michelson sensor
[ISBN-0-315-83534-6] p 1677 N94-22587

VIBRATIONAL SPECTRA
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
Surface electrochemistry of metals
[AD-A272913] p 1691 N94-21245
Modal combination in response spectrum modal dynamic analysis
[DE94-000339] p 1833 N94-21956

VIBRATIONAL STATES
Femtosecond Raman-induced Kerr effect study of polar solvent dynamics: Amides
[DE93-017563] p 1678 N94-19924
Rotational spectrum of a dark state in 2-fluoroethanol using microwave/radiofrequency-infrared multiple resonance
[AD-A272101] p 1817 N94-20583
Theoretical investigations of metastability and energy storage in molecular systems
[AD-A271849] p 1973 N94-20612
High resolution infrared spectroscopy of formamide and deuterated formamide in a molecular beam
[AD-A271986] p 1973 N94-20618
Semiconductor isotope engineering
[DE93-040119] p 2030 N94-21744
Ionization of H2(+) in intense laser fields
[DE93-019160] p 1818 N94-21829
Non-adiabatic effects in low-energy electron-molecule scattering
[DE93-040485] p 1976 N94-21968

VIDEO COMMUNICATION
Performance evaluation of video on ethernet
[DE93-040696] p 1936 N94-21749

VIDEO DATA
The Amsterdam hypermedia model: Extending hypertext to support real multimedia
[CWI-CS-R9306] p 2045 N94-21536
Concept report: Experimental vector magnetograph (EXVM) operational configuration balloon flight assembly
[NASA-CR-194702] p 1638 N94-21776

VIDEO EQUIPMENT
Image processing as a tool in flight testing evaluation
p 1640 N94-22606

VIDEO SIGNALS
Adaptive analog video signal conditioner
p 1744 N94-21099

VIDICONS
The cool-star spectral catalog: A uniform collection of IUE SWP-LOs p 2046 N94-22446

VIKING MARS PROGRAM
Observed climatic activity pertaining to the evolution of the northern plains p 2090 N94-20392
Chronology, eruption duration, and atmospheric contribution of Apollinaris Patera, Mars
p 2108 N94-20720
GMM-1: A 50 degree and order gravitational field model for Mars p 2117 N94-20774
Mass spectrometer-pyrolysis experiment for atmospheric and soil sample analysis on the surface of Mars p 1812 N94-22435

VIRTUAL MEMORY SYSTEMS
Lightweight recoverable virtual memory
[AD-A270576] p 1898 N94-20107

VIRTUAL REALITY
A software architecture for the construction and management of real-time virtual worlds
[AD-A271465] p 1904 N94-20091

VISCOELASTICITY
Problems related to conservation laws: Phase transitions and viscoelasticity
[AD-A271429] p 1698 N94-19840

VISCOPLASTICITY
Life assessment of structural components using inelastic finite element analyses p 1834 N94-22614

VISCOSITY
A database of selected transport coefficients for combustion studies
[DE93-041278] p 1678 N94-19889
Measuring liquid properties with smooth and textured-surface resonators
[DE93-019433] p 1749 N94-20054
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Experiments with a fluid deicing system for cleaning laminar wings p 1640 N94-22601
Measurement of the influence of deicing liquids on aircraft aerodynamics p 1640 N94-22602
The relaxed state and entropy production due to the electric resistivity and viscosity of plasma
p 2010 N94-22696

VISCOUS FLOW
Time-accurate Navier-Stokes calculations with multigrid acceleration p 1956 N94-21469
Multigrid schemes for viscous hypersonic flows
p 1641 N94-21473
Surface path lines in plane Stokes flow driven by capillarity
[DE93-041277] p 1803 N94-21651
Unstructured low-Mach number viscous flow solver
p 1919 N94-22358
Robust unstructured grid generation with VGRID
p 1919 N94-22359
Cartesian-cell based grid generation and adaptive mesh refinement p 1920 N94-22364

VISIBILITY
Distribution of turbidity in Australian tropical waters
[AD-A271059] p 1881 N94-19905
Visibility considerations in frequency sharing with low Earth orbit satellites p 1746 N94-22187

VISIBLE SPECTRUM
Wavelength dependence of limb-darkening of Mars from visible and near-IR telescopic spectral imaging
p 2101 N94-20685
Visible-infrared properties of controlled laboratory soils
p 1685 N94-20689

VISION
Analysis of health status from preliminary physical examination of flight academy applicants
[AD-A267759] p 1889 N94-19962
Toward a neurobiological theory of visual attention
[AD-A270724] p 1890 N94-20112
Head-centered orientation strategies in animate vision
[TR-442] p 1894 N94-20520

VISUAL ACUITY
Analysis of health status from preliminary physical examination of flight academy applicants
[AD-A267759] p 1889 N94-19962

VISUAL AIDS
The manager's guide to NASA graphics standards
[NHB-1430.2] p 2042 N94-20306

VISUAL DISCRIMINATION
The 3-D Moons: The Voyager stereo atlas of the outer solar system p 2111 N94-20740

VISUAL OBSERVATION
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302

VISUAL PERCEPTION
On geometric and algebraic aspects of 3D affine and projective structures from perspective 2D views
[AD-A270520] p 1983 N94-19966
Head-centered orientation strategies in animate vision
[TR-442] p 1894 N94-20520
Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20627
A new procedure for orbit determination based on three lines of sight: Angles only
[AD-A272937] p 1652 N94-21224
Two-dimensional perception based on a laser rangefinder p 1786 N94-22202

VISUAL STIMULI
Motion sickness elicited by passive rotation in squirrel monkeys p 1887 N94-21905

VISUAL TASKS
Head-centered orientation strategies in animate vision
[TR-442] p 1894 N94-20520

Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20627

VITERBI DECODERS
High-speed Viterbi decoding with overlapping code sequences p 1760 N94-21130
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
Coded 64QAM using a binary convolutional code p 1747 N94-22223
Adaptive decoding of convolutional codes p 1793 N94-22246
Bidirectional algorithms for the decoding of convolutional codes over memoryless channels p 1793 N94-22247

VOCODERS
Data compression by using wavelet transforms and vector quantization
[AD-A272763] p 1738 N94-21182
Software implementation of an adaptive digital automatic level control p 1773 N94-22124

VOICE COMMUNICATION
Ground proximity warning system voice warning unit requirements study
[AD-A270541] p 1641 N94-19876
ATC/pilot voice communications: A survey of the literature
[DOT/FAA/AM-93/20] p 1738 N94-21201
Software implementation of an adaptive digital automatic level control p 1773 N94-22124

VOICE CONTROL
Representation of spoken words in a self-organizing neural net p 1940 N94-20243

VOICE DATA PROCESSING
Ground proximity warning system voice warning unit requirements study
[AD-A270541] p 1641 N94-19876
Data compression by using wavelet transforms and vector quantization
[AD-A272763] p 1738 N94-21182
Software implementation of an adaptive digital automatic level control p 1773 N94-22124

VOIDS
Experimental study of void formation during aluminum solidification in reduced gravity
[NASA-TM-106190] p 1692 N94-21604
Surface and subsurface defect detection in Si3N4 components by laser scattering
[DE93-040829] p 1832 N94-21772
Strength, ultrasonic and metallurgical evaluation of diffusion bonds
[DE94-000665] p 1697 N94-22571

VOLATILITY
Volatile CVD precursors based on copper alkoxides and mixed group 2A-copper alkoxides
[AD-D015930] p 1701 N94-20349
Volatility in the lunar crust: Trace element analyses of lunar minerals by PIXE proton microprobe p 2097 N94-20661
C-O volatiles in Apollo 15 and Apollo 17 picritic glasses p 1685 N94-20727
Volatile loss from accreting icy protoplanets p 2084 N94-20793
Impact-induced devolatilization of CaSO4 anhydrite and implications for K-T extinctions: Preliminary results p 2085 N94-20840

VOLCANOES
SO2 on Venus: IUE, HST and ground-based measurements, and the active volcanism connection p 2092 N94-20637
Geologic mapping of Northern Atla Regio on Venus: Preliminary data p 2095 N94-20654
Beta Regio rift system on Venus: Geologic interpretation of Magellan images p 2095 N94-20655
Beta Regio - Phoebe Regio on Venus: Geologic mapping with the Magellan data p 2096 N94-20656
Formation and evolution of radial fracture systems on Venus p 2099 N94-20672
Thermal and rheological controls on magma migration in dikes: Examples from the east rift zone of Kilauea volcano, Hawaii p 1862 N94-20673
Distribution of small volcanic cones on the surface of Venus by size and elevation: Implications for differential deposition of volcanic features p 2110 N94-20731
Volcanic rises on Venus: Geology, formation, and sequence of evolution p 2113 N94-20755
Basaltic magmatism on the Moon. A perspective from volcanic picritic glasses p 2114 N94-20758
Origin of the Apollo 15 very low Ti green glass. A perspective from the compositional diversity in the very low Ti glasses p 1685 N94-20759
Tumuli and tubes: Teaching scientific techniques p 2039 N94-20818
Elevation and igneous crater modification on Venus: Implications for magmatic volatile content p 2135 N94-20872
Formation of perched lava ponds on basaltic volcanoes: Interaction between cooling rate and flow geometry allows estimation of lava effusion rates p 1863 N94-20878
CO2 lidar observations of Mount Pinatubo debris: FIRE 2 and longer-term measurements p 1876 N94-22323

VOLCANOLOGY
A model for the origin of Martian polygonal terrain p 2090 N94-20393
Twenty-Fourth Lunar and Planetary Science Conference. Part 3: N-Z
[NASA-CR-193149] p 2092 N94-20636
SO2 on Venus: IUE, HST and ground-based measurements, and the active volcanism connection p 2092 N94-20637
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Thermal and rheological controls on magma migration in dikes: Examples from the east rift zone of Kilauea volcano, Hawaii p 1862 N94-20673
Mixing of a chemically buoyant layer at the top of a thermally convecting fluid: Implications for mantle dynamics with application to Venus p 2099 N94-20675
Spectral reflectance studies of the Humorum Basin region p 2101 N94-20682
Venus magmatic and tectonic evolution p 2101 N94-20683
A comparison of calculated and measured rheological properties of crystallising lavas in the field and in the laboratory p 1862 N94-20690
Eruption history of the Tharsis shield volcanoes, Mars p 2102 N94-20692
Geology of Biblis Patera, Ulysses Patera, and Jovis Tholus, Mars p 2103 N94-20693
Chronology, eruption duration, and atmospheric contribution of Apollinaris Patera, Mars p 2108 N94-20720
Distribution of small volcanic cones on the surface of Venus by size and elevation: Implications for differential deposition of volcanic features p 2110 N94-20731
Venus pancake dome formation: Morphologic effects of a cooling-induced variable viscosity during emplacement p 2110 N94-20732
Volcanic rises on Venus: Geology, formation, and sequence of evolution p 2113 N94-20755
Chronology and genesis of high-Ti mare volcanism: Melting of cogenetic depleted and enriched reservoirs p 2118 N94-20777
A tectonic resurfacing model for Venus p 2118 N94-20781
Parga and Hecate Chasmata, Venus: Structure, volcanism and models of formation p 2121 N94-20796
Are Plinian type eruptions possible on Venus? p 2123 N94-20803
Elevation and igneous crater modification on Venus: Implications for magmatic volatile content p 2135 N94-20872
Multispectral studies of selected crater- and basin-filling lunar Maria from Galileo Earth-Moon encounter 1 p 2136 N94-20876
Numerical simulation of lava flows: Applications to the terrestrial planets p 1863 N94-20904

VOLTAGE GENERATORS
High current injector for heavy ion fusion
[DE93-019241] p 1979 N94-20289

VOMITING
Susceptibility of the squirrel monkey to different motion conditions p 1885 N94-21899
Reassessment of area postrema's role in motion sickness and conditioned taste aversion p 1886 N94-21901
Detection of emetic activity in the cat by monitoring venous pressure and audio signals p 1886 N94-21903
Recovery of the vomiting reflex following area postrema ablation in squirrel monkeys p 1886 N94-21904
Area postrema ablations in cats: Evidence for separate neural routes for motion- and xylazine-induced CTA and emesis p 1887 N94-21906
Immunocytochemical localization of glutamic acid decarboxylase (GAD) and substance P in neural areas mediating motion-induced emesis: Effects of vagal stimulation on GAD immunoreactivity p 1887 N94-21909
The effects of area postrema lesions and selective vagotomy on motion-induced conditioned taste aversion p 1888 N94-21910
Experimental studies of gastric dysfunction in motion sickness: The effect of gastric and vestibular stimulation on the vagal and splanchnic gastric efferents p 1888 N94-21911
Role of the area postrema in three putative measures of motion sickness in the rat p 1888 N94-21912

VORTEX ALLEVIATION
Prediction and control of vortex-dominated and vortex-wake flows
[NASA-CR-194722] p 1637 N94-21054

VORTEX BREAKDOWN
Prediction and control of vortex-dominated and vortex-wake flows
[NASA-CR-194722] p 1637 N94-21054

VORTICES
Dynamics of vortices in superconductors
[DE93-019535] p 2011 N94-19808
Particle dispersion in turbulent sprays
[AD-A271314] p 1796 N94-19913
The fluid mechanics of vortex cutting by a blade
[AD-A270932] p 1636 N94-20043
A theoretical investigation of unsteady separation phenomena related to dynamic stall
[AD-A271865] p 1636 N94-20465
Processing of climatological data for model initialization
[AD-A271878] p 1865 N94-20487
Prediction and control of vortex-dominated and vortex-wake flows
[NASA-CR-194722] p 1637 N94-21054
Investigation of the physics of the turbulent boundary layer focusing on vortex structures
[AD-A272879] p 1802 N94-21155
Reaction zone models for vortex simulation of turbulent combustion
[AD-A272723] p 1681 N94-21213
On the stability of shear-Alfven vortices
[DE93-040912] p 1996 N94-21752
The effect of correlated and point defects on the vortex lattice melting transition in single crystal YBa2Cu3O(7-delta)
[DE93-040277] p 2033 N94-21997

VORTICITY
Direct simulation of shock-induced mixing layer
[DE93-040498] p 1803 N94-21531

VOYAGER 1 SPACECRAFT
A study of Saturn's E-ring particles using the Voyager 1 plasma wave instrument
[NASA-CR-194694] p 2088 N94-20048

VULNERABILITY
Current directions in the vulnerability/lethality process structure
[AD-A272836] p 1964 N94-21175

W

WAFERS
Metal-glass composite field-emitting arrays
[AD-D015942] p 1673 N94-20064
Process for the homoepitaxial growth of single-crystal silicon carbide films on silicon carbide wafers
[NASA-CASE-LEW-15223-1] p 2017 N94-20381
Attenuation of epsilon(sub eff) of coplanar waveguide transmission lines on silicon substrates p 1733 N94-20504
Analysis of cost: CVD diamond deposition
[AD-A271980] p 2018 N94-20616
Interfacial properties of diamondlike amorphous carbon films on InP: Metal-insulator-semiconductor structures p 1710 N94-20980

WAKES
Persistent wakefields associated with waveguide damping of higher order modes
[DE93-040973] p 1715 N94-19874
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
An integro-algebraic equation for high frequency wake fields in a tube with smoothly varying radius
[DE93-040940] p 1741 N94-21684
Modelling stalled airfoils
[ISBN-0-315-59525-6] p 1639 N94-22382
Recent ONERA contributions to the development of flight test measurement techniques p 1641 N94-22607

WALKING MACHINES
Simulation of tripod gaits for a hexapod underwater walking machine
[AD-A271719] p 1945 N94-21355
Robotic concepts for operation in barren terrain
[DE93-040539] p 1946 N94-21925

WALL FLOW
Principles and applications of oil film interferometry for measuring wall friction fields in air flows
[ETN-93-95062] p 1798 N94-20147
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels
[DE93-040181] p 1804 N94-21765

WALL PRESSURE
The effect of transverse curvature on the fluctuating wall pressure and structure of boundary layer turbulence
[AD-A271868] p 1800 N94-20466

WALL TEMPERATURE
Chemical reaction fouling model for single-phase heat transfer
[DE93-019556] p 1802 N94-20942
WALSH FUNCTION
Addition of decimal numbers in optical computing architecture by Walsh coded digits p 1773 N94-22122
WARFARE
Massachusetts Institute of Technology Lincoln Laboratory Journal volume 6, number 1, Spring 1993
[AD-A272273] p 1737 N94-20944
WARHEADS
N,N'-bis(4,4,4-trinitro butyryl) hydrazine
[AD-D015897] p 1712 N94-20122
WARNING SYSTEMS
Ground proximity warning system voice warning unit requirements study
[AD-A270541] p 1641 N94-19876
Evaluation of head injury criteria
[NIAR-93-2] p 1890 N94-20190
Army aircraft fire-detection systems operation and reliability
[AD-A271327] p 1641 N94-20912
Windshear detection for aircraft using temperature lapse rate
[CA-PATENT-1,295,736] p 1641 N94-21030
Initial laboratory evaluation of color video cameras, phase 2
[DE93-040201] p 1609 N94-21556
WASTE DISPOSAL
Current status of environmental, health, and safety issues of nickel metal-hydride batteries for electric vehicles
[DE93-017079] p 1748 N94-19902
Space Station trash removal system
[NASA-CASE-MSC-21723-1] p 1657 N94-20367
Automating the control of robotic systems in unstructured environments
[DE93-040753] p 1946 N94-21929
Environmental protection using social costing
[DE94-000492] p 1853 N94-22569
WASTE TREATMENT
Advanced Energy Projects, FY 1993
[DE94-000539] p 1847 N94-21755
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
Automating the control of robotic systems in unstructured environments
[DE93-040753] p 1946 N94-21929
WASTE UTILIZATION
First Biomass Conference of the Americas: Energy, Environment, Agriculture, and Industry, volume 2
[DE94-000435] p 1847 N94-21562
Current situation of development of petroleum substituting energies (Canada)
[DE94-707493] p 1849 N94-22014
WATER
Encounters of H and D atoms with O2 in water: Relative diffusion and reaction rates
[DE93-018587] p 1970 N94-19956
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
Monopropellant aqueous hydroxyl ammonium nitrate/fuel
[AD-D015922] p 1712 N94-20061
Atmospheric moisture collection device
[AD-D015935] p 1865 N94-20332
Hydrological consequences of ponded water on Mars p 2089 N94-20383
The fate of water deposited in the low-lying northern plains p 2089 N94-20387
Application of the reactive flux formalism to study water hydrogen bond dynamics
[AD-A271824] p 1680 N94-20560
Derivation of the midinfrared (5.0-25.0 micron) optical constants of hydrous carbonate and sulfate p 2108 N94-20723
High D/H ratios of water in magmatic amphiboles in Chassigny: Possible constraints on the isotopic composition of magmatic water on Mars p 2134 N94-20862
Evaluation of pre-extraction analytical holding times for nitroaromatic and nitramine explosives in water
[AD-A271547] p 1712 N94-20927
The hydrologic response of Mars to the onset of a colder climate and to the thermal evolution of its early crust p 2143 N94-21666
The early Martian environment: Clues from the cratered highlands and the Precambrian Earth p 2143 N94-21667
Core formation, wet early mantle, and H2O degassing on early Mars p 2145 N94-21674
Wet inside and out? Constraints on water in the Martian mantle and on outgassed water, based on melt inclusions in SNC meteorites p 2145 N94-21678
Modeling of outgassing and matrix decomposition in carbon-phenolic composites
[NASA-CR-194741] p 1676 N94-21743
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
Aircraft cabin water spray disbenefits study
[NASA-CR-194750] p 1642 N94-21818
Water-enhanced solvation of organics
[DE93-040297] p 1683 N94-21947
WATER COLOR
Optical climatology of the Northeast Pacific Ocean
[AD-A271671] p 1666 N94-20559
WATER DEPTH
Distribution of turbidity in Australian tropical waters
[AD-A271059] p 1881 N94-19905
A marine sedimentary model for the evolution of the northern plains p 2091 N94-20395
Discharge rates in Ma'adim Vallis, Mars p 2128 N94-20830
Green Sheet project: Dye sheet evolution
[AD-A272019] p 1883 N94-21443
WATER EROSION
Early Mars was wet but not warm: Erosion, fluvial features, liquid water habitats, and life below freezing p 2145 N94-21677
WATER FLOW
Ancient Martian valley genesis and paleoclimatic inference: The present as a key to the past p 2142 N94-21661
WATER IMMERSION
Investigation of cracking and erratic behavior of the uranium-titanium alloy
[DE93-018591] p 1686 N94-19957
WATER INJECTION
Thrust expansion engine
[AD-D015896] p 1669 N94-20121
Thrust augmentation options for the Beta 2 two-stage-to-orbit vehicle
[NASA-TM-106448] p 1648 N94-21563
Options for thrust augmentation for the Beta 2 two-stage-to-orbit launch vehicle
[NASA-TM-106418] p 1649 N94-21759
Performance calculations and research direction for a water enhanced regenerative gas turbine cycle
[DE93-019866] p 1826 N94-21983
WATER POLLUTION
Manual of DRANC (release 1.1): A computer program for the Dutch risk assessment of new chemical substances
[PB93-194827] p 1851 N94-19998
WATER QUALITY
Chromaticity analysis of LANDSAT multispectral scanner and thematic mapper imagery of Chilko Lake, British Columbia, using a theoretical optical water quality model
[ISBN-0-315-63832-X] p 1843 N94-22422
WATER RESOURCES
Integration opportunities for computer models, methods, and GIS used in Corps planning studies
[AD-A271714] p 2044 N94-21354
WATER TEMPERATURE
Early Mars was wet but not warm: Erosion, fluvial features, liquid water habitats, and life below freezing p 2145 N94-21677
WATER TREATMENT
Manual of DRANC (release 1.1): A computer program for the Dutch risk assessment of new chemical substances
[PB93-194827] p 1851 N94-19998
Plasma-chemical conversion of hydrogen sulfide into hydrogen and sulfur
[DE93-041167] p 1682 N94-21789
WATER VAPOR
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
Predicting lightning events in the KSC area: A feasibility study using single station data
[AD-A271440] p 1864 N94-20088
On demand, non-halon, fire extinguishing systems
[AD-D015957] p 1714 N94-20355
Diffusive redistribution of water vapor in the solar nebula revisited p 2113 N94-20751
Discovery Venera surface: Atmosphere geochemistry experiments mission concept p 2123 N94-20806
Analysis of the GOES 6.7 micrometer channel observations during FIRE 2 p 1875 N94-22316
Analysis of the tropospheric water distribution during FIRE 2 p 1876 N94-22324
A comparison of small and larger mesoscale latent heat and radiative fluxes: December 6 case study p 1879 N94-22335
Studies in remotely sensed geophysical parameter retrieval and analysis
[NASA-CR-194768] p 1842 N94-22374
Temperature/pressure and water vapor sounding with microwave spectroscopy p 1812 N94-22436
WATER WAVES
SIMBAT theoretical manual
[AD-A271063] p 1882 N94-19979
ERS-1 and Seasat scatterometer measurements of ocean winds: Model functions and the directional distribution of short waves p 1720 N94-20412
Analysis of Ku-band cross section at low incidence angles p 1720 N94-20414
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms p 1726 N94-20439
Ocean wave height transformation model using surface roller theory
[AD-A272610] p 1883 N94-21423
WAVE ATTENUATION
Relationship of attenuation in a vegetation canopy to physical parameters of the canopy p 1729 N94-20450
WAVE DIFFRACTION
Nonlinear acoustics: Periodic waveguide, finite-amplitude propagation in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A270530] p 1967 N94-19694
An extended UTD analysis for the scattering and diffraction from cubic polynomial strips
[NASA-CR-194581] p 1716 N94-20139
RCS Analysis of Plate Geometries, parts 1 and 2
[NASA-CR-194173] p 1717 N94-20269
High-frequency techniques for RCS prediction of plate geometries p 1717 N94-20270
A physical optics/equivalent currents model for the RCS of trihedral corner reflectors p 1717 N94-20271
WAVE DISPERSION
Time-resolved shock compression of porous rutile: Wave dispersion in porous solids
[DE93-018848] p 1829 N94-19927
Birefringence control and dispersion characteristics of silicon oxynitride optical waveguides, appendix 6 p 1989 N94-21600
First principles calculations for analysis martensitic transformations
[DE94-000666] p 1695 N94-21964
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385
ASpect: A new spectrum and line analysis package for IRAF p 1926 N94-22485
WAVE EQUATIONS
Variable-permittivity linear inverse problem for the H(sub z)-polarized case p 1719 N94-20408
Interface reflection of spherical acoustic waves in the first- and second-order rational parabolic approximations and their artifacts
[PB93-215424] p 1969 N94-22261
WAVE FRONTS
Feedback controlled optics with wavefront compensation
[NASA-CASE-NPO-18194-1-CU] p 1985 N94-20305
WAVE FUNCTIONS
An introduction to GUGA in the COLUMBUS Program System
[DE93-018^94] p 1902 N94-19928
Qualitative and quantitative aspects of the QCD theory of elastic form factors
[DE93-040864] p 2038 N94-21513
Photoabsorption and Compton scattering in ionization of helium at high photon energies
[DE94-000380] p 1974 N94-21658
Single and double ionization of helium by high-energy photon impact
[DE94-000381] p 1975 N94-21785
Simulating the Euclidean time Schroedinger equations using an INTEL iPSC/860 hypercube: Application to the t-J model of high-T(sub c) superconductivity
[DE94-000489] p 2035 N94-22385
WAVE INTERACTION
Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729
WAVE PROPAGATION
Spatial patterns in semiconductor lasers
[DE93-040056] p 1814 N94-19865
Nonlinear acoustics: Periodic waveguide, finite-amplitude propagation in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A270530] p 1967 N94-19694
Proceedings of the 15th Annual Seismic Research Symposium
[AD-A271458] p 1855 N94-20090
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-000740] p 1799 N94-20351

The effect of dissipative inhomogeneous medium on the statistics of the wave intensity p 1726 N94-20440
Laser propagation in underdense plasmas: Scaling arguments
[DE93-040439] p 1816 N94-20480
Mathematical model and analysis of the Tactical Unmanned Ground Vehicle (TUGV) using computer simulation
[AD-A272258] p 1824 N94-20576
Asteroid collisions: Target size effects and resultant velocity distributions p 2083 N94-20729
Analysis of the effects of eurasian crustal and upper mantel structure on regional phases using broadband seismic data
[AD-A272446] p 1858 N94-21206
Dynamic response of multiphase porous media
[AD-A272915] p 1831 N94-21219
The Board on Earth sciences and resources
[DE94-000745] p 1859 N94-22018
Time-laplace-transform-domain analysis of wave propagation in planar waveguides
[PB93-215226] p 1960 N94-22096
Lidar and radar derived cirrus microphysical properties for the 26 November 1991 case study
p 1873 N94-22305
Observations of multi-layered clouds using K-band radar p 1874 N94-22311
Radio wave propagation studies along an Earth-space satellite link
[ISBN-0-315-60627-4] p 1742 N94-22408
Theory and simulation of plasma sheath waves
[DE94-001305] p 1999 N94-22567
Theory of leaked auroral kilometric radiation
p 2003 N94-22649
Enhanced absorption of p-modes on sunspot and plage regions p 2006 N94-22671

WAVE REFLECTION
A physical optics/equivalent currents model for the RCS of trihedral corner reflectors p 1717 N94-20271

WAVE SCATTERING
RCS Analysis of Plate Geometries, parts 1 and 2
[NASA-CR-194173] p 1717 N94-20269
A physical optics/equivalent currents model for the RCS of trihedral corner reflectors p 1717 N94-20271
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20406
Hadronic molecules and scattering amplitudes from the nonrelativistic quark model
[DE94-000377] p 1974 N94-21657
Continuous-time discretized-space approach to modeling short-pulse propagation and scattering
[PB93-215259] p 1742 N94-22347

WAVEFORMS
A study of Saturn's E-ring particles using the Voyager 1 plasma wave instrument
[NASA-CR-194694] p 2088 N94-20048
Optimal convolution SOR acceleration of waveform relaxation with application to semiconductor device simulation p 1922 N94-21475
Optimization and control of a small angle ion source using an adaptive neural network controller
[DE93-040063] p 1946 N94-21845
A framework of connectionist network toward speech waveform coding p 1746 N94-22211

WAVEGUIDE ANTENNAS
Recent activities in printed Antennas at LeRC
p 1722 N94-20422
Slot-coupled patch antenna with coplanar waveguide feed p 1734 N94-20506

WAVEGUIDE FILTERS
A simplified method for S-parameter calculations of metal septum waveguide filters p 1782 N94-22180

WAVEGUIDES
Persistent wakefields associated with waveguide damping of higher order modes
[DE93-040973] p 1715 N94-19874
Process to fabricate thick coplanar microwave electrode structures
[AD-D015913] p 1748 N94-19892
Nonlinear acoustics: Periodic waveguide, finite-amplitude propagation in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A270530] p 1967 N94-19894
FD-TD modeling of 2-D dielectric waveguides for propagation and scattering of femtosecond optical solitons p 1719 N94-20406
A comprehensive theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20500
A comparative study between shielded and open coplanar waveguide discontinuities
p 1733 N94-20501
A theoretical and experimental study of coplanar waveguide shunt stubs p 1733 N94-20502
Coplanar waveguide radial line stub
p 1733 N94-20503
Attenuation of epsilon(sub eff) of coplanar waveguide transmission lines on silicon substrates
p 1733 N94-20504
Slot-coupled patch antenna with coplanar waveguide feed p 1734 N94-20506
Hybrid finite element/waveguide mode analysis of passive RF devices
[AD-A273074] p 1740 N94-21518
Polyimide-based electrooptic materials
[DE93-019416] p 1706 N94-21526
Simulation of traveling-wave output structures for high power RF tubes
[DE93-041005] p 1763 N94-21685
On the relationship between spectral domain approach and method of lines p 1794 N94-22254

WAVELENGTHS
Surface-induced brightness temperature variations and their effects on detecting thin cirrus clouds using IR emission channels in the 8-12 micrometer region
p 1880 N94-22341

WAVELET ANALYSIS
Convergence of the hermite wavelet expansion
[AD-A271435] p 1854 N94-19841
On the spline-based wavelet differentiation matrix
[NASA-CR-191557] p 1950 N94-20087
Rough surface scattering from moving ocean surfaces as an indicator of scattering mechanisms
p 1726 N94-20439
Signal processing in the linear statistical model
[AD-A272114] p 1736 N94-20570
An inverse DWT for nonorthogonal wavelets
[AD-A272064] p 1737 N94-20582
Use of switched capacitor filters to implement the discrete wavelet transform p 1755 N94-21097
Data compression by using wavelet transforms and vector quantization
[AD-A272763] p 1738 N94-21182
A multiresolution wavelet representation in two or more dimensions p 1925 N94-22456

WAVERIDERS
Optimization and performance analysis of a supersonic conical-flow waverider for a deck-launched intercept mission
[AD-A272498] p 1648 N94-21433

WEAK INTERACTIONS (FIELD THEORY)
Summary of the Hadronic Weak Interaction session
[DE94-000592] p 1975 N94-21775

WEAPON SYSTEMS
Tactical laser weapons and other directed-energy weapons
[AD-A267961] p 1816 N94-20484

WEAPONS
Chemistry and materials science
[DE94-001449] p 2152 N94-21858

WEAR
Microscopic modeling of tribological and interfacial phenomena
[AD-A271864] p 1823 N94-20464
Development of fundamental understanding of friction and wear mechanisms by atomic-scale tribological studies of ceramic materials and multilayered thin films
[AD-A271485] p 1703 N94-20548
Lubricated wear of steel-ceramic and ceramic-ceramic systems
[PB93-202356] p 1825 N94-21450
Vapor-delivered lubrication of steel-steel and steel-ceramic systems
[PB93-202364] p 1825 N94-21451
Detailed study of oxidation/wear mechanism in lox turbopump bearings
[NASA-TM-108434] p 1825 N94-21580
Brush seal bristle flexure and hard-rub characteristics
p 1654 N94-21791
Integrity testing of brush seal in a T-700 engine
p 1654 N94-21792
Dynamics of face seals for high speed turbomachinery
p 1655 N94-21796

WEAR INHIBITORS
The use of screening tests in spacecraft lubricant evaluation
[AD-A272943] p 1705 N94-21225

WEAR TESTS
Lubricated wear of steel-ceramic and ceramic-ceramic systems
[PB93-202356] p 1825 N94-21450

WEATHER
An analysis of cloud-cover reporting in the 1977 surface observation database
[AD-A271102] p 1864 N94-19852
Analysis of a sandstorm weather process-translation
[AD-A272959] p 1867 N94-21250
Parallel runway requirement analysis study. Volume 1: The analysis
[NASA-CR-191549-VOL-1] p 1644 N94-22277

WEATHER FORECASTING
Clouds: Their prediction and simulation
[AD-A271161] p 1864 N94-19900
Offshore decision support system: ERS-1 pilot project WAVEWATCH
[BCRS-92-09] p 1865 N94-20532
Weather tutor 1: Stability basics
[AD-A270758] p 1866 N94-20565
Drought early warning system for crop production
p 1840 N94-20966
Simulated real-time intercomparison of hydrological models
[WMO-779] p 1867 N94-21070
Incorporation and comparative evaluation of a non-convective cloud parameterization scheme in the Naval Research Laboratory west coast mesoscale weather prediction model
[AD-A272417] p 1867 N94-21146
A retrieval error analysis technique for passive infrared atmospheric sounders
[AD-A272618] p 1867 N94-21212
Mesoscale simulations of the November 25-26 and December 5-6 cirrus cases using the RAMS model
p 1878 N94-22331

WEATHER STATIONS
Cloud fields derived from satellite and surface data during FIRE cirrus phase 2 p 1872 N94-22302

WEATHERING
Optical effects of space weathering on lunar soils and the role of the finest fraction p 2101 N94-20687
Local topography of Mars and its relationship to surface weathering processes p 2111 N94-20737
The role of CO2 in weathering reactions and the presence of S2 on Venus: Implications for the pyrite stability field p 2122 N94-20799
Weathering features and secondary minerals in Antarctic Shergottites ALHA77005 and LEW88516
p 2086 N94-20869
K, U, and Th behavior in Martian environmental conditions p 2141 N94-20908
Oxidation of dissolved iron under warmer, wetter conditions on Mars: Transitions to present-day arid environments p 2143 N94-21663
An attempt to comprehend Martian weathering conditions through the analysis of terrestrial palagonite samples p 2143 N94-21668

WEIGHT ANALYSIS
Nonlinear aerodynamics and the design of wing tips
[NASA-CR-194732] p 1638 N94-21833

WEIGHT REDUCTION
Nonlinear aerodynamics and the design of wing tips
[NASA-CR-194732] p 1638 N94-21833

WEIGHTING FUNCTIONS
A weighted least-squares lump correction algorithm for transmission-corrected gamma ray nondestructive assay
[DE93-018474] p 1904 N94-20049
Smoothed-particle hydrodynamics and nonequilibrium molecular dynamics
[DE94-001059] p 1977 N94-22400

WEIGHTLESSNESS
Apparatus and method for measuring subject work rate on an exercise device
[NASA-CASE-MSC-21752-1] p 1895 N94-20194

WELD TESTS
Thermocapillary and arc phenomena in stainless steel welds
[DE94-000518] p 1821 N94-19859
Microscopic evaluation of low-temperature embrittlement in type 308 stainless steel welds
[DE93-040266] p 1690 N94-20282

WELDED JOINTS
Thermocapillary and arc phenomena in stainless steel welds
[DE94-000518] p 1821 N94-19859
Microscopic evaluation of low-temperature embrittlement in type 308 stainless steel welds
[DE93-040266] p 1690 N94-20282
Shape memory metals
[DE94-001373] p 1695 N94-21976
Evaluation of non-chromium-containing deoxidizers for aluminum
[DE94-001377] p 1695 N94-21978

WENTZEL-KRAMER-BRILLOUIN METHOD
Spiral Alfven instability in accretion disks
p 2010 N94-22698

WESTERN HEMISPHERE
Research program on the Manson impact structure, Iowa p 1862 N94-20766

WETTING
Experimental study of void formation during aluminum solidification in reduced gravity
[NASA-TM-106190] p 1692 N94-21604

WHISKER COMPOSITES
Deformation of an alumina-zirconia-silicon carbide-whisker reinforced composite
[DE93-040244] p 1676 N94-21559

Fabrication of whisker-toughened alumina tubes
[DE94-001012] p 1677 N94-22022

WHISPERING GALLERY MODES
An extended UTD analysis for the scattering and diffraction from cubic polynomial strips
[NASA-CR-194581] p 1716 N94-20139
Modelling short bent, graded index dielectric slab waveguides
[PB93-215283] p 1742 N94-22349

WHITE NOISE
Comparison of higher order moment spectrum estimation techniques
[AD-A272967] p 1967 N94-21260
A comparative robustness evaluation of feedforward neurofilters
[NASA-TM-106440] p 1650 N94-21742

WIDE ANGLE LENSES
Wide-angle imaging system with fiberoptic components providing angle-dependent virtual material stops
[NASA-CASE-NPO-18146-1-CU] p 1986 N94-20345
Internal camera calibration using rotation and geometric shapes
[AD-A272718] p 1808 N94-21167

WIDMANSTATTEN STRUCTURE
Tambo Quemado: Extraordinary concentrations of REE and refractory trace elements caused by artificial heating p 1684 N94-20667

WIENER HOPF EQUATIONS
A two-dimensional kinetic model of the scrape-off layer
[DE94-001235] p 1999 N94-22562

WIGGLER MAGNETS
Measurement and correction of magnetic fields in pulsed slotted-tube microwigglers
[DE93-040100] p 1815 N94-20272
Demonstration of ultraviolet lasing with a low energy electron beam
[DE93-040192] p 1818 N94-21554
Generation of harmonic radiation using the multi-cavity free-electron laser
[DE94-001261] p 1820 N94-21975

WIND (METEOROLOGY)
Dynamics Explorer 2: Continued FPI and NACS instrument data analysis and associated scientific activity at the University of Michigan
[NASA-CR-194689] p 1657 N94-20173
ERS-1 and Seasat scatterometer measurements of ocean winds: Model functions and the directional distribution of short waves p 1720 N94-20412
Offshore decision support system: ERS-1 pilot project WAVEWATCH
[BCRS-92-09] p 1865 N94-20532
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918

WIND DIRECTION
Predicting lightning events in the KSC area: A feasibility study using single station data
[AD-A271440] p 1864 N94-20088
Analysis of wind observation from towers in the period 1977-1991
[KNMI-TR-148] p 1865 N94-20239
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
The sea breeze convergence zone and its relationship to fair weather electricity in east central Florida
[AD-A268511] p 1868 N94-21502

WIND EFFECTS
Wind chill: The temperature feeling caused by the wind velocity
[KNMI-TR-103A] p 1890 N94-20238

WIND EROSION
Geomorphic evidence for an eolian contribution to the formation of the Martian northern plains p 2092 N94-20402

WIND MEASUREMENT
Rotorwash wind sensor evaluation
[AD-A268987] p 1807 N94-20203
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Description and availability of airborne Doppler radar data p 1722 N94-20419
Low-altitude cross-wind velocity measurements using pulsed visible fringe-type laser anemometry
[ISL-CO-216/92] p 1866 N94-20557
Presenting the Rain-Sea Interaction Facility
[NASA-RP-1322] p 1884 N94-21628
Vertical velocity in cirrus case obtained from wind profiler p 1878 N94-22330

WIND PROFILES
Empirical wind model for the middle and lower atmosphere. Part 2: Local time variations
[NASA-TM-104592] p 1870 N94-21862
Vertical velocity in cirrus case obtained from wind profiler p 1878 N94-22330

WIND SHEAR
Coherent lidar design and performance verification
[NASA-CR-193813] p 1816 N94-20341
Integrated display of multi-sensor geophysical and electromagnetic flight data p 1721 N94-20418
Description and availability of airborne Doppler radar data p 1722 N94-20419
Windshear detection for aircraft using temperature lapse rate
[CA-PATENT-1,295,736] p 1641 N94-21030
Optimal flight guidance for aircraft in windshear
[CA-PATENT-1,307,573] p 1650 N94-21050

WIND TUNNEL MODELS
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
Improved ceramic slip casting technique --- application to aircraft model fabrication
[NASA-CASE-LAR-14471-1] p 1702 N94-20377

WIND TUNNEL TESTS
Development and operation of the F/A-18 model control surface actuators
[AD-A271330] p 1645 N94-19914
Description and assessment of a new Optical Pressure Measurement System (OPMS) demonstrated in the high speed wind tunnel in Goettingen (Germany)
[DLR-FB-92-24] p 1651 N94-21280
Measurement and prediction of the flow through an annular turbine cascade
[AD-A272530] p 1803 N94-21417
A study of the compressible flow through a diffusing S-duct
[NASA-TM-106411] p 1638 N94-21591
Near wake measurements on a rotor model with Mie-vanes in the Delft open jet tunnel
[PB93-215382] p 1638 N94-22260
Testing of a multisensor hot film technique in wind tunnel and free flight p 1639 N94-22599

WIND TURBINES
Wind energy: Program overview, FY 1992
[DE93-000056] p 1845 N94-19921
Derivation of a model of the exciter of a brushless synchronous machine
[EUT-92-E-258] p 1761 N94-21538
The FY1992 survey on multi-purpose dam and energy utilization system by the wind power generation eration
[DE94-707408] p 1848 N94-22012
Near wake measurements on a rotor model with Mie-vanes in the Delft open jet tunnel
[PB93-215382] p 1638 N94-22260

WIND VANES
Rotorwash wind sensor evaluation
[AD-A268987] p 1807 N94-20203

WIND VELOCITY
Rotorwash wind sensor evaluation
[AD-A268987] p 1807 N94-20203
Wind chill: The temperature feeling caused by the wind velocity
[KNMI-TR-103A] p 1890 N94-20238
Analysis of wind observation from towers in the period 1977-1991
[KNMI-TR-148] p 1865 N94-20239
ERS-1 and Seasat scatterometer measurements of ocean winds: Model functions and the directional distribution of short waves p 1720 N94-20412
Ku-band ocean radar backscatter observations during SWADE p 1720 N94-20413
Comparison of remote sensing measurements with a two-scale polarimetric emission and scattering model for sea surfaces p 1721 N94-20415
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918
Airborne surface backscattering strength measurements in the western Atlantic Ocean
[AD-A271737] p 1883 N94-21358
Vertical velocity in cirrus case obtained from wind profiler p 1878 N94-22330

WIND VELOCITY MEASUREMENT
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918

WINDING
Counter-balanced, multiple cable construction crane
[NASA-CASE-LAR-14565-1-CU] p 1822 N94-20369
Theoretical and experimental study of the winding of a thin plastic film: The role of aerodynamic effects
[ECL-93-04] p 1703 N94-20599

WINDOWS (COMPUTER PROGRAMS)
Design and implementation of a prototype PC based graphical and interactive MILSATCOM requirements database system
[AD-A272960] p 1658 N94-21251
Enhanced networks operations using the X Window System p 1932 N94-21329
Conversion and maintenance of Co-oP for Windows
[AD-A272513] p 1914 N94-21414
VETA x ray data acquisition and control system p 2047 N94-22455
Tools for the IDL widget set within the X-windows environment p 1927 N94-22538

WINDPOWER UTILIZATION
Wind energy: Program overview, FY 1992
[DE93-000056] p 1845 N94-19921
The FY1992 survey on multi-purpose dam and energy utilization system by the wind power generation eration
[DE94-707408] p 1848 N94-22012
Current situation of development of petroleum substituting energies (Canada)
[DE94-707493] p 1849 N94-22014

WINDPOWERED PUMPS
The FY1992 survey on multi-purpose dam and energy utilization system by the wind power generation eration
[DE94-707408] p 1848 N94-22012

WING TIPS
Nonlinear aerodynamics and the design of wing tips
[NASA-CR-194732] p 1638 N94-21833

WINGS
Experimental study on interference aerodynamics of close-coupled canard configuration
[AD-A267760] p 1636 N94-19963
Nonlinear aerodynamics and the design of wing tips
[NASA-CR-194732] p 1638 N94-21833
Dynamic mesh adaption for triangular and tetrahedral grids p 1920 N94-22363

WINTER
C-band radar backscatter of sea ice in the Weddell Sea, Antarctica during the austral winter of 1992 p 1725 N94-20435

WIRE
Superconductivity Technology Program for Electric Power Systems: Proceedings
[DE93-040074] p 2011 N94-19825
Automated HMC assembly
[DE93-040641] p 1749 N94-20005
Flexible heating head for induction heating
[NASA-CASE-LAR-14418-15-B] p 1718 N94-20368
Wire assembly for electrically conductive circuits
[AD-D015966] p 1761 N94-21275

WIRELESS COMMUNICATION
Digital wireless control system
[DE93-040211] p 1714 N94-19946

WORDS (LANGUAGE)
A computational theory of lexical relatedness
[TR-421] p 1904 N94-20067
Connectionism and Natural Language Processing
[MEMO-INF-92-64] p 1940 N94-20242
Representation of spoken words in a self-organizing neural net p 1940 N94-20243
An exploration of clause boundary effects in SRN representations p 1937 N94-20253
On the topological size of p-m-complete degrees
[TR-459] p 1965 N94-21286
Application of a back-propagation neural network to isolated-word speech recognition
[AD-A272495] p 1945 N94-21430
Procedural dynamic semantics, verb-phrase ellipsis, and presupposition
[CWI-CS-R9311] p 1914 N94-21495
Recognizing hesitation phenomena in continuous, spontaneous speech p 1746 N94-22210

WORK-REST CYCLE
Physiological efficacy of a lightweight ambient air cooling unit for various applications
[AD-A272952] p 1896 N94-21247

WORKING FLUIDS
EHD enhancement of pool and in-tube boiling of alternate refrigerants
[DE94-000787] p 1798 N94-20101
System and method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-1] p 1801 N94-20588

WORKLOADS (PSYCHOPHYSIOLOGY)
Cognition and the brain: A continuation of the university research initiative at New York University
[AD-A271872] p 1894 N94-20467
Reducing the cognitive workload: Trouble managing power systems
[NASA-TM-106413] p 1714 N94-21564

WORKSTATIONS
Multiple-fold clustered processor mesh array p 1757 N94-21113
Evaluation of DEC's GIGAswitch for distributed parallel computing
[DE94-001356] p 1936 N94-21853
Use of open systems for control, analysis, and data acquisition of the DIII-D tokamak
[DE94-001101] p 1998 N94-22069
Seeing the forest for the trees: Networked workstations as a parallel processing computer p 1938 N94-22454

The University of Hawaii Institute for Astronomy CCD camera control system p 1828 N94-22489
An object-oriented approach for supporting both X and terminal interfaces p 1926 N94-22491
CCD data acquisition systems at Lick and Keck Observatories p 2047 N94-22495

WOUND HEALING
Development of bioelastic material for aspects of wound repair
[AD-A267832] p 1673 N94-20208
Non-ionic surfactants in the treatment of third degree burns
[AD-A271582] p 1891 N94-21035
Enhancement of wound healing by biosynthetic growth factor
[AD-A272517] p 1892 N94-21415

WOVEN COMPOSITES
Intercalated hybrid graphite fiber composite
[NASA-CASE-LEW-15241-1] p 1673 N94-20539

WRINKLING
The effects of processing and constituent materials on compressive strength of thick composite laminates
[AD-A271912] p 1673 N94-20490
Theoretical and experimental study of the winding of a thin plastic film: The role of aerodynamic effects
[ECL-93-04] p 1703 N94-20599

WROUGHT ALLOYS
Microstructural stability of wrought, laser and electron beam glazed NARloy-Z alloy at elevated temperatures
[NASA-TM-108431] p 1689 N94-20100

X

X RAY ABSORPTION
Magnetic circular dichroism in x ray absorption and core-level photoemission
[DE93-019381] p 1688 N94-19986
The use of x ray techniques in the in situ study of corrosion
[DE93-019845] p 1690 N94-20301
The x ray microprobe determination of chromium oxidation state in olivine from lunar basalt and kimberlitic diamonds p 1686 N94-20807
Microanalysis of iron oxidation state in iron oxides using X Ray Absorption Near Edge Structure (XANES) p 1686 N94-20808
Observation of x ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers
[DE94-000303] p 1694 N94-21944

X RAY ANALYSIS
Quantitative evaluation of material composition of composites using x ray energy-dispersive NDE technique
[DE93-041157] p 1672 N94-19888
Near atomic resolution microanalysis of interfaces by analytical electron microscopy
[DE93-019437] p 1687 N94-19904
The use of x ray techniques in the in situ study of corrosion
[DE93-019845] p 1690 N94-20301
Spatial organization of polymer chains in a crystallizable diblock polyethylene and polystyrene
[AD-A271662] p 1702 N94-20463
The x ray microprobe determination of chromium oxidation state in olivine from lunar basalt and kimberlitic diamonds p 1686 N94-20807
X ray analysis of alpha mercuric iodide crystal structure and processing effects
[DE93-017620] p 2027 N94-21296
X ray characterization of a three-element condenser system for soft x ray projection lithography
[DE93-019916] p 1990 N94-21985
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461

X RAY APPARATUS
Characterization and possible repair of defects in soft x ray projection lithography masks
[DE93-019147] p 1750 N94-20231

X RAY ASTRONOMY
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
A deep x ray survey in the Lockman hole and the soft x ray log N - log S
[NASA-CR-194698] p 2054 N94-20174
X ray archeology in the Coma cluster
[NASA-CR-194799] p 2054 N94-20175
Pre-main sequence stars in the Chamaeleon cloud and pre-main sequence stars in the Rho Ophiuchi cloud core
[NASA-CR-194713] p 2080 N94-20337
Studies of an x ray selected sample of cataclysmic variables
[NASA-CR-194773] p 2055 N94-20344
High-energy astrophysics: A theoretical analysis of thermal radiation from neutron stars
[NASA-CR-194808] p 2055 N94-20952
Dust content of a hydrogen rich, low surface brightness galaxy and the luminosity history of 3C273
[NASA-CR-194705] p 2056 N94-21779
ROSAT implementation of a proposed multi-mission x ray data format p 2047 N94-22462
Detection of x ray sources in PROS p 2062 N94-22466
SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486
ROSAT data analysis with EXSAS p 2080 N94-22555
Results from ROSAT p 2000 N94-22630
Time variations of x rays from black hole candidates: Canonical time variations in high and low intensity states p 2009 N94-22690

X RAY ASTROPHYSICS FACILITY
VETA x ray data acquisition and control system p 2047 N94-22455

X RAY BINARIES
Studies of an x ray selected sample of cataclysmic variables
[NASA-CR-194773] p 2055 N94-20344
Accretion disks in bright x ray binaries p 2002 N94-22639
Structure of accretion plasmas of x ray binary pulsars in MHD turbulence p 2007 N94-22679

X RAY DETECTORS
Quantitative evaluation of material composition of composites using x ray energy-dispersive NDE technique
[DE93-041157] p 1672 N94-19888
Energy-resolving x ray detectors with charge amplification due to multiple quasiparticle tunneling
[DE93-019506] p 2031 N94-21869
Detection of x ray sources in PROS p 2062 N94-22466

X RAY DIFFRACTION
Metastable bcc phase formation in the Nb-Cr system
[DE93-018376] p 2012 N94-19926
Synchrotron x ray diffraction analysis of photorefractive crystals and their gratings
[AD-A271176] p 2015 N94-20213
Variable angle spectroscopic ellipsometric characterization of surface damage in chemical-mechanical polished GaAs p 1710 N94-20986
Material optimization for hard x ray Fresnel zone plates
[DE93-019569] p 1990 N94-21837

X RAY FLUORESCENCE
The use of x ray techniques in the in situ study of corrosion
[DE93-019845] p 1690 N94-20301
Wavelength dispersive analysis with the synchrotron x ray fluorescence microprobe p 1685 N94-20717
Combined backscatter Moessbauer spectrometer/x ray fluorescence analyzer (BaMS/XRF) for extraterrestrial surfaces p 1686 N94-20761
Diffraction and holography of photoelectrons and fluorescent x rays
[DE93-019240] p 1808 N94-21441

X RAY IMAGERY
An assessment of COMSCAN, a Compton backscatter imaging camera, for the one-sided non-destructive inspection of aerospace components
[AD-A271331] p 1806 N94-19837
Pre-main sequence stars in the Chamaeleon cloud and pre-main sequence stars in the Rho Ophiuchi cloud core
[NASA-CR-194713] p 2080 N94-20337
High resolution, three dimensional soft x ray imaging
[DE93-018667] p 1989 N94-21630
Material optimization for hard x ray Fresnel zone plates
[DE93-019569] p 1990 N94-21837
Center for X-Ray Optics, 1992
[DE94-000726] p 1990 N94-21868
Some experiments on using backscattered electron and energy dispersive x ray imaging in determination of portland cement clinker phase composition p 1708 N94-21893
The ALEXIS data processing package: An IDL based system p 2047 N94-22453

X RAY INSPECTION
An assessment of COMSCAN, a Compton backscatter imaging camera, for the one-sided non-destructive inspection of aerospace components
[AD-A271331] p 1806 N94-19837

X RAY LASERS
PVDF gauge characterization of hypervelocity-impact-generated debris clouds
[DE93-018831] p 1829 N94-19943
Applications and source development for high-repetition rate x ray lasers
[DE93-019547] p 1815 N94-20259
Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298
Generation of intense ultrashort x ray pulses
[DE93-019607] p 1817 N94-21299
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958

X RAY OPTICS
Center for X-Ray Optics, 1992
[DE94-000726] p 1990 N94-21868
X ray characterization of a three-element condenser system for soft x ray projection lithography
[DE93-019916] p 1990 N94-21985

X RAY SCATTERING
An assessment of COMSCAN, a Compton backscatter imaging camera, for the one-sided non-destructive inspection of aerospace components
[AD-A271331] p 1806 N94-19837
Oxidation-reduction induced roughening of platinum (111) surface
[DE93-017408] p 1687 N94-19922
Spatial organization of polymer chains in a crystallizable diblock polyethylene and polystyrene
[AD-A271662] p 1702 N94-20463
The x ray halo of Cen X-3
[NASA-CR-189309] p 2055 N94-21295
Laser Raman and x ray scattering studies of corrosion films on metals
[DE93-040243] p 1692 N94-21558

X RAY SOURCES
The x ray halo of AM Her
[NASA-CR-189310] p 2054 N94-20142
Applications and source development for high-repetition rate x ray lasers
[DE93-019547] p 1815 N94-20259
Pre-main sequence stars in the Chamaeleon cloud and pre-main sequence stars in the Rho Ophiuchi cloud core
[NASA-CR-194713] p 2080 N94-20337
Studies of an x ray selected sample of cataclysmic variables
[NASA-CR-194773] p 2055 N94-20344
The x ray halo of Cen X-3
[NASA-CR-189309] p 2055 N94-21295
Generation of intense ultrashort x ray pulses
[DE93-019607] p 1817 N94-21299
The distribution of dark matter in the A2256 cluster
[NASA-CR-194699] p 2055 N94-21579
Dust content of a hydrogen rich, low surface brightness galaxy and the luminosity history of 3C273
[NASA-CR-194705] p 2056 N94-21779
Parametric instabilities in picosecond time scales
[DE94-000384] p 1966 N94-21958
CCD surface photometry of galaxies p 2058 N94-22445
The ALEXIS data processing package: An IDL based system p 2047 N94-22453
Detection of x ray sources in PROS p 2062 N94-22466
Spatial region filtering in IRAF/PROS p 1927 N94-22524
Results from ROSAT p 2000 N94-22630
Highlights of Yohkoh results p 2001 N94-22632
Thermal properties and radiation processes in astrophysical plasmas p 2002 N94-22640

X RAY SPECTRA
SPIKE: Application for ASTRO-D mission planning p 1926 N94-22486
Pair plasmas in the central engine of active galactic nuclei p 2002 N94-22641
Vertical structure of accretion disks p 2002 N94-22645
Non-equilibrium ionization in an M class solar flare p 2004 N94-22653
Properties of x ray emission from x ray novae p 2007 N94-22676
Structure of accretion plasmas of x ray binary pulsars in MHD turbulence p 2007 N94-22679
Time variations of x rays from black hole candidates: Canonical time variations in high and low intensity states p 2009 N94-22690
Time variation of MHD accretion onto a black hole p 2009 N94-22692
Shock formation in magnetohydrodynamical accretion onto a black hole p 2010 N94-22699

X RAY SPECTROSCOPY
Alumoxanes: Rationalization of black box materials
[AD-A272805] p 1704 N94-21170
Asbestos characterization using scanning electron microscopy/light element x ray spectrometry
[AD-A271611] p 1681 N94-21241
Center for X-Ray Optics, 1992
[DE94-000726] p 1990 N94-21868

X RAY STARS
Time variations of x rays from black hole candidates: Canonical time variations in high and low intensity states p 2009 N94-22690

X RAY TELESCOPES
The ALEXIS data processing package: An IDL based system p 2047 N94-22453
Results from ROSAT p 2000 N94-22630
Highlights of Yohkoh results p 2001 N94-22632
X ray jets in the solar corona: Observations with Yohkoh Soft X Ray Telescope p 2004 N94-22655
Yohkoh Gamma ray Spectral Observations (YGSO) p 2004 N94-22656
Large-scale structure of the solar plasma corona: An analysis of Yohkoh SXT images p 2004 N94-22657

X RAYS
X ray, extreme and far ultraviolet optical thin films for space applications
[NASA-CR-194635] p 1984 N94-20128
National Synchrotron Light Source user's manual: Guide to the VUV and x ray beamlines
[DE93-019564] p 2015 N94-20260
Development and characterization of a time-, position- and energy-resolved x ray diagnostic for PBFA 2 target experiments
[DE93-019429] p 1808 N94-20297
Kinetic theory of runaway air-breakdown
[DE93-040731] p 1750 N94-20325
X ray reflection masks: Manufacturing, characterization and first tests
[BONN-IR-92-31] p 1986 N94-21043
Examination for optimization of synchrotron radiation spectrum for the x ray depth lithography
[BONN-IR-92-32] p 1987 N94-21148
Multifrequency data analysis software on STARLINK p 1925 N94-22443
VETA x ray data acquisition and control system p 2047 N94-22455
PROS: An IRAF based system for analysis of x ray data p 1925 N94-22461
ROSAT implementation of a proposed multi-mission x ray data format p 2047 N94-22462
Detection of x ray sources in PROS p 2062 N94-22466

XENON
A High Resolution Liquid Xenon Imaging Telescope for 0.3-10 MeV Gamma Ray Astrophysics: Construction and Initial Balloon Flights
[NASA-CR-194709] p 2056 N94-22281
The polarization sensitivity of the liquid xenon imaging telescope p 2056 N94-22282

Y

YAG LASERS
Development of a lidar for integration with the Naval Postgraduate School Infrared Search and Target Designation (NPS-IRSTD) system
[AD-A271847] p 1817 N94-20611

YANG-MILLS THEORY
Time evolution of the quark-gluon plasma
[DE94-000804] p 1998 N94-22389

YAW
Multisensor pinhole yawsonde
[AD-A271715] p 1808 N94-20930

YBCO SUPERCONDUCTORS
Particles on surfaces of laser ablated Y1Ba2Cu3O(7-delta) films
[DE93-040269] p 2013 N94-19929
Y-Ba-Cu-O superconducting/GaAs semiconducting hybrid circuits for microwave applications p 1735 N94-20514
Ten GHz YBa2Cu3O(7-delta) superconducting ring resonators on NdGaO3 substrates p 1735 N94-20515
A 10 GHz Y-Ba-Cu-O/GaAs hybrid oscillator proximity coupled to a circular microstrip patch antenna p 1736 N94-20517
The effect of fluctuations on the electrical transport behavior in YBa2Cu3O(7-x) p 1736 N94-20519
Relaxation of hysteresis loop in a single crystal of YBa2Cu4O8
[DE93-019519] p 2029 N94-21649
Specific heat of YBa2Cu3O7
[DE93-040640] p 2031 N94-21926
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario
[DE94-001183] p 2032 N94-21972
Melt-spin processing of high (Tc) oxide superconductors
[DE94-000696] p 2036 N94-22582

YIELD STRENGTH
Dynamic, multiaxial impact response of confined and unconfined ceramic rods
[DE93-040057] p 1829 N94-19824
Alloying effects on mechanical and metallurgical properties of NiAl
[DE93-040814] p 1694 N94-21948
Miniaturized disk-bend testing, nano-indentation, and the microstructure of ion-irradiated titanium aluminides
[DE93-040600] p 1697 N94-22559

YTTERBIUM
Temperature dependence of 4f PES features and hole occupancy in ytterbium heavy fermions
[DE93-040131] p 1691 N94-20321

YTTERBIUM COMPOUNDS
Neutron-scattering studies of Yb-bearing silicate glasses
[DE93-019768] p 1700 N94-20265
Temperature dependence of 4f PES features and hole occupancy in ytterbium heavy fermions
[DE93-040131] p 1691 N94-20321
Photoemission and the electronic properties of heavy fermions: Limitations of the Kondo model
[DE93-040191] p 1974 N94-21553

YTTRIUM
Column chromatographic separation of Y(3+) from Sr(2+) by polymeric ionizable crown ether resins
[DE94-000935] p 1683 N94-22021

YTTRIUM ALLOYS
Non-Fermi-liquid and multichannel Kondo phenomena in Y(1-x)U(x)Pd3 and related alloys
[DE93-040135] p 2015 N94-20275

YTTRIUM COMPOUNDS
Spectroscopic studies of magnetic transitions in TbPO4
[DE94-001274] p 2035 N94-22565

YTTRIUM OXIDES
Properties of E-beam interactive oxide films for nanometer scale structures
[AD-A272848] p 1675 N94-21191
Disks of YBa2Cu3O7 shocked to 10 GPa pressures
[DE94-000464] p 2031 N94-21931
Synthesis and characterization of charge-substituted garnets YCaLnGa5O12 (Ln = Ce, Pr, Tb)
[DE93-040227] p 2033 N94-21992

Z

ZENITH
Cirrus properties deduced from CO2 lidar observations of zenith-enhanced backscatter from oriented crystals p 1871 N94-22295

ZEOLITES
Thermal behavior of natural zeolites
[DE93-040091] p 1699 N94-19975
Embedded microclusters in zeolites and cluster beam sputtering: Simulation on parallel computers
[DE94-000741] p 1701 N94-20352

ZETA PINCH
Photopumped x ray laser research on Saturn
[DE93-019430] p 1816 N94-20298

ZINC
Photoluminescence spectroscopy of zinc germanium diphosphide (ZnGeP2)
[AD-A270705] p 1678 N94-19953

ZINC CHLORIDES
Zinc and titanium smoke: Chemical composition and physical characteristics
[FOA-C-40277-4.9] p 1680 N94-20552
Improvement of the stability of the process for synthesizing chemically prepared varistor powder
[DE94-000345] p 1763 N94-21654

ZINC OXIDES
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1847 N94-21614
Research on polycrystalline thin-film submodules based on CuInSe2 materials
[DE93-018223] p 2029 N94-21617

ZINC SELENIDES
Growth of zinc selenide single crystals by physical vapor transport in microgravity
[NASA-CR-194679] p 2017 N94-20346
Hydrogen in compound semiconductors
[DE93-040300] p 2031 N94-21922

ZINC-BROMIDE BATTERIES
Advanced batteries for electric vehicle applications: Nontechnical summary
[DE93-019007] p 1748 N94-19885

ZIRCALOYS (TRADEMARK)
Hydrogen pickup and redistribution in alpha-annealed zircaloy-4
[DE93-018050] p 1689 N94-20182

ZIRCONIUM ALLOYS
Using the rule of mixtures to examine the hardness of Cu/Cu-Zr multilayers
[DE94-001068] p 1697 N94-22402

ZIRCONIUM OXIDES
Guanidine based vehicle/binders for use with oxides, metals, and ceramics
[NASA-CASE-LEW-15314-1] p 1700 N94-20195
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO2
[DE93-040229] p 2033 N94-21993

ZIRCONIUM TITANATES
Preparation and properties of sol-gel derived PZT thin films for decoupling capacitor applications
[DE93-018853] p 2013 N94-19961

ZONAL FLOW (METEOROLOGY)
Interactions of free modes, tides, and gravity waves in the middle atmosphere
[REPT-84] p 1855 N94-20155
Empirical wind model for the middle and lower atmosphere. Part 2: Local time variations
[NASA-TM-104592] p 1870 N94-21882

PERSONAL AUTHOR INDEX

Typical Personal Author Index Listing

ALEXOPOULOS, JIM S. ..... p 436 N94-12023

PERSONAL AUTHOR | PAGE NUMBER | ACCESSION NUMBER

Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

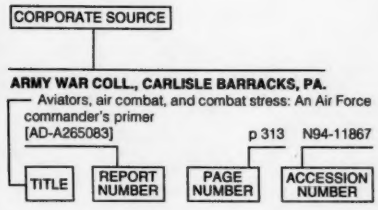
Typical Corporate Source Index Listing



Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ABASTUMANI ASTROPHYSICAL OBSERVATORY, GEORGIA (USSR).
Turbulization of free shear flows: 3D perturbations p 2000 N94-22626

ABCOR, INC., WILMINGTON, MA.
Development and demonstration of a personal monitoring system for exposure to hydrogen fluoride [DE93-041273] p 1891 N94-20935

ABERDEEN PROVING GROUND, MD.
Application of molecular modeling to biological processing [AD-A272612] p 1974 N94-21185
Method for design rotation [AD-A272440] p 1911 N94-21204
Mirror velocity sampling errors in a Michelson interferometer [AD-A273105] p 1609 N94-21508

ACADEMIA SINICA, BEIJING (CHINA).
Solar full-disk magnetic field image receiving system and observation software p 2079 N94-22552
Miyun 232 MHz survey 1: Fields centered at: alpha:00(h)41(m), delta:41 deg 12 min and alpha: 07(h)00(m),delta:35 deg 00 min p 2080 N94-22554
Dynamo driven by weak plasma turbulence: The effect of differential rotation p 2005 N94-22665

ACADEMY OF SCIENCES, POTSDAM (GERMAN D.R.).
Particle acceleration in a filamentary current sheet model p 2004 N94-22659

ACADEMY OF SCIENCES (USSR), MOSCOW.
The Erevan howardite: Petrology of glassy clasts and mineral chemistry p 1684 N94-20640
The Koshak section: Evidence for element fractionation and an oxidation event at the K/T boundary p 1862 N94-20641
Carbonaceous xenoliths from the Erevan howardite p 1684 N94-20642
Igneous rock from Severnyi Kolchim (H3) chondrite: Nebular origin p 2082 N94-20643
On magnetodynamic effects initiated by a high-speed impact of a large cosmic body upon the Earth's surface p 2082 N94-20647
Determination of cosmic bodies size-velocity distribution by observation of current impacts on Mars p 2082 N94-20648
Effects of hydrodynamics and thermal radiation in the atmosphere after comet impacts p 1862 N94-20649
Largest impact features on Venus: Non-preserved or non-recognizable? p 2096 N94-20657
Impact disturbance of the Venus atmosphere p 2106 N94-20709
Lunar basalt meteorite EET 87521: Petrology of the clast population p 2083 N94-20752
On modelling nuclear reactions in meteorites p 2085 N94-20844
Recondensation in the early solar system: Physical conditions and source material p 2085 N94-20849
K, U, and Th behavior in Martian environmental conditions p 2141 N94-20908
The simulation of action of some space environment factors on Teflon and on rubber materials p 1661 N94-21380
Mathematical modelling of economic systems p 2050 N94-22060
Macromodel of centrally planned economy p 2050 N94-22062
Computer-aided design system for objects location and reservoir with dispersed resource evolution investigation p 1923 N94-22064
IAS telecommunication infrastructure and value added network services provided by IASNET p 1744 N94-22069
Models of transient processes in centrally planned economy p 2051 N94-22071
Multicriteria optimisation problem in the agricultural modelling p 1844 N94-22073
Analysis of consumer demand structure by means of economic indexes p 2052 N94-22074
A model of negotiation in an extensive form game p 1965 N94-22075
APL-technology of computer simulation p 1923 N94-22077
The combinatorial algorithms for large scale discrete optimization problems p 1923 N94-22079
An expert system of econometric analysis p 2052 N94-22081
Three original programmes for managers p 1923 N94-22083
Method and software for decision making in public problems p 1923 N94-22087
A new programming metaphor for image processing procedures p 1927 N94-22531
PCIPS 2.0: Powerful multiprofile image processing implemented on PCs p 1927 N94-22532
Guide star catalogue data retrieval software 2 p 1927 N94-22533
Dark matter: Neutron star halo and the nature of gamma-bursts p 2002 N94-22643
Gamma ray burst as a result of the explosive instability in the magnetosphere of old neutron star p 2007 N94-22675

ACOUSTICAL SOCIETY OF AMERICA, NEW YORK, NY.
U.S. Tag for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock: Minutes of the accredited standards committee on bioacoustics, S3 [AD-A273014] p 1897 N94-21309

ADMIRALTY RESEARCH ESTABLISHMENT, GOSPORT (ENGLAND).
The application of spaceborne synthetic aperture radar in the maritime environment [DRA-TM(AWE)-91013] p 1737 N94-20596

ADVANCED MATERIALS, INC., METAIRIE, LA.
Cold-start minidiesel engine development [AD-A271064] p 1823 N94-20567

ADVANCED PHOTOVOLTAIC SYSTEMS, INC., PRINCETON, NJ.
Research on stable, high-efficiency amorphous silicon multijunction modules [DE93-018220] p 1850 N94-22257

AERODYNE RESEARCH, INC., BILLERICA, MA.
Model for liquid boron oxide droplet gasification in H/O/C/F combustion environments [AD-A272911] p 1682 N94-21243

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
An assessment of COMSCAN, a Compton backscatter imaging camera, for the one-sided non-destructive inspection of aerospace components [AD-A271331] p 1806 N94-19837
Literature review of the errors-in-variables approach to the problem of system identification [AD-A271098] p 1949 N94-19907
Development and operation of the F/A-18 model control surface actuators [AD-A271330] p 1645 N94-19914
Detecting topographical regions in digital terrain maps [AD-A272889] p 1841 N94-21453
Damage states around fastener holes in thick graphite/epoxy composite laminates [AD-A272613] p 1675 N94-21504

AEROSPACE CORP., EL SEGUNDO, CA.
Acoustic microscopy and nonlinear effects in pressurized superfluid helium [AD-A270568] p 1967 N94-19949
On the theory of morphology-dependent resonances: Shape resonances, width formulas, and graphical representations [AD-A272279] p 2037 N94-20945
The use of screening tests in spacecraft lubricant evaluation [AD-A272943] p 1705 N94-21225
Conversion of LDEF experiment M0003 sample observation database to MS-DOS formats [AD-A272945] p 1681 N94-21226

AEROSPACE CORP., LOS ANGELES, CA.
Parameters affecting hydrogen chloride measurements [AD-A271326] p 1851 N94-20025

AEROSPACE INDUSTRIES ASSOCIATION OF AMERICA, INC., WASHINGTON, DC.
Aerospace: Facts and figures, 1992-1993 [AD-A272571] p 1635 N94-21419

AEROSPACE MEDICAL DIV., BROOKS AFB, TX.
Physiological efficacy of a lightweight ambient air cooling unit for various applications [AD-A272952] p 1896 N94-21247

AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
PEGASUS, electronic bulletin board system user's guide [AD-A271679] p 2044 N94-21363

AEROSPACE MEDICAL RESEARCH LABS., WRIGHT-PATTERSON AFB, OH.
System test results of the Advanced Technology Anti-G Suit (ATAGS) [AD-A271535] p 1896 N94-20914

AGENCY OF INDUSTRIAL SCIENCE AND TECHNOLOGY, TOKYO (JAPAN).
Evaporation of a sodium tellurite melt in the jamic low gravity drop shaft p 1713 N94-20605

AICHI UNIV. OF EDUCATION (JAPAN).
MHD flows from compact objects: Effects on magnetic field configurations p 2008 N94-22684
Generation and maintenance of bisymmetric spiral magnetic fields in disk galaxies in differential rotation p 2010 N94-22695

AIR FORCE AVIONICS LAB., WRIGHT-PATTERSON AFB, OH.
Surface states at the GaAs-germanium nitride interface p 1709 N94-20973

AIR FORCE ENVIRONMENTAL TECHNICAL APPLICATIONS CENTER, SCOTT AFB, IL.
An analysis of cloud-cover reporting in the 1977 surface observation database [AD-A271102] p 1864 N94-19852

UNIVERSITIES SPACE RESEARCH ASSOCIATION, HUNTSVILLE, AL.
Studies in remotely sensed geophysical parameter retrieval and analysis
[NASA-CR-194768] p 1842 N94-22374
UNIVERSITY COLL., DUBLIN (IRELAND).
An exploration of clause boundary effects in SRN representations p 1937 N94-20253
UNIVERSITY OF CENTRAL FLORIDA, ORLANDO.
Model-based reasoning for power system management using KATE and the SSM/PMAD
[NASA-CR-194716] p 1671 N94-21882
UNIVERSITY OF SOUTH FLORIDA, TAMPA.
Advanced processing technology for high-efficiency thin-film CuInSe2 solar cells
[DE93-010045] p 1847 N94-21614
UNIVERSITY OF SOUTHERN CALIFORNIA, LOS ANGELES.
High efficiency epitaxial optical reflector solar cells
[DE93-017115] p 1845 N94-19805
A proposed research program in information processing
[NASA-CR-194271] p 2041 N94-20134
A marine sedimentary model for the evolution of the northern plains p 2091 N94-20395
Center for the integration of optical computing
[AD-A271874] p 1899 N94-20469
Investigation of heterojunctions and multiple quantum well structures using crystalline organic semiconductors
[AD-A272113] p 2018 N94-20569
Composite materials with improved properties in compression
[AD-A272837] p 1675 N94-21176
Surface science and modeling studies of endothermic fuels catalysis
[AD-A272850] p 1712 N94-21192
Establishing the basis for validated predictions of highly non-equilibrium flows (with 9 attachments)
[AD-A272918] p 1802 N94-21220
Distributed input/output processing in data-driven multiprocessors
[DE94-000323] p 1937 N94-22378
UNIVERSITY OF SOUTHERN CALIFORNIA, MARINA DEL REY.
Explainable expert systems: A research program in information processing
[NASA-CR-193422] p 2041 N94-20133
UNIVERSITY OF SOUTHERN ILLINOIS, CARBONDALE.
Practical issues in implementing roving spares in VLSI systolic arrays p 1758 N94-21114
UNIVERSITY OF SOUTHERN MISSISSIPPI, HATTIESBURG.
Processing of climatological data for model initialization
[AD-A271878] p 1865 N94-20487
UNIVERSITY OF SOUTHWESTERN LOUISIANA, LAFAYETTE.
A statistical-based scheduling algorithm in automated data path synthesis p 1764 N94-21706
Micro-rollback and self-recovery synthesis p 1765 N94-21707
UNIVERSITY OF WESTERN MICHIGAN, KALAMAZOO.
Testing double ionization mechanisms with highly-charged ions
[DE93-018750] p 1970 N94-19958
UNIVERSITY OF WESTERN ONTARIO, LONDON.
Linear structures on the small inner satellites of Saturn p 2121 N94-20797
Response statistics of shell structures with geometrical and material nonlinearities, volume 1
[ISBN-0-315-84006-4] p 1833 N94-22590
Mobile robot perception in unknown and unstructured dynamic voxel environments
[ISBN-0-315-83951-1] p 1947 N94-22591
What is normal among the A-type stars?
[ISBN-0-315-83947-3] p 2081 N94-22592
The formation of massive stars: A 30 Mo case study
[ISBN-0-315-83944-9] p 2081 N94-22593
UTAH STATE UNIV., LOGAN.
Imaging radar studies of atmospheric winds and waves
[AD-A271672] p 1866 N94-20918
A novel visual hardware behavioral language p 1765 N94-21715
UTAH UNIV., SALT LAKE CITY.
Testing self-timed circuits using scan paths p 1757 N94-21109
Robust neural classifier circuits using asynchronous design p 1757 N94-21111
Reliable interface design for combining asynchronous and synchronous circuits p 1758 N94-21119

V

VICTORIA UNIV. (BRITISH COLUMBIA).
A simplified method for S-parameter calculations of metal septum waveguide filters p 1782 N94-22180
Coded 64QAM using a binary convolutional code p 1747 N94-22223
Applications of a two-dimensional nonlinear filters to image restoration p 1789 N94-22225
VIGYAN RESEARCH ASSOCIATES, INC., HAMPTON, VA.
Robust unstructured grid generation with VGRID p 1919 N94-22359
VIRGINIA POLYTECHNIC INST. AND STATE UNIV., BLACKSBURG.
Compression strength of composite primary structural components
[NASA-CR-194561] p 1830 N94-20159
Improvements to a method for the geometrically nonlinear analysis of compressively loaded stiffened composite panels
[NASA-CR-194715] p 1832 N94-21814
VIRGINIA UNIV., CHARLOTTESVILLE.
Determining the 3-D structure and motion of objects using a scanning laser range sensor
[NASA-CR-194745] p 1818 N94-21817
VOLVO FLYGMOTOR A.B., TROLLHAETTAN (SWEDEN).
A tutorial on the aero/thermodynamical design of liquid-propellant rocket engine nozzles p 1668 N94-20074
Turbine design p 1668 N94-20075
VON KARMAN INST. FOR FLUID DYNAMICS, RHODE-SAINT-GENESE (BELGIUM).
Spacecraft Propulsion
[VKI-LS-1993-01] p 1667 N94-20068
Three dimensional unsteady flow calculations in radial components p 1669 N94-20080
VRIJE UNIV., AMSTERDAM (NETHERLANDS).
Column reduced rational matrix functions with given null-pole data in the complex plane
[PB93-220531] p 1960 N94-22099
Modular interval spaces
[PB93-220663] p 1961 N94-22266

W

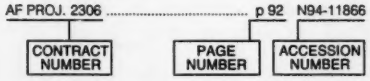
WASEDA UNIV., TOKYO (JAPAN).
The relaxed state and entropy production due to the electric resistivity and viscosity of plasma p 2010 N94-22696
WASHINGTON STATE UNIV., PULLMAN.
Design of a new squaring function for the Viterbi algorithm p 1764 N94-21699
WASHINGTON UNIV., SAINT LOUIS, MO.
The p-version of the finite element method in incremental elasto-plastic analysis
[NASA-CR-194707] p 1830 N94-20036
Identification of an interstellar oxide grain from the Murchison meteorite by ion imaging p 2082 N94-20659
Venus magmatic and tectonic evolution p 2101 N94-20683
Elevated initial Sr-87/Sr-86 in ordinary chondrite metal p 1685 N94-20695
The roughness of the Martian surface: A scale dependent model p 2115 N94-20762
Rare Earth elements in individual minerals in Shergottites p 1686 N94-20852
Radio and optical emission: Spectral shapes and breaks in GRB
[NASA-CR-194763] p 2150 N94-21781

Relativistic shock spectra: A prediction
[NASA-CR-194764] p 2150 N94-21782
WASHINGTON UNIV., SEATTLE.
Detectability of crystalline ferric and ferrous minerals on Mars p 2110 N94-20730
Acoustic monitoring of global ocean variability
[AD-A271998] p 1883 N94-21366
WATERLOO UNIV. (ONTARIO).
Formal hardware verification in Maple p 1771 N94-22112
Impact of partitioning on parallel discrete event simulation of logic circuits p 1772 N94-22115
A neural M-ary tree method for data compression p 1780 N94-22166
Trends in software reliability modeling p 1788 N94-22214
Asynchronous detection of SSB-SC data signals p 1747 N94-22217
Passenger terminal simulation model
[ISBN-0-315-61113-8] p 1652 N94-22423
WEST (FREDERICK R.), HANOVER, PA.
Balloon exploration of the northern plains of Mars near and north of the Viking 2 landing site p 2092 N94-20401
WEST VIRGINIA UNIV., MORGANTOWN.
Problems related to conservation laws: Phase transitions and viscoelasticity
[AD-A271429] p 1698 N94-19840
WESTINGHOUSE HANFORD CO., RICHLAND, WA.
Interpretation of Ground Penetrating Radar data at the Hanford Site, Richland, Washington
[DE93-040409] p 1743 N94-22557
WESTINGHOUSE IDAHO NUCLEAR CO., INC., IDAHO FALLS.
Passive Cryogenic Sampler
[DE94-000918] p 1811 N94-22392
WESTINGHOUSE SAVANNAH RIVER CO., AIKEN, SC.
Rapid heating tensile testing update: 304L stainless steel
[DE93-018770] p 1688 N94-19942
Hydrogen isotope separation experience at the Savannah River Site
[DE93-019832] p 1679 N94-20266
An analysis of pressure driven cross-flow through a long slot connecting two parallel channels
[DE93-040181] p 1804 N94-21765
Gamma ray spectrometry of LDEF samples: Results of 1992 analyses
[DE94-001177] p 1684 N94-22046
Implementation of a laboratory information management system for environmental regulatory analyses
[DE94-001198] p 2046 N94-22407
WICHITA STATE UNIV., KS.
Activities of National Inst. for Aviation Research
[NIAR-93-16] p 2151 N94-20150
Proceedings of the Twentieth Annual Technologyfest p 1645 N94-20188
Aviation safety research at the National Institute for Aviation Research, Wichita State University
[NIAR-93-4] p 1641 N94-20189
Evaluation of head injury criteria
[NIAR-93-2] p 1890 N94-20190
AIAA Techfest 29 proceedings
[NIAR-93-1] p 1635 N94-20191
WINDSOR UNIV. (ONTARIO).
Noise filtering using multilayer feedforward neural network p 1770 N94-22104
An in-place and in-order algorithm for the discrete cosine transform p 1771 N94-22111
Cascaded recursive artificial neural networks p 1780 N94-22167
WISCONSIN UNIV., MADISON.
Collisional processes involving atmospheric gases
[AD-A270729] p 1854 N94-19954
Fusion plasma theory grant. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE94-000779] p 1994 N94-20940
Fusion Plasma Theory. Task 1: Magnetic confinement fusion plasma theory
[DE94-000778] p 1998 N94-22019
CIMSS FIRE research activities p 1873 N94-22307
Cirrus cloud retrievals from HIS observations during FIRE 2 p 1875 N94-22315
Efficient transfer of images over networks p 1748 N94-22517
WISCONSIN UNIV., MILWAUKEE.
Rewetting of monogroove heat pipe in Space Station radiators
[NASA-CR-194781] p 1804 N94-21820
Inelastic electron scattering from surfaces
[DE94-001738] p 1977 N94-22049
WITWATERSRAND UNIV., JOHANNESBURG (SOUTH AFRICA).
Kalkkop crater, Eastern Cape: A new impact crater in South Africa p 1862 N94-20714
WOODS HOLE OCEANOGRAPHIC INST., MA.
On the sources of North Atlantic deep water
[AD-A270854] p 1881 N94-19895
Design of a controllable pitch underwater thruster system
[AD-A271140] p 1821 N94-20021
The marine light-mixed layer experiment cruise and data report: R/V endeavor cruise EN-224, mooring deployment, 27 April-1 May 1991: Cruise EN-227, mooring recovery, 5-23 September 1991
[AD-A271175] p 1864 N94-20186
Comparison of satellite-derived velocity fields in the coastal transition zone
[AD-A272565] p 1883 N94-21360
WOODS HOLE RESEARCH CENTER, MA.
Seafloor characterization/Galapagos propagating rift
[AD-A272001] p 1882 N94-20581
WOOLLAM (JOHN A.) CO., LINCOLN, NE.
In-situ spectroscopic ellipsometry for real time semiconductor growth monitor p 2024 N94-21003
Real-time analysis of in-situ spectroscopic ellipsometric data during MBE growth of III-V semiconductors p 2024 N94-21004
WORLD METEOROLOGICAL ORGANIZATION, GENEVA (SWITZERLAND).
Snow cover measurements and areal assessment of precipitation and soil moisture
[WMO-749] p 1841 N94-21068
Remote sensing for hydrology progress and prospects
[WMO-773] p 1841 N94-21069
Simulated real-time intercomparison of hydrological models
[WMO-779] p 1867 N94-21070
WRIGHT LAB., WRIGHT-PATTERSON AFB, OH.
Analysis and design of weight balancing system for laser velocimetry traverse
[AD-A271171] p 1816 N94-20546
The 1992 USAF structural integrity program conference
[AD-A272876] p 1635 N94-21194
Characteristic based methods for the time-domain Maxwell equations
[AD-A272973] p 1802 N94-21263
The mechanical property data base from an Air Force/industry cooperative test program on advanced aluminum alloys: 2091 sheet, plate, and 8090 extrusion
[AD-A273091] p 1692 N94-21525
WRIGHT STATE UNIV., DAYTON, OH.
Perception/action: An holistic approach 2
[AD-A271822] p 1891 N94-20827
WYOMING UNIV., LARAMIE.
Two-polarity magnetization in the Manson impact breccia p 1863 N94-20789

Y

YALE UNIV., NEW HAVEN, CT.
Theoretical and numerical studies in magnetic fusion
[DE94-000536] p 1993 N94-20937
Fast fourier transforms for nonequispaced data
[AD-A272687] p 1954 N94-21164

Typical Contract Number Index Listing



Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

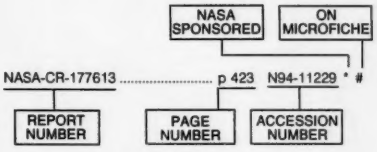
Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *NASA Open Volumes on Aerospace (NOVA). NOVA* is issued on the 15th of each month and is available from the NASA Center for AeroSpace Information, at the address below.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *NOVA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

16 SPACE TRANSPORTATION

Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance*. For space suits see *54 Man/System Technology and Life Support*.

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 76344 Eggenstein-Leopoldshafen, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *NOVA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00/domestic, $117.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.
